

Banco Itaú Chile
acting directly
or through its New York Branch,
Itaú Chile New York Branch

US\$2,000,000,000
Medium Term Notes Program

Under this US\$2,000,000,000 Medium-Term Notes Program (the “**Program**”), Banco Itaú Chile (“**we**,” “**our**,” “**us**,” the “**Bank**,” “**Banco Itaú Chile**” or “**Itaú Chile**”), acting directly or through Itaú Chile New York Branch (the “**New York Branch**”), may from time to time issue medium term notes (“**Notes**”) which may be issued on a senior or subordinated basis or as capital securities. The Notes will be offered outside the United States to non-U.S. persons (as such term is defined in Rule 902 under the Securities Act (a “**non-U.S. Person**”)) pursuant to Regulation S (“**Regulation S**”) under the Securities Act of 1933, as amended (the “**Securities Act**”).

The Notes will be denominated in any currency agreed upon between Banco Itaú Chile, acting directly or through the New York Branch (each of Banco Itaú Chile and its New York Branch, as the case may be, being an “**Issuer**”) and the relevant dealers referred to herein with any other dealers appointed in connection with an issue of Notes (collectively, the “**Dealers**”), as specified in any preliminary terms (as superseded by any Final Terms (as defined herein)) or of each Note provided for in the Final Terms. For more information, see “Description of the Notes.”

Each initial and subsequent purchaser of the Notes offered hereby in making its purchase will be deemed to have made certain acknowledgements, representations and agreements intended to restrict the resale or other transfer of such Notes and may in certain circumstances be required to provide confirmation of compliance with such resale or other transfer restrictions below and as set forth in “Important Notices” and “Transfer and Selling Restrictions.”

Notice of the aggregate nominal amount of Notes, interest (if any) payable in respect of Notes, the issue price of Notes and any other terms contemplated herein which are applicable to a particular issuance of Notes will be set out in the relevant final terms relating to such Notes (the relevant “**Final Terms**”).

See “Risk Factors” beginning on page 24 of this Base Prospectus for a discussion of certain significant risks you should consider in connection with an investment in the Notes.

Application has been made to the Singapore Exchange Securities Trading Limited (the “**SGX-ST**”) for permission to deal in, and for quotation of, any Notes which are agreed at the time of issue to be so listed on the SGX-ST. The Issuer may also apply to list, and for quotation of, any Notes in other stock exchanges or they may remain unlisted, as specified in the relevant Final Terms. There is no assurance that the application to the Official List of the SGX-ST or to other stock exchanges for the listing of the Notes of any Series will be approved. The SGX-ST or any other stock exchange assume no responsibility for the accuracy of any of the statements made or opinions expressed or reports contained herein or the contents of this document, make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon any part of the contents of this Base Prospectus. The admission of any Notes to the Official List of the SGX-ST or to other stock exchanges is not to be taken as an indication of the merits of the Issuer, the Program or the Notes.

This Base Prospectus has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area (“**EEA**”) will be made pursuant to an exemption under Regulation (EU) 2017/1129 (as amended or superseded, the “**Prospectus Regulation**”) from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in that Member State of Notes which are the subject of the offering contemplated in this Base Prospectus may only do so to legal entities which are qualified investors as defined in the Prospectus Regulation, provided that no such offer of Notes shall require the Issuer or any of the Dealers to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case in relation to such offer.

Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes to any legal entity which is not a qualified investor as defined in the Prospectus Regulation. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes through any financial intermediary, other than offers made by the Dealers, which constitute the final placement of the Notes contemplated in this Base Prospectus.

This Base Prospectus has been prepared on the basis that any offer of Notes in the United Kingdom (“UK”) will be made pursuant to an exemption under the UK Prospectus Regulation and the Financial Services and Markets Act 2000 (as amended, the “FSMA”) from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in the UK of Notes which are the subject of the offering contemplated in this Base Prospectus may only do so to legal entities which are qualified investors as defined in the UK Prospectus Regulation, provided that no such offer of Notes shall require the Issuer or any of the Dealers to publish a prospectus pursuant to Article 3 of the UK Prospectus Regulation or section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation, in each case in relation to such offer.

Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes to any legal entity which is not a qualified investor as defined in the UK Prospectus Regulation. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes through any financial intermediary, other than offers made by the Dealers, which constitute the final placement of the Notes contemplated in this Base Prospectus.

The expression “**UK Prospectus Regulation**” means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “EUWA”).

This Base Prospectus (the “**Base Prospectus**”) may be used only for the purposes for which it has been prepared.

CERTAIN DEFINED TERMS

In this Base Prospectus, except where otherwise specified or the context otherwise requires, all references to “we,” “us,” “our” or “ourselves” are references to Banco Itaú Chile, or any successor thereof, and its subsidiaries, except where otherwise specified or the context otherwise requires. The business of Banco Itaú Chile is described in this Base Prospectus on a consolidated basis, except where otherwise specified or where the context otherwise requires. References to the “**New York Branch**” are to the New York branch of Banco Itaú Chile. References to the “**Issuer**” are to Banco Itaú Chile, acting directly or through the New York Branch. The term “**Chile**” refers to the Republic of Chile, the phrase “**Chilean government**” refers to the government of Chile, the term “**Central Bank**” means the Central Bank of Chile, and the term “**CMF**” means the Chilean Financial Market Commission (*Comisión para el Mercado Financiero*).

IMPORTANT NOTICES

NOT FOR DISTRIBUTION TO ANY PERSON OR ADDRESS IN THE UNITED STATES OR TO ANY U.S. PERSON OR ANY PERSON ACTING FOR THE ACCOUNT OR BENEFIT OF A U.S. PERSON (AS DEFINED IN REGULATION S UNDER THE SECURITIES ACT).

IMPORTANT: Prospective purchasers of the Notes should be aware that the Notes are not guaranteed by, nor do they constitute, an obligation of Itaú Unibanco Holding S.A. (“**Itaú Unibanco Holding**”), or any of its subsidiaries, including Itaú Unibanco S.A. (“**Itaú Unibanco**”).

This Base Prospectus may be reissued in connection with the initial offering of Notes under this Program. Additional arrangers (collectively, the “**Arrangers**”) and additional dealers (collectively, the “**Dealers**”) may be added to the Program pursuant to a Terms Agreement (as defined in the Amended and Restated Dealer Agreement dated November 12, 2025 (the “**Dealer Agreement**”)) in connection with an offering of Notes under the Program.

This Base Prospectus should be read and understood in conjunction with any supplement hereto. Full information on the Issuer and any Notes issued under the Program is only available on the basis of the combination of this Base Prospectus (including any supplement), the Annexes hereto and the relevant Final Terms.

Copies of the Final Terms will be available at the registered office of the Issuer and the specified office set out below of each of the Paying Agents (as defined below) (save that a Final Terms relating to a Note which is neither admitted to trading on a regulated market in the EEA nor offered in the EEA in circumstances where a prospectus is required to be published under the Prospectus Regulation will only be available for inspection by a holder of such Note and such holder must produce evidence satisfactory to the Issuer and the relevant Paying Agent as to its holding of Notes and identity). Final Terms in respect of Notes to be listed on the SGX-ST (or another stock exchange) will be delivered to the SGX-ST (or such other exchange) before the listing of such Notes.

Having made all reasonable enquiries, the Issuer confirms that this Base Prospectus, the Annexes hereto and the relevant Final Terms contain all information with respect to the Issuer and its subsidiaries taken as a whole and the Program and the Notes to be issued under the Program which is material in the context of the issue and offering of the Notes, that such information contained in this Base Prospectus is true and accurate in all material respects and is not misleading, that the opinions and intentions expressed in this Base Prospectus are honestly held and have been reached after considering all relevant circumstances and are based on reasonable assumptions, and that there are no other facts the omission of which would, in the context of the offering and issue of the Notes hereunder, make any statement in this Base Prospectus, when taken together with the Annexes hereto and the relevant Final Terms as a whole, misleading in any material respect. The Issuer accepts responsibility accordingly.

For so long as any Notes remain outstanding, the Issuer will, in the event of any significant new factor, material mistake or inaccuracy relating to information included in this Base Prospectus which is capable of affecting the assessment of any Notes, prepare a supplement to this Base Prospectus or publish a new Base Prospectus for use in connection with any subsequent issue of Notes.

This Base Prospectus does not constitute an offer to sell, or a solicitation of an offer to buy, any of the Notes offered hereby by any person in any jurisdiction in which it is unlawful for such person to make an offer or solicitation. The distribution of this Base Prospectus and the offering of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession this Base Prospectus comes are required by the Issuer, the Dealer(s) and the Trustee (as defined hereinafter) to inform themselves about and to observe any such restrictions. For a description of certain

further restrictions on offers and sales of Notes and distribution of this Base Prospectus, see “Transfer and Selling Restrictions.”

You should rely only on the information contained in this Base Prospectus. No person is or has been authorized to give any information or to make any representation, other than those contained in this Base Prospectus, in connection with the Program or the issue and sale of the Notes and, if given, or made, such information or representation must not be relied upon as having been authorized by or on behalf of the Issuer, any of the Dealer(s) or the Fiscal Agent. The information contained in this Base Prospectus is accurate only as of the date of this Base Prospectus and any Annex herein is accurate only as of its date. The delivery of this Base Prospectus at any time does not imply that the information contained in it is correct as at any time subsequent to its date, regardless of such time of delivery of this Base Prospectus or any sale of Notes.

This Base Prospectus contains summaries intended to be accurate with respect to certain terms of certain documents, but reference is made to the actual document, all of which will be made available to you upon request to the Issuer when available, for complete information with respect thereto, and all such summaries are qualified in their entirety by such reference.

In receiving this Base Prospectus and any supplement (including any relevant Final Terms), you hereby acknowledge that (i) you have been afforded an opportunity to request from the Issuer and to review, and have received, all additional public information considered by you to be necessary to verify the accuracy of, or to supplement, the information contained herein; (ii) you have had the opportunity to review all of the documents described or herein; (iii) you have not relied on the Dealer(s) or any person affiliated with the Dealer(s) in connection with any investigation of the accuracy of such information or the investment decision and (iv) no person has been authorized to give any information or to make any representation concerning the Issuer or the Notes (other than as contained herein) and, if given or made, you should not rely upon any such other information or representation as having been authorized by the Issuer or the Dealer(s).

Neither this Base Prospectus nor any other information supplied in connection with the Program or any Notes (i) is intended to provide the basis of any credit or other evaluation or (ii) should be considered as a recommendation by the Issuer or any of the Dealers that any recipient of this Base Prospectus or any recipient of any other information supplied in connection with the Program or any Notes should purchase any Notes. Each investor contemplating purchasing any Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer. Neither this Base Prospectus nor any other information supplied in connection with the Program or the issue of any Notes constitutes an offer or invitation by or on behalf of the Issuer or any of the Dealers to subscribe for or to purchase any Notes in any jurisdiction where it is illegal to do so.

Each prospective purchaser of the Notes must comply with all applicable laws and regulations in force in any jurisdiction in which it purchases, offers or sells the Notes and must obtain any consent, approval or permission required by it for the purchase, offer or sale by it of the Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers or sales, and neither the Issuer nor any Dealer(s) shall have any responsibility therefor.

None of this Base Prospectus, any preliminary terms, any Annexes hereto or any Final Terms may be used for the purpose of an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or to any person to whom it is unlawful to make such an offer or solicitation.

The Issuer has prepared this Base Prospectus for use in connection with the offer and sale of the Notes outside the United States to non-U.S. Persons in accordance with Regulation S, under the Program. Its use for any other purpose is not authorized. You may not distribute this Base Prospectus to any person, other than a person retained to advise you in connection with the purchase of the Notes.

None of this Base Prospectus, any preliminary terms, any Annexes hereto or any Final Terms should be considered as a recommendation or a statement of an opinion (or a report of either of those things) by the Issuer, the Dealer(s) or any of them that any recipient of this Base Prospectus or any preliminary terms, any Annexes hereto or any Final Terms should subscribe for or purchase any Notes. Each recipient of this Base Prospectus, any preliminary terms, any Annexes hereto or any Final Terms shall be taken to have made its own appraisal of the condition (financial or otherwise) of the Issuer.

See “Risk Factors” in this Base Prospectus for a description of certain factors relating to an investment in the Notes, including information about its business. In addition, any applicable Final Terms may contain specific risk

factors relating to the relevant issue of Notes. None of the Dealers, the Issuer and any of its or their respective representatives is making any representation to any purchaser of the Notes regarding the legality of its investment under any applicable laws, nor is providing any business, legal, financial or accounting advice. Any purchaser of the Notes should be able to bear the economic risk of an investment in the Notes for an indefinite period of time. You should consult with your own advisers as to legal, tax, business, financial and related aspects of a purchase of the Notes.

The Dealers have not verified (and no Dealer will separately verify) the information contained herein or in any supplement hereto or in any Final Terms. Accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility is accepted by the Dealers as to the accuracy or completeness of the information contained in this Base Prospectus or any other information provided by the Issuer. The Dealers do not accept any liability in relation to the information contained in this Base Prospectus or any other information provided by the Issuer in connection with the Program. Any references to websites included in this Base Prospectus are for information purposes only and do not form part of this Base Prospectus.

In connection with any offering of Notes, the Dealers will not be acting for anyone other than the Issuer and will not be responsible to anyone other than the Issuer for providing the protections afforded to their clients nor for providing advice in relation to any offering of Notes.

NOTICE TO U.S. INVESTORS

IN MAKING AN INVESTMENT DECISION, YOU MUST RELY ON YOUR OWN EXAMINATION OF THE ISSUER'S BUSINESS AND THE TERMS OF THE SECURITIES OFFERED BY THIS BASE PROSPECTUS, INCLUDING THE MERITS AND RISKS INVOLVED. THE NOTES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION ("SEC"), ANY STATE SECURITIES COMMISSION IN THE UNITED STATES OF AMERICA (THE "UNITED STATES") OR ANY OTHER U.S. REGULATORY AUTHORITY, NOR HAVE ANY OF THE FOREGOING AUTHORITIES PASSED UPON THE ACCURACY OR THE ADEQUACY OF THIS BASE PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE IN THE UNITED STATES.

THE NOTES HAVE NOT BEEN, AND WILL NOT BE, REGISTERED UNDER THE SECURITIES ACT, OR UNDER THE SECURITIES LAWS OF ANY STATE OR JURISDICTION OF THE UNITED STATES, AND THE NOTES MAY INCLUDE BEARER NOTES THAT ARE SUBJECT TO U.S. TAX LAW REQUIREMENTS. SUBJECT TO CERTAIN EXCEPTIONS, THE NOTES MAY NOT BE OFFERED, SOLD OR DELIVERED WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS (AS DEFINED IN REGULATION S). THIS BASE PROSPECTUS HAS BEEN PREPARED BY THE ISSUER FOR USE IN CONNECTION WITH THE OFFER AND SALE OF THE NOTES OUTSIDE THE UNITED STATES TO NON-U.S. PERSONS IN RELIANCE ON REGULATION S AND FOR LISTING OF THE NOTES ON THE SGX-ST OR ON ANOTHER STOCK EXCHANGE OUTSIDE THE UNITED STATES. THE NOTES ARE SUBJECT TO RESTRICTIONS ON TRANSFERABILITY AND RESALE AND MAY NOT BE TRANSFERRED OR RESOLD EXCEPT AS PERMITTED UNDER THE SECURITIES ACT PURSUANT TO REGISTRATION OR EXEMPTION THEREFROM. AS A PROSPECTIVE PURCHASER, YOU SHOULD BE AWARE THAT YOU MAY BE REQUIRED TO BEAR THE FINANCIAL RISKS OF THIS INVESTMENT FOR AN INDEFINITE PERIOD OF TIME. FOR A DESCRIPTION OF THESE AND CERTAIN FURTHER RESTRICTIONS ON OFFERS AND SALES OF THE NOTES AND DISTRIBUTION OF THIS BASE PROSPECTUS, SEE "PLAN OF DISTRIBUTION" AND "TRANSFER AND SELLING RESTRICTIONS."

NOTICE TO INVESTORS IN THE UNITED KINGDOM

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the "**Financial Promotion Order**"); (ii) are persons falling within Article 49(2)(a) to (d) ("high net worth companies, unincorporated associations etc.") of the Financial Promotion Order, (iii) are outside the United Kingdom; or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000 (as amended, the "**FSMA**") in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all

such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

NOTICE TO PROSPECTIVE INVESTORS IN CHILE

The Notes may not be publicly offered or sold, directly or indirectly, in Chile, or to any resident of Chile, except as permitted by applicable Chilean law. The Notes will not be registered under Law No. 18,045, as amended (*Ley de Mercado de Valores* or the securities market law of Chile) with the Commission for the Financial Markets (*Comisión para el Mercado Financiero*, and together with any predecessor agency, commission or superintendency, the “**CMF**”) and, accordingly, the Notes cannot and will not be offered or sold to persons in Chile except in circumstances which have not resulted and will not result in a public offering under Chilean law, and in compliance with Rule (*Norma de Carácter General*) No. 336, dated June 27, 2012, issued by the CMF (“**CMF Rule 336**”). The Notes being offered will not be registered under the Securities Market Law in the Securities Registry (*Registro de Valores*) or in the Foreign Securities Registry (*Registro de Valores Extranjeros*) of the CMF. Accordingly, the Notes cannot and will not be publicly offered to persons in Chile unless they are registered in the corresponding securities registry. The Notes may only be offered in Chile in circumstances that do not constitute a public offering under Chilean law or in compliance with CMF Rule 336 of the CMF. Pursuant to CMF Rule 336, the Notes may be privately offered in Chile to certain “qualified investors” identified as such therein (which in turn are further described in General Rule No. 216, dated June 12, 2008, of the CMF).

NOTICE TO PROSPECTIVE INVESTORS IN SINGAPORE

This Base Prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this Base Prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes, has not been and will not be circulated or distributed, nor may the Notes be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the “**SFA**”)) pursuant to Section 274 of the SFA or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA and (where applicable) Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018 of Singapore.

Any reference to the SFA is a reference to the Securities and Futures Act 2001 of Singapore and a reference to any term as defined in the SFA or any provision in the SFA is a reference to that term or provision as modified or amended from time to time including by such of its subsidiary legislation as may be applicable at the relevant time.

PROHIBITION OF SALES TO EEA RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a “retail investor” means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the “**IDD**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a “retail investor” means a person who is one (or more) of: (i) a retail client, as defined in the Financial Conduct Authority’s Handbook of Rules and Guidance (the “**FCA Handbook**”); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (as amended, the “**FSMA**”) and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of

Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation. Consequently, no key information document required by the PRIIPs Regulation as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

MIFID II PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPS ONLY TARGET MARKET

Solely for the purposes of each manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (for the purposes of this paragraph, a “distributor”) should take into consideration the manufacturers’ target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of such Notes (by either adopting or refining the manufacturers’ target market assessment) and determining appropriate distribution channels.

UK MIFIR PRODUCT GOVERNANCE / PROFESSIONAL INVESTORS AND ECPS ONLY TARGET MARKET

Solely for the purposes of each manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties as defined in the FCA Handbook Conduct of Business Sourcebook (“**COBS**”), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA (“**UK MiFIR**”); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (for the purposes of this paragraph, a “distributor”) should take into consideration the manufacturers’ target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of such Notes (by either adopting or refining the manufacturers’ target market assessment) and determining appropriate distribution channels.

NOTICE TO PROSPECTIVE INVESTORS IN CANADA

The Notes may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Base Prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory for particulars of these rights or consult with a legal advisor.

ENFORCEABILITY OF JUDGMENTS

Banco Itaú Chile is a banking corporation organized under the laws of Chile. None of the Bank's directors and the majority of its executive officers are not residents of the United States, the Bank is not a resident of the United States, and all or a substantial portion of the Bank's assets and those of such persons are located outside the United States. As a result, it may not be possible for you to effect service of process within the United States upon the Bank or such persons or to enforce against them or the Bank in the United States or other foreign courts, judgments obtained in the United States predicated upon the civil liability provisions of the federal securities laws of the United States.

No treaty exists between the United States and Chile for the reciprocal enforcement of court judgments. Chilean courts, however, have enforced final judgments rendered in the United States, subject to the review in Chile of the United States judgment in order to ascertain whether certain basic principles of due process and public policy have been respected, without reviewing the merits of the subject matter of the case. If a United States court grants a final judgment in an action based on the civil liability provisions of the federal securities laws of the United States, enforceability of this judgment in Chile will be subject to the obtaining of the relevant "exequatur" (i.e., recognition and enforcement of the foreign judgment) according to Chilean civil procedure law in force at that time, and consequently, subject to the satisfaction of certain factors. Currently, the most important of these factors are the absence of any conflict between the foreign judgment and Chilean laws (excluding for this purpose the laws of civil procedure) and public policies; the absence of a conflicting judgment by a Chilean court relating to the same parties and arising from the same facts and circumstances; the absence of any further means for appeal or review of the judgment in the jurisdiction where judgment was rendered; the Chilean courts' determination that the United States courts had jurisdiction; that service of process was appropriately served on the defendant and that the defendant was afforded a real opportunity to appear before the court and defend its case; and that enforcement would not violate Chilean public policy. Nevertheless, there is doubt as to the enforceability, in original actions in Chilean courts, of liabilities predicated solely upon the U.S. federal securities laws and as to the enforceability in Chilean courts of judgments of U.S. courts obtained in actions predicated upon the civil liability provisions of the U.S. federal securities laws.

In general, the enforceability in Chile of final judgments of United States courts does not require retrial in Chile.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Base Prospectus contains statements that constitute forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements preceded by, followed by or that include “believes,” “expects,” “intends,” “plans,” “projects,” “estimates” or “anticipates” and similar expressions. These statements are not based on historical facts but instead represent only our belief regarding future events, many of which, by their nature, are inherently uncertain and outside our control and include statements regarding our current intent, belief or expectations with respect to (1) our asset growth and financing plans, (2) trends affecting our financial condition or results of operations, (3) the impact of competition and regulations, (4) projected capital expenditures, and (5) liquidity. Such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and actual results may differ materially from those described in such forward-looking statements included in this Base Prospectus as a result of various factors (including, without limitation, the actions of competitors, future global economic conditions, market conditions, currency exchange rates and operating and financial risks), many of which are beyond our control. The occurrence of any such factors, not currently expected by us, would significantly alter the results set forth in these statements.

Factors that could cause actual results to differ materially and adversely include, but are not limited to:

- trends affecting our financial condition or results of operations;
- our dividend policy;
- changes in the participation of our shareholders or any other factor that may result in a change of control;
- the amount of our indebtedness;
- adverse developments with respect to the financial stability and conditions of our shareholders, counterparties, and business partners;
- natural disasters, including earthquakes or tsunamis, and climate change;
- public health crisis, including pandemics;
- cyber-attacks, terrorism and other criminal activities;
- any failures in, or breaches of, our operational, security, technology systems and artificial intelligence and any failure to protect personal data;
- changes in general economic, business, regulatory or political conditions in Chile, Colombia, Latin America and the rest of the world;
- global economic and political conditions, as well as geopolitical instability, including in relation to the developing conflicts between Russia and Ukraine, the conflicts in the Middle East and any restrictive actions that may be taken by the United States and other countries in response, such as sanctions;
- changes in capital markets in general that may affect policies or attitudes towards lending to Chile or Colombia, Chilean or Colombian companies or securities issued by Chilean companies;
- the monetary and interest rate policies of the Central Bank, or the Central Bank of Colombia (*Banco de la República de Colombia*);
- inflation or deflation;
- unemployment;
- social unrest;
- our counterparties’ failure to meet contractual obligations;

- unanticipated increases in financing and other costs or the inability to obtain additional debt or equity financing on attractive terms;
- unanticipated turbulence in interest rates;
- movements in currency exchange rates;
- movements in equity prices or other rates or prices;
- changes in Chilean, Colombian and foreign laws and regulations;
- changes in Chilean or Colombian tax rates or tax regimes;
- competition, changes in competition and pricing environments;
- concentration of financial exposure;
- our inability to hedge certain risks economically;
- the adequacy of our loss allowances, provisions or reserves;
- technological changes;
- changes in consumer spending and saving habits;
- successful implementation of new technologies;
- loss of market share;
- changes in, or failure to comply with, applicable banking, insurance, securities or other regulations;
- changes in accounting standards;
- difficulties in successfully integrating recent and future acquisitions into our operations;
- our ability to address and forecast economic and social trends affecting our business, and to effectively implement the appropriate strategies; and
- the other factors identified or discussed under “Risk Factors” in this Base Prospectus.

You should not place undue reliance on such statements, which speak only as of the date that they were made. These cautionary statements should be considered in connection with any written or oral forward-looking statements that we may make in the future. We do not undertake any obligation to release publicly any revisions to such forward-looking statements after the date of this Base Prospectus to reflect later events or circumstances or to reflect the occurrence of unanticipated events.

PRESENTATION OF FINANCIAL AND CERTAIN OTHER INFORMATION

General

Banco Itaú Chile is a Chilean bank and maintains its financial books and records in Chilean pesos. As required by local regulations, its financial statements filed with the CMF, which are the basis for dividend distributions, have been prepared in accordance with the accounting principles issued by the CMF (“**Chilean Banking GAAP**”). CMF regulations provide that for those matters not specifically regulated by it, financial statements prepared under Chilean Banking GAAP should follow the accounting principles established by International Financial Reporting Standards (“**IFRS**”). The Issuer has included herein certain information in Chilean Banking GAAP with respect to the Chilean financial system and the financial performance of the Bank. These disclosures are not considered non-GAAP measures as they are required for regulatory purposes in Chile.

