# APIMEC Meeting 2024

2Q24 | 1H24

# Important

Our estimates and future statements are largely based on current expectations and projections in relation to future events and financial trends that affect or could affect our business. Many important factors can adversely affect our results, such as those predicted in our estimates and future statements.

The words "we believe", "we can", "we aim to", "we estimate" and other similar words are for the purpose of identifying estimates and projections. The considerations about estimates and future statements include information related to results and projections, strategies, financing plans, competitive position, sectoral environment, potential growth opportunities, effects of future regulations and effects of competition. These estimates and projections refer only to the date when they were expressed. We cannot assume the obligation to publicly update or review any of these estimates due to new information arising, future events or any other factors, except for current regulations to which we are subject.

Net Margin

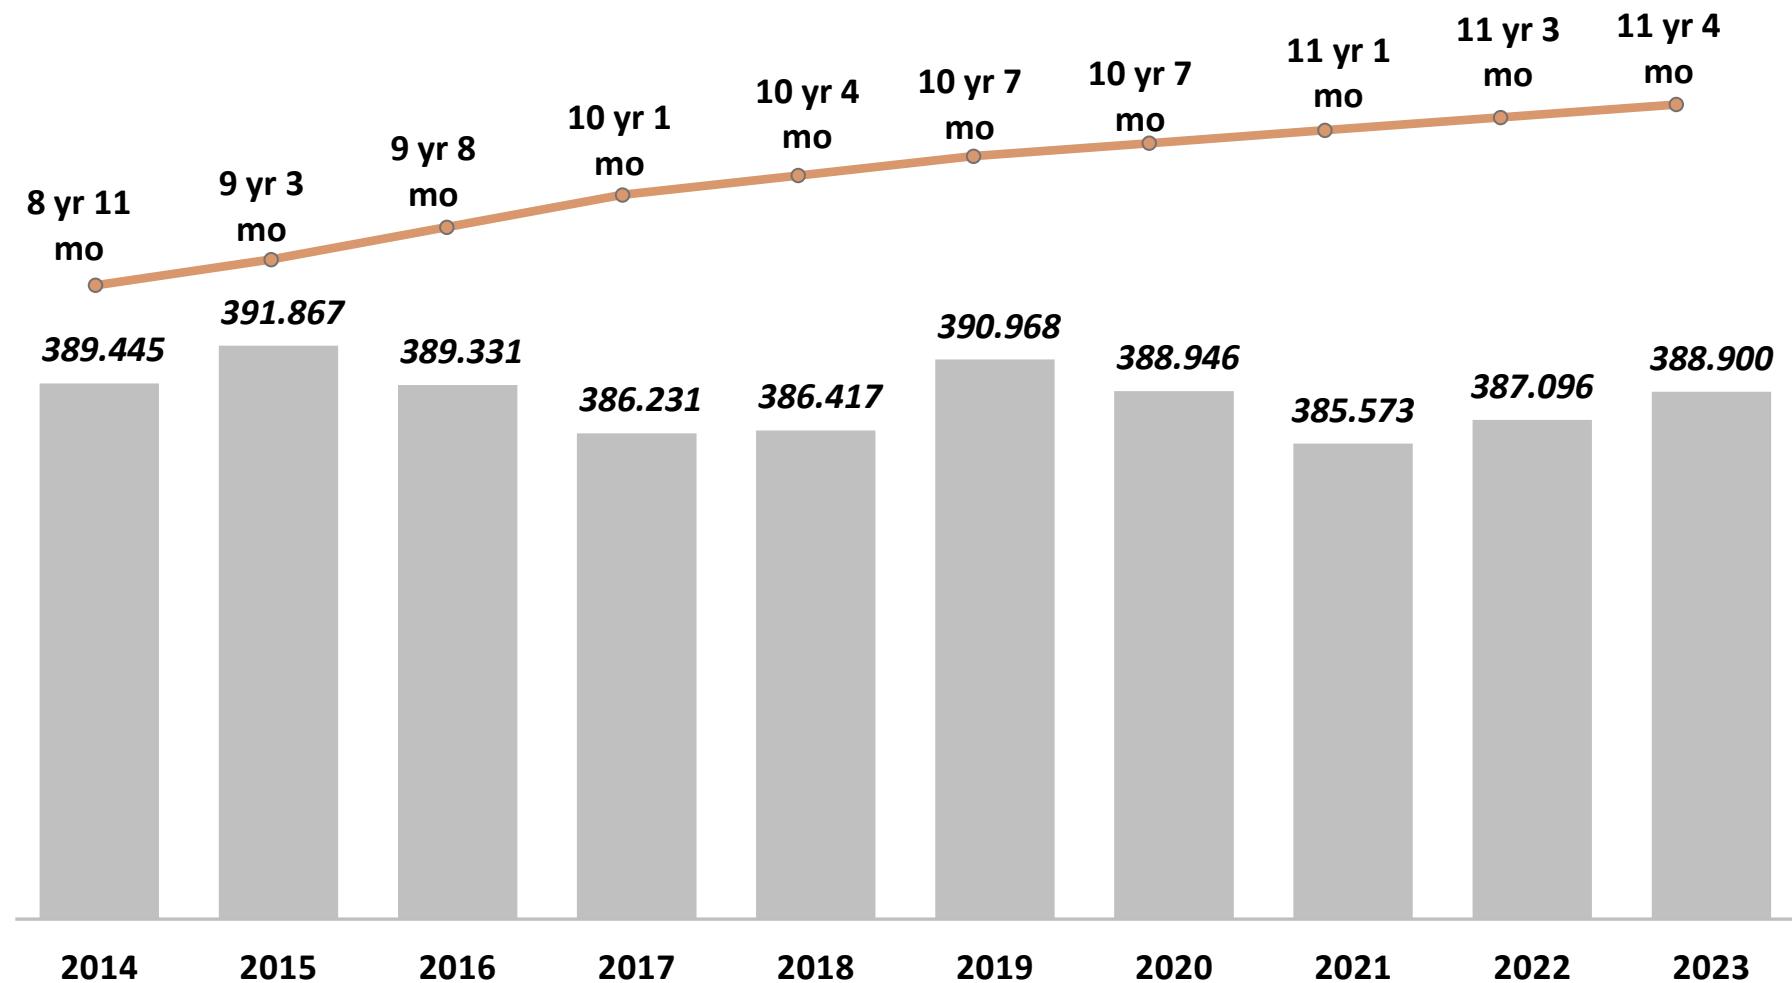

# Brazilian Bus Body Production

Between 2012 and 2022, the average age of the Brazilian bus fleet increased from 8 to almost 11 years.

