GERDAU S.A. 4020

CONSOLIDATED INFORMATION

São Paulo, February 24, 2021 – Gerdau S.A. (B3: GGBR4 / NYSE: GGB) announces its results for the fourth quarter of 2020. The consolidated financial statements of the Company are presented in Brazilian real (R\$), in accordance with International Financial Reporting Standards (IFRS) and the accounting practices adopted in Brazil. The information in this report does not include the data of associates and jointly controlled entities, except where stated otherwise.

GERDAU'S PERFORMANCE IN 4020

Production and Shipments

In 4Q20, crude steel production grew in relation to both 3Q20 and 4Q19, supported by the continued recovery in demand in the various countries where the company operates.

Steel shipments grew in 4020 in relation to 4019, led by shipments to the domestic market of the Brazil BD and to the North America BD. Compared to 3020, the stability in shipments in a seasonally weaker quarter is explained by the better performance of the Special Steel BD and North America BD.

Operating Result

Net Sales

Net sales in 4020 accompanied the growth in shipments in relation to 4019. Note that net sales in 4020 were mainly influenced by the 31% Brazilian real depreciation in the last 12 months, which had a positive effect especially on the translation of net sales from our operations in North America. Another highlight was the rebuilding of margins following the increases in raw materials, with the aim of maintaining profitability.

Cost of Goods Sold

Cost of goods sold accompanied the growth in shipments and increased in relation to 4019. There also were increases in the costs of key raw materials used by the Company, notably the 59% increase in scrap prices in Brazilian real and the 69% increase in the iron ore price in relation to 4020. In relation to 3020, the scrap price increased 19%, while the iron ore price rose 26%.

Gross Profit

Gross profit and gross margin expanded, reflecting the 10% increase in sales per tonne sold and the 3% increase in cost per tonne sold compared to 3020. Compared to 4019, margin expansion is explained by the strong domestic market in the Brazil BD, which reached 86% of total shipments of the division, up from 67% in 4019.

Selling, General & Administrative Expenses

Selling, general and administrative expenses increased in relation to the comparison periods, but remained stable as a ratio of net sales, at 3.5%.

EBITDA & EBITDA Margin

Breakdown of Consolidated EBITDA (R\$ million)	4020	4019	Δ	3020	Δ	12M20	12M19	Δ

- 1 Non-accounting measure calculated in accordance with CVM Instruction 527.
- 2 Non-accounting measure calculated by the Company. The Company presents Adjusted EBITDA to provide additional information on cash generation in the period.
- 3 Accounting measure reported in the consolidated Income Statement.

Adjusted EBITDA and adjusted EBITDA margin in 4020 expanded in relation to the comparison periods in all business divisions, led by the Brazil BD. This result demonstrates the capacity of Gerdau's teams to capture opportunities and also reflects the better moment in the global steel industry. Note that this is Company's higher EBITDA ever for a fourth quarter.

Financial Result & Net Income

Consolidated Adjusted Net Income ²	1,202	61	1878%	795	51%	2,408	1,295	86%

^{1 -} Accounting measure disclosed in the consolidated Income Statement.

In 4Q20 compared to 3Q20 and 4Q19, the variation in the financial result was basically due to the effects from exchange variation and the expenses with bond repurchases. The purpose of the bond operation was to decrease the exposure of foreign-denominated debt to mitigate the effect of the 29% Brazilian real depreciation against the U.S. dollar in 2020.

Adjusted net income in 4020 increased in comparison to 3020 and 4019, supported by EBITDA growth.

Dividends

On February 23, 2021, the Board of Directors of Gerdau S.A. approved the distribution of dividends as interest on equity in the amount of R\$ 221.2 million (R\$ 0.13 per share), to be paid as an advance on the minimum mandatory dividend for 2020, as stipulated in the Bylaws.

Record date: shareholding position on March 11, 2021

Ex-dividend date: March 12, 2021

On December 8, 2020, the Board of Directors of Gerdau S.A. approved the distribution of dividends as interest on equity in the amount of R\$ 289.2 million (R\$ 0.17 per share), to be paid as an advance on minimum mandatory dividend in 2020, as stipulated in the Bylaws.

