

## ***Petrobras informs about gas discovery in Colombia***

**Rio de Janeiro, October 3, 2024** – Petróleo Brasileiro S.A. – Petrobras, following up on the announcements to the market issued on July 29, 2022 and August 5, 2024 on the extension of the gas discoveries in the Uchuva-1 and Uchuva-2 wells, renamed Sirius-1 and Sirius-2, informs that the gas potential in the discoveries located in the Guajira Offshore Basin, in Colombia, is around 6 Tcf (trillion cubic feet) in place (VGIP), confirming the magnitude of the discoveries made in the area and its importance for the Colombian gas market.

Petrobras, through Petrobras International Braspetro B.V. - Colombia, acts as operator (44.44%) in a consortium formed in partnership with Ecopetrol (55.56%). The consortium will continue operations to develop the area, in accordance with planning and contractual forecasts with the National Hydrocarbons Agency (ANH).

The commercial viability of the reserve will require further studies.

Material facts will be disclosed to the market in due course.
