Two strategic lines of growth outside Chile

Replicating our Know-How in Latam

Terpel: High growth potential in the Colombian market

- Colombia's vehicular penetration and highway flows are lower than in Chile
- Low market penetration of convenience stores business
- Copec's efficiency in its gas stations operation

Strong potential in Colgas, Duragas, Solgas:

- Acquisition of a market leader
- Operations to benefit from Abastible's know how

Arauco acquires Panels assets from Masisa in Mexico and Brazil:

- Option to capture regional synergies

Pursuing Selected Opportunities in Developed Economies

Arauco acquires panel's productive facilities in North America:

- Good opportunities in the low part of the cycle
- Significant synergies between facilities
- Access to commercial channels
- Significant upside potential

State of the art productive facility to increase pulp capacity by 31% at a low cash cost

arauco MAPA Project - Pulp

- New 1.56 million ton short fiber line in Arauco Mill, Line 3. Considers the closure of Arauco's 290 th. ton Line 1 of short fiber pulp. Thus, the net increase in production will be 1.27 million tons
- Efficient cash cost and estimated investment of approximately US\$ 2.8 billion
- Includes an electric cogeneration plant based on biomass that will generate a surplus of approximately 132 MW
- Mapa started operations in December 2022
- Sales volumes have increased in the last months, along with a positive response from clients.
- Production continues to increase as expected, without significant problems, reaching approximately 504 thousand tons as of September, of which 84% were prime pulp.
- Full capacity is expected to be achieved in the first quarter of 2024.

Valdivia Project - Dissolving Pulp

- Conversion of the Valdivia mill into swing capacity, providing flexibility to produce either dissolving pulp or paper grade pulp
- The Dissolving Pulp Project was completed in February 2020 with an investment of US\$ 195 million and started producing in June 2020. The laboratory analysis conducted by Arauco have been very successful in terms of assessed quality
- Dissolving pulp is a product used in the textile industry as a substitute for cotton as well as to soften, shine and purify fibers. It can also be used in the cellophane and flexible packaging industries
- Dissolving pulp represent a more friendly alternative than traditional fibers, as cotton, in terms of land and water usage
- Arauco was the first company to produce this kind of pulp in Chile

ALXAR MINERIA Mina Justa – Copper Mining

- Alxar Internacional owns 40% stake of Cumbres Andinas, controller of Marcobre, which owns the Mina Justa project
- Mina Justa started its production stage in March 2021, making the first sales and shipments of copper concentrate and cathodes in July, amid a very positive price scenario.
- In 2023, Mina Justa produced 143.000 tons and in 2022, 125.000 tons.
- In 2023 a dividend of US\$ 134 millions was distributed to Empresas Copec, while in 2022 US\$ 132 millions.
- Favorable operational results and projected copper prices led to an underground expansion Project called “Justa Subterránea” that expects to increase current reserves by more tan 30% and extend the lifespan of the mine by 5 more years.
- Estimated Capex of US\$ 400 millones could transform the projet in the 2nd largest underground mine in Peru.

A SUSTAINABLE MANAGEMENT MODEL IN ACTION

Sustainable forestry management

- Trees represent one of the strongest existing strategies to advance climate change mitigation
- Forestland is managed under Responsible Forest Management practices and is primarily intended to meet the company's own industrial needs
- Production processes are certified to the highest global standards
- 100% of Arauco's forests are FSC and/or PEFC certified
- Entire wood supply comes from non-native forests
- Native forests and high social and environmental value areas are duly protected
- Arauco's Biodiversity and Ecosystem Services Policy emphasizes assessment and management of potential effects of production on biodiversity

Native forests and protection zones, among them the **Oncol** and **Coyanmahuida** natural parks, account for **~30%** of forestland.

A SUSTAINABLE MANAGEMENT MODEL IN ACTION

Arauco is responding to new drivers in pulp

- New uses for pulp are emerging:
 - According to UN, single use plastics represent around 50% of total production of plastics and are facing strong social and regulatory opposition. Material made from pulp is a substitute
 - WEF states that the fashion industry is the second largest consumer of world water supply. Dissolving pulp represents a more friendly alternative than traditional fibers, as cotton, in terms of land and water usage
- The MAPA project is increasing Arauco's wood pulp capacity by nearly 30%
- The Valdivia mill has been converted into dissolving pulp

A SUSTAINABLE MANAGEMENT MODEL IN ACTION

Arauco leads in carbon neutrality

- The Company Arauco was the first forestry company to certify its carbon neutrality and has set the goal of being nature net positive by 2050
- Arauco products replace alternatives with fossil origin, saving 10.5 million tons of CO₂
- Arauco has announced further commitments to reduce CO₂ emissions by 1.5 million tones
- Calculations includes Scope 1 + Scope 2 + Scope 3 carbon emissions, offset by sequestration and capture in products
- Arauco certified, by AENOR, its carbon neutrality in 2022 for the year 2021

A SUSTAINABLE MANAGEMENT MODEL IN ACTION

Wood panels: renewables for construction

- Arauco manufactures a wide variety of sawn timber products, plywood, fiberboard and particleboard, remanufactured wood and moldings, for the furniture and construction industries
- **Solid wood products lock away carbon and replace larger carbon footprint building materials such as steel, concrete and aluminum**
- Wood construction has several advantages that make it the only natural and renewable resource that can be used at a large scale in construction and furniture
- Very good seismic, thermal insulation performance and durability
- Arauco is pioneering a new mindset in standardized construction based on wood, through its affiliate E2E. Its affordability makes it especially attractive for social housing
- Complementarily, Arauco developed HILAM, a new structural laminated wood product designed to promote the transition to sustainable architecture and construction

A SUSTAINABLE MANAGEMENT MODEL IN ACTION

Copec's commitment to mitigate climate change

- The company released its statement on climate change, in which it pledges to:
 - (i) attain carbon neutrality before 2030, considering Scopes 1 and 2.
 - (ii) By 2050, distribute and market a higher proportion of renewable energy than fossil fuels.
 - (iii) By 2034, promote the care and protection of 39 ecosystems distributed from Arica to Punta Arenas, through agreements or public-private or private-private alliances.
 - (iv) become a zero-waste company as of 2029, concerning the operations related to its plants, gas stations and convenience stores
- Terpel has pledge to:
 - By 2025, reduce plastic in store-processed food packaging materials by 95% and by 2030, reduce it by 100%.
 - By 2030, to achieve 50% carbon neutrality and by 2050, to be carbon neutral, considering Scopes 1 and 2.

*Calculations includes Scope 1 + Scope 2 carbon emissions.
