HIGHLIGHTS BY BUSINESS LINE

¹Includes operations in Brazil only

Fleet Management and Outsourcing (GTF)

Net Revenue of R\$816 million, up 46.2% vs. 2Q23;

EBITDA of R\$620 million, up 50.6% vs. 2Q23;

EBITDA margin of 76.0%, up 2.2 p.p. vs. 2Q23; and

Total fleet of 138,000 cars in GTF, up 5.3% vs. 4Q23.

More predictable and stable results with 61% of the Company's gross fixed assets on GTF compared to 56% in 2023.

Rent-a-Car (RAC)¹

RAC: Evolution in the restructuring of daily rates and yields

Net Revenue of R\$749 million, up 15.8% vs. 2Q23;

EBITDA of R\$484 million, up 31.0% vs. 2Q23;

EBITDA margin of 64.7%, up 7.5 p.p. vs. 2Q23;

Total fleet of 103 thousand cars in the RAC, down 4.1% vs. 4Q23;

Yield of 4.0% p.m. establishes a higher price level, which will be reflected in the results of the coming quarters.

Used Cars

Productivity gains in Used Cars

Net revenue of R\$1.8 billion, an increase of 46.7% vs. 2Q23;

28.0 thousand cars sold, up 48.6% vs. 2Q23;

EBITDA margin of 1.4% shows the right level of depreciation and that results are normalizing;

Pricing evolution vs. FIPE table with higher productivity per store, 41 cars sold at retail/month per store in 2Q24, an increase of 46% vs. 2023.

MESSAGE FROM MANAGEMENT

We are **very encouraged** by the **results achieved in 2Q24, with record revenues, EBITDA and operating margins**. We **would like to thank** our **Customers, Suppliers, Shareholders** and particularly our **People, over 6,000 employees** who, with **dedication and determination**, are responsible for these **achievements and for many more to come in future quarters**.

In 2Q24, **adjusted net profit** was **R\$80 million**, reversing last year's loss. **Annualized ROIC** was **11.7%**, up **3.7 p.p.** over 2023 and **3.3 p.p. higher than the Company's average cost of debt**. These results, combined with a **new level of operational efficiency**, demonstrate a significant **shift from 2023** and a **new cycle of value creation for shareholders**.

We ended the quarter with a total fleet of **246,000 cars** and **net revenue of R\$3.4 billion**, up **39%** from 2Q23. We continue to grow and recorded **EBITDA of R\$1.1 billion in 2Q24**, an increase of 29% over the same period last year. **Rental results improved even more**, with net revenue of **R\$1.6 billion, up 30%** over 2Q23, and **EBITDA of R\$1.1 billion, up 42%** over the same period, while our operating fleet grew by only 14%. This shows the **strength of efficiency gains** and the optimization of profit **generation in relation to the capital invested**. Rental EBIT increased even more, by **54%** compared to last year and reached **R\$648 million in 2Q24, increasing profitability levels**. It is also important to note the evolution compared to 1Q24, which, despite being a seasonally stronger quarter, had **all its financial metrics surpassed by the 2Q24 performance**.

As a demonstration of our **commitment to creating value** for our shareholders, we made continuous progress **in all of our operational indicators** and we remain focused on executing our **strategic plans** for the year, with the following as priority work fronts: i) **repricing of the RAC daily rates**; ii) **maximization of productivity** in the **Used Car** segment; and Iii) higher predictability and stability of results by **increasing the share of the GTF segment**. **Even before the end of the first half of the year, we achieved** the targets set for Used Cars and GTF. In RAC, our yield increased from 3.5% p.m. in 2Q23 to 4.0% p.m. in 2Q24. With the repricing actions underway, we are **confident that we will achieve the 4.2% p.m. yield guidance for the year**.

We would like to highlight the results in Fleet Management and Outsourcing (**GTF**) with significant growth in new contracts, demonstrating the continuing trend of **strong market demand**. We ended 2Q24 with **138,000 cars in the total fleet**, up **21%** over 2Q23. The **contracts** represent a backlog of future revenue of R\$6.4 billion, and at the end of the quarter we had more than **15,000 cars to deploy**, which will contribute to better results in the coming quarters. Average monthly revenue per car was R\$2,582 in 2Q24, an increase of more than 22% compared to 2Q23, reflecting **discipline in pricing** and the **winning of new contracts** in the segment.

GTF **net revenue** was **R\$816 million** in 2Q24 (+46.2% vs. 2Q23) with **EBITDA of R\$620 million** (+50.6% vs. 2Q23), resulting in an expansion in **EBITDA margin** from 73.8% to **76.0%** in the same period. GTF EBIT **represented 54% of the consolidated rental EBIT result** in 2Q24 and we expect to **increase the proportion of long-term products**, bringing more **predictability and resilience** to consolidated results, which will be enhanced by the **new price pass-through movements** we implemented in 2Q24.

In 2Q24, we implemented a number of measures **to improve operational efficiency** and **RAC profitability**. Considering only the results of the operations in Brazil, **net revenue** in 2Q24 was **R\$748.5 million, up 15.8% compared to 2Q23**. **EBITDA** reached **R\$484.1 million**, with growth of **31.0%** over the same period and a **record EBITDA margin of 64.7%**. The **total RAC fleet** was 103,000 cars and we maintained discipline in fleet management with a **reduction of 4,400 cars** compared to 4Q23, after the end of the high seasonality.

We continued the **repricing** process and recorded an **increase of 8% in the monthly tariff and 13% in the occasional tariff**, which together resulted in an **increase of 9%** in the consolidated tariff vs. 2Q23. This evolution establishes a new price level that reached an **average daily rate of R\$135** in 2Q24 (**R\$138 in June**), generating an **extremely healthy** level of operating margin. Sustaining this performance in monthly and occasional products **will boost results even more in the coming quarters**, with **stronger seasonality** and increasing the proportion of higher-rate products. As a result, we recorded an **important advance in profitability**, demonstrated by the growth in yield from 3.5% in 2Q23 to 4.0% in 2Q24.

In **Used Cars**, we achieved another **record volume of 28,000 cars sold** in the quarter, with a monthly average of 41 cars sold per store (compared to 28 in 2023), generating **net revenue of R\$1.8 billion in 2Q24**. The **EBITDA margin** was **1.4%** in 2Q24, also demonstrating the resilience of the residual value of our cars. In 2Q24, we continued the sequential reduction of the **discount** against the **FIPE table** in the sale of used cars, with **5.1% at retail** (6.3% in 2023) and **15.3% at wholesale** (17.5% in 2023), already exceeding the levels of **our strategic planning guidance** for 2024.

The **depreciation rate** of our fleet is starting to show more **normalized levels**, with an annualized value per car of R\$6,407 in RAC due to the improvement of the fleet mix; and R\$8,898 in GTF, reflecting the renewal of the fleet through the sale of cars around 3 years old. We believe that these levels bring **stability to the margins** and allow a **better reading** of the **profitability** of the business.

Annualized ROIC for 2Q24 was 11.7%, an **increase of 3.7 p.p.** compared to ROIC in 2023, and **3.3 p.p. higher than the cost of debt**. We continued our debt management agenda in 2Q24 with the **issue of a US\$500 million** (R\$2.5 billion) **bond in the foreign market** and financial initiatives that **amounted to R\$5 billion** until now, extending the duration of our debts and reducing financial expenses (new funding at CDI+2.3% p.a. with prepayment of debts at CDI+2.8% p.a. on average). Thus, we continue to focus on establishing a **new level of financing costs**, which reached **the lowest level ever recorded** by the Company in 2Q24 at an average of **CDI+2.1% p.a.**, contributing to value creation by **widening the spread in relation to our returns (ROIC)**.

We ended 2Q24 with a **robust cash position of R\$3.7 billion**, which puts us in a comfortable position to continue executing our strategic plan. Leverage ended the quarter stable at **3.2x net debt/EBITDA**, a level that we consider healthy given the current scenario - if we annualize 2Q24 EBITDA, **leverage ratio would be 2.8x**.

These indicators give us the **confidence** to continue to work with great **discipline on the implementation of** our strategic plans and to focus on the further development of operational excellence, while **extracting the maximum value from our assets and promoting the creation of adequate value** for our shareholders and the satisfaction of our customers in an equation that guarantees the sustainable and perennial development of our business.

I would like to thank our **employees for their achievements and for all that we will continue to build together**. To our **shareholders, suppliers and customers, thank you very much for your trust**.

1. Strategic Priorities 2024

Rent-a-Car (RAC) - Start of repricing of daily rates and yields

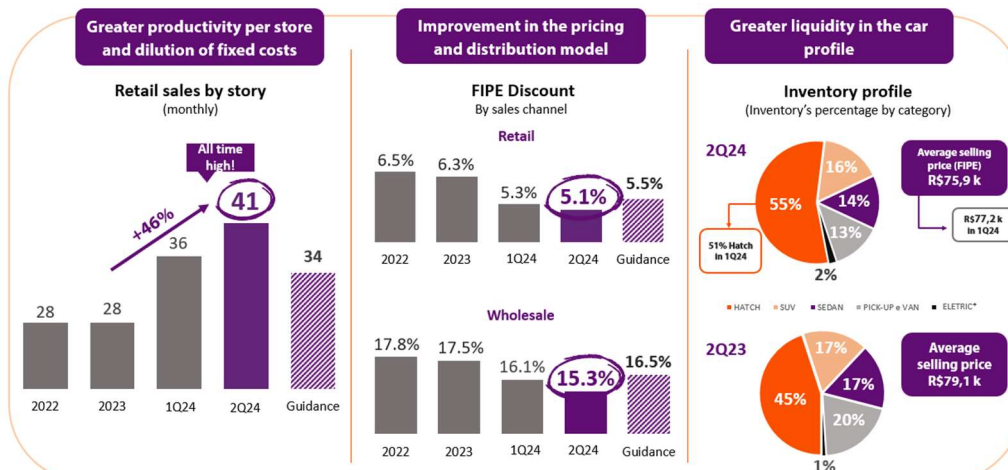

- As the **main strategy to improve the segment's profitability**, the company is focused on **recovering the daily rate (yield)** and believes it is possible to increase the **average monthly yield of the RAC operating fleet to 4.2% per month** by 2024, having already reached **4.0% per month** in 2Q24.

¹ Indicators take into account the average purchase ticket of the average operating fleet. NOTE: Guidance for 2024 as disclosed by the Company in a Material Fact dated April 12, 2024.

