1

INTRODUCTION

Timeline

Klabin's history

1899

Creation of Klabin Irmãos e Cia. (KIC) by Maurício Klabin, his brothers Salomão Klabin and Hessel Klabin, and his cousin Miguel Lafer. The company imports stationery products and produces goods for offices, stores, government agencies and banks.

1934

In 1934, Klabin acquires the Monte Alegre Farm in Paraná and builds Brazil's first integrated pulp and paper mill.

1968-1974

From 1968 to 1974, Klabin embarks on an expansion across Brazil, opening plants in the South, Southeast and Northeast regions.

1979

In 1979, Klabin launches its IPO.

1947

The newspaper Jornal do Comércio is printed on paper 100% made in Brazil by Klabin. For the first time in the history of the newsprint paper industry, a portion of the domestic market is supplied by a local producer.

In 1909, Klabin partners with other shareholders to establish Companhia Fabricadora de Papel.

1909

1998

Klabin becomes the first company in the pulp and paper sector in the Americas to have its forests certified by the Forest Stewardship Council® (FSC®) FSC-C022516.

2004

In 2004, after a restructuring carried out in 2003 that included asset divestments, Klabin focuses its operations on the packaging paper segment.

2008

In 2008, the MA-1100 Expansion Project was launched, which resulted in the Monte Alegre Unit becoming one of the world's ten biggest paper mills and Klabin becoming one of the six largest global producers of virgin fiber board.

2019

Puma II project approval, which will make Klabin the third largest kraftliner seller in the global market.