The financial data set out in this Base Prospectus is derived from and should be read in conjunction with the following documents:

- the English language translation of the Issuer’s unaudited interim consolidated financial statements and accompanying notes as of March 31, 2025 and 2024 and for the three months ended March 31, 2025 and 2024, prepared in accordance with Chilean Banking GAAP (the “**Unaudited Financial Statements**”), which form part of this Base Prospectus and are included as Annex B.
- the English language translation of the Issuer’s audited consolidated financial statements and accompanying notes as of December 31, 2024 and 2023 and for the two years ended December 31, 2024 and 2023, prepared in accordance with Chilean Banking GAAP (“**2024-2023 Audited Financial Statements**”), which form part of this Base Prospectus and are included as Annex C; and
- the English language translation of the Issuer’s audited consolidated financial statements and accompanying notes as of December 31, 2023 and 2022 and for the two years ended December 31, 2023 and 2022, prepared in accordance with Chilean Banking GAAP (“**2023-2022 Audited Financial Statements**”) and, together with the 2024-2023 Audited Financial Statements, the “**Audited Financial Statements**”), which form part of this Base Prospectus and are included as Annex D.

Our Audited Financial Statements have been audited by PricewaterhouseCoopers Consultores, Auditores y Compañía Limitada, or “**PwC**”, an independent registered public accounting firm. Our Unaudited Financial Statements have been prepared in accordance with Chilean Banking GAAP. The accounting principles used in the preparation of the Unaudited Financial Statements are consistent with those used in the preparation of the Audited Financial Statements. Our Unaudited Financial Statements do not include all the information and disclosures required in the Audited Financial Statements and should be read in conjunction with them. Our historical results for the three months ended March 31, 2025, are not necessarily indicative of results to be expected for the year ended December 31, 2025, or any future period.

The Unaudited Financial Statements and the Audited Financial Statements include the results of the New York Branch.

Foreign Currency

In this Base Prospectus, references to “\$,” “US\$,” “U.S. dollars” and “dollars” are to United States dollars, references to “euro,” “euros,” “EUR” and “€” are to European Union euros, references to “Chilean pesos,” “Ch\$” or “CLP” are to Chilean pesos, references to “UF” are to *Unidades de Fomento* and references to “Colombian pesos” or “COP\$” are to Colombian pesos. The UF is an inflation-indexed, Chilean peso-denominated unit that is linked to and adjusted daily to reflect changes in the previous month’s Chilean Consumer Price Index of the Chilean National Statistics Institute (*Instituto Nacional de Estadísticas*) (“**INE**”). As of December 31, 2024, one UF equaled US\$38.55, Ch\$38,416.69 and COP\$169,760.01. As of March 31, 2025, one UF equaled US\$40.74, Ch\$38,894.11 and COP\$171,264.24.

This Base Prospectus contains translations of certain Chilean peso amounts into U.S. dollars and Colombian pesos at specified rates solely for the convenience of the reader. These translations should not be construed as representations that such Chilean peso amounts actually represent such U.S. dollar or Colombian pesos amounts, were converted from U.S. dollars or Colombian pesos amounts at the rate indicated in preparing the Audited Financial Statements or could be converted into U.S. dollars or Colombian pesos amounts at the rate indicated or any particular rate at all. Unless otherwise indicated, such U.S. dollar and Colombian pesos amounts have been translated from Chilean pesos based

on the Issuer's own exchange rate of Ch\$954.72 and COP\$4,203.96, respectively, per US\$1.00, as the case may be, as of March 31, 2025.

Specific Loan Information

Unless otherwise specified, all references in this Base Prospectus to total loans are to loans and financial leases before deduction for allowances for loan losses, and they do not include loans to banks or unfunded loan commitments. In addition, all market share data and financial indicators for the Chilean banking system when compared to Banco Itaú Chile's financial information, included in this Base Prospectus, are based on information published periodically by the CMF, which is published under Chilean Banking GAAP and prepared on a consolidated basis. Non-performing loans include the principal and accrued interest on any loan with at least one installment more than 89 days overdue. Impaired loans include those loans on which there is objective evidence that customers will not meet some of their contractual payment obligations.

Decree with Force of Law No. 3 of 1997, as amended from time to time (including by Law No. 21,130) (*Ley General de Bancos* or the “**Chilean General Banking Act**”) sets forth capital requirements for banks in Chile that are in line with Basel III standards. According to Article 66 of the Chilean General Banking Law, unless an exception applies, any Chilean must have a base capital requirement corresponding to: (i) 4.5% of basic capital or common equity tier 1 (CET1) on risk-weighted assets (or “**RWA**”), (ii) 6.0% of tier 1 (T1) on RWA, and (iii) 8.0% of effective equity on RWA. In addition, a leverage ratio greater than or equal to 3.0% must be maintained by any Chilean bank, unless an exception applies.

A higher effective net equity and/or a higher basic capital may be required in certain cases, including in the following which are subject to regulations issued by the CMF to implement in Chile the new capital requirements established by Law No. 21,130:

- a. Any Chilean bank is required to have an additional basic capital (“**Conservation Buffer**”) equal to 2.5% of its risk-weighted assets, net of required allowances, above the minimum requirements, with a transitional implementation period that ended in December 2024.
- b. The Central Bank may impose an additional basic capital requirement (“**Counter-Cyclical Buffer**”) of up to 2.5% of a bank's risk-weighted assets, net of required allowances, above the minimum requirements. This additional requirement may be imposed by the Central Bank on a general basis applicable to all banking institutions, as a contra-cyclical measure. The current charge in Chile is 0.5%.
- c. In case of a bank or group of banks of systemic importance (as determined by the CMF through a grounded resolution and with the affirmative consent of the Counsel of the Central Bank), the CMF is entitled to impose, among others, one or more of the following conditions: (y) an increase between 1% and 3.5% to the basic capital over risk-weighted assets, net of required allowances, above the aforementioned 8% minimum effective net equity requirement and (z) an increase of up to 2% to the basic capital over total assets, net of required allowances, above the aforementioned 3% minimum basic capital requirement. The conditions imposed on a bank qualified of systemic importance may be terminated in the event the Council of the CMF determines that a bank is no longer of systemic importance.

On November 2, 2020, the CMF published a regulation setting forth the factors and methodologies to be considered to determine whether a bank or group of banks qualifies as of systemic importance. Banco Itaú Chile is deemed to be of systemic importance under this regulation, which also provides the additional basic capital requirements to be imposed on a bank if it is considered of systemic importance. This regulation, which became effective on December 1, 2020, provided that the additional basic capital requirements be applied progressively from December 1, 2022 to December 1, 2025, at a ratio of 25% per year until reaching 100% on December 1, 2025.

d. If after a review process, to the judgment of the CMF, a bank presents risks not properly protected with the equity requirements mentioned above, the CMF may impose additional equity requirements. Such additional equity requirements may consist of an additional basic capital requirement, or one or more of the instruments that make up the additional tier 1 (AT1) capital and tier 2 (T2) capital. In any event, the additional equity requirements shall not exceed 4% of its risk-weighted assets, net of required allowances. For these purposes, the CMF has issued a regulation setting forth the general criteria and guidelines to determine the additional equity requirements as a result of this CMF supervision process. This regulation imposes on banks the obligation to prepare and deliver a Self-Assessment Report on the Effective Net Equity (*Informe de Autoevaluación de Patrimonio Efectivo* or the “**IAPE**”) to the CMF on a

yearly basis, no later than April each year. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Capital.”

To determine the effective net equity of a bank, the Chilean General Banking Act authorizes the CMF to set forth, through a general regulation, adjustments or exclusions of assets and liabilities, including risk mitigators, that impact the value of the effective net equity of a bank. Pursuant to this authorization, on October 8, 2020, the CMF published a regulation containing the elements of and discounts to the regulatory capital of Chilean banks. This regulation became effective on December 1, 2020, and the regulatory adjustments and exclusions have been applied progressively during a 5-year term, without discounts in 2021, and with progressive increases beginning with 15% on December 1, 2022, 30% from December 1, 2023, 65% from December 1, 2024, and reaching 100% on December 1, 2025. We expect to be in compliance with the required regulatory capital levels commencing on December 1, 2025.

Pursuant to the above-mentioned regulation, the effective net equity or regulatory capital of a bank is the sum of the following factors: (a) Tier 1 capital (T1), plus (b) Tier 2 capital (T2). In turn, (y) tier 1 (T1) capital is the sum of (1) the bank’s basic capital or common equity tier 1 (CET1) (i.e., paid-in capital and reserves) and (2) the additional tier 1 (AT1) capital (i.e., bonds issued without a maturity date and preferred stocks valued at their issue price, for an amount up to one third of the banks’ basic capital), and (z) tier 2 (T2) capital corresponds to (1) subordinated bonds issued by the bank valued at their issue price and for an amount of up to 50% of its basic capital (provided that the value of the bonds shall decrease by 20% for each year that elapses during the period commencing six years prior to their maturity) and (2) the bank’s voluntary allowances for loan losses up to (A) 1.25% of its credit risk-weighted assets, if standard methodologies are applied, or (B) 0.625% in the event non-standard methodologies are applied.

The following table sets forth the Basel III Implementation Calendar for Chilean banks:

	December 1,											
	2022		2023		2024		2025		2026		2027

⁽¹⁾ Systemically Important Banks. The Bank has been designated as an SIB by the CMF.

Rounding and Other Matters

Certain figures included in this Base Prospectus have been rounded for ease of presentation. Percentage figures included in this Base Prospectus have in all cases not been calculated on the basis of such rounded figures but on the basis of such amounts prior to rounding. For this reason, percentage amounts may vary slightly from those obtained by performing the same calculations using the figures in the Issuer’s Audited Financial Statements for the periods indicated therein. Certain other amounts that appear in this Base Prospectus may similarly not sum due to rounding.

Inflation figures relating to Chile are those reported by the INE, unless otherwise stated herein or required by the context. Inflation figures relating to Colombia are those reported by the Colombian National Administrative Department of Statistics (*Departamento Administrativo Nacional de Estadística*), or “DANE”, unless otherwise stated herein or required by the context.

In this Base Prospectus, all macroeconomic data related to the Chilean economy is based on information published by the Central Bank and all macroeconomic data related to the Colombian economy is based on information published by the Central Bank of Colombia or DANE. All market share and other data related to the Chilean financial system is based on information published by the CMF as well as other publicly available information and all market share and other data related to the Colombian financial system is based on information published by the Colombian Financial Superintendency (*Superintendencia Financiera de Colombia*) as well as other publicly available information. The CMF publishes the consolidated risk index (ratio of allowance for loans losses over total loans) of the Chilean financial

system on a monthly basis. The Colombian Financial Superintendency publishes every month the consolidated data required to calculate the risk index of the Colombian banking system (loan loss allowances and total loans).

SUMMARY

This summary highlights, and is qualified in its entirety by, information contained elsewhere in this Base Prospectus. This summary does not contain all the information that may be important to prospective investors. Prospective investors should read this entire Base Prospectus carefully, including the Audited Financial Statements and the Unaudited Financial Statements.

Overview of the Issuer

We are one of the leading private banks in Chile, with over 150 years of history and a nationwide presence in Chile through an extensive network of branches and digital channels. We are part of the Itaú Unibanco group, the largest private bank in Latin America, which holds a controlling interest of 67.42% as of March 31, 2025.

Through our operations in Chile, Colombia, and Panama, as well as a branch in New York and a representative office in Panama and Peru, we offer a comprehensive suite of financial products and services. These include commercial banking, investment banking, asset management, treasury, and digital solutions for individuals, businesses, and institutional clients.

We are a publicly traded company organized under the laws of Chile, and licensed by the CMF to operate as a commercial bank. Our business is conducted in accordance with applicable banking laws and regulations, and we are committed to maintaining compliance with local and international regulatory standards, including capital adequacy and risk management requirements.

We are the resulting entity from the merger of two leading banks in Chile: Corpbanca, the oldest private bank in Chile, and Banco Itaú Chile, a wholly-owned subsidiary of Itaú Unibanco Holding that, since the merger of the former Itaú Chile with and into the former Corpbanca on April 1, 2016 (the “Merger”), has been our sole controlling shareholder. On March 28, 2023, the CMF approved the by-laws amendment resolved at our extraordinary shareholders meeting held on January 19, 2023, including among other things the change of our legal name from Itaú Corpbanca to Banco Itaú Chile. This name change became effective retroactively as of March 28, 2023, following the completion of the required registration and publication on April 3 and 6, 2023, respectively. Our common shares are currently listed in Chile on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange under the ticker symbol “ITAACL” (prior to April 24, 2023, the ticker symbol was “ITAUCOR”).

Our business model combines local expertise, a culture of client-centric innovation, and the strategic and technological backing of Itaú Unibanco. This approach has allowed us to consolidate a leading position in the Chilean market and to support our growth in Colombia and other regional markets.

We provide a broad range of wholesale and retail banking services to our customers in Chile and Colombia. In addition, we provide financial advisory services, asset management, insurance brokerage and securities brokerage services through our subsidiaries, and banking services through our New York Branch. For more information on our services offerings, see “Business”.

We are one of Chile’s largest private financial institutions, ranking as the fourth largest private bank by deposits and as the fifth largest private bank with a market share of 9.5% (considering only loan operations in Chile) as of December 31, 2024, according to the CMF. In Colombia, as of December 31, 2024, we were the tenth largest bank in terms of total assets, the eighth largest bank in terms of total loans and the tenth largest bank in terms of total deposits as reported under local regulatory and accounting principles, according to the Colombian Financial Superintendency.

As of March 31, 2025, we operated a network of 216 branches, both physical and digital, with high adoption of digital channels, which account for a significant share of client interactions and product originations. Of these, 144 branch offices were in Chile, comprising 130 physical branches and 14 digital branches.

As of March 31, 2025, we operated 132 ATMs in Chile, and through our agreement with Redbanc, our customers had access to more than 7,500 additional ATMs in Chile. Additionally, in Colombia, as of March 31, 2025, we operated 72 branch offices and 120 ATMs, and provided our customers with access to 16,000 additional ATMs through Colombia’s other financial institutions.

As of March 31, 2025, we had total assets of Ch\$41,021,041 million, total loans of Ch\$27,343,407 million, a workforce of 6,860 employees (4,698 in Chile and 2,162 in Colombia), total liabilities of Ch\$36,985,147 million including time deposits and other time liabilities of Ch\$13,409,053 million; and shareholders’ equity of Ch\$4,032,353

million. Our annualized return on average tangible shareholders' equity was 12.4% as of March 31, 2025. For the three-month period ended March 31, 2025, we had net interest income of Ch\$293,022 million, and consolidated net income for the period was Ch\$110,759 million.

Our strategy is centered on client satisfaction, operational efficiency, digital innovation, and building long-term relationships, leveraging a distinctive organizational culture that fosters transformation and continuous learning. We are recognized for our brand, corporate culture, sustainability focus, and leadership in client satisfaction, having been named as the market leader for retail client satisfaction for the third consecutive year by Ipsos Servitest.

Banco Itaú Chile's risk management strategy has enabled it to maintain what Banco Itaú Chile believes are stable solvency ratios and risk indicators. As of March 31, 2025, the regulatory capital to risk-weighted assets ratio was 65% under CMF rules aligned with Basel III. Our allowance for loan losses, as of March 31, 2025, was Ch\$793,751 million (excluding allowances for loan losses on loans and receivable to banks), and our risk index (ratio of allowance for loan losses over total loans) was 2.9%, as of the same date.

We have specialized subsidiaries in brokerage, asset management, insurance, and financial advisory, allowing us to deliver integrated solutions across all client segments. Our commercial segmentation groups products and services into two major business units: Corporate and Investment Banking (including large companies, real estate, and high-net-worth clients) and Retail Banking (individuals, SMEs), supported by an active treasury and asset-liability management platform.

Commitment to sustainability, robust corporate governance, and prudent risk management are central to our vision, mission, and strategy, as reflected in transparent dividend policies, a three-lines-of-defense risk model, and recognition for workplace culture and gender equity. Our mission is to deliver comprehensive financial solutions to individuals and businesses, with the purpose of empowering transformation. For a discussion of the material risks that could affect our business, financial condition, and results of operations, see "Risk Factors".

History

The following chart sets forth a summary of the main milestones in the history of the Bank:

Our American Depositary Shares ("ADSs"), each representing one-third of one common share, were previously listed and traded on the New York Stock Exchange under the ticker symbol "ITCL" ("ITCB" prior to May 1, 2023). The ADS program was voluntarily terminated, with delisting from the New York Stock Exchange effective November 20, 2023, and deregistration with the SEC completed by February 18, 2024. Since early 2024, we have no SEC reporting obligations.

We remain a publicly traded company organized under Chilean law, licensed by the CMF, with our common shares listed and traded only on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange. We continue

to maintain an active branch in New York City, which provides specialized international corporate banking services, but we operate without any U.S. listing or SEC reporting obligations.

Ownership Structure

We have one class of common shares, without par value.

As of March 31, 2025, we had 216,340,749 outstanding common shares of which were fully subscribed and paid. At our shareholders' meetings, each shareholder has one vote for each common share he/she owns or represents. Our common shares are listed in Chile on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange under the symbol "ITAACL" ("ITAUCORP" prior to April 24, 2023).

As of March 31, 2025, we had 5,350 shareholders of record, but Itaú Unibanco Holding was our sole controlling shareholder and beneficially owned 67.42% of our outstanding common shares. The remaining shares constitute our public float held by minority shareholders.

Our shareholder structure is as follows:

Shareholders

% Total share capital as of March 31, 2025

Competitive Strengths

We believe we have emerged as a leading banking platform and deepened our expansion in the Andean Region because of the following competitive strengths:

1. ***Key banking player in the Andean Region, with the support from the largest private bank in Latin America: Itaú Unibanco.*** We conduct most of our business in Chile and Colombia, leveraging Itaú Unibanco's regional expertise and global client base.
2. ***Attractive portfolio in Chile with a strong wholesale segment and increasing retail share.*** We believe we have an attractive credit portfolio with an increasing share of retail loans, including mortgages and consumer lending.
3. ***Focus on increasing functionality and improving customer experience on digital channels.*** We remain focused on investing in technological solutions aimed at improving client satisfaction and operational efficiency.
4. ***Customer-centric business model.*** We have a strategy focused on simplicity, agility, and data-driven decision making aiming to enhance the customer journey in Chile and Colombia.
5. ***Expanding and enhancing our financial services with different partnerships.*** We have worked alongside our partners to broaden our product offering and deliver high-quality financial solutions.
6. ***Strong corporate governance and experienced management team in line with long term growth strategy.*** We have an experienced management team aligned with long-term growth strategy, driving innovation and regional transformation.

Strategy

Our strategy is based on a management model focused on sustainable value creation through capital mobilization and responsible financial intermediation. We align our objectives, incentives, and performance indicators across our subsidiaries and business segments in Chile and Colombia through a structured system of objectives, key results (OKRs) and key performance indicators (KPIs). Our strategic plan is guided by four pillars:

1. Customer relationship.
2. Better financial solutions.
3. Operational efficiency.
4. Key capabilities.

This approach is designed to strengthen sustainable profitability, enhance stakeholder value, and support our long-term growth in the Andean Region.

For more information on our competitive strengths and business strategy, see “Business—Strategy”.

General Information about the Issuer

Our legal name is Banco Itaú Chile, and our marketing names are Banco Itaú, Itaú Chile and/or Itaú. The Legal Entity Identifier of Banco Itaú Chile is 549300DDPTTIZ06NIV06. The principal executive offices of Banco Itaú Chile are located at Presidente Riesco 5537, Las Condes, Santiago, Chile. The telephone number of Banco Itaú Chile is +(562) 2660 8000 and its main websites are www.ita.cl and ir.ita.cl. Banco Itaú Chile's agent in United States is Itaú Chile New York Branch, Attention: Joaquín Rojas Walbaum, located at 885 Third Avenue, 33rd Floor, New York, NY 10022. Information set forth on our websites does not constitute a part of this Base Prospectus.

OVERVIEW OF THE PROGRAM

This overview must be read as an introduction to this Base Prospectus and is provided as an aid to investors when considering whether to invest in the Notes, but is not a substitute for the Base Prospectus. Any decision to invest in the Notes should be based on a consideration of the Base Prospectus as a whole, including any Final Terms.

Conditions for determining price to be included in the Base Prospectus

The price and amount of Notes to be issued under the Program will be determined by the Issuer and each relevant Dealer at the time of issue in accordance with prevailing market conditions.

Risk Factors

There are certain factors that may affect the ability of the Issuer to fulfill its obligations under the Notes issued under the Program. Such factors include liquidity, credit and event risks. In addition, there are certain factors that are material for the purpose of assessing the market risks associated with the Notes issued under the Program, including the structure of a particular issue of Notes and risks related to the market generally. See “Risk Factors” in this Base Prospectus.

The Notes and the Program

Issuer: Banco Itaú Chile, acting directly or through the New York Branch, as specified in any preliminary terms (as superseded by any Final Terms) or the Final Terms.

Arrangers: BNP Paribas, BofA Securities, Inc., Itau BBA USA Securities, Inc. and J.P. Morgan Securities LLC

Dealers: BBVA Securities Inc., BNP Paribas, BofA Securities, Inc., Citigroup Global Markets Inc., Crédit Agricole Corporate and Investment Bank, Daiwa Capital Markets America Inc., Goldman Sachs International, HSBC Bank plc, Itau BBA USA Securities, Inc., J.P. Morgan Securities LLC, Morgan Stanley & Co. International plc, SMBC Bank International plc, and UBS AG London Branch, and any other Dealer who determines to participate in an offer of Notes and becomes a Dealer under the Program by executing a joinder agreement attached as an exhibit to the Dealer Agreement executed by BBVA Securities Inc., BNP Paribas, BofA Securities, Inc., Citigroup Global Markets Inc., Crédit Agricole Corporate and Investment Bank, Daiwa Capital Markets America Inc., Goldman Sachs International, HSBC Bank plc, Itau BBA USA Securities, Inc., J.P. Morgan Securities LLC, Morgan Stanley & Co. International plc, SMBC Bank International plc, and UBS AG London Branch at the establishment of the Program.

Notes may also be issued to other dealers and to third parties other than dealers.

Fiscal Agent, Paying Agent, Transfer Agent, Calculation Agent and Registrar: Citibank, N.A., London Branch

Distribution: Notes may be distributed outside the United States to persons other than U.S. persons (as such terms are

defined in Regulation S under the Securities Act) (a “**U.S. Person**”), subject to the selling restrictions under “Transfer and Selling Restrictions.”

- Specified Currencies: Subject to any applicable legal or regulatory restrictions, such currencies as may be agreed between the Issuer and the relevant Dealer(s) (as indicated in the applicable Final Terms).
- Maximum Amount: The aggregate principal amount of Notes outstanding at any time shall not exceed US\$2,000,000,000 or the approximate equivalent thereof in another currency calculated as at the issue date of the relevant Notes.
- Maturities: Notes may be issued in such maturities as may be agreed between the Issuer and the relevant Dealer(s) (as indicated in the applicable Final Terms as the stated maturity), subject to such minimum or maximum term as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the Issuer or the relevant Specified Currency (as defined herein).
- Issue Price: Notes may be issued at an issue price which is equal to, less than or more than their principal amount, as provided in the applicable Final Terms.
- Form of Notes: Notes will be issued in either registered or bearer form as specified in the applicable Final Terms. Notes issued by the New York Branch will be issued solely in registered form.

Each Bearer Note will be represented initially by a temporary global Note, without interest coupons, or a permanent global Note, to be deposited with either a Common Safekeeper (as defined below) (if the global Note is intended to be issued in new global note (the “**NGN**”) form) or a Common Depositary (as defined below) (if the global Note is intended to be issued in classic global note (“**CGN**”) form) for Euroclear and Clearstream, Luxembourg, for credit to the account designated by or on behalf of the purchaser thereof. The interests of the beneficial owner or owners in a temporary global Note will be exchangeable after the Exchange Date (as defined under “Description of the Notes—Forms of Notes”) for an interest in a permanent global Note to be held by either a Common Safekeeper (if the permanent global Note is intended to be issued in NGN form) or a Common Depositary (if the permanent global Note is intended to be issued in CGN form) for Euroclear and Clearstream, Luxembourg, for credit to the account designated by or on behalf of the beneficial owner thereof, or for definitive Bearer Notes or for definitive Registered Notes (as defined below), as provided in the applicable Final Terms. The interests of the beneficial owner or owners in a permanent global

Note will be exchangeable for definitive Bearer Notes or for definitive Registered Notes, as provided in the applicable Final Terms.

If specified in the applicable Final Terms, Notes of each Tranche will be in fully registered form (“**Registered Notes**”). The Registered Notes of any Tranche offered and sold to in reliance on Regulation S, will initially be represented by a global note in registered form (a “**Regulation S Global Note**”). Prior to expiry of the distribution compliance period (as defined in Regulation S) applicable to a Tranche of Notes, beneficial interests in a Regulation S Global Note may not be offered or sold to, or for the account or benefit of, a U.S. Person and such Regulation S Global Note will bear a legend regarding such restrictions on transfer.

Global Notes exchangeable for definitive Notes shall be tradeable only in principal amounts of at least the Specified Denomination (or if more than one Specified Denomination, the lowest Specified Denomination).

Fixed Rate Notes:	The Issuer will pay interest on Fixed Rate Notes on the dates specified in the applicable Final Terms. Fixed interest on Notes will be calculated on the basis of such Fixed Day Count Fraction (as defined under “Description of the Notes—Interest and Interest Rates”) as may be set forth in the applicable Final Terms.
Floating Rate Notes:	The Issuer will pay interest on Floating Rate Notes on the dates specified in the applicable Final Terms. Each Series of Floating Rate Notes will have one or more interest rate bases as indicated in the applicable Final Terms. Interest on Floating Rate Notes will be calculated on the basis of such Floating Day Count Fraction (as defined under “Description of the Notes—Interest and Interest Rates”) as may be set forth in the applicable Final Terms.
Interest Period(s) or Interest Payment Date(s) for Floating Rate Notes:	Such period(s) or date(s) as may be indicated in the applicable Final Terms.
Indexed Notes:	Notes may be issued with the principal amount payable at maturity, or interest to be paid thereon, or both, to be determined with reference to the price or prices of specified commodities or stocks, indices, formulae or other assets or bases of reference as may be specified in such Note and the applicable Final Terms. A separate prospectus comprising the relevant Note and an overview document (as the case may be) will be used for the documentation of an issuance of Indexed Notes.
Redemption:	The Final Terms relating to each Tranche of Notes will indicate (i) that the Notes of that Series can be redeemed prior to their stated maturity for taxation reasons, and (ii) whether the Notes of that Series can be redeemed prior

to their stated maturity at the option of the Issuer upon giving not more than 60 nor less than 10 days written notice to the Noteholders, on a date or dates specified prior to such stated maturity and at a price or prices and on such other terms as are indicated in the applicable Final Terms; provided, however, that Notes denominated in currencies other than U.S. Dollars may be subject to different restrictions on redemption as described in “Special Provisions Relating to Foreign Currency Notes—Minimum Denominations, Restrictions on Maturities, Repayment and Redemption.”