Record date: shareholding position on December 21, 2020

Ex-dividend date: December 22, 2020

The payment date is March 25, 2021 for both distributions.

^{2 -} Non-accounting measure calculated by the Company to show net profit adjusted by non-recurring events that influenced the result.

Working Capital & Cash Conversion Cycle

The cash conversion cycle (working capital divided by daily net revenue in the quarter) decreased from 63 days in September 2020 to 49 days in December 2020. This record-high level is explained by the increased freeing up of working capital and by the net sales growth in 4020 compared to 3020.

Working Capital (R\$ million) & Cash Conversion Cycle (days)

Financial Liabilities

Debt composition	12.31.2020	09.30.2020	12.31.2019
(R\$ Million)			
Short Term	1,432	2,173	1,562
Long Term	16,084	17,368	14,488
Gross Debt	17,516	19,541	16,050
Cash, cash equivalents and short-term investments	7,658	7,200	6,295
Net Debt	9,858	12,341	9,755

On December 31, 2020, gross debt was 8% short term and 92% long term. Through its liability management, the Company reduced its consolidated exposure denominated in U.S. dollar to 77% of total gross debt, with the repurchase of bonds in the principal amount of US\$300 million and the raising of R\$1.2 billion through bilateral loans denominated in Brazilian real. As a result, debt denominated in Brazilian real now accounts for 23% of total gross debt.

On December 31, 2020, 29% of cash was in U.S. dollar.

The evolution in key debt indicators is shown below:

Indicators	12.31.2020	09.30.2020	12.31.2019
Gross debt / Total capitalization ¹	36%	38%	37%
Net debt ² (R\$)/EBITDA ³ (R\$)	1.25x	2.78x	1.67x

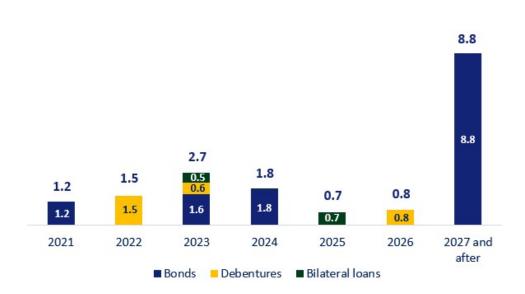

- 1 Total capitalization = shareholders' equity + gross debt interest on debt.
- 2 Net debt = gross debt interest on debt cash, cash equivalents and financial investments.
- 3 Adjusted EBITDA in the last 12 months.

The reduction in the net debt/EBITDA ratio from 2.07x on September 30, 2020 to 1.25x on December 31, 2020 is explained mainly by the amortizations in the period, the effects from exchange variation on debt and the higher cash generation. Note that this means that the Company's management has achieved one goal of its financial policy approved by the Board of Directors, which is keeping the net debt/EBITDA ratio between 1.0x and 1.5x.

Gross debt payment schedule (R\$ billion)

At the end of December 2020, the nominal weighted average cost of gross debt was 4.7%, or 2.46% for the portion denominated in Brazilian real, 5.7% plus exchange variation for the portion denominated in U.S. dollar contracted by companies in Brazil and 4.25% for the portion contracted by subsidiaries abroad. On December 31, 2020, the average gross debt term was 7.7 years, with the debt maturity schedule well balanced and well distributed over the coming years.

Investments

Capital expenditure amounted to R\$ 549 million in 4020, with R\$ 233 million allocated to general maintenance, R\$ 94 million to maintenance of the Ouro Branco Mill (MG) and R\$ 222 million to technological expansion and updating. Of the amount invested in the quarter, 53% was allocated to the Brazil BD, 13% to the Special Steel BD, 30% to the North America BD and 4% to the South America BD.

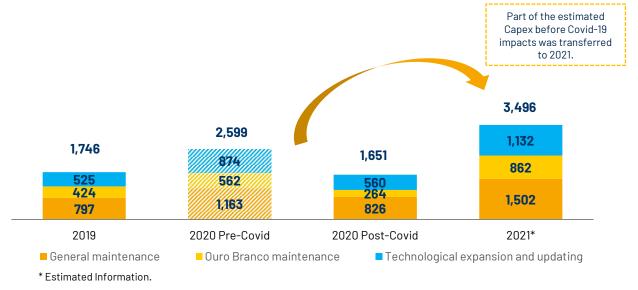

CAPEX in 2020 amounted to approximately R\$ 1.6 billion.