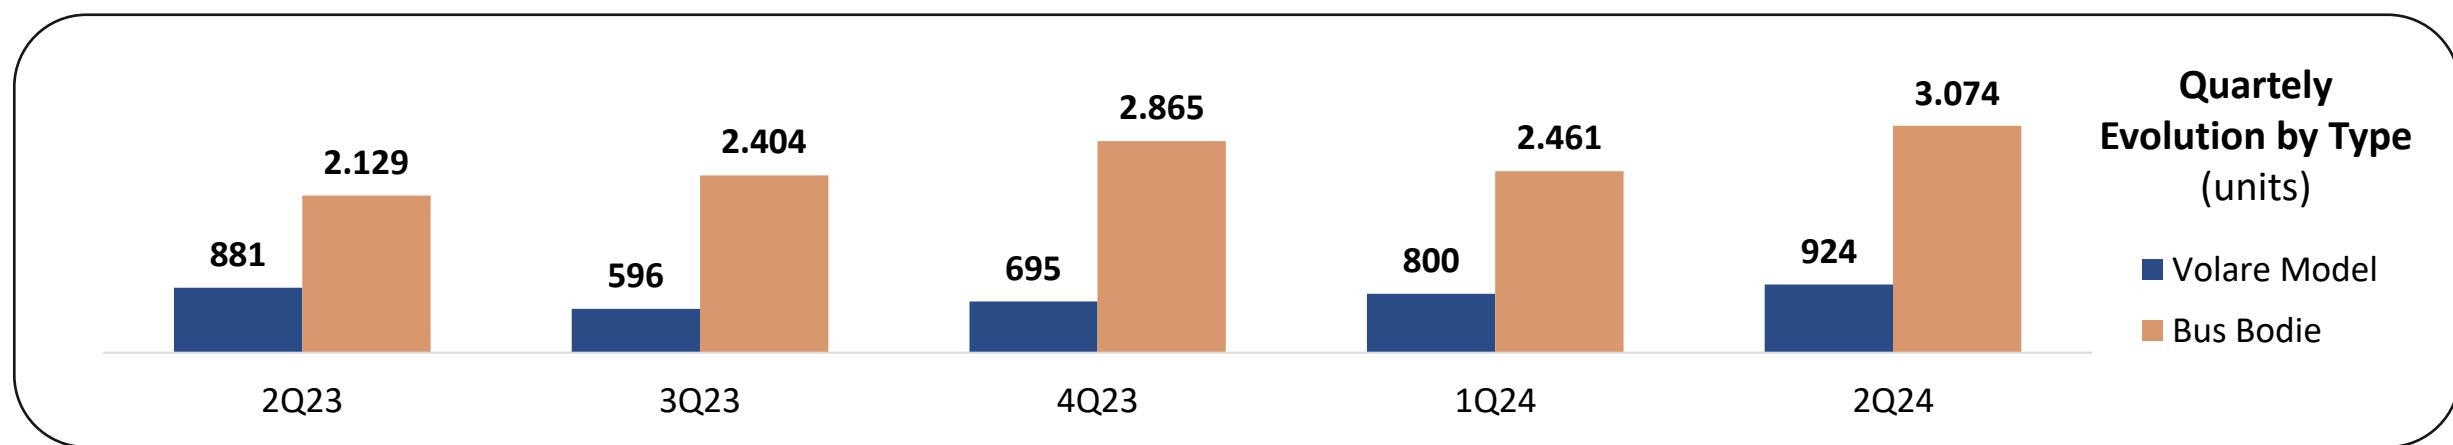

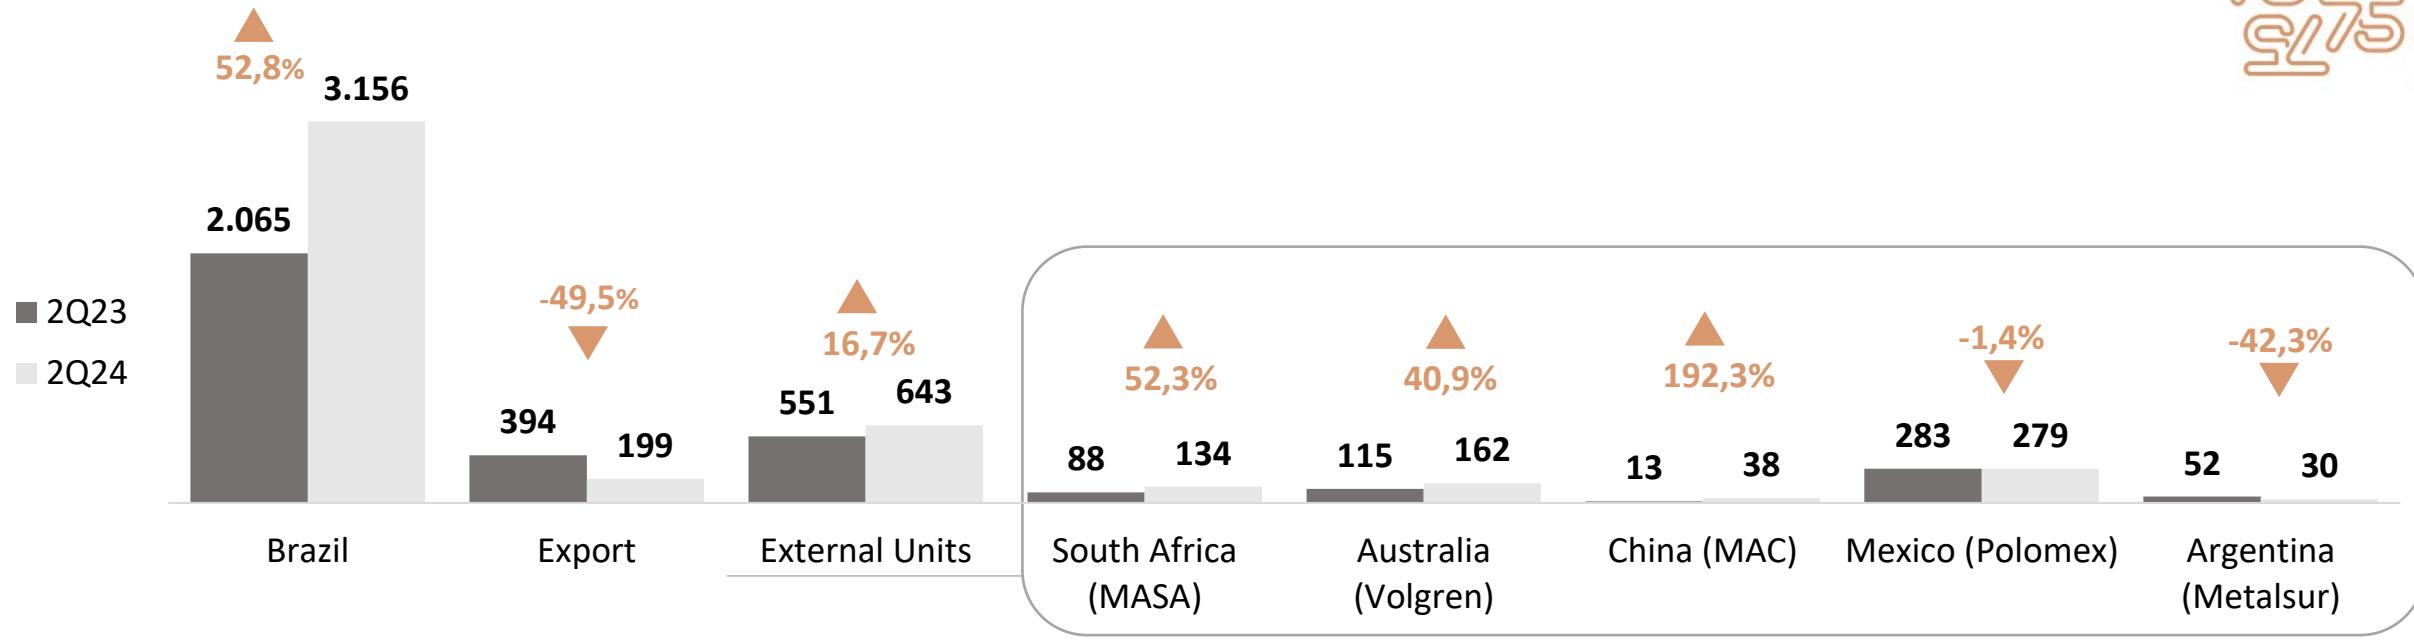

# Circulating Fleet & Average Age

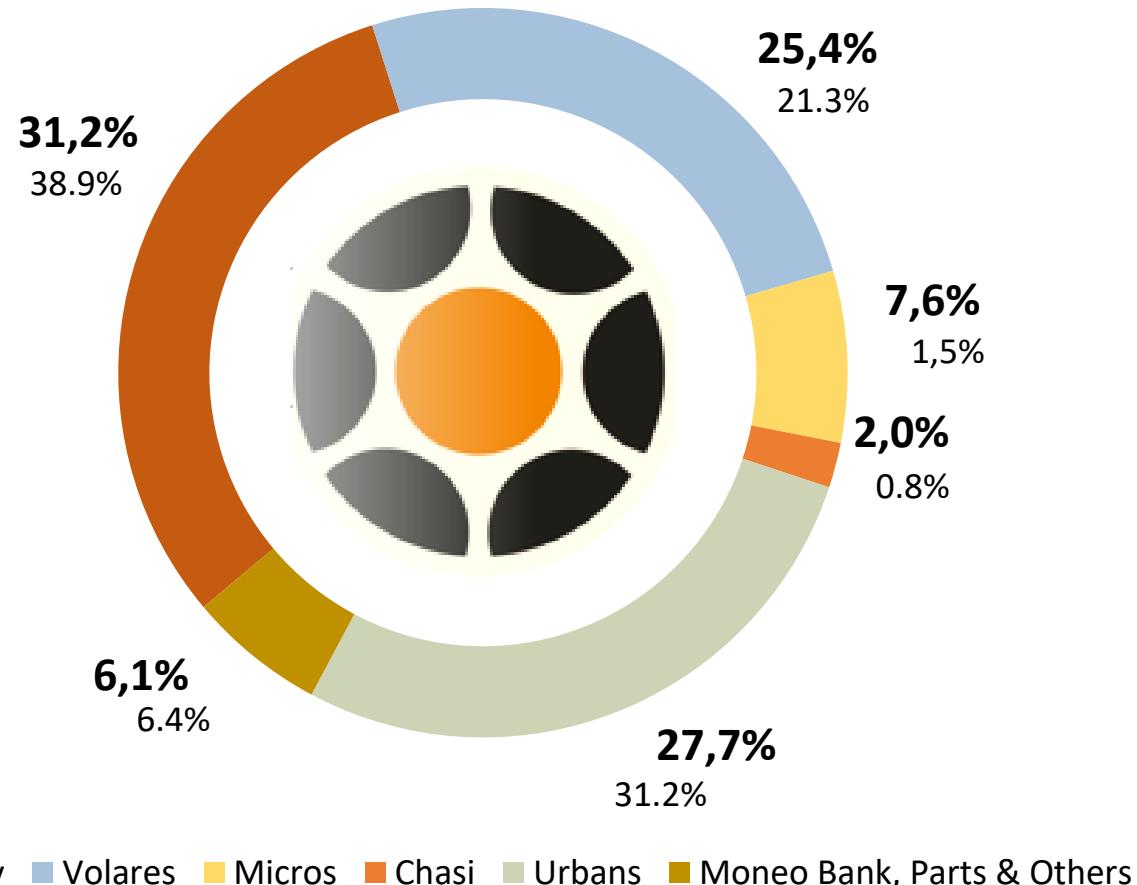

# Marcopolo's Production 2Q24

# Net Revenue Distribution By Segment

(2Q24 x 2Q23)

## Segments

**INTERCITY** - Heavy bus segment for transporting passengers on highways or mixed routes, between cities, states or countries. It covers different activities such as tourism, regular lines and chartering.

**URBANS** - Segment aims public transport in cities. Investments in urban mobility, dedicated corridors, BRT and public tariffs are drivers for the sector. It also includes articulated and bi-articulated models.

**MICROS** - They may have characteristics and use similar to intercity or urban, depending on the model. Flexible vehicle that can be applied to urban lines of lesser demand, chartering, tourism and school transport.

**VOLARES** - It corresponds to the Marcopolo business unit that sells the complete vehicle – body + chassis. The application of Volare buses is identical to that of the micro segment.

# Performance & Projections

## Market

PAC 3 can accelerate sales in the segment, with investments in Euro 6 and electric models.

The Company's first 8 full Attivis delivered in 2Q24.

Electric model gains traction, with new sales made (10 integral Attivis + 10 bodies).

The market environment remains favorable, after long periods of under-renewal.

Heavy trucking and chartering maintain significant volumes of new purchases.

Long and healthy portfolio. Volume growth throughout 2H24.

Caminho da Escola: the Company delivered 500 micros and 459 Volares in 2Q24.