Denomination of Notes:	Notes may be issued in such denominations as may be agreed between the Issuer and the relevant Dealer(s) and as indicated in the applicable Final Terms. In the case of any Notes of any Series where one or more such Notes is to be admitted to trading on a regulated market within the European Economic Area or the United Kingdom or offered to the public in any Member State of the European Economic Area or the United Kingdom in circumstances which would otherwise require the publication of a prospectus under the Prospectus Regulation or the UK Prospectus Regulation, the minimum specified denomination or minimum consideration of the Notes will be at least EUR 100,000 (or, if the Notes are denominated in a currency other than euro, the equivalent amount in such currency).
Taxation:	All payments with respect to the Notes will be made without withholding or deduction for or on account of taxes imposed by any Relevant Taxing Jurisdiction (as described in “Description of the Notes—Payment of Additional Amounts”), unless such withholding is required by law, in which case, subject to certain exceptions, the Issuer will generally pay Additional Amounts as described in “Description of the Notes—Payment of Additional Amounts.” See also “Taxation.”
Status of the Notes:	Each Note will be unsecured and will be either a senior or a subordinated debt obligation or capital securities of the Issuer. Notes which are senior debt obligations will rank equally in right of payment with all other unsecured and unsubordinated debt obligations of the Issuer (except as otherwise provided by applicable law). Notes which are subordinated debt obligations will rank junior in right of payment to all senior indebtedness of the Issuer (except as otherwise provided by applicable law) as specified in the applicable Final Terms, which will set forth the precise terms of such subordination. The terms and conditions of Notes intended to be treated as capital securities pursuant to applicable local Chilean and/or international capital adequacy regulations will be set forth in the applicable Final Terms. See “Description of the Notes—General.”

Rating:	The Notes of each Tranche issued under the Program may be rated or unrated. Where the Notes of a Tranche are rated, such rating (i) will be set out in the Final Terms and (ii) will not necessarily be the same as the rating(s) assigned to the Program. A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.
Modification and amendment of the Notes:	Except for certain matters that require unanimous consent of the holders of each Note of any Series directly and adversely affected thereby, the Fiscal Agency Agreement and the terms and conditions of the notes of a Series may be modified or amended (and future compliance therewith or past Events of Default may be waived) by holders of (i) a majority in principal amount of the outstanding Notes of such Series or (ii) 75% of the principal amount of Notes of such Series represented and voting at the meeting. See “Description of the Notes—Modification of Fiscal Agency Agreement and Notes.” Notes owned by the Issuer or any of its affiliates shall not be deemed to be outstanding for, among other purposes, declaring the acceleration of the maturity of the Notes.
Listing and admission to trading:	Application will be made to the SGX-ST for permission to deal in, and for quotation of, any Notes which are agreed at the time of issue to be so listed on the SGX-ST. The Issuer may also apply to list, and for quotation of, any Notes in other stock exchanges outside the United States. There is no assurance that the application to the Official List of the SGX-ST or to such other stock exchanges for the listing of the Notes of any Series will be approved. For so long as any Notes are listed on the SGX-ST and the rules of the SGX-ST so require, such Notes will be traded on the SGX-ST in a minimum board lot size of S\$200,000 (or its equivalent in other currencies). The Notes will trade on any other stock exchange in a minimum board lot size pursuant to applicable regulation thereof so long as any of the Notes remain listed on such stock exchange.
Clearing System:	As specified in the applicable Final Terms.
Governing Law:	New York law.
Selling Restrictions:	The Notes have not been and will not be registered under the Securities Act and may not be offered or sold except in accordance with Regulation S under the Securities Act or pursuant to another exemption from the registration requirements of the Securities Act.

In addition, Notes issued in bearer form are subject to U.S. tax law requirements. For a description of certain restrictions on offers, sales and deliveries of Notes in the United States, the European Economic Area, the United Kingdom, Australia, Canada and certain other jurisdictions, see “Transfer and Selling Restrictions.”

Risk Factors: Prospective purchasers of the Notes should consider carefully all of the information set forth in this Base Prospectus or any supplement hereto and, in particular, the information set forth under the caption “Risk Factors” in this Base Prospectus.

RISK FACTORS

The following section does not describe all the risks the Issuer faces or that relate to an investment in the Notes. Prior to making an investment decision, prospective investors should carefully read the information contained in this Base Prospectus, including the following factors, considering, among other things, the risk factors with respect to the Issuer's business, to the countries in which it operates, the expansion and integration of acquired businesses, and risks associated with emerging markets, which may not be typically associated with investments in securities of issuers from the United States, Europe or other similar jurisdictions.

The following risk factors are the risks the Issuer considers material as of the date of this Base Prospectus. There may be additional risks that it currently considers immaterial or of which it is currently unaware, and any of these risks could have similar effects to those set forth below. Any applicable Final Terms may contain specific risk factors relating to the relevant issue of Notes.

Potential investors are cautioned that the following important risk factors, and those contained in any applicable Final Terms, among other factors, could affect our actual results and could cause our actual results to differ materially from those expressed in any forward-looking statements made by us or on our behalf. In particular, as Banco Itaú is incorporated in Chile and operates primarily in Chile and Colombia, there are certain risks associated with an investment in the Notes that may not be typically encountered when investing in securities of entities incorporated or operating outside these jurisdictions.

Risks Related to the Issuer and its Business

The following section describes risks that are specific to the Issuer, its operations, strategy and financial position. These risks arise from the Issuer's business model, operational processes, geographic footprint, management decisions, and exposure to market, credit, operational, and regulatory challenges. Any of these risks could materially and adversely affect the Issuer's ability to execute its business strategy, maintain profitability, and meet its obligations under the Notes.

The Growth and Composition of Our Loan Portfolio Expansion May Expose Us to Increased Loan Losses

Our business strategy is to grow profitably while increasing our loan portfolio size. Through the further expansion of our loan portfolio in retail segments, we are seeking to decrease our corporate segment concentration and, as a result, balance our loan portfolio and strengthen our retail operation (particularly in the consumer segment), which may expose us to a higher level of loan losses and require us to establish higher levels of provisions for loan losses.

Our strategy to expand our loan portfolio, particularly in the consumer and retail categories, may expose us to increased loan losses due to the higher risk profile of these segments. Consumer loans, often unsecured or with limited collateral, are particularly vulnerable to borrower-specific risks such as unemployment, inflation, or economic downturns. This may require us to maintain higher levels of provisions for loan losses, which could adversely impact our financial performance.

We believe our total allowances for loan losses is adequate as of the date hereof to cover all known and expected losses in our total loan portfolio. The growth of our loan portfolio may expose us to a higher level of loan losses and require us to establish proportionately higher levels of provisions for loan losses, which would offset the increased income that we can expect to receive as our loan portfolio grows.

Our Loan Portfolio May Not Continue to Grow Sustainably

Past performance of our loan portfolio may not be indicative of future performance. Our loan portfolio may not continue to grow at the same or similar rates as the growth rate that we historically experienced.

Additionally, changes in the Chilean or Colombian economies, including inflationary pressures, currency depreciation, or reduced foreign investment, a slowdown in the growth of customer demand, an increase in market competition, or changes in governmental regulations could adversely affect the rate of growth of our loan portfolio and increase our risk exposure.

For example, in 2024 the Chilean banking sector experienced subdued lending activity. Despite interest rate cuts during the year, economic activity and job creation remained low. As a result, the Chilean financial system's loan portfolio showed no real growth. In this scenario, our market share in loans showed a reduction of 0.22% in 2024 as

compared to 2023, without considering our Colombian subsidiary and without presenting changes with respect to our relative position in relation to the previous year.

Accordingly, there can be no assurance that our loan portfolio will maintain its historical growth trends or performance levels. Any prolonged period of slower loan growth, deterioration in credit quality, or adverse macroeconomic conditions in the markets where we operate could materially and negatively impact our financial condition, results of operations, and prospects. Furthermore, if we are unable to adapt our business strategy to changing market conditions or effectively manage credit and market risks, our profitability and competitive position could be adversely affected.

Our Allowances for Loan Losses May Not Be Adequate to Cover Actual Losses

The amount of allowance for loan losses is based on our ongoing assessment and expectations concerning various factors affecting the quality of our loan portfolio, including macroeconomic conditions in Chile and Colombia, borrower financial health, collateral values, and regulatory changes.

These factors include, among others, our customers' financial condition, repayment abilities and repayment intentions, the realizable value of any collateral, the prospects for support from any guarantor, the condition of the Chilean and Colombian economies, government macroeconomic policies, interest rates, and the legal and regulatory environment. Many of these factors are beyond our control. In addition, as these factors evolve, the models we use to determine the appropriate level of allowance for loan losses require recalibration, which may lead to increased provisions for loan losses.

If our assessment of, and expectations concerning, the abovementioned factors differ from actual developments, or if the quality of our loan portfolio deteriorates, additional reserves may be required, potentially impacting our financial results.

The quality of Our Loan Portfolio May Deteriorate, Adversely Affecting Our Financial Condition and Results of Operations

We cannot assure you that our credit risk management policies, procedures, and systems are free from any deficiency. Failure of credit risk management policies, procedures or systems may result in an increase in the level of non-performing loans and adversely affect the quality of our loan portfolio. In addition, the quality of our loan portfolio may deteriorate due to various reasons, including factors beyond our control, such as macroeconomic factors affecting the Chilean or Colombian economies. If such deterioration were to occur, it could materially and adversely affect our financial condition and results of operations.

Additionally, due to limitations in the availability of information and the developing information infrastructure in Chile and Colombia, our assessment of the credit risks associated with a particular customer may not be based on complete, accurate or reliable information. In addition, although we have been improving our credit scoring systems to better assess borrowers' credit risk profiles, we cannot assure you that our credit scoring systems collect complete or accurate information reflecting the actual behavior of customers or that their credit risk can be assessed correctly.

Furthermore, a substantial number of our customers consist of individuals and small-to-medium-sized enterprises ("SMEs"). Our retail and SME business is more likely to be adversely affected by downturns in the Chilean and Colombian economies, including by unemployment and currency volatility, than our business from large corporations and high-income individuals. For example, unemployment directly affects the capacity of individuals to obtain and repay consumer loans. Consequently, this could materially and adversely affect the liquidity, business, and financial condition of our customers, which may in turn cause us to experience higher levels of past-due loans, and result in higher allowances for loan losses, which could in turn materially affect our asset quality, results of operations, and financial condition.

The Value of any Collateral Securing Our Loans May Not Be Sufficient, and We May Be Unable to Realize the Full Value of the Collateral Securing Our Loan Portfolio

The value of any collateral securing our loan portfolio may significantly fluctuate or decline due to factors beyond our control, such as market factors, environmental risks, natural disasters, macroeconomic factors, and political events affecting the Chilean or Colombian economies. Any decline in the value of the collateral securing our loans may result in a reduction in the recovery from collateral realization and may have an adverse impact on our results of operations and financial condition. We may also not have sufficiently recent information on the value of collateral, which may

result in an inaccurate assessment for impairment losses of our loans secured by such collateral, which may adversely affect our results of operations and financial condition.

In addition, we may face difficulties in enforcing our rights as a secured creditor. In particular, timing delays and procedural problems in enforcing against collateral and local protectionism in the markets in which we operate may make foreclosures on collateral and enforcement of judgments difficult and may result in losses that could materially and adversely affect our results of operations and financial condition.

We May Be Unable to Meet Capital and Liquidity Adequacy Requirements

We are subject to certain regulatory capital requirements. We may be required to raise additional capital in order to maintain our capital adequacy ratios above the minimum required levels set by Chilean and Colombian regulators, which align with Basel III standards. Our ability to raise additional capital may be limited by numerous factors, including financial condition, results of operations general market conditions for capital-raising activities by commercial banks, and global economic, political, and regulatory conditions. If we require additional capital in the future, we cannot assure you that we will be able to obtain such capital on favorable terms, in a timely manner, or at all. Furthermore, the regulators may increase the minimum capital adequacy requirements applicable to us. Accordingly, we may face difficulties in meeting these requirements in the future.

If we fail to meet capital adequacy requirements, we may be required to take corrective actions or be subject to sanctions. These measures or sanctions could materially and adversely affect our business reputation, financial condition, and results of operations. In addition, if we are unable to raise enough capital in a timely manner, the growth of our loan portfolio and other risk-weighted assets may be restricted, and we may face significant challenges in implementing our business strategy. As a result, our prospects, results of operations and financial condition could be materially and adversely affected.

We are also subject to liquidity requirements. There can be no assurance that the application of the existing regulatory liquidity requirements, standards or recommendations will not require us to issue additional securities that qualify as own funds or eligible liabilities, to maintain a greater proportion of our assets in highly-liquid but lower-yielding financial instruments, to liquidate assets, to curtail business or to take any other actions. As a result, we cannot assure you that liquidity requirements imposed by our regulators will not have a material impact on our financial condition or results of operations.

We Are Dependent on Key Personnel

Our development, operation, and growth depend significantly on the expertise and continuity of our senior management and other key personnel. The loss of key personnel for any reason, including retirement, or our inability to attract and retain qualified replacements, could have a material adverse effect on our business, financial condition, and results of operations.

We Are Subject to Market Risk

We are affected by changes in global economic and geopolitical conditions, as both domestic and international factors and market structures impact our activities. As a bank with regional exposure, market risk, which is the risk of losses from movements in market prices, is inherent in the products and instruments associated with our operations, including loans, deposits, securities, bonds, proprietary trading in assets and liabilities, and derivatives. Changes in market conditions that may affect our financial condition and results of operations include fluctuations in interest and currency exchange rates, securities prices, and changes in the implied volatility of interest rates and foreign exchange rates, among others.

For example, the conflict between Russia and Ukraine has resulted in the imposition of significant financial and economic sanctions by the United States, the European Union, the United Kingdom, and other jurisdictions, including restrictions on transactions with Russian entities and sovereign debt, as well as trade and investment in certain regions. These measures, along with the ongoing military actions, have contributed and may continue to contribute to disruptions in global distribution channels, increased input and energy costs, heightened volatility in foreign exchange rates, and a rise in global inflationary pressures.

Additionally, geopolitical tensions involving other regions, such as the conflicts in the Middle East, and the growing tensions between China and the United States, have impacted and may further impact global trade and capital flows. These developments could result in supply constraints of raw materials, higher energy and food prices, tighter

global financial conditions, and capital flow reversals, all of which may negatively affect economic growth in our core markets and increase compliance risks for our operations.

Furthermore, in 2025, the U.S. government announced the imposition of trade tariffs on many of its trade partners. The imposition of tariffs by the U.S. could have a significant impact on international trade and supply chains, potentially resulting in lower global growth. Increased protectionism and trade tensions could aggravate, which could have a negative impact on the economies in which we operate. See “—The U.S. Federal Administration May Introduce Political Changes that Could Affect our Business, Financial Condition and Results of Operations”.

These economic and geopolitical events could have a material adverse effect on our business and financial performance, including through increased costs of compliance, restrictions on our and our clients’ ability to enter into transactions with counterparties in specific regions of the world, higher volatility in foreign currency exchange rates, and increased input costs (such as commodities).

The U.S. Federal Administration May Introduce Political Changes that Could Affect our Business, Financial Condition and Results of Operations

Donald J. Trump was elected as President of the United States in November 2024 and inaugurated on January 20, 2025. Actions taken by President Trump’s administration could have a negative impact on the Chilean and Colombian economies, such as reductions in remittances, reduced commercial activity or bilateral trade or declining foreign direct investment in Chile and Colombia. In addition, increased, or perceptions of increased, economic protectionism in the United States could lead to lower levels of trade, investment and economic growth, which could have a negative impact on the Chilean and Colombian economies and therefore, on our business, financial condition and results of operations.

Since taking office, President Trump’s administration has implemented several significant measures, including the enforcement of stringent immigration policies, such as mass deportations of undocumented migrants, and the strengthening of border security. Additionally, the U.S. government has announced the imposition of tariffs on imported goods originating from certain countries. On April 2, 2025, the U.S. government announced the imposition of additional tariffs, with a universal baseline tariff of 10% on all imports into the United States and additional reciprocal tariffs of varying rates targeted at several countries identified as having non-reciprocal or discriminatory trading practices. Colombia and Chile are among those impacted by the universal 10% baseline tariff. Additionally, in August 2025, the U.S. government announced new tariffs affecting a wide array of countries and these tariffs are still subject to ongoing revisions. These measures present potential risks to the international trade, foreign relations, and labor markets. In particular, the Chilean and Colombian economies can be negatively impacted by these measures and, as a result, our business, financial condition and results of operations may be adversely affected. The extent and duration of the tariffs by the U.S. government and the resulting impact on general economic conditions and on our business are uncertain and depend on various factors, such as negotiations between the U.S. and affected countries, the responses of other countries or regions, and exemptions or exclusions that may be granted.

We cannot assure you that developments in the United States or elsewhere will not have a material adverse effect on our business, financial condition, results of operations.

Our Results of Operations Are Affected by Interest Rate Volatility and Inflation

Our results of operations depend to a great extent on our net interest income. Changes in market interest rates in Chile or Colombia could affect the interest rates earned on our interest-earning assets differently from the interest rates paid on our interest-bearing liabilities and could result in a reduction of our net interest income. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the Central Bank of Chile and the Central Bank of Colombia, changes in regulation of the financial sector in Chile and Colombia, economic and political conditions, and other factors.

In the current global economic climate, there is a greater degree of uncertainty and unpredictability in the policy decisions and the setting of interest rates by the Central Bank of Chile and the Central Bank of Colombia, particularly in response to global inflationary pressures and monetary tightening by major economies. In addition, inflation volatility, particularly in the event of sharp inflation increases, could adversely affect our net interest income due to the structural gap that exists between inflation-indexed assets and liabilities.

Furthermore, any increase in interest rates in other countries, could reduce overall liquidity and investor interest in the Chilean and Colombian capital markets. While tight monetary policies in Chile and Colombia with high interest

rates may restrict growth and the availability of credit, more lenient policies and interest rate decreases may trigger increases in inflation, and, consequently, growth volatility and the need for sudden and significant interest rate increases, which could adversely affect our financial performance.

In Colombia, we also operate in a highly competitive environment, and increased competitive conditions are to be expected. Intensified merger activity in the financial services industry produces larger, better-capitalized, and more geographically diverse firms that are capable of offering a wider array of financial products and services at more competitive prices. Our ability to maintain our competitive position in Colombia depends mainly on our ability to fulfill new customers' needs through the development of new products and services and to offer adequate services as well as to strengthen our customer bases through cross-selling. In addition, our efforts to offer new services and products may not succeed if product or market opportunities develop more slowly than expected or if the profitability of opportunities is undermined by competitive pressures.

Our Risk Management System May Not Be Sufficient to Avoid Losses

In addition to lending, our financial activities involve trading of securities and derivatives by our treasury division. Our financial success depends on, among other factors, our ability to accurately balance risks and returns from our operations. We use various processes to identify, analyze, manage, and control our risk exposure, both in favorable and adverse market conditions. However, these processes involve complex models and assumptions, based on historical data, correlations, and macroeconomic projections, which ultimately require judgment and may not fully capture future developments. Because of the nature of these risks, we cannot guarantee that our risk management efforts will prevent us from experiencing losses that could have a material adverse effect on our business, financial condition, and results of operations. In particular, we may experience losses if, among other factors:

- we are not capable of identifying all the risks that may affect our portfolio;
- our risk analysis or our measures taken in response to such risks are inadequate or inaccurate;
- the markets move in an unexpected and adverse way with respect to speed, direction, strength, or other aspects, and our ability to manage risks in such a scenario is restricted;
- our clients are affected by unforeseen events resulting in their default or losses in an amount higher than those considered in our risk analyses; or
- collateral pledged in our favor is insufficient to cover our clients' obligations to us if they default.

We Are Subject to Concentration Risk

Concentration risk is the risk associated with potentially high financial losses triggered by significant exposure to a particular component of risk, whether it is related to a particular counterparty, industry, geographic region, mitigating instruments, index, or currency. Examples of such risks include significant exposure to a single counterparty, to counterparties operating in the same economic sector or geographical region, to business segments or credit products, or to financial instruments that depend on the same index or currency. For instance, our exposure to Chile's copper-dependent economy heightens our vulnerability to fluctuations in global commodity prices.

While our risk appetite statement and risk management policies and controls are designed to mitigate concentration risk, we cannot assure you that they will prevent the existence of concentrated risk exposures that could have a material adverse effect on our business, financial condition, and results of operations.

Currency Fluctuations Could Adversely Affect Our Financial Condition and Results of Operations

As a material portion of our assets and liabilities is denominated in currencies other than the Chilean Peso, such as the U.S. dollar, and the Colombian Peso, and we are only partially hedged against currency fluctuations, any future fluctuations in the U.S. dollar and Colombian Peso may result in changes to our consolidated statements of operations and comprehensive income. Additionally, significant changes may occur in the values of these U.S. dollar- and Colombian Peso-denominated assets and liabilities when translated into Chilean Peso. Therefore, our results of operations may be affected by fluctuations in exchange rates between and among the Chilean peso, the Colombian

peso, and the U.S. dollar despite our internal policy and Chilean and Colombian regulations relating to the general avoidance of material exchange rate gaps.

We may decide to change our policy regarding exchange rate gaps. Regulations that limit such gaps may also be amended or eliminated. Greater exchange rate gaps could increase our exposure to the devaluation of the Chilean peso and/or the Colombian peso, and any such devaluation may impair our capacity to service our foreign-currency obligations and may, therefore, materially and adversely affect our financial condition and results of operations.

Our Business Is Highly Dependent on Information Technology Systems

Our business is highly dependent on the ability of our information technology systems to accurately process a large number of transactions across numerous and diverse markets and products in a secure and timely manner. The proper functioning of our financial control, risk management, accounting, customer service, and other data processing systems is critical to our business and our ability to compete effectively. We have backup data for our key data processing systems that could be used in the event of a catastrophe or a failure of our primary systems and have established alternative communication networks where available. However, we cannot assure you that our business activities would not be materially disrupted if we experience a partial or complete failure of our information technology systems or communication networks. Such failures could be caused by, among other things, software bugs, server malfunctions, computer virus attacks, cyber-attacks, system upgrades, malware and ransomware, social engineering and phishing attacks, denial-of-service attacks, misconduct, fraud, and other events. In addition, a cyber-attack, including any security breach caused by unauthorized access to information or systems, intentional malfunctions, or loss or corruption of data, software, hardware, or other computer equipment, could have a material adverse effect on our business, results of operations, and financial condition. As the cyber-threat landscape evolves, these attacks are growing in frequency, sophistication, and intensity, and may remain undetected for a period of time. See “—Security Breaches, Including Cyber-Attacks, Could Materially and Adversely Affect our Business, Financial Condition and Results of Operations.”

Additionally, new technologies and technological solutions, such as artificial intelligence, are continually being released. Our ability to remain competitive and achieve further growth will depend in part on our ability to upgrade our information technology systems and increase our capacity on a timely and cost-effective basis. There is no assurance that we will be able to successfully adopt new technology as critical systems and applications become obsolete and better ones become available. Any substantial failure to improve or upgrade information technology systems effectively or on a timely basis could materially and adversely affect our business, financial condition, and results of operations.

Further, during the last five years, the number of our employees working remotely has increased. This may cause increases in the unavailability of our systems and infrastructure, interruption of telecommunication services, generalized system failures and heightened vulnerability to cyberattacks. Accordingly, our ability to conduct our business may be adversely impacted.

We Are Subject to Counterparty Risk

We are exposed to counterparty risk in addition to credit risks associated with our lending and other financial activities. We routinely conduct transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional clients. Many of the routine transactions we enter into expose us to significant credit risk in the event of default by one of our significant counterparties.

We may incur losses if any of our counterparties fail to meet their contractual obligations, due to bankruptcy, lack of liquidity, operational failure, or other reasons. Counterparty risk may arise from, for example, investing in securities of third parties, entering into derivative contracts under which counterparties have obligations to make payments to us, or executing securities, futures, currency, or commodity trades from proprietary trading activities that fail to settle at the required time due to non-delivery by the counterparty or systems failure by clearing agents, clearing houses, or other financial intermediaries. Failure to meet contractual obligations by our counterparties could have a material adverse effect on our business, financial condition, and results of operations.

Security Breaches, Including Cyber-Attacks, Could Materially and Adversely Affect Our Business, Financial Condition, and Results of Operations

In the conduct of our banking operations, we receive, manage, hold, transmit and process certain confidential or sensitive information, including personal information of customers and employees, and offer various internet-based services to our clients, including online banking services and mobile banking apps. A portion of those services are provided through our reliance on third-party systems.

We could be liable for breaches of security in our online banking services, including cybersecurity breaches. The secure transmission of confidential information over the internet is essential to maintain our clients' confidence in our online services. In certain cases, we are responsible for protecting customers' proprietary information as well as their accounts with us. Cyber-attacks are rapidly evolving (including computer viruses, malicious code, ransomware, phishing, or other information security breaches), and we may not be able to anticipate or prevent all such attacks, which could result in the unauthorized release, gathering, monitoring, misuse, loss, or destruction of our or our customers' confidential, proprietary, and other information. Individuals may also seek to intentionally disrupt our online banking services or compromise the confidentiality of customer information with criminal intent. Failure to protect against or mitigate breaches of security or other unauthorized disclosures remains a possibility.

