## Report on Review of Quarterly Financial Information - ITR

The Board of Directors and Shareholders of  
**Empreendimentos Pague Menos S.A.**  
Fortaleza- Ceará

### Introduction

We have reviewed the interim, individual and consolidated quarterly financial information of Empreendimentos Pague Menos S.A. ("Company"), contained in the Quarterly Information Form - ITR for the quarter ended September 30, 2024, which comprises the balance sheet on September 30, 2024 and the related statements of income, the comprehensive statements of income for the three and nine months period then ended and the statement of changes in shareholders' equity and statements of cash flows for the nine-months period then ended, in addition to the notes to the financial statements.

Company's Management is responsible for the preparation of the interim financial statements in accordance with CPC 21 (R1) and with IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB as well as for the presentation of this information in a manner consistent with the standards issued by the Brazilian Securities Commission applicable to the preparation of Quarterly Information - ITR. Our responsibility is to express a conclusion on this quarterly financial information based on our review.

### Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily to the persons responsible for financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified by an audit. Accordingly, we do not express an audit opinion.

### Conclusion about the individual and consolidated interim information

Based on our review we are not aware of any facts that lead us to believe the individual and consolidated interim financial information included in the aforesaid quarterly information has not been prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34 applicable to the preparation of Quarterly Information - ITR, presented in a manner consistent with the requirements set forth by the Brazilian Securities Commission - CVM.

**Other matters - Statements of value added**

The interim individual and consolidated statements of value added (SVA) for the nine-month period ended September 30, 2024, prepared under the responsibility of the Company's Management, and presented herein as supplementary information for purposes of the IAS 34, have been subject to review procedures jointly performed with the review of Company's interim financial statements. In order to form our conclusion, we assessed whether those statements are reconciled with the financial statements and accounting records, as applicable, and whether their format and content are in accordance with criteria determined in the Technical Pronouncement 09 (CPC 09) - Statement of Value Added issued by the Committee for Accounting Pronouncements (CPC). Based on our review, nothing has come to our attention that causes us to believe that the statements of value added were not prepared, in all material respects, in accordance with the criteria determined by the aforementioned Technical Pronouncement and are consistent with the overall individual and consolidated financial statements.

### STORE PORTFOLIO

Our store base reached 1,649 units at the end of 3Q24. During the quarter, there were four store closures, two in the Pague Menos portfolio and two in the Extrafarma portfolio, related to the ongoing footprint optimization process. No new stores are planned until the end of the year. In 2025, organic expansion should resume gradually, as the Company remains focused on financial deleveraging.

As part of the Extrafarma integration, we continue to carry out banner conversions, which have proven to be a relevant lever for increasing sales. By the end of 3Q24, 111 Extrafarma stores had been converted to Pague Menos. The Extrafarma brand is currently only present in the states of AP, PA, MA and CE, where we are carrying out tests to potentially increase conversions.

### SALES PERFORMANCE

We continued to record an acceleration in sales growth in 3Q24, maintaining the positive trend observed since the beginning of the year. We achieved 13.9% growth in total sales, which represents the highest growth rate in 7 years (excluding 2Q21, affected<sup>2</sup> by the COVID-19 pandemic). This historical performance is even more robust when we consider the slowdown in inflation and the lower pace of organic expansion in the last quarters.

We attribute a significant part of the acceleration to the initiatives implemented since the beginning of 2024 to optimize store operations, our "operational missions". Improvements in areas such as customer service, processes, maintenance, pricing and IT stability have gradually led to an increase in customer traffic in stores. Additionally, we continue seeing the positive results of the successful integration of Extrafarma, whose operational synergies are increasingly translating into higher sales.

The 13.9% growth in the quarter is broken down into 13.6% same store sales, +1.3% of contribution from new stores and -0.9% from stores closed in the last 12 months. Mature stores recorded growth of 12.7%, approximately 3 times the inflation for the period, thus contributing to significant operational leverage in the results for the quarter.

Broken down by company, same store sales reached 12.6% at Pague Menos and 18.5% at Extrafarma. In this context, it is increasingly evident how banner conversions continue to be an important driver for increasing sales, optimizing our footprint and enhancing the strength of the Pague Menos brand in strategic locations. Converted stores recorded significant growth of 30.4% compared to the same period of the previous year, while other Extrafarma stores grew 13.7%.

In the regional breakdown, we observed a significant growth acceleration across the country, although at different levels. The South and Southeast regions stood out, with 19.3% same store sales, while the Mid-West reached 17.8% and the North and Northeast regions grew 12.2%.

It is worth highlighting that there has been a catch-up over the last few years in regions where we have greater opportunities to improve efficiency. In 3Q21, the 5 states with the lowest productivity had average sales per store 27% below the overall portfolio average. Three years later, the gap between these same states was reduced to less than 5%. The progressive operational convergence between regions makes the national footprint strategy much more effective, thus contributing to an increasingly diversified operation.

<sup>2</sup>The 20.6% growth recorded in 2Q21 was strongly impacted by non-recurring effects related to the COVID-19 pandemic: i) freezing of the annual adjustment of medicines in 2020 from April to June (harming the 2Q20 base); ii) temporary closure of stores due to social isolation health measures; (harming the 2Q20 base) and iii) demand for Covid tests (benefiting sales in 2Q21).

# EARNINGS RELEASE 3Q24

## » OPERATIONAL DATA

Average monthly sales per store reached R\$ 709 thousand in 3Q24, growing 13.9% compared to the same period of the previous year. Considering only Pague Menos, this metric reached R\$ 739 thousand, while Extrafarma totaled R\$ 595 thousand. It is worth highlighting that Extrafarma stores converted to Pague Menos have accelerated the closing of the sales gap. Before the conversions started, these stores operated 32% below the Pague Menos portfolio, compared to 16% in the quarter.

