Publicly Held Company

## NOTICE TO THE MARKET

Multilaser Industrial S/A (B3: MLAS3) announces the acquisition of Watts Comércio de Patinetes Elétricos e Veículos Recreativos Ltda. (Watts), with the aim of expanding the vehicle and mobility category within the Company's current portfolio.

Watts is a startup formed in 2019 with the purpose of redefining the mobility concept through sustainable products under emission-free electric propulsion.

The company has a wide range of electric vehicles with several types of power capacity and characteristics that, combined with Atrio brand's current models, will put Multilaser in a privileged position within Brazil's mobility sector to operate in all its levels.

Featuring models with certificate attesting compliance with the Brazilian Traffic Laws (CAT), which allows for vehicle registration and licensing before traffic departments of Brazilian states, these products have the potential to be purchased by professionals and companies that operate in the logistics sector and vehicle rental, or that require high mobility of staff and/or goods, as they can significantly reduce maintenance costs, in addition to being more sustainable. Among the products approved by the National Traffic Department (DENATRAN), electric motorcycle E-125 stands out. Its performance and usability are equivalent to those of a 125-cc combustion engine motorcycle, but E-125 is more economical, and carbon- and noise-free.

This acquisition will not only enable Multilaser to be the first automaker manufacturing fully electric vehicles in the Manaus Free Trade Zone but also to increase Watts' commercial capillarity and technical support, which already has a network of stores and dealerships in 10 Brazilian states and the Federal District.

Fully aligned with the Company's expansion strategy, Multilaser will invest R\$10.5 million in the transaction announced herein using proceeds from its IPO held in July 2021.
