## Disclaimer

*This report may contain forward-looking statements about future events. Such forecasts reflect only the expectations of the company's management about future economic conditions, as well as the company's industry, performance and financial results, among others. The terms "anticipates", "believes", "expects", "predicts", "intends", "plans", "projects", "aims", "should", as well as other similar terms, are intended to identify such forecasts, which, of course, involve risks and uncertainties foreseen or not foreseen by the company and, consequently, are not guarantees of the company's future results. Therefore, future results of the company's operations may differ from current expectations, and the reader should not rely solely on the information contained herein. The Company undertakes no obligation to update the presentations and forecasts in the light of new information or future developments. The figures reported for 2Q25 onwards are estimates or targets. Additionally, this presentation contains some financial indicators that are not recognized under BR GAAP or IFRS Accounting Standards. These indicators do not have standardized meanings and may not be comparable to indicators with a similar description used by other companies. We provide these indicators because we use them as measures of the company's performance; they should not be considered in isolation or as a substitute for other financial metrics that have been disclosed in accordance with BR GAAP or IFRS Accounting Standards. See definitions of Free Cash Flow, Adjusted EBITDA and Net Debt in the Glossary and respective reconciliations in the Liquidity and Capital Resources, Reconciliation of Adjusted EBITDA and Net Debt sections. Consolidated financial information prepared in accordance with International Accounting Standard and audited by the independent auditors.*

# Highlights – 1Q25

US\$ billion

**“The first quarter of 2025 was marked by positive results that reflect Petrobras' strong performance. We generated a higher cash flows, mainly due to a 5% increase in production volume compared to the previous quarter. This production growth was reflected in Adjusted EBITDA, which rose 46% compared to 4Q24.”**

*Fernando Melgarejo, Chief Financial Officer and Investor Relations Officer*

## Main financial highlights

- Maintenance of strong cash generation with Operating Cash Flow of US\$ 8.5 billion and Free Cash Flow of US\$ 4.5 billion in 1Q25
- Consistent results: excluding one-off events, Adjusted EBITDA was US\$ 10.7 billion and net income was US\$ 4 billion
- Capex of US\$ 4.1 billion in 1Q25, 29.1% lower than 4Q24, reinforces the atypical level observed in the previous quarter, which was explained by the closing of the gap between the physical and financial progress of the Búzios platforms, as a response to the actions implemented in the second half of 2024

**“We remain committed to executing our Business Plan: we invested US\$ 4 billion in this first quarter of the year, which represents 22% of the annual guidance. These investments are focused on pre-salt projects, with emphasis on the Búzios and Atapu fields. We are drilling and connecting more wells and advancing in the construction of new units that will support the growth of our production curve. These are projects that generate value for our shareholders and will translate into revenue in the upcoming years.”**

*Fernando Melgarejo, Chief Financial and Investor Relations Officer*

### Contribution to society

- We paid R\$ 65.7 billion in taxes to the Federal Government, states, and municipalities
- We approved dividends of R\$ 11.7 billion relative to 1Q25 results, out of which R\$ 5.9 billion for the Controlling Group
- Partnership between Petrobras and BNDES for the acquisition procurement of carbon credits generated from the restoration of up to 50,000 hectares of degraded areas in the Amazon, capturing approximately 15 million tons of carbon

### Main operational highlights

- We reached total production of oil and natural gas of 2.77 million boe/d, an increase of 5.4% compared to Q4 2024
- We started production on FPSO Almirante Tamandaré (Búzios 7) on February 15 in the Búzios Field, in Santos Basin pre-salt. The FPSO has the potential to produce up to 225,000 barrels of oil per day (bpd) and process 12 million cubic meters of gas
- We confirmed new discoveries in Campos Basin (North Brava Block), in Santos Basin (Aram and Búzios), and concluded the Cased-hole Formation Test in Colombia (Sirius-2 well)
- We completed the mooring of FPSO Alexandre de Gusmão (180 kbpd) in Mero 4
- We completed the revamp on Train 1 of RNEST, which expanded processing capacity from 115,000 to 130,000 barrels of oil per day
- We achieved a processing level of 73% of pre-salt oil, 200 bps above 4Q24, and 69% yield of diesel, gasoline, and jet fuel (high-value oil products) in total production volume
- We started commercial operation of the 2nd module of the Natural Gas Processing Unit of the Boaventura Energy Complex, increasing total processing capacity from 10.5 to 21 million m<sup>3</sup>/day of gas
- We sold, for the first time, VLSFO (Very Low Sulfur Fuel Oil) with 24% renewable content (B24) in the Asian market
- We signed a contract with the Indian state-owned Bharat Petroleum Corporation Limited (BPCL) to export up to 6 million barrels of oil per year starting in 2025 (new markets for our oil exports)
- We celebrated and amended contracts for the supply of natural gas in the free market, totaling a volume of 1.25 MMm<sup>3</sup>/d