If such events occur, we could be in breach of privacy laws or other laws and/or regulations, which could make us subject to legal proceedings and administrative sanctions, including damages, and, in turn, adversely affect our ability to offer and grow our online services, cause a loss of customer relationships, negatively impact our reputation, and have an adverse effect on our business, results of operations, and financial condition.

In recent years, computer systems of companies and organizations have been targeted, not only by cyber criminals, but also by activists, rogue states, state-supported actors and others. Additionally, in recent years there has been a global trend of increasing security threats. Such security threats are expected to accelerate even more on a global basis in frequency and magnitude as threat actors become increasingly sophisticated in leveraging techniques and tools (including artificial intelligence) that circumvent security controls, evade detection and even remove forensic evidence. In addition, employees working from home and longer-term shifts towards remote or hybrid work may increase cybersecurity risks. The risk of cyberattack may also be heightened in the context of ongoing conflicts and in response to sanctions imposed, such as increased cyberattacks associated with the Russia-Ukraine conflict and conflicts in the Middle-East.

Security threats could give rise to the loss of significant amounts of customer data and other sensitive information, as well as significant levels of liquid assets (including cash). In addition, cyber-attacks could disrupt our electronic systems used to service our customers. As attempted attacks continue to evolve in scope and sophistication, we may incur significant costs in order to modify or enhance our protective measures against such attacks, or to investigate or remediate any vulnerability or resulting breach, or in communicating cyber-attacks to our customers. If we fail to effectively manage our cybersecurity risk, for example by failing to update our systems and processes in response to new threats (or by failing to ensure that our third-party providers have adequate systems and process in place for such purposes), our reputation could be harmed, and our operating results, financial condition, and prospects could be adversely affected through the payment of customer compensation, regulatory penalties, and fines and/or through the loss of assets. In addition, we may also be impacted by cyber-attacks against national critical infrastructures of the countries where we operate, for example, the telecommunications network. Our information technology systems are dependent on such national critical infrastructure and any cyber-attack against such critical infrastructure could negatively affect our ability to service our customers. As we do not operate such national critical infrastructure, we have limited ability to protect our information technology systems from the adverse effects of such a cyber-attack.

We Utilize Artificial Intelligence, which could Expose us to Liability or Adversely Affect our Business.

We utilize, and are continuing to explore further uses of, artificial intelligence in connection with our business, products and services. We integrate artificial intelligence and machine learning technologies into various aspects of our operations, products, and services. These technologies are used to enhance efficiency, automate processes, analyze data, and improve decision-making.

However, there are significant risks involved in utilizing artificial intelligence and no assurance can be provided that its use will enhance our products or services or produce the intended results. For example, artificial intelligence algorithms may be flawed, insufficient, of poor quality, reflect unwanted forms of bias or contain other errors or inadequacies, any of which may not be easily detectable, artificial intelligence has been known to produce false

inferences or outputs, artificial intelligence may subject us to new or heightened legal, regulatory, ethical or other challenges, artificial intelligence may involve inappropriate or controversial data practices by developers and end-users, or other factors adversely affecting public opinion of artificial intelligence, which could impair the acceptance of artificial intelligence solutions, including those incorporated into our products and services.

If the artificial intelligence solutions that we create or use are deficient, inaccurate or controversial, we could incur operational inefficiencies, competitive harm, legal liability, brand or reputational harm, or other adverse impacts on our business and financial results. Further, there can be no assurance that our use of artificial intelligence will be successful in reducing our operational risk or increasing our operational efficiencies or otherwise result in our intended outcomes. Additionally, if any of our employees, contractors, vendors or service providers use any third-party artificial intelligence -powered solutions in connection with our business, it may lead to the inadvertent public disclosure of our proprietary, confidential, sensitive or personal information which may impact our ability to realize the benefit of our intellectual property or proprietary, confidential, sensitive or personal information, harming our competitive position and business. If we do not have sufficient rights to use the data or other material or content on which our artificial intelligence solutions or other artificial intelligence tools we use or rely, we also may incur in liability through the violation of applicable laws and regulations, third-party intellectual property, privacy or other rights, or contracts to which we are a party.

We Rely on Third Parties for Important Products and Services

Third-party vendors provide key components of our business infrastructure, such as loan and deposit servicing systems, back-office and business process support, information technology production and support, internet connections, and network access. Relying on these third parties can be a source of operational and regulatory risk to us, including with respect to security breaches affecting such parties. We are also subject to risk with respect to security breaches affecting the vendors and other parties that interact with these service providers. As our interconnectivity with these third parties increases, we face the risk of operational failure with respect to their systems. We may be required to take steps to protect the integrity of our operational systems, thereby increasing our operational costs and potentially decreasing customer satisfaction. In addition, any problems caused by these third parties, including as a result of them not providing us their services for any reason or performing their services poorly, could adversely affect our ability to deliver products and services to customers and otherwise conduct our business, which could lead to reputational damage and regulatory investigations and intervention.

Replacing these third-party vendors could also entail significant delays and expense, which could negatively impact our business.

We May Experience Operational Problems, Errors, or Misconduct

We are exposed to many types of operational risks, including the risk of misconduct by employees, failure to obtain proper authorizations, failure to properly document transactions, equipment failures, and errors by employees. Although we maintain a system of operational controls, there can be no assurances that operational problems or errors will not occur and that their occurrence will not have a material adverse effect on our business, financial condition, and results of operations.

Our Anti-Money Laundering, Anti-Terrorist Financing, Anti-Bribery and Anti-Corruption Measures May Not Prevent Third Parties from Using Us as a Conduit for Those Activities

We are required to comply with applicable anti-money laundering, anti-terrorist financing, and anti-bribery and anti-corruption laws and regulations, and we have adopted various policies and procedures, including internal controls and “know-your-customer” procedures, aimed at preventing money laundering, terrorist financing and other financial crime activities. In addition, we also rely on our correspondent banks having their own appropriate anti-money laundering, anti-terrorist financing, anti-bribery and anti-corruption procedures, and use what we believe are commercially reasonable procedures for monitoring our correspondent banks.

However, these measures, procedures, and compliance may not be entirely effective in preventing third parties from using us as a conduit for money laundering (including illegal cash operations), terrorist financing, or other financial crime activities without our knowledge or consent. If we were to be associated with money laundering (including illegal cash operations) or terrorist financing, our reputation could be harmed and we could become subject to fines, sanctions, or legal enforcement (including restrictions on international transactions), which could have a material adverse effect on our business, financial condition, and results of operations.

Additionally, we have been, and may in the future be, subject to negative coverage in the media about us or our clients, including with respect to alleged conduct such as failure to detect and/or prevent any financial crime activities or comply with anti-money laundering and anti-terrorist financing laws and regulations. Negative media coverage of this type about us, whether it has merit or not, could materially and adversely affect our reputation and perception among current and potential clients, investors, vendors, partners, regulators and other third parties, which in turn could have a material adverse effect on our operating results, financial condition and prospects as well as damage our customers' and investors' confidence and the market price of our securities.

Moreover, financial and economic crimes have become the subject of enhanced regulatory scrutiny and supervision by regulators globally. Anti-money laundering, anti-bribery and corruption and sanctions laws and regulations are also increasingly complex and detailed. For example, on August 17, 2023, Chilean Law No. 21,595 on economic crimes and offenses against the environment was published in Chile.

Given the increasing complexity and evolving nature of anti-money laundering, anti-terrorist financing, and anti-bribery and anti-corruption frameworks, we cannot guarantee that our policies, procedures, and internal controls will always be sufficient to detect or prevent all improper or illegal activities. Any failure, whether actual or perceived, to comply with these laws and regulations or to prevent financial crime could result in significant regulatory actions, monetary penalties, reputational damage, and increased scrutiny from authorities. Such outcomes could adversely affect our ability to conduct business, maintain relationships with counterparties and correspondent banks, and could materially and negatively impact our financial condition, results of operations, and overall business prospects.

Our Loan and Investment Portfolios Are Subject to Risk of Prepayment, Which May Result in Reinvestment on Less Profitable Terms

Our loan and investment portfolios are subject to prepayment risk, which results from the ability of a borrower or issuer to pay a debt obligation prior to maturity without adequate (or any) prepayment penalties. Increases in repayment activity reduce the weighted average lives of our earning assets and may adversely affect our operating results. Prepayment risk also has an adverse impact on our residential mortgage portfolio, since prepayments could shorten the weighted average life of this portfolio, which may result in a mismatch in funding or in reinvestment at lower yields. Prepayment risk is inherent to our commercial activity, and an increase in prepayments could have a material adverse effect on our business, financial condition, and results of operations.

Exposure to Government Debt Could Have an Adverse Effect on Our Business, Financial Condition, and Results of Operations

We invest in debt securities issued by the Chilean and Colombian governments and the Central Bank of Chile, which, for the most part, are short-term and highly liquid instruments. A default or delay in payment by either the Chilean or Colombian governments could adversely affect our business, financial condition, and results of operations.

A Downgrade of Our Credit Ratings Could Increase Funding Costs and Limit Access to Capital Markets

We cannot predict the actions rating agencies may take in the future and our ratings or outlook could be revised (including downwards) at any time and without any notice by any ratings agency. In general, the future evolution of our ratings will be linked, to a large extent, to the impact of the general global macroeconomic outlook (including as a result of the continuance or escalation of the conflicts in Ukraine and the Middle East), the local macroeconomic outlook, and the evolution of Chile's and Colombia's political environment, among other factors.

Any adverse revision to our credit ratings in Chile or Colombia for domestic and international debt by international rating agencies may adversely affect our cost of funding, including interest rates paid on our deposits and securities. If this were to happen, it could have a material adverse effect on our business, financial performance, and ability to access capital markets.

Mismatches in the Maturity of Our Loan Portfolio and Our Funding Sources Could Materially and Adversely Affect Our Business, Financial Condition, and Results of Operations

We are exposed to maturity mismatches between our loans and sources of funding. The majority of our loan portfolio consists of fixed interest rate loans, and the yield from our loans depends on our ability to balance our cost of funding with the interest rates we charge our borrowers. An increase in market interest rates in Chile or Colombia

could increase our cost of funding, especially the cost of time deposits, and could reduce the spread we earn on our loans, materially and adversely affecting our business, financial condition, and results of operations.

Any mismatch between the maturity of our loan portfolio and our sources of funding would magnify the effect of any imbalance in interest rates, also representing a liquidity risk if we fail to obtain funding on an ongoing basis. In addition, since part of our funding comes from securities denominated in U.S. dollars or other foreign currencies that we issue abroad, any devaluation of the Chilean or Colombian peso against the U.S. dollar or such other foreign currencies could increase the cost of funding in relation to these securities. While we seek to avoid significant mismatches between assets and liabilities due to foreign currency exposure, we may have mismatches from time to time. The Chilean peso has experienced large devaluations and appreciations in the past and could be subject to significant fluctuations in the future. Our results of operations may be affected by fluctuations in the exchange rates between the Chilean peso and the U.S. dollar despite our policy and Chilean regulations relating to the general avoidance of material exchange rate exposure, especially if there is a lack of sources of funding in foreign currency. Greater exchange rate risk increases our exposure to the devaluation of the Chilean peso, and any such devaluation may impair our capacity to service foreign currency obligations and may, therefore, materially and adversely affect our financial condition and results of operations.

We enter into forward exchange transactions or other derivatives to avoid material exchange rate exposure, but our policy regarding exchange rate exposure is subject to change and regulations limiting such exposures may also be amended or eliminated. An increase in our total cost of funds for any of these reasons could result in an increase in the interest rates on our loans, which could, as a result, affect our business, financial condition and results of operations and our ability to attract new customers and expand our loan business.

We Are Subject to Financial and Operational Risks Associated with Derivative Transactions

We enter into derivative transactions primarily to deliver services to our clients, for hedging purposes, and, on a limited basis, for trading purposes. These transactions are subject to market, liquidity, counterparty (the risk of insolvency or other inability of a counterparty to perform its obligations to us), and operational risks.

Market practices and documentation for derivative transactions in Chile and Colombia may differ from those in other jurisdictions. For example, documentation may not incorporate terms and conditions of derivatives transactions as commonly understood internationally. In addition, the execution and performance of these transactions depend on our ability to develop adequate control and management systems and to hire and retain qualified personnel. Moreover, our ability to monitor and analyze these transactions relies on our information technology systems. These factors may further increase risks associated with derivative transactions and, if they are not adequately controlled, could materially and adversely affect the results of our operations and financial condition.

Our Level of Insurance Might Not Be Sufficient to Fully Cover All Liabilities That May Arise in the Course of Our Business

We maintain insurance for losses resulting from fire, explosions, floods, and electrical shorts and outages at our various buildings and facilities. We also have civil liability insurance covering material and physical losses and damages that may be suffered by third parties. We cannot assure you that our level of insurance is sufficient to fully cover all liabilities that may arise in the course of our business or that insurance will continue to be available in the future. In addition, we may not be able to obtain insurance on comparable terms in the future. Our business and results of operations may be adversely affected if we incur liabilities that are not fully covered by our insurance policies.

The Occurrence of Natural Disasters or Terrorist Events or Events of Civil Unrest in the Regions Where We Operate Could Impair Our Ability to Conduct Business Effectively and Could Adversely Affect Our Results of Operations

We are exposed to the risk of natural disasters such as earthquakes or tsunamis, floods, mudslides, and volcanic eruptions in the regions where we operate. We also recognize that natural disasters could be amplified by the effects of climate change. For example, in early 2024, Chile experienced devastating wildfires exacerbated by a severe heatwave and drought conditions linked to the El Niño phenomena and rising temperatures. Similarly, in 2024, Colombia has faced record-breaking temperatures and drought-related challenges affecting local communities and infrastructure.

In the event of a natural disaster, unanticipated problems with our disaster recovery systems could have a material adverse impact on our ability to conduct business in the affected region, particularly if those problems affect our

computer-based data processing, transmission, storage, and retrieval systems and destroy valuable data. In addition, if a significant number of our local employees and managers were unavailable in the event of a disaster, our ability to effectively conduct business could be severely compromised. A natural disaster could damage some of our branches and automated teller machines, or ATMs, forcing us to close damaged facilities or locations, increasing recovery costs as well as causing economic harm to our clients. A natural disaster could have a material adverse effect on local businesses in the affected region and could result in substantial volatility or adverse harm in our business, financial condition, and results of operations.

Furthermore, we could be exposed to terrorist events in the regions where we operate and elsewhere in the world. The potential for military action and heightened security measures in response to such threats may cause significant disruptions to commerce on a global basis, including restrictions on cross-border transport and trade. The consequences of terrorism and the responses thereto are unpredictable and could have an adverse effect on our business operations.

We could also be exposed to events of civil unrest. While recent years have not seen large-scale events comparable to the civil protests in Chile in October 2019, the potential for political or social disturbances remains in both Chile and Colombia. Such events can result in physical damage to our buildings (including our headquarters, offices, branches and ATMs) and/or injury to customers, employees and others. There can be no assurance that such events will not occur and that their occurrence will not have a material adverse impact on our business and results of operations.

Climate Change May Have Adverse Effects on Our Business

The risks associated with climate change are gaining increasing social, regulatory, economic, and political relevance, both nationally and internationally. New regulations related to climate change may affect our operations and business strategy, leading us to incur financial costs resulting from: (i) the physical risk of climate change and (ii) the risk of transition to a low-carbon or carbon-neutral economy.

The physical risks of climate change are related to the gradual increase in the average temperature of the planet and to the increase in the intensity and frequency of extreme weather events, such as sea level rise and more frequent and prolonged drought. The impact on the economy is expected to be significant. The potential impact includes significant changes in asset prices and industry profitability. Damage to borrowers' properties and operations may impair asset values and credit quality of customers, leading to non-performing loans, write-offs, and impairment charges in our portfolios. In addition, our facilities may also suffer physical damage due to weather events, leading to increased costs for us.

As the economy transitions to a low-carbon or carbon-neutral model, financial institutions may face significant and rapid developments in stakeholder expectations, policy, law, and regulation, which could impact the lending activities we undertake, as well as the risks associated with our lending portfolios, and the value of our financial assets.

As concerns about climate change increase and societal preferences change, initiatives and business practices of financial institutions with respect to climate matters and other matters of public policy, including environmental, social and governance matters, have recently become the subject of significant scrutiny by regulatory agencies and government officials. Therefore, we may face greater adverse media coverage, and reputational damage, which may in turn impact customer demand for our products, returns on certain business activities, and the value of certain assets and trading positions, leading to impairment charges. Furthermore, we could face conduct risks derived from misrepresentations in our sustainability-related disclosures, including our practices, achievements, metrics, goals and targets or the sustainability characteristics of our products or of our customers, investors or other stakeholders (greenwashing).

The impacts of climate change may also increase losses for sensitive sectors, as a result of the effects of both physical and transition risks, causing loss of profitability for companies exposed to these risks and impairing their ability to repay loans. Possible carbon pricing can affect companies' costs and compromise their ability to generate cash flows. Any subsequent increase in defaults and rising unemployment could create recessionary pressures, which may lead to an increased deterioration in the creditworthiness of our clients, higher expected credit losses, and increased charge-offs and defaults among wholesale and retail customers. If we do not adequately integrate risks associated with climate change into our risk framework to appropriately assess, manage, and disclose the various financial and operational risks we face as a result of climate change, or fail to adapt our strategy and business model to the changing regulatory requirements and market expectations on a timely basis, it may have a material and adverse

impact on our business growth rate, competitiveness, profitability, capital requirements, cost of funding, and financial condition.

Other potential risks arise from climate-related litigation claims, which are compelling governments and corporate actors to pursue actions or better practices to adapt to changes in order to mitigate the impacts resulting from loss and damage due to climate change. Financial institutions are exposed to the risk of being defendants in a climate-related suit, and they may also be indirectly affected through their clients' portfolios. Clients can be directly or indirectly held legally liable for a climate-related event or impact, which may result in associated remediation costs, potential impact on the value of their companies, and difficulty in recovering after paying for damages. Litigation can also cause stranded assets, mainly in the carbon-intensive industries, due to unanticipated, premature write-downs or devaluations caused by climate change.

Reputational and Business Risks from Affiliated Entities of Itaú Unibanco Holding Could Adversely Impact Our Business

We are currently controlled by Itaú Unibanco Holding and its affiliates, which as of the date of this Base Prospectus had a 67.42% beneficial ownership stake in us. Since we are part of a larger conglomerate of companies owned by Itaú Unibanco Holding, if other businesses controlled by Itaú Unibanco Holding face difficulties from a business or reputational standpoint, we may suffer adverse consequences. If we were to be associated with adverse events affecting affiliated entities, our reputation could be harmed, which could have a material adverse effect on our business, financial condition, and results of operations.

We Are Subject to Arbitration and Litigation Proceedings That Could Materially Adversely Affect Our Business, Financial Position, and Results of Operations

We are subject to legal proceedings. Litigation is subject to inherent uncertainties, and unfavorable rulings may occur. From time to time, we may become involved in arbitration, litigation, and other legal proceedings relating to claims arising from our operations in the normal course of business. We cannot assure you that legal proceedings will not materially affect our ability to conduct our business or result in unfavorable rulings, which could have a material adverse effect on our business, financial condition, and results of operations. See Note 29 of our consolidated financial statements in respect of lawsuits and legal proceedings.

We May Incur Financial Losses and Damages to Our Reputation from Environmental, Social and Compliance Risks

In recent years, environmental and social risks have been recognized as increasingly relevant, since they can affect the creation of shared value in the short, medium and long terms from the standpoint of the organization and its main stakeholders.

Environmental and social risks may affect our activities and the revenue of our clients, causing reputational damage, delays in payments, or default, especially in the case of significant environmental and social incidents. We could also be deemed to be indirectly responsible for environmental damages caused by projects we finance, and could consequently be held liable for certain damages.

In addition, compliance risks including those associated with anti-money laundering and counter-terrorism financing expose us to potential breaches of legal, regulatory and normative requirements. Such events could result in financial losses, sanctions, reputational damage, adverse impacts on the integrity of the financial system and increased scrutiny from regulators and stakeholders.

Our Business Strategy May Not Provide Us the Results We Expect

Our business strategy and its implementation are determined by management based on assumptions about future economic, regulatory, and political conditions. These assumptions are subject to subjective elements and other potential inaccuracies, which could result in certain risks not being correctly identified or anticipated. Accordingly, the results and consequences arising from any possible inaccurate assumptions may compromise our capacity to fully or partially implement our business strategy, as well as to achieve the results and benefits expected, which might give rise to financial losses.

Additionally, factors beyond our control, such as, but not limited to, economic and market conditions, changes in laws and regulations, and other risk factors may make it difficult or impossible to implement fully or partially our business strategy and achieve the results and benefits expected therefrom.

Risks Relating to Expansion and Integration of Acquired Businesses

We May Not Be Able to Manage Our Growth Successfully

As we continue to grow, we must improve our operational, technical, and managerial knowledge and compliance systems in order to effectively manage our operations across the expanded group. Failure to integrate, monitor and manage expanded operations could have a material adverse effect on our business, reputation, and financial results. Our future growth will also depend on our access to internal and external financing sources. We may be unable to access such financing on commercially acceptable terms or at all.

Integration of Acquired or Merged Businesses Involves Certain Risks That May Have a Material Adverse Effect on Us

We have engaged in a number of mergers and acquisitions in the past, including the Merger, the Santander Colombia Acquisition, the Helm Bank Acquisition (and the subsequent merger of Helm Bank with and into Itaú Colombia in 2014), as well as the acquisition and integration of MCC S.A. Corredores de Bolsa (“**MCC Corredores**”) and MCC Asesorías SpA (“**MCC Asesorías**” and, jointly with MCC Corredores, “**MCC**”) in 2022. Furthermore, we may make additional mergers and acquisitions in the future as part of our growth strategy.

These acquisitions and mergers and the integration of such institutions and assets involve certain risks, which as of the current stage of such transactions may still include remaining risks such as:

- integrating new networks, information systems, financial and accounting systems, risk and other management systems, financial planning and reporting, products, and customer bases into our existing business may prove difficult, cause us to incur unexpected costs and operating expenses, and place additional demands on management’s time; and
- the expected operational and financial synergies and other expected benefits from such mergers or acquisitions may not be fully achieved.

If we fail to achieve the business growth opportunities, cost savings, and other benefits we anticipate from mergers or acquisition transactions, or incur greater integration costs than we have estimated, our results of operations and financial condition may be materially and adversely affected.

Acquisitions and Strategic Partnerships May Not Perform in Accordance with Expectations or May Disrupt Our Operations and Adversely Affect Our Business, Financial Condition, and Results of Operations

A component of our strategy is to identify and pursue growth-enhancing strategic acquisitions and alliances from time to time, inside and outside of Chile and Colombia. Strategic acquisitions and alliances could expose us to risks with which we have limited or no experience. Future acquisitions may also be subject to regulatory approval, which we may not receive, particularly in view of our increasing market share in the Colombian banking industry.

We must necessarily base any assessment of potential acquisitions and alliances on assumptions with respect to operations, profitability, and other matters that may subsequently prove to be incorrect. Future acquisitions and alliances may not produce anticipated synergies or perform in accordance with our expectations and could adversely affect our business, financial condition, and results of operations. In addition, new demands on our existing organization, management, and employees resulting from the integration of new acquisitions could disrupt our operations and adversely affect our business, financial condition, and results of operations.

Risk Related to the Banking Industry

The following section describes risks inherent to the banking and financial services sector in which the Issuer operates. These risks include competitive dynamics, industry consolidation, evolving regulatory frameworks, market-wide operational standards, and other systemic factors that can influence the performance, resilience and stability of financial institutions. Such risks may arise independently of the Issuer’s specific operations and could materially impact its financial condition and results of operations.

Increased Competition and Industry Consolidation May Adversely Affect Our Operations

The Chilean and Colombian markets for financial services are highly competitive, and competition is likely to increase.

In Chile, we face competition from banking and non-banking institutions with respect to the different products we offer. In the consumer and other loans businesses, we compete with other banks, credit unions, and public social security funds. In some of our credit products, we face competition from department stores, large supermarket chains, leasing, factoring, and automobile finance companies, and other non-banking businesses involved in the issuance of private label credit cards. In the savings products and mortgage loans businesses, we compete with mutual funds, pension funds, insurance companies, and residential mortgage loan managers. Furthermore, under the Chilean General Banking Act, representative offices of non-Chilean banks are allowed to promote the credit products and services of their headquarters, which has increased, and may further increase, competition in our industry and, thus, have an adverse effect on our results of operation and financial condition.

Non-traditional providers of banking services, such as fintech companies, e-commerce providers, mobile telephone companies, and internet companies, may offer and/or increase their offerings of financial products and services directly to customers. These non-traditional providers may operate under different regulatory requirements than traditional financial institutions, which can provide them with greater flexibility in offering new products and services. Several of these competitors may have long operating histories, large customer bases, strong brand recognition, and significant financial, marketing, and other resources. They may adopt more aggressive pricing and rates and devote more resources to technology, infrastructure, and marketing.

We may also face the challenge to compete in an ecosystem where the relationship with the consumer is based on access to digital data. This access is increasingly dominated by digital platforms and fintech companies, which already have a significant presence in relevant markets, such as payments. This privileged access to data can be used as an advantage to compete with us in other adjacent markets and may reduce our operations and margins in core businesses such as lending or wealth management.

