

## ***Petrobras announces test in Colombia***

**Rio de Janeiro, March 10, 2025** – Petróleo Brasileiro S.A. - Petrobras, following up on the releases disclosed on 08/05/2024, 10/03/2024 and 12/05/2024, informs about the Drill Stem Test (DST) in the Sirius-2 well, located in deep waters in Colombia, 31 kilometers off the coasts and at a water depth of 804 meters.

The DST assessed to approximately 100 meters reservoir interval, which demonstrated good productivity. During the test, samples were collected and will be characterized through laboratory analyses. The preliminary result of the test reinforces the volumetric potential for gas in the region.

Petrobras, through its wholly-owned subsidiary Petrobras International Braspetro B.V – Sucursal Colombia (PIB-COL), acts as the operator of the consortium (44,44% share), jointly with Ecopetrol (55,56% share). The consortium will continue to evaluate the results obtained from the drilling of Sirius-1 and Sirius-2 wells, according to planning and contractual obligations with the Agencia Nacional de Hidrocarburos (ANH) from Colombia.

Petrobras' operations in the GUA-OFF-0 Block are in line with the Company's long-term strategy, aimed at replenishing oil and gas reserves through the exploration of new frontiers and acting w, ensuring that global energy demand is met during the energy transition.

Material facts will be promptly disclosed to the market.
