# Earnings Release

2Q26

Compass' history began in 2012, with Cosan's acquisition of Comgás. Since then, the Company has developed a business model that expanded access to natural gas through continuous investments in distribution infrastructure and customer connections.

Based on the experience accumulated in managing Comgás, Compass was created in 2020 with the purpose of offering solutions for an increasingly competitive and flexible gas market in Brazil. Since then, the Company has invested more than R\$ 15 billion in the development of the Brazilian natural gas market.

In May 2026, the Company completed its initial public offering (IPO) and began trading its shares (PASS3) on B3's Novo Mercado, the segment that brings together companies with the highest corporate governance standards. The transaction represented an important recognition of Compass' executed strategy and growth potential.

With operations structured into Distribution and Marketing & Services, Compass consolidates itself as a gas business platform focused on sustainable growth. The Company operates through a portfolio of strategic assets that drive the transformation of the Brazilian natural gas market.

## Distribution

Compass operates the largest listed natural gas distribution platform in Brazil, with presence in six strategic states in the center-south regions.

In addition to Comgás, Brazil's largest gas distributor, it manages another 6 gas distributors through Commit, a Compass subsidiary that has Mitsui as a partner. The regulated assets, supported by long-term contracts, provide high cash flow predictability and support the continuity of infrastructure investments.

## Marketing & Services

Through Edge, Compass expands its operations beyond distribution, offering competitive, flexible and reliable solutions both for customers connected to the grid and for off-grid operations.

Edge's portfolio includes assets such as TRSP (São Paulo Regasification Terminal), the biomethane purification plant (OneBio) and B2B LNG operations.

This set of assets positions Edge as an important growth vector for the Company.

Compass ended the second quarter of 2026 maintaining the consistent execution of the strategy presented to the market during the IPO.

The Company advanced simultaneously in the expansion of its regulated distribution assets, in the growth of the Marketing & Services platform and in the consolidation of new growth vectors, such as B2B LNG and biomethane, while maintaining discipline in capital allocation, cash generation and financial solidity.

## Quarter Highlights

- The Company completed the first IPO on B3 in 5 years and the second-largest Utilities IPO in Brazil in the last 25 years, in the amount of R\$ ~3.0 billion.
- Distribution of proceeds totaling R\$ 406 million in June 2026, referring to the mandatory minimum dividends related to fiscal year 2025, delivering a dividend yield<sup>1</sup> of 5.2% to the Company's shareholders.
- Signing of Edge's first off-grid mobility contract, with a 10-year term, for the supply of LNG, reinforcing the strategy of expanding low-carbon solutions for heavy-duty transport with the use of 160 trucks by 2027, and the growth potential in the coming years.
- We reached the mark of 500 LNG loads delivered to LD Celulose in the first six months, moving 16 million m<sup>3</sup>.
- At Compagas, we reached a record of 2,714 new connections completed in a single quarter, a pace of ~3.0x more connections compared to the pre-privatization period.
- Inauguration of Necta's operational excellence center, promoting greater safety and operational efficiency.

<sup>1</sup> – Dividend Yield calculated considering the proceeds approved in the last twelve months, the number of 714.190.095 shares and the price of R\$ 24,28 per share on June 30, 2026.

## Gross Profit

In 2Q26, the Company's Management Gross Profit was R\$ 1,550 million, 1% above the same period of the previous year, reflecting the higher volume traded by Edge in the free market and, in the distribution segment, the better residential and commercial volume mix, offset by lower industrial volume.

Year-to-date, Managerial Gross Profit totaled R\$ 2,784 million, an increase of 3% compared to 6M25, explained by the higher volume traded by Edge in the free market and, in the distribution segment, by the better residential and commercial volume mix.

## SG&A

In 2Q26, SG&A excluding depreciation and amortization totaled R\$316 million, an increase compared to the same period last year due to the strategic projects carried out by the Company during the period. On an adjusted basis, SG&A totaled R\$254 million, a decrease of 1%.

Year-to-date, on an adjusted basis, expenses totaled R\$474 million, a decrease of 2%. Excluding these adjustments, expenses totaled R\$536 million.

It is worth noting that operating expenses increased due to the start-up in 2026 of EDGE's new projects (B2B LNG and OneBio), and even so, the Company was able to maintain discipline in its OPEX.

## EBITDA

In the Distribution segment, EBITDA totaled R\$1,242 million, an increase of 6% versus 2Q25, due to a better volume mix in the Residential and Commercial customer classes, offsetting lower industrial demand, particularly in segments more sensitive to the economic cycle, such as chemicals, steel and ceramics. Year-to-date, EBITDA totaled R\$2,299 million, an increase of 8% compared to 6M25, explained by the same factors mentioned above.