The good sales performance for the quarter is even more evident when broken down into volume and average ticket. We have recorded significant growth of 7.6% in the number issued tickets (even in the context of stability in the store base), coupled with a 5.9% increase in the average ticket, which continues to grow above inflation.

In the same-store concept, the growth in issued tickets was 7.2%, with 6.7% in the Pague Menos portfolio and 9.2% in the Extrafarma portfolio, accounting for a significant acceleration in both brands. Operational initiatives have increasingly resulted in higher customer traffic. These actions include changes in the service model, store renovations, process redesigns, among others, which have contributed to increased customer retention and purchase frequency.

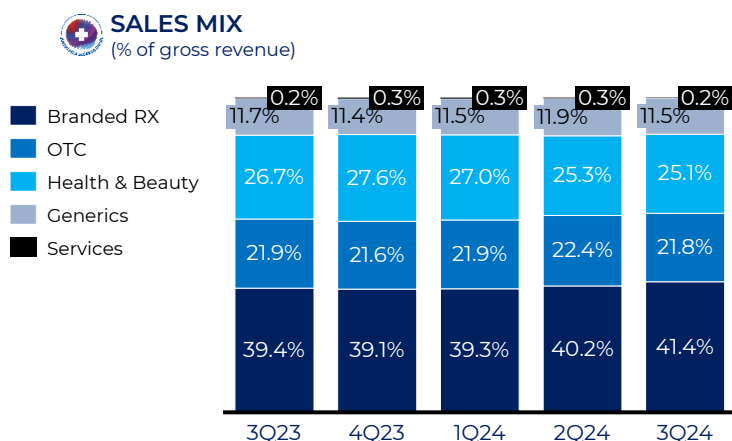

Furthermore, a significant portion of the increase in volume is related to attracting new customers, supported by increasingly assertive marketing and CRM execution, especially in digital channels. The active customer base, with purchases in the last 12 months, reached 21.1 million, a new record. The share of omnichannel customers, who use more than one shopping channel, reached 9.4% of the total, 1.4 p.p. above the same period of the previous year.

The growth in the average ticket is explained by price increases, with weighted inflation of products at 3.8%, in addition to an increase in the customer purchase basket and a positive mix effect.

### CATEGORY MANAGEMENT

In 3Q24, we recorded significant growth in the share of branded prescription drugs in the mix, reaching 41.4% of total sales (+2 p.p. above the same period of the previous year). The category as a whole grew 19.4% in the quarter, driven by the diabetes therapeutic class, which grew by over 30%. The good performance follows a trend observed in the market as a whole, with successful product launches. Even though, it is worth highlighting that we have consistently recorded market share growth in this and most therapeutic classes, indicating our good execution, with increasingly assertiveness in pricing, availability and customer loyalty through Clinic Farma.

We also highlight the good performance in the OTC category, which grew 13.0% in the period. Within the category, vitamin and mineral items, health equipment and convenience items stood out, all growing over 20% compared to the previous year.

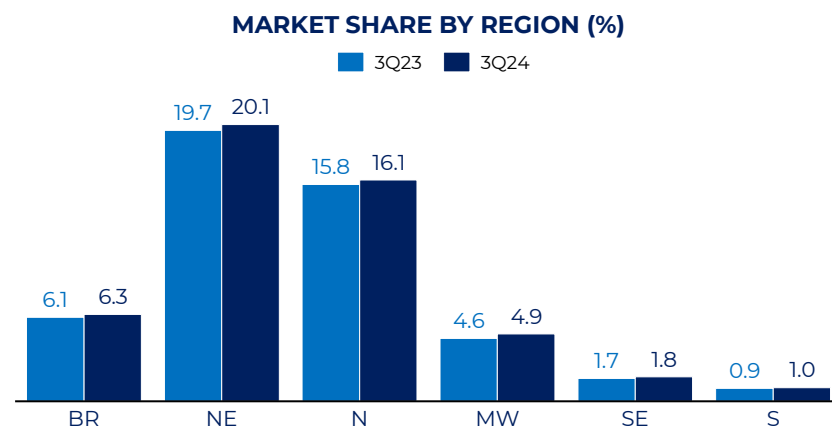

Private labels reached a record of R\$ 227.2 million in sales in 3Q24. Despite this, the share of total sales dropped to 6.5%, 0.5 p.p. below the same period of the previous year. The decrease in share is mainly due to the slowdown in the hygiene and beauty category as a whole, which concentrates a large part of the assortment of private label items. Despite this fact, we remain optimistic about the private label strategy, which has an increasingly diversified portfolio, high and growing margins and a promising pipeline of launches.

### MARKET SHARE

Our share in the Brazilian pharmaceutical retail market reached 6.3% in the quarter, accounting for an increase of 0.2p.p. compared to 3Q23. The good performance is even more evident when we consider the slowdown in our organic expansion, in the context of financial deleveraging, and the growth in average sales per store above that of our competitors.

We expanded our market share in all regions of the country. In the Northeast region, we surpassed the 20% market share threshold (the highest since 2020). We also highlight the good performance in the Mid-West region, where we achieved a 4.9% share, and the Southeast region, where the growth per store was approximately twice the average of our competitors.

### OMNICHANNEL PLATFORM

An important piece of the sales growth engine is the good performance of our omnichannel platform, which continues to develop and gain relevance in our value proposition. In 3Q24, we totaled R\$ 534 million in sales via digital channels, accounting for a growth of 42.9% compared to the same period of the previous year. The share of total sales reached 15.2%, more than 3 p.p. above 3Q23 and more than 1 p.p. above 2Q24.

The main reason for the growth acceleration was the performance of the Pague Menos App, which continues to improve the user experience and gain share in e-commerce. We reached the milestone of 6.8 million downloads, being the third most downloaded pharmacy app in the country, in addition to achieving our best level of user reviews in the app stores. Furthermore, we continue evolving the digital shopping experience, with improvements in check-out, SEO and greater assertiveness in marketing spending. With this, our e-commerce increased its share to 60% of omnichannel sales, consolidating itself as the main channel for digital customers.