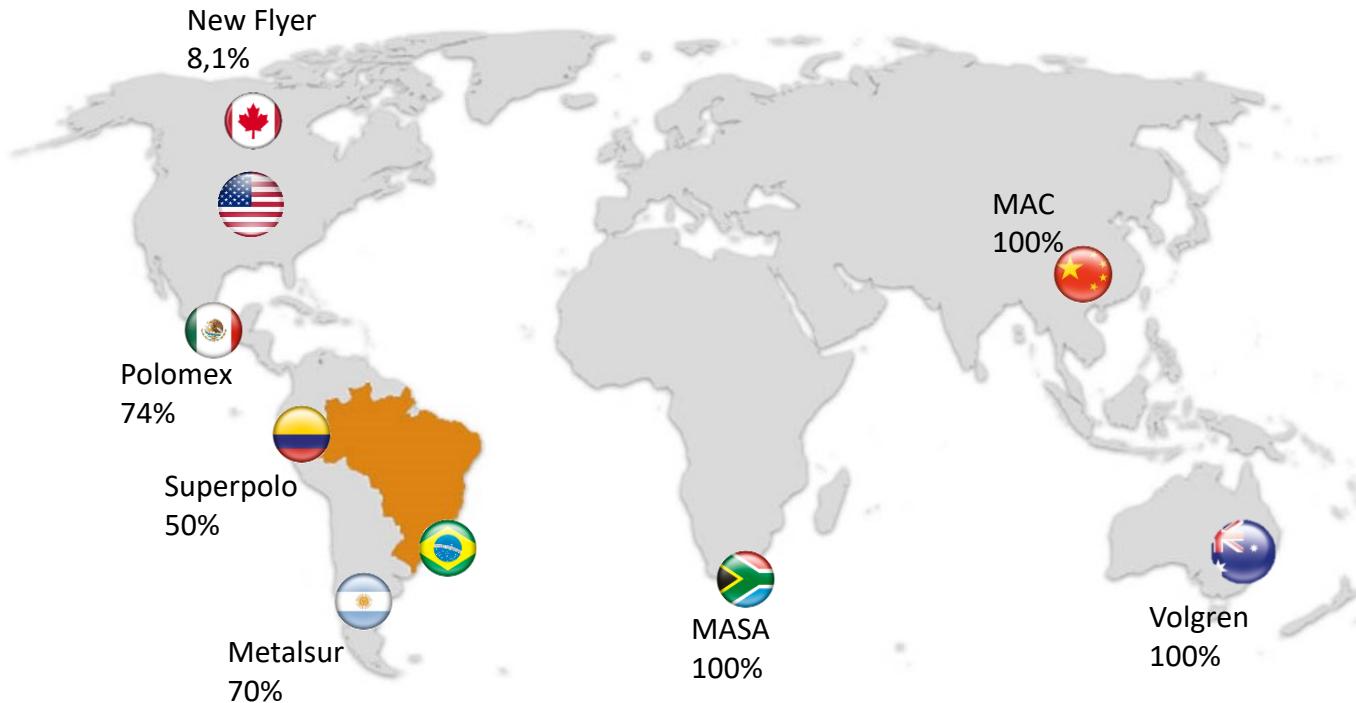

Transitioning part of the CoE volumes from 2024 to 2025 can provide stability to production.

Retail demand remains positive, especially in the Volare model.

# International Operations

## Controlled & Affiliates

- South Africa (MASA): continues with positive perspectives. The launch of the G8 model in the country has the potential to boost operations in the road sector.
- Argentina (Metalsur): As of July, Marcopolo will own 100%. Expectation of volume recovery in 2H24.
- Australia (Volgren): achieved record quarterly results. The operation continues with promising projections, maintaining a robust portfolio and production efficiency.
- China (MAC): undergoes restructuring of its operations, with emphasis and focus on the development of local commercial partnerships and sourcing.
- Colombia (Superpolo): continues to present good results and the outlook is positive for the remainder of the year.
- Mexico (Polomex): the subsidiary is preparing to locate G8 production. Prospects remain positive, with the closing of relevant orders for the end of 2024 and beginning of 2025.

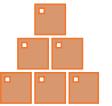

# Performance & Projections

## Production & Efficiency

Production growth has allowed gains in operational leverage.

Daily production should continue to advance, even with the cooling of the CdE.

Capacity gains through greater efficiency and productivity.

## Cash Flow

Company works to optimize WIP and inventories.

Production growth continues to demand greater working capital.

Appreciation of the USD benefits exports, but exchange rate changes negatively affect it.

## Investments

Work is progressing on a new industrial pavilion in São Mateus, ES.

Opening of the new flammables plant in Caxias do Sul, RS.

Investments in industrial automation, new products and chassis.