In the Marketing & Services segment, EBITDA totaled R\$140 million (+50%), reflecting higher volumes in the free market and new cargo optimization transactions carried out during the period. Normalizing the results in both periods to reflect the timing adjustment related to cargo optimization transactions carried out in 1Q26, Normalized EBITDA was R\$182 million, an increase of 14% compared to the previous period. Year-to-date, EBITDA totaled R\$452 million, in line with R\$457 million in the previous period. On a normalized basis, EBITDA was R\$369 million, an increase of 24% compared to the same period of the previous year.

Consolidated EBITDA in 2Q26 was R\$1,275 million (+5%) compared to 2Q25. On a normalized basis, EBITDA was R\$1,316 million (+3%).

Year-to-date consolidated EBITDA was R\$2,604 million (+4%) compared to 6M25. On a normalized basis, EBITDA was R\$2,521 million (+7%).

The financial result was an expense of R\$ 473 million in the quarter, an increase of 21% compared to 2Q25.

The result is mainly explained by the higher net debt balance, partially offset by the reduction in the debt spread, reflecting the Company's liability management initiatives.

Year-to-date, net financial result totaled an expense of R\$898 million, an increase of 18%, mainly due to the higher average net debt balance and higher CDI during the period.

Net income in 2Q26 was R\$ 287 million, 19% lower when compared to the same period of 2025. The result in the period reflects the increase in EBITDA, offset by higher depreciation mainly from the new projects that came into operation and by the financial result explained above.

Year-to-date, net income decreased 13% due to higher net financial expenses and depreciation, partially offset by lower income tax and social contribution expenses.

Investments in 2Q26 were R\$ 532 million, in line with 2Q25.

From a business perspective, there was an expansion in gas distribution capex, mainly allocated to the expansion of distribution operations according to regulatory plans.

The reduction in investments in the Marketing & Services segment reflects the completion of most investments in Phase 1 of B2B LNG and Onebio, evidencing that some of Edge's projects are already in operation.

Net debt ended the quarter at R\$ 11,506 million, an increase of 3% versus 1Q26, reflecting the distribution of proceeds totaling R\$ 406 million in June, referring to the mandatory minimum dividends related to fiscal year 2025.

We ended the quarter with financial leverage of 2.3x, with 95% of financing maturing in the long term. The average term of consolidated debt at the end of 2Q26 was 5.6 years, with a cost of 99.9% of CDI, reaching the lowest historical level.

This result reflects the Liability Management work carried out by the Company over the last years, preserving the company's financial health amid a high interest rate environment and allowing business expansion without pressuring leverage.

On a consolidated basis, distributed volume in 2Q26 was 14,7 MM m<sup>3</sup>/d, a marginal reduction of 0.8% when compared to 2Q25.

The quarter's performance is explained by the better volume mix in the Residential and Commercial customer classes, driven by the increase in the customer base and the expansion of services, such as the Food Service and Hospitality sectors, which were offset by lower Industrial consumption, mainly in the chemicals, steel and ceramics sectors. The Heavy-Duty Mobility segment continues to deliver positive performance, mainly driven by the expansion of heavy-duty vehicle depots, while Light-Duty Mobility is impacted by the competitiveness compared to liquid fuels, as well as the growing adoption of hybrid and electric vehicles.

Year-to-date in 2026, 14.4 MM m<sup>3</sup>/day were distributed, in line with the same period of the previous year. Below, we present the evolution of the customer base on a consolidated basis, as well as the breakdown by customer class.

Net connections over the last twelve months increased by 179 thousand new customers, of which 148 thousand were added at Comgás, reflecting the Company's connection efficiency in meeting its regulatory cycle commitments.

At Commit, 32 thousand new connections were added, an increase of 15% compared to the previous quarter, reflecting the progress of investments in the expansion of the distribution infrastructure, increasing penetration in underserved areas.

Compared to 2Q25, the OPEX/customer indicator decreased by 6%, demonstrating the Company's efficiency, associated with the pace of new connections.

## Marketing & Services

Edge represents Compass' main growth platform, increasing the Company's exposure to the free market, flexible energy solutions and renewable fuels. In the quarter, the evolution of trading, B2B LNG and biomethane reinforced its ability to capture new opportunities arising from the opening of the Brazilian gas market.

This segment consists of the results of the subsidiary Edge, which manages TRSP, Trading, B2B LNG (off-grid) and biomethane projects.

