We have reviewed the accompanying individual and consolidated interim financial information of Ultrapar Participações S.A. The Company's Management is responsible for the preparation of the interim financial information in accordance with Technical Pronouncement CPC 21(R1) Interim Financial Information and with International Standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, such as for the presentation of these information in a manner consistent with the standards issued by the Brazilian Securities Commission, applicable to the preparation of the Quarterly Financial Information - ITR. Our responsibility is to express a conclusion on these interim financial information based on our review.

**Scope of the review**
Our review was carried out in accordance with the Brazilian and international review standards for interim information (NBC TR 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

**Conclusion on the interim financial information**
Based on our review, nothing has come to our attention that causes us to believe that the individual and consolidated interim financial information included in the quarterly information referred to above was not prepared, in all material respects, in accordance with

KPMG Auditores Independentes, uma sociedade simples brasileira e firma-membro da rede KPMG de firmas-membro independentes e afiliadas à KPMG International Cooperative ("KPMG International"), uma entidade suíça.

### *a. Recognition of Income*

Revenue is measured at the fair value of the consideration received or receivable, net of sales returns, discounts, and other deductions, if applicable.

Revenue from sales of fuels and lubricants is recognized when the products are delivered to gas stations and to large consumers. Revenue from sales of LPG is recognized when the products are delivered to customers at home, to independent dealers and to industrial and commercial customers. Revenue from sales of pharmaceuticals is recognized when the products are delivered to end user customers in own drugstores and when the products are delivered to independent resellers. Revenue from sales of chemical products is recognized when the products are delivered to industrial customers, depending of the freight mode of delivery. The revenue provided from storage services is recognized as services are performed. Costs of products sold and services provided include goods (mainly fuels, lubricants, LPG, and pharmaceutical products), raw materials (chemicals and petrochemicals) and production, distribution, storage, and filling costs.

### *b. Cash and Cash Equivalents*

Includes cash, banks deposits, and short-term, highly-liquid investments that are readily convertible into a known amount of cash and are subject to an insignificant risk of change in value. See Note 4 for further details on cash and cash equivalents of the Company and its subsidiaries.

***c. Financial Assets***

In accordance with IAS 32, IAS 39, and International Financial Reporting Standards ("IFRS") 7 (CPC 38, 39 and 40 (R1)), the financial assets of the Company and its subsidiaries are classified in accordance with the following categories:

- Measured at fair value through profit or loss: financial assets held for trading, that is, acquired or incurred principally for the purpose of selling or repurchasing in the near term, and derivatives. The balances are stated at fair value. The interest earned, the exchange variation, and changes in fair value are recognized in profit or loss.

- Held to maturity: non-derivative financial assets with fixed or determinable payments, and fixed maturities for which the entity has the positive intention and ability to hold to maturity. The interest earned and the foreign currency exchange variation are recognized in profit or loss, and balances are stated at acquisition cost plus the interest earned, using the effective interest rate method.

- Available for sale: non-derivative financial assets that are designated as available for sale or that are not classified into other categories at initial recognition. The balances are stated at fair value, and the interest earned and the foreign currency exchange variation are recognized in profit or loss. Differences between fair value and acquisition cost plus the interest earned are recognized in other comprehensive income in the "Valuation adjustments". Accumulated gains and losses recognized in shareholders' equity are reclassified to profit or loss in case of prepayment.

- Loans and receivables: non-derivative financial assets with fixed or determinable payments or receipts, not quoted in an active market, except: (i) those which the entity intends to sell immediately or in the near term and which the entity classified as measured at fair value through profit or loss; (ii) those classified as available for sale; or (iii) those for which the Company may not recover substantially all of its initial investment for reasons other than credit deterioration. The interest earned and the foreign currency exchange variation are recognized in profit or loss. The balances are stated at acquisition cost plus interest, using the effective interest rate method. Loans and receivables include cash and banks, trade receivables, dividends receivable, and other trade receivables.

The Company and its subsidiaries use financial instruments for hedging purposes, applying the concepts described below:

- Hedge accounting - fair value hedge: financial instruments used to hedge exposure to changes in the fair value of an item, attributable to a particular risk, which can affect the entity's profit or loss. In the initial designation of the fair value hedge, the relationship between the hedging instrument and the hedged item is documented, including the objectives of risk management, the strategy in conducting the transaction, and the methods to be used to evaluate its effectiveness. Once the fair value hedge has been qualified as effective, the hedge item is also measured at fair value. Gains and losses from hedge instruments and hedge items are recognized in profit or loss. The hedge accounting must be discontinued when the hedge becomes ineffective.

- Hedge accounting - cash flow hedge: financial instruments used to hedge the exposure to variability in cash flows that is attributable to a risk associated with an asset or liability or highly probable transaction or firm commitment that may affect the income statements. The portion of the gain or loss on the hedging instrument that is determined to be effective relating to the effects of exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as "Valuation adjustments" while the ineffective portion is recognized in profit or loss. Gains or losses on the hedging instrument relating to the effective portion of this hedge that had been recognized directly in accumulated other comprehensive income shall be recognized in profit or loss in the period in which the hedged item is recognized in profit or loss or as initial cost of non- financial assets, in the same line of the statement that the hedged item is recognized. The hedge accounting shall be discontinued when (i) the Company cancels the hedging relationship; (ii) the hedging instrument expires; and (iii) the hedging instrument no longer qualifies for hedge accounting. When hedge accounting is discontinued, gains and losses recognized in other comprehensive income in equity are reclassified to profit or loss in the period which the hedged item is recognized in profit or loss. If the transaction hedged is canceled or is not expected to occur, the cumulative gains and losses in other comprehensive income in equity shall be recognized immediately in profit or loss.

- Hedge accounting - hedge of net investments in foreign operation: financial instruments used to hedge exposure on net investments in foreign subsidiaries due to the fact that the local functional currency is different from the functional currency of the Company. The portion of the gain or loss on the hedging instrument that is determined to be effective, referring to the exchange rate effect, is recognized directly in equity in accumulated other comprehensive income as cumulative translation adjustments, while the ineffective portion and the operating costs are recognized in profit or loss. The gain or loss on the hedging instrument that has been recognized directly in accumulated other comprehensive income shall be recognized in income upon disposal of the foreign operation.

For further detail on financial instruments of the Company and its subsidiaries, see Note 31.

***d. Trade Receivables***

Trade receivables are recognized at the amount invoiced, adjusted to present value if applicable, and includes all direct taxes attributable to the Company and its subsidiaries. An allowance for doubtful accounts is recorded based on estimated losses and is set at an amount deemed by management to be sufficient to cover any probable loss on realization of trade receivables (see Notes 5 and 31 - Customer Credit Risk).

***e. Inventories***

Inventories are stated at the lower of acquisition cost or net realizable value (see Note 6). The cost value of inventory is measured using the weighted average cost and includes the costs of acquisition and processing directly and indirectly related to the units produced based on the normal capacity of production. Estimates of net realizable value are based on the average selling prices at the end of the reporting period, net of applicable direct selling expenses. Subsequent events related to the fluctuation of prices and costs are also considered, if relevant. If net realizable values are below inventory costs, a provision corresponding to this difference is recognized. Provisions are also made for obsolescence of products, materials, or supplies that (i) do not meet the Company and its subsidiaries' specifications, (ii) have exceeded their expiration date, or (iii) are considered slow-moving inventory. This classification is made by management with the support of its industrial and operations teams.

***f. Investments***

Investments in subsidiaries are accounted for under the equity method of accounting in the individual interim financial information of the parent company (see Notes 3.b and 11).

A subsidiary is an investee in which the investor is entitled to variable returns on investment and has the ability to interfere in its financial and operational activities. Usually the equity interest in a subsidiary is more than 50%.

Investments in associates and joint ventures are accounted for under the equity method of accounting in the individual and consolidated interim financial information (see Note 11).

An associate is an investment, in which an investor has significant influence, that is, has the power to participate in the financial and operating decisions of the investee but does not exercise control.

A joint venture is an investment in which the shareholders have the right to net assets on behalf of a joint control. Joint control is the agreement which establish that decisions about the relevant activities of the investee require the consent from the parties that share control.