The mix of categories in digital channels is contributing to better profitability in omnichannel sales. Key categories such as private label and generics have been increasing their share, while lower margin categories such as diapers have been slowing. Accordingly, the channel's contribution margin improved 1.5 p.p. compared to the same period of the previous year.

### HEALTH HUB

In 3Q24, we had 1.9 million consultations at Clinic Farma, reaching the mark of 7 million consultations carried out in the last 12 months. Our primary healthcare unit is progressively gaining scale and becoming increasingly relevant in customer relationships.

We have observed a gradual transformation in the Brazilian healthcare ecosystem, with pharmacies gaining increasing relevance in the patient care journey, through the provision of primary care services, clinical analysis exams and vaccinations in stores. In this context, our leading role becomes clear when we consider a recent survey by Clinicarx, the largest healthcare service platform for pharmaceutical retail, where Pague Menos has the largest volume of services in the market, with a productivity of services performed per store 4.5 times higher than the second-place in the ranking, among chains with over 100 stores.

Recognizing the central importance of the pharmaceutical professional in our Health Hub engine, we started a robust training program in the quarter in partnership with Hospital Sírio-Libanês for the Company's over 5,000 pharmacists. Throughout July, said professionals were trained, on relevant topics such as patient care, new technologies in the healthcare industry and the transition to the concept of Pharmacy 4.0, with a more automated and data-based management model.

### GROSS REVENUE

In 3Q24, consolidated gross revenue reached R\$ 3.511 billion, growing 13.9% compared to the same period of the previous year. For further information on quarterly growth, see the “Sales Performance” section of this release.

### GROSS PROFIT

The consolidated gross profit reached R\$ 1.032 billion in 2Q24, accounting for a 14.2% growth compared to the same period of the previous year. As a result, the gross margin reached 29.4%, up 0.1 p.p. over 3Q23.

The following drivers had a positive impact on gross margin in the quarter: i) the inventories loss ratio, with a higher compensation level from the industry and normalization of Extrafarma's legacy inventory; ii) improvement of commercial conditions; and iii) margin improvement in digital channels. These positive effects were partially offset by: i) negative mix effect, with an increase in the share of branded drugs and a reduction in generics and private label; and ii) adjustment to present value (APV).

Segregating the gross margin by company, we recorded 29.0% in Pague Menos and 30.9% in Extrafarma. The margin gap between companies, of approximately 2 p.p., remained stable since 2Q23, when most of the margin synergies had already been implemented, and reflects the geographic mix (with Extrafarma's presence in states where we operate with higher margins) and the product mix (with Extrafarma operating with a lower share of branded drugs).

### SELLING EXPENSES

Selling expenses totaled R\$ 756.7 million, growing 10.0% compared to the same period of the previous year. The good sales performance generated strong operational leverage for the quarter, causing this group of expenses to reach 21.5% of revenue, 0.8 p.p. below the same period of the previous year.

The nominal growth in expenses, compared to the previous year, is mainly related to inflation and the sales effect on variable expenses (freight, means of payment, variable rents etc.). Moreover, there was a mismatch in marketing expenses, which in 2023 were more concentrated in the first months of the year, and specific expenses related to “operational missions”, increasing maintenance and training expenses. As a positive effect, we highlight the control of occupancy expenses and the stability in rental inflation.

### CONTRIBUTION MARGIN

Reflecting the good gross margin performance and dilution of selling expenses, the contribution margin in the quarter reached 7.8%, accounting for a strong growth of 0.8 p.p. compared to the same period of the previous year.

In the breakdown by company, the contribution margin reached 8.0% in Pague Menos and 7.2% in Extrafarma. The current gap, of only 0.8 p.p., compares with 4.0 p.p. recorded at the beginning of the integration, indicating a clear operational convergence and a successful integration plan. It is worth highlighting that, even operating with average sales per store well below the Pague Menos portfolio, Extrafarma has managed to deliver similar profitability due to its higher gross margin.

### GENERAL AND ADMINISTRATIVE (G&A) EXPENSES

G&A expenses totaled R\$ 84.9 million in 3Q24, down 6.3% compared to 2Q24. Coupled with strong sales performance, our financial discipline generated significant dilution in this expense group, which dropped from 2.7% of gross revenue in 2Q24 to 2.4% in 3Q24.

The G&A reduction, compared to 2Q24, is mainly related to savings in personnel expenses. In the previous quarter, this group of expenses had been subject to specific pressure due to changes in administrative teams, restructuring of the executive board and the closure of the corporate office in São Paulo.

In comparison with 3Q23, the 17.9% growth is related to the reinforcement of the executive team and greater focus on IT expenses, in addition to the accumulated inflation for the period.

### ADJUSTED EBITDA

Adjusted EBITDA for 3Q24 totaled R\$190.7 million, growing 32.6% compared to the same period of the previous year. Thus, we achieved an EBITDA margin of 5.4%, a historic record of profitability for a third quarter of the year.

The strong result highlights the Company's good momentum, the result of the successful integration with Extrafarma and the operational excellence initiatives prioritized since the beginning of the year.

### EXTRAFARMA INTEGRATION AND CAPTURE OF SYNERGIES

The annualized volume of synergies captured in the integration with Extrafarma reached R\$ 234 million in 3Q24, equivalent to 90% of the top of the projected range (R\$ 260 million). The improvement compared to 2Q24, reflects the acceleration in sales growth and the continued footprint optimization.

Of the R\$ 234 million, R\$ 201 million positively impacted Extrafarma's results, reflecting the significant improvement in its average sales per store (from R\$ 468 thousand in 3Q22 to R\$ 595 thousand in 3Q24) and contribution margin (from 3.2% in 3Q22 to 7.2% in 3Q24), in addition to savings in general and administrative expenses. Moreover, we recognized further R\$ 33 million in synergies at Pague Menos, generated mainly by logistics and tax efficiencies.

