# CAP S.A.

The rating action reflects Fitch Ratings' expectation regarding CAP S.A.'s credit metric deterioration, which is consistent with the temporary downturn of two of its subsidiaries' operating performance, especially its steel producer Compañía Siderúrgica Huachipato S.A. (CSH). Fitch expects net debt leverage ratios to be pressured in 2025, considering Fitch's midcycle price assumptions.

The Negative Outlook factors in CAP's slower than expected deleveraging, which considers the complex market conditions of the global steel market. It particularly considers CSH, which is burning significant amounts of cash.

### **Key Rating Drivers**

**Uncertainty About Noncore Businesses:** Fitch expects CAP's net leverage to be 1.7x in 2024, 2.2x in 2025 and 1.9x in 2026. These pressured credit metrics take into account expectations of zero EBITDA from its steel operations in 2024 and USD9 million beyond, compared with negative USD150 million last year.

This is an important assumption given limited visibility regarding the impact of the optimization and cost-saving measures being implemented, and about a potential rejection or acceptance of CAP's filing for import duties on Chinese steel. Fitch also assumes a favorable outcome for Cintac S.A.'s bank debt refinancing and its potential deleverage capacity. A positive outcome of these events could result in stabilization of the Outlook.

**Temporary Strain in Cash Flow:** Over the rating horizon, the company's EBITDA including dividends to minorities is expected to decrease to USD709 million in 2024, USD549 million in 2025 and USD511 million in 2026, considering Fitch's price deck of USD95/tonne in 2024, USD80/tonne in 2025 and USD75/tonne in 2026. The projection considers a neutral EBITDA for the steel company.

Fitch projects FCF of negative USD26 million in 2024; USD29 million in 2025 and USD211 million in 2026, incorporating a moderation in both capex and dividends in a low price scenario assumption. Capex would reach USD260 million in 2025 and 2026, and dividends of 35% of net profit.

**Historically Conservative Financial Profile:** The rating affirmation is based on CAP's historically conservative capital structure and demonstrated resilience in periods of price deterioration. CAP benefits from its niche market position as a value-added iron ore producer, which provides the company with high realized prices and a buffer against iron ore market volatility. The company is able to adjust its product blend in response to lower premiums to take advantage of its competitive cost structure and maintain strong margins.

**Highly Concentrated; Strong Reserves:** More than 95% of CAP's consolidated EBITDA comes from iron ore mining, the profitability and market position of which are much stronger than those of the steelmaking and processing businesses. Increased penetration of low priced Chinese imports markedly affected steelmaking margins and prompted the local industry to ask for government support. Fitch positively factors the long reserve life of CAP's iron ore mining business. CAP had 817 million tons of iron ore in reserve in 2022, which is slightly below 50 years of mine life at an expected 17 million tons of production per year. The average grade in reserves is 30%, but reserves will be recertified in 2024.

**Equity Rating:** CAP's equity rating is based on the company's strong credit profile, its long track record in the stock market and a market presence of 100%. CAP also reports market capitalization of USD1 billion as an important player in the Santiago stock market, and high daily trading volume that averaged USD2.3 million throughout January 2024.

## **Rating Derivation Relative to Peers**

CAP's ratings are constrained by its small size relative to the global mining industry, and its low mining and geographic diversification. The latter is somewhat compensated for by conservative financial management reflected in a resilient financial profile through the cycle. The company's business profile is similar to Ferrexpo plc (CCC+), which is among the top five pellet exporters globally at 12.4 million tonnes of pellets, compared with CAP's pellet production capacity of 4.0 million tonnes.

CAP also has a capacity of 12.5 million of pellet and sinter feed, reaching total production capacity of 16.5 million tonnes. Ferrexpo benefits from a slightly better position along the global iron ore cost curve, and both companies have conservative financial profiles.

However, Ferrexpo's rating was downgraded due to the war in Ukraine, which negatively affected the company's operating environment.

## **Rating Sensitivities**

### Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

• The Outlook would be revised to Stable if the company's EBITDA coverage ratio recovers to more than 8.5x and it resolves the cash burn of its steel business on a sustained basis.

### Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- A downgrade would be possible if CSH is not able to stabilize its operating cash generation and continues draining the group's cash and affecting the consolidated credit profile;
- A consolidated cost profile consistent with the fourth quartile;
- A sustained net debt/EBITDA ratio above 2.0x and/or EBITDA to interest expense of 8.5x or less;

• A significant and prolonged deterioration in liquidity and persistent negative FCF.