Compass incorporates environmental, social and governance factors into its corporate strategy as part of the management of its businesses and the creation of long-term value. The ESG agenda is structured around three strategic pillars:

## ENVIRONMENTAL

### Enable a Safe and Efficient Energy Transition

We are committed to the transition to an energy matrix with lower environmental impact and believe that natural gas is a fundamental ally for this process to occur efficiently and safely.

### 2030 Commitments

- Achieve carbon neutrality for scopes 1 and 2 in distribution businesses;
- Lead the distribution of renewable gas in Brazil;
- Drive the use of gas in the national transport matrix, replacing fuels with greater environmental impact.

## GOVERNANCE

### Develop people and Society

Brazil's natural gas market has been undergoing a gradual opening process. Promoting a more competitive and efficient market and adopting the best governance practices in our businesses are Compass commitments.

### 2030 Commitments

- Promote the free gas market in Brazil;
- Expand supply alternatives and the number of consumers with access to gas in Brazil;
- Adopt and promote the best management, control and sustainability practices in all our businesses.

## SOCIAL

### Develop people and Society

We care for our people and the communities where we operate. We promote a diverse, inclusive and safe environment for the development of our employees and society as a whole, through our operations and partnerships with third parties.

### 2030 Commitments

- Achieve 50% diversity in leadership positions;
- Continuously pursue zero accidents in the operations of our businesses;
- Expand the positive impact of our social responsibility operations and partnerships.

The Company advances in initiatives that reinforce its position as a business platform prepared to meet the growing demand for safe, competitive and lower carbon intensity energy, supported by solid governance, capital allocation discipline and commitment to transparency. The strategy includes public commitments related to the expansion of biomethane, climate management, people development and strengthening diversity, aligned with the Sustainable Development Goals and integrated into corporate planning.

### Energy transition

Compass continued expanding its role in the energy transition through the expansion of biomethane, the integration of renewable solutions into the infrastructure

existing and the strengthening of initiatives aimed at decarbonizing industry and transport. The Company also advanced in Life Cycle Assessment studies, which support technical and regulatory decisions based on scientific evidence, in addition to concluding a comprehensive study of climate risks and opportunities for the entire asset portfolio, strengthening the incorporation of climate impacts into the management and decision-making process.

In climate management, the Company maintained the annual preparation of greenhouse gas emissions inventories and obtained, for the fifth consecutive year, the **Gold Seal from the Brazilian GHG Protocol Program**, reinforcing the quality of reported information and the maturity of climate governance.

## People and safety

Safety remained a non-negotiable value for the Company. In the period, Compass recorded a **zero lost-time injury frequency rate (LTIF)**, a result supported by integrated management systems, structured prevention programs, investments in asset integrity and strengthening of the safety culture across all operations.

In the social pillar, the Company continued investing in the development of its people, strengthening leadership, training and engagement programs, in addition to advancing its diversity agenda. The public commitment to increase representation in leadership positions remains one of the strategic indicators of the ESG agenda, reflecting the integration between organizational development and sustainable value generation.

## Governance and market

Compass' governance agenda continued supporting the execution of the corporate strategy through an integrated structure comprising the Board of Directors, Sustainability Committee and executive leadership. The Company maintained alignment with best reporting practices, disclosing sustainability information in accordance with GRI and SASB standards, reinforcing its commitment to transparency, accountability and long-term value creation.

## 2nd Debenture Issuance

Compass' 2nd debenture issuance is linked to Sustainability metrics. The selected key performance indicators were related to the Company's environmental and social agendas.

The environmental KPI refers to biomethane distribution and supports the reduction of Scope 3 emissions. As for the social KPI, diversity\* in leadership positions is assessed with the objective of increasing the representation of minority groups. Both metrics are aligned with the Sustainability-linked Bond Principles (SLBP) of the International Capital Market Association (ICMA - International Capital Market Association).

Below we present the evolution of the indicators:

\*The diversity groups are: female gender and male gender persons self-declared as Black or Brown, persons with disabilities, representatives of the LGBTQIAPN+ community and age diversity considering the generation equal to or greater than 60 years.

\*For clarification purposes, the Issuer, under the terms of the Framework, also committed to achieving the key ESG indicators shown in the chart in the "2030" column (with a deadline of December 31, 2030), with such indicators not being related to the characterization of "debentures linked to ESG targets" of the Issuance

## **Report on review of parent company and consolidated condensed interim financial statements**

To the Board of Directors and Stockholders  
Compass Gás Energia S.A.