### DEPRECIATION, FINANCIAL RESULTS AND INCOME TAX / SOCIAL CONTRIBUTION

Depreciation in 3Q24 totaled R\$ 47.9 million, remaining at a similar level to previous periods. This behavior reflects the stability in the store base and the slowdown in the volume of investments in the context of the Company's financial deleveraging cycle.

The financial result continues trending down, reflecting efforts towards financial deleveraging and improvement in the debt profile. Net financial expenses totaled R\$ 82.7 million, accounting for a sharp reduction of 31.4% compared to the same period of the previous year, mainly reflecting the reduction in interest rates, lower spreads and lower expenses with prepayment of receivables. Compared to 2Q24, there was a decrease of 4.7%, mainly explained by a lower adjustment to present value (APV).

Income tax totaled R\$ 6.2 million in 3Q24, in line with the growth in realized taxable income. State tax subventions accounted for 1.0% of gross revenue in the quarter, positively impacting the result for the quarter by R\$11.8 million.

## ADJUSTED NET INCOME

Adjusted net income reached R\$ 53.9 million in 3Q24, reversing the loss of R\$ 0.4 million recorded in the same period of the previous year. The net margin reached 1.5% of gross revenue, which represents an strong increase of 1.5 p.p. compared to 3Q23.

We highlight that the break down of growth in net income was well balanced between sales growth, increased margins and reduced financial expenses, highlighting the good performance in the quarter. We remain very optimistic about the evolution of our bottom line, as we continue the path of financial deleveraging together with consistent operational improvements.

## ADJUSTED INCOME RECONCILIATION

For a better understanding and comparability with previous periods, the results for the year were adjusted in order to exclude non-recurring events. We present below the details of the adjustments made, as well as their respective impacts on earnings. The complete reconciliation of the accounting and adjusted result is presented in Appendix 3 of this release

## CASH CYCLE

Our working capital management continues to evolve on a positive path, directly contributing to financial deleveraging. In 3Q24, the operating cash cycle reached 51 days, a reduction of 9 days compared to the same period of the previous year.

The positive evolution continues to be mainly driven by the reduction in the average inventory term, which reached 103 days in 3Q24. Compared with 2Q24, the 1-day increase reflects seasonality for the period, with the turnover of inventories acquired prior to the annual drugs price increase. On the other hand, the average payment term increased by 5 days in the annual comparison, reflecting better commercial negotiations and a greater mix of branded medicine sales. It is worth highlighting that the difference between inventories and suppliers' terms reached 32 days, the best level since 2020, highlighting our operational evolution and the synergies captured in the integration with Extrafarma.

The average receivables term was reduced by 2 days compared to 2Q24, due to a specific increase in the discounted receivables, increasing our liquidity to cover the payment of the last installment of the acquisition of Extrafarma in August. Since then, accounts receivable have been restored and are expected to maintain this trajectory in 4Q24.

<sup>3</sup> The calculation of the Average Inventory Period and the Average Payment Period disregards the effects of the APV, commercial agreements and recoverable taxes.

### INDEBTEDNESS

Net debt totaled R\$ 1.286 billion in 3Q24, reducing R\$ 74.9 million compared to the previous quarter. The net debt/EBITDA ratio reached 2.2x, accumulating a decrease of 0.2x in the last 12 months, and 0.9x since the peak in 2Q23. We continue with the projection of ending the year with the ratio below 2.0x EBITDA.

The financial deleveraging path becomes even more evident when we consider the recovery of accounts receivable and installments paid for the acquisition of Extrafarma, which consumed a significant portion of cash generation in recent quarters. Considering the discounted receivables and installments payable on the acquisition, our financial leverage reduced from 3.8x in 3Q23 to 2.8x in 3Q24.

### INVESTMENTS

We totaled R\$ 63.6 million in investments in the year to date, accounting for a decrease of 19% compared to the same period of the previous year.

It is worth highlighting that more than half of the Capex for the year was directed towards store renovations, which include brand conversions into Extrafarma stores. Thus, we promoted a significant revitalization of the store network, which has contributed to the good performance of same-store sales.

### CASH FLOW

Free cash flow in 3Q24 totaled R\$ 130.0 million, accounting for an increase of R\$ 162.1 million compared to the same period of the previous year. The good performance is even more evident when we consider the disbursement of the last installment of the acquisition of Extrafarma for the quarter, which consumed R\$ 221.5 million of cash. Excluding this effect, our operating cash generation was over R\$ 350 million in 3Q24.

The good cash generation for the quarter is related to EBITDA growth, greater conversion of EBITDA into cash, greater monetization of tax credits and an increase in the supplier balance.

## 2. STATEMENT OF CONFORMITY AND BASIS OF PREPARATION OF QUARTERLY INFORMATION

### 2.1 Statement of conformity

The individual and consolidated quarterly information presented for the period ended September 30, 2024 was prepared in accordance with CPC 21 (R1) – Interim Financial Reporting, issued by the Accounting Pronouncement Committee (CPC), and in accordance with IAS 34 – Interim Financial Reporting issued by the International Accounting Standards Board (“IASB”), presented in a manner consistent with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of the Quarterly Information and were authorized by the Company’s Board of Directors on November 04, 2024.

The quarterly information was prepared to update users on material information presented in the period and should be analyzed in conjunction with the complete financial statements for the year ended December 31, 2023. In preparing this quarterly information, we adopted all the standards, reviews of standards, and interpretations issued by the CPC, the IASB, and regulatory bodies that were in force until September 30, 2024.

### 2.2 Materiality statement

We applied Technical Guideline OCPC 7 (R1) - Evidence in the Disclosure of Accounting and Financial Reports for General Purposes and CVM Resolution 727/2014, meeting the minimum requirements and, at the same time, disclosing only relevant information that helps readers make decisions. Therefore, all relevant information used in the management of the business is evidenced in this quarterly information.