## Main items

(\*) See reconciliation of net income and adjusted EBITDA without one-off events.

## Consolidated results

In 1Q25, the Adjusted EBITDA excluding one-off events reached US\$ 10.7 billion, while net income, also excluding one-off events, was US\$ 4.0 billion.

Adjusted EBITDA excluding one-off events increased by 8% compared to 4Q24, mainly driven by the increase in oil production, higher oil sales in the foreign and domestic markets, and the higher diesel crack spreads.

Net income excluding one-off events increased by 30.7% compared to 4Q24. Considering one-off events, net income reached US\$ 6.0 billion due to improved financial results, which was positive at US\$ 1.7 billion, benefiting from a 7% appreciation of the exchange rate at the end of the period, reflecting the effects of currency variation on the debts between Petrobras and its overseas subsidiaries.

# One-off events

Table 2 – One-off events

US\$ million	1Q25	4Q24	1Q24	Variation (%)	
				1Q25 X 4Q24	1Q25 X 1Q24
<b>Net income (loss)</b>	5,995	(2,766)	4,805	-	24.8

<b>Net effect of items with one-off events on IR/CSLL</b>	(1,003)	3,017	337	-	-
<b>Net income without one-off events</b>	4,050	3,097	5,442	30.8	(25.6)
Shareholders of Petrobras	4,029	3,083	5,420	30.7	(25.7)
Non-controlling interests	21	14	22	50.0	(4.5)
<b>Adjusted EBITDA</b>	10,446	7,165	12,127	45.8	(13.9)
Items with one-off events	(206)	(2,714)	(298)	(92.4)	(30.9)
<b>Adjusted EBITDA without one-off events</b>	10,652	9,879	12,425	7.8	(14.3)

(\*) As of 4Q24, the line "gains/(losses) with foreign exchange variation Real x U.S. dollar" was added to the table above to calculate adjusted EBITDA and net income without one-off events. For comparative purposes, the periods previously disclosed were updated.

In management's view, the one-off events presented above, although related to the Company's business, were highlighted as complementary information for a better understanding and evaluation of the result. Such items do not necessarily occur in all periods and shall be disclosed when relevant.

# Capex

Table 3 - Capex

US\$ million	1Q25	4Q24	1Q24	Variation (%)	
				1Q25 X 4Q24	1Q25 X 1Q24
Exploration & Production (*)	3,502	4,899	2,472	(28.5)	41.7

<b>Total</b>	<b>4,065</b>	<b>5,731</b>	<b>3,043</b>	<b>(29.1)</b>	<b>33.6</b>

(\*) See Glossary for investment definitions

In 1Q25, Capex totaled US\$ 4.1 billion, representing a reduction of 29.1% in comparison to 4Q24 and an increase of 33.6% compared to 1Q24. 1Q25 performance reinforces the atypical nature of the investment level observed in 4Q24, which was explained by the closing of the gap between the physical and financial progress of the Búzios platforms, as a response to the actions implemented throughout the second half of 2024.

In the Exploration & Production segment, Capex totaled US\$ 3.5 billion in 1Q25, a reduction of 28.5% compared to 4Q24. This decrease mainly reflects the financial advancement efforts concentrated in the previous quarter for the platforms under construction for the Búzios field, which helped mitigate the risks of delays and increased the potential for anticipations.

Compared to 1Q24, however, there was an increase of 41.7% in Capex, mainly due to progress on major pre-salt projects in Santos Basin, particularly the Búzios and Atapu fields' new production systems.