Used Cars - Productivity gains

- With a focus on **maximizing used car productivity** and **increasing margins**, the Company believes it is possible to:
 - Increase **used car retail sales** to an average of **34 cars per store per month**, which would represent an increase of 21% over the 2023 average. The Company has already achieved **41 cars** per store in 2Q24; and
 - Reduce the **discount against the FIPE table** for used car sales to **5.5% at retail and 16.5% at wholesale** in 2024. The Company has already achieved **5.1% at retail and 15.3% at wholesale** in 2Q24.

* We have 249 electric cars in stock and 49 electric cars in the Company's operating fleet. NOTE: Guidance for 2024 as disclosed by the Company in a Material Fact dated April 12, 2024.

Fleet Management and Outsourcing (GTF) - Prioritizing capital allocation

In order to increase the **predictability and stability of results** and to improve the Company's **consolidated profitability**, Movida believes it is possible to increase the **share of the GTF segment to 60%** of invested capital by the end of 2024, prioritizing the allocation of capital in this segment. The Company has already achieved **61%** in 2Q24.

¹ Excludes operations in Portugal. NOTE: Guidance for 2024 as disclosed by the Company in a Material Fact dated April 12, 2024.

2. Movida Consolidated

In 2Q24, net revenue grew 38.6% vs. the same period last year, to R\$3.436 billion, mainly due to the net addition of the fleet and the expansion of average tickets for Fleet Management and Outsourcing (GTF) and Rent-A-Car (RAC) contracts. In 1H24, revenue grew by 24.6% compared to 1H23, totaling R\$6.457 billion. Revenue grew at a higher rate than the average operating fleet during the period, as a result of the Company's value creation strategy.

The following chart shows the evolution of Movida's consolidated EBITDA, of R\$1.149 billion in 2Q24, an increase of 29.2% over the same period last year. Rental EBITDA (GTF+RAC) increased by 41.8% compared to 2Q23, which is the main indicator of the sustainability of the Company's operating results.

Rental EBITDA margin, calculated as Rental EBITDA divided by Net Rental Revenue was 69.9% in 2Q24, an increase of 5.6 p.p. compared to the same period last year. In 1H24, EBITDA increased by 25.1% compared to 1H23, totaling R\$ 2.209 billion, with a 5.1 p.p. increase in the margin.

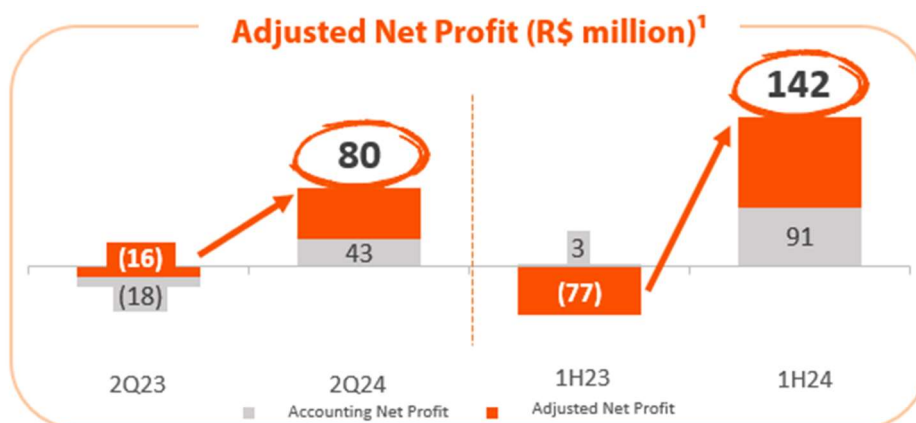

The following chart shows the evolution of the EBITDA margin in rental activities since 2016. In 2Q24, the Company achieved a new record operating result since the IPO. This level of margins confirms the effectiveness of the measures taken to improve efficiency and reflects a significant improvement in the use of invested capital, as well as the cost and expense reduction measures implemented over the past year.

In 2Q24, EBIT amounted to R\$654 million, an increase of 30.6% over the same period last year. Considering only the rental EBIT (GTF+RAC), the increase was 53.8%. In 1H24, the increase was 28.3% compared to 1H23, for a total consolidated EBIT of R\$1.266 billion.

Adjusted net income was R\$80 million in 2Q24 and R\$142 million in 1H24, as well as accounting net income of R\$43 million in the current quarter and R\$91 million in the half-year. The reversal of losses to profits in the comparable periods demonstrates the effectiveness of the measures taken in the first half of the year, with a positive impact on results.

¹Net profit adjusted by: a) In 2Q24, excludes the negative effects after tax: i) R\$20 million from the impact of the climate disaster in Rio Grande do Sul; ii) R\$15 million after the expiration of the swap contracts related to the foreign bond operation, which are being recognized in the results on a monthly basis until the expiration of the bond contract. The cash effect of this operation took place in Nov/23, and the recognition in the income statement of this amount, recorded in "other comprehensive income" in shareholders' equity, is included in financial expenses; iii) R\$ 3 million from the prepayment and repurchase of debt securities; and b) in 2Q23, it excludes the negative net effect of the bond repurchase operations on the financial expenses of the period (R\$ 2 million after tax).

²EBIT adjusted by the negative effect of R\$27 mm from the impact of the climate disaster in Rio Grande do Sul.

The increased productivity and efficiency of the assets has boosted revenue growth to a much higher rate than the number of cars in the fleet, as evidenced by the 20% growth in rental revenue compared to a 1% increase in the total fleet in YTD 2024 (2Q24 vs 4Q23).

NOTE: Includes Portugal's operating fleet.

3. Fleet Management and Outsourcing (GTF)

B2B GTF, CS Frotas and Subscription Cars

a. Operational data

In 2Q24, the total fleet grew by 21.1% compared to 2Q23, reaching 138,000 cars and representing 56% of the Company's total fleet.

The acceleration in subscriptions and the new average ticket for long-term contracts generated future contracted revenues in GTF (backlog) of R\$ 6.4 billion, up 92.2% year-on-year, ensuring growth and more stability for the coming quarters. Car Deployment increased by 39% from 2Q23 to 2Q24, with 3,373 cars for fleet renewal (existing customers) and 12,245 for expansion (new customers and contract expansions).

b. Revenue

In 2Q24, GTF net revenue amounted to R\$816 million, up 46.2% over the same period last year. This business unit's share expanded to 51% of total net rental revenue in 2Q24, in line with the Company's strategy of allocation in GTF. On a six-month comparison, net revenue grew by 40.1%, reaching R\$1.5 billion in 1H24. As for the average operating fleet, there was a growth of 17.7% from 2Q23 to 2Q24, and 16.4% from 1H23 to 1H24, reinforcing the greater efficiency of the strategy.

Revenue per car in the quarter grew by 22.4% compared to the same period in 2023, reaching an average of R\$2,582 per month in 2Q24 due to the change in yields and fleet renewal. On a six-month comparison, revenue per car grew by 19.6%.

c. Operating Results

EBITDA was R\$620 million in 2Q24, an increase of 50.6% over 2Q23, with a margin of 76.0%, up 2.2 p.p. on 2Q23.

EBITDA per car grew by 28.0% in 2Q24 compared to 2Q23, a monthly average of R\$1,744, reflecting the segment's pricing and operational scale. In 1H24, the indicator grew by 28.4% compared to 1H23, reaching a monthly average of R\$1,666 in EBITDA per car in operation.

EBIT reached R\$ 350 million in 2Q24, up 24.0% over the same period last year. On a six-month comparison, the growth was 23.6%.

4. Rent-a-Car (RAC)

a. Operational Data

The occupancy rate, as measured by the rented fleet as a percentage of the average operating fleet, amounted to 78.1% in the second quarter and 79.2% in the first half of the year. The Company emphasizes that the high level of occupancy, combined with price increases, demonstrates efficiency gains and maximization of asset utilization. The share of monthly products in RAC in daily volume also increased from 62% in 2Q23 to 65% in 2Q24, bringing more stability to occupancy and demand.

The average daily rate in 2Q24 was R\$135, an increase of 9.1% compared to the same period last year (excluding Portugal). The pass-through of 13% in the occasional tariff and 8% in the monthly tariff demonstrates the company's focus on price recovery. On a six-month comparison, the increase was 6.1% in 1H24 compared to 1H23.

Revenue per car was R\$ 3,087 in 2Q24, representing a growth of 6.1% over the same period last year. In addition, the average fleet purchase ticket in the quarter was R\$78,000, down 6.1% from 2Q23. Yield also increased by 0.5 p.p. in 2Q24 compared to 2Q23, marking an important advance in RAC profitability.

¹Yield calculated by dividing the monthly revenue per operating vehicle by the fleet's average RAC purchase price.

b. Revenue (Brazilian operations)

Net revenue amounted to R\$749 million, an increase of 15.8% compared to 2Q23, due to the expansion in average monthly revenue per car and the average operating fleet - which grew slightly less, by 9.2% in the same period. In 1H24, the increase was 12.6% to R\$ 1.5 billion. These figures reflect the Company's scale, occupancy transformation and inter-segment pricing optimization.

c. Operational Result (Brazilian operations)

EBITDA of R\$484 million in 2Q24 was up 31.0% on 2Q23. In 1H24 compared to 1H23, a growth of 21.6%. The EBITDA margin grew by 7.5 p.p. quarter-on-quarter, to 64.7% in 2Q24 - the best margin reported by the company since the IPO.

EBITDA per car grew by 20.0% in 2Q24 compared to 2Q23 to a monthly average of R\$1,792, reflecting the segment's pricing and operational scale. In the quarterly comparison, the increase was 15.9% to R\$1,794 per operating car on a monthly average.

EBIT amounted to R\$297 million in 2Q24, an increase of 124.0% over the previous year, due to the operational progress and the change in depreciation charges in the period. EBIT also more than doubled in 1H24 compared to 1H23, reaching R\$ 590 million.

5. Used Cars

a. Operational Data

In 2Q24, 27,954 cars were sold, a new volume record, representing an increase of 48.6% over the same period 2023. On a six-month comparison, growth was 33.0%, demonstrating the resilience of the segment's installed capacity. 2Q24 also saw the highest level of sales per store ever reported, with an average of 41 cars sold per month at retail. The result shows an increase of 41.4% in the performance of 2Q24 compared to 2Q23, and an increase of 34.5% between 1H23 and 1H24.

b. Revenue

Net revenue was R\$1.8 billion in 2Q24, an increase of 46.7% compared to 2Q23. On a six-month comparison, growth was 23.8%, totaling R\$3.4 billion in 1H24.

c. Operational Result

EBITDA was R\$25 million in 2Q24, demonstrating the strength of the business line both in the quarter and in the half-year comparison. The EBITDA margin was 1.4% in 2Q24, returning to more normalized used car margins.