Furthermore, the widespread adoption of new technologies, including distributed ledger, artificial intelligence and/or biometrics, to provide services such as cryptocurrencies and payments, could require substantial expenditures to modify or adapt our existing products and services as we continue to grow our internet and mobile banking capabilities and could entail new direct risks (including financial and nonfinancial risks) and indirect risks related to loss of business opportunities. Our customers may choose to conduct business or offer products in areas that may be considered speculative or risky. Such new technologies and mobile banking platforms in recent years could negatively impact the value of our investments in bank premises, equipment and personnel for our branch network.

The persistence or acceleration of this shift in demand towards internet and mobile banking may necessitate further changes our retail distribution strategy, which may include closing and/or selling certain branches (as we have been doing in recent years) and restructuring its remaining branches and work force. These actions could lead to losses on these assets and may lead to increased expenditures to renovate, reconfigure or close a number of our remaining branches or to otherwise reform our retail distribution channel. Furthermore, our failure to implement such changes to our distribution strategy swiftly and effectively could have an adverse effect on our competitive position.

We Make Estimates and Assumptions in Connection with the Preparation of Our Consolidated Financial Statements, and Any Changes to Those Estimates and Assumptions Could Have a Material Adverse Effect on Our Operating Results

In connection with the preparation of our consolidated financial statements, we use certain estimates and assumptions based on historical experience and other factors. These estimates and assumptions are subject to significant uncertainties, some of which are beyond our control. Should any of these estimates and assumptions change or prove to have been incorrect, our reported operating results could be materially adversely affected.

Changes in Accounting Standards Could Impact Reported Earnings

The accounting standard setters and other regulatory bodies periodically change the financial accounting and reporting standards that govern the preparation of our consolidated financial statements. These changes can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in the restatement of prior period financial statements. We

cannot assure you that future changes in financial accounting and reporting standards will not substantially affect our results of operations or performance indicators, as we do not know the extent of future changes.

Complex Tax Regulations May Lead to Adverse Financial Impacts

We are subject to the tax laws and regulations of Chile, Colombia, and relevant foreign jurisdictions. These tax laws are complex and subject to different interpretations by the taxpayer and relevant governmental taxing authorities, which are sometimes subject to prolonged evaluation periods. In establishing a provision for income tax expense and filing returns, we must make judgments and interpretations about the application of these inherently complex tax laws.

If the judgment, estimates, and assumptions we use in preparing our tax returns are subsequently found to be incorrect, there could be a material adverse effect on our results of operations.

Limitations in Disclosure and Accounting Controls May Lead to Misstatements

Our disclosure controls and procedures are designed to provide reasonable assurance that information required to be disclosed by us is accumulated and communicated to management, recorded, processed, summarized, and reported within the time periods specified in applicable regulatory requirements. However, our disclosure controls and procedures can provide only reasonable, not absolute, assurance that the objectives of the control system are met. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. In addition, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by an unauthorized override of the controls. As a result, misstatements due to error or misconduct may occur and may not be detected, potentially impacting the reliability of our financial reporting.

Our Reliance on Short-Term Deposits Exposes Us to Funding Risks Which Could Adversely Affect Our Revenue

Time deposits and other term deposits are important sources of funding. If a substantial number of our depositors withdraw their demand deposits or do not roll over their time deposits upon maturity, our liquidity position, results of operations, and financial condition may be materially and adversely affected. We cannot assure you that in the event of a sudden or unexpected shortage of funds, any money markets in which we operate will be able to maintain levels of funding without incurring higher funding costs or the liquidation of certain assets. If this were to happen, our business, results of operations, and financial condition may be materially and adversely affected.

Banking Regulations May Restrict Our Operations and Adversely Affect Our Financial Condition and Results of Operations

We are subject to regulation in the markets in which we operate, including by the CMF and the Central Bank of Chile in Chile, and by the Central Bank of Colombia, the Colombian Ministry of Finance and Public Credit, the Colombian Financial Superintendency, in Colombia. For more information, see “Policy and Regulatory Framework for the Performance of Our Businesses—Chilean Regulation.”

Regulators may in the future impose more restrictive limitations on the activities of banks, including us. Regulation may also be increased in Chile and/or in Colombia, including the imposition of higher capital requirements, heightened disclosure standards, and restrictions on certain types of transaction structures. In addition, numerous novel regulatory proposals may emerge. If and when enacted, new regulations could require us to inject further capital into our business, restrict the type or volume of transactions we enter into, or set limits on or require the modification of rates or fees that we charge on certain loans or other products, any of which could lower the return on our investments, assets, and equity. We may also face increased compliance costs and limitations on our ability to pursue certain business opportunities.

The Banking Regulatory and Capital Markets Environment in Which We Operate Is Continually Evolving and May Change

Changes in banking regulations may materially and adversely affect our business, financial condition, and results of operations. Chilean laws, regulations, policies, and interpretations of laws relating to the financial system are continually evolving and changing. For more information, see “Policy and Regulatory Framework for the Performance of Our Businesses—Chilean Regulation.”

Colombia has also experienced changes in applicable laws, regulations, and policies, such as those regarding financial inclusion and consumer protection. Such changes and trends may increase competition in the Colombian financial market and may impair our ability to expand or retain our customer base. For more information, see “Policy and Regulatory Framework for the Performance of Our Businesses—Colombian Regulation.”

We also have limited operations or offices outside of Chile and Colombia, including the United States, Panama and Peru. Changes in the laws or regulations applicable to our business in the jurisdictions where we operate, or the adoption of new laws, and related regulations or their applicability or interpretation, may have an adverse effect on our operations and financial condition.

We Are Subject to Regulatory Inspections, Examinations, and Fines by Regulatory Authorities in Chile and in Colombia

We are subject to various inspections, examinations, inquiries, audits, and other regulatory requirements by Chilean and Colombian regulatory authorities. Deficiencies in the implementation of risk management system for money laundering and terrorism financing parameters and the performance of unauthorized financial activities were the most common reasons for the opening of these examination processes during recent years. We cannot assure you that we will be able to meet all of the applicable regulatory requirements and guidelines, or that we will not be subject to sanctions, fines, restrictions on our business, or other penalties in the future as a result of non-compliance. Non-compliance with regulatory requirements could result in sanctions, fines, or restrictions on our business, which may materially and adversely affect us.

Risks Relating to Chile, Colombia, and Other Countries in Which We Operate

Chile’s Political, Legal, and Economic Uncertainty Could Adversely Impact Our Business

A series of protests over economic inequality in Chile were initially sparked by the announcement of a subway fare increase in Santiago in 2019. After weeks of nationwide protests, the majority of the local political parties in Chile agreed on a new constitutional process. When the government announced the process of enacting a new constitution, there was increased volatility in the Chilean stock market and exchange rate fluctuations that resulted in a weakening of the Chilean peso against the U.S. dollar. After a prolonged drafting process, the draft of the constitution was widely rejected by the Chilean citizens in the national mandatory referendum held on September 4, 2022. On December 17, 2023, a second draft of the constitution was put to the vote and more than 55% of voters elected to reject the constitutional amendment. As a result, the Chilean constitution drafted in 1980 remains in force. Following these results, the President of Chile, Mr. Gabriel Boric, announced that during his electoral term (due to expire in 2026) there will be no more referendums to approve a new Chilean constitution. We cannot assure you whether additional referendums to amend the Chilean constitution will be held and, if so, what will be the outcome of these referendums.

Chile is scheduled to hold general elections on November 16, 2025, including the presidential race to elect a successor to current president Gabriel Boric together with a complete renewal of the Chilean House of Deputies and part of the Senate. The results of this election may lead to changes and uncertainties affecting various sectors of the economy.

The long-term effects of political and economic uncertainty in Chile remain difficult to predict and may result in slower economic growth and higher unemployment rates that could adversely affect our profitability and prospects. While recent years have seen periods of political debate and reform initiatives, the long-term effects on economic stability and the broader business environment remain difficult to predict.

We cannot assure investors that these uncertainties will not continue or intensify, nor that they will not negatively affect Chile’s economic growth or our results of operations and financial condition.

Adverse Changes in Labor Relations in Chile or Colombia Could Impact Our Business

Approximately 93% of our workforce are covered by collective bargaining agreements across five unions representing our employees in Chile and Colombia. In 2024, we renewed an agreement with a union representing a subsidiary in Chile, and in 2025 we will negotiate with four unions. However, there is no assurance that future collective bargaining agreements will be renewed on favorable terms or at all. Failure to do so could result in strikes, work stoppages, or increased labor costs, which may materially and adversely affect our business, financial condition, or results of operations. Additionally, broader labor movements could further increase employee-related costs.

In Chile, the progressive implementation of Law No. 21,561, published in April 2023, reduces the maximum workweek from 45 to 40 hours without salary reduction, with full implementation expected by April 2028. This law also introduces flexible working time arrangements and limits the categories of exempted employees. Additionally, the Law No. 21,643 effective August 2024, establishes a legal framework to prevent and to punish labor, sexual harassment and violence in the workplace, requiring employer investigation procedures and prevention protocols. The Inclusion Law, amended in early 2025, tightens obligations for companies with 100 or more employees to hire people with disabilities, with stricter compliance and sanction frameworks. New occupational health and safety regulations introduced under Decree No. 44 (effective February 2025) require employers to strengthen preventive risk management programs focusing on workplace safety and employee well-being.

Chile's labor reforms under President Boric's administration continue to emphasize flexibility, inclusion, and worker protections, while reforms aiming to reduce labor costs remain under discussion amid evolving political and economic contexts. The implementation of these reforms may increase labor costs, reduce profitability, and limit operational flexibility.

In Colombia, Law No. 2,101 of 2021 requires a gradual reduction of the statutory workweek from 48 to 42 hours by 2026, with the first reduction effective from July 2023. Recent laws have expanded paid parental leaves, introduced flexible work arrangements, and strengthened job security during such leaves. Several bills currently under congressional review as of the date of this Base Prospectus propose further changes to working hours, overtime, paid leave, minimum wages by industry and region, and social security contributions. Legislative discussions on reforms to the health care system, pension framework, and labor regime are ongoing, reflecting Colombia's dynamic regulatory environment with potential material impacts on labor costs and employment conditions.

These and any additional legislation or regulation in Chile, Colombia or other countries, and any required changes to our business operations resulting from such labor legislation and regulations, including with respect to shortened work hours, may increase our labor costs and related expenses. These legal and regulatory actions could also result in higher operational costs, reduced profitability, limit our operational flexibility, or otherwise adversely affect our businesses, results of operations or financial condition.

Colombia's Political and Legal Uncertainty Could Adversely Impact Our Business

On August 7, 2022, Gustavo Petro was sworn in as Colombia's president. Throughout his term, Mr. Petro has submitted various pension, labor, and tax reform bills to the Colombian Congress. We cannot predict the impact of the laws, regulations policies adopted by the Colombian government, which may result in legislation that increases our tax burden, or that of other Colombian companies, which could, in turn, impact the overall economy.

In addition, Colombia has experienced periods of significant political unrest and instability, including widespread violence primarily due to the activities of paramilitary and guerrilla groups, such as the National Liberation Army (*Ejército de Liberación Nacional* or "ELN"), urban militias, former members of the Revolutionary Armed Forces of Colombia (*Fuerzas Armadas Revolucionarias de Colombia* or "FARC") and of drug cartels. Colombia faces ongoing security challenges, including organized crime and social unrest. Although the Colombian government has made efforts to address this situation, including the signing in 2016 of a peace deal with the FARC and the negotiations held between 2022 and 2024 with the ELN, these efforts have not produced to date an outright end to the violence caused by these insurgent and criminal groups.

On July 5, 2024, president Petro declared a bilateral ceasefire, which was ended by presidential order on August 3, 2024. Colombia's sociopolitical landscape in 2025 has been marked by escalating tensions and governance challenges. In January, president Petro suspended peace negotiations with the ELN following violent clashes in the Catatumbo region that resulted in several fatalities. The Colombian government's subsequent declaration of a state of emergency underscores the challenging nature of Colombia's internal security and the complexities of achieving sustainable peace.

Compounding these challenges, the Petro administration faces internal instability, highlighted by the resignation of finance minister Diego Guevara amid disputes over fiscal policy and budget deficits. This departure contributes to a broader pattern of cabinet turnover, with 13 ministers exiting within a three-month span, raising concerns about administrative coherence and policy continuity. Furthermore, the suspension of United States Agency for International Development funding has jeopardized critical peace and anti-gang initiatives, potentially undermining the implementation of the 2016 peace accord with FARC rebels and exacerbating regional security issues. The continuation of, or escalation in, any violence may have a negative impact on the Colombian economy or on us, and

may affect our customers, employees, assets and projects in the region, as well as our ability to acquire new assets, which could have a material adverse effect on our business, financial condition and results of operations.

Additionally, tensions with countries which share a border with Colombia, such as Venezuela, may disrupt trade and economic stability in Colombia, potentially increasing operational risks and reducing loan demand.

Chilean Corporate Disclosure and Accounting Standards May Differ from Those From Jurisdictions Outside Chile

As a regulated financial institution, we are required to submit to the CMF unaudited consolidated and unconsolidated balance sheets and income statements on a monthly basis. These statements must be prepared in accordance with the Compendium of Accounting Standards (*Compendio de Normas Contables y Manual del Sistema de Información*), or the “Compendium,” and the rules of the CMF. Certain exceptions introduced by the CMF prevent banks from achieving full convergence with international standards, for example, with respect to loan loss provisions and assets received in lieu of payment, among others. The CMF is also vested with the authority to issue specific orders to banks, including on accounting matters. In situations not addressed by the guidance issued by the CMF, institutions must follow IFRS. As a result, our financial statements may not be directly comparable to those of financial institutions subject to accounting standards in jurisdictions outside Chile.

The securities laws of Chile, which govern open or publicly listed companies such as ours, have as one of their principal objectives the promotion of disclosure of all material corporate information to the public. However, Chilean disclosure requirements differ from those applicable in jurisdictions outside Chile in certain important respects. Although Chilean law imposes restrictions on insider trading and price manipulation, applicable Chilean laws may differ from those in jurisdictions outside Chile, and in certain respects, the Chilean securities markets are not as highly regulated or supervised as certain jurisdictions outside Chile.

The Legal Restrictions on the Exposure of Chilean Pension Funds May Adversely Affect Our Access to Funding

Pension funds are important funding providers to us and to the Chilean banking system in general. Chilean regulations impose restrictions on the share of assets that a Chilean pension fund management company (*Administradora de Fondos de Pensiones*, or “AFP”) may allocate: (i) per fund (considering all sub-funds within an AFP (A, B, C, D, or E)), to deposits in checking accounts and term deposit accounts and in debt securities issued by a single banking institution (or guaranteed by such bank); (ii) per type of sub-fund, to shares, deposits, derivatives, and debt securities of a single banking institution (or guaranteed by such bank); and (iii) per fund (considering all sub-funds), to shares issued by a single banking institution. Additionally, each fund managed by an AFP is permitted to make deposits with a bank for an amount not to exceed the equivalent of such bank’s equity. If the exposure of a pension fund managed by an AFP to a single bank exceeds such limit for investments in securities, the AFP for such pension fund is required to reduce the fund’s exposure below the limit within three years.

If the exposure of any AFP to us exceeds the regulatory limits, or if changes in pension fund regulations that reduce the funds available to pension funds or constrain their ability to invest in bank deposits and securities are implemented, this could lead us to seek alternative sources of funding, which could be more expensive and, as a consequence, may have a material adverse effect on our business, financial condition, and results of operations.

Pension funds must also comply with other investment limits. If the AFPs significantly change the composition of their portfolios and withdraw a considerable part of their term deposits with us, we may not be able to substitute these institutional funds with retail deposits, which would have a material adverse impact on our business, financial condition and results of operations.

See “—Chile’s 2025 Pension Reform will Increase our Labor Costs, which May Impact our Financial Results.”

Changes in Taxes of the Countries in Which We Operate May Have a Material Adverse Effect on Us

The Chilean government has introduced several tax reforms in 2014, 2016 and 2020 in order to finance increased social spending. The most significant change was the increase in the corporate income tax rate to 27% in 2018. On October 24, 2024, the Congress approved a new tax reform aimed at increasing tax revenues by 1.5% of gross domestic product. This reform includes measures to strengthen the tax authorities’ powers to combat tax avoidance and evasion, such as changes to Chile’s general anti-avoidance rule provisions, corporate reorganizations, the statute of limitations, and audit powers and procedures. The Chilean government has announced that it will propose another tax reform in 2025 to finance social spending, which is expected to include a comprehensive reform of Chilean income taxes. As of

the date hereof, we cannot predict whether these reforms will have a material impact on our business or our clients, or whether other tax reforms will be enacted in the future.

The government of Colombia also regularly proposes tax reforms and enacts changes to tax regulations and interpretations through rulings/opinions issued by the Colombian Tax Authority (*Dirección de Impuestos y Aduanas Nacionales*). The latest tax reform in Colombia was enacted by means of Law No. 2,277 of 2022, which introduced changes to corporate taxation, capital gains and dividend taxation.

Changes in legislation, regulation, and jurisprudence can affect tax burdens by increasing tax rates and fees, creating new taxes, limiting stated expenses and deductions, and eliminating incentives and non-taxed income. We cannot assure you that the manner in which taxes are interpreted and applied in the jurisdictions where we operate will not change in the future. In addition, governments may decide to levy additional taxes in the jurisdictions where we operate. Any changes to taxes in the jurisdictions where we operate could have a material adverse effect on our business, financial condition, and results of operations. Furthermore, uncertainty relating to tax legislation in the jurisdictions where we operate poses a constant risk to the Bank and our operations.

Chile's 2025 Pension Reform will Increase our Labor Costs, which May Impact our Financial Results

In March 2025, Chile enacted Law No. 21,735, constituting a significant reform to the national pension system. This reform establishes a new mixed pension scheme combining individual capitalization accounts administered by private pension fund administrators with a new public social security fund, the Autonomous Pension Protection Fund. The objective is to improve pension sustainability, equity, and social protections, including measures to reduce gender disparities.

A key component of the reform is the introduction of mandatory employer contributions to the pension system, which commenced on August 1, 2025. The employer contribution starts at 1.0% of employees' taxable income and increases gradually, and is expected to reach a total of 8.5% by 2033. Contributions are allocated across individual accounts, the new social security fund, and insurance schemes previously funded separately. Additionally, the reform integrates disability and survivorship insurance contributions into the new system, with further adjustments planned.

As a result, Chilean employers, including us, will face a materially higher labor cost burden compared to the pre-reform regime. The gradual but significant increase in mandatory contributions is expected to increase our payroll expenses, which may have a material adverse impact on our financial results, profitability, and cost structure.

Colombian Tax Haven Regulation Could Adversely Affect Our Business and Financial Results

A 2014 Colombian tax decree designates 37 jurisdictions (including Panama) as tax havens for Colombian tax purposes. However, in October 2014, Panama and Colombia signed a memorandum of understanding by which they agreed to execute a double taxation treaty. Therefore, Panama is currently not considered a tax haven for Colombian tax purposes.

If Panama or other jurisdictions are considered a tax haven under Colombian tax regulations, the clients of our Colombian subsidiaries in such jurisdictions who are residents in those jurisdictions would be subject to the following regulations: (i) higher withholding tax rates (up to 35%), including higher withholding rates over financial yields derived from investments in the Colombian securities market, (ii) the Colombian transfer pricing regime and its reporting duties, (iii) an assumption for Colombian authorities of residency for the purposes of qualifying a conduct as abusive under tax regulations, (iv) the disallowance of payments made to residents or entities located in tax havens as costs or deductions, unless the respective withholding tax has been applied, and (v) other additional information disclosure requirements. In October 2021, the Colombian Government issued a decree that regulates the criteria for classifying a ring-fencing regime, i.e., a kind of preferential regime which is subject to the same regulations of tax havens. Since Colombia is a member of the Organization for Economic Co-operation and Development, or "OECD" since April 2020, the criteria for assessing preferential tax regimes are based on certain key factors described by the OECD in its Harmful Tax Practices Report from 2019. These key factors include: (i) the imposition of no or low effective tax rates on income from geographically mobile financial and other service activities, (ii) the regime is ring-fenced from the domestic economy, (iii) the regime lacks transparency, (iv) there is no effective exchange of information with respect to the regime, and (v) the regime fails to require substantial activities. Every corporate income taxpayer should apply these criteria to the list of preferential regimes issued by the Forum on Harmful Tax Practices.

There are no special exceptions from the rules above for financial entities situated in tax havens, low tax jurisdictions, or that belong to a preferential tax regime.

Any Downgrades in Chile's or Colombia's Credit Ratings Could Adversely Impact Our Financial Performance

Chile's and Colombia's credit ratings are currently rated by S&P Global Ratings ("S&P"), Moody's Investors Services Inc. ("Moody's") and Fitch Ratings ("Fitch").

In October 2024, S&P affirmed its A/A-1 long-term foreign currency and its A+/A-1 long-term local currency sovereign credit ratings on Chile, and changed the outlook from negative to stable.

In January 2025, Fitch affirmed the credit rating of Chile's long-term foreign currency as A-, with stable outlook. In March 2025, Fitch affirmed Colombia's long-term foreign currency rating at BB+ and revised its outlook from stable to negative.

In June 2025, S&P downgraded Colombia's long-term foreign currency rating from BB+ to BB, with negative outlook. Also in June 2025, Moody's affirmed the credit rating of Chile's long-term foreign currency as A2, with stable outlook, and downgraded Colombia's long-term foreign currency rating from Baa2 to Baa3, with stable outlook.

If adverse revisions to Chile's or Colombia's credit ratings or rating outlook were to occur, this could have a material adverse effect on our business, future financial performance, shareholders' equity and the value of our securities. In addition, any adverse revisions to Chile's or Colombia's credit ratings by international rating agencies may adversely affect our ratings, and, as a result, our cost of funding, including interest rates paid on our deposits and securities.

Chilean and Colombian Authorities Exercise Influence on the Chilean and Colombian Economies. Changes in Monetary, Fiscal, and Foreign Exchange Policies May Adversely Affect Us

Chilean and Colombian authorities exercise influence on the Chilean and Colombian economies, through changes in fiscal, monetary, and foreign exchange policies, which may adversely affect us. For example, from August 2021 to November 2022, the Central Bank of Chile raised the monetary policy interest rate from 0.75% to 11.25%. From July 2023 to January 2025, the Central Bank of Chile has progressively reduced the monetary policy interest rate to 5.00%.

These changes may impact variables that are crucial for our growth strategy (such as foreign exchange and interest rates, liquidity in the currency market, tax burden, and economic growth), thus limiting our operations in certain markets, affecting our liquidity and our clients' ability to pay and, consequently, affecting us.

In addition, changes in the policies of the Chilean and Colombian governments may result in changes in government policies, which may affect us. This uncertainty may, contribute to an increase in the volatility of the Chilean and Colombian capital markets, which, in turn, may have an adverse impact on us.

Our Growth and Profitability Depend on the Level of Economic Activity in Chile, Colombia, and Other Markets

Substantially all of our loans are to borrowers doing business in Chile or Colombia. Accordingly, the recoverability of these loans are dependent to a significant extent on the level of economic activity in Chile and Colombia. The Chilean and Colombian economies have been influenced, to varying degrees, by economic conditions in other Latin American and emerging markets, as well as the United States, Europe and other countries. To the extent the conditions of the global markets or global economy deteriorate, Chilean and Colombian companies may have their businesses adversely affected.

The weakness in the global economy has been marked by, among other adverse factors, lower levels of consumer and corporate confidence, decreased business investment and consumer spending, increased unemployment, reduced income and asset values, reduction of global growth rates, bank failures, persistent inflation, currency volatility and limited availability of credit and access to capital. The economic and market conditions of other countries, including the United States, European countries, other Latin American and emerging markets, may affect the availability of credit and the volume of foreign investments in Chile, Colombia and in the countries in which we do business, to varying degrees.

Developments or economic conditions in other emerging market countries have at times significantly affected the availability of credit to Chilean and Colombian companies and resulted in considerable outflows of funds from Chile and Colombia, decreasing the amount of foreign investments in those countries, which impacted overall growth expectations for the Chilean and Colombian economy. Any of these factors could have a material adverse effect on our results of operations and financial condition.

In addition, future developments in or adversely affecting the Chilean or Colombian economies and other emerging and developed markets, such as those of our neighbor countries, and a deceleration in the economic growth of Asian or other developed nations to which Chile and Colombia export a majority of their respective goods, could materially and adversely affect our business, financial condition, or results of operations.

Our results of operations and financial condition could also be affected by changes in economic or other policies of the Chilean or Colombian governments, which have each exercised and continue to exercise a substantial influence over many aspects of the private sector, or other political or economic developments in Chile. In addition, our financial condition and results of operations could also be affected by regulatory changes in administrative practices or other political or economic developments in or affecting Chile or Colombia, over which we have no control.

Inflation and Government Measures to Curb Inflation Could Adversely Affect Our Financial Condition and Results of Operations

Chile experienced inflation of 12.8%, 3.9% and 4.5% during 2022, 2023 and 2024, respectively. In Colombia, during 2022 there was an increase in the inflation rate of more than 13.0%, which decreased to 8.8% and 5.8% in December 2023 and 2024, respectively.

While inflationary pressures in Chile and Colombia have abated in recent years pursuant to measures taken by the respective governments (such as the increase in the maximum interest rate for loan portfolios in Colombia in order to control the inflation and consumption levels, as well as strong contractionary fiscal and monetary macroeconomic policies), there is no guarantee that such inflationary pressures will not resurface. Extended periods of high levels of inflation could have an adverse effect on our results of operations mainly through increases in credit losses and expenses, which may not be fully offset by higher revenues or other positive impacts on earnings due to high inflation. Contractionary fiscal and monetary macroeconomic policies could also have an adverse effect on our results of operations and financial condition mainly through lower revenues, higher funding costs, higher credit losses or potential devaluation of our securities portfolio due to higher interest rates.