Other investments are stated at acquisition cost less provision for losses, unless the loss is considered temporary.

***g. Property, Plant, and Equipment***

Property, plant, and equipment is recognized at acquisition or construction cost, including financial charges incurred on property, plant, and equipment under construction, as well as maintenance costs resulting from scheduled plant outages and estimated costs to remove, to decommission, or to restore assets (see Notes 2.m and 19), less accumulated depreciation and, when applicable, less provision for losses.

Depreciation is calculated using the straight-line method, over the periods mentioned in Note 12, taking into account the estimated useful lives of the assets, which are reviewed annually.

Leasehold improvements are depreciated over the shorter of the lease contract term and useful life of the property.

***h. Leases***

- Finance Leases

Certain lease contracts transfer substantially all the risks and benefits associated with the ownership of an asset to the Company and its subsidiaries. These contracts are characterized as finance leases, and assets thereunder are capitalized at lease commencement at their fair value or, if lower, present value of the minimum lease payments under the contracts. The items recognized as assets are depreciated and amortized using the lower of the straight-line method over the lower of the useful lives applicable to each group of assets or the contract terms, as mentioned in Notes 12 and 13. Financial charges under the finance lease contracts are allocated to profit or loss over the lease contract term, based on the amortized cost and the effective interest rate method of the related lease obligation (see Note 14.i).

- Operating Leases

There are lease transactions where the risks and benefits associated with the ownership of the asset are not transferred and where there is no purchase option, or the purchase option at the end of the contract is equivalent to the market value of the leased asset. Payments made under an operating lease contract are recognized as cost or expense in the income statement on a straight-line basis over the term of the lease contract (see Note 32.c).

***i. Intangible Assets***

Intangible assets include assets acquired by the Company and its subsidiaries from third parties, according to the criteria below (see Note 13):

- Goodwill is carried net of accumulated amortization as of December 31, 2008, when it ceased to be amortized. Goodwill generated since January 1, 2009 is shown as intangible assets corresponding to the positive difference between the amount paid or payable to the seller and the fair value of the identified assets and liabilities assumed of the acquired entity, and is tested annually for impairment. Goodwill is allocated to the business segments, which represent the lowest level that goodwill is monitored by the Company for impairment testing purposes.
- Bonus disbursements as provided in Ipiranga's agreements with reseller service stations and major consumers are recognized as distribution rights when paid and amortized using the straight-line method according to the term of the agreement (see Note 13.v).
- Other intangible assets acquired from third parties, such as software, technology, and commercial property rights, are measured at the total acquisition cost and amortized using straight-line method, over the periods mentioned in Note 13, taking into account their useful life, which is reviewed annually.

The Company and its subsidiaries have not recognized intangible assets that were generated internally. The Company and its subsidiaries have goodwill and brands acquired in business combinations, which are evaluated as intangible assets with indefinite useful life (see Note 13 items i and vi).

***j. Other Assets***

Other assets are stated at the lower of cost and realizable value, including, if applicable, interest earned, monetary changes and changes in exchange rates incurred or less a provision for loss and, if applicable, adjustment to present value (see Note 2.u).

***k. Financial Liabilities***

The Company and its subsidiaries' financial liabilities include trade payables and other payables, loans, debentures, finance leases and derivative financial instruments. Financial liabilities are classified as "financial liabilities at fair value through profit or loss" or "financial liabilities at amortized cost". The financial liabilities at fair value through profit or loss refer to derivative financial instruments, subscription warrants, and financial liabilities designated as hedged items in a fair value hedge relationship upon initial recognition (see Note 2.c – Fair Value Hedge). The financial liabilities at amortized cost are stated at the initial transaction amount plus related charges and net of amortization and transaction costs. The charges are recognized in profit or loss using the effective interest rate method.

Transaction costs incurred and directly attributable to the activities necessary for contracting loans or for issuing bonds, as well as premiums and discounts upon issuance of debentures and other debt, are allocated to the instrument and amortized to profit or loss over its term, using the effective interest rate method (see Note 14.j). Transaction costs incurred and directly attributable to the issue of shares or other equity instruments are recognized in equity and are not amortized.

***l. Income and Social Contribution Taxes on Income***

Current and deferred income tax ("IRPJ") and social contribution on net income tax ("CSLL") are calculated based on their current rates, considering the value of tax incentives. Taxes are recognized based on the rates of IRPJ and CSLL provided for by the laws enacted on the last day of the interim financial information. The current rates in Brazil are 25% for income tax and 9% for social contribution on net income tax. For further details about recognition and realization of IRPJ and CSLL, see Note 9.

For purposes of disclosure, deferred tax assets were offset against the deferred tax liability, income tax and social contribution, in the same taxable entity and the same taxation authority.

***m. Provision for Asset Retirement Obligation – Fuel Tanks***

The Company and its subsidiaries have the legal obligation to remove Ipiranga's underground fuel tanks located at Ipiranga-branded service stations after a certain period. The estimated cost of the obligation to remove these fuel tanks is recognized as a liability when the tanks are installed. The estimated cost is recognized in property, plant, and equipment and depreciated over the respective useful lives of the tanks. The amounts recognized as a liability are monetarily restated using the National Consumer Price Index ("IPCA") until the respective tank is removed (see Note 19). An increase in the estimated cost of the obligation to remove the tanks could result in negative impact in future results. The estimated removal cost is reviewed and updated annually or when there is significant change in its amount and change in the estimated costs are recognized in income when they become known.

***n. Provisions for Tax, Civil, and Labor Risks***

A provision for tax, civil and labor risks is recognized for quantifiable risks, when the chance of loss is more-likely-than-not in the opinion of management and internal and external legal counsel, and the amounts are recognized based on the evaluation of the outcomes of the legal proceedings (see Note 20).

***o. Post-Employment Benefits***

Post-employment benefits granted and to be granted to employees, retirees, and pensioners are based on an actuarial calculation prepared by an independent actuary, using the projected unit credit method (see Note 18.b). The actuarial gains and losses are recognized in cumulative other comprehensive income in the "Valuation adjustments" and presented in the statement of shareholders' equity. Past service cost is recognized in the income statement.

***p. Other Liabilities***

Other liabilities are stated at known or measurable amounts plus, if applicable, related charges, monetary restatement, and changes in exchange rates incurred. When applicable, other liabilities are recognized at present value, based on interest rates that reflect the term, currency, and risk of each transaction.

***q. Foreign Currency Transactions***

Foreign currency transactions carried out by the Company or its subsidiaries are remeasured into their functional currency at the exchange rate prevailing at the date of each transaction. Outstanding monetary assets and liabilities of the Company and its subsidiaries are translated using the exchange rate at the date of the reporting period. The effect of the difference between those exchange rates is recognized in profit or loss until the conclusion of each transaction.

***r. Basis for Translation of Interim Financial Information of Foreign Subsidiaries***

Assets and liabilities of the foreign subsidiaries, denominated in currencies other than that of the Company (functional currency: Brazilian Real), which have administrative autonomy, are translated using the exchange rate at the end of the reporting period. Revenues and expenses are translated using the average exchange rate of each period and shareholders' equity is translated at the historic exchange rate of each transaction affecting shareholders' equity. Gains and losses resulting from changes in these foreign investments are directly recognized in shareholders' equity in cumulative other comprehensive income in the "cumulative translation adjustments" and will be recognized in profit or loss if these investments are disposed of. The balance in cumulative other comprehensive income and presented in the shareholders' equity as cumulative translation adjustments as of June 30, 2017 was a gain of R$ 11,463 (gain of R$ 7,519 as of December 31, 2016) - see Note 23.f - Cumulative Translation Adjustments.