6. Depreciation

a. RAC depreciation

The annualized depreciation per operating car in 2Q24 reflects the mix of car purchases, with the average purchase price of the fleet being deployed at R\$75.7 thousand per car compared to R\$81.4 thousand per car being retired, thanks to the combination of a lower average ticket and better commercial conditions with OEMs. This resulted in an average depreciation charge of R\$ 6,400 per car per year, with new cars depreciating between 8.0% and 9.0% per year. This is in line with the previous quarter and represents a healthy level of depreciation at RAC.

b. GTF depreciation

The annualized depreciation per operating car in 2Q24 was R\$ 8.9 thousand and is the result of 1) the deployment of cars with an average purchase price of R\$ 95.0 thousand, which were depreciated at an average rate of 9.0% p.a. due to the profile of the new contracts; combined with 2) the retirement of cars with an average purchase price of R\$ 73.0 thousand, which were depreciated at a rate of 3.9% p.a. reflecting the residual value appreciation between 2021 and 2022. The recurring depreciation rates of the new contracts, including the B2B GTF, CS Frotas and Subscription Car operations, are on average between 8.0% and 10.0% per year.

¹Depreciation per operating fleet = depreciation fleet in the quarter * 4 / average operating fleet. ² Takes into account gross fixed assets.

7. Financial Results

Financial result (R\$ million)	2Q24A	1Q24A	Var% QoQ	2Q23A	Var% YoY
Financial result	(547,6)	(518,9)	5,5%	(522,0)	4,9%
Finance income	93,5	91,0	2,7%	56,5	65,5%
Finance expenses	(628,8)	(597,1)	5,3%	(566,2)	11,1%
Interest and charges on leases (IFRS 16)	(12,3)	(12,8)	-4,0%	(12,3)	0,3%

In 2Q24, the adjusted financial result was a net expense of R\$547.6 million, which excludes the non-recurring effects of R\$23.1 million in 2Q24 (as explained below). The result was 5.5% higher than in 1Q24 and 4.9% higher than in 2Q23. The variations were mainly due to:

- i. Gross debt increased by 8.0% over 1Q24 and by 22.2% over 2Q23; and
- ii. The SELIC interest rate decreased from an average CDI of 13.65% p.a. in 2Q23 to an average CDI of 10.51% p.a. in 2Q24.

Below is a description of the non-recurring effects:

a) **Negative effect of R\$19.5 million** in 2Q24 from the expiration of swap contracts, mainly related to the foreign bond operation, which will be recognized in the results on a monthly basis until the expiration of the bond contract. The cash effect of this operation occurred in 2023 and the recognition in the statement of income of this amount, recorded in "Other comprehensive income" in shareholders' equity, is included in financial expenses.

b) **Negative effect of R\$11.5 million** related to the payment of fees and premiums on debentures in 2Q24;

c) **Negative effect of R\$2.1 million** from the sale of sovereign bonds below the bond repurchase value in 2Q24 (R\$23.5 million in 2Q23); and

d) **Positive effect of R\$10.0 million from the repurchase of bonds**, which was settled at amounts below the issue value in 2Q24 (R\$149.1 million in 2Q23).

TOTAL NET	687.6	(121.8)	-664.5%	725.2	-5.2%	1,412.9	(804.1)	-185.5%

In 2Q24, RAC had a negative net CAPEX of R\$77.8 million, reflecting the discipline in allocating capital to reduce the fleet after the period of high seasonality. GTF had positive net CAPEX of R\$765.4 million, as a result of fleet renewals and new contracts implemented during the period.

In 1H24, RAC had negative net CAPEX of R\$156.8 million, while GTF had positive net CAPEX of R\$1569.8 million.

On a consolidated basis, net CAPEX amounted to R\$687.6 million in 2Q24. The average purchase tickets of R\$73.6 thousand in the quarter at RAC and R\$97.5 thousand at GTF represent a decrease of 8.8% and 1.8%, respectively, compared to 2Q23, due to the adjustment of the fleet mix at RAC and an increase in the value of the profile of the vehicles purchased for GTF.

9. Capital Structure

¹Pro forma considers liability management carried out in July 2024

* Net Debt 2Q24 / Annualized 2Q24 EBITDA (*4).

Net debt ended the quarter at R\$ 13.4 billion, with a current cash position of R\$ 3.7 billion. Net Debt/EBITDA ratio (covenant) was 3.2x in 2Q24, maintaining comfortable margins. When annualizing the recurring EBITDA of 2Q24, the leverage would be 2.8x. Following the 2024 financing, the Company has significantly improved its debt maturity schedule by lengthening debt tenures and reducing average costs in line with the value creation strategy, achieving an all-time low of CDI+2.1% p.a. on average in 2Q24, with an average debt maturity of 4.2 years.

10. Returns

The return on invested capital (ROIC) for 2Q24 was 11.7% (+3.7 p.p. vs. 2023). This marks a turning point, as ROIC is now 3.3 p.p. higher than the average cost of debt for the period, which was 8.4%. The indicator for the second quarter of 2024 reflects the right initiatives taken since 2023, which, together with the implementation of the ongoing actions, will make it possible to create sustainable value.

NOTE: Does not annualize the one-time effect of the reversal of the bonus provision in 1Q24 and excludes the one-time effect on the used car margin in 2022. ROIC calculation assumes the effective tax rate accrued in the period.

¹About Net Rental Revenue

²About Net Rental Revenue

Adjusted net profit:

In 2Q24, it excludes the negative effects after tax: i) R\$ 20 million from the impact of the operations in Rio Grande do Sul; ii) R\$ 15 million after the end of the swap contracts, related to the foreign bond operation, which will be recognized monthly in the result until the end of the bond contract. The cash effect of this operation occurred in Nov/23, and the recognition in the income statement of this amount, recorded in "other comprehensive income" in shareholders' equity, is included in financial expenses; iii) R\$ 3 million from the prepayment and repurchase of debt securities.

In 2Q23, it includes the negative net effect of the bond repurchase operations on the financial expense of the period (R\$ 2 million after tax).

1. OPERATIONS

Movida Participações S.A. ("Movida Participações" or the "Parent Company") is a publicly-traded corporation listed under the ticker symbol MOVI3 in the New Market segment of B3 S.A. - (Brasil, Bolsa, Balcão - B3), being the highest corporate governance category in the Brazilian capital market. The Company's registered address is 1017, Renato Paes de Barros Street, 9th floor, São Paulo/SP, Brazil.

Movida Participações and its subsidiaries (hereinafter referred to as "Movida" or the "Group") operate in the light vehicle rental ("rent-a-car" or "RAC"), light vehicle fleet management and outsourcing ("GTF") segments. Movida continuously renews its fleet by selling and replacing its vehicles at or near the end of their economic useful lives.

Movida Participações also owns Movida Europe, a legal entity domiciled abroad, not allocated to a specific segment, which is engaged in raising funds through the issuance of Senior Notes (Bonds).

At June 30, 2024, Movida had 347 company-owned stores, of which 258 were car rental points and 89 were pre-owned car stores (347 company-owned stores, of which 253 were car rental points and 94 were pre-owned car stores at December 31, 2023), distributed across 121 cities in Brazil, on high streets and at airports, operating a fleet of 246,364 vehicles (243,931 vehicles at December 31, 2023 in 121 cities in Brazil).

1.1. Main events in the period ended June 30, 2024

1.1.1. Merger

On December 29, 2023, the Extraordinary General Meeting of Movida Participações approved the merger of its subsidiaries CS Brasil Participações e Locações S.A., Marbor Frotas Corporativas Ltda., YRC Participações Ltda. and Green Yalla Mobility Ltda. and the partial spin-off of Marbor Locadora Ltda., with the merger of the spun-off portion transferred to Movida Participações. The purpose of the merger is to generate administrative streamlining, economic benefits and rationalizing operating costs and activities of the companies. The operations became effective as from January 1, 2024. The accounting balances of the subsidiaries at January 1, 2024 and the balance of the parent company after the merger are shown below:

1.1.2. Effects of severe flooding in the State of Rio Grande do Sul

On April 27, 2024, the government of the State of Rio Grande do Sul declared a state of public calamity following severe floods affecting over 300 municipalities; some of the Company's operations were directly affected because of restriction on mobility, especially vehicle rentals.

Movida assessed the economic effects on its businesses and identified a loss of assets of R\$ 26,963 reflecting the net costs of vehicle recovery and losses in stores. The net vehicle losses totaled R\$ 22,313, following the sales at approximately half of the Fipec table value, reducing the negative impact on the Company's results. Further damage and losses totaling R\$ 4,650 required reconstruction of stores and replacements of furniture and fittings. These amounts were charged as depreciation of other assets.

RAC revenue in the State of Rio Grande do Sul was affected as customers were unable to rent vehicles from some stores and sought alternatives. Movida continued to honor its long-term contracts and lease commitments. Despite a small drop from lost days of sales, the average ticket increased between May and June, providing stability to revenue flows when compared to the prior period.

Analyses of expected losses from customers receivables in the State of Rio Grande do Sul, did not identify significant arrears or need to increase the provision. An analysis of risks and tax, civil or labor contingencies determined that no additional provision was required.

Management concluded that its businesses were not significantly affected and appropriate timely measures were taken to mitigate the impacts of this disaster on its results. Management constantly monitors events that may significantly affect its businesses and its sustainability, in compliance with CVM rules and regulations.

1.1.3. Company's capital structure and Management's plans

Movida's business model consists of the acquisition of vehicles, substantially financed through medium and long-term funding, continuously renewing its fleet. Consequently, its financial position reflects significant capital invested in the vehicle fleet in property and equipment, generating revenue and cash flows from high turnover transactions sufficient to maintain operations and debt service. The operating cycle, based on the purchase, rental and sale of vehicles with an average of 16 to 22 months of use and growth in the business over recent years has meant that Movida presents consolidated negative working capital of R\$ 233,433 at June 30, 2024 (negative R\$ 2,025,700 at December 31, 2023). Management has been lengthening debt tenures and believes that fund raising activities, whether through its own capital or from third parties for fleet renewal, will sustain its growing business by continuously renewing its fleet and enabling it to settle its obligations in a timely manner. Management believes that the fleet is valued and presented at its realizable value and comprises highly liquid assets.