We May Be Unsuccessful in Addressing the Challenges and Risks Presented by Our Operations in Colombia

We operate a banking business in Colombia through Itaú Colombia S.A. (“**Itaú Colombia**”). Our operations are focused on retail banking, as well as wholesale and commercial banking and providing financing and deposit services to SMEs and individuals with medium-high income levels. Itaú Colombia provides a broad range of commercial and retail banking services to its customers, operating principally in the cities of Bogotá, Medellín, Cali, Bucaramanga, Cartagena and Barranquilla. We have limited experience conducting credit card and consumer finance businesses in countries outside Chile. Accordingly, we may not be successful in managing credit card and consumer finance operations outside of our traditional domestic market in Chile. We may face a variety of risks presented by our operations in Colombia, including delays in payments by customers and higher delinquency rates, which could necessitate higher provisions for loan losses. We cannot assure you that we will be successful in adequately addressing the risks presented by our operations in Colombia, and these risks could have an adverse effect on our financial performance.

Constitutional Collective Actions (Acciones Populares), Class Actions (Acciones de Grupo), and Other Similar Legal Actions in Chile and Colombia Involving Claims for Significant Monetary Awards Against Financial Institutions May Have an Adverse Effect on Our Business and Results of Operations

Under Law No. 19,496, or the “Chilean Consumer Protection Act”, and the Colombian Constitution and Law 472 of 1998, individuals may initiate collective or class actions to protect their collective or class rights, as applicable. In the past few years, Chilean financial institutions have experienced limited numbers of collective and class actions, mostly relating to abusive clauses in standard contracts.

In the past few years, Colombian financial institutions, including Itaú Colombia, have experienced a substantial increase in the aggregate number of these actions. The great majority of such actions have been related to fees, financial services and interest rates, and their outcome is uncertain. Pursuant to Law No. 1,425 of 2010, monetary incentives for plaintiffs in constitutional collective actions have been eliminated since 2011. Nevertheless, individuals continue to have the right to initiate constitutional or class actions against financial institutions, including Itaú Colombia.

Current and Future Restrictions on Interest Rates or Banking Fees Could Negatively Affect Our Profitability

The Colombian Commerce Code limits the amount of interest that may be charged in commercial transactions. In the future, regulations could impose limitations regarding interest rates or fees we charge. Any such limitations could materially and adversely affect our results of operations and financial position. In the past, there have been disputes in Colombia among merchants, payment services and banks regarding interchange fees. Although such disputes have been resolved, the SIC may initiate new investigations relating to the interchange fees. This possibility may lead to additional decreases in such fees, which in turn could adversely affect our operations in Colombia and our consolidated financial results.

The Colombian government has the authority to establish and define criteria and formulas applicable to the calculation of banking fees and other charges and to establish caps on the banking fees, credit card fees, and other charges that we impose on our customers. Pursuant to that authority, the Colombian government has established a cap on the fees banks can charge on withdrawals from ATMs outside their own networks. Additionally, under Colombian regulation, other than in connection with mortgage loans, banks are prohibited from charging prepayment penalties or fees on loans, other than in mortgage loans, except when the outstanding amount of a loan is more than the equivalent of 880 monthly minimum wages, or “SMMLV” (approximately US\$180,000). In other loans in which the outstanding amount is greater than 880 SMMLV, prepayment penalties or fees may be charged but only when expressly contemplated under the governing loan agreement. With respect to long-term mortgage loans granted in connection with the acquisition of homes, banks are prohibited from charging prepayment penalties. In addition, Law 2,009 of 2019 provides that financial institutions, including banks (such as Itaú Colombia), which are authorized to collect public savings and charge management fees for savings accounts, debit cards and credit cards, must grant their clients access to a minimum package of products and services at no additional cost. Further limits or regulations regarding banking fees and services, and uncertainties with respect thereto, could have a negative effect on Itaú Colombia and our results of operations and financial condition.

Insolvency Laws May Limit Our Monetary Collection and Ability to Enforce Our Rights

Colombian insolvency laws provide that creditors of an insolvent debtor in default are prohibited from initiating collection proceedings outside the bankruptcy or reorganization process of such debtor. In addition, all collection proceedings outstanding at the beginning of any bankruptcy or reorganization process of any insolvent debtor must be suspended and creditors are prevented from enforcing their rights against the collateral and other assets of the debtor until the reorganization has been agreed (in which case the collection proceeding is resolved within the reorganization agreement) or it is declared that no reorganization was agreed. Additionally, Colombian laws provide insolvency protection for non-merchant individuals.

This insolvency protection entails that, once a non-merchant individual has ceased paying his or her debts, such individual can initiate a voluntary insolvency proceeding before a notary public or mediator to reach an agreement with its creditors. The terms of any agreement reached with a group (two or more) of creditors that represent more than 50% of the total amount of the claims will be mandatorily applicable to all relevant creditors. There are other protections such as an automatic stay for 80 days, which could be extended by 30 additional days.

These legal limitations make it difficult to recover on defaulted loans, and as a result, may cause Itaú Colombia to enhance its credit requirements, which would result in decreased lending to individuals by making it more expensive. In addition, increased difficulties in enforcing debt and other monetary obligations due to this insolvency law could have an adverse effect on Itaú Colombia and our results of operations and financial condition.

In Colombia, Law No. 2,445 of 2025 brought reforms expanding the insolvency regime to small merchants, increasing procedural flexibility, and strengthening debtor protections, which may further limit Itaú Colombia’s ability to recover on defaulted loans.

Insolvency Proceedings May Adversely Affect Our Foreclosure Rights in Respect to Security Registered as Personal Property

Pursuant to Article 50 of Law No. 1676 of 2013, secured creditors in Colombia with collateral registered as personal property (i) may be allowed to foreclose the respective collateral owned by the debtor subject to a reorganization proceeding, provided that the assets under the security do not constitute essential assets for the economic activity of the debtors or such assets are at risk of being destroyed and the competent judge authorizes such foreclosure, and (ii) once the reorganization agreement is confirmed, each secured creditor may have priority over the

other creditors that are part of the agreement. However, in accordance with a judicial precedent, such rights will only be available to the secured creditors to the extent that the other assets of the debtor are sufficient to ensure the payment of the salary and benefits derived from the employment contracts as well as alimony, if any. Any inability to enforce our foreclosure rights under Law No. 1676 of 2013 could have a material adverse effect on our results of operations and financial condition.

The Central Bank of Colombia May Impose Requirements on the Ability of Colombian Residents (including Us) to Obtain Loans in Foreign Currency

The Central Bank of Colombia may impose certain mandatory deposit requirements in connection with foreign currency denominated loans obtained by Colombian residents, including Itaú Colombia, although no such mandatory deposit requirement is currently in effect. We cannot predict or control future actions by the Central Bank of Colombia in respect of deposit requirements, which may involve the establishment of a mandatory deposit percentage, and the use of such measures by the Central Bank of Colombia may raise our cost of raising funds and reduce our financial flexibility.

Public Health Crises Disrupted, and Could in the Future Disrupt, Our Operations and Financial Performance

Public health crises, or the public perception of the risks of public health crises, have disrupted, and could in the future disrupt, economic activity in Chile and Colombia, potentially leading to reduced loan demand, increased credit losses, and operational challenges, adversely affecting our financial performance.

Risks Related to the Notes Generally

The following section describes risks that are inherent to the Notes themselves, regardless of the Issuer's underlying business or the banking industry as a whole. These include risks relating to market value, liquidity, interest rates, exchange rates, the structure and features of the Notes, credit ratings, applicable legal frameworks, and the absence of certain investor protections. Such risks could limit investors' ability to trade, value, or enforce rights under the Notes.

There is no Trading Market for the Notes; You May Be Unable to Sell Your Notes if a Trading Market for the Notes Does Not Develop or is Not Maintained

Each series of Notes (each a "Series") will constitute a new issue of securities with no established trading market or trading history and will not be registered under the Securities Act or any state securities laws. The Issuers will apply to the SGX-ST for permission to deal in, and for quotation of, any Notes which are agreed at the time of issue thereof to be so listed on the SGX-ST but there can be no assurance that such listing will occur on or prior to the date of issue of such Notes or at all. The Issuer may also apply to other stock exchanges outside the United States to list, and for quotation of, any Notes which are agreed at the time of issue thereof to be so listed on such other stock exchange but there can be no assurance that such listing will occur on or prior to the date of issue of such Notes or at all. The Issuer cannot assure you that the application will be accepted or an active trading market for the Notes will develop or, if developed, be maintained. If a trading market does not develop or is not maintained, holders of the Notes may experience difficulty in reselling the Notes or may be unable to sell them at all.

Even if a market develops, the liquidity of any market for the Notes will depend on many factors, including the number of holders of the Notes, the interest of securities dealers in making a market in the Notes and other factors. Accordingly, there can be no assurance as to the development or liquidity of any market for the Notes, the ability of holders to sell the Notes or the prices at which the Notes could be sold. Because the market for any Series may not be liquid, you may have to bear the economic risk of an investment in the Notes for an indefinite period of time. If an active trading market does not develop, the market price and liquidity of the Notes may be adversely affected. If the Notes are traded, they may trade at a discount from their initial offering price depending upon prevailing interest rates, the market for similar securities, general economic conditions, the Issuer's performance and business prospects and other factors.

Declines in the market for debt and equity securities generally may also materially and adversely affect the liquidity of the Notes, independent of the Issuer's performance. See "Description of Notes" and "Transfer and Selling Restrictions." The Dealers or any initial purchasers, underwriters, or agents will not be obligated to make a trading market in any Notes and may discontinue market making at any time at their sole discretion. Therefore, no assurance can be given as to the liquidity of or trading markets for any Series of Notes.

Market Price Risk

The market price of each Series depends on various factors, such as changes of interest rate levels, the policy of central banks, overall economic developments, inflation rates or the supply and demand for the relevant type of Note. The market price of each Series may also be negatively affected by an increase in the Issuer's credit spreads (i.e., the difference between yields on its debt and the yield of government bonds or swap rates of similar maturity). Its credit spreads are mainly based on its perceived creditworthiness but also influenced by other factors such as general market trends as well as supply and demand for such Series.

Exchange Rate Risk and Exchange Controls

An investment in Notes that are denominated in, or the payment of which is to be or may be made in or related to the value of, a currency or composite currency other than the currency of the country in which the purchaser is a resident or the currency in which the purchaser conducts its business or activities (the “**home currency**”) entails significant risks that are not associated with a similar investment in a security denominated in the home currency. Such risks include the possibility of significant changes in rates of exchange between the home currency and the various foreign currencies (or composite currencies) after the issuance of such Note and the possibility of the imposition or modification of foreign exchange controls by either the U.S. or foreign governments. Such risks generally depend on economic and political events over which it has no control. In recent years, rates of exchange between certain currencies have been highly volatile and such volatility may be expected to continue in the future. Fluctuations in any particular exchange rate that have occurred in the past are not necessarily indicative, however, of fluctuations in such rate that may occur during the term of any Note. Depreciation of the currency in which a Note is denominated against the relevant home currency would result in a decrease in the effective yield of such Note below its coupon rate and, in certain circumstances, could result in a loss to the investor on a home currency basis. In addition, depending on the specific terms of a currency linked Indexed Note, changes in exchange rates relating to any of the currencies involved may result in a decrease in the effective yield of such currency linked Indexed Note and, in certain circumstances, could result in a loss of all or a substantial portion of the principal of a currency linked Indexed Note to the investor.

Foreign exchange rates can either be fixed by sovereign governments or float. Exchange rates of most economically developed nations are permitted to fluctuate in value relative to the U.S. dollar. National governments, however, rarely voluntarily allow their currencies to float freely in response to economic forces. Governments in fact use a variety of techniques, such as intervention by a country's central bank or imposition of regulatory controls or taxes, to affect the exchange rate of their currencies. Governments may also issue a new currency to replace an existing currency, or alter the exchange rate or relative exchange characteristics by devaluation or revaluation of a currency. Thus, a special risk in purchasing non-home currency denominated Notes or currency linked Indexed Notes is that their home currency-equivalent yields could be affected by governmental actions, which could change or interfere with theretofore freely determined currency valuation, fluctuations in response to other market forces, and the movement of currencies across borders. There will be no adjustment or change in the terms of such Notes in the event that exchange rates should become fixed, or in the event of any devaluation or revaluation or imposition of exchange or other regulatory controls or taxes, or in the event of other developments affecting the U.S. dollar or any applicable Specified Currency.

Governments have imposed from time to time, and may in the future impose, exchange controls which could affect exchange rates as well as the availability of a specified foreign currency at the time of payment of principal and of premium, if any, or interest, if any, on a Note. Even if there are no actual exchange controls, it is possible that the Specified Currency for any particular Note not denominated in U.S. dollars would not be available at such Note's maturity. In that event, the Issuer would make required payments in U.S. dollars on the basis of the market exchange rate on the date of such payment, or if such rate of exchange is not then available, on the basis of the market exchange rate as of the most recent practicable date. See “Special Provisions Relating to Foreign Currency Notes—Payments on Foreign Currency Notes”.

Interest Rate Risk

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Fixed Rate Notes.

The Fiscal Agency Agreement Provides Limited Covenants and Protection

While the Fiscal Agency Agreement and the Notes contain terms intended to provide you protection upon the occurrence of certain events, these terms are limited and may not be sufficient to protect your investment in the Notes.

In addition, in acting as the Fiscal Agent for the Notes, Citibank, N.A., London Branch, is the agent of the Issuer, is not a trustee or agent for the holders of the Notes and does not have the same responsibilities or duties to act for such holders as would a trustee or agent if the Notes were to be issued pursuant to an indenture.

Notes Denominated in a Specified Currency Other Than U.S. dollars Permit us To Make Payments in U.S. Dollars if we are Unable to Obtain such Specified Currency

If the Specified Currency for any Note denominated in a currency other than U.S. dollars is unavailable to us due to the imposition of exchange controls or other circumstances beyond our control or if the Specified Currency is no longer being used by the government of the country issuing such Specified Currency (or, in the case of the euro, the then member states of the European Monetary Union that have adopted the euro as their currency) or for the settlement of transactions by public institutions of or within the international banking community, then all payments in respect of Notes denominated in such Specified Currency will be made in U.S. dollars until such Specified Currency is again available to us or so used. The amount payable on any date in such Specified Currency will be converted into U.S. dollars on the basis of the market exchange rate for the Specified Currency most recently available on, or prior to, the second business day before the relevant payment date. Any payment in respect of the Notes denominated in such Specified Currency so made in U.S. dollars will not constitute an Event of Default under the applicable Notes or Fiscal Agency Agreement.

The Issuer May Not Effectively Manage Risks Associated with The Replacement of Benchmark Indices

Interest rate, equity, foreign exchange rate and other types of indices which are deemed to be “benchmarks,” including those in widespread and long-standing use, have been the subject of ongoing international, national and other regulatory scrutiny and initiatives and proposals for reform. Some of these reforms are already effective while others are still to be implemented or are under consideration. These reforms may cause benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences, which cannot be fully anticipated.

Any of the benchmark reforms which have been proposed or implemented, or the general increased regulatory scrutiny of benchmarks, could also increase the costs and risks of administering or otherwise participating in the setting of benchmarks and complying with regulations or requirements relating to benchmarks. Such factors may have the effect of discouraging market participants from continuing to administer or contribute to certain benchmarks, trigger changes in the rules or methodologies used in certain benchmarks or lead to the disappearance of certain benchmarks or result in other consequences that cannot be predicted.

Any of these developments, and any future initiatives to regulate, reform or change the administration of benchmarks, could result in material adverse consequences to the return on, value of and market for loans, mortgages, securities, derivatives and other financial instruments whose returns are linked to any such benchmark, including those issued, funded or held by the Issuer.

The benchmark reform could have a material impact on Notes linked to such benchmark, including the discontinuance in use of a benchmark if its administrator does not obtain the requisite authorization or satisfy other applicable requirements. In such event, depending on the particular benchmark and the applicable terms of the Notes, the Notes could be de-listed, adjusted, redeemed prior to maturity or otherwise impacted. Furthermore, the benchmark reform could also result in a change in the methodology or terms of the benchmark in order to comply with the requirements of the benchmark reform and such changes could have the effect of reducing or increasing the rate or level or affecting the volatility of the published rate or level, and could lead to adjustments to the terms of the Notes, including, in certain circumstances, the selection of a substitute or successor reference rate.

Various regulators, industry bodies and other market participants in the U.S. and other countries have been engaged in initiatives to develop, introduce and encourage the use of alternative rates to replace certain benchmarks. There is no assurance that these new rates will be accepted or widely used by market participants, or that the characteristics of any of these new rates will be similar to, or produce the economic equivalent of, the benchmarks that they seek to replace. If a particular benchmark were to be discontinued and an alternative rate has not been successfully introduced to replace that benchmark, this could result in widespread dislocation in the financial markets, engender volatility in the pricing of securities, derivatives and other instruments, and suppress capital markets

activities, all of which could have adverse effects on the Issuer's results of operations. In addition, the transition of a particular benchmark to a replacement rate could affect hedge accounting relationships between financial instruments linked to that benchmark and any related derivatives, which could adversely affect the Issuer's results.

Credit Ratings May Not Reflect All Risks, and The Issuer Cannot Assure You That Such Ratings Will Not Be Lowered, Suspended or Withdrawn By the Rating Agencies.

One or more independent credit rating agencies may assign credit ratings to the Notes. Where a Series is rated, such rating will not necessarily be the same as the rating assigned to the Notes to be issued under the Program. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Notes. The credit ratings of the Notes may change after issuance. Such ratings are limited in scope, and do not address all material risks relating to an investment in the Notes but rather reflect only the views of the rating agencies at the time the ratings are issued. An explanation of the significance of such ratings may be obtained from the rating agencies. The Issuer cannot assure you that such credit ratings will remain in effect for any given period of time or that such ratings will not be lowered, suspended or withdrawn entirely by the rating agencies, if, in the judgment of such rating agencies, circumstances are so warranted. Any lowering, suspension or withdrawal of such ratings may have an adverse effect on the market price and marketability of the Notes. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time. Any ratings assigned to Notes as of the date of this Base Prospectus are not indicative of future performance of the Issuer's business or future creditworthiness.

Changes in Tax Laws Could Lead to a Redeeming of The Notes

Payments of interest in respect of the Notes made by the Issuer to foreign holders will be subject to Chilean interest withholding tax currently assessed at a rate of 4.0%. Subject to certain exemptions, the Issuer will pay Additional Amounts (as defined in "Description of the Notes—Payment of Additional Amounts") so that the amount received by the holder after Chilean withholding tax (including any Chilean withholding taxes imposed on additional amounts) will equal the amount that would have been received if no such taxes had been applicable. The Notes can be redeemable at the Issuer's option, subject to applicable Chilean law, in whole but not in part, at any time, at the principal amount thereof plus accrued and unpaid interest and any Additional Amounts due thereon if, as a result of changes in the laws or regulations affecting taxation in a Relevant Taxing Jurisdiction (as defined in "Description of the Notes—Payment of Additional Amounts"), the Issuer becomes obligated to pay Additional Amounts on the Notes based on a rate of withholding or deduction in excess of 4.0%. The Issuer cannot assure you that an increase in withholding tax rate will not be presented to or enacted by the Chilean Congress. See "Description of the Notes—Redemption Prior to Maturity Solely for Taxation Reasons" and "Taxation—Chilean Taxation".

The Notes Are Subject to Certain Transfer Restrictions

The Notes have not been registered under the Securities Act or with any securities regulatory authority of any state or other jurisdiction of the United States. Accordingly, the Notes may be transferred or resold only in a transaction registered under or exempt from the registration requirements of the Securities Act and in compliance with any other applicable securities law. See "Transfer and Selling Restrictions".

Holders of Notes May find it Difficult to enforce Civil Liabilities against the Issuer or its Directors, Executive Officers and Controlling Persons Outside Chile

The Issuer is organized under the laws of Chile and its principal place of business (*domicilio social*) is in Santiago, Chile. Most of the Issuer's executive officers and controlling persons reside in Chile.

In addition, a substantial portion of its assets and directors, executive officers and controlling persons are located in Chile. As a result, it may be difficult for holders of Notes to effect service of process within jurisdictions outside Chile on such persons or to enforce judgments against them, including in any action based on civil liabilities under the U.S. federal securities laws. There is doubt as to the enforceability against such persons in Chile, whether in original actions or in actions to enforce judgments of courts in countries outside Chile, of liabilities based solely on the securities laws of countries outside Chile. See "Enforceability of Judgments."

The Issuer's Obligations Under the Notes Will Be Subordinated to Certain Statutory Liabilities and The Liabilities of its Subsidiaries

Under Chilean bankruptcy law, the Issuer's obligations under the Notes are subordinated to certain statutory preferences. In the event of the Issuer's liquidation, such statutory preferences, including among others, claims for salaries, wages, secured obligations, social security, taxes and court fees and expenses related thereto, will have preference over any other claims, including claims by any investor in respect of the Notes. The aforementioned statutory preferences have not been included in a legal order. In addition, the liabilities of its subsidiaries are structurally senior to the Notes.

In addition, the Issuer's creditors may hold negotiable instruments or other instruments governed by local law that grant rights to attach its assets at the inception of judicial proceedings in the relevant jurisdiction, which attachment is likely to result in priorities benefitting those creditors when compared to the rights of holders of the Notes.

The Notes Contain Provisions Which May Permit Their Modification Without the Consent of All Investors

The Notes contain provisions for calling meetings of holders of Notes to consider matters affecting their interests generally. Except for certain matters that require unanimous consent of the holders of each Note of any Series directly and adversely affected thereby, the Fiscal Agency Agreement and the terms and conditions of the notes of a Series may be modified or amended (and future compliance therewith or past Events of Default may be waived) by holders of (i) a majority in principal amount of the outstanding Notes of such Series or (ii) 75% of the principal amount of Notes of such Series represented and voting at the meeting. These provisions permit such defined majorities to bind all holders of the Notes of a Series, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority. See "Description of the Notes—Modification of Fiscal Agency Agreement and Notes."

Investors Who Purchase Interests in Global Bearer Notes in Denominations That Are Not an Integral Multiple of the Specified Denomination May Be Adversely Affected If Definitive Bearer Notes Are Subsequently Required to Be Issued

In relation to any issue of Notes in global bearer form which have denominations consisting of a minimum Specified Denomination plus one or more higher integral multiples of another smaller amount, it is possible that interests in such Notes may be traded in amounts in excess of the minimum Specified Denomination that are not integral multiples of such minimum Specified Denomination. In such a case a holder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in their account with the relevant clearing system would not be able to sell the remainder of such holding without first purchasing a principal amount of Notes at or in excess of the minimum Specified Denomination. Further, a holder who, as a result of trading such amounts, holds an amount which is less than the minimum Specified Denomination in their account with the relevant clearing system at the relevant time may not receive a definitive Note in bearer form in respect of such holding (should definitive Notes replace the applicable global Bearer Notes) and would need to purchase or sell a principal amount of Notes such that its holding amounts to a Specified Denomination. If definitive Notes in bearer form are issued, holders should be aware that definitive Notes which have a denomination that is not an integral multiple of the minimum Specified Denomination may be illiquid and difficult to trade.

Reliance on Euroclear and Clearstream, Luxembourg Procedures

Unless issued in definitive form, Notes issued under the Program will be represented on issue by one or more global Notes that may be deposited with or registered in the name of a nominee for a common depositary for Euroclear and Clearstream, Luxembourg. Except in the circumstances described in the applicable global Note, investors in a global Note will not be entitled to receive Notes in definitive form. Each of Euroclear and Clearstream, Luxembourg and their respective direct and indirect participants will maintain records of the beneficial interests in each global Note held through it. While the Notes are represented by a global Note, investors will be able to trade their beneficial interests only through the relevant clearing systems and their respective participants. For so long as the Notes are represented by global Notes, the Issuer will discharge its payment obligation under the Notes by making payments through the relevant clearing systems. A holder of a beneficial interest in a global Note must rely on the procedures of the relevant clearing system and its participants to receive payments under the Notes. The Issuer has no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in any global

Note. Holders of beneficial interests in a global Note will not have a direct right to vote in respect of the Notes so represented. Instead, such holders will be permitted to act only to the extent that they are enabled by the relevant clearing system and its participants to appoint appropriate proxies.

The Issuer Can Issue Further Debt or Other Instruments Which May Rank Senior to or Pari Passu With The Notes

There are no restrictions on the Issuer's ability to incur additional indebtedness that is senior to, or pari passu with, any Series. The issuance of any such instruments may reduce the amount recoverable by holders upon any bankruptcy, insolvency, liquidation, reorganization, dissolution or other winding-up.

The Issuer's Interests and the Regulatory Authorities' Interests May Not Be Aligned With Those of the Holders

The Issuer's financial condition will depend in part on decisions made by it relating to its business and operations, as well as the management of its capital position. It will have no obligation to consider the interest of holders in connection with its strategic decisions, including in respect of capital management. Holders will not have any claim against it relating to decisions that affect the Issuer's capital position, regardless of whether they result in the occurrence of a write-off.

Investors Will Be Deemed to Have Waived all Rights of Set-Off

Subject to applicable law, holders may not exercise or claim any right of set-off in respect of any amount the Issuer owes arising under or in connection with the Notes, and the holders will be deemed to have waived all such rights of set-off.

The Notes Will Be Unsecured and Effectively Subordinated to the Rights Of The Issuer's Existing and Future Secured Creditors

The Notes are unsecured and therefore do not have the benefit of any collateral. Accordingly, the Notes will be effectively subordinated to the Issuer's secured indebtedness to the extent of the value of the assets securing such indebtedness, if any, with respect to which the Issuer is not required to secure senior Notes equally and ratably pursuant to the negative pledge covenant applicable to senior Notes. There is no covenant requiring that the Notes be secured equally and ratably and the Issuer is permitted to incur a significant amount of secured indebtedness. Secured creditors will have a prior right to collateral securing their indebtedness in case of an event of default under the Issuer's secured indebtedness and that of its subsidiaries, to the exclusion of the holders of the Notes, even if the Issuer is in default under the Notes. In that event, such collateral would first be used to repay in full all indebtedness and other obligations secured in favor of such secured creditors, resulting in all or a portion of the collateral being unavailable to satisfy the claims of the holders of the Notes and other unsecured indebtedness. Therefore, in the event of any distribution or payment to secured creditors of the Issuer or its subsidiaries of collateral in any foreclosure, dissolution, winding-up, liquidation, reorganization, or other bankruptcy proceeding, holders of Notes would have rights with respect to its remaining assets ratably with all holders of its unsecured indebtedness that are deemed to be of the same class as such Notes, and potentially with all other general creditors, based upon the respective amounts owed to each holder or creditor. In any of the foregoing events, holders of Notes should expect to receive less, ratably, than holders of secured indebtedness.