2016

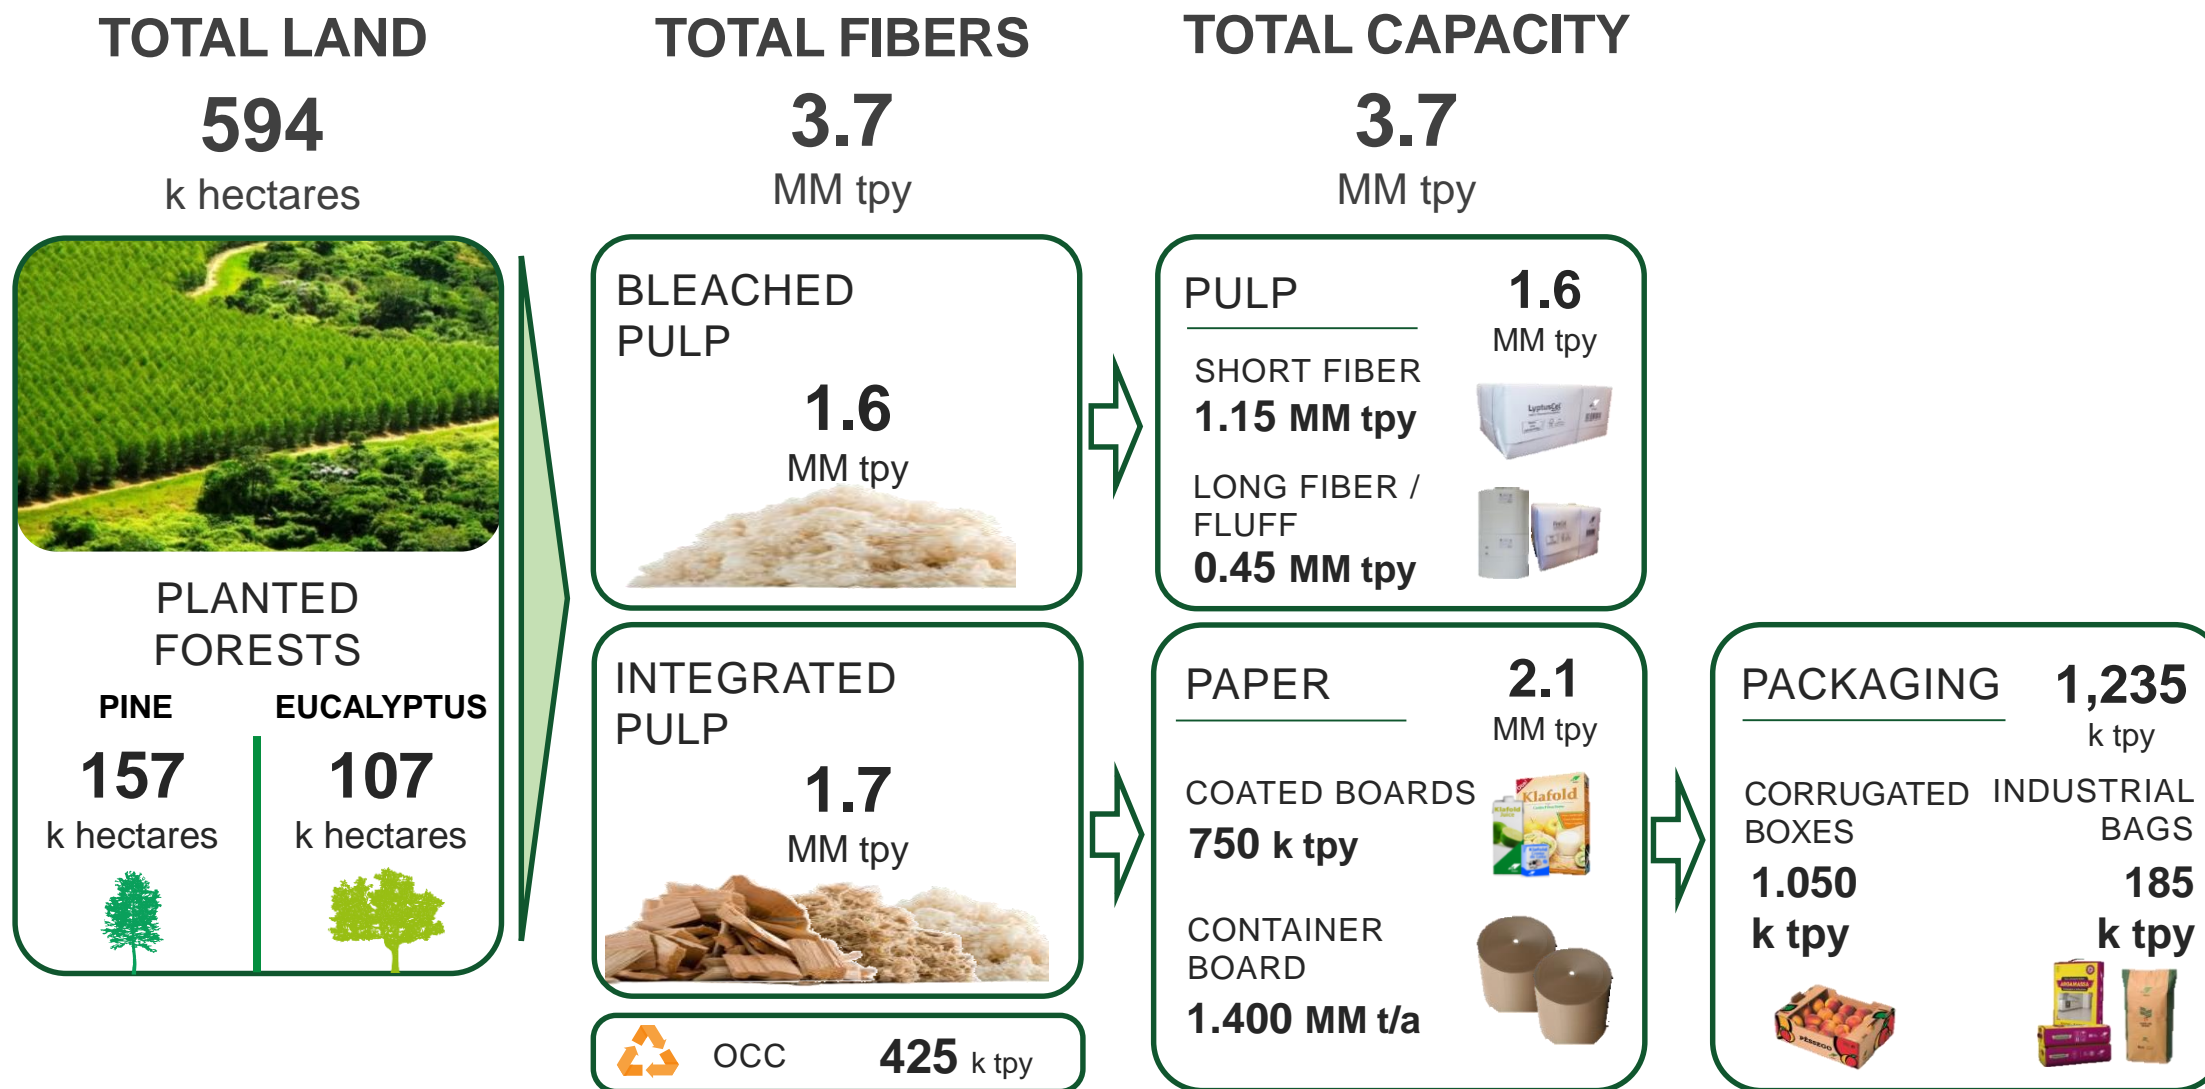

Start-up of the Puma Unit in Ortigueira, Paraná. The new plant represents the largest investment in the history of Klabin, which now sells hardwood pulp (eucalyptus) softwood pulp (pine) and fluff pulp, practically doubling its production capacity.