2. BASIS OF PREPARATION AND PRESENTATION OF THE PARENT COMPANY AND CONSOLIDATED QUARTERLY INFORMATION

2.1. Statement of compliance (International Financial Reporting Standards - IFRS and the Brazilian Accounting Pronouncements Committee - CPC)

The financial statements were prepared in accordance with accounting practices adopted in Brazil, including the pronouncements, interpretations and guidelines issued by the Accounting Pronouncements Committee (CPC) and International Financial Reporting Standards (IFRS, issued by the International Accounting Standards Board (IASB)) (the "IFRS® accounting standards"), including the interpretations issued by the IFRS Interpretations Committee (IFRIC® Interpretations) or by its predecessor body, the Standing Interpretations Committee (SIC® Interpretations). Disclosures are limited to all information of significance to the financial statements, being consistent with that used by management in the performance of its duties.

Parent company individual financial statements

Due to the difference between Brazilian and IFRS regarding unrealized results, specifically arising from operations involving group companies under common control, from January 1, 2019, the Parent Company's individual financial statements were prepared in accordance with the CPC. These individual statements are disclosed together with the consolidated financial statements.

Consolidated financial statements

The consolidated financial statements were prepared and are being presented in accordance with accounting practices adopted in Brazil, including the pronouncements issued by CPC and in accordance with IFRS.

This quarterly information should be read in conjunction with Movida's individual and consolidated financial statements for the year ended December 31, 2023, published on March 25, 2024.

Basis of measurement

The parent company and consolidated interim financial information were prepared on the historical cost basis of value, except for certain financial assets and liabilities (including derivative instruments) at fair value.

2.2. Statement of value added ("DVA")

The preparation of parent company and consolidated statements of value added ("DVA") is required by the Brazilian corporate legislation and the CPCs in Brazil applicable to listed companies.

The DVA was prepared in accordance with CPC 09 - "Statement of Value Added".

As IFRS do not require the presentation of such statement, it is supplementary to the IFRS parent company and consolidated financial statements.

2.3. Functional and presentation currency

This parent company and consolidated financial information is presented in Brazilian Real/Reais ("R\$"), which is the functional currency of Movida Participações and its subsidiaries. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

2.4. Foreign currency-denominated transactions

Foreign currency transactions are translated into Brazilian Reais using the exchange rates prevailing at the dates of the transactions or the dates of valuation when items are remeasured.

Foreign exchange gains and losses that relate to financial assets and liabilities, such as loans and borrowings, cash and cash equivalents and marketable securities denominated in a currency other than the Brazilian Real, are presented in the statement of income as finance income or expenses.

2.5. Subsidiaries with different functional currencies

In the preparation of the consolidated interim financial information, the statements of income and of cash flows and all changes in assets and liabilities of the subsidiaries Movida Europe, Movida Finance and Drive on Holidays, whose functional currency is not the Real, are translated into Reais at the average monthly exchange rate, which approximates the exchange rate prevailing on the date of the corresponding transactions.

The statement of financial position is translated into Reais at the exchange rates at the end of each period. The effects of exchange rate variations resulting from these translations are presented in "other comprehensive income" in the statements of comprehensive income and in equity.

2.6. Equity interest and basis of consolidation

The parent company and consolidated quarterly information at June 30, 2024 and December 31, 2023 includes the operations of the parent company and its subsidiaries. The equity interests are as follows:

2.7. Basis of consolidation

The following accounting policies have been applied consistently in the preparation of the parent company and consolidated quarterly information.

Subsidiaries:

The Group controls an entity when it is exposed to, or has rights to, variable returns on its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date on which the Group obtains the control until the date on which control ceases.

In the parent company's individual quarterly information, the financial information of subsidiaries is accounted for using the equity method.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated. Unrealized gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

2.8. Fair value measurement

The fair value is the price that would be received for the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal market or, in its absence, that which would be the most advantageous and available to Movida. The fair value of a liability reflects its non-performance risk, which includes, among others, Movida's own credit risk.

When available, Movida measures the fair value of an instrument using the quoted price in an active market. A market is active if transactions involving the asset or liability occur with sufficient frequency and volume to provide reliable pricing information on an ongoing basis.

If there is no quoted price in an active market, then Movida uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The selected valuation technique should incorporate all of the factors that market participants would take into account when pricing a transaction.

If an asset or liability measured at fair value has a purchase price and a sales price, Movida measures these assets based on the purchase price and the liabilities based on the sales price.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price - i.e., the fair value of the consideration given or received. If Movida determines that the fair value at initial recognition differs from the transaction price, and the fair value is not supported by a quoted price in an active market for an identical asset or liability nor by a valuation technique for which the use of unobservable inputs is judged to be insignificant in relation to the measurement as a whole, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value upon initial recognition and the transaction price. Subsequently, that difference is recognized in income on an appropriate basis over the life of the instrument, but no later than when the valuation is wholly supported by observable market data or the transaction is closed out, whichever occurs first.

Details on the classification and disclosure of Movida's financial instruments are in Note 4.1.

2.9. Risks arising from climate change and sustainability strategies

The logistics and transport sector is responsible for greenhouse gas emissions (GHG) and, consequently, for climate change, and its impacts on society at large.

Movida seeks to operate in a sustainable manner, developing solutions that address or neutralize the negative impacts of its operations. Since 2022 a Climate Change Policy has been maintained that, together with the Sustainability Policy, directs mitigation, offset and adaptation actions due to the climate change scenario.

Movida also follows what is determined in the Greenhouse Gas Emissions Management Program through its subsidiary Movida Europe S.A. ("Movida Europe"), a company established under the laws of the Grand Duchy of Luxembourg ("Issuer"), in order to contribute to the public target of reducing the intensity of GHG emissions by 15% by 2030. As mentioned in Note 14, this target is linked to the issuance of *Sustainability-Linked Bond* (SLB) in 2021. The indicator related to this commitment considers scope 1 and 2 emissions from all Group companies, in addition to categories 4 and 13 (*Tank-to-Wheel*) of scope 3. Category 4 includes the burning of fuels related to transport and distribution (*upstream*) and category 13 considers emissions related to assets leased to third parties (organization as lessor). This is essential for SIMPAR, controlling shareholder, to achieve the intensity target that takes into account the net revenue of the SIMPAR Group companies.

The measurement and monitoring of emissions, as well as the target, is presented quarterly to the Movida Sustainability Committee; the following factors are considered as part of the plan to achieve the target:

- Maintenance of a low average age of the fleet and adoption of low-emission technologies;
- Assessment of the acquisition of electrical and biomethane-powered vehicles and equipment;
- Preference for the use of ethanol in internal supplies, with an internal communication campaign, involving employees;
- Use of telemetry to improve driver performance, reducing fuel consumption and optimizing the fleet;
- Increased participation of renewable energy sources in the energy matrix, to minimize Scope 2 emissions.

Movida compiles its emissions inventory for its sustainability report which is covered by an assurance report issued by independent auditors and published annually. The program of controls is constantly improved in pursuit of the established objective, encompassing Scopes 1, 2 and 3 and, since 2019, it has been recognized with the Gold Seal in the Brazilian GHG Protocol Program - an external attestation of transparency in the disclosure of this information. In 2023, the Company maintained a grade B in the Carbon Disclosure Project (CDP), an assessment that positions it above the global average among the companies most committed to the issue of climate change in the transport and logistics sector.

2.10. Use of critical accounting estimates, judgments and assumptions

In the preparation of this quarterly information, Management made judgments, estimates and assumptions in implementing its accounting policies that affect the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. These estimates are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

The accounting estimates and underlying judgments are reviewed on an ongoing basis based on historical experience and other factors that are considered to be reasonable in the circumstances.

Cash flow statements - Indirect method (securities and short-term investments): Movida classifies bonds, securities and short-term investments as operating activities due to their short-term nature and used to settle suppliers and debts. These amounts are not intended for long-term investments and are used in the Group's operating cycle.

2.11. Critical accounting estimates and assumptions

Based on assumptions, the Group makes estimates concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below:

- a) Deferred income tax and social contribution - recognition of deferred tax assets: availability of future taxable profit against which the deductible temporary differences and tax losses can be used - Note 19.1;
- b) Property and equipment (definition of residual value and useful life) - Note 10;
- c) Vehicles decommissioned for fleet renewal - realizable value - Note 8;
- d) Impairment losses of intangible assets - impairment test of intangible assets and goodwill: key assumptions regarding recoverable amounts - Note 11.1;
- e) Expected losses from trade receivables: measurement of expected losses from trade receivables and contract assets: key assumptions in determining the weighted average rate of loss - Note 7;
- f) Provision for judicial and administrative litigation, recognition and measurement of provisions and contingencies: key assumptions regarding the likelihood and materiality of resource outflows - Note 17.2;
- g) Derivative financial instruments: determination of fair values - Note 4.2.

3. OPERATING SEGMENTS

Operating segments are defined as components that develop business activities: (i) which earn revenues and incur expenses; (ii) whose operating results are regularly reviewed by the chief operating officer responsible for deciding on resources to be allocated to the segment and for evaluating its performance; and (iii) for which parent company financial information is available.

The operating segments were defined based on reports used for strategic decision-making by the chief decision-makers. Movida has two operating business segments for which it discloses information:

Rent a car (RAC): car rental stores located inside and outside airports. Individuals and companies contract rentals. Insurance companies may also offer rented cards to substitute cars being repaired.

As part of the fleet renewal program, Movida retires its cars and sells them after a period of use between 15 and 24 months. A significant number are sold to final customers through pre-owned car stores throughout Brazil.

Fleet Management and Outsourcing (GTF): management of the long-term corporate fleets, generally over 24 to 36 months. This division also includes subscription cars for individuals. Cars are purchased after signing the agreements to suit customer needs, and at the end of these agreements, cars are decommissioned. These vehicles are sold at point-of-sales and to resellers throughout Brazil.

The information is assessed by the financial management on a monthly basis.

Financial instruments with carrying amounts equivalent to their fair values are classified at Level 2 of the fair value hierarchy.

The valuation techniques used to measure assets and liabilities at fair value include:

- Quoted market prices or quotations from financial institutions or brokers for similar instruments; and
- Analysis of discounted cash flows.

The valuation yield curve used in the fair value measurement of agreements, indexed to the CDI - Interbank Deposit Certificates rate at June 30, 2024 is as follows:

4.3. Financial risk management

Movida uses derivative financial instruments to hedge certain risk exposures. Movida has loans and borrowings, debentures, suppliers, right-of-use leases, dividends and interest on capital payable, other payables and advances, other assets, trade receivables, marketable securities and financial investments, derivative financial instruments and demand and short-term deposits that result directly from its operations. Movida is exposed to the following risks resulting from financial instruments: (a) credit risk, (b) market risk and (c) liquidity risk.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

Management oversees these risks with the support of the Financial Committee, which assesses the financial risks and recommends actions to the Board of Directors to ensure the financial risks to which Movida are exposed are governed by appropriate practices and procedures. The Financial Committee carries out ongoing monitoring of financial transactions to avoid high risk investments, particularly derivative instruments with risks not covered by hedging instruments. Movida does not have derivative instruments or any other assets of speculative nature.