Judgments of Chilean Courts Enforcing the Issuer's Obligations Under Any Notes Would Be Payable Only in Chilean Pesos

If proceedings were brought in Chile seeking to enforce the Issuer's obligations under the Notes, the Issuer would not be required to discharge its obligations in a currency other than Chilean pesos. Under Chilean law, an obligation to pay amounts denominated in a currency other than Chilean currency, which is payable in Chile, may only be satisfied in Chilean currency at the rate of exchange, as determined by the Central Bank, in effect on the date of payment. Any such amount payable in Chilean pesos may not be able to generate the applicable amount of non-Chilean currency based on exchange rates in effect when the judgment amount, if any, is obtained.

The Statute of Limitations of The Notes May Not Be Respected By Chilean Courts

The terms and conditions of the Notes provide that claims with respect to principal or interest will not be possible unless made within a period of six years, with respect to principal or interest, while the Chilean Civil Code provides that the statute of limitations for claims with respect to principal or interest generally is five years. In the event enforcement proceedings are initiated in Chile in connection with the Notes or a foreign judgment is brought for

enforcement in Chile after the statute of limitations provided in the Chilean Civil Code has elapsed, there can be no assurance that a Chilean court will respect the statute of limitations period provided in the terms of the Notes.

Legal Investment Considerations May Restrict Certain Investments

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult their legal advisers to determine whether and to what extent (1) Notes are legal investments for it, (2) Notes can be used as collateral for various types of borrowing and (3) other restrictions apply to their purchase or pledge of any Notes. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Notes Issued Under The Program May Not Be A Suitable Investment For All Investors

The Notes issued under the Program may not be a suitable investment for all investors. Each potential investor in Notes must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

(a) have sufficient knowledge and experience to make a meaningful evaluation of the relevant Notes, the merits and risks of investing in such Notes and the information contained in this Base Prospectus or any applicable supplement;

(b) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the relevant Notes and the impact such Notes will have on its overall investment portfolio;

(c) have sufficient financial resources and liquidity to bear all of the risks of an investment in the relevant Notes, including Notes with principal or interest payable in one or more Specified Currencies, or where the Specified Currency for principal or interest payments is different from the potential investor's usual currency for holding investments;

(d) understand thoroughly the terms of the relevant Notes and be familiar with the behavior of any relevant indices and financial markets; and

(e) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment in the relevant Notes and its ability to bear the applicable risks.

Itau BBA USA Securities, Inc., Who Acts as Arranger And Dealer, is an Affiliate Of Itaú Unibanco Holding, and if Such Arranger And Dealer Participate in the Bookbuilding Process, Conflicts of Interest May Occur in the Setting of the Material Terms of the Notes

Itau BBA USA Securities, Inc., who acts as Arranger and Dealer for the Program, is an affiliate of our controlling shareholder, Itaú Unibanco Holding, and may participate in the setting of the issue price, interest rate and other material terms of the Notes, together with other dealers. This participation in the bookbuilding process may cause the appearance of conflicts of interest in the setting of such terms of the Notes.

Risks Related to the Structure of a Particular Issue of Notes

A wide range of Notes may be issued under the Program. Some Notes are complex financial instruments and such instruments may be purchased as a way to reduce risk or enhance yield with an understood, measured, appropriate addition of risk to their overall portfolios. A potential investor should not invest in Notes which are complex financial instruments unless it has the expertise (either alone or with a financial adviser) to evaluate how the relevant Notes will perform under changing conditions, the resulting effects on the value of such Notes and the impact such investment will have on the potential investor's overall investment portfolio. Certain Notes may have features which contain particular risks for potential investors. Set out below is a description of the most common such features:

The Subordinated Notes are the Issuer's Subordinated Obligations

Upon the occurrence of a bankruptcy event, the Issuer's subordinated notes will be subordinated in right of payment to all present and future senior liabilities. There is a significant risk that an investor in subordinated notes

will lose all or some of such investor's investment in the event of the Issuer's winding-up, bankruptcy, liquidation, dissolution or similar proceeding.

If the Issuer Does Not Satisfy Its Obligations Under the Subordinated Notes, your Remedies Will Be Limited

Payment of principal of the subordinated notes may be accelerated in the case of certain events involving the Issuer's insolvency or events that may affect the safety of the Issuer's depositors and creditors, in which cases the CMF will require the Issuer's liquidation and termination of its banking license. There will be no right of acceleration in the case of a default in the performance of any of the Issuer's covenants, including the payment of principal or interest in respect of the subordinated notes.

Even if the payment of principal of the subordinated notes is accelerated, the Issuer's assets will be available to pay those amounts only after all Issuer's senior creditors have been paid in full (including unsecured creditors).

The Amount of Interest Payable on any Floating Rate Notes is set Periodically Based on The Relevant Benchmark on The Interest Determination Date, Which Rate May Fluctuate Substantially

In the case of Notes specified as being Floating Rate Notes (as defined below) in the applicable Final Terms, you should note that historical levels, fluctuations and trends of the relevant benchmark are not necessarily indicative of future levels. Any historical upward or downward trend in the relevant benchmark is not an indication that the relevant benchmark is more or less likely to increase or decrease at any time during a floating interest rate period, and you should not take the historical levels of relevant benchmark as an indication of its future performance. You should further note that although the actual relevant benchmark on an interest payment date or at other times during an interest period may be higher than the relevant benchmark on the applicable interest determination date, you will not benefit from the relevant benchmark at any time other than the interest determination date for such period. As a result, changes in the relevant benchmark may not result in a comparable change in the market value of the Notes.

In addition, you will be exposed to risks not associated with a conventional fixed-rate debt instrument. These risks include fluctuation of the relevant benchmark (and hence, the interest rate) and the possibility that for any given interest payment period you may receive a lesser amount of interest than for one or more other interest payment periods. The Issuer does not have control over a number of factors that may affect market interest rates, including geopolitical conditions and economic, financial, political, regulatory, agricultural, judicial or other events that affect the markets generally and that are important in determining the existence, magnitude, and longevity of these risks and their results. Also, the floating interest rate for any floating rate notes may be less than the floating rate payable on a similar debt instrument of the same maturity issued by an issuer of comparable creditworthiness.

Certain Notes may be Subject to optional Redemption by The Issuer

Notes with an optional redemption are likely to have a market value that is limited by the redemption price. During any period when the Issuer may elect to redeem Notes, the market value of such Notes generally will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period.

The Issuer may expect to redeem Notes when its cost of borrowing is lower than the interest rate on the Notes. At those times, an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Notes being redeemed and may only be able to do so at a significantly lower rate. Potential investors should consider reinvestment risk in light of other investments available at that time.

Variable Rate Notes with a Multiplier or Other Leverage Factor

Notes with variable interest rates can be volatile investments. If they are structured to include multipliers or other leverage factors, or caps or floors, or any combination of those features or other similar related features, their market values may be even more volatile than those for securities that do not include those features.

Inverse Floating Rate Notes

Inverse Floating Rate Notes have an interest rate equal to a fixed rate minus a rate based upon a reference rate such as the European Interbank Offered Rate ("EURIBOR") or the Secured Overnight Funding Rate ("SOFR"). The market values of such Notes typically are more volatile than market values of other conventional floating rate debt securities based on the same reference rate (and with otherwise comparable terms). Inverse Floating Rate Notes are

more volatile because an increase in the reference rate not only decreases the interest rate of the Notes, but may also reflect an increase in prevailing interest rates, which further adversely affects the market value of these Notes.

Fixed/Floating Rate Notes

Fixed/Floating Rate Notes may bear interest at a rate that the Issuer may elect to convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. The Issuer's ability to convert the interest rate will affect the secondary market and the market value of such Notes since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing. If the Issuer converts from a fixed rate to a floating rate, the spread on the Fixed/Floating Rate Notes may be less favorable than then prevailing spreads on comparable Floating Rate Notes tied to the same reference rate. In addition, the new floating rate at any time may be lower than the rates on other Notes. If the Issuer converts from a floating rate to a fixed rate, the fixed rate may be lower than then prevailing rates on the Notes.

Uncertainty About the Future of EURIBOR and the Potential Discontinuance of EURIBOR Could Adversely Affect the Market Value of Any EURIBOR Notes, Limit Your Ability to Resell them and/or the Payment of Interest Under Such EURIBOR Notes

Various interest rates and indices which are deemed to be benchmarks (including EURIBOR) are the subject of national and international regulatory guidance and reform aimed at supporting the transition to robust benchmarks. Most reforms have now reached their planned conclusion and benchmarks remain subject to ongoing monitoring.

The EU Benchmark Regulation (Regulation (EU) 2016/1011) (the “**Benchmarks Regulation**”) applies, subject to certain transitional provisions, to the provision of a wide range of benchmarks (including EURIBOR), the contribution of input data to a benchmark and the use of a benchmark within the European Union. In particular, the Benchmark Regulation, among other things, (i) requires benchmark administrators to be authorized or registered (or, if non-EU-based, to be subject to an equivalent regime or otherwise recognized or endorsed) and to comply with extensive requirements in relation to the administration of benchmarks and (ii) prevents certain uses by EU-supervised entities of benchmarks of administrators that are not authorized or registered (or, if non-EU-based, deemed equivalent or recognized or endorsed). At this time, the nature and overall timeframe of the transition away from EURIBOR is uncertain and no consensus exists as to what rate or rates may become accepted alternatives to EURIBOR. It is impossible to predict the effect of the transition and any alternative rates on the value of EURIBOR-based securities, including EURIBOR-based Floating Rate Notes. The resulting uncertainty could adversely affect the market value of any EURIBOR Notes and/or limit your ability to resell them.

If the three-month EURIBOR rate is not published, the rate of interest on the Notes will be determined using alternative methods. See “Description of the Notes—Interest and Interest Rates—EURIBOR Notes.” These alternative methods may result in lower interest payments than would have been made if three-month EURIBOR were published in its current form. The alternative methods may also be subject to factors that make the three-month EURIBOR impossible or impracticable to determine. If a published EURIBOR is unavailable and banks are unwilling to provide quotations, the rate of interest on EURIBOR Notes for an interest period will be the same as the immediately preceding interest period, and could remain the rate of interest for the remaining life of such EURIBOR Notes.

Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the Benchmarks Regulation reforms or possible cessation or reform EURIBOR in making any investment decision with respect to the Floating Rate Notes.

SOFR Differs Fundamentally from, and May Not Be a Comparable Substitute for, U.S. Dollar LIBOR

The rate of interest for Floating Rate Notes (as defined below) will be determined by reference to SOFR on the basis of the SOFR Index published on the website of the Federal Reserve Bank of New York (the “**FRBNY**”). The composition and characteristics of SOFR are not the same as those to the London interbank offered rate (“**LIBOR**”) for U.S. dollar obligations (“**U.S. dollar LIBOR**”). SOFR is a broad treasury repo financing rate that represents overnight secured funding transactions and is not the economic equivalent of U.S. dollar LIBOR. SOFR differs in a number of material respects from U.S. dollar LIBOR, including (without limitation) that SOFR is a compounded daily rate or weighted average rate that is a backwards-looking, risk-free overnight rate, and a single daily rate is a risk-free overnight non-term rate, whereas LIBOR was expressed on the basis of a forward-looking term and included a risk-element based on inter-bank lending. As a result, there can be no assurance that SOFR will perform in the same way as U.S. dollar LIBOR would have performed at any time, including, without limitation, as a result of changes in

interest and yield rates in the market, bank credit risk, market volatility or global or regional economic, financial, political, regulatory, judicial or other events.

SOFR has a Limited History, and the Future Performance of SOFR Cannot be Predicted Based on Historical Performance

The publication of SOFR began in April 2018 and it therefore has a limited history. The future performance of SOFR cannot be predicted based on the limited historical performance. Future levels of SOFR may bear little or no relation to the historical actual or historical indicative SOFR data. Prior observed patterns, if any, in the behavior of market variables and their relation to SOFR, such as correlations, may change in the future. While some pre-publication historical data has been released by the FRBNY, production of such historical indicative SOFR data inherently involves assumptions, estimates and approximations. No future performance of SOFR may be inferred from any of the historical actual or historical indicative SOFR data. Hypothetical or historical performance data are not indicative of, and have no bearing on, the potential performance of SOFR.

Term SOFR has a Limited History, and the Future Performance of Term SOFR Cannot be Predicted Based on Historical Performance

The publication of Term SOFR (as defined under “Description of the Notes—Interest and Interest Rates—Floating Rate Notes—Types of Floating Rate Notes—Term SOFR Notes”) began in April 2021, and, therefore, it has a very limited history. In addition, the future performance of Term SOFR cannot be predicted based on its limited historical performance. Future levels of Term SOFR may bear little or no relation to the historical actual or historical indicative data. Prior observed patterns, if any, in the behavior of market variables and their relation to Term SOFR, such as correlations, may change in the future. Because only limited historical data has been released by CME Group Benchmark Administration Limited, as administrator of Term SOFR, such analysis inherently involves assumptions, estimates and approximations. The future performance of Term SOFR is impossible to predict and therefore no future performance of Term SOFR may be inferred from any of the historical actual or historical indicative data. Hypothetical or historical performance data are not indicative of, and have no bearing on, the potential performance of Term SOFR or any Term SOFR Notes.

SOFR and Term SOFR May be More Volatile Than Other Benchmark or Market Rates

Since the initial publication of SOFR and Term SOFR, daily changes in the rate have, on occasion, been more volatile than daily changes in other benchmark or market rates, such as U.S. dollar LIBOR, during corresponding periods. In addition, although changes in Term SOFR, compounded SOFR and weighted average daily SOFR generally are not expected to be as volatile as changes in SOFR on a daily basis, the return on, value of and market for any Floating Rate Notes based on SOFR may fluctuate more than floating-rate debt securities with rates of interest based on less volatile rates. The FRBNY has at times conducted operations in the overnight U.S. Treasury repo market in order to help maintain the federal funds rate within a target range. There can be no assurance that the FRBNY will continue to conduct such operations in the future, and the duration and extent of any such operations is inherently uncertain. The effect of any such operations, or of the cessation of such operations to the extent they are commenced, is uncertain and could be materially adverse to investors in Notes linked to SOFR.

The Administrator of SOFR May Make Changes that Could Change the Value of SOFR or Discontinue SOFR

SOFR is a relatively new rate, and the FRBNY (or a successor), as administrator of SOFR, may make methodological or other changes that could change the value of SOFR, including changes related to the method by which SOFR is calculated, eligibility criteria applicable to the transactions used to calculate SOFR, or timing related to the publication of SOFR. If the manner in which SOFR is calculated is changed, that change may result in a reduction of the amount of interest payable on Floating Rate Notes based on SOFR, which may adversely affect the trading prices of such Floating Rate Notes. The administrator of SOFR may withdraw, modify, amend, suspend or discontinue the calculation or dissemination of SOFR in its sole discretion and without notice and has no obligation to consider the interests of holders of such Floating Rate Notes in calculating, withdrawing, modifying, amending, suspending or discontinuing SOFR.

To the extent the SOFR rate is not published, the applicable rate to be used to calculate the interest rate on SOFR Notes will be determined using the fallback provisions set out in the Final Terms which apply specifically to Notes referencing SOFR and are distinct to those applying to other types of Notes. Any of these fallback provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would

have been made on such SOFR Notes if the relevant SOFR rate had been so published in its current form. In addition, use of the fallback provisions may result in the effective application of a fixed rate of interest to such SOFR Notes.

There can be no assurance that SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of holders of Notes linked to SOFR.

The Administrator of Term SOFR May Make Changes that Could Change the Value of Term SOFR or Discontinue Term SOFR

Term SOFR is a relatively new rate, and CME Group Benchmark Administration Limited (or a successor), as administrator of Term SOFR, may make methodological or other changes that could change the value of Term SOFR, including changes related to the methods by which Term SOFR is calculated, eligibility criteria applicable to the transactions used to calculate Term SOFR, or the averages or periods used to report Term SOFR. If the manner in which Term SOFR is calculated is changed, that change may result in a reduction of the amount of interest payable on Term SOFR notes, which may adversely affect the trading prices and marketability of those notes. The administrator of Term SOFR may withdraw, modify, amend, suspend or discontinue the calculation or dissemination of Term SOFR in its sole discretion and without notice and has no obligation to consider the interests of holders of the notes in calculating, withdrawing, modifying, amending, suspending or discontinuing Term SOFR.

To the extent the Term SOFR rate is not published, the applicable rate to be used to calculate the interest rate on Term SOFR Notes will be determined using the fallback provisions set out in the Final Terms which apply specifically to Notes referencing Term SOFR and are distinct to those applying to other types of Notes. Any of these fallback provisions may result in interest payments that are lower than, or do not otherwise correlate over time with, the payments that would have been made on such Term SOFR Notes if the relevant Term SOFR rate had been so published in its current form. In addition, use of the fallback provisions may result in the effective application of a fixed rate of interest to such Term SOFR Notes.

There can be no assurance that Term SOFR will not be discontinued or fundamentally altered in a manner that is materially adverse to the interests of holders of Notes linked to Term SOFR.

The Total Amount of Interest Payable with Respect to Each Interest Period for SOFR Notes Will Not Be Known Until Near the end of the Interest Period

The total amount of interest payable with respect to each interest period for a SOFR Note will not be known until near the end of such interest period. As a result, you will not know the total amount of interest payable with respect to each such interest period until shortly prior to the related interest payment date and it may be difficult for you to reliably estimate the amount of interest that will be payable on each such interest payment date, and some investors may be unable or unwilling to trade such Notes, both of which factors could adversely impact the liquidity of any SOFR Notes.

Any Market for SOFR Notes may be Illiquid or Unpredictable

The market continues to develop in relation to SOFR as reference rates in the capital markets and their adoption as alternative to the relevant interbank offered rates and the secondary trading market for floating rate securities with rates based on SOFR may be limited. If SOFR does not prove to be widely used as a benchmark in securities that are similar or comparable to Floating Rate Notes based on SOFR, the trading price of such Floating Rate Notes may be lower than those of debt securities with interest rates that are based on rates that are more widely used. Similarly, market terms for debt securities with rates that are based on SOFR, including, but not limited to, the spread over the reference rate reflected in the interest rate provisions or manner of compounding the reference rate (if applicable), may evolve over time, and as a result, trading prices of any Floating Rate Notes based on SOFR may be lower than those of later-issued debt securities that are based on SOFR. Investors in any such Floating Rate Notes may not be able to sell such Notes at all or may not be able to sell them at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

The manner of adoption or application of reference rates based on SOFR in the bond market may differ materially compared with the application and adoption of SOFR in other markets, such as the derivatives and loan markets. You should carefully consider how any potential inconsistencies between the adoption of reference rates based on SOFR across these markets may impact any hedging or other financial arrangements which you may put in place in connection with any acquisition, holding or disposal of the SOFR Notes.

Any Market for Term SOFR Notes may be Illiquid or Unpredictable

The market continues to develop in relation to Term SOFR as reference rates in the capital markets and their adoption as alternative to the relevant interbank offered rates and the secondary trading market for floating rate securities with rates based on Term SOFR may be limited. If Term SOFR does not prove to be widely used as a benchmark in securities that are similar or comparable to Floating Rate Notes based on Term SOFR, the trading price of such Floating Rate Notes may be lower than those of debt securities with interest rates that are based on rates that are more widely used. Similarly, market terms for debt securities with rates that are based on Term SOFR, including, but not limited to, the spread over the reference rate reflected in the interest rate provisions or manner of compounding the reference rate (if applicable), may evolve over time, and as a result, trading prices of any Floating Rate Notes based on Term SOFR may be lower than those of later-issued debt securities that are based on Term SOFR. Investors in any such Floating Rate Notes may not be able to sell such Notes at all or may not be able to sell them at prices that will provide them with a yield comparable to similar investments that have a developed secondary market, and may consequently suffer from increased pricing volatility and market risk.

You should carefully consider how any potential inconsistencies between the adoption of reference rates based on Term SOFR across these markets may impact any hedging or other financial arrangements which you may put in place in connection with any acquisition, holding or disposal of the Term SOFR Notes.

The Selection of a Benchmark Replacement Could Adversely Affect the Return on, Value of or Market for Notes Linked to a Benchmark During the Interest Reset Period

If the Issuer or its designee, after consulting with the Issuer, determines that a Benchmark Transition Event and related Benchmark Replacement Date have occurred with respect to the relevant Benchmark, the applicable Benchmark Replacement will replace the then-current Benchmark for all purposes relating to such Floating Rate Notes. If a particular Benchmark Replacement or Benchmark Replacement Adjustment cannot be determined, then the next-available Benchmark Replacement or Benchmark Replacement Adjustment will apply. See “Description of the Notes—Floating Rate Notes—Benchmark Replacement Provisions.”

The application of a Benchmark Replacement and Benchmark Replacement Adjustment, and any implementation of Benchmark Replacement Conforming Changes, could result in adverse consequences to the amount of interest payable on any Notes linked to such Benchmark, which could adversely affect the return on, value of and market for such Floating Rate Notes.

Further, (i) the composition and characteristics of any Benchmark Replacement will not be the same as those of the then-current Benchmark (ii) the Benchmark Replacement will not be the economic equivalent of the then-current Benchmark (iii) there can be no assurance that the Benchmark Replacement will perform in the same way as the then-current Benchmark would have at any time, (iv) there is no guarantee that the Benchmark Replacement will be a comparable substitute for the then-current Benchmark (which means that a Benchmark Transition Event could adversely affect the return on, value of and market for the applicable Floating Rate Notes), (v) any failure of the Benchmark Replacement to gain market acceptance could adversely affect such Floating Rate Notes, (vi) the Benchmark Replacement may have a very limited history and the future performance of the Benchmark Replacement may not be able to be predicted based on historical performance, (vii) the secondary trading market for debt securities linked to the Benchmark Replacement may be limited and (viii) the administrator of the Benchmark Replacement may make changes that could change the value of the Benchmark Replacement or discontinue the Benchmark Replacement and would not have any obligation to consider the interests of holders of any Floating Rate Notes in doing so.

The Issuer or its Affiliate will Make Determinations with respect to Notes linked to a Benchmark that may be Adverse to your Interests and Could Affect the Value of And Return on the Notes

The Issuer or its designee will make certain determinations, decisions and elections with respect to the interest rate on Notes linked to a Benchmark. See “Description of the Notes—Floating Rate Notes—Benchmark Replacement Provisions.” The Issuer or its designee will make any such determination, decision or election in its sole discretion, and any such determination, decision or election that is made could affect the amount of interest payable on Notes linked to such Benchmark. For example, if the Issuer or its designee determines that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to Floating Rate Notes linked to SOFR, then

the Issuer or its designee will determine, among other things, the Benchmark Replacement, Benchmark Replacement Adjustment and Benchmark Replacement Conforming Changes. Any exercise of discretion by the Issuer or one of its designee, under the terms of the Notes linked to a Benchmark could present a conflict of interest. The interests of the Issuer or its designee in making these determinations described above may be adverse to your interests as a holder of such Notes. All determinations, decisions or elections by the Issuer or its designee, including those made by a designee acting as calculation agent, will be conclusive and binding absent manifest error.

Notes Linked to Currency Prices, Commodity Prices, Single Securities, Baskets of Securities or Indices Entail Significant Risks

In addition to potential currency risks as described above, an investment in currency-linked Notes and Notes linked to commodity prices, single securities, baskets of securities or indices presents certain significant risks not associated with other types of securities. Currency-linked Notes and Notes linked to commodity prices, single securities, baskets of securities or indices may present a high level of risk, and holders of Notes may lose their entire investment if they have purchased such Notes.

The principal amount of currency-linked Notes and Notes linked to commodity prices, single securities, baskets of securities or indices payable at maturity, and the amount of interest payable on an interest payment date may be determined by reference to one or more of the following (each, an “**index**”):

- Currencies, including baskets of currencies;
- Commodities, including baskets of commodities;
- Securities, including baskets of securities; or
- Any other index.

The direction and magnitude of the change in the value of the relevant index will determine either or both the principal amount of Notes linked to such index payable at maturity or the amount of interest payable on an interest payment date. The terms of particular Notes may not include a guaranteed return of a percentage of the face amount at maturity or a minimum interest rate. If the interest rate of a Note is indexed, it may result in an interest rate that is less than that payable on a conventional fixed-rate debt security issued by the Issuer at the same time, including the possibility that no interest will be paid, and, if the principal amount of a Note is indexed, the principal amount payable at maturity may be less than the original purchase price of such Note, including the possibility that no principal will be paid (but in no event shall the amount of interest and principal paid with respect to such Note be less than zero). Accordingly, holders of Notes linked to an index may lose all or a portion of the principal invested in such Notes and may receive no interest on such Notes.

Volatility may affect the value of or return on Notes linked to indices. Certain indices are highly volatile. The expected principal amount payable at maturity of, or the interest rate on, Notes based on a volatile index may vary substantially from time to time. Because the principal amount payable at the maturity of, or interest payable on, Notes linked to an index is generally calculated based on the value of the relevant index on a specified date or over a limited period of time, volatility in the index increases the risk that the return on such Notes may be adversely affected by a fluctuation in the level of the relevant index.

The volatility of an index may be affected by, among other things, political or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these could adversely affect the value of or return on Notes linked to such index.