### **Introduction**

We have reviewed the accompanying condensed interim statement of financial position of Compass Gás Energia S.A. ("Company") as at June 30, 2026 and the related condensed statements of profit or loss and comprehensive income for the quarter and six-month periods then ended, and the condensed statements of changes in equity and cash flows for the six-month period then ended, as well as the accompanying consolidated condensed interim statement of financial position of the Company and its subsidiaries ("Consolidated") as at June 30, 2026 and the related consolidated condensed statements of profit or loss and comprehensive income for the quarter and six-month periods then ended, and the consolidated condensed statements of changes in equity and cash flows for the six-month period then ended, and explanatory notes.

Management is responsible for the preparation and presentation of these parent company and consolidated condensed interim financial statements in accordance with accounting standard CPC 21 - "Interim Financial Reporting", of the Brazilian Accounting Pronouncements Committee (CPC), and International Accounting Standard (IAS) 34 - "Interim Financial Reporting", of the International Accounting Standards Board (IASB). Our responsibility is to express a conclusion on these condensed interim financial statements based on our review.

### **Scope of review**

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", and ISRE 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company and consolidated condensed interim financial statements referred to above are not prepared, in all material respects, in accordance with CPC 21 and IAS 34.

Compass Gás Energia S.A.

### **Other matters - Condensed Statements of Value Added**

The condensed interim financial statements referred to above include the parent company and consolidated condensed statements of value added for the six-month period ended June 30, 2026. These statements are the responsibility of the Company's management and are presented as supplementary information under IAS 34. These statements have been subjected to review procedures performed together with the review of the condensed interim financial statements for the purpose of concluding whether they are reconciled with the condensed interim financial statements and accounting records, as applicable, and if their form and content are in accordance with the criteria defined in the accounting standard CPC 09 - "Statement of Value Added". Based on our review, nothing has come to our attention that causes us to believe that these condensed statements of value added have not been properly prepared, in all material respects, in accordance with the criteria established in this accounting standard, and consistent with the parent company and consolidated condensed interim financial statements taken as a whole.

### Non-cash transactions:

The Company presents its cash flow statements using the indirect method. During the period ended June 30, 2026 and 2025, the Company carried out the following transactions that did not involve cash and, therefore, are not reflected in the Parent Company's and Consolidated cash flow statements:

- (i) Acquisition of tangible and intangible assets on a deferred payment basis totaling R\$ 98,653 (R\$ 120,153 as of June 30, 2025).
- (ii) Recognition of right of use against lease liabilities in the amount of R\$ 89,060, relating to new contracts within the scope of the lease accounting standard and contractual remeasurements (R\$ 3,635 as of June 30, 2025).
- (iii) On April 29, 2026, dividends were approved by the subsidiary Commit in the amount of R\$ 260,057, with R\$ 132,629 going to the Company and R\$ 127,428 to non-controlling shareholders. On the same date, the indirect subsidiary Compagas approved dividends in the amount of R\$ 39,586, with R\$ 29,887 going to the Company through its subsidiaries Compass Dois and Commit, and R\$ 9,699 to non-controlling shareholders.
- (iv) Gain of R\$ 65,529 recognized in other comprehensive income, arising from the change in the credit risk of the subsidiaries Comgás and TRSP in the measurement and fair value designation of financial liabilities.

### Presentation of interest and dividends:

Interest, dividends, and interest on equity paid are classified as cash flow from financing activities, as they are considered to relate to the costs of obtaining financial resources. Interest received on marketable securities and interest paid and capitalized on works in progress and contract assets, as well as dividends and interest on equity received, are classified as cash flow from investing activities.

## 1. Operational context

Compass Gás e Energia SA ("Compass" or "Company") is a publicly traded company listed on the Novo Mercado segment of B3 SA – Brasil, Bolsa, Balcão ("B3"), under the trading code "PASS3". Headquartered in São Paulo, the Company is controlled by Cosan Dez Participações SA ("Cosan Dez"), which holds 68% of its share capital. Mr. Rubens Ometto Silveira Mello is the ultimate controlling shareholder.

Compass Gás e Energia operates primarily in the administration, control, and management of an investment portfolio, with the objective of developing a broader, more transparent, and competitive gas and energy market in Brazil. Through its subsidiaries and associates, the Company develops the following activities: (i) distribution of piped natural gas in Brazil, serving customers in the industrial, residential, commercial, automotive, thermal power generation, and cogeneration sectors; (ii) natural gas trading; (iii) infrastructure project development; (iv) production, handling, and trading of Biometano; and (v) construction, operation, and maintenance of regasification and liquefied natural gas (LNG) transfer facilities.

### Public offering of secondary distribution of shares by Compass

On April 27, 2026, Compass Gás e Energia filed a request with the CVM (Brazilian Securities and Exchange Commission) for automatic registration of a secondary public offering of shares, which was completed on May 12, 2026. From that date, the Company's shares began trading on the B3's Novo Mercado (New Market) under the ticker PASS3.