The Board of Directors must authorize transactions involving any type of derivative instrument, which is defined as any agreement that generates financial assets and liabilities, regardless of the market in which they are traded or listed, or the manner of their realization.

(a) Credit risk

Credit risk involves the potential risk of default by a counterparty to an agreement or financial instrument, resulting in a financial loss. Movida is exposed to credit risk on its operations (especially with regard to its receivables) and investing activities, including investments at banks and financial institutions, derivative instruments and other financial instruments.

(i) Cash and cash equivalents, marketable securities and financial investments

The credit risk from investments at banks and financial institutions is managed by Movida's Treasury area in accordance with the guidelines approved by the Board of Directors. Surplus funds are invested only in approved counterparties and within the limits established for each, in order to minimize the concentration of risk and therefore mitigate potential financial losses in the event of an institution going bankrupt.

The Brazilian ("Br") ratings and global credit risk exposure scale are those used by the ratings agencies:

Nomenclature:	Quality
AAA	Prime
AA+, AA, AA-	High Investment Grade
A+, A, A-	High Average Investment Grade
BBB+, BBB, BBB-	Low Average Investment Grade
BB+, BB, BB-	Speculative Grade
B+, B, B-	Highly Speculative Grade
CCC+	Speculative Degree of Substantial Risk
CCC	Extremely Speculative Degree
CCC-, CC, C	Speculative Degree of Moratorium with Small Expectation of Recovery
DDD, DD, D	Speculative Degree of Moratorium

The quality and maximum credit risk exposure of cash and cash equivalents, marketable securities and financial investments are as follows:

(ii) Trade receivables

Customer-related credit is reviewed at the time of contracting, subject to the procedures, controls and established practices related to this risk. Outstanding trade receivables are monitored closely by Management. The need adjust the provision for expected credit losses from trade receivables is analyzed monthly on an individual basis for key customers. The Company pools together similar low-value trade receivables for the purpose of estimating the risk of loss on a consolidated basis. This calculation is based on historical data for recent periods.

The credit analysis area assessed the credit quality of customers, taking into consideration their financial position, past experience and other factors. Individual credit limits and risks are set based on internal or external ratings based on a ranking of companies specialized in credit ratings in accordance with the limits set by Management.

The risk of credit concentration is limited, because Movidá has a diversified customer base. All significant transactions and customers are located in Brazil, and no customer individually accounts for more than 10% of Movidá's revenues.

The maximum credit risk exposures to trade receivables are as follows:

(b) Market risk

Market risk is the risk that changes in market prices, such as exchange rates, interest rates, inflation rates and stock prices, will affect Movida's income or the value of its holdings of financial instruments. The market rate involves potential fluctuations in the fair value of the future cash flows derived from a given financial instrument in response to variations in its market prices. These are typically: interest rate risk, change in inflation risk, exchange risk and price risk, which may be related to commodities, shares, among others. Market risk is managed to ensure that Movida keeps risk within levels considered acceptable in the context of its operations.

Currently, Movida is exposed to interest rate risk mainly from financial investments, marketable securities, loans and borrowings, right-of-use leases and debentures, as well as changes in the Euro and the US Dollar exchange rate, on its liability position of derivative financial instruments, and also changes in the rate of inflation, affecting the remuneration of debentures.

(i) Interest rate risk

Interest rate risk involves potential fluctuation in the fair value of the future cash flows derived from a given financial instrument in response to changes in market interest rates.

Movida is exposed to the risk of changes in market interest rate mainly from its cash and cash equivalents, marketable securities and financial investments, as well as loans, borrowings, debentures, leases payable and right-of-use leases. As a policy, the Group seeks to concentrate this risk to changes in the DI rate, and uses derivatives for this purpose.

All these transactions are conducted under the guidelines established by the Financial committee, as approved by the Board of Directors. Movida seeks to apply the hedge accounting to manage the volatility in profit or loss and in its exposure.

Movida has derivative contracts (swap) designated as hedging instruments, which convert the IPCA exposure to a percentage of the CDI rate. These instruments were contracted to protect the Company's results from volatility caused by variations in the IPCA, which, on the dates of their contracting, were evaluated by Management, with the support of the financial committee, as being of greater risk. The Board of Directors approved all contracts.

(ii) Risk of inflation

Movida has placed debentures with remuneration indexed to the Broad Consumer Prices Index - IPCA. These bonds have a long-term profile. To mitigate this risk of changes in inflation, swap instruments were contracted to exchange the IPCA variation for the Interbank Deposit Certificate (CDI) rate. The sensitivity analysis for these instruments is presented in Note 4.4.

(iii) Foreign exchange risk

Movida is exposed to foreign exchange risk due to the mismatch between the currencies in which borrowings are denominated and its functional currency. Borrowings are generally denominated in the same currency as the cash flow generated by the Company's trading operations, mainly in Reais. However, there are also contracts in US Dollars and Euros, which are hedged against exchange rate changes using swap instruments, which exchange the foreign currency indexation and the fixed rate for the CDI rate, limiting the exposure to any losses due to exchange rate changes. The sensitivity analysis is presented in Note 4.4.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

(iv) Fair value of derivatives and other financial instruments

The fair values of financial instruments that are not traded on active markets are determined using valuation techniques. Management uses its judgment to choose between various methods and to define assumptions mainly based on the market conditions existing at the reporting date. The Group used the discounted cash flow analysis to calculate the fair values of several financial assets at fair value through other comprehensive income, assets that are not traded in active markets.

The fair value of swaps is calculated based on the present value of estimated future cash flow based on observable yield curves.

(v) Derivative financial instruments and hedge activities

Initially, derivatives are recognized at their fair value as at the date on which a derivative contract is entered into, and subsequently remeasured at fair value. The method for recognizing the resulting gain or loss depends, in the case of the adoption of hedge accounting, on the nature of the item/object being hedged. The Group adopts hedge accounting and designates certain derivatives as cash flow hedges.

(vi) Cash flow hedge

The effective portion of changes in the fair value of derivatives designated and qualified as cash flow hedges is recognized in equity, in "Equity valuation adjustments". The gain or loss related to the ineffective portion is immediately recognized in the statement of income as "Total interest and charges on debts, net of swap" (Note 23).

The amounts are accumulated in equity until the hedged item is recorded in profit or loss when they are reclassified to income.

Gains or losses related to the effective portion of interest rate swaps hedging loans at variable rates are recognized in the statement of income as finance expenses at the same time as the interest expenses are recorded for the hedged loans.

(vii) Hedge ineffectiveness

Hedge ineffectiveness is determined at the time of inception of the hedge relationship and through periodic prospective assessments of effectiveness to ensure that there is any economic relationship between the hedged item and the hedging instrument.

Movida contracts swaps with terms that are similar to the hedged item, such as reference rate, reset dates, payment dates, maturities and reference value. The hedged item can be identified in full or as a proportion of the outstanding loans based on the swaps' reference value.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reals, unless otherwise stated)

(viii) Market risk hedge derivative instruments

To manage the risk of foreign exchange and interest rate volatility, Movida contracted swap derivative instruments. These swap the Euro to CDI, the US Dollar to CDI, the SOFR to CDI and IPCA to CDI, reducing Movida's exposure to these currencies and interest rates.

The first swap contract was executed in March 2020, hedging EUR 42,000 thousand raised at a rate of 5.28% p.a., with semiannual interest payments and maturity in five years.

In January 2021, Movida Europe issued debt securities abroad, bearing interest at 5.25% p.a. and maturing in 2031 ("Senior Notes"), denominated in US Dollars and with a principal amount of USD 500,000 thousand. In September 2021, the Company issued a new series of this note (re tap) in the total amount of USD 300,000 thousand. The issuances were merged, totaling USD 800,000 thousand, maintaining the prior maturity and issuance rate.

The second derivative was contracted to hedge part of the Senior Notes proceeds, which were brought into Brazil via an external loan signed by Brazilian subsidiary Movida Locação for USD 425,000 thousand, for the same term as the original loan. This credit line is guaranteed by a financial investment made by Movida Europe using funds obtained from the issuance of the *Senior Notes*. Movida contracted swap instruments to mitigate the exchange risk with interest rate spread and notional amount of USD 425,000 thousand.

During 2023, the subsidiary Movida Locação de Veículos S.A. settled part of the US dollars denominated loans (Law 4,131/62) in the amount of USD 150,000 thousand. This resulted in a partial redesignation of the hedging relationship due to termination of the hedging instrument. The remaining balance of USD 262,000 thousand, incorporates the same terms and conditions.

The third derivative refers to the 1st and 2nd series of the 6th issuance of debentures of its subsidiary Movida Locação in the total amount of R\$ 400,000 and R\$ 300,000, and were carried out for the same term as the original loan with the exchange of the IPCA percentage+7.2% for the CDI percentage. On August 2, 2023, the 2nd series in the amount of R\$ 300,000 was settled, without changing or bringing forward any value related to the hedged debt.

The Company also entered into an IPCA contract related to the 3rd series of its 7th issuance of debentures issued on September 15, 2021, in the principal amount of R\$ 1,750,000 and a term of 10 years, where R\$ 350,000 are indexed to the IPCA index. The Company contracted its fourth derivative instrument, converting the IPCA variation + 7.64% into a percentage of the CDI. On August 2, 2023, this derivative was settled without change or advance payment of any amount related to the hedged debt.

The fifth contract carried out in February 2022 refers to a new CCB/4131 loan exposed to exchange variation, with USD 50,000 thousand bearing annual interest at 100% SOFR+1.28%, with payment of semiannual interest and maturing in five years (2027). A swap instrument was contracted for this loan to match with the terms and conditions of the hedged item (amount, rate, index, maturity, payment dates and amortization schedule), exchanging exchange rate risk and SOFR for 100% of CDI + 2.60%.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

On September 8, 2022, Movida Locação carried out the sixth derivative contract swap in the amount of USD 160,000 thousand, maturing in December 2031, denominated in US dollar + 3.46%, to protect the risk exchange rate relating to obtaining a loan from the IDB. The average contracted rate is CDI + 3.24%.

On January 26, 2024, new derivatives (swaps) were contracted in the amount of USD 262,000 thousand to hedge the 4131 against the bond internalization after settlement of previous contracts that provided this protection, with an average rate of CDI + 0.84%.