The foreign subsidiaries with functional currency different from the Company and which have administrative autonomy are listed below:

| Subsidiary | Functional currency | Location |
|---|---|---|
| Oxiteno México S.A. de C.V. | Mexican Peso | Mexico |
| Oxiteno Servicios Corporativos S.A. de C.V. | Mexican Peso | Mexico |
| Oxiteno Servicios Industriales de C.V. | Mexican Peso | Mexico |
| Oxiteno USA LLC | U.S. Dollar | United States |
| Oxiteno Andina, C.A. | Bolivar | Venezuela |
| Oxiteno Uruguay S.A. | U.S. Dollar | Uruguay |

The subsidiary Oxiteno Uruguay S.A. ("Oxiteno Uruguay") determined its functional currency as the U.S. dollar ("US$"), as its inventory sales, purchases of raw material inputs, and financing activities are performed substantially in this currency.

According to IAS 29, Venezuela is classified as a hyperinflationary economy. As a result, the financial information of Oxiteno Andina, C.A. ("Oxiteno Andina") was adjusted by the Venezuelan Consumer Price Index.

On May 19, 2017, the Venezuelan Central Bank issued Foreign Exchange Regulation No. 38, altering the Venezuelan foreign exchange markets and regulating the legally recognized types of exchange rates:

a) DIPRO - *Tipo de Cambio Protegido* (Exchange Protected): Bolivar ("VEF") is traded at an exchange rate of 9.975 VEF/US$ for purchase and 10.00 VEF/US$ for sale. This rate is applied to importation of essential goods (medicines and food) and raw materials and inputs related to the production of these sectors, which transactions are channeled through CENCOEX - *Centro Nacional de Comercio Exterior en Venezuela*;

b) DICOM - *Tipo de Cambio Complementario Flotante de Mercado Supplemental* (Floating Market Exchange): Bolivar is traded at the variable exchange rate of 2,640.00 VEF/US$ for sale and 2,633.40 VEF/US$ for purchase on June 30, 2017. This rate is applied to all unforeseen currency settlement transactions not expressly set forth in the Foreign Exchange Regulation, which transactions are processed through alternative currency markets.

Due to the political and economic situation in Venezuela, the Company's management uses the DICOM exchange rate in the translation.

Assets and liabilities of the other foreign subsidiaries, which do not have administrative autonomy, are considered an extension of the activities of their parent company and are translated using the exchange rate at the end of the reporting period. Gains and losses resulting from changes in these foreign investments are directly recognized as financial income or loss. The gain recognized in income for the six-month period ended June 30, 2017 amounted to R$ 3,455 (R$ 5,170 gain for the six-month period ended June 30, 2016).

***s. Use of Estimates, Assumptions and Judgments***

The preparation of the interim financial information requires the use of estimates, assumptions, and judgments for the accounting of certain assets, liabilities, and income. Therefore, the Company's and subsidiaries' management use the best information available at the time of preparation of the interim financial information, as well as the experience of past and current events, also considering assumptions regarding future events. The interim financial information therefore include estimates, assumptions, and judgments related mainly to determining the fair value of financial instruments (Notes 2.c, 2.k, 4, 14 and 31), the determination of the allowance for doubtful accounts (Notes 2.d, 5 and 31), the determination of provisions for losses of inventories (Notes 2.e and 6), the determination of deferred income taxes amounts (Notes 2.l and 9), the determination of control in subsidiaries (Notes 2.f, 2.r, 3 and 11.a), the determination of joint control in joint venture (Notes 2.f, 11.a and 11.b), the determination of significant influence in associates (Notes 2.f and 11.c), the determination of exchange rate used to translation of Oxiteno Andina' information (Note 2.r), the useful lives of property, plant, and equipment (Notes 2.g and 12), the useful lives of intangible assets, and the determination of the recoverable amount of goodwill (Notes 2.i and 13), provisions for assets retirement obligations (Notes 2.m and 19), provisions for tax, civil, and labor risks (Notes 2.n and 20), estimates for the preparation of actuarial reports (Notes 2.o and 18.b) and the determination of fair value of subscription warrants – indemnification (Notes 22 and 31). The actual result of the transactions and information may differ from their estimates.

***t. Impairment of Assets***

The Company and its subsidiaries review, at least annually, the existence of any indication that an asset may be impaired. If there is an indication, the Company and its subsidiaries estimate the recoverable amount of the asset. Assets that cannot be evaluated individually are grouped in the smallest group of assets that generate cash flow from continuous use and that are largely independent of cash flows of other assets (cash generating units "CGU"). The recoverable amount of assets or CGUs corresponds to the greater of their fair value net of applicable direct selling costs and their value in use.

The fair value less costs of disposal is determined by the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date, net of costs of removing the asset, and direct incremental costs to bring an asset into condition for its sale, legal costs, and taxes.

To assess the value in use, the Company and its subsidiaries consider the projections of future cash flows, trends, and outlooks, as well as the effects of obsolescence, demand, competition, and other economic factors. Such cash flows are discounted to their present values using the discount rate before tax that reflects market conditions for the period of impairment testing and the specific risks of the asset or CGU being evaluated. In cases where the expected discounted future cash flows are less than their carrying amount, an impairment loss is recognized for the amount by which the carrying value exceeds the fair value of these assets. Losses for impairment of assets are recognized in profit or loss. In case goodwill has been allocated to a CGU, the recognized losses are first allocated to reduce the corresponding goodwill. If the goodwill is not enough to absorb such losses, the surplus is allocated to the assets on a pro-rata basis. An impairment of goodwill cannot be reversed. For other assets, impairment losses may be reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if the impairment had not been recognized.

No impairment was recognized in the periods presented (see Note 13.i).

***u. Adjustment to Present Value***

The Company and its subsidiaries reviewed all items classified as non-current and, when relevant, current assets and liabilities. . No recognition of present value adjustments that would have relevant effects were identified.

***v. Business Combination***

A business combination is accounted applying the acquisition method. The cost of the acquisition is measured based on the consideration transferred and to be transferred, measured at fair value at the acquisition date. In a business combination, the assets acquired and liabilities assumed are measured in order to classify and allocate them accordingly to the contractual terms, economic circumstances and relevant conditions on the acquisition date. The non-controlling interest in the acquired is measured at fair value or based on its interest in identifiable net assets acquired. Goodwill is measured as the excess of the consideration transferred and to be transferred over the fair value of net assets acquired (identifiable assets and liabilities assumed, net). After the initial recognition, goodwill is measured at cost less any accumulated impairment losses. For impairment testing purposes, goodwill is allocated to the Company's operating segments. When the cost of the acquisition is lower than the fair value of net assets acquired, a gain is recognized directly in the income statement. Costs related to the acquisition are recorded in the income statement when incurred.

***w. Statements of Value Added***

As required by Brazilian Corporate Law, the Company and its subsidiaries prepare the individual and consolidated statements of value added ("DVA") according to CPC 09 – Statement of Value Added, as an integral part of the interim financial information as applicable to publicly-traded companies, and as supplemental information for IFRS, which does not require the presentation of DVA.

***x. Statements of Cash Flows***

The Company and its subsidiaries prepared its individual and consolidated statements of cash flows in accordance with IAS 7 (CPC 03) - Cash Flow Statement. The Company and its subsidiaries present the interest paid on loans and debentures in financing activities.

***y. Adoption of the Pronouncements Issued by CPC and IFRS***

| • IAS 7 – Disclosure Initiative – Amendments to IAS 7: clarifications made by the IASB related to liabilities arising from financing activities. | 03 (R2) | 2017 |

(*) CPC has not yet issued pronouncements equivalent to this IFRS, but is expected to do so before the date it becomes effective. The adoption of IFRS is subject to prior approval by the CVM.

The Company is assessing the potential effects of these standards.

***z. Authorization for Issuance of the Interim Financial Information***

These interim financial information were authorized for issue by the Board of Directors on August 9, 2017.

**3. Principles of Consolidation, Investments in Subsidiaries and Acquisition Under Approval**

**a) Principles of Consolidation**

The consolidated interim financial information were prepared following the basic principles of consolidation established by IFRS 10 (CPC 36 (R3)). Investments of one company in another, balances of asset and liability accounts, and revenues and expenses were eliminated, as well as the effects of transactions conducted between the companies. Non-controlling interests in subsidiaries are presented within consolidated shareholders' equity and net income.