### 2.3 Basis of measurement

The basis of value for the measurements in this document is historical cost, except for the measurement of derivative financial instruments (swaps), which are measured at their fair values.

### 2.4 Functional and presentation currency

We present the interim quarterly information in reais, the Company’s functional currency, with balances rounded to the nearest thousand, unless otherwise indicated.

### 2.5 Critical accounting judgment, estimates and assumptions

As the preparation of quarterly information requires Management to make assumptions and estimates related to the probability of future events, which affect the balances of assets and liabilities and other transactions, the actual results may differ from estimates.

Critical accounting estimates, which are essential to produce the best possible information on the results and financial position, even with the subjectivity, complexity and lack of precision, they have a significant impact on:

- Estimated credit losses (Note 4)
- Estimated inventory losses (Note 5)
- Discount rate applied to present value adjustments (Note 4, Note 13)
- Realization of income tax and social contribution (Note 7)
- Impairment assessment of the brand, whose useful life term is indefinite (Note 11)
- Provision for tax, civil and labor risks (Note 17)

## 2.6 Material accounting policies

The significant accounting policies adopted in the preparation of the individual and consolidated interim quarterly information are consistent with those adopted and disclosed under the Notes to the financial statements for the year ended December 31, 2023, which were disclosed as at March 4, 2024 and should be read together with this statement. No new standards, amendments, or interpretations were issued until September 30, 2024.

## 2.7 Consolidation basis

The consolidated interim financial information comprises the financial information of the Company and its subsidiary as of September 30, 2024. Investments are accounted for under the equity method.

|   | Country | Ownership interest (%) |        |
|---|---------|------------------------|--------|
|   |         | 2024                   | 2023   |
| <b>Direct subsidiary:</b>   |         |                        |        |
| Imifarma Produtos Farmacêuticos e Cosméticos S.A.<br>("Extrafarma") | Brazil  | 99.07%                 | 99.07% |

The accounting practices adopted by the subsidiary were applied in a uniform and consistent manner with those adopted by the Company. When applicable, all transactions, balances, revenues and expenses between the subsidiary and the Company are fully eliminated in consolidated quarterly information.

## 4. ACCOUNTS RECEIVABLE

### 4.1 Accounting policy

Accounts receivable are recognized at the original sale price less credit card management fees, when applicable. When the Company identifies probable evidence that the amounts will not be received, an expected loss is recognized. Expected losses are recognized based on the difference between the book value and the recoverable value of the accounts receivable.

Forward sales were adjusted to present value, based on the weighted average cost of capital of 12.22% p.a. (10.18% in 2023). The adjustment to present value is offset against net sales revenue and its realization is recorded in the financial result when the term expires.

## 5. INVENTORIES

### 5.1 Accounting policy

Inventories are presented at the lower value between the cost and net realizable value. Inventories are valued using the weighted average cost method. The net realizable value is the sales price estimated for the normal course of business, less the expenses required for sale. Inventory balances are shown net of expected losses.

(i) Credit arising from the normal ICMS calculation regime and balances relating to reimbursement of non-final ICMS ST, where the presumed tax bases were higher than the actual ones. The amounts are administratively offset after meeting the requirements defined by each State.

(ii) The balance refers mainly to the amounts relating to the exclusion of ICMS from the PIS and COFINS

calculation basis. The credits were authorized by the Brazilian Federal Revenue Service and are in the process of administrative offsetting. Furthermore, the Company recognizes credits arising from the non-cumulative-e regime arising from the acquisition of goods, acquisition of services and inputs considered relevant and essential to the trade of products and provision of services.

## 7. DEFERRED TAXES

### 7.1 Accounting policy

Deferred income tax and social contribution were calculated based on the rates in force, which are 25% and 9%, respectively. The amounts are recognized based on the expectation of future taxable profits, supported by internal projections based on assumptions and future economic scenarios. Results may differ from estimates if projected conditions are not confirmed. The book value of deferred taxes is reviewed at each balance sheet date and adjusted if the expectation of their realization changes. Deferred taxes are recognized in the statement of income according to the origin of the transaction.

(i) The residual values of transfers refer to reclassifications between intangible assets and property, plant and equipment.

(ii) Refers to the adjustment of added value identified in assets acquired in a business combination, proportional to the percentage of equity interest of the parent company, corresponding to 99.07%.

#### 10.4 Provision for closing of store

The Company recognized a provision for closing stores of R\$ 2,955 (R\$ 2,821 as of December 31, 2023) in the parent company, and of R\$ 3,486 (R\$ 7,184 as of December 31, 2023) in the consolidated, whose analysis considers the individual results of the stores and expected recovery of investments. Stores that do not have sufficient results to recover the investment are subject to the recognition of a provision for closing their operations.

- (i) Balance related to the cost of acquisition of trademarks. As it is an intangible asset with an indefinite useful life, the Company assesses the asset's recoverability annually. Estimates indicate that the recoverable value of the asset is greater than its book value and no loss is expected. In the consolidated, it contains the brand identified in the business combination with Extrafarma acquired for R\$ 80,594.
- (ii) The amortization of goodwill is calculated over the term of each store rental agreement, which varies between 5 and 30 years, arriving at an average rate of amortization of 8.9% p.a.

## 12. RIGHT-OF-USE

The CPC 06 (R2)/IFRS 16 standard requires that for all lease agreements within the scope of the standard - except those falling within the exemptions - lessees recognize the liabilities assumed against the respective right-of-use assets.

### 12.1 Accounting policy

We opted to use the practical expedient for transition and not consider the initial costs in the measurement of the right-of-use asset, which corresponds to the initial value of the lease liability plus the initial direct costs incurred, maintaining the value of the initial lease liability. Depreciation is calculated under the straight-line method according to the remaining term of contracts.