On April 4, 2024, Movida contracted three swaps with initial designation on May 13, 2024, totaling USD 500,000 thousand. This contract is in line with the Company's strategy of protecting the exchange rate risks of cash flows from US dollar-denominated debentures, entering into pre-fixed swap operations in USD for a percentage of the CDI. These swaps receive the same contractual terms as the Notes for interest rates in Reais linked to the CDI.

On April 12, 2024, Movida issued a CRI of the 4th series 193o.new swap with a nominal value of BRL 358,025 thousand, to protect a CRI issuance made in 2023, with maturity in 2030, and IPCA + 13 rate, 2030%, changing to CDI + 1.8325%.

Also in April 2024, through its subsidiary Movida Europe, new debt securities were issued abroad, with a rate of 7.85% per year and maturing in 2029 ("Senior Notes"), denominated in US dollars in the principal value of USD 500,000 thousand. The amount was remitted to Brazil on May 13, 2024, through foreign exchange debentures, signed by Movida Participações, for the same period, for the original debt. To protect the debt, Movida contracted three swaps with initial designation on the same date as the protected object, totaling USD 500,000. This contracting of a swap operation, with the objective of converging the interest rate index, is in line with the Company's strategy of protecting the exchange rate risks of its financial assets and liabilities, expressed as a percentage of the CDI, with the same contractual conditions as the CRI. cash flows from debentures in dollars, for an average rate of CDI + 2.28%.

These cash flow hedge operations resulted in effective changes in their fair values, net of taxes, in the amount of R\$ 69,652 for the period ended June 30, 2024 (R\$ 227,705 for the period ended June 30, 2023), which were recorded in "Other comprehensive income". Derivatives are used only for economic hedging purposes and not as speculative investments, and meet the criteria for hedge accounting.

The negative variation in loan balances of R\$ 105,534 was allocated to equity in other comprehensive income and will be charged monthly to the finance result until the settlement date.

The sensitivity analysis is presented in Note 4.4.

No gains or losses arising from an ineffective portion of a hedge were identified. The accumulated amounts in "Other comprehensive income" are transferred to the statement of income when the hedged item is recorded in results (for example, when the hedged item is settled). The relationship between the hedging instrument and the hedged item, as well as the risk management policies and objectives, were documented at transaction inception. Effectiveness tests are properly documented to support the prospective effectiveness of the hedging relationship based on the variations in the market values of the hedged items, in accordance with CPC 48/IFRS 9 - "Financial Instruments".

(c) Liquidity risk

Movida monitors the risks associated with funding shortages on an ongoing basis using a current liquidity planning tool.

Movida's purpose is to maintain a balance of cash and highly-liquid investments, maintaining flexibility through the use of bank loans and the ability to raise funds through capital markets to ensure its liquidity and operational continuity. The average indebtedness terms are monitored in order to provide short-term liquidity, analyzing installments, charges and cash flow.

The contractual maturities of financial liabilities, including interest appropriation, are shown below:

4.4. Interest rate and currency sensitivity analysis

A sensitivity analysis is prepared in accordance with CPC 40 (R1) Financial Instruments in order to demonstrate the effects of potential changes in interest and exchange rates on its financial assets and liabilities, considering the following probable interest and exchange rates for the next 12 months.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

This study uses a probable base scenario of a CDI rate of 11.19% p.a., based on the future interest rate yield curve of B3, SELIC of 11.19% p.a. (Source: BACEN - Central Bank of Brazil), EUR rate of R\$ 6.34 (source: B3); IPCA of 6.22% p.a. (Source: B3), proportionally impacting loans and financial investments. For the TJLP, the base scenario at June 30, 2024 is 5.91% p.a. (source: BNDES - Banco Nacional de Desenvolvimento Econômico e Social). The projected one-year SOFR rate was 5.33% (source: Federal Reserve New York Bank).

(i) Sovereign securities are debt securities issued by the Brazilian or US government. These securities in foreign currency (USD) are available to be sold to meet Management's need for resources. In addition, they are naturally hedged by the respective USD debt amount. The remuneration from these securities is defined based on the coupon of each issuance and on the yield rate at the acquisition date.

The average income from government securities held by exclusive funds managed by controlling shareholder Simpar accrue fixed and floating rates (fixed LTN and LFT SELIC). During the half-year ended June 30, 2024, the average yield was 10.84% p.a. (13.15% p.a. for the year ended December 31, 2023).

Information on the fair value measurement, Movida's exposure to credit and market risks, and sensitivity to interest and currency rates are included in Notes 4.2, 4.3 and 4.4.

8. VEHICLES DECOMMISSIONED FOR FLEET RENEWAL

This account includes vehicles that were recorded as property and equipment and that, as a result of having been decommissioned, are available for immediate sale in their present condition and are thus very likely to be sold in under a year. Once classified as vehicles decommissioned for fleet renewal, assets are no longer depreciated.

Depending on levels of demand, such as seasonal peaks, the vehicles may be returned to operations. When this occurs, the assets are again classified as property and equipment and depreciation resumes.

Vehicles decommissioned for fleet renewal are stated at cost or net realizable value, whichever is lower. Net realizable value is the estimated sales price in the normal course of business, less estimated completion costs and estimated costs necessary to make the sale.

The movements during the periods June 30, 2024 and December 31, 2023 are as follows:

- (i) Movida Locação de Veículos S.A., through a commercial agreement, carries out sublease and sale of vehicles for Movida Participações S.A. In April 2024, there was a cancellation signed between the parties relating to the vehicle sale operation that took place in December 2023 (Note 1). This operation did not have any effect on the equity balances and consolidated results.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reals, unless otherwise stated)

Movida annually reviews the expected market value estimates of its property and equipment items at the end of their economic useful lives, based on historical data on the market value of its vehicles (according to the chart prepared by the Economic Research Institute - FINE and/or other trade platforms), regularly monitors the estimated economic useful lives used to determine the respective depreciation and amortization rates and, whenever necessary, performs analyses on the recoverability of its assets.

The depreciation methods, useful lives and residual values are reviewed periodically and adjusted, if appropriate. In the last quarter of 2023, an assessment was carried out and rates were adjusted to reflect the current market scenario.

11.1 Impairment testing

The impairment test of indefinite useful life intangible assets is carried out once a year, or if there are indicators of impairment of cash-generating units ("CGUs"). Movida classifies CGUs based on their segments, RAC and GTF (Note 3).

Movida classifies CGUs for assets of the fleet of each operating segment.

At December 31, 2023, Management updated its studies concluding that there was no need to constitute a provision for impairment. In the six-month period ended June 30, 2024, the Company reviewed the studies and did not identify any need for adjustments.

12.1 Supplier financing (Confirming)

The subsidiary Drive on Holidays negotiates payments to suppliers with banks through a Supplier Financing/Confirming transaction, to manage the amounts to be paid for purchases from suppliers and vehicles. In this operation, suppliers transfer the right to receive the credits they hold on Drive on Holidays to the banks and the payment term for the banks is up to 180 days, while the average original payment term for the securities is 30 days. The contracts signed are not guaranteed by the assets (vehicles) linked to the securitized operations. The movement for the periods ended June 30, 2024 and December 31, 2023 is shown below:

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reais, unless otherwise stated)

On May 17, 2023, Movida announced a tender offer, for the principal amount of up to USD 375,000 thousand, for the acquisition of its sustainability-linked notes, bearing interest at 5.250% p.a. and maturing in 2031, guaranteed by Movida and Movida Locação de Veículos S.A. ("Notes" and "Tender Offer", respectively). The tender offer generated a demand of USD 213,692 thousand. Additionally, notes amounting to USD 134,707 thousand were repurchased in the secondary market up to June 2023.

On August 1, 2023, Movida Participações announced a new Tender Offer in the amount of USD 175,000 thousand. The entirety of the new Tender Offer was accepted for repurchase by holders. These movements resulted in a balance of USD 276,601 thousand of the bond remaining on the market.

When carrying out the two repurchases, Movida recorded a gain of R\$ 11,890 which was recognized in the finance result. (Note 23 (ii)).

Upon the partial repurchase of the Bond, Movida determined that there was no substantial change in the terms of the existing bonds, therefore, this transaction was accounted for as a modification of the financial liability.

On April 11, 2024, new bonds were issued in the amount of USD 500,000 thousand, maturing on April 11, 2029 and paying semi-annual interest, the debt interest rate being 7.85%. This operation is 100% protected, through the contracting of swaps designated for hedge accounting.

- (xi) **CLN** - Movida Europe invested USD 425,000 thousand in Credit Linked Notes - CLN, as a guarantee for the international credit operation (item x) by the subsidiary Movida Locação de Veículos S.A. issued under Law 4,131/62, of USD 425,000 thousand. The international credit operation and the CLN investment were carried out at the same financial institution abroad, are subject to contractual offsets and Movida intends to settle the assets and liabilities on a net basis. The debt is presented net of the investment. During 2023, USD 150,000 thousand relating to this operation was settled. As of June 30, 2024, the gross value of the offset financial assets and liabilities totals USD 275,000 thousand, equivalent to R\$ 1,331,358 (USD 275,000 thousand, equivalent to R\$ 1,331,358 at December 31, 2023).

The following definitions refer to the paragraphs above:

Net Debt for covenant purposes: means the total balance of the Issuer's short and long-term loans and borrowings, including debentures and any other debt securities or marketable securities, positive and/or negative results of the hedge transactions, less: (a) cash and short-term investments; and (b) loans and borrowings arranged under the program for the financing of the inventories of new and pre-owned vehicles, locally made or imported, and automotive parts, using revolving credit facilities from financial institutions linked to the manufacturers (floor plan).

- a) **EBITDA for covenant purposes:** means earnings before interest, taxes, depreciation and amortization, impairment of assets and equity in results of subsidiaries for the last 12 months, including the EBITDA of the last 12 months of the companies merged and/or acquired by the Issuer.
- b) **Adjusted EBITDA for covenant purposes:** means earnings before interest, taxes, depreciation and amortization, impairment of assets and equity in results of subsidiaries, plus the cost of sale of damaged vehicles for the last 12 months, including the EBITDA of the last 12 months of the companies merged and/or acquired by the Issuer.
- c) **Net finance expenses for covenant purposes:** means borrowing costs plus indexation adjustments, less income from financial investments, related to items described in the definition of Net Debt above, calculated on an accrual basis over the last 12 months.

The Company was fully in compliance with financial ratios at June 30, 2024.

All debentures have clauses requiring maintenance of financial ratios of debt and finance expenses to earnings before interest, taxes, depreciation and amortization, plus the cost of sale of assets used in services rendered, calculated over the last 12 months (EBITDA) from Movida. In the event of noncompliance, the amortization may be accelerated. These debentures do not have any guarantees.