In the Refining, Transportation and Marketing segment, Capex totaled US\$ 0.4 billion in 1Q25, mainly driven by scheduled refinery shutdowns, the completion of RNEST's Train 1 revamp, and progress on REPLAN's middle distillates hydrotreating (HDT) project.

Additionally, it is worth highlighting the production start-up in 1Q25 of the leased FPSO Almirante Tamandaré (Búzios 7), which resulted in the recognition of US\$ 2.6 billion (Petrobras' share) as lease liabilities. The extension of the FPSO Cidade de Angra dos Reis contract until 2030 also stands out, adding US\$ 0.4 billion to our indebtedness. Similarly to owned units, leased FPSOs are recognized as company assets and represent an investment effort to expand production capacity with new units. However, they are not recorded as Capex.

The following table presents the main information on new oil and gas production systems that have already been contracted.

Table 4 – Main projects

Unit	Start-up	FPSO capacity (bbl/day)	Petrobras Actual Investment (US\$ bn)	Petrobras Total Investment (US\$ bn) <sup>(1)</sup>	Petrobras Stake	Status
Integrado Parque das Baleias (IPB) FPSO Maria Quitéria (Chartered unit)	2024	100,000	1.3	1.9	100%	Project in execution phase with production system in operation. 5 wells drilled and 4 completed. <sup>(2)</sup>
Mero 3 FPSO Marechal Duque de Caxias (Chartered unit)	2024	180,000	0.5	1.0	38.6%	Project in execution phase with production system in operation. 12 wells drilled and 11 completed.
Búzios 7 FPSO Almirante Tamandaré (Chartered unit)	2025	225,000	1.3	2.2	88.99%	Project in execution phase with production system in operation. 15 wells drilled and 15 completed.
Búzios 6 P-78 (Owned unit)	2025	180,000	2.4	5.2	88.99%	Project in execution phase with production system under construction. 8 wells drilled and 7 completed.
Mero 4 FPSO Alexandre de Gusmão (Chartered unit)	2025	180,000	0.3	1.3	38.6%	Project in execution phase with production system at location. 9 wells drilled and 7 completed.
Búzios 8 P-79 (Owned unit)	2026	180,000	2.4	5.7	88.99%	Project in execution phase with production system under construction. 11 wells drilled and 7 completed.
Búzios 9 P-80 (Owned unit)	2027	225,000	1.7	6.3	88.99%	Project in execution phase with production system under construction. 3 wells drilled and 2 completed.
Búzios 10 P-82 (Owned unit)	2027	225,000	1.5	7.5	88.99%	Project in execution phase with production system under construction. 1 well drilled.
Búzios 11 P-83 (Owned unit)	2027	225,000	1.2	6.8	88.99%	Project in execution phase with production system under construction. 3 wells drilled and 1 completed.
Raia Manta e Raia Pintada FPSO Raia (Non-operated project)	2028	126,000	1.0	2,7 <sup>(3)</sup>	30%	Project in execution phase with production system under construction.
Atapu 2 P-84	2029	225,000	0.6	6.4	65.7%	Project in execution phase with production system under construction.
Sépia 2 P-85	2030	225,000	0.2	4.7	55.3%	Project in execution phase.

(1) Total investment with the 2025-29+ Strategic Plan assumptions and Petrobras work interest (WI). Chartered units leases are not included.

(2) Production Unit for revitalization project. Refers only to new wells. The scope of the project also includes the relocation of some wells of the units being decommissioned.

(3) Total investment considering Petrobras work interest (WI). It is included the FPSO, contracted on a lump sum turnkey modality, which includes engineering, procurement, construction and installation for the unit. The contractor will also provide FPSO operation and maintenance services during the first year from the start of production.

## Liquidity and capital resources

Acquisition of PP&E and intangible assets	(3,962)	(4,429)	(2,838)
Acquisition of equity interests	-	(9)	(1)
<b>Free cash flow (**)</b>	<b>4,536</b>	<b>3,766</b>	<b>6,547</b>

(\*) Includes government bonds, bank deposit certificates and time deposits of companies classified as held for sale.