## Liquidity and Debt Structure

Low Refinancing Risk: The company reported USD240 million of cash in addition to an available revolving credit facility (RCF) of USD75 million as of September 2023, which faces short-term debt of USD743 million. However, short-term debt corresponds to working capital funding, including pre-export facilities at Compañía Minera del Pacífico (CMP) of between USD350 million and USD375 million; an RCF at the holding level between USD70 million and USD75 million; and close to USD220 million of Cintac's steel import financing, with approximately USD113 million off-balance-sheet confirming transactions. Fitch estimates a significant amount of Cintac's debt will move to the long term, in line with the refinancing process that would finalize in March 2024.

The company has a comfortable long-term debt amortization schedule, with the next debt payment estimated at USD355 million in 2026 at the CMP level. Other debt consists of bonds totaling USD341 million that matures beyond the projected period.

### **ESG Considerations**

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit https://www.fitchratings.com/topics/esg/products#esg-relevance-scores.

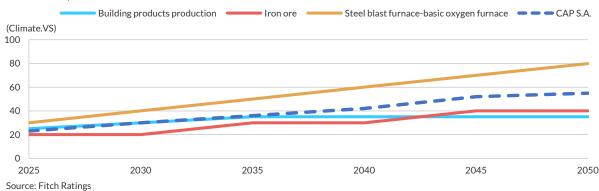

## **Climate Vulnerability Considerations**

Fitch uses Climate Vulnerability Signals (Climate.VS) as a screening tool to identify sectors and Fitch-rated issuers that are potentially most exposed to credit-relevant climate transition risks and, therefore, require additional consideration of these risks in rating reviews. Climate.VS range from 0 (lowest risk) to 100 (highest risk). For more information on Climate.VS, see Fitch's *Corporate Rating Criteria*.

The fiscal 2022 revenue-weighted Climate.VS for CAP for 2035 is 36, suggesting moderate exposure to climate-related risks in that year. For further information on how Fitch perceives climate-related risks in the Metals & Mining sector see *Metals & Mining – Long-Term Climate Vulnerability Signals*.

CRU

Information on this page was provided by CRU. Fitch Ratings has partnered with CRU, including their analysis of cost, prices and market developments, to enhance research and analytics in the metals and mining sector. Fitch develops forecasts and assumptions for certain variables (for example, prices) for the purposes of its rating analysis that may differ from CRU forecasts in this report. For more information on CRU and the CRU information specifically included in this report, visit www.crugroup.com.

## Iron Ore Market Analysis - CRU October 2023

The iron ore price fluctuated in 3Q23, starting at USD110 per dry metric ton (dmt) before dropping to USD104/dmt in mid-August as rumours of steel production cuts in China intensified. The price recovered toward the end of the quarter, reaching USD124/dmt in mid-September on positive Chinese economic data. Iron ore consumption has been high in China, despite low end-use steel demand and narrow steel margins. Blast furnace capacity utilisation rates were the highest since October 2020, at 93%. Iron ore inventories in China are at 50 days of consumption, a multi-year low, which has supported prices.

CRU forecasts global iron ore imports to reach 1,647 million tonnes (mt) in 2023, up from 1,559mt in 2022. Chinese imports were 9% higher than the six-year average in January to August. CRU expects this to slow after the peak season in 3Q23. Japan, Korea, Taiwan (JKT) imports remain below the average indicating weak demand. Inventories in JKT are building, with some ore being resold from Japan to China. Iron ore supply from major exporters has been strong, with all four majors reporting increased production in 2023. Exports from Brazil have had a strong recovery following seasonal rainfall disruptions earlier in the year and CRU forecasts them to increase by 18mt to 358mt in 2023.

CRU expects the price to fall to USD109/t in 4Q23 with limited upside in demand in key import markets and strong supply from the major exporters. CRU expects low inventory levels in China, which have increased the price, to ease in the coming years as they restock. CRU has revised its 2024 price forecast up by USD3/dmt to USD99/dmt due to this restocking.

## Iron Ore: Prices Recover Above USD100/t on Strong Chinese Demand

Fluctuating Iron Ore Price in 3Q23 Iron ore fines, 62% Fe CFR China (USD/dmt) 200 150 100 50 Aug 22 Feb 23 Aug 23 Dec 22 23 22 22 22 22 23 21 Jun Jun Oct Dec Feb Apr oct Apr Source: CRU Robust 3Q23 Steel Output Despite Narrow Margins