Consolidation of a subsidiary begins when the parent company obtains direct or indirect control over a company and ceases when the parent company loses control of a company. Income and expenses of a subsidiary acquired are included in the consolidated income statement and other comprehensive income from the date the parent company gains the control. Income and expenses of a subsidiary, in which the parent company loses control, are included in the consolidated income statement and other comprehensive income until the date the parent company loses control.

When necessary, adjustments are made to the interim financial information of subsidiaries to bring their accounting policies into line with the Company's accounting policies.

On November 26, 2003, the Extraordinary General Shareholders' Meeting approved certain amendments to the original plan of 2001 (the "Deferred Stock Plan"). (ii) Nontaxable revenues consist of certain gains and income that are not taxable under applicable tax legislation, such as the reimbursement of taxes and the reversal of certain provisions;

(iii) Brazilian tax law allows for an alternative method of taxation for companies that generated gross revenues of up to R$ 78 million in their previous fiscal year. Certain subsidiaries of the Company adopted this alternative form of taxation, whereby income and social contribution taxes are calculated on a basis equal to 32% of operating revenues, as opposed to being calculated based on the effective taxable income of these subsidiaries. The adjustment to estimated income represents the difference between the taxation under this alternative method and the income and social contribution taxes that would have been paid based on the effective statutory rate applied to the taxable income of these subsidiaries; and

(iv) Interest on equity is an option foreseen in Brazilian corporate law to distribute profits to shareholders, calculated based on the long-term interest rate ("TJLP"), which does not affect the income statement, but is deductible for purposes of IRPJ and CSLL.

(1) Including R$ 246,163 in the parent.

On December 31, 2016, the Company tested the balances of goodwill shown in the table above for impairment. The determination of value in use involves assumptions, judgments, and estimates of cash flows, such as growth rates of revenues, costs and expenses, estimates of investments and working capital, and discount rates. The assumptions about growth projections and future cash flows are based on the Company's business plan of its operating segments, as well as comparable market data, and represent management's best estimate of the economic conditions that will exist over the economic life of the various CGUs, to which goodwill is related. The main key-assumptions used by the Company to calculate the value in use are described below:

Period of evaluation: the evaluation of the value in use is calculated for a period of five years (except the Extrafarma segment), after which we calculate the perpetuity, considering the possibility of carrying the business on indefinitely. For the Extrafarma segment, a period of 10 years was used due to its expansion plan and considering a three-year period to maturity of new stores.

Discount and real growth rates: on December 31, 2016, the discount and real growth rates used to extrapolate the projections ranged from 10.4% to 16.6% and from 0% to 1% p.a., respectively, depending on the CGU analyzed. For the subsidiary Oxiteno Andina, due to the macroeconomic scenario in Venezuela, the discount rate used was 287.9%.

Revenue from sales and services, costs and expenses, and gross margin: for 2017, the budget prepared by management and approved by the Board of Directors was considered. In subsequent periods, the Company considers the forecast of the general inflation or price index predicted in the contracts.

Opening of new commercial points (investments): for 2017, the budget prepared by the management and approved by the Board of Directors was considered. In subsequent periods, the Company considers the expansion plans of each business unit, which also considers the commercial establishments closed in the previously years.

The Company assessed a sensitivity analysis of discount and growth rate of perpetuity, due to their significant impact on cash flows and value in use. An increase of 0.5 percentage points in the discount rate or a decrease of 0.5 percentage points in the growth rate of the perpetuity of the cash flow of each business segment would not result in the recognition of impairment.

**ii)** Software includes user licenses and costs for the implementation of the various systems used by the Company and its subsidiaries, such as: integrated management and control, financial management, foreign trade, industrial automation, operational and storage management, accounting information, and other systems.

**iii)** The subsidiaries Oxiteno S.A., Oxiteno Nordeste and Oleoquímica Indústria e Comércio de Produtos Químicos Ltda. ("Oleoquímica") recognize as technology certain rights of use held by them. Such licenses include the production of ethylene oxide, ethylene glycols, ethanolamines, glycol ethers, ethoxylates, solvents, fatty acids from vegetable oils, fatty alcohols, and specialty chemicals, which are products that are supplied to various industries.

**iv)** Commercial property rights include those described below:

- Subsidiary Terminal Químico de Aratu S.A. – Tequimar ("Tequimar") has an agreement with CODEBA – Companhia das Docas do Estado da Bahia, which allows it to explore the area in which the Aratu Terminal is located for 20 years, renewable for a similar period. The price paid by Tequimar was R$ 12,000, which is being amortized from August 2002 to July 2042.
- Subsidiary Tequimar has a lease contract for an area adjacent to the Port of Santos for 20 years from December 2002, renewable for a similar period, which allows the construction, operation, and use of a terminal for liquid bulk unloading, tank storage, handling, and distribution. The price paid by Tequimar was R$ 4,334, which is being amortized from August 2005 to December 2022.
- Subsidiary Extrafarma pays key money to obtain certain commercial establishments to open drugstores which is stated at the cost of acquisition, amortized using the straight-line method, considering the lease contract terms. In the case of the closedown of stores, the residual amount is written off.

**v)** Distribution rights refer mainly to bonus disbursements as provided in Ipiranga's agreements with resellers and large customers. Bonus disbursements are recognized when paid and recognized as an expense in the income statement over the term of the agreement (typically 5 years), which is reviewed as per the changes occurred in the agreements.

**vi)** Brands are represented by the acquisition cost of the 'am/pm' brand in Brazil and of the Extrafarma brand.

**vii)** Other intangibles refer mainly to the loyalty program "Clube Extrafarma".

The amortization expenses were recognized in the interim financial information as shown below:

   The debentures were later assigned and transferred to Eco Securitizadora de Direitos Creditórios do Agronegócio S.A. that acquired these agribusiness credit rights with the purpose to bind the issuance of Certificates of Agribusiness Receivables (CRA). These suppliers control almost all of the markets for these products in Brazil. The Company's subsidiaries depend on the ability of those suppliers to deliver products in a timely manner and at acceptable prices and terms. The loss of any major supplier or a significant reduction in product availability from these suppliers could have a significant adverse effect on the Company and its subsidiaries. The Company and its subsidiaries believe that their relationship with suppliers is satisfactory.

### *a. ULTRAPREV- Associação de Previdência Complementar*

In February 2001, the Company's Board of Directors approved the adoption of a defined contribution pension plan to be sponsored by the Company and each of its subsidiaries. Participating employees have been contributing to this plan, managed by Ultraprev - Associação de Previdência Complementar ("Ultraprev"), since August 2001. Under the terms of the plan, every year each participating employee chooses his or her basic contribution to the plan. Each sponsoring company provides a matching contribution in an amount equivalent to each basic contribution, up to a limit of 11% of the employee's reference salary, according to the rules of the plan. As participating employees retire, they may choose to receive either (i) a monthly sum ranging between 0.5% and 1.0% of their respective accumulated fund in Ultraprev or (ii) a fixed monthly amount which will exhaust their respective accumulated fund over a period of 5 to 25 years. The sponsoring company does not guarantee the amounts or the duration of the benefits received by each employee that retires. For the six-month period ended June 30, 2017, the Company and its subsidiaries contributed R$ 12,262 (R$ 11,444 for the six-month period ended June 30, 2016) to Ultraprev, which is recognized as expense in the income statement. In addition, Ultraprev had 27 former employees receiving benefits under the rules of a previous plan whose reserves are fully constituted.

### *b. Post-employment Benefits*

The Company and its subsidiaries recognized a provision for post-employment benefits mainly related to seniority bonus, payment of Government Severance Indemnity Fund ("FGTS"), and health, dental care, and life insurance plan for eligible retirees.

The amounts related to such benefits were determined based on a valuation conducted by an independent actuary as of December 31, 2016 and are recognized in the interim financial information in accordance with IAS 19 R2011 (CPC 33 R2).