- i) Suppliers' balances are adjusted to present value considering an average payment period of between 69 and 74 days (81 and 92 days on December 31, 2023) and an average funding rate of 12.22% p.a. (10.18% p.a. on December 31, 2023). The balancing entry of the adjustment to present value is the inventories account, and is recognized in the statement of income in the cost of goods sold account upon sale. The recomposition of the balance of liabilities related to interest over time is recognized as financial expenses.

## 14. LOANS, FINANCING, DEBENTURES AND DERIVATIVES

### 14.1 Accounting policy

We recognize at fair value upon receipt and then measure at amortized cost as provided for in the agreement (plus charges, interest calculated at the effective rate, inflation adjustments, exchange-rate changes and amortization incurred up to the balance sheet dates).

The loan balance is measured at fair value, reflecting current market expectations of future values, using the discounted cash flow valuation technique (conversion of future cash flows into a single value).

## 14.7 Covenants

The financial ratios and limits are verified quarterly based on the Company's quarterly information until full payment of the amounts owed. As of September 30, 2024, these ratios were within the contractually defined limits.

## 15. LEASE LIABILITIES

### 15.1 Accounting policy

Of the contracts covered by CPC 06 (R2)/IFRS 16, only the fixed minimum rent is considered a lease component to assess liability. The measurement of the lease liability corresponds to the total future payments of fixed rents (gross of taxes), discounted at an incremental interest rate. The nominal discount rate corresponds to the average borrowing rates.

### 15.6 Potential PIS and COFINS credit

The Company has the right to PIS and COFINS credits in rental contracts recorded in accordance with NBC TG 06 (R3)/CPC 06 upon their payment. The potential of these tax credits is presented below. Some real estate rental lease agreements do not generate the right to PIS and COFINS credits, as they are signed with individual lessors. Therefore, this credit is now allowed by tax legislation.

### 15.7 Flows considering inflation and nominal rates

In accordance with CVM/SNC/SEP Circular Letter No. 02/2019, the Company adopted the requirements of NBC TG 06 (R2)/CPC 06 in the measurement and remeasurement of its right-of-use, and started using the discounted cash flow technique, not considering the inflation. Aiming to safeguard the reliable representation of the information in face of the requirements of NBC TG 06 (R2)/CPC 06 and to meet the guidelines of the Brazilian Securities and Exchange Commission (CVM) technical areas, the balances of liabilities are provided without inflation (actual flow x nominal rate), and the estimate of inflated balances are provided in comparison periods (nominal flow x nominal rate).

| Contingent liabilities in business combination | 36,364         | 57,217     | 36,364       | 57,217     |

Provision for civil lawsuits is formed by lawsuits with individual amounts that are pulverized and arise mainly from moral and/or material damages that occurred in two situations: consumer relations and the occurrence of robberies inside our stores.

Provision for labor claims is formed by lawsuits whose individual amounts are also pulverized and basically refer to severance payments, related to overtime or salary differences and which may impact adjustments in other amounts, such as vacation pay, FGTS and prior notice.

The provision for tax claims is principally related to accounting discussions and the respective calculation of ICMS tax replacement related to operations carried out in the state of Ceará.

Contingent liabilities in business combinations correspond to the fair value adjustment of Extrafarma's contingent liabilities on the date of the business combination. As these are contingent liabilities prior to the acquisition of the Subsidiary, the contract provides that any disbursements will be indemnified by the seller, so that the Company has an indemnifiable asset recorded in the same amount as the balance of the provision for contingent liabilities in a business combination.

#### 17.4 Contingent liabilities – Risk of possible loss

On September 30, 2024, the Company was party to lawsuits classified by its legal advisors, with a possible risk of loss totaling R\$ 448,472 (R\$ 440,622 on December 31, 2023) by the Parent Company and in the Consolidated in the amount of R\$ 651,850 (R\$ 550,534 on December 31, 2023), of which R\$ 36,424 are contingent liabilities assumed in a business combination.

The nature and estimate are shown below:

|                | Parent Company |                | Consolidated   |                |
|----------------|----------------|----------------|----------------|----------------|

| <b>Total</b>   | <b>448,472</b> | <b>440,622</b> | <b>651,850</b> | <b>550,534</b> |

Tax: These refer to notifications, mostly tax related, of debit entries which in the opinion of the Company and its legal advisors, are devoid of factual basis, therefore having strong possibilities of annulment, among which we describe the principal cases:

i) Annulment suit of ICMS debits (parent company)

Action for annulment seeking the cancellation of the tax assessment notice totaling R\$ 101,398 on September 30, 2024 (R\$ 99,512 on December 31, 2023), which was drawn up to demand amounts of ICMS resulting from the accounting of credits in amounts higher than those highlighted in the invoices of products purchased, intended for sale, which, according to the auditors, would have (in the opinion of the tax authorities) caused an omission of payment of ICMS in the period from March 2014 to December 2018.

ii) PIS and COFINS credits on inputs (parent company)

Notice of infraction served in December 2020 totaling R\$ 56,799 on September 30, 2024 (R\$ 144,138 on December 31, 2023), requiring amounts due for PIS and COFINS arising from tax credits recorded in the period from December 2015 to December 2016, related to expenses with goods and services used as inputs for consumption (examples: cleaning services, card administration fees, freight, among others), in which the Federal Revenue Service, based on the restrictive interpretation of art. 3, item II, of Laws 10.637/02 and 10.833/03 and due to the fact that the Company's activity is retail trade, does not understand this to be possible.

Labor: These refer to claims arising from severance pay that, in the Company's opinion, were fully settled at the time of termination, thus generating confidence in their inadmissibility.

Administrative: These refer to notifications originating in procedures adopted at the branches, which are, in the majority of cases, mere misunderstandings in the interpretation of the rule.

Civil: These refer to moral and/or material damages, in the opinion of the plaintiff, suffered inside our stores. As the Company's policy is of service to and total respect for the consuming public, it is understood that the interpretation is unfounded.