(\*\*) Free cash flow (FCF) is in accordance with the new Shareholder Remuneration Policy ("Policy") approved on 07/28/2023 and corresponds to operating cash flow minus acquisitions of property, plant and equipment, intangible assets and equity interests.

As of March 31, 2025, cash and cash equivalents totaled US\$ 4.7 billion, and adjusted cash and cash equivalents totaled US\$ 8.5 billion.

In 1Q25, funds generated by operating activities reached US\$ 8.5 billion and free cash flow was positive at US\$ 4.5 billion. Additionally, during the period, the following were recorded: redemption of securities (US\$ 1.4 billion), inflows from earn-outs (US\$ 0.5 billion), and financial compensation for co-participation agreements in S epia and Atapu (US\$ 0.4 billion).

The operational cash generation, combined with the inflows from securities redemptions and divestments, was used to: (a) investments (US\$ 4.0 billion), (b) shareholders remuneration (US\$ 2.9 billion), (c) lease liabilities amortization (US\$ 2.1 billion), and (d) amortization of principal and interest due in the period (US\$ 1.0 billion).

In 1Q25, the Company paid off various loans and financings amounting to US\$ 1.0 billion and raised US\$ 0.5 billion, notably a long-term operation of US\$ 495 million in the domestic banking market.

## Debt indicators

As of March 31, 2025, gross debt totaled US\$ 64.5 billion, representing an increase of 6.9% compared to December 31, 2024. This increase was primarily driven by the start-up of the leased FPSO Almirante Tamandaré (Búzios 7) and the extension of the FPSO Cidade de Angra dos Reis contract through 2030, which led to an increase of US\$ 3.0 billion (Petrobras' share) in the Company's debt.

The average debt maturity shifted from 12.52 years on December 31, 2024, to 12.19 years on March 31, 2025, while the average cost increased from 6.8% per year to 6.9% per year during the same period.

The gross debt/Adjusted EBITDA ratio was 1.45x on March 31, 2025, compared to 1.29x on December 31, 2024.

As of March 31, 2025, net debt reached US\$ 56.0 billion, an increase of 7.3% compared to December 31, 2024.

(\*) EBITDA margin and ROCE variations in percentage points.

In 1Q25, the gross profit of E&P was US\$ 8.3 billion, an increase of 12.0% compared to 4Q24, which had a result of US\$ 7.4 billion. This growth was primarily due to higher production during the period and increased Brent prices, partially offset by a higher government take (production taxes).

The operating income in 1Q25 was US\$ 7.5 billion, 139.1% higher than 4Q24. This growth reflects mainly the reduction in operating expenses, particularly due to the absence of the decommissioning provision recorded in the previous quarter.

Lifting costs reported in 1Q25, excluding production taxes and leases, were US\$ 6.79/boe, representing a 7.1% increase compared to the last quarter. This increase is due to the rise in costs for services related to integrity maintenance of assets, mainly due to the intensification of well interventions in Roncador, Barracuda, and Marlim fields, as well as inspections and subsea maintenance in Búzios, Itapu, and Marlim Leste fields. Additionally, there were higher expenditures in the Búzios field related to the new seabed monitoring contract. These effects were partially offset by a lower volume of losses due to maintenance shutdowns, improved operational efficiency in the Santos Basin, the ramp-up of the FPSO Marechal Duque de Caxias, and the production start-up of the FPSO Almirante Tamandaré in February 2025.

In the Pre-salt, lifting costs increased 11.0% due to higher expenditures in Búzios related to the new seabed monitoring contract and the increase in subsea inspections in the same field and in Itapu. This increase was partially offset by higher production resulting from improved operational efficiency in the Santos Basin, the ramp-up of the FPSO Marechal Duque de Caxias, and the production start-up of the FPSO Almirante Tamandaré in February 2025.

In the Post-salt, lifting costs increased 4.4% due to higher expenditures on integrity in the Campos Basin, mainly in well interventions in Roncador, Barracuda, and Marlim fields, and in subsea inspections in Marlim Leste. This increase was partially offset by higher production resulting from the operational return of the Marlim Leste field in December 2024, which has a lower cost per barrel compared to the average of the producing fields in the Post-salt.

In the onshore and shallow water assets, lifting costs decreased 10.7%, mainly due to the lower expenditures on well interventions in the onshore assets in Bahia.

