BNDES publishes its 2021 Annual Report

Rio de Janeiro, September 2nd, 2022

The Brazilian Development Bank (BNDES) published its 2021 Annual Report, which presents the main results delivered in the year and how the Bank's performance is connected to the sustainable development agenda. Based on the Integrated Reporting and the Global Reporting Initiative (GRI) standards, the publication seeks to explain how the BNDES generates value in the short, medium and long term. It also maps the Bank's economic, social and environmental impacts.

In this edition, the report highlights five material themes, defined in consultation with different audiences: (i) support for micro, small and medium enterprises (MSMEs), (ii) privatization and project structuring; (iii) impact of the BNDES's performance; (iv) new solutions and products; and (v) sustainability.

Besides these themes, the report gathers detailed information on strategy, governance, forms of action, relationships, main financial results and other aspects of the BNDES's performance, serving as a transparency and accountability instrument to its different stakeholders.

The 2021 Annual Report is available at the [BNDES Investor Relations portal](#).