### 17.5 Judicial deposits

## 19. LONG-TERM INCENTIVE WITH RESTRICTED SHARES

The Long-Term Incentive Plan with Restricted Shares ("Restricted Shares Plan") of the Company was approved at an Extraordinary General Meeting held on April 25, 2023 with the objective of the granting of restricted shares to participants selected by the Board of Directors, with a view to: (i) attract and retain Company's high-level directors, managers and employees; (ii) grant the participants the opportunity to become shareholders of the Company, obtaining, as a result, a greater alignment of their interests with the interests of the Company; and (iii) develop the Company's corporate purposes and the shareholders' interests. During the term of the Restricted Share Plan, shares representing up to 1.5% of the Company's capital may be delivered to the participants. The balance of Restricted Stock Plan on September 30, 2024 is R\$ 12,749 (R\$ 7,989, on December 31, 2023).

On June 02, 2023, the Board of Directors approved, within the scope of the Restricted Shares Plan, the following Share Grant Programs:

- i. Restricted stock option plans ("Regular Program"): the Participant will be entitled to receive, in accordance with the terms and conditions provided for in the Grant Agreement, a total target amount corresponding to his/her gross monthly salary multiplied by the multiple of salaries applicable to his/her respective position, which will be settled in cash and/or Restricted Shares, conditioned on the Participant's continued presence as an administrator or employee of the Company throughout the Program effectiveness;
- ii. Performance Shares Program: the Participant will be entitled to receive, in accordance with the terms and conditions provided for in the Grant Agreement, a total target amount corresponding to his/her gross monthly salary multiplied by the multiple of salaries applicable to his/her respective position, which will be settled in cash and/or Restricted Shares, conditioned on the Company achieving the performance targets established according to the metrics provided for in the Program;
- iii. Matching Shares Program: the Participant will be entitled to receive a matching value corresponding to the portion of his/her net annual bonus used in the acquisition of common shares issued by the Company, which will be settled in Restricted Shares, subject to the terms and conditions provided for in the Program.

The Board of Directors is responsible for selecting the Directors, independent Board of Directors members, managers and high-level employees of the Company, in whose behalf the Company grants one or more common, registered, book-entry shares without par value, issued by the Company and subject to the restrictions provided for in the Restricted Share Plan, program and/or in the respective grant agreement.

## 25.2 Fair value hierarchy

The following table presents the financial instruments whose values were recorded at fair value and their respective hierarchies.

Different levels were defined as follows:

Level 1 - Prices quoted in active markets for identical assets and liabilities;  
Level 2- Inputs, except for quoted prices, included in Level 1 which are observable for assets or liabilities, directly (prices) or indirectly (derived from prices);

Level 3 - Assumptions, for assets or liabilities, which are not based on observable market data (non-observable inputs).

### 25.3 Measurement of fair value

Valuation techniques used in the measurement of Level 2 and 3 fair values, as well as significant non-observable inputs used are detailed below:

*Derivative financial instruments measured at fair value through profit or loss*

To hedge its obligations indexed to the US dollar against exchange rate fluctuations, swap operations were carried out to convert debts indexed to the USD into CDI.

The fair value of these liabilities is based on the discount of estimated future cash flows based on the conditions and maturity of each contract and using the exchange rate plus a spread, which is obtained by means of quotes with financial institutions, reflecting any change in the Company's risk scenario during the discounted period.

The gains and losses of these contracts are directly related to exchange rate fluctuations (euro in 2023 and dollar in 2022) and the CDI, being recorded in the results for the period, in the "revenues and expenses with derivative financial instruments".

## 25.4 FINANCIAL RISK FRAMEWORK AND MANAGEMENT

### 25.5 Credit risk

Credit risk is the risk of the Company incurring losses on clients or counterparties in a financial instrument, resulting from failure in complying with contract obligations.

The Company is exposed to credit risk for cash and cash equivalents, accounts receivable with credit card administrators and derivative instruments.

*Cash and cash equivalents, interest earning bank deposits, and derivative instruments.*

The Company has balances receivable from financial institutions related to cash and cash equivalents and interest earning bank deposits totaling R\$ 119,663 and R\$ 171,272, parent company and consolidated, respectively (R\$ 390,475 and R\$ 444,085 on December 31, 2023). Credit risk with financial institutions is administered by the Company's Treasury department in accordance with the policy established. These funds are scattered in certain financial institutions to minimize risk concentration and, therefore, mitigate financial losses in case of possible default of a counterparty.

*Accounts receivable from credit card companies*

For accounts receivable balances, credit risk is mitigated by the fact that a large portion of the Company's sales is made using the credit card as the payment method, which is substantially guaranteed by the credit card companies. The balance receivable from clients is diversified, with no individual material amounts.

Considering possible risk arising from transfer from credit card companies, this is controlled through a rigorous daily process of reconciliation between billings and receipts.

The balances of debit and credit cards companies' receivable by maturity age are shown as follows:

|                            | Parent Company |                | Consolidated   |                |

There are no overdue balances held with credit card companies.

## 25.6 Liquidity risk

Liquidity risk is the risk of the Company encountering difficulties in performing the obligations associated with its financial liabilities that are settled with cash payments or with another financial asset. The Company's approach in liquidity management is to guarantee that it always has sufficient liquidity to perform its obligations upon maturity, under normal and stress conditions, without causing unacceptable losses or jeopardizing the Company's reputation.

The Company monitors its cash flow through periodic stress tests, which allows, in addition to the fulfillment of financial obligations, the realization of short-term operations in the financial market to monetize any cash surpluses.

Contractual maturities of the main financial instruments - assets and liabilities are shown below:

### 25.7 Market risk

It is the risk that alterations in market prices, such as exchange rates and interest rates and prices of goods, have an impact in the Company's earnings, or in the value of its holdings of financial instruments.

