A Publicly Traded Company with Authorized Capital

CNPJ nº 21.240.146/0001-84

NIRE 35.300.489.543

**NOTICE TO THE MARKET**

**AgroGalaxy Participações S.A.** (B3: AGXY3) ("AgroGalaxy" or the "Company"), hereby notifies our shareholders and the market in general that we issued Agribusiness Receivables Certificates ("*Certificados de Recebíveis do Agronegócio*" or "CRAs") for green funding.

This is a pioneering issuance in the agricultural inputs retail sector, with the purpose of supporting rural producers while transitioning to sustainable, low-carbon and regenerative agriculture. The first phase of the program begins with the issuance of up to BRL 25 million in CRAs qualified as "transitional" by Nint's Second Opinion, directing funds to up to 25 rural producers working with grain crops such as soy, wheat, corn, and coffee. The project should cover around 10,000 hectares in areas located in the Amazon, Cerrado and Atlantic Forest biomes.

This issuance is included in the GreenGalaxy program, through which the Company is making agricultural production possible for customers by offering a portfolio added with bio-inputs and recovery of degraded areas to be converted into productive land. By the end of 2023, AgroGalaxy estimates reaching around 100,000 hectares and estimates up to 2 million hectares will be covered by 2030.

Since 2020, producers joining GreenGalaxy undergo a socio-environmental analysis to assess the level of non-deforestation on properties submitted to the program and commit to hold off deforesting while participating in the program.

JGP Asset Management contributed to designing the program, as well as setting goals and metrics. The manager acted as an anchor investor in this operation and supported the adequacy criteria for the issuance according to the IFACC ("*Inovação Financeira para Amazônia, Cerrado e Chaco*", or Financial Innovation for the Amazon, Cerrado and Chaco) initiative, and relied on the VERT Group in structuring the financial operation and in approaching customers adhering to GreenGalaxy.