***a.1) Provisions for Tax Matters and Social Security***

a.1.1) On October 7, 2005, the subsidiaries Cia. Ultragaz and Bahiana filed for and obtained a preliminary injunction to recognize and offset PIS and COFINS credits on LPG purchases, against other taxes levied by the Brazilian Federal Revenue Service, notably IRPJ and CSLL. The decision was confirmed by a trial court on May 16, 2008. Under the preliminary injunction, the subsidiaries made escrow deposits for these debits which amounted to R$ 472,760 as of June 30, 2017 (R$ 457,868 as of December 31, 2016). On July 18, 2014, a second instance unfavorable decision was published and the subsidiaries suspended the escrow deposits, and started to pay income taxes from that date. To revert the court decision, the subsidiaries presented a writ of prevention which was dismissed on December 30, 2014, and the Company appealed this decision on February 3, 2015. Appeals were also presented to the respective higher courts (STJ and STF) whose trials are pending.

a.1.2) The subsidiaries Oxiteno S.A., Oxiteno Nordeste, Cia. Ultragaz, Tequimar, Tropical Transportes Ipiranga Ltda., EMCA, IPP and Extrafarma filed for a preliminary injunction seeking the deduction of ICMS from their PIS and COFINS tax bases. On March 15, 2017, in a decision with general repercussion, the Federal Supreme Court (STF) decided that the ICMS does not make up the calculation of PIS and COFINS tax bases. Therefore, supported by its legal advisors, on March 31, 2017, Oxiteno Nordeste and IPP reversed the provision in the amount of R$ 109,463.

The Company emphasizes that it is possible for the STF to restrict the effects of the judgment or to decide that the effectiveness will be reached after its final decision or other time that may be fixed. Despite the favorable context, until there is effective final decision, the causes may be reassessed, which could result in the recognition of new provisions in the future.

***a.2) Provisions for Civil, Environmental and Regulatory Claims***

a.2.1) The Company and its subsidiaries maintained provisions for lawsuits and administrative proceedings, mainly derived from contracts entered into with customers and former services providers, as well as proceedings related to environmental and regulatory issues in the amount of R$ 78,797 as of June 30, 2017 (R$ 69,350 as of December 31, 2016).

***a.3) Provisions for Labor Matters***

a.3.1) The Company and its subsidiaries maintained provisions of R$ 65,923 as of June 30, 2017 (R$ 65,162 as of December 31, 2016) for labor litigation filed by former employees and by employees of our service providers mainly contesting the non-payment of labor rights.

***b.*** **Contingent Liabilities (Possible)**

The Company and its subsidiaries have other pending administrative and legal proceedings of tax, civil, environmental, regulatory, and labor nature, which are individually less relevant, and were estimated by their legal counsel as having possible and/or remote risks (proceedings whose chance of loss is 50% or less). As such, the related potential losses were not provided for by the Company and its subsidiaries based on these opinions. The Company and its subsidiaries are also litigating for recovery of taxes and contributions, which were not recognized in the interim financial information due to their contingent nature. The estimated amount of this contingency is R$ 2,558,444 as of June 30, 2017 (R$ 2,252,637 as of December 31, 2016).

**b.1) Contingent Liabilities for Tax Matters and Social Security**

The Company and its subsidiaries have contingent liabilities for tax matters and social security in the amount of R$ 1,728,470 as of June 30, 2017 (R$ 1,519,658 as of December 31, 2016), mainly represented by:

b.1.1) The subsidiary IPP and its subsidiaries have assessments invalidating the offset of excise tax ("IPI") credits in connection with the purchase of raw materials used in the manufacturing of products which sales are not subject to IPI under the protection of tax immunity. The amount of this contingency is R$ 175,826 as of June 30, 2017 (R$ 169,889 as of December 31, 2016).

b.1.2) The subsidiary IPP and its subsidiaries have legal proceedings related to ICMS. The total amount involved as of June 30, 2017 in these proceedings, was R$ 604,128 (R$ 626,393 as of December 31, 2016). Such proceedings arise mostly of the disregard of ICMS credits amounting to R$ 294,860 (R$ 283,367 as of December 31, 2016), of which R$ 118,365 (R$ 113,889 as of December 31, 2016) refer to proportional reversal requirement of ICMS credits related to the acquisition of hydrated alcohol; of alleged non-payment in the amount of R$ 110,364 (R$ 108,786 as of December 31, 2016); and inventory differences in the amount of R$ 151,086 (R$ 147,031 as of December 31, 2016) related to the leftovers or faults due to temperature changes or product handling..

b.1.3) The Company and its subsidiaries are parties to administrative and judicial suits involving Income Tax, Social Security Contribution, PIS and COFINS, substantially about denials of offset claims and credits disallowance which total amount is R$ 658,700 as of June 30, 2017 (R$ 450,120 as of December 31, 2016), mainly represented by:

b.1.3.1) In the first quarter of 2017, the subsidiary IPP received a tax assessment related to the IRPJ and CSLL resulting from the supposedly undue amortization of the goodwill paid on acquisition of a subsidiary, in the amount of R$ 183,084 as of June 30, 2017, which includes the amount of the income taxes, interest and penalty. Management assessed the likelihood of the tax assessment, supported by the opinion of its legal advisors, as "possible", and therefore did not recognize a provision for this contingent liability.

**b.2) Contingent Liabilities for Civil, Environmental and Regulatory Claims**

The Company and its subsidiaries have contingent liabilities for civil, environmental and regulatory claims in the amount of R$ 554,302 as of June 30, 2017 (R$ 480,065 as of December 31, 2016), mainly represented by:

b.2.1) The subsidiary Cia. Ultragaz is party to an administrative proceeding before CADE based on alleged anti-competitive practices in the State of Minas Gerais in 2001. The CADE entered a decision against Cia. Ultragaz and imposed a penalty of R$ 31,888 as of June 30, 2017 (R$ 31,281 as of December 31, 2016). The imposition of such administrative decision was suspended by a court order and its merit is being judicially reviewed.

b.2.2) On November 29, 2016, a technical opinion was issued by the Operational Support Center for Execution (Centro de Apoio Operacional à Execução - CAEX), a technical body linked to the São Paulo State Public Prosecutor ("MPE"), presenting a proposal of compensation for the alleged environmental damages caused by the fire on April 2nd, 2015 at the Santos Terminal of the subsidiary Tequimar. This technical opinion is non-binding, with no condemnatory or sanctioning nature, and will still be evaluated by the authorities and parties. The subsidiary is negotiating an agreement with the MPE and the Brazilian Federal Public Prosecutor ("MPF"), and currently there is no lawsuit filed on the matter. The negotiations relate to *in natura* repair of the any damages. In case of satisfactory conclusion of the negotiations with the MPE and MPF, the payments related to the project costs may affect the future Company's financial statements. For more information see Note 33.

b.2.3) In 2016, the subsidiary Cia. Ultragaz became party to two administrative proceedings and the subsidiary Bahiana became party to one administrative proceeding filed by CADE based on allegations of anti-competitive practices in the State of Paraíba and in the Federal District. The subsidiaries' Management, supported by its external legal counsel, are evaluating the facts and evidences to present a defense. According to Law 12,529/11 ("Defense of Competition Law"), the charged fine for violation of the economic order has a range from 0.1% to 20% of the gross revenue of the company, group or conglomerate obtained, in the last year prior to the initiation of the administrative proceeding, in the business activity in which the infraction occurred, and shall never be less than the advantage obtained, when the estimative is possible. As of June 30, 2017, as a result of these administrative proceedings, no fine had been imposed to the subsidiaries. Based on the above, and supported by the opinion of external legal counsel that classified the probability of loss as "possible", Management did not recognize a provision for these contingencies as of June 30, 2017.

If the conclusion is that the subsidiaries have done such activities or anti-competitive behavior, the subsidiaries may incur fines, penalties and/or criminal sanctions against them and/or certain executives, directors or employees.

