## **NOTICE TO THE MARKET**

OCEANA OFFSHORE S.A. ("Company"), hereby to inform its shareholders and market in general, that it has signed with its main client, on January 5th, a new Integrated Logistic Contract for the Offshore Market in Brazil.

Keeping its history of pioneering spirit, CBO is the first company in its sector to offer those services, which provides Management and Operationalization of the entire supply chain of the Maritime Units, integrating offshore logistic, onshore storage and land transportation of cargo and supplies.

"Guided by our strategic planning, we stopped prioritizing naval construction in 2020, and are now moving forward with it by announcing a new line of business in the logistic services vertical, which complements our maritime support vessel chartering business to the offshore O&G sector, and that we expect to become increasingly more relevant to the Company's results", highlights Marcos Tinti, Grupo CBO's CEO.

The new contract is effective as of January/21 until February/24 and CBO is now responsible for planning and executing door-to-door logistics, meaning from our customer's supplies vendors to the delivery at the offshore maritime units. To deliver this new line of business, a new logistic department was created with dedicated management focused on the success of this contract and also on prospecting new opportunities in the sector.

Niterói, January 7<sup>th</sup>, 2021.
