

TAX REPORT

January to June 2022
Cash Basis

This Tax Report aims to detail the cash outflows carried out by Petrobras with the collection of taxes and government take in the first six months of 2022. The information is based on the cash basis and should be read together with Petrobras' 2021 Tax Report, where the principles of the tax function, compliance aspects and the Company's tax risk management are presented, among other information about our contribution as one of the most significant taxpayers of the Brazilian economy.

In the first semester of 2022, Petrobras paid a total of R\$ 149.3 billion to the public coffers, comprising: R\$ 80.0 billion in taxes related to its operations; R\$44.3 billion in government take and R\$ 25.0 billion in taxes withheld from third parties, since the company has a legal duty to collect it throughout the entire chain, as a tax substitute.

In the Federal sphere, R\$ 50.9 billion were paid in Federal Taxes, which when added to the R\$ 44.3 billion in government take, totalizing R\$ 95.2 billion to the Federal entity. For the states, R\$ 53.5 billion was collected, while for the municipalities, the amounts of R\$ 607 million were collected in the accumulated of the first semester.

Noteworthy is a 94% increase in the amount collected, compared to the same period of the previous year, driven mainly by Income Tax, Government Take, ICMS (VAT), Cofins and CSLL:

Own taxes from Petrobras' Operations

Petrobras plays an important role in ICMS collection, as a taxpayer due to its own operations, as well as a tax substitute for operations carried out by third parties, such as distributors and retailers in fuel operations.

The table below was prepared with values disclosed by the CONFAZ (National Council for Finance Policy) collection bulletin, with adjustments to reflect the collection under the cash basis perspective and shows the percentage of Petrobras' contribution in the total ICMS collected by state.