**b.3) Contingent Liabilities for Labor Matters**

The Company and its subsidiaries have contingent liabilities for labor matters in the amount of R$ 275,672 as of June 30, 2017 (R$ 252,914 as of December 31, 2016), mainly represented by:

b.3.1) In 1990, the Petrochemical Industry Labor Union (Sindiquímica), of which the employees of Oxiteno Nordeste and EMCA, companies located in the Camaçari Petrochemical Complex, are members, filed separate lawsuits against the subsidiaries demanding the compliance with the fourth section of the collective labor agreement, which provided for a salary adjustment in lieu of the salary policies practiced. In the same year, a collective labor dispute was also filed by the Union of Employers (SINPEQ) against Sindiquímica, requiring the recognition of the loss of effectiveness of such fourth section. The decisions rendered on the individual claims which were favorable to the subsidiaries Oxiteno Nordeste and EMCA are final and unappealable. The collective labor dispute remains pending trial by STF. In 2010, some companies in the Camaçari Petrochemical Complex signed an agreement with Sindiquímica and reported the fact in the collective labor dispute. In October 2015, Sindiquímica filed enforcement lawsuits against all Camaçari Petrochemical Complex companies that have not yet made settlements, including Oxiteno Nordeste and EMCA.

## 31. Risks and Financial Instruments (Consolidated)

**Risk Management and Financial Instruments - Governance**

Operational/strategic risks (including, but not limited to, demand behavior, competition, technological innovation, and material changes in the industry structure) are addressed by the Company's management model. These risks are managed through control policies, specific strategies, and the establishment of limits.

The Company has a conservative policy for the management of resources, financial instruments, and risks approved by its Board of Directors ("Policy"). In accordance with the Policy, the main objectives of financial management are to preserve the value and liquidity of financial assets and ensure financial resources for the development of the business, including expansions. The main financial risks considered in the Policy are risks associated with currencies, interest rates, credit, and selection of financial instruments. Governance of the management of financial risks and financial instruments follows the segregation of duties below:

- Implementation of the management of financial assets, instruments, and risks is the responsibility of the financial area, through its treasury department, with the assistance of the tax and accounting departments.
- Supervision and monitoring of compliance with the principles, guidelines, and standards of the Policy is the responsibility of the Risk and Investment Committee, which is composed of members of the Company's Executive Board ("Committee"). The Committee holds regular meetings and is in charge, among other responsibilities, of discussing and monitoring the financial strategies, existing exposures, and significant transactions involving investment, fundraising, or risk mitigation. The Committee monitors the risk standards established by the Policy through a monitoring map on a monthly basis.
- Changes in the Policy or revisions of its standards are subject to the approval of the Board of Directors of Ultrapar.
- Continuous improvement of the Policy is the joint responsibility of the Board of Directors, the Committee, and the financial area.
- The internal audit department audits the compliance with the requirements of the Policy.

**Currency Risk**

Most transactions of the Company and its subsidiaries are located in Brazil and, therefore, the reference currency for risk management is the Brazilian Real. Currency risk management is guided by neutrality of currency exposures and considers the transactional, accounting, and operational risks of the Company and its subsidiaries and their exposure to changes in exchange rates. The Company considers as its main currency exposures the assets and liabilities in foreign currency and the short-term flow of net sales in foreign currency of Oxiteno.

The Company and its subsidiaries use exchange rate hedging instruments (especially between the Brazilian Real and the U.S. dollar) available in the financial market to protect their assets, liabilities, receipts, and disbursements in foreign currency and net investments in foreign operations. Hedge is used in order to reduce the effects of changes in exchange rates on the Company´s income and cash flows in Brazilian Reais within the exposure limits under its Policy. Such foreign exchange hedging instruments have amounts, periods, and rates substantially equivalent to those of assets, liabilities, receipts, and disbursements in foreign currencies to which they are related. Assets and liabilities in foreign currencies are stated below, translated into Brazilian Reais:

**Assets and Liabilities in Foreign Currencies**

| In millions of Brazilian Reais | **06/30/2017** | **12/31/2016** |

| Foreign trade receivables, net of allowance for doubtful accounts and advances to foreign customers | 186.0 | 323.4 |
| Net investments in foreign subsidiaries (except cash, cash equivalents, financial investments, trade receivables, financing, and payables) | 723.3 | 600.9 |

**Sensitivity Analysis of Assets and Liabilities in Foreign Currency**

The table below shows the effect of exchange rate changes in different scenarios, based on the net liability position of R$ 1,420.3 million in foreign currency:

| In millions of Brazilian Reais | **Risk** | **Scenario I** | **Scenario II** | **Scenario III** |
|---|---|---|---|---|
| | | **10%** | **25%** | **50%** |
| (1) Income statement effect | Real devaluation | (0.0) | (0.1) | (0.2) |

| **(3) + (4)** | **Net effect** | 142.0 | 355.1 | 710.2 |

The shareholders' equity effect refers to cumulative translation adjustments of changes in the exchange rate on equity of foreign subsidiaries (see Notes 2.r and 23.f - Cumulative Translation Adjustments), net investments hedge in foreign entities, cash flow hedge of firm commitment and highly probable transaction (see Note 2.c and Hedge Accounting below).

**Interest Rate Risk**

The Company and its subsidiaries adopt conservative policies for borrowing and investing financial resources and for capital cost minimization. The financial investments of the Company and its subsidiaries are primarily held in transactions linked to the CDI, as set forth in Note 4. Borrowings primarily relate to financing from Banco do Brasil, BNDES, and other development agencies, as well as debentures and borrowings in foreign currency, as shown in Note 14.

The Company attempts to maintain its financial interest assets and liabilities at floating rates.

The table below shows the financial assets and liabilities exposed to floating interest rates:

**Credit Risks**

The financial instruments that would expose the Company and its subsidiaries to credit risks of the counterparty are basically represented by cash and bank deposits, financial investments, hedging instruments, and trade receivables.

Credit risk of financial institutions - Such risk results from the inability of financial institutions to comply with their financial obligations to the Company and its subsidiaries due to insolvency. The Company and its subsidiaries regularly conduct a credit review of the institutions with which they hold cash and cash equivalents, financial investments, and hedging instruments through various methodologies that assess liquidity, solvency, leverage, portfolio quality, etc. Cash and cash equivalents, financial investments, and hedging instruments are held only with institutions with a solid credit history, chosen for safety and soundness. The volume of cash and cash equivalents, financial investments, and hedging instruments are subject to maximum limits by each institution and, therefore, require diversification of counterparties.

Government credit risk - The Company's policy allows investments in government securities from countries classified as investment grade AAA or Aaa by specialized credit rating agencies and in Brazilian government bonds. The volume of such financial investments is subject to maximum limits by each country and, therefore, requires diversification of counterparties.

Customer credit risk - Such risks are managed by each business unit through specific criteria for acceptance of customers and their credit rating and are additionally mitigated by the diversification of sales. No single customer or group accounts for more than 10% of total revenue.

The Company maintained the following allowances for doubtful accounts on trade receivables:

| | 06/30/2017 | 12/31/2016 |
|---|---|---|
| Ipiranga | 211,207 | 182,252 |
| Ultragaz | 38,962 | 33,804 |
| Oxiteno | 10,422 | 10,856 |
| Extrafarma | 4,420 | 3,449 |
| Ultracargo | 2,205 | 2,971 |
| Total | 267,216 | 233,332 |

**Liquidity Risk**

The Company and its subsidiaries' main sources of liquidity derive from (i) cash, cash equivalents, and financial investments, (ii) cash generated from operations and (iii) financing. The Company and its subsidiaries believe that these sources are sufficient to satisfy their current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt, and payment of dividends.

The Company and its subsidiaries periodically examine opportunities for acquisitions and investments. They consider different types of investments, either directly, through joint ventures, or through associated companies, and finance such investments using cash generated from operations, debt financing, through capital increases, or through a combination of these methods.

The Company and its subsidiaries believe to have enough working capital and sources of financing to satisfy their current needs. The gross indebtedness due over the next twelve months totals R$ 3,676.5 million, including estimated interests on loans (for quantitative information, see Note 14). Furthermore, the investment plan for 2017 totals R$ 2,174 million, and until June 30, 2017 the amount of R$ 969 million had been realized. As of June 30, 2017, the Company and its subsidiaries had R$ 6,124.4 million in cash, cash equivalents, and short-term financial investments (for quantitative information, see Note 4).