Management understands that, in the context of the Company, all market risks mentioned above are mitigated and refer mainly to fluctuations in interest and exchange rates.

### 25.8 Interest rate risk

The Company seeks to diversify borrowings in terms of fixed or floating-rates, and under certain circumstances contract derivative financial instrument operations to hedge the financial cost of the operations.

The changes in the interest rates affect both financial assets and liabilities of the Company. We show below the impacts of such changes on the profitability of financial investments and on the indebtedness in Company's domestic currency, indexed to the CDI. The sensitivity of the Company's financial assets and liabilities was shown in two scenarios besides the probable one.

We present a scenario with the nominal rates verified on September 30, 2024 (book balance based on the 10.65% p.a. closing CDI rate) and the probable scenario considered by Management, which corresponds to the forecast of the CDI curve considering as a base the closing on September 30, 2024, according to the BM&F Bovespa interest curve for CDI (between September 2024 and February 2030) and two other scenarios with a 25% increase (Scenario I) and a 50% increase (Scenario II) in these indexes.

#### Additional sensitivity analysis

The Company's financial instruments consist of cash and cash equivalents, interest earning bank deposits, accounts receivable, suppliers, loans and financing, debentures and leases and are recorded at the cost, plus any earnings or charges incurred, which as of September 30, 2024 and December 31, 2023 are close to market value. Risks related to the Company's operations are linked to CDI (Interbank Deposit

Certificate) change.

With respect to loans and financing and debentures, they refer to operations whose registered value is close to the market value of these financial instruments. The investments with CDI are recorded at market value, according to quotations announced by the respective financial institutions and the others mainly refer to bank deposit certificates, repurchase and resale agreements and investment funds. Therefore, the recorded value of these securities does not differ from the market value.

In order to check the sensitivity of the index to which the Company was exposed to at September 30, 2024, we defined the following three scenarios. The likely scenario considers the current interest rate curve projected by the Central Bank. From this, changes of 25% (Scenario II) and 50% (Scenario III) were calculated, sensitizing the rise and fall of the indexes. For each scenario, the net position (financial revenues minus financial expenses) was calculated, not considering any tax effect. The base date used in the portfolio was September 30, 2024, with a one-year projection and checking the sensitivity of the CDI index in each scenario.

## 25.9 Foreign exchange risk

The Company has a policy of contracting derivative financial instruments to protect financial operations carried out in foreign currency amounting to EUR 9,000 and USD 27,747. Such transactions are carried out with the same counterparts that granted the original credit operations and at the same notional value to avoid any mismatch in positions. As of September 30, 2024, the amount of derivative financial instruments was R\$ 9,058.

To measure the estimated impact on results due to risks from currency fluctuations, a sensitivity analysis of the Company's exposure to the foreign currency loan exchange rate risk was prepared considering the three scenarios below. The probable scenario considers the closing euro rate and scenarios I and II consider an increase of 25% and 50%, respectively, in the closing exchange rate.

As set forth in Item 3 of our Reference Form, the Company discloses projections for the following business variables:

- i) Total number of stores to be opened throughout the calendar year, considering only gross openings, not taking into account any store closures. Therefore, the net increase in stores may differ from the sum between the initial stores and the gross openings in the period;
- ii) Capture of operational synergies resulting from the acquisition of Imifarma Produtos Farmacêuticos e Cosméticos S.A, ("Extrafarma"), measured by the increase in the Company's Consolidated EBITDA generated by these synergies, on an annual recurring basis;
- iii) The Company's net debt ratio, measured by the ratio between consolidated net debt and consolidated EBITDA, adjusted for non-recurring effects, accumulated in twelve (12) months, disregarding the effects of accounting standard IFRS16 (ex-IFRS16).

We present below the comments on the behavior of the projections for the period ended September 30, 2024.

## I) OPENING OF STORES

Our store base reached 1,649 units at the end of 3Q24. Throughout the quarter, four store closures were carried out, two in the Pague Menos portfolio and two in the Extrafarma portfolio, related to the continuous process of footprint optimization. With the openings carried out in the first half of the year, we concluded the projection of 30 openings in the year.

| Year | Previous Projection | Current Projection | Actual Openings              |
|------|---------------------|--------------------|------------------------------|
| 2021 | -                   | 80 openings        | 80 openings                  |
| 2022 | -                   | 120 openings       | 118 openings                 |
| 2023 | 60 openings         | 20 openings        | 20 openings                  |
| 2024 | 120 openings        | 30 openings        | 30 openings until 09/30/2024 |

## II) CAPTURE OF EXTRAFARMA SYNERGIES

The annualized volume of synergies captured in the integration with Extrafarma reached R\$234 million in 3Q24, representing 90% of the top of the projected range (R\$260 million). This result was achieved mainly due to the acceleration in sales growth and progress in footprint optimization.

Of the R\$ 234 million, R\$ 201 million had a positive impact on Extrafarma's results, reflected in the large evolution of average sales per store, from R\$ 468 thousand in 3Q22 to R\$ 595 thousand in 3Q24, and in the contribution margin, advancing from 3,2% in 3Q22 to 7,2% in 3Q24, in addition to savings in general and administrative expenses. We also captured R\$ 33 million in the result of Pague Menos, generated mainly by logistical and tax efficiencies.

| Year             | Previous Projection   | Current Projection  |
|------------------|---|---|
| Until 31/12/2024 | Between R\$ 180 million and R\$ 275 million incremental EBITDA on an annual basis | Between R\$ 195 million and R\$ 260 million incremental EBITDA on an annual basis |

(R\$ million)

### III) NET DEBT RATIO

Net debt totaled R\$1,286 billion in 3Q24, down R\$74.9 million from the previous quarter. The net debt/EBITDA ratio reached 2.2x, accumulating a decrease of 0.2x in the last 12 months, and 0.9x since the peak in 2Q23. We continue with the projection of ending the year with the ratio below 2.0x EBITDA.