## Refining, Transportation and Marketing

Table 8 - RTM results

US\$ million	1Q25	4Q24	1Q24	Variation (%) (1)	
				1Q25 X 4Q24	1Q25 X 1Q24
Sales revenues	19,989	19,291	22,190	3.6	(9.9)
Gross profit	1,211	1,498	2,207	(19.2)	(45.1)
Operating expenses	(736)	(939)	(836)	(21.6)	(12.0)
Operating Income	475	559	1,371	(15.0)	(65.4)
Net income (loss) attributable to the shareholders of Petrobras	367	15	775	2346.7	(52.6)
Adjusted EBITDA of the segment	1,069	1,500	1,994	(28.7)	(46.4)
EBITDA margin of the segment (%)	5	8	9	(2)	(4)
ROCE (Return on Capital Employed) (%)	1.2	2.5	5.0	(1.3)	(3.8)
Refining cost (US\$ / barrel) - Brazil	2.62	2.48	2.63	5.6	(0.4)
Price of basic oil products - Domestic Market (US\$/bbl)	86.58	83.30	96.13	3.9	(9.9)

(1) Changes in EBITDA and ROCE margins in percentage points.

In 1Q25, gross profit was US\$ 0.3 billion lower than in 4Q24, reflecting mainly lower margins on oil products produced for the domestic market. Considering the effect of inventory turnover of US\$ 288 million in 1Q25 and US\$ 383 million in 4Q24, the gross profit would have been US\$ 0.8 billion in 1Q25 and US\$ 1.1 billion in 4Q24.

There were lower margins on oil products in the domestic market, mainly for gasoline, in addition to a decrease in sales volume due to the typical seasonality of the first quarter, primarily impacting gasoline and LPG.

The operating income in 1Q25 was lower than in 4Q24, reflecting the reduction in gross profit, partially offset by lower operating expenses.

In 1Q25, refining costs per barrel in USD were 5.6% higher than in 4Q24, mainly due to the lower processed throughput (-6.1%) resulting from the scheduled general shutdown of RNEST.

## Gas and Low Carbon Energies

Table 9 – G&amp;LCE results

US\$ million	1Q25	4Q24	1Q24	Variation (%) (1)	
				1Q25 X 4Q24	1Q25 X 1Q24
Sales revenues	1,860	2,557	2,422	(27.3)	(23.2)
Gross profit	735	1,170	1,245	(37.2)	(41.0)
Operating expenses	(779)	(940)	(889)	(17.1)	(12.4)
Operating income	(44)	230	356	-	-
Net income (loss) attributable to the shareholders of Petrobras	(28)	152	242	-	-
Adjusted EBITDA of the segment	87	368	490	(76.4)	(82.2)
EBITDA margin of the segment (%)	5	14	20	(10)	(16)
ROCE (Return on Capital Employed) (%) (2)	1.8	4.2	9.4	(2.4)	(7.6)
Natural gas sales price - Brazil (US\$/bbl)	56.75	57.79	67.88	(1.8)	(16.4)
Natural gas sales price - Brazil (US\$/MMBtu)	9.57	9.74	11.45	(1.7)	(16.4)
Fixed revenues from power auctions (3)(4)	29	54	64	(46.1)	(55.0)
Average electricity sales price (US\$/MWh) (4)	42.27	66.09	63.28	(36.1)	(33.2)

(1) EBITDA margin and ROCE variations in percentage points.

(2) The fixed revenue from auctions takes into account the remuneration for thermal availability and inflexible electricity committed in auctions.

(3) For the current period, the figures for the Energy segment are subject to possible changes once the final report from the Chamber of Electric Energy Commercialization - CCEE is issued.

(4) Previous quarter number revised after the issuance of the final report from the Chamber of Electric Energy Commercialization - CCEE.

In 1Q25, the gross profit of the G&LCE segment decreased 37.2% compared to 4Q24, mainly due to the accounting of revenues from contractual commitments in 4Q24, the reduction of 8 MM m<sup>3</sup>/day in the volume of natural gas sold by Petrobras, and the termination of energy contracts in the regulated market. The reduction in the volume of natural gas sales was caused by lower demand in both the thermal segment (reflecting a more balanced hydrological scenario) and the non-thermal segment (combined with a greater share of other players in this market).

