

## ***Petrobras launches new gasoline and diesel sales contracts***

Rio de Janeiro, September 10, 2021 – Petróleo Brasileiro S.A. – Petrobras announces that it has approved new contract models for the sale of gasoline A and road and marine diesel to fuel distributors, aiming to simplify some processes, increase competitiveness, and bring flexibility to Petrobras in the adoption of new commercial strategies.

In the current market scenario, characterized by the entry of imported product by third parties and by the divestment process of refining assets, it is necessary to promote improvements in some commercial and operational clauses. These adjustments, defined based on the experience gained over the term of the current contracts and as a result of feedback from customers, seek to strengthen the commercial relationship with our customers and the company's competitiveness.

The new contracts will give more flexibility, making it possible to adjust commercial conditions in accordance with the market, representing an important step for Petrobras' positioning in the new competitive environment. It is important to emphasize that there are no changes in the pricing practices of these products, which follow the alignment of the international markets.

The new contracts will still be submitted for approval by the National Agency of Petroleum, Natural Gas and Biofuels (ANP), following the current regulation.