Source: CRU

#### Chinese Iron Ore Still Critically Low Chinese iron ore inventories

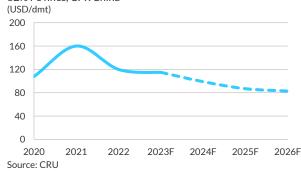

- The iron ore price averaged USD113/dmt in 3Q23 up slightly from USD111/dmt in 2Q23. Consumption levels were higher than CRU expected in China upon positive economic results despite little improvement in end-use steel demand.
- High Chinese crude steel output boosted iron ore consumption in 3Q23. Crude steel output hit a multi-year high in 3Q, reaching 251mt. Fears of steel output cuts pushed prices higher and led to increased steel production in China despite narrow margins. Output momentum is likely to reduce in the coming months due to weak margins.
- Chinese iron ore inventories declined to 50 days of consumption by end-3Q23, 15 days lower than historical averages. Ore inventories remain significantly low due to high consumption rates and slow offloading from ports due to weather turbulence.
- CRU expects global iron ore imports to reach 1,647mt in 2023, up 5.7% yoy. China imports have been above the past six-year average. However, JKT imports have been below the past six-year average, with inventories at high levels. Imports are likely to decline gradually to 1,628mt in 2026.
- Global iron ore exports are likely to increase by 58mt in 2023. Australian exports are likely to increase by 10mt this year, but more replacement projects will be needed in the coming years. Brazilian exports are to rise 18mt in 2023, and are on track to reach the highest export level since its 2019 dam incident.
- CRU expects the iron ore price to fall to USD99/dmt in 2024, as weak expected demand in China coincides with improving global supply. CRU expects prices to continue to fall to USD83/dmt by 2026 as the market shifts from undersupply to oversupply.

#### Mixed Signals from Demand, but China Is Key Annual iron ore imports

## **Key Assumptions**

### Fitch's Key Assumptions Within Our Rating Case for the Issuer Include

- Fitch's midcycle iron ore prices at USD118/tonne for 2023, USD95/tonne for 2024, USD80/tonne for 2025 and USD75/tonne for 2026;
- Cash costs of USD53/tonne for 2023, USD49/tonne for 2024, USD49/tonne for 2025 and USD49/tonne for 2026;
- Compania Minera del Pacifico S.A.'s shipments of approximately 17,000 tonnes for 2023; 16,800 tonnes for 2024; 16,900 tonnes for 2025 and 17,500 tonnes for 2026;
- Freight costs of USD20/tonne for the rating horizon;
- Capex at USD512 million in 2023, USD475 million in 2024, and USD260 million per year in 2025 and 2026;
- Steel subsidiary EBITDA generation of approximately negative USD150 million in 2023; zero in 2024, and USD9 million in 2025 and 2026.

#### How to Interpret the Forecast Presented

The forecast presented above is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be optentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

How to Read This Page ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant. The Environmental (E), Social (8) and Governance (3) tables break out the ESG general issues and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signaling the credit-relevance of the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signaling the credit-relevance column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The vertical color bas are visualizations of the frequency of occurrence of the highest constituent relevance scores. They do not represent an aggregate of the relevance scores or aggregate ESG credit relevance. The Credit-Relevant ESG Derivation table's far right column is a visualization of the frequence of the highest ESG relevance scores across the combined E, S and G categories. The three columns to the left of ESG Relevance to Credit Rating summarize rating relevance and impact to credit fram ESG issues that are drivers or potential drivers of the issuer's credit rating (corresponding with scores of 4' and '5' are assumed to reflect a negative impact unless indicated with a '+' sign for potwise impact... Classification of ESG issues has been developed from Fitch's sector ratings riteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI), the Sustainability Accounting Standards Board (SASB), and the Word Bank.

|   | CREDIT-RELEVANT ESG SCALE  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|
| н | How relevant are E, S and G issues to the overall credit rating?   |  |  |  |  |  |  |  |
| 5 | Hghly relevant, a key rating driver that has a significant impact on the rating<br>on an individual basis. Equivalent to "higher" relative importance within<br>Navigator.                             |  |  |  |  |  |  |  |
| 4 | Relevant to rating, not a key rating driver but has an impact on the rating in<br>combination w ith other factors. Equivalent to "moderate" relative importance<br>w ithin Navigator.                  |  |  |  |  |  |  |  |
| 3 | Minimally relevant to rating, either very low impact or actively managed in a<br>w ay that results in no impact on the entity rating. Equivalent to "low er"<br>relative importance w ithin Navigator. |  |  |  |  |  |  |  |
| 2 | Irrelevant to the entity rating but relevant to the sector.  |  |  |  |  |  |  |  |
| 1 | Irrelevant to the entity rating and irrelevant to the sector.  |  |  |  |  |  |  |  |

#### SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

#### DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers following bv this link: https://www.fitchratings.com/understandingcreditratings. In addition, the following https://www.fitchratings.com/rating-definitions-document details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at https://www.fitchratings.com/site/regulatory. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMAor FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources. Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification such as audit reports and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information hey provide to Fitch and to the market in offering and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions should thure events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events that were to anticipat

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$75,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a sume as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch researc

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (more "non-NRSRO") and therefore credit rating subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