The Company was fully in compliance with financial ratios at June 30, 2024.

16. RIGHT-OF-USE LEASES

The Company leases its vehicles, which are classified as operating leases.

The Company subleases vehicles. In accordance with CPC 06(R2) / IFRS 16, the lease and sublease contracts were classified as operating leases. Movida assessed the classification of sublease contracts with reference to the right-of-use asset, and not the underlying asset, and concluded that they are operating leases in accordance with CPC 06(R2) / IFRS 16.

The Company has applied CPC 47 / IFRS 15 - Revenue from Contracts with Customers to allocate the consideration in the contract to each lease and non-lease component.

The Company determined its discount rates, based on the risk-free interest rates observed in the Brazilian market, for the terms of its contracts, adjusted to Company's circumstances (credit spread). The spreads were obtained through surveys with potential investors of the Company's debt securities. The table below shows the rates charged vis-à-vis the terms of the contracts, as required by CPC 12, §33. Movida updates the rates on a quarterly basis and the information for the quarter ended June 30, 2024 is presented below:

16.1 Variable and short-term lease payments

In the period ended June 30, 2024, Movida recognized R\$ 23,440 (R\$ 29,643 at June 30, 2023) related to expenses with variable and short-term lease payments.

16.2 As a lessor

When it is the lessor, the Group determines, at the date of lease inception, whether a lease is a finance lease or an operating lease.

To classify each lease, the Group made an overall assessment of whether the lease transferred substantially all the risks and rewards incidental to ownership of the underlying asset. This being the case, the lease is a finance lease; otherwise, it is an operating lease.

As part of this assessment, the Group considers certain indicators such as whether the lease covers the greater part of the economic life of the asset.

The following table presents a maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date.

	Up to 1 year	1 to 2 years	2 to 3 years	3 to 4 years	4 to 5 years	Over 5 years	Total

17. PROVISION FOR JUDICIAL AND ADMINISTRATIVE LITIGATION AND JUDICIAL DEPOSITS

Movida is a party to a number of civil, labor and tax lawsuits and administrative lawsuits. A provision is made when it is probable that an outflow of funds will be required to settle a contingency and/or an obligation, and where a reasonable estimate of this outflow can be made. The assessment of the likelihood of loss includes available evidence, hierarchy of laws, available case laws, recent court decisions and their relevance in the legal system, as well as the advice of outside lawyers.

The provision is reviewed and adjusted for changes in circumstances, such as the expiry of prescriptive periods, conclusion of tax inspections, or additional matters arising or new court decisions.

The nature of the lawsuits is as follows:

Civil - Civil lawsuits are not for individually material amounts; they are mainly related to alleged failure to provide services (mainly credit card billing issues related to leasing in general, vehicle damages and traffic fines), termination of contract of sale and purchase of vehicles, as well as lawsuits involving traffic accidents filed by third parties and regressive action of insurers.

Notes to the parent company and consolidated quarterly information at June 30, 2024

(In thousands of Brazilian Reais, unless otherwise stated)

Tax - Tax lawsuits are not for individually material amounts; they are mainly related to tax assessment notices and annulment actions alleging improper collection of ICMS and ISS, as well as tax execution/motion to stay execution arising from the collection of IPVA, PIS/COFINS, advertising fees and other.

Labor - Labor lawsuits are not for individually material amounts; the related provision covers the risks of loss arising from lawsuits claiming compensation for overtime, commissions, hazardous duty premium, health hazard premium, work accidents and lawsuits filed by employees of third parties due to secondary obligor liability.

17.1 Judicial deposits and provision for judicial and administrative litigation

17.3 Possible risk of losses for which no provisions are recorded

Movida is a party to civil, labor and tax lawsuits at the judicial or administrative level, with risk of loss considered possible by Management under the advice of its legal counsel and for which no provision was recorded.

The estimated litigations amounts are as below:

	Parent Company		Consolidated	
	06/30/2024	12/31/2023	06/30/2024	12/31/2023
Civil	1,937	1,939	60,232	48,943

- (i) The State of Santa Catarina tax auditors issued Movida a tax assessment notice for ICMS on the sale of vehicles decommissioned for renewal of the Company's fleet. Given that the transaction is not of a commercial nature, but rather the sale of property and equipment items, in which such tax is not levied (pursuant to Supplementary Federal Law 87/96, article 3, Law 6,374/89, article 4, as amended by Law 10, 619/00, art 1, III; Agreements ICM-12/75, ICMS -37/90, ICMS 124/93, first clause, V, 1 and ICMS -113/96, first clause, sole paragraph), with the sole purpose of renewing the Company's operating fleet, the Company, together with its legal counsel, filed a defense suit challenging these charges.

Notes to the parent company and consolidated quarterly information at June 30, 2024

(In thousands of Brazilian Reals, unless otherwise stated)

Possible civil case risk of losses refer to claims filed by customers for alleged failure to provide services or of an indemnity nature for loss of profits and material and moral damages for traffic accidents involving fleet vehicles, not involving individually material amounts.

Management believes that there are no common labor claims filed against Movidá; and the labor claims filed do not involve individual material amounts and are mainly related to overtime and commissions, hazardous duty premium, health hazard premium and lawsuits filed by employees of third parties due secondary obligor liability.

Tax claims refer to tax assessment notices that are being challenged in respect of alleged improper collection of ICMS and ISS and to tax execution/motion to stay execution arising from the collection of IPVA and PIS/COFINS, advertising fees and other charges.

18. LABOR AND SOCIAL LIABILITIES

(i) Short-term benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for an amount expected to be paid when Movidá has a present legal or constructive obligation to pay the amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(ii) Profit sharing

Movidá recognizes a liability for profit sharing based on a model that takes into consideration the profit attributable to Movidá's shareholders after adjustments.

19.4 Estimated realization schedule

Deferred tax assets arising from temporary differences will be used to offset payables as the respective differences are settled or realized.

Tax losses can be carried forward indefinitely. At June 30, 2024, deferred income tax and social contribution are recorded for all carryforward tax losses.

In estimating the realization of deferred tax assets, Management takes into account its budget and the strategic plan based on the estimated realization schedule of assets and liabilities, and earnings projections.

The following table reflects the estimated timing of realization of deferred income tax and social contribution credits on tax loss carryforwards:

Year	Parent Company	Consolidated

20. EQUITY

(i) Common shares

Common shares are classified as equity. Incremental costs directly attributable to the issuance of new shares are deducted from proceeds, net of tax.

(ii) Repurchase and reissuance of shares (treasury shares)

When own shares are repurchased, the consideration paid, which includes any directly attributable costs, is recognized as a deduction from equity.

The repurchased shares are classified as treasury shares and are presented as a deduction from equity. When treasury shares are subsequently sold or reissued, the amount received is recognized as an increase in equity, and the gain or loss resulting from the transaction is presented as a capital reserve.

(iii) Capital reserve

Capital reserves, presented in equity, are amounts received by the Company that do not flow through income. The reserve reflects the share premiums determined when shareholders make contributions to increase capital. The capital reserves are a group of accounts within equity.

20.2 Treasury shares

At June 30, 2024, the Company repurchased own shares for R\$ 96 (R\$ 36,248 at December 31, 2023). The balance of treasury shares at June 30, 2024 is R\$ 50,763 (R\$ 50,667 at December 31, 2023). The shares were acquired to be held in treasury to cover any exercise of options within the scope of the share-based compensation plan.

20.3 Share-based compensation plan

Simpar S.A., Movida's controlling shareholder., created in 2010 a Stock Option Plan, prior to Movida's IPO, for which the Company has granted stock options for certain members of its Executive Board.

The program is intended to allow beneficiaries to receive restricted stock in order to: (a) stimulate the growth, success and business achievements aligned with Movida's corporate purposes; (b) align the interests of Movida shareholders with those of the beneficiaries; and (c) allow Movida or its subsidiaries to attract and retain the beneficiaries.

The awards granted to beneficiaries, plus the options or other rights to receive shares issued by Movida under stock option programs or share-based compensation programs to be approved in the future, may entitle them to a number of shares not to exceed 5% of the total voting capital of Movida, on a fully diluted basis.

The following table sets forth the quantity and weighted average exercise price and the changes in stock options:

20.4 Restricted stock plan and matching - Movida

At the Extraordinary General Meeting held on January 13, 2017, approval was given for the restricted stock program for Movida's officers, employees and service providers. The restricted stock plan consists of the Movida restricted shares awarded to its employees as part of the payment of variable compensation of the beneficiaries as bonds, in four-year annual installments. In addition, employees may, at their sole discretion, opt to receive an additional portion of the variable compensation amount as a bonus paid in the form of Movida's shares. In the case the employee opts to receive shares, Movida will provide the employee with one matching share for each share received by the employee, within the limits established in the program. The granting of the right to receive restricted shares and matching shares is made through the conclusion of a Grant Agreement between Movida and the employee. Thus, the plan seeks to: (a) stimulate the expansion, success and achievement of Movida and its subsidiaries' social objectives; (b) align the interests of Movida and its subsidiaries' shareholders with those of its employees; and (c) enable Movida and its subsidiaries to attract and retain the beneficiaries.

In order to calculate the number of restricted shares to be delivered to the employee, the net value earned by the employee will be divided by the average quotation of Movida shares on B3 S.A. - Brasil, Bolsa, Balcão, weighted by the trading volume in the last 30 pre-dates prior to each date of acquisition of the rights related to the restricted shares.

Notes to the parent company and consolidated quarterly information at June 30, 2024

20.5 Capital reserve

The capital reserves reflect the gain on the sale of shares at market prices upon granting awards to the executives of Movida.

The amount accumulated in the capital reserve account related to these plans in equity is R\$ 61,633 at June 30, 2024 (R\$ 61,633 at December 31, 2023).

20.6 Revenue reserves

Revenue reserves are recognized by appropriation of Movida's earnings, as provided for in paragraph 4 of art. 182 of Law 6,404/76. According to paragraph 6 of art. 202 of this Law, added by Law 10,303/01, if there are any unappropriated profits, after allocation to mandatory dividends and other capital reserves.

These comprise: legal reserve of R\$ 102,521 at June 30, 2024 and December 31, 2023, investment reserves of R\$ 780,624 at June 30, 2024 and December 31, 2023, retained earnings of R\$ 109,359 at June 30, 2024 and December 31, 2023, and accumulated losses of R\$ 559,754 at June 30, 2024 (R\$ 650,850 at December 31, 2023). Additionally, the earnings reserves are comprised of statutory reserves; contingency reserves; unrealized earnings reserve; earnings reserve for expansion; tax incentive reserve and special reserve for mandatory dividends not distributed; for which Movida has no balance recorded in the periods ended June 30, 2024 and December 31, 2023.