The table below presents a summary of financial liabilities as of June 30, 2017 to be settled by the Company and its subsidiaries, listed by maturity. The amounts disclosed in this table are the contractual undiscounted cash outflows, and, therefore, these amounts may be different from the amounts disclosed on the balance sheet as of June 30, 2017.

[(1)] To calculate the estimated interest on loans some macroeconomic assumptions were used, including averaging for the period the following: (i) CDI of 9.6%, (ii) exchange rate of the Real against the U.S. dollar of R$ 3.36 in 2017, R$ 3.51 in 2018, R$ 3.74 in 2019, R$ 4.00 in 2020 and R$ 4.28 in 2021, R$ 4.54 in 2022, R$ 4.78 in 2023, R$ 5.05 in 2024, R$ 5.33 in 2025 and R$ 5.62 in 2026 (iii) TJLP of 7.0% p.a. and (iv) IGP-M of 4.4% in 2017, 4.4% in 2018, 4.5% from 2019 to 2031 (v) IPCA of 4.5% (source:B3, Bulletin Focus and financial institutions).

[(2)] Includes estimated interest payments on short-term and long-term loans until the payment date.

[(3)] The currency and interest rate hedging instruments were estimated based on projected U.S dollar futures contracts and the futures curves of DI x Pre and Pre x IPCA contracts quoted on B3 on June 30, 2017 and on the futures curve of LIBOR (ICE - IntercontinentalExchange) on June 30, 2017. In the table above, only the hedging instruments with negative results at the time of settlement were considered.

**Capital Management**

The Company manages its capital structure based on indicators and benchmarks. The key performance indicators related to the capital structure management are the weighted average cost of capital, net debt / EBITDA, interest coverage, and indebtedness / equity ratios. Net debt is composed of cash, cash equivalents, and financial investments (see Note 4) and loans, including debentures (see Note 14). The Company can change its capital structure depending on the economic and financial conditions, in order to optimize its financial leverage and capital management. The Company seeks to improve its return on invested capital by implementing efficient working capital management and a selective investment program.

**Selection and Use of Financial Instruments**

In selecting financial investments and hedging instruments, an analysis is conducted to estimate rates of return, risks involved, liquidity, calculation methodology for the carrying value and fair value, and a review is conducted of any documentation applicable to the financial instruments. The financial instruments used to manage the financial resources of the Company and its subsidiaries are intended to preserve value and liquidity.

The Policy contemplates the use of derivative financial instruments only to cover identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). The risks identified in the Policy are described in the above sections, and are subject to risk management. In accordance with the Policy, the Company and its subsidiaries can use forward contracts, swaps, options, and futures contracts to manage identified risks. Leveraged derivative instruments are not permitted. Because the use of derivative financial instruments is limited to the coverage of identified risks, the Company and its subsidiaries use the term “hedging instruments” to refer to derivative financial instruments.

As mentioned in the section “Risk Management and Financial Instruments – Governance”, the Committee monitors compliance with the risk standards established by the Policy through a risk map, including the use of hedging instruments, on a monthly basis. In addition, the internal audit department verifies the compliance with the requirements of the Policy.

The table below summarizes the position of hedging instruments entered into by the Company and its subsidiaries:

(1) In million. Currency as indicated.

All transactions mentioned above were properly registered with CETIP S.A.

Hedging instruments existing as of June 30, 2017 are described below, according to their category, risk, and hedging strategy:

a - Hedging against foreign exchange exposure of liabilities in foreign currency - The purpose of these contracts is (i) to offset the effect of the change in exchange rates of debts or firm commitments in U.S. dollars by converting them into debts or firm commitments in Brazilian Reais linked to CDI, (ii) firm commitments in U.S. dollars, changing them into debts or firm commitments in Reais indexed to the CDI and (iii) change a financial investment linked to the CDI and given as a guarantee to a loan in the U.S. dollar into a financial investment linked to the U.S. dollar. As of June 30, 2017, the Company and its subsidiaries had outstanding swap contracts totaling US$ 1,411.8 million in notional amount with a liability position, on average of 85.1% of CDI, of which US$ 228.8 million, had an asset position at US$ + 1.14% p.a., US$ 450.0 million had an asset position at US$ + LIBOR + 1.06% p.a. and US$ 733.0 million in interest rate swap with an asset position at US$ + 5.65% p.a. This amount includes US$ 470.0 million related to the fair value of hedging instruments of Ipiranga's debt (see Notes 14.c and "hedge accounting" below) and US$ 119.5 million related to hedging instruments of cash flow of firm commitment (see "hedge accounting" below).

b - Hedging against foreign exchange exposure of operations - The purpose of these contracts is to make the exchange rate of the revenues of subsidiaries Oleoquímica, Oxiteno S.A. and Oxiteno Nordeste equal to the exchange rate of the cost of their main raw materials during their operating cycles. As of June 30, 2017, these swap contracts totaled US$ 8.1 million and, on average, had an asset position at 70.9% of CDI and a liability position at US$ + 0.0% p.a.

As of June 30, 2017 this swap contract totaled R$ 352.4 million of notional amount, corresponding to the principal amount of the debt and had an asset position at 4.68% p.a. + IPCA and a liability position at 93.9% of CDI.

**Hedge Accounting**

The Company and its subsidiaries use derivative and non-derivative financial instruments for hedging purposes and test, throughout the duration of the hedge, their effectiveness, as well as the changes in their fair value.

Fair value hedge

The Company and its subsidiaries designate as fair value hedges certain financial instruments used to offset the variations in interest and exchange rates, which are based on the market value of financing contracted in Brazilian Reais and U.S. dollars.

On June 30, 2017, the notional amount of foreign exchange hedging instruments designated as fair value hedge totaled US$ 470.0 million. As of June 30, 2017, a loss of R$ 68.8 million related to the result of hedging instruments, a gain of R$ 12.2 million related to the fair value adjustment of debt, and a loss of R$ 21.3 million related to the financial expense of the debt were recognized in the income statements, transforming the average effective cost of the operation into 103.0% of CDI (see Note 14.c.1).

On June 30, 2017, the notional amount of interest rate hedging instruments designated as fair value hedges totaled R$ 352.4 million. As of June 30, 2017, a loss of R$ 4.2 million related to the result of hedging instruments, a gain of R$ 15.3 million related to the fair value adjustment of debt, and a loss of R$ 3.6 million related to the financial expense of the debt were recognized in the income statements, transforming the average effective cost of the operations into 93.9% of CDI.

Cash flow hedge

The Company and its subsidiaries designate, as cash flow hedge of firm commitment and highly probable transactions, derivative financial instruments to hedge "firm commitments" and non-derivative financial instruments to hedge "highly probable future transactions", to hedge against fluctuations arising from changes in exchange rate.

On June 30, 2017, the notional amount of exchange rate hedging instruments of firm commitments designated as cash flow hedges totaled US$ 119.5 million, and a loss of R$ 32.2 million was recognized in the income statement. On June 30, 2017, the unrealized gain of “Other comprehensive income” is R$ 4.2 million (loss of R$ 13.8 million on December 31, 2016), net of deferred income and social contribution taxes.

On June 30, 2017, the unrealized loss of “Other comprehensive income” is R$ 30.5 million (loss of R$ 12.1 million on December 31, 2016), net of deferred income and social contribution taxes.

Net investment hedge in foreign entities

The Company and its subsidiaries designate, as net investment hedge in foreign entities, notes in the foreign market, for hedging net investment in foreign entities, to offset changes in exchange rates.