## 2. Statement of compliance

The individual and consolidated condensed interim financial statements ("Financial Statements"), contained in the Quarterly Information Form (ITR) have been prepared and are being presented in thousands of reais, except unless otherwise indicated, in accordance with the technical pronouncement CPC 21 (R1) Interim Financial Reporting and with the international standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), and based on the provisions contained in the Brazilian Corporations Law, and presented in a manner consistent with the standards issued by the Securities and Exchange Commission, applicable to the preparation of quarterly information.

The presentation of the Statement of Added Value ("DVA") is required by Brazilian corporate law and accounting practices adopted in Brazil applicable to publicly traded companies (CPC 09 – Statement of Added Value). International Financial Reporting Standards (IFRS) do not require the presentation of this statement. Consequently, under IFRS, this statement is presented as supplementary information, without prejudice to the financial statements taken as a whole.

The specific material information contained in the financial statements, and only that information, is being disclosed and corresponds to that used by Management in its management.

The financial statements were prepared on a historical cost basis, except for items measured at fair value, as detailed in note 6.

The Company's Management concluded that there are no material uncertainties that could give rise to significant doubt about its ability to continue operating for an indefinite period and remains confident regarding the continuity of operations and used this assumption as the basis for preparing these financial statements.

These financial statements were authorized for issue by Management on August 13, 2026.

### 3. Accounting policies, assumptions and material estimates

The accounting policies, assumptions and material estimates, as well as the areas requiring a higher level of judgment and greater complexity applied to the preparation of these financial statements are consistent with those applied and disclosed in note 3 of the Company's audited financial statements for the year ended December 31, 2025, published on March 4, 2026.

#### 3.1. Restatement of the Statement of Value Added ("DVA")

The Company has restated certain items in the Statement of Value Added (DVA) for the period ended June 30, 2025, in compliance with CVM Resolution 199/2024, in order to maintain comparability with the balance as of June 30, 2026. The restatement resulted in the following reclassifications of previously presented values:

(i) Correction of the values previously presented in "Costs of services, materials and other expenses" in the group of costs and expenses related to capitalized interest, internal workforce and fees paid to "Financial expenses and rents - Finance expense, foreign exchange variation and derivatives", "Personnel and payroll charges – Direct remuneration and Benefits" and "Taxes, fees and contributions - Municipal" respectively. The aforementioned values had been classified as costs of services, materials and other expenses. However, given their nature, the correct classification is in the headings presented above;

(ii) Presentation of the line item for assets built for own use, which now includes assets that are characterized by being built with own resources for the "Marketing and services" segment.

These adjustments did not have a significant impact on any indicator in the context of these financial statements.

## 4. Segment information

The segment information is used by the Company's Management (Chief Operating Decision Maker), which is the Company President, responsible for evaluating the performance of the operating segments and making decisions regarding the allocation of resources. This information is prepared in a manner consistent with the accounting policies used in the preparation of the financial statements. The Company evaluates the performance of its operating segments based on earnings before interest, taxes, depreciation, and amortization ("EBITDA").

### Reported segments:

- (i) Gas distribution: This refers primarily to the piped natural gas distributors in which the Company has control or a stake. The areas of operation are in the Southeast, South, and Midwest regions of the country, serving customers in the industrial, residential, commercial, automotive, thermal power generation, and cogeneration sectors.
- (ii) Marketing & services: This refers primarily to the commercialization of gas, including the purchase and sale of gas to consumers who have free choice of supplier and to other agents permitted by law, regasification of liquefied natural gas ("LNG"), production, handling and commercialization of Biometano, and other investments in the development process.

In addition to its investment portfolio in the gas sector, the Company presents the effects on its results related to the corporate activities of Compass Gás e Energia SA separately as "Compass Corporate".

<sup>(i)</sup> There is no significant variation between the value of assets and liabilities measured at amortized cost and their fair values. Information relating to loans, borrowings and debentures is disclosed in the explanatory note 17.

<sup>(ii)</sup> The balance is composed of: (a) A portion transferred from the contract asset, amounting to R\$ 677,592, related to infrastructure investments whose useful life exceeds the concession term, classified as a long-term indemnification financial asset. This portion represents the unconditional right to compensation upon termination of the contract and is updated monthly by the tariff index. (b) R\$ 145,811, in the subsidiary Sulgás, referring to the ordinary tariff review ("RTO"), updated by the IPCA-E and to be settled by 2044 exclusively through compensation or extension of the concession contract term.

<sup>(iii)</sup> Government bonds offer daily liquidity and a return of approximately 100% of the CDI Deposit Certificate.

