NOTICE TO THE MARKET

INTEGRATED DISTRIBUTION PARTNERSHIP WITH 3TENTOS BIODIESEL PLANT IN MATO GROSSO TO SERVE AGRIBUSINESS

TRÊS TENTOS AGROINDUSTRIAL S/A ("3tentos" or "Company"), informs its shareholders and the market in general, that in an unprecedented movement of logistical integration in the fuel market in Brazil, 3tentos, in partnership with Ipiranga, will implement in the city of Vera, in the north of Mato Grosso, a fuel distribution base, which will operate integrated with its biodiesel plant, a company from Rio Grande do Sul founded 30 years ago and which has been operating in the Midwest since 2021.

The project, which is scheduled to come into operation in 2027, has a structure of up to 30,000 m² and was designed from the beginning to unite, in a single complex, the production and distribution of fuel, in the region that is today the largest grain producer in the country.

The unit will have the capacity to handle 360 million liters per year and will be able to store up to 3 million liters in tanks during its initial phase. The fuel will later be sold in bulk to rural producers, in addition to being used to supply trucks and at gas stations.

The partnership marks a new chapter for 3tentos' operations in the Midwest, which currently accounts for 50% of the company's revenue. Opened in 2023, the Vera (MT) plant is undergoing expansion and, by the end of 2025, will increase its soybean processing capacity from 3,000 tons/day to 4,800 tons/day, also enabling the expansion of biodiesel production, which will increase from the current 1 million liters/day to 1.5 million liters/day by early 2026.
