# RI TRANSPARENCY REPORT

## 2020

Itaú Asset Management

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**SG 01.4**

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

IAM's SRI/ESG policy focuses on mainstream investment and ownership activities. Our belief is that ESG criteria can impact financial performance by presenting new risks and opportunities, which must be considered for an informed investment decision. IAM has in place a proprietary methodology to integrate Environmental, Social and Governance issues into its investment processes.

Our approach to Responsible Investment helps us achieve our fiduciary duties, creating value for our customers by providing better risk adjusted returns.

The ESG Integration Method of Itaú Asset Management incorporates these variables into our fundamental valuation models, by analyzing ESG impacts on cash flow.

The objective is to adjust individual target stock prices and to anticipate events that result in value creation or destruction. This approach provides flexibility to our portfolio managers, who use the ESG valuation inputs to varying degrees, according to their specific strategies and mandates. The method does not use negative screening to exclude sectors or companies and so reduce the investment universe. Nevertheless, such exclusions may be added as an additional filter for clients with exclusive funds or managed portfolios.

Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

Climate change risks and opportunities are part of a formal dimension in Itau Asset Management ESG integration model. Physical impacts, dissemination of diseases, changes in water cycle, carbon pricing, changes in agroforestry yields and the development of new products by investee companies are the value drivers approached by the ESG analyst depending on each company industry or sector of activity.

No

**SG 01.7  
CC**

Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

<b>SG 03.2</b>	Describe your policy on managing potential conflicts of interest in the investment process.
----------------	---

Itaú Unibanco has clearly defined conflict of interest policies and procedures, which have been designed to identify and properly disclose, mitigate, and/or eliminate applicable conflicts of interest. However, written policies and procedures cannot address every potential conflict, so employees must use proper judgment in identifying and responding appropriately to actual or potential conflicts.

Conflicts of interest that involve Itaú on one hand and clients on the other hand, will generally be fully disclosed and/or resolved in a way that favours the interests of the clients. In some instances conflict of interests may

arise between two or more clients. Responding appropriately to these types of conflicts can be challenging, and may require robust disclosures if there is any appearance that one or more clients have been unfairly disadvantaged. Employees must notify the relevant compliance officer promptly if it appears that any actual or potential conflict of interest exists and has not been appropriately addressed. The compliance officer will document the firm's assessment of, and response to, such conflicts.

IAM discloses its ESG models for fixed income and equities publicly in its website and also in meetings and public events. The models are shared with Brazilian investment industry and IAM has received visits from clients and other investment managers interested in additional information on ESG integration. The focus is to spread the importance of ESG integration and responsible investment in the markets IAM operates.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

We consider ESG issues to the extent that they can materially affect the value of our investments, thus helping us deliver better risk-adjusted returns to our customers.

The Brazilian stock market is very concentrated in a few sectors, thus making it difficult for a large player such as Itaú Asset Management to devise thematic strategies or screening across the entire portfolio. Therefore, we have chosen to apply integration for all of IAM strategies. Our Integration approach fits better with our investment philosophy, which prioritises fundamental approaches with a strong focus on internal research. By integrating ESG into the equity research process, our analysts may give customized recommendations to our PMs, taking into consideration specificities of each strategy (long-only, long-short, benchmark used, etc).

Yes

**LEI 02.3** Describe how you incentivise brokers.

Since 2012 IAM formally considers ESG research material in its sell side evaluation process.

In 2011, Itaú Asset Management and other Brazilian PRI signatories committed to incentivise brokers by adding ESG-related criteria to their broker review process. An industry wide event hosted by Itaú Asset Management was set up to communicate the initiative and attracted more than 10 brokers. Itaú Asset Management implemented the measure along 2012 and in the end of that year repeated the event to report on progress.

**FI 01.2** Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

ESG integration is a fundamental part of the fixed income investment process. All fixed income investments are analyzed by the ESG analyst, which is a permanent member of the credit committee with veto power.

<b>FI 03.1</b>	<b>Indicate how you ensure that your ESG research process is robust:</b>
----------------	--

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

<b>FI 03.2</b>	<b>Describe how your ESG information or analysis is shared among your investment team.</b>
----------------	--

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
- None of the above

<b>FI 03.3</b>	<b>Additional information. [Optional]</b>
----------------	---

Every fixed income investment case is analyzed by the ESG analyst together with FI analysts. For closed ended companies, questionnaires and conference calls are used by the ESG analyst to refine the ESG research process. ESG analysis is systematically presented in the credit committee, with a formal ESG research material, where the ESG analyst points out the risks / opportunities and how they have been financially estimated. The ESG analyst has veto power in the Credit Committee.

<b>FI 10</b>	<b>Mandatory</b>	<b>Public</b>	<b>Descriptive</b>	<b>PRI 1</b>
--------------	------------------	---------------	--------------------	--------------

<b>FI 10.1</b>	<b>Describe your approach to integrating ESG into traditional financial analysis.</b>
----------------	---

The ESG Integration Method of Itaú Asset Management incorporates ESG variables into our fundamental fixed income research model by estimating ESG impacts on cash flow or solvency indicators. The objective is to adjust the rating of issuers and to stress test the events that may result in challenges for servicing their debt. This approach provides flexibility to our portfolio managers, who use the ESG research inputs to varying degrees, according to their specific strategies and mandates.

The method does not use negative screening to exclude industries or companies and so reduce the investment universe. Nevertheless, such exclusions may be added as an additional filter for clients with exclusive funds or managed portfolios.

<b>FI 10.2</b>	Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

	SSA
--	-----

The sovereign bonds space presents a different challenge. Brazilian investors tend to be concentrated on local assets; hence most sovereign bonds held by Itaú Asset Management are issued by the Brazilian Federal Government. Having only one issuer significantly diminishes the possibility of integrating ESG in the analysis. Nevertheless IAM conducted an ESG analysis of Brazilian Bonds and published an internal risk dashboard containing the country performance on its ESG dataset.

	Corporate (financial)
--	-----------------------

Itaú Asset Management has defined different indicators for measuring the ESG impact on financial Institutions and corporations. Financial institutions tend to be materially impacted on their need to build capital reserves, therefore ESG integration efforts are communicated as a % of the financial institutional book value. Additionally to E&S integration, a corporate governance analysis is performed and a corporate governance internal rating is in place to better analyze each institution CG practices.

	Corporate (non-financial)
--	---------------------------

Itaú Asset Management has defined different indicators for measuring the ESG impact on financial Institutions and corporations. Corporate entities are impacted on their ability to generate free cash flow, and estimated ESG impacts are presented as % of the company EBITDA. Additionally to E&S integration, a corporate governance analysis is performed and a corporate governance internal rating is in place to better analyze each institution CG practices.