<sup>(iv)</sup> The balance refers to the installment payment of tax debts.

<sup>(v)</sup> The balance is composed of: (a) Remaining installment related to the acquisition of Compagas in the amount of R\$ 181,897, which will be settled by September 2026. The amount is remunerated by the SELIC rate, and the effect of monetary correction in the period ending June 30, 2026, totaled R\$ 16,405. On March 16, 2026, the third installment of R\$ 174,892 was settled. (b) In the subsidiary Comgás, operations classified as reverse factoring arrangements totaled R\$ 73,638 as of June 30, 2026, which were advanced by suppliers with financial institutions and have a payment term of approximately 90 days. This is a modality in which the supplier, unilaterally, can choose to advance its receivables with financial institutions, based on conditions negotiated directly with these third parties, including any applicable fees. The Company, through its subsidiary, does not interfere in the supplier's decision, nor does it guarantee, negotiate, or mediate these operations, and does not derive any financial or contractual benefit from this model. Furthermore, there is no alteration to the commercial conditions originally agreed upon between the parties, such as the term and contracted value. Liabilities with suppliers who do not participate in factoring agreements have similar payment terms, also averaging 90 days. Finally, no relevant non-cash changes were identified during the period that impacted the accounting balances related to these operations. The other subsidiaries do not have factoring operations.

<sup>(i)</sup> This refers to the contingent consideration (earn-out) negotiated in the acquisition process of the indirect subsidiary Biometano Verde Paulínia, measured at fair value using an assessment technique based on the present value of expected cash flows. The measurement considers the monetary restatement stipulated in the contract.

## 7. Financial risk management

The Company's financial risk management considers policies approved by the Board of Directors, which provide written principles for managing overall risk and specific areas such as foreign exchange risk, interest rate risk, credit risk, use of derivatives and non-derivative financial instruments, and investment of excess liquidity.

### Market Risk

Management oversees and controls market risk exposures within acceptable parameters, optimizing returns.

The Company uses derivatives to manage market risks contracted in accordance with guidelines established by internal policy.

### Foreign exchange risk

The Company continuously monitors exchange rates in order to assess the potential need to contract derivative financial instruments, so as to ensure protection against the volatility of these currencies and minimize the impact of disparities on its assets and liabilities.

The likely scenario considers a 12-month exchange rate projection prepared by a specialized consulting firm. Stressed scenarios (positive and negative effects, before taxes) were defined based on adverse impacts of 25% and 50% on the exchange rates used in the likely scenario.

The main effects stemming from a reasonably possible strengthening (weakening) of the Real against the Dollar would affect the measurement of financial assets and liabilities, shareholders' equity, and profit or loss by the amounts indicated below:

| Instrument                                  | Exposure <sup>(ii)</sup> | Probable |                | Scenarios        |                  |                |                |

<sup>(i)</sup> The Company has designated 100% of its dollar-exposed lease liability to protect highly probable future revenues, as demonstrated in note 8.

<sup>(ii)</sup> With the exception of derivatives financial instruments, for which a notional overview is provided, the presentation of the remaining items corresponds to the balance as of June 30, 2026.

## Interest rate risk

The Company continuously monitors market interest rates in order to assess the potential need to contract derivatives financial instruments, to ensure protection against the volatility of these rates and minimize the impact of disparities between its assets and liabilities.

The likely scenario considers a projection of economic indicators over 12 months, prepared by a specialized consulting firm. Stressed Scenarios (positive and negative effects, before taxes) were defined based on adverse impacts of 25% and 50% on the economic indicators used in the likely scenario.

The main effects stemming from a reasonably possible strengthening (weakening) of economic indicators would affect the measurement of financial assets and liabilities, shareholders' equity, and profit or loss by the amounts indicated below:

<sup>(iii)</sup> Liabilities related to the remaining portion of the Compagas acquisition.

## Price risk

## Natural Gas

The Company, through its subsidiaries, conducts transactions with natural gas derivatives in order to mitigate the risks arising from fluctuations in natural gas indexers in its natural gas purchase and sale contracts with third-party entities. Below we present a sensitivity analysis regarding price fluctuations:

| Instrument            | Risk factor                | Exposure <sup>(i)</sup> | Probable | Scenarios |        |          |          |

<sup>(i)</sup> The exposure corresponds to the notional value.

## Credit risk

The Company's regular operations expose it to potential defaults when customers, suppliers, and counterparties fail to meet their financial or other obligations. The Company seeks to mitigate this risk by transacting with a diverse set of counterparties. However, the Company remains subject to unexpected financial failures by third parties that could disrupt its operations.