On June 30, 2017, the balance of foreign exchange hedging instruments designated as net investments hedge in foreign entities, related to part of the investments made in entities which functional currency is other than the Brazilian Real, totaled US$ 133.0 million. On June 30, 2017, the unrealized loss of "Other comprehensive income" is R$ 7.1 million (loss of R$ 2.8 million on December 31, 2016), net of deferred income and social contribution taxes. The fair value of financial instruments, including currency and interest hedging instruments, was determined as follows:

- The fair value of cash and bank deposit balances are identical to their carrying values.
- Financial investments in investment funds are valued at the value of the fund unit as of the date of the interim financial information, which corresponds to their fair value.
- Financial investments in CDBs (Bank Certificates of Deposit) and similar investments offer daily liquidity through repurchase at the "yield curve" and, therefore, the Company believes their fair value corresponds to their carrying value.
- The subscription warrants – indemnification were measured based on the share price of Ultrapar (UGPA3) at the interim financial information date and are adjusted to the Company's dividend yield, since the exercise is only possible starting in 2020 onwards and they are not entitled to dividends until then. The number of shares of subscription warrants – indemnification is also adjusted according to the changes in the amounts of provision for tax, civil, and labor risks and contingent liabilities related to the period prior to January 31, 2014. (See Note 22).
- The fair value calculation of notes in the foreign market (see Note 14.b) is based on the quoted price in an active market.

The fair value of other financial investments and financing was determined using calculation methodologies commonly used for mark-to-market reporting, which consist of calculating future cash flows associated with each instrument adopted and adjusting them to present value at the market rates as of June 30, 2017 and December 31,2016. For some cases where there is no active market for the financial instrument, the Company and its subsidiaries can use quotes provided by the transaction counterparties.

The interpretation of market information on the choice of calculation methodologies for the fair value requires considerable judgment and estimates to obtain a value deemed appropriate to each situation. Consequently, the estimates presented do not necessary indicate the amounts that may be realizable in the current market.

Financial instruments were classified as loans and receivables or financial liabilities measured at amortized cost, except (i) all exchange rate and interest rate hedging instruments, which are measured at fair value through profit or loss, (ii) financial investments classified as measured at fair value through profit or loss, (iii) financial investments that are classified as available for sale, which are measured at fair value through other comprehensive income (see Note 4), (iv) loans and financing measured at fair value through profit or loss (see Note 14), (v) guarantees to customers that have vendor arrangements (see Note 14.k), which are measured at fair value through profit or loss, and (vi) subscription warrants – indemnification, which are measured at fair value through profit or loss (see Note 22). The financial investments classified as held-to-maturity are measured at amortized cost. Cash, banks, and trade receivables are classified as loans and receivables. Trade payables and other payables are classified as financial liabilities measured at amortized cost.

**Fair Value Hierarchy of Financial Instruments**

The financial instruments are classified in the following categories:

(a) Level 1 - prices negotiated (without adjustment) in active markets for identical assets or liabilities;

(b) Level 2 - inputs other than prices negotiated in active markets included in Level 1 and observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

(c) Level 3 - inputs for the asset or liability which are not based on observable market variables (unobservable inputs).

The table below shows a summary of the financial assets and financial liabilities measured at fair value in the Company's and its subsidiaries:

**Sensitivity Analysis**

The Company and its subsidiaries use derivative financial instruments only to hedge against identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). Thus, for purposes of sensitivity analysis of market risks associated with financial instruments, as required by CVM Instruction 475/08, the Company analyzes the hedging instrument and the hedged item together, as shown on the charts below.

For the sensitivity analysis of foreign exchange hedging instruments, management adopted as a likely scenario the Real/U.S. dollar exchange rates at maturity of each swap, projected by U.S dollar futures contracts quoted on B3 as of June 30, 2017. As a reference, the exchange rate for the last maturity of foreign exchange hedging instruments is R$ 5.69 in the likely scenario. Scenarios II and III were estimated with a 25% and 50% additional appreciation or depreciation of the Brazilian Real against the likely scenario, according to the risk to which the hedged item is exposed.

Based on the balances of the hedging instruments and hedged items as of June 30, 2017, the exchange rates were replaced, and the changes between the new balance in Brazilian Reais and the original balance in Brazilian Reais as of June 30, 2017 were calculated in each of the three scenarios. The table below shows the change in the values of the main derivative instruments and their hedged items, considering the changes in the exchange rate in the different scenarios:

| | Risk | Scenario I (likely) | Scenario II | Scenario III |
|---|---|---|---|---|
| **Currency swaps receivable in U.S. dollars** | | | | |
| (1) U.S. Dollar / Real swaps | Dollar | 274,764 | 914,250 | 1,553,736 |
| (2) Debts/firm commitments in dollars | appreciation | (274,722) | (914,164) | (1,553,606) |
| **(1)+(2)** | **Net effect** | 42 | 86 | 130 |
| | | | | |
| **Currency swaps payable in U.S. dollars** | | | | |
| (3) Real / U.S. Dollar swaps | Dollar | (219) | 6,552 | 13,322 |
| (4) Gross margin of Oxiteno | devaluation | 219 | (6,552) | (13,322) |
| **(3)+(4)** | **Net effect** | - | - | - |

For sensitivity analysis of hedging instruments for interest rates in Brazilian Reais, the Company used the futures curve of the DI x Pre contract quoted on B3 as of June 30, 2017 for each of the swap and debt (hedged item) maturities, to determine the likely scenarios. Scenarios II and III were estimated based on a 25% and 50% deterioration, respectively, of the likely scenario pre-fixed interest rate.

Based on the three scenarios of interest rates in Brazilian Reais, the Company estimated the values of its debt and hedging instruments according to the risk which is being hedged (variations in the pre-fixed interest rates in Brazilian Reais), by projecting them to future value at the contracted rates and bringing them to present value at the interest rates of the estimated scenarios. The result are shown in the table below:

| | Risk | Scenario I (likely) | Scenario II | Scenario III |
|---|---|---|---|---|
| **Interest rate swap (in Brazilian Reais) – Debentures - CRA** | | | | |
| (1) Fixed rate swap - CDI | Decrease in | - | 52,527 | 115,634 |
| (2) Fixed rate debt | Pre-fixed rate | - | (52,527) | (115,634) |
| **(1) + (2)** | Net effect | - | - | - |

## 32. Commitments (Consolidated)

### *a. Contracts*

Subsidiary Tequimar has agreements with CODEBA and Complexo Industrial Portuário Governador Eraldo Gueiros, in connection with its port facilities in Aratu and Suape, respectively. Such agreements establish a minimum cargo movement of products, as shown below:

| Port | Minimum movement in tons per year | Maturity |
|---|---|---|
| Aratu | 900,000 | 2022 |
| Aratu | 397,000 | 2031 |
| Suape | 250,000 | 2027 |
| Suape | 400,000 | 2029 |

If the annual movement is less than the minimum contractual movement, the subsidiary is liable to pay the difference between the effective movement and the minimum contractual movement, based on the port tariff rates in effect on the date established for payment. As of June 30, 2017, these rates were R$ 6.99 per ton for Aratu and R$ 2.90 per ton for Suape. The subsidiary has met the minimum cargo movement required since the beginning of the contractual agreements.

Subsidiary Oxiteno Nordeste has a supply agreement with Braskem S.A. which establishes a minimum annually consumption level of ethylene, and conditions for the supply of ethylene until 2021. The minimum purchase commitment clause provided for a minimum annual consumption of 205 thousand tons in 2017. Should the minimum purchase commitment not be met, the subsidiary would be liable for a fine based on the current ethylene price for the quantity not purchased. According to contractual conditions and tolerances, there are no material issues regarding the minimum purchase commitment.

Subsidiary Oxiteno S.A. has a supply agreement with Braskem S.A., valid until 2023, which establishes and regulates the conditions for supply of ethylene to Oxiteno based on the international market for this product. The minimum purchase is 22,050 tons of ethylene semiannually. Should the minimum purchase commitment not be met, the subsidiary would be liable for a fine based on the current ethylene price for the quantity not purchased. According to contractual conditions and tolerances, there are no material issues regarding the minimum purchase commitment.

In April 2015, a fire occurred in six ethanol and gasoline tanks operated by Ultracargo in Santos, which represented 4% of the subsidiary's overall capacity as of December 31, 2014. The Civil and Federal Police investigated the accident and its impacts, and concluded that it is not possible to determine the cause of the accident and neither to individualize active or passive conduct related to the cause, and there was no criminal charge against either individual or the subsidiary, by both authorities.

The decommissioning stage of the affected area were completed. In June 2017, the licensing required for the return to operation of 67.5 thousands cubic meters from the total of 150 thousands cubic meters affected by the fire was obtained.