In 2020, of the total investments, 26% are related to environmental improvements in existing facilities, with this environmental investment exceeding the percentage of such investments in the last three years.

The investments bring the following environmental benefits:

- New tailings filtration system, which is an innovative project in the iron ore process that will allow for eliminating the use of tailings dams.
- Formation of planted forests to ensure the supply of biomass to our mills, resulting in environmental benefits
 and supporting the company's carbon management by reducing gas emissions causing climate change, since
 the bioreducer is a renewable source of carbon.
- Expansion and modernization of environmental control systems, such as dedusting, wastewater treatment lake, scrap inbound shipping and processing to reduce impacts on material topics relating to air emissions and water management.
- Improvements and technological updating that enable higher energy efficiency gains and lower greenhouse gas emissions driven by reducing losses in continuous casting, electric arc furnace, spheroidization furnace and logistics processes.

CAPEX projected for 2021 is R\$ 3.5 billion, with the CAPEX estimate for the three-year period (2019-2021) revised to R\$ 6.9 billion.

The investments in technological expansion and updating will be made as expectations for the market's recovery and for free cash flow generation in the period are maintained.

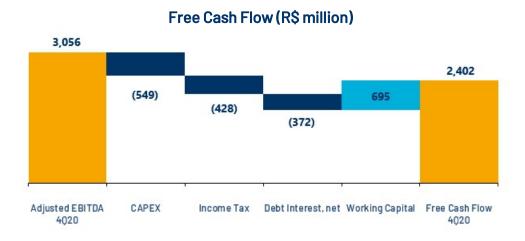

Conclusion of acquisition of Silat

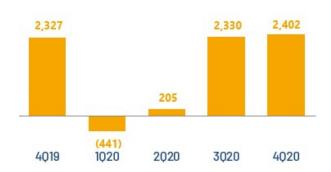

On November 30, 2020, the Company, through its subsidiary Gerdau Aços Longos S.A., concluded, after meeting the respective conditions precedent, including approval by Brazil's antitrust agency CADE, the acquisition of 96.35% of shares issued by Siderúrgica Latino-Americana S.A. ("SILAT") for R\$ 475.9 million. SILAT, which is located in Caucaia in the Fortaleza metropolitan area of Ceará state, has annual installed capacity of 600,000 tons of long steel rolled goods. With the transaction, Gerdau strengthens its positioning in the region and reinforces its strategy to better serve its clients in the domestic market.

Free Cash Flow

Free cash flow in 4020 was positive R\$ 2.4 billion, which is explained by the combination of EBITDA growth on the prior quarter and lower working capital needs. Note that in 2020, the Company registered positive free cash flow of R\$ 4.5 billion for the second straight year, which strengthened its liquidity position.

Free Cash Flow, Quarterly (R\$ million)

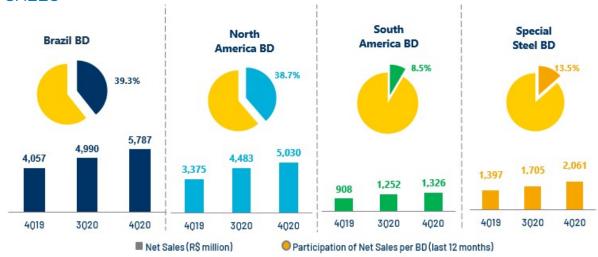

PERFORMANCE BY BUSINESS DIVISION (BD)

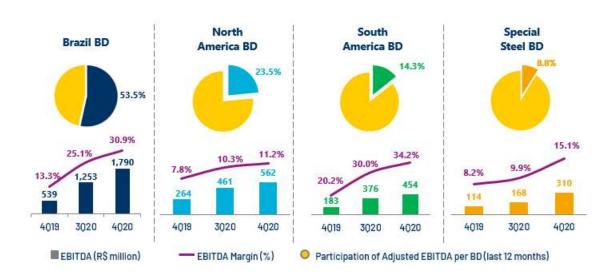

The information in this report is divided into four Business Divisions (BD) in accordance with Gerdau's corporate governance, as follows:

- Brazil BD (Brazil Business Division) includes the operations in Brazil (except special steel) and the iron ore operation in Brazil;
- North America BD (North America Business Division) includes all operations in North America (Canada, United States and Mexico), except special steel, as well as the jointly controlled entities and associate company, both located in Mexico;
- South America BD (South America Business Division) includes all operations in South America (Argentina, Peru, Uruguay and Venezuela), except the operations in Brazil, and the jointly controlled entities in the Dominican Republic and Colombia;
- Special Steel BD (Special Steel Business Division) includes the special steel operations in Brazil and the United States.

^{1 -} Includes iron ore sales.

Production & Shipments

Crude steel production remained stable in 4020 compared to 3020. Compared to 4019, crude steel production increased due to higher shipments in the domestic market.

Shipments to the domestic market registered significant growth in 4020 compared to 4019, driven by growing demand from construction and in the industry. A highlight was the construction retailing segment, which reflected the Company's digital initiatives that agilely captured the strong growth in construction in Brazil's various regions. In flat steel, the highlight was the demand for heavy plates to meet demand from the wind power and infrastructure sectors. Exports registered a decline in a natural movement to prioritize product shipments to the domestic market. In relation to 3020, total sales decreased following the normal seasonality for the fourth quarter.

In 4020, 540,000 tonnes of iron ore were sold to third parties and 1,039,000 tonnes were consumed internally.

Operating Result

Net sales increased in 4020 compared to 3020 and 4019, reflecting the higher shipments to the domestic market. Shipments to the domestic market as a ratio of total sales increased from 68% in 4019 to 86% in 4020. In 2020, there also was a movement to rebuild the costs of raw materials absorbed over recent years.

^{2 -} EBITDA adjusted for the elimination of non-recurring effects from the fixed costs of mills undergoing stoppages in the amount of R\$ 65 million in 2020 and 2020 and R\$ 238 million in 3019 and 2019.

Cost of goods sold in 4020 increased in relation to both comparison periods, due to the higher costs of raw material in general. Scrap and iron ore prices rose 80% and 69%, respectively, compared to 4019. Compared to 3020, these product prices increased by 37% and 26%.

Gross profit and gross margin expanded in relation to both comparison periods, driven by the better market mix, with 86% of shipments going to the domestic market in 4020. The change in mix led the increase in revenue per tonne sold to outpace the increase in cost per tonne sold. Shipments to the domestic market are mainly composed of rolled steel products, whose revenue per tonne sold is higher than that of export products, which are mainly composed of crude steel.

In 4Q20, EBITDA and EBITDA margin grew in relation to both periods, accompanying gross profit, as explained above. Note that these were the highest results for EBITDA and EBITDA margin registered by the Brazil BD in the last 12 months.

NORTH AMERICA BD

NORTH AMERICA BD	4020	4019	Δ	3020	Δ	12M20	12M19	Δ
Volumes (1,000 tonnes)								
Production of crude steel	1,177	1,053	12%	1,154	2%	4,706	4,601	2%
Shipments of steel	1,166	1,050	11%	1,087	7%	4,334	4,275	1%
Results (R\$ million)								
Net Sales	5,030	3,375	49%	4,483	12%	17,458	14,656	19%
Cost of Goods Sold	(4,639)	(3,201)	45%	(4,196)	11%	(16,213)	(13,351)	21%
Gross profit	391	174	125%	288	36%	1,246	1,305	-5%
Gross margin (%)	7.8 %	5.2 %		6.4%		7.1 %	8.9%	
EBITDA	562	264	113%	461	22%	1,866	1,583	18%
EBITDA margin (%)	11.2%	7.8 %		10.3%		10.7%	10.8%	

Production & Shipments

Steel production and shipments in 4020 increased in relation to 3020, demonstrating the continued resilience of the non-residential construction market and the industry. Total construction investments (CPIP) increased 7% in the 12 months to November to reach US\$ 1.4 trillion. Construction activity also remained strong, as shown by the Institute for Supply Management (ISM) index, which reached 60.7 in December 2020 (above 50 indicates growth).