Cash and cash equivalents, marketable securities, restricted cash, and derivatives financial instruments are primarily invested in government-backed securities and other investments in banks with a minimum national rating of "A". Credit risk for balances with banks and financial institutions is managed by the treasury department in accordance with the Company's policy.

Counterparty credit limits are reviewed annually and may be updated throughout the year. The limits are set to minimize risk concentration and thus mitigate financial loss through counterparty failure to make payments. The credit risk of cash and cash equivalents, marketable securities, restricted cash, and derivatives financial instruments is determined by widely accepted market rating agencies and is structured as follows:

|              | Consolidated     |                  |
|--------------|------------------|------------------|
|              | 06/30/2026       | 12/31/2025       |

| <b>Total</b> | <b>4,824,082</b> | <b>5,166,078</b> |

## Liquidity risk

The Company and its subsidiaries' approach is to ensure sufficient liquidity to meet their liabilities when they become due, under normal and stress conditions, without incurring unacceptable losses or risking reputational damage. Financial liabilities are monitored considering expected future cash flows, including projections of interest and other financial charges until their contractual maturities.

<sup>(i)</sup> The balance refers to the installment payment of tax debts.

<sup>(ii)</sup> The Company, through its subsidiaries, maintains a sector-specific liability classified as a non-current liability. Due to uncertainty regarding the exact payment date of these obligations, the liability has not been included in the maturity schedule. The Company recognizes this liability in accordance with applicable accounting standards, pending regulatory definition to determine the settlement schedule.

### Fair value hedge

The subsidiary Comgás adopts fair value hedge accounting for its operations, where changes in the fair value of hedging instruments and hedged items attributable to the hedged risk are accounted for through profit or loss.

There is an economic relationship between the hedged item and the hedging instrument, since the terms of the interest rate swap correspond to the terms of the loan, i.e., notional amount, term, and payment. The subsidiary Comgás has established a hedging ratio close to 1:1 for the hedging relationships, since the underlying risk of the interest rate swap is identical to the hedged risk component. To test the effectiveness of the hedge, the subsidiary uses the discounted cash flow method and compares changes in the fair value of the hedging instrument with changes in the fair value of the hedged item attributable to the hedged risk. The sources of hedge ineffectiveness expected to affect the hedging relationship during its term, as assessed by the subsidiary, are primarily: (i) a reduction or modification in the hedged item; and (ii) a change in the credit risk of the Company or the counterparty to the contracted swaps. For the period ended June 30, 2026, there was no recognized ineffectiveness.

The debts that are subject to interest rate and inflation risk hedging are indicated in the table below:

## Fair value option

The Company, through its subsidiaries, has chosen to designate the liabilities below for recording at fair value through profit or loss, as it has entered into derivative instruments to hedge foreign exchange or interest rate exposures for such purposes, thus maintaining the underlying asset and instrument on the same measurement basis:

## Cash flow hedge

The indirect subsidiary Edge Comercialização SA carried out natural gas purchase and sale transactions with prices indexed to the Brent risk. Considering the exposure to variations in this index, the subsidiary designated these transactions as cash flow hedge relationships.

The indirect subsidiary TRSP adopted a hedge accounting strategy to protect its results from exposure to variability in cash flows arising from the exchange rate effects of highly probable dollar revenues projected for a period of 20 years, maturing in 2043, through non-derivative hedging instruments – a dollar lease liability already contracted.

The sources of ineffectiveness in hedge accounting, although historically immaterial, can stem from the following factors:

1. Timing misalignments between the cash flows of the hedged items and the hedging instruments;
2. Changes in projections of expected cash flows from hedged items and hedging instruments.

The subsidiaries continuously monitor sources of ineffectiveness, using quantitative and qualitative analyses to assess the impacts on fair value and hedge effectiveness. These practices are aligned with accounting and treasury policies.

The recognized impacts on the shareholders' equity of the subsidiaries are shown below:

## 12. Sectoral financial assets and liabilities

The purpose of sectoral-specific financial assets and liabilities is to offset the economic impacts on the distributors' results, due to the difference between the cost of gas and tax rates contained in the resolutions issued by regulatory agencies, and those actually included in the tariff, with each tariff adjustment/revision.

Below are the regulatory agencies of the subsidiaries with their respective decisions on the subject:

- Comgás and Necta are regulated by ARSESP through Deliberation No. 1,010.
- Compagas is regulated by AGEPAR through Resolution 028/2022.
- Sulgás is regulated by AGERGS through Resolution 072/2025.

Based on the aforementioned deliberations/resolutions, the Company concluded that there is no uncertainty regarding the recognition of sectoral financial assets and liabilities as amounts actually receivable or payable.