The reduction in gross profit impacted the operating income, despite lower operating expenses compared to 4Q24, resulting from provisions for fines in energy contracts accounted for in that quarter and the reimbursement in 1Q25 of amounts previously paid by Petrobras in a prior year, associated with transportation service provision, as a result of the application of the regulatory account mechanism.

## Reconciliation of Adjusted EBITDA

EBITDA is an indicator calculated as the net income for the period plus taxes on profit, net financial result, depreciation and amortization. Petrobras announces EBITDA, as authorized by CVM Resolution No. 156, of June 2022.

In order to reflect the management view regarding the formation of the company's current business results, EBITDA is also presented adjusted (Adjusted EBITDA) as a result of: results in equity-accounted investments; impairment, results with co-participation agreement in production fields and gains/losses on disposal/write-offs of assets.

Adjusted EBITDA, reflecting the sum of the last twelve months (Last Twelve Months), also represents an alternative to the company's operating cash generation. This measure is used to calculate the Gross Debt and Net Debt to Adjusted EBITDA metric, helping to evaluate the company's leverage and liquidity.

EBITDA and adjusted EBITDA are not provided for in IFRS Accounting Standards and should not serve as a basis for comparison with those disclosed by other companies and should not be considered as a substitute for any other measure calculated in accordance with IFRS Accounting Standards. These measures should be considered in conjunction with other measures and indicators for a better understanding of the company's performance and financial condition.

# Glossary

## A

**Adjusted cash and cash equivalents:** Sum of cash and cash equivalents and investments in securities in domestic and international markets that have high liquidity, i.e., convertible into cash within 3 months, even if maturity is longer than 12 months, held for the purpose of complying with cash commitments. This measure is not defined under the IFRS Accounting Standards and should not be considered in isolation or as a substitute for cash and cash equivalents computed in accordance with IFRS Accounting Standards. It may not be comparable to adjusted cash and cash equivalents of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

**Adjusted EBITDA:** Adjusted EBITDA (a non-GAAP measure defined as net income plus net finance income (expense); income taxes; depreciation, depletion and amortization; results in equity-accounted investments; impairment of assets (reversals); results on disposal/write-offs of assets, remeasurement of investment retained with loss of control and reclassification of CTA; and results from co-participation agreements in bid areas).

**Adjusted EBITDA margin:** Adjusted EBITDA divided by sales revenues.

**Average capital employed:** quarterly average considering inventories, intangibles and fixed assets at historical exchange rates.

## C

**CAPEX – Capital Expenditure:** investments that encompasses acquisition of property, plant, and equipment, including costs with leasing, intangible assets, investments in subsidiaries and affiliates, costs with geology and geophysics and pre-operating costs.

## E

**Exploration & Production (E&P):** The segment covers the exploration, development and production of crude oil, NGL and natural gas in Brazil and abroad, with the main aim of supplying our domestic refineries. This segment also operates through partnerships with other companies, including interests in foreign companies in this segment.

## F

**Free cash flow:** Corresponds to operating cash flow minus acquisitions of property, plant and equipment, intangible assets and equity interests. Free cash flow is not defined under the IFRS Accounting Standards and should not be considered in isolation or as a substitute for cash and cash equivalents calculated in accordance with IFRS Accounting Standards. It may not be comparable to free cash flow of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

## G

**Gas & Low Carbon Energy (G&LCE):** The segment covers the logistics and commercialization of natural gas and electricity, the transportation and commercialization of LNG, the generation of electricity through thermoelectric plants, as well as the processing of natural gas. It also includes renewable energy businesses, low carbon services (carbon capture, utilization and storage) and the production of biodiesel and its products.

## I

**Investments:** Capital expenditures based on the cost assumptions and financial methodology adopted in our Strategic Plan, which include acquisition of PP&E, including expenses with leasing, intangibles assets, investment in investees and other items that do not necessarily qualify as cash flows used in investing activities, primarily geological and geophysical expenses, pre-operating charges, purchase of property, plant and equipment on credit and borrowing costs directly attributable to works in progress.