The retained earnings reserve is supported by the capital budget, established under the terms of article 196 of the Brazilian Corporation Law, and approved at the Annual Shareholders' General Meeting held on April 26, 2019. At a meeting of the Board of Directors, the shareholders approved the inclusion in Management's proposal to be analyzed at the Extraordinary General Meeting (EGM), held on April 30, 2020, the reclassification of these retained earnings to the Investment Reserve.

20.7 Investment reserve

Movida maintains an "Investment Reserve," to fund the expansion of the activities of Movida and/or its subsidiaries and associates, including through the subscription of capital increases or creation of new ventures, which will be formed with up all remaining profit after the legal and statutory deductions. The balances cannot exceed 80% of Movida's subscribed capital, and the balance of this reserve plus other profit reserves, except for the unrealized profit reserve and the contingency reserve, cannot exceed Movida's total subscribed capital.

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reals, unless otherwise stated)

20.8 Dividends and interest on capital payable

Pursuant to Movida's Bylaws, shareholders are entitled to an annual mandatory dividend not lower than 25% of Movida annual net profit, adjusted by the following:

- 5% appropriation to the legal reserve;
- any appropriations to an equity contingency reserve less reversal. A portion of the profit may also be retained for the "investment reserve."

Distributions must be approved at the Annual General Meeting (AGM) that also approves financial statements for the prior year, based on a proposal submitted by the Executive Board and approved by the Board of Directors. Dividends are distributed in accordance with the resolution of this AGM, to be held within the first four months of each year.

Movida's Bylaws permit the distribution of interim dividends, as an advance towards the minimum mandatory dividends.

On June 30, 2024 and December 31, 2023, there was no amount payable relating to dividends and interest on capital accrued from prior periods.

(ii) Movida Locação de Veículos S.A., through a commercial agreement, carries out sublease and sale of vehicles for Movida Participações S.A. In the six-month period ended June 30, 2024, vehicles were returned. In April 2024, there was a cancellation signed between the parties relating to the vehicle sale operation that took place in December 2023, as reported in explanatory note 1. This operation did not have any effect on the equity balances and consolidated results.

24.5 Administrative service center

The Simpar Group allocates shared service expenses for administrative structure and back-office expenses based on criteria defined in technical studies. The Administrative Service Center ("CSA") does not charge management fees or apply profitability margins on the services rendered, passing on only the costs. Infrastructure and administrative structure expenses shared with Simpar totaled R\$ 23,695 at June 30, 2024, accounting for 0.37% of Movida's net revenue (R\$ 26,751 at June 30, 2023 or 0.52% of Movida's net revenue).

24.6 Management compensation

For the period ended June 30, 2024, the compensation, including payroll charges, paid to key management personnel was R\$ 7,843 (R\$ 8,944 at June 30, 2023), in the consolidated. Management is not awarded post-employment benefits or other long-term benefits, other than from the share-based payment plan and restricted shares (Notes 20.3 and 20.4), as follows:

Management	06/30/2024	06/30/2023
Fixed compensation	4,240	4,901
Variable compensation	3,547	1,796
Benefits	56	112

26. EARNINGS PER SHARE

Basic earnings per share are calculated by dividing the net profit (loss) attributable to the owners of the Company by the weighted average number of common shares issued during the period, excluding common shares repurchased by the Company and held in treasury.

The calculation of basic earnings per share is presented below:

(Loss) profit from operations	06/30/2024	06/30/2023
Numerator:		
Profit for the period	91,096	3,178
Denominator:		
Weighted average number of outstanding shares	359,775,009	359,775,009
Basic earnings per share - R\$	0,2532	0,0088

Notes to the parent company and consolidated quarterly information at June 30, 2024
(In thousands of Brazilian Reals, unless otherwise stated)

The diluted earnings per share are calculated by adjusting the weighted average number of outstanding common shares, assuming the conversion of all potentially dilutive common shares.

Movida's stock option program could dilute share ownership. A calculation is made to determine the number of shares that would be acquired at fair value (determined as the average annual market price of the Company's share), based on the value of the subscription rights linked to the outstanding stock options. The number of shares calculated as previously is compared with the number of shares outstanding, assuming the term of the stock options.

The calculation of diluted earnings per share is presented below:

	06/30/2024	06/30/2023
Numerator:		
Profit for the period	91,096	3,178
Denominator:

Report on review of quarterly information

To the Board of Directors and Shareholders
Movida Participações S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Movida Participações S.A. ("Company"), included in the Quarterly Information Form (ITR) for the quarter ended June 30, 2024, comprising the statements of financial position at that date the statements of income and comprehensive income for the quarter and six-month period then ended, and the statements of changes in equity and cash flows for the six-month period then ended, and explanatory notes.

Management is responsible for the preparation of the parent company interim accounting information in accordance with the accounting standard CPC 21 - "Interim Financial Reporting", of the Brazilian Accounting Pronouncements Committee (CPC), and of the consolidated interim accounting information in accordance with CPC 21 and International Accounting Standard (IAS) 34 - "Interim Financial Reporting" issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR).

Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", and ISRE 2410 - "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently did not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the parent company interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Movida Participações S.A.

Conclusion on the consolidated interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

The quarterly information referred to above includes the parent company and consolidated statements of value added for the six-month period ended June 30, 2024. These statements are the responsibility of the Company's management and are presented as supplementary information under IAS 34. These statements have been subjected to review procedures performed together with the review of the quarterly information for the purpose of concluding whether they are reconciled with the interim accounting information and accounting records, as applicable, and if their form and content are in accordance with the criteria defined in the accounting standard CPC 09 - "Statement of Value Added". Based on our review, nothing has come to our attention that causes us to believe that these statements of value added have not been properly prepared, in all material respects, in accordance with the criteria established in this accounting standard, and consistent with the parent company and consolidated interim accounting information taken as a whole.

Monitoring of projections and estimates disclosed by the Company

Aligning its **commitment to the generation of value** for shareholders, the Company discloses key indicators for 2Q24 referring to **operating projections ("guidance")** that are part of its **focus on the execution of the strategic plan for 2024**.

Rent-a-Car (RAC) - Beginning of recomposition of daily price and yield

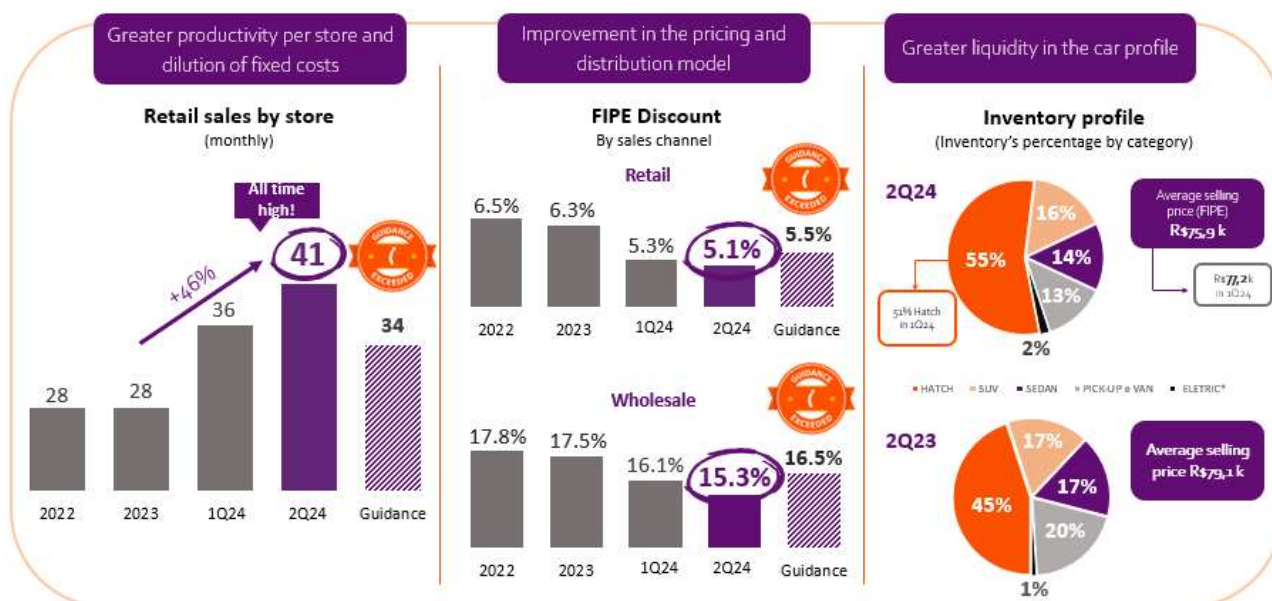

- As a **primary strategy to improve profitability** of the segment, the Company focuses on the **recomposition of the daily price (yield)** and believes it is possible to expand the **monthly average yield of RAC's operating fleet to 4.2% per month** in 2024, having already reached **4.0% per month** in 2Q24.

¹ Indicators consider average acquisition ticket for the average operational fleet. NOTE: Guidance for 2024 released by the Company via Material Fact dated 04/12/2024.

Pre-owned cars - Productivity Gain

- Focusing on **maximizing productivity** in the Pre-owned cars segment and **enhancing adopted margins**, the Company believes it is possible to:
 - Increase the **sales of pre-owned vehicles in the retail market** for an average of **34 cars per store per month**, which would represent an increase of 21% compared to the 2023 average, having already reached **41 cars per store** in 2Q24; and
 - Reduce the **discount applied against the FIPE table** for the sale of pre-owned cars to **5.5% in retail** and **16.5% in wholesale** in 2024, having already reached **5.1% in retail** and **15.3% in wholesale** in 2Q24.

* We have 64 electric cars in inventories and 362 electric cars in the company's operational fleet. NOTE: Guidance for 2024 released by the Company via Material Fact dated 04/12/2024.

Fleet Management and Outsourcing (GTF) - Prioritization in capital allocation

- To increase the **results predictability and stability** and **boost the consolidated profitability** of the Company, Movida believes it is possible to increase the **share of the GTF segment to 60%** of the invested capital up to the end of 2024, prioritizing capital allocation in this segment, having already reached **61%** in 2Q24.

Greater representation in capital allocation in GTF fuels returns with greater stability and predictability in results and cash generation

NOTE: Guidance for 2024 released by the Company via Material Fact dated 04/12/2024.