Accordingly, the Company recognizes the sectoral financial assets and liabilities in its financial statements, obtained by the difference between the actual cost and the cost considered in tariff adjustments, generating a right when the actual cost is greater than that contemplated in the tariff, or an obligation when the costs are lower than those contemplated in the tariff. The differences are considered in the subsequent tariff adjustment and become part of the tariff adjustment index for distributors.

The movement of the sector's financial assets (liabilities) for the period ended June 30, 2026 was:

|                                  | Sectoral Assets | Sectoral Liabilities | Total              |

On February 23, 2026, ARSESP published Resolution No. 1,776, which establishes the criteria for allocating PIS and COFINS credits to users resulting from the exclusion of ICMS - State VAT from the tax basis of these contributions.

On May 26, 2026, the 13th Public Treasury Court of the District of São Paulo granted an injunction to the Company suspending the financial effects of ARSESP Resolution No. 1,776. As a result of this judicial decision, ARSESP published Resolution No. 1,809/2026 on June 9, 2026, maintaining the current rates without considering the effects of any eventual return of these credits to consumers.

Until the date of authorization of these financial statements, the matter had no effect on the Company's financial information.

The realization of sectoral financial assets and the settlement of sectoral financial liabilities remain subject to future regulatory definitions from ARSESP, including the methodology, the form of compensation, and the disbursement schedule. The Management continuously monitors developments on this matter and believes that the measurement criteria currently adopted remain adequate.

## Uncertainties about the treatment of income taxes

On June 30, 2026, the Company, through its subsidiaries, recognized a provision for uncertainties regarding the treatment of income taxes that materialized through tax assessments, totaling R\$ 363.

In the first quarter of 2026, the subsidiary Comgás achieved complete success in the administrative sphere in contesting the Tax Assessment Notice issued by the Brazilian Federal Revenue Service, regarding the collection of Corporate Income Tax (IRPJ) and Social Contribution on Net Profit (CSLL), fines and interest, for the fiscal years 2017 and 2018, due to the improper amortization of the goodwill paid in the acquisition of the Company. With the recognition of the favorable decision, the amount of R\$ 844,994 ceased to be part of the list of uncertain tax positions monitored by the Company.

As of June 30, 2026, the amounts assessed under discussion with the tax authorities regarding these matters, where the tax authority is likely to accept the uncertain tax treatment, is R\$ 2,258,180 (R\$ 3,004,926 as of December 31, 2025).

## Possible losses

The lawsuits for which there is a probability of loss and, consequently, for which no provision was recognized in the condensed interim financial statements are described below:

|                                     | Consolidated     |                  |

| <b>Total</b>                        | <b>1,766,254</b> | <b>1,053,110</b> |

## Tax

The main tax-related lawsuits, for which the probability of loss is possible and, consequently, no provision was recognized in the financial statements, are related to indirect taxes. The movement that occurred in fiscal year 2026 is related to lawsuits concerning the taking of PIS and COFINS credits arising from the exclusion of ICMS - State VAT from their calculation basis. The uncertain tax positions of income tax and social contribution were assessed individually based on the probability of acceptance by the tax authority, as required by CPC 32 - Income Taxes (IAS 12) and are presented in note 13.

## Civil, environmental and regulatory

The Company's civil lawsuits generally concern contract terminations or revisions, property rights, debt collection and compensation claims arising from the Company's activities, including claims related to regulatory and environmental matters.

Regulatory processes generally involve administrative sanctioning procedures initiated by regulatory bodies.

## Labor

Labor lawsuits involve claims related to overtime and related labor rights, insalubrity allowances, hazardous duty allowances, as well as secondary and joint liability, among other employment-related matters.

## 20. Shareholders' equity

### Share capital

On April 16, 2026, the Company completed the conversion of all of its preferred shares into common shares, at a ratio of 1 (one) common share for each preferred share held, resulting in the complete extinction of the class of preferred shares issued by the Company.

On April 27, 2026, a corporate reorganization of the Cosan Group was approved and completed through partial and disproportionate spin-off of Cosan Dez Participações SA, followed by reverse incorporation by the Company of the spun-off portion. On the same date, the Company filed with the CVM (Brazilian Securities and Exchange Commission) a request for automatic registration of a secondary public offering of shares, which was settled on May 12, 2026.

As of June 30, 2026, the Company's subscribed capital amounted to R\$1,772,500, fully paid in, represented by 714,190 thousand registered book-entry common shares with no par value. Pursuant to the Company's bylaws, the authorized share capital may be increased up to a limit of R\$10,000,000.