**Investments in E&P:** In the E&P segment, investment projects are classified as: a) production development; b) exploration and c) others. See the details:

a) Production Development (PD)

Projects aimed at enabling the production activities of new oil or gas fields, or the revitalization of fields already in production through new production systems and/or onshore facilities.

This includes complementary development projects intended to increase the recovery factor in fields with declining production, without the installation of new production systems.

Other projects in the Production Development include: asset acquisition projects linked to new production systems; quantitative risk analysis wells in development areas; and investments in the production development of non-operated fields.

b) Exploration (EXP)

Exploration projects aim to incorporate oil and gas reserves in a resilient way, from an economical and carbon emission perspective, generating value in the long-term. They are classified into types such as: Geological Interpretation Regional Studies, Block, Discovery Appraisal, Ring Fence (RF), Reservoir Data Acquisition (RDA) and Extended Well Tests (EWT).

c) Others

Projects required to implement essential infrastructure needed to enable other investment projects, as well as operations.

Examples include upgrades to operational infrastructure, scheduled shutdowns, acquisition of capital goods, IT and communications improvements, inspections and pipeline replacements due to SCC-CO<sub>2</sub>, new platforms pre-operational costs, among others.

## L

**Leverage:** Ratio between the Net Debt and the sum of Net Debt and Shareholders' Equity. Leverage is not a measure defined in the IFRS Accounting Standards and it is possible that it may not be comparable to similar measures reported by other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity.

**Lifting Cost:** An indicator that represents the lifting cost per barrel of oil equivalent, considering the ratio between production and costs. It includes expenses for the execution and maintenance of production. Costs related to the leasing of third-party platforms, production taxes, and depreciation, depletion, and amortization are not considered in this indicator.

**Lifting Cost + Leases:** An indicator that includes costs related to the leasing of third-party platforms in the calculation of Lifting Cost. Costs related to production taxes and depreciation, depletion, and amortization are not considered.

**Lifting Cost + Production Taxes:** An indicator that includes costs related to production taxes in the calculation of Lifting Cost. Costs related to the leasing of third-party platforms and depreciation, depletion, and amortization are not considered.

**Lifting Cost + Production Taxes + Leases:** An indicator that includes costs related to the leasing of third-party platforms and production taxes in the calculation of Lifting Cost. Costs related to depreciation, depletion, and amortization are not considered.

**LTM Adjusted EBITDA:** Sum of the last 12 months (Last Twelve Months) of Adjusted EBITDA. This metric is not foreseen in the international accounting standards - IFRS Accounting Standards and it is possible that it is not comparable with similar indexes reported by other companies, however Management believes that it is supplementary information to assess liquidity and helps manage leverage. Adjusted EBITDA should be considered in conjunction with other metrics to better understand the Company's liquidity.

## N

**Net Debt:** Gross debt less adjusted cash and cash equivalents. Net debt is not a measure defined in the IFRS Accounting Standards and should not be considered in isolation or as a substitute for total long-term debt calculated in accordance with IFRS Accounting Standards. Our calculation of net debt may not be comparable to the calculation of net debt by other companies, however our management believes that net debt is an appropriate supplemental measure that helps investors assess our liquidity and supports leverage management.

**Net Income by Business Segment:** The information by the company's business segment is prepared based on available financial information that is directly attributable to the segment or that can be allocated on a reasonable basis, being presented by business activities used by the Executive Board to make resource allocation decisions, and performance evaluation. When calculating segmented results, transactions with third parties, including jointly controlled and associated companies, and transfers between business segments are considered. Transactions between business segments are valued at internal transfer prices calculated based on methodologies that take into account market parameters, and these transactions are eliminated, outside the business segments, for the purpose of reconciling the segmented information with the consolidated financial statements of the company.

## O

**Operating profit after taxes:** Adjusted EBITDA, minus DD&A of assets booked at historical exchange rates and 34% income tax rate.

## R

**Refining, Transportation and Marketing (RTM):** The segment covers refining, logistics, transportation, acquisition and export of crude oil, as well as trading in oil products in Brazil and abroad. This segment also includes petrochemical operations (involving interests in petrochemical companies in Brazil) and fertilizer production.

**ROCE:** operating profit after taxes / average capital employed, both measured in US\$ on a LTM basis