Operating Result

The growth in net sales in 4020 compared to 4019 was mainly due to the 31% appreciation in the average U.S. dollar rate against the Brazilian real in the period. In relation to 3020, net sales accompanied the growth in shipments.

Cost of goods sold in 4020 increased compared to 4019 due to exchange variation effects, as mentioned above. In relation to 3020, COGS was impacted by higher scrap costs, as well as by the growth in shipments.

Gross profit and gross margin in 4020 increased in relation to 3020, due to higher shipments and the initiatives to streamline costs.

EBITDA and EBITDA margin in 4T20 grew in relation to both comparison periods, accompanying the evolution in gross profit and gross margin. Note that this was the highest EBITDA margin for a fourth quarter since 2007.

SOUTH AMERICA BD

SOUTH AMERICA BD	4020	4019	Δ	3020	Δ	12M20	12M19	Δ
Volumes (1,000 tonnes)								
Production of crude steel	184	161	14%	170	8%	574	609	-6%
Shipments of steel	331	274	21%	300	10%	962	1,059	-9%
Results (R\$ million)								
Net Sales	1,326	908	46%	1,252	6%	3,831	3,259	18%

EBITDA margin (%)	34.2 %	20.2%		30.0%		29.1%	20.7%	

^{1 -} EBITDA adjusted for the elimination of non-recurring effects from the fixed costs of mills undergoing shutdowns in the amount of R\$ 26 million in 2020.

Production & Shipments

Steel production and shipments in 4020 increased in relation to 3020 and 4019, supported by the continued good performance of the construction industry, especially in Peru and Argentina.

Operating Result

Net sales increased due to higher shipments and the effects from currency variation. Cost of goods sold remained in line with 3020.

Gross profit and gross margin increased in 4020 compared to both periods, since the increase in revenue per tonne sold surpassed the increase in costs per tonne sold in the period.

EBITDA and EBITDA margin in 4020 reflected the robust demand from the construction industry, mainly in Peru and Argentina, and the important contribution from the joint ventures. This was the highest EBITDA of the South America BD since 2008.

SPECIAL STEEL BD

SPECIAL STEEL BD	4020	4019	Δ	3020	Δ	12M20	12M19	Δ

^{1 -} EBITDA adjusted for the elimination of non-recurring effects from the fixed costs of mills undergoing shutdowns in the amount of R\$ 28 million in 2020.

Production & Shipments

Steel production and shipments increased in 4020 compared to 4019 and 3020, reflecting the recovery of the automotive industry relating to the operations in Brazil, combined with the recovery in shipments from the United States, which is an effect already observed in the prior quarter.

There are still repercussions from the impacts of the oil price in the U.S. oil & gas industry and the lower exports of vehicles from Brazil to Argentina. On the other hand, the automotive industry is staging a significant recovery, with higher production and shipments in both Brazil and the United States.

Operating Result

The increase in net sales and cost of goods sold in 4020 compared to 4019 is mainly due to the effects from the 31% appreciation in the U.S. dollar against the Brazilian real on the revenues from the operations in the United States.

Gross profit and gross margin increased in the period, due to the economies of scale resulting from the higher sales. Note that this division has been posting a gradual recovery, as shown by the capacity utilization rates of 25% in 2020, 45% in 3020 and 70% in 4020.

EBITDA and EBITDA margin increased in 4020 compared to both periods, accompanying the performance of gross profit and gross margin in the period.

THE MANAGEMENT

This document contains forward-looking statements. These statements are based on estimates, information or methods that may be incorrect or inaccurate and that may not occur. These estimates are also subject to risk, uncertainties and assumptions that include, among other factors: general economic, political and commercial conditions in Brazil and in the markets where we operate and existing and future government regulations. Potential investors are cautioned that these forward-looking statements do not constitute guarantees of future performance, given that they involve risks and uncertainties. Gerdau does not undertake and expressly waives any obligation to update any of these forward-looking statements, which are valid only on the date on which they were made.