PROJECT PUMA II

	1 st Machine	2 nd Machine
Capacity	450 kt/yr	470 kt/yr
Fibers	100% Short Fiber	Fibers Mix
Type	White Top Liner & Kraftliner	Kraftliner
Grammage	Low/Medium	Medium/High
Start-up	2021	2023

Project Highlights

1

White Top Liner

White Kraftliner
Production taking
advantage of bleached
fiber availability on site.

3

Productivity

Biological Assets, Industrial
and Logistic synergies will
allow for greater efficiency.

5

Creep Capacity

Expected production to
reach above nominal
capacity levels due to
historical performance
records trend

2

Fixed Cost

Fixed cost of Puma II to
be approximately half of
current Kraftliner
production lines.

4

Operational Efficiency

Fiber production line
debottlenecking allowing for
additional bleached pulp
production for Puma I
operations.

Project Timeline

Project phases breakdown

1st Phase

24 Months

- Main non-bleached fiber line
- 1st Kraftliner Machine (450 kt/yr)
- Support Facilities
- Recovery and Utilities Areas

2/3

2nd Phase

24 Months

- Secondary non-bleached fiber line
- 2nd Kraftliner Machine (470 kt/yr)

1/3

Total Investment

Total Capacity Increase

920

tsd tonnes

Net Total Investment

R\$ 8.1 bi

Synergies with current operations

Taking advantage of Puma's Unit facilities

FORESTRY ASSETS

Mix of fibers coming from eucalyptus and pinus planted forests

Klabin preserves more than 40% of its total planted area.

Paraná and Santa Catarina regions show forestry productivity indexes well above the sectorial average. Average hauling distance after Puma II estimated to be less than 100 km for the operations in the State of Paraná

OPERATIONAL SYNERGIES

Exploitation of existent commercial and administrative structures.

Use and integration of part of Puma I facilities, as well as the possibility of optimization of production on other Klabin plants.

Potential transfer of part of the new output production to conversion and packaging units.

LOGISTICS SOLUTION

Expansion of the current rail structure from Puma I, comprising the container wagon module.

Own Container Yard and operational flexibility, allowing for hybrid container and break bulk operation.

Single operation alongside the export volumes from the Monte Alegre Unit, generating greater scale and logistics synergy.

Project Highlights

Distinct products for growing distinct markets

White Top Liner

- Demand of approx. 4 MM t/yr
- Demand grows 3% to 4% p.y.
- Low integration market
- New product on the most demanded grammage range

Eucaliner

- Klabin's Patent - essentially eucalyptus
- 100% Virgin Fiber
- 10% gain on physical properties

Growing Markets

- E-commerce market
- Food market
- Shelf-Ready Packaging

Eucaliner

Klabin will be pioneer on short fiber Kraftliner production

Planted area & Years to harvest

(for 450 kt of Kraftliner)

#

Area (k ha)

Sustainability

- Planted area reduction
- Smaller loss after recycling

Quality

- Better printability
- Endurance on low grammages

Efficiency

- Weight Reduction
- Lesser water retention
- Better performance on corrugator (productivity)

10x
smaller
area

10x
faster to
grow

Global presence on the Kraftliner Market

Klabin becomes the 3rd largest global kraftliner seller

Risks Mitigation

The project's design allows for the execution risks reduction

Indebtedness

Debt profile and liquidity matching the new growth cycle.

Disbursements

Disbursements flow dilution along five years.

Timeline

Flexibility to postpone or bring forward the original timeline.

Optionality

Product output option on 2nd machine depending on market conditions.

Integration

Possibility of integration of higher volumes of paper, allocating towards packaging conversion units from Klabin.

Final Remarks – Shared Value Creation

Puma II and the new expansion cycle as value changers

Sustainable Growth

Capacity increase with high value added results within the paper and packaging chain, following the **sector's best renowned social and environmental practices**.

Results Stability

Higher exposure to kraftliner, related to food and consumer goods sectors, producing clearer **predictability and resilience on results**.

Synergies

The project unravels **commercial, operational and logistics synergies** among the various assets of the Company, specially Puma Unit, optimizing furthermore the cost of production.

Financial Sustainability

Lesser impact on financial leverage when compared with Puma Project, as well as a more suitable liquidity and debt profile to face the investments.

Income Generation

Creation of 1,500 job posts and also a fiscal flow contribution of approximately R\$ 1 billion in Federal, State and Municipal taxes.
