## NOTICE TO THE MARKET

Multilaser Industrial S/A (B3: MLAS3) announces that it has gone into partnership with DJI to sell and distribute DJI products. DJI is a global benchmark company in drones, action cameras and stabilizers.

It is recognized for its innovative spirit and the development of cutting-edge products and technologies for the retail, corporate and agribusiness industries.

In Brazil, Multilaser will engage in the exclusive distribution of retail products including small-sized drones, action cameras and smartphone stabilizers for photo shooting and video recording. Among the products, the Mavic line stands out with the Mavic 3 and Mavic Air 2S models, and DJI's most affordable drones, Mini2 and MiniSE.

Expecting to begin distributing the first DJI products in 2Q22, Multilaser predicts that the partnership announced herein will expand its addressable market and product portfolio, with the potential to boost demand for drones and action cameras in Brazil, as it provides DJI products with increased capillarity once they are now integrated with one of the most advanced and efficient commercial and logistics structures of the industry in Brazil.

The DJI brand will be added to the current portfolio of Multilaser's global partners, reaching eleven brands.