The availability and composition of certain indexes may affect the value of or return on Notes linked to indexes. Certain indexes reference several different currencies, commodities, securities or other financial instruments. The compiler of such an index typically reserves the right to alter the composition of the index and the manner in which the value of the index is calculated. Such an alteration may result in a decrease in the value of or return on Notes which are linked to such index.

An index may become unavailable due to such factors as war, natural disasters, cessation of publication of the index, or suspension of or disruption in trading in the currency or currencies, commodity or commodities, security or securities or other financial instrument or instruments comprising or underlying such index. If an index becomes unavailable, the determination of principal of or interest on Notes linked to that index may be delayed or an alternative method may be used to determine the value of the unavailable index. Alternative methods of valuation are generally

intended to produce a value similar to the value resulting from reference to the relevant index. However, it is unlikely that such alternative methods of valuation will produce values identical to those that would be produced were the relevant index to be used. An alternative method of valuation may result in a decrease in the value of or return on Notes linked to an index. Certain Notes may be linked to indexes that are not commonly utilized or have been recently developed. The lack of a trading history may make it difficult to anticipate the volatility or other risks to which such Notes are subject. In addition, there may be less trading in such indices or instruments underlying such indices, which could increase the volatility of such indices and decrease the value of or return on Notes relating thereto.

Additionally, if the formula used to determine the principal amount or interest payable with respect to Notes linked to indexes contains a multiple or leverage factor, the effect of any change in the applicable index may be increased. The historical experience of the relevant index should not be taken as an indication of future performance of such index during the term of any such Note. Accordingly, prospective investors should consult their own financial and legal advisors as to the risks entailed by an investment in Notes linked to an index and the suitability of such Notes in light of their particular circumstances.

Notes Issued at a Substantial Discount

The market values of securities issued at a substantial discount from their principal amount tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities. Generally, the longer the remaining term of the Notes, the greater the price volatility as compared to conventional interest-bearing Notes with comparable maturities.

Particular Tax Consequences of Holding Bearer Notes

Any potential investor should consult its own independent tax adviser for more information about the tax consequences of acquiring, owning and disposing of Bearer Notes in its particular circumstances. Bearer Notes may be subject to restrictions on offer, sale and transfer in the European Union, Singapore, and other jurisdictions. The tax consequences of acquiring, holding and disposing of Bearer Notes will depend on the laws applicable in the investor's country of residence or tax domicile.

DESCRIPTION OF THE NEW YORK BRANCH

General

Established in 2009, the New York Branch supports the business needs of Latin American companies, particularly those from Chile, Peru, and Colombia, in their international operations. Located at 885 Third Avenue 33rd Floor, the New York Branch provides financial services to corporate and institutional clients through various products. The New York Branch may sell certificates of deposit directly or through U.S. distributors and other distributors under a Yankee Certificate of Deposit program. In addition, the New York Branch funds its operations through interbank deposits, deposits from financial institutions and corporations.

The New York Branch participates in bilateral and syndicated loans alongside other international institutions to finance investment projects mainly in Chile, Peru, and Colombia, providing financial support to its clients. Additionally, New York Branch offers a range of banking services, including traditional demand deposit accounts in U.S. dollars, foreign currency exchange, and efficient fund transfer services both within and outside the U.S., particularly between Chile and U.S. The Legal Entity Identifier of the New York Branch is 254900TH0071SXGPQ758.

As of March 31, 2025, the New York Branch had total assets of US\$3.5 billion, a 7.7% increase compared to US\$3.2 billion as of March 31, 2024. This growth was primarily driven by a growth of the loan portfolio and overnight deposits. The New York Branch has a short-term rating of A-2 from Standard & Poor's and P-12 from Moody's and a long-term rating of BBB+ from Standard & Poor's and A3 from Moody's, same as its head office in Chile.

Supervision and Regulation of the New York Branch and Banco Itaú Chile in the United States

The New York Branch is licensed by the Office of the Comptroller of the Currency (the “OCC”) under the federal laws of the United States. The New York Branch is supervised and regulated by the OCC and the Board of Governors of the Federal Reserve System (the “Federal Reserve”) and is subject to U.S. banking laws and regulations applicable to a foreign bank that operates a federally-licensed New York branch office.

Under U.S. federal banking laws and regulations, the New York Branch must maintain a capital equivalency deposit with banks located in New York consisting of specified types of investment securities, U.S. dollar deposits, investment-grade certificates of deposit or other specified assets in an amount not less than 5% of its total liabilities (excluding accrued expenses and liabilities to other offices, branches, agencies and subsidiaries of Banco Itaú Chile, and any amounts due to Banco Itaú Chile).

Under U.S. federal banking laws and regulations, the New York Branch is generally subject to the same lending limits to a single borrower, expressed as a ratio of capital, that apply to a U.S. national bank, except that the limits are based on the capital of Banco Itaú Chile. The lending limits to a single borrower do not apply to loans made by the New York Branch to Banco Itaú Chile.

The New York Branch's deposits are not permitted to be, and are not, insured by the Federal Deposit Insurance Corporation (“FDIC”). In general, under the International Banking Act of 1978 (the “IBA”), the New York Branch is not permitted to accept or maintain deposits having a balance of less than US\$250,000.

Under U.S. federal banking laws and regulations, all branches and agencies of foreign banks in the United States are subject to reporting and examination requirements similar to those imposed on U.S. domestic banks. The OCC and the Federal Reserve conduct regular examinations and assessments to ensure that the New York Branch operates in a safe and sound manner and complies with applicable laws and regulations. This supervision includes adherence to the Bank Secrecy Act, which mandates stringent anti-money laundering (“AML”) protocols, and compliance with the provisions of the USA PATRIOT Act of 2001, which enhances AML measures and requires robust customer due diligence procedures.

The New York Branch must also implement comprehensive risk management practices, which include maintaining effective internal controls, conducting regular audits, and performing ongoing risk assessments to identify and mitigate potential risks. To facilitate effective supervision, the New York Branch is required to submit regular reports detailing its financial and operational status to the OCC and the Federal Reserve.

If the OCC determines that there is reasonable cause to believe that Banco Itaú Chile has violated or failed to comply with any of the provisions of the IBA, other applicable federal laws or regulations, or orders of the OCC, the OCC may revoke the New York Branch's license. Additionally, the Federal Reserve may recommend to the OCC that the license of any federal branch of a foreign bank be terminated if the Federal Reserve has reasonable cause to believe that the foreign bank is not subject to comprehensive supervision on a consolidated basis in its home country (unless the home country is making demonstrable progress toward establishing such supervision) or has reasonable cause to believe that the foreign bank, or an affiliate, has violated the law or engaged in an unsafe or unsound banking practice in the United States, and as a result, the continued operation of the branch would be inconsistent with the public interest or the purposes of the IBA. If Banco Itaú Chile was to be closed by the OCC pursuant to such authority or Banco Itaú Chile was voluntarily to discontinue the operations of the New York Branch, the holders of the Notes would have recourse only against Banco Itaú Chile, subject to any arrangements made for the payment of Banco Itaú Chile's liabilities by the relevant regulatory authorities.

The Bank Holding Company Act of 1956, as amended (the "**BHCA**"), imposes significant restrictions on Banco Itaú Chile's ability to engage in non-banking activities in the U.S. and on Banco Itaú Chile's world-wide holdings of equity interests in companies operating in the U.S. Under the BHCA, Banco Itaú Chile is also required to obtain the prior approval of the Federal Reserve before acquiring, directly or indirectly, the ownership or control of more than 5% of any class of voting securities of any U.S. bank, bank holding company or certain other types of U.S. depository institution or depository institution holding company. Under federal banking law and regulations issued by the Federal Reserve, the New York Branch is also restricted from engaging in certain "tying" arrangements involving products and services.

SELECTED FINANCIAL AND OTHER INFORMATION

The following tables present selected consolidated financial and other information as of and for the years ended December 31, 2022, 2023, and 2024, and as of and for the three-month periods ended March 31, 2024 and 2025. The financial information for the years ended December 31, 2022, 2023, and 2024 has been derived from our Audited Financial Statements prepared under the Banking Compendium of Accounting Standards issued by the CMF (the “Compendium”), with IFRS applied in those areas where the Compendium is silent. The financial information for the three months ended March 31, 2024 and 2025 is unaudited and has been prepared on a basis consistent with our Audited Financial Statements.

Investors should read this information in conjunction with the Unaudited the Financial Statements and the Audited Financial Statements, including the notes thereto, and the sections “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Risk Factors” included elsewhere in this Base Prospectus.

All financial data is presented in millions of Chilean pesos (Ch\$), unless otherwise indicated. Certain figures and percentages may not sum due to rounding.

Key Financial Ratios

	As of December 31,			As of March 31,	
	2022	2023	2024	2024	2025
Return on Average Assets (RoTAA) ⁽¹⁾	1.2%	0.9%	0.9%	0.9%	1.1%
Return on Average Equity (RoTAE) ⁽²⁾	16.8%	12.9%	11.4%	12.5%	12.4%
Non-Performing Loan (NPL) Ratio ⁽³⁾	2.0%	2.3%	2.2%	2.3%	2.3%
Tier 1 Capital Ratio ⁽⁴⁾	10.41%	11.05%	11.56%	10.76%	12.25%
Total Capital Adequacy⁽⁵⁾.....	15.26%	15.62%	15.77%	15.04%	16.56%
The Liquidity Coverage Ratio (LCR) ⁽⁶⁾	219.48%	191.00%	221.82%	259.40%	217.96%
Net Stable Financing Ratio (NSFR) ⁽⁷⁾	114.50%	110.23%	107.64%	110.36%	110.73%

- (1) We calculate RoTAA as net recurring result over average assets for the current period.
- (2) We calculate RoTAE as net recurring result over average tangible equity for the current period.
- (3) We calculate NPL Ratio the division between the portfolio of loans with delinquencies of 90 days or more and the total loans.
- (4) We calculate Tier 1 Capital Ratio as the sum of the Common Equity Tier I and the Additional Tier I Capital.
- (5) We calculate Total Capital Adequacy as the ratio of regulatory equity (effective equity) over the risk weighted assets.
- (6) We calculate LCR as the ratio between the high-quality liquid assets that the bank holds on its balance sheet and the stressed net outflows that the bank must face within a 30-day window.
- (7) We calculate NSFR as the ratio between the amount of available stable funding and the amount of required stable funding. We define available stable funding as the proportion of own and borrowed resources that are expected to be reliable over the time horizon considered by the NSFR. The amount of stable funding required by a specific institution is a function of the liquidity characteristics and residual maturities of its various assets and off-balance sheet positions. In the context of aligning Chilean regulation with Basel III international standards, in March 2022 the CMF (Financial Market Commission) established changes to liquidity regulations for banks, defining the gradual incorporation of regulatory compliance on the NSFR to reach 100% by 2026 (current limit of 80%).

Other Operating Data

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Audited Financial Statements and our Unaudited Financial Statements, together with the notes thereto, included elsewhere in this Base Prospectus, as well as with the information under “Presentation of Financial and Other Information,” “Selected Financial and Other Information,” “Risk Factors,” and “Business.”

Our Audited Financial Statements and our Unaudited Financial Statements have been prepared under the Compendium issued by the CMF, with IFRS applied where the Compendium is silent.

Overview of the Issuer

We are one of the leading private banks in Chile, with over 150 years of history and a nationwide presence in Chile through an extensive network of branches and digital channels. We are part of the Itaú Unibanco group, the largest private bank in Latin America, which holds a controlling interest of 67.42% as of March 31, 2025.

Through our operations in Chile, Colombia, and Panama, as well as a branch in New York and a representative office in Panama and Peru, we offer a comprehensive suite of financial products and services. These include commercial banking, investment banking, asset management, treasury, and digital solutions for individuals, businesses, and institutional clients.

We are a publicly traded company organized under the laws of Chile, and licensed by the CMF to operate as a commercial bank. Our business is conducted in accordance with applicable banking laws and regulations, and we are committed to maintaining compliance with local and international regulatory standards, including capital adequacy and risk management requirements.

We are the resulting entity from the merger of two leading banks in Chile: Corpbanca, the oldest private bank in Chile, and Banco Itaú Chile, a wholly-owned subsidiary of Itaú Unibanco Holding that, since the Merger, has been our sole controlling shareholder. On March 28, 2023, the CMF approved the by-laws amendment resolved at our extraordinary shareholders meeting held on January 19, 2023, including among other things the change of our legal name from Itaú Corpbanca to Banco Itaú Chile. This name change became effective retroactively as of March 28, 2023, following the completion of the required registration and publication on April 3 and 6, 2023, respectively. Our common shares are currently listed in Chile on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange under the ticker symbol “ITAACL” (prior to April 24, 2023, the ticker symbol was “ITAUCOR”).

Our business model combines local expertise, a culture of client-centric innovation, and the strategic and technological backing of Itaú Unibanco. This approach has allowed us to consolidate a leading position in the Chilean market and to support our growth in Colombia and other regional markets.

We provide a broad range of wholesale and retail banking services to our customers in Chile and Colombia. In addition, we provide financial advisory services, asset management, insurance brokerage and securities brokerage services through our subsidiaries, and banking services through our New York Branch. For more information on our services offerings, see “Business”.

We are one of Chile’s largest private financial institutions, ranking as the fourth largest private bank by deposits and as the fifth largest private bank with a market share of 9.5% (considering only loan operations in Chile) as of December 31, 2024, according to the CMF. In Colombia, as of December 31, 2024, we were the tenth largest bank in terms of total assets, the eighth largest bank in terms of total loans and the tenth largest bank in terms of total deposits as reported under local regulatory and accounting principles, according to the Colombian Financial Superintendency.

As of March 31, 2025, we operated a network of 216 branches, both physical and digital, with high adoption of digital channels, which account for a significant share of client interactions and product originations. Of these, 144 branch offices were in Chile, comprising 130 physical branches and 14 digital branches.

As of March 31, 2025, we operated 132 ATMs in Chile, and through our agreement with Redbanc, our customers had access to more than 7,500 additional ATMs in Chile. Additionally, in Colombia, as of March 31, 2025, we operated 72 branch offices and 120 ATMs, and provided our customers with access to 16,000 additional ATMs through Colombia’s other financial institutions.

As of March 31, 2025, we had total assets of Ch\$41,021,041 million, total loans of Ch\$27,343,407 million, a workforce of 6,860 employees (4,698 in Chile and 2,162 in Colombia), total liabilities of Ch\$36,985,147 million including time deposits and other time liabilities of Ch\$13,409,053 million; and shareholders' equity of Ch\$4,032,353 million. Our annualized return on average tangible shareholders' equity was 12.4% as of March 31, 2025. For the three-month period ended March 31, 2025, we had net interest income of Ch\$293,022 million, and consolidated net income for the period was Ch\$110,759 million.

Our strategy is centered on client satisfaction, operational efficiency, digital innovation, and building long-term relationships, leveraging a distinctive organizational culture that fosters transformation and continuous learning. We are recognized for our brand, corporate culture, sustainability focus, and leadership in client satisfaction, having been named as the market leader for retail client satisfaction for the third consecutive year by Ipsos Servitest.

Banco Itaú Chile's risk management strategy has enabled it to maintain what Banco Itaú Chile believes are stable solvency ratios and risk indicators. As of March 31, 2025, the regulatory capital to risk-weighted assets ratio was 65% under CMF rules aligned with Basel III. Our allowance for loan losses, as of March 31, 2025, was Ch\$793,751 million (excluding allowances for loan losses on loans and receivable to banks), and our risk index (ratio of allowance for loan losses over total loans) was 2.9%, as of the same date.

We have specialized subsidiaries in brokerage, asset management, insurance, and financial advisory, allowing us to deliver integrated solutions across all client segments. Our commercial segmentation groups products and services into two major business units: Corporate and Investment Banking (including large companies, real estate, and high-net-worth clients) and Retail Banking (individuals, SMEs), supported by an active treasury and asset-liability management platform.

Commitment to sustainability, robust corporate governance, and prudent risk management are central to our vision, mission, and strategy, as reflected in transparent dividend policies, a three-lines-of-defense risk model, and recognition for workplace culture and gender equity. Our mission is to deliver comprehensive financial solutions to individuals and businesses, with the purpose of empowering transformation. For a discussion of the material risks that could affect our business, financial condition, and results of operations, see "Risk Factors".

The Economy

Primary Markets in Which We Operate

A majority of our investments and operations are located in Chile and Colombia. Accordingly, our financial condition and results of operations are substantially dependent upon economic conditions prevailing in these markets.

Developments in the Chilean Economy

Chile's economy grew by 2.6% in 2024, marking a recovery from 2023's near-stagnation. Growth was driven mainly by mining exports—particularly copper and lithium—supported by favorable global prices and steady Chinese demand. The services sector, especially tourism, commerce, and transportation, also contributed positively. Domestic demand rose 1.3%, underpinned by rising real wages and a rebound in private consumption, though gross fixed investment remained weak amid high financing costs.

During the first quarter of 2025, GDP expanded 2.3% year-on-year, reflecting stronger private consumption and favorable external conditions. Household spending benefited from a 3.3% increase in real wages as compared to the first quarter of 2024, while tourism receipts and retail sales grew above trend. Fixed investment showed only modest gains. Monthly activity (IMACEC) data exhibited fluctuations in early 2025. In February 2025, activity declined by 0.8% month-on-month on a seasonally adjusted basis, a result influenced by the shorter calendar month and a significant electricity blackout late in the month that disrupted industrial production. This was followed by a strong rebound in March 2025, with activity increasing by 0.7% month-on-month, highlighting the underlying strength in the services and mining sectors. Inflation trends also shifted over this period. At the end of 2024, annual inflation stood at 4.5%, a marked decrease from 7.3% averaged in 2023, largely attributable to reduced import costs and the dissipation of earlier supply shocks. In the first quarter of 2025, headline inflation averaged 4.9%, aligning with market expectations. This increase was primarily driven by the normalization of electricity tariffs following the conclusion of the regulated-price freeze, as well as ongoing adjustments to the minimum wage. These factors contributed to higher regulated-price components, with the energy component alone accounting for approximately 1.3 percentage points of the annual CPI during the quarter.

The Central Bank of Chile (BCCh) continued its monetary-easing cycle, which began in late 2023 after two years of restrictive policy. The Monetary Policy Rate (TPM) was lowered from 11.25% (June 2023) to 5% by March 2025. Policymakers signaled that further reductions will be gradual and data dependent as inflation converges toward the 3% target and the output gap narrows. On the fiscal side, the deficit sat at 1.6% of GDP through August 2025. The minimum wage increased from CLP 350,000 in early 2022 to CLP 529,000 in May 2025,—a cumulative nominal rise of 51.1% in three years—supporting household purchasing power.

Developments in the Colombian Economy

Colombia's economy grew by 1.6% in 2024, reflecting a rebound from 2023's slowdown. Growth was driven by resilient household consumption, partially offset by weak export dynamics, mainly in commodities exports and fixed investment remained subdued amid tight monetary policy, policy uncertainty, and higher financing costs. For 2024, the fiscal deficit stood at 6.8% of GDP (4.3% of GDP in 2023). The greater fiscal imbalance was explained both by a decline in total revenues in 2024 and an increase in spending.

In the first quarter of 2025, GDP expanded 2.7% year-on year, confirming a gradual acceleration supported by private demand and improving external conditions. Household consumption, which accounts for roughly 77% of GDP, strengthened on the back of better labor-market conditions and positive, albeit modest, real-wage growth. Fixed investment, however, continued to lag—reflecting weak construction activity and cautious corporate spending. The labor market improved steadily: the national unemployment rate fell below 10% in March 2025, driven by gains in services, trade, and logistics employment. Informality remains high at roughly 55% of total employment, constraining productivity gains. Inflation ended 2024 at 5.2% y/y, down sharply from 9.3 in 2023, but still above the Central Bank of Colombia's 3% target. In the first quarter of 2025, headline inflation averaged 5.1%, with core inflation around 4.8%. Price pressures were concentrated in regulated services, housing, and food, partly offset by easing energy and transport costs. Real wages improved modestly as disinflation progressed. The Banco de la República maintained a cautious easing cycle begun in December 2023, lowering the Monetary Policy Rate (TPM) from 13.0% (end-2023) to 9.5%. Policymakers signaled further gradual reductions as inflation expectations stabilize and the output gap remains negative. Monetary conditions remain restrictive in real terms to support convergence toward target inflation. The minimum wage was raised 9.5% in January 2025, to COP 1.4 million per month, following a 12% increase in 2024. While supporting household consumption, these adjustments add some inertia to services inflation.

Inflation

In the past, Chile experienced high levels of inflation, which significantly affected our financial condition and results of operations during such periods. In the period leading up to 2021, Chile experienced relatively low inflation rates, with sporadic episodes where price growth deviated from the Central Bank of Chile's 2% to 4% target range. For example, during the period from 2018 to 2020, the inflation rate in Chile stayed at or below approximately 3%. However, inflation in Chile has since increased and reached 7.2% in 2021 and 12.8% in 2022, the highest level since the early 1990s, primarily as a result of increased public spending and individual withdrawals from private pension funds as well as global supply chain issues, leading to price increases mainly with respect to food, energy, and services. Chile's inflation fell to 4.4% in May 2025 from 12.8% in 2022, driven by monetary tightening and easing global supply chain pressures post-COVID. Inflation hovered around 5% in early 2025.

Our results of operations reflect the effect of inflation in the following ways:

- a substantial portion of our assets and liabilities are denominated in UF. The UF is a unit of account, the peso value of which is indexed daily to reflect inflation recorded in the previous month. The net increase or decrease in the nominal peso value of our UF-denominated assets and liabilities is reflected as income or loss in our income statement, and
- the rates of interest earned and paid on peso-denominated assets and liabilities reflect, to a certain degree, inflation, and expectations regarding inflation.

Under Chilean law, banks are authorized to earn interest income on loans that are adjustable for the effects of inflation. Most banks, including Banco Itaú Chile, charge an interest rate that includes an estimate of future inflation. In addition, the peso-denominated value of our assets and liabilities that are denominated in UF fluctuate as the UF is adjusted based on inflation. In the case of assets, these fluctuations are recorded as income (for increases in the peso-denominated value) and losses (for decreases in the peso-denominated value). In the case of liabilities, these fluctuations are recorded as losses (for increases in the peso-denominated value) and income (for decreases in the peso-denominated value).

Colombia has experienced high levels of inflation prior to the COVID-19 pandemic amid its currency depreciation and supply-side shocks affecting food prices. Historically low inflation in Colombia during 2020 was registered following the significant demand shock and various fiscal subsidies. The rate of inflation in Colombia in 2019 and 2020 was 3.80% and 1.61%, respectively. Inflation in Colombia closed 2021 at 5.6% and 2022 at 13.1%, the highest level since the late 1990s, primarily due to increases in food price, minimum wage adjustments and global supply chain issues. Inflation dropped to 7.7% in March 2025.

While our results in Chile are naturally influenced by inflation and, in particular, by the composition of our balance sheet in UF-denominated portfolios, Banco Itaú Chile follows a clear objective of achieving stability in results. As part of its market risk management, the Bank undertakes specific actions to mitigate volatility derived from inflationary effects, which is reflected in the stable performance of its net interest margin ratios.

UF-Denominated Assets and Liabilities

The UF is revalued by the National Institute of Statistics of Chile (*Instituto Nacional de Estadísticas de Chile* or “INE”) on a monthly basis. Every day in the period beginning the tenth day of the current month through the ninth day of the succeeding month, the nominal Chilean peso value of the UF is indexed up (or down in the event of deflation) in order to reflect each day a proportional amount of the prior calendar month’s change in the CPI. One UF was equal to Ch\$35,110.98, Ch\$36,789.36 and Ch\$38,416.69 as of December 31, 2022, 2023 and 2024, respectively. One UF was equal to Ch\$38,894.11 as of March 31, 2025. The effect of any changes in the nominal Chilean peso value of our UF-denominated assets and liabilities is reflected in our results of operations as an increase (or decrease, in the event of deflation) in interest income and expense, respectively. Generally, our net interest income is positively affected by an inflationary environment to the extent that our average UF-denominated assets exceed our average UF-denominated liabilities, while our net interest income is negatively affected by inflation in any period in which our average UF-denominated liabilities exceed our average UF-denominated assets. Currently, we have more UF-denominated assets than liabilities.

Our March 31, 2025 quarter-end UF-denominated assets exceeded liabilities by Ch\$3,704,082 million Chilean pesos and year-end UF-denominated assets exceeded liabilities by Ch\$4,007,611 million Chilean pesos in 2024 (Ch\$3,775,330 million in 2023), positively affecting net interest income in an inflationary environment.

Chilean Peso-Denominated Assets and Liabilities

Interest rates prevailing in Chile are materially affected by the current rate of inflation during the period and market expectations concerning future inflation. The responsiveness to such prevailing rates of our Chilean peso-denominated interest-earning assets and interest-bearing liabilities varies. We maintain a substantial amount of non-interest-bearing Chilean peso-denominated demand deposits. The period-end balance ratio of such demand deposits to interest-earning assets was 22.41% as of March 31, 2025, and 22.22%, 19.77% and 20.35% as of December 31, 2024, 2023 and 2022, respectively. This ratio is calculated as financial liabilities measured at amortized cost divided by the sum of financial assets measured at amortized cost and financial assets measured at fair value through other comprehensive income, based on period-end balances as of March 31, 2025, December 31, 2024, 2023 and 2022. Any decline in prevailing interest rates or the rate of inflation adversely affects our net interest margin on assets funded with such deposits, and any increase in the prevailing interest rates or the rate of inflation increases the net interest margin on such assets.

Interest Rates

Interest rates earned and paid on our assets and liabilities, respectively, reflect, to a certain degree, inflation, expectations regarding inflation, shifts in short-term interest rates set by the Central Bank of Chile and the Central Bank of Colombia and movements in long-term real rates.

Interest Rates in Chile

The Central Bank of Chile manages short-term interest rates based on its objective of maintaining price stability in the economy. Because our liabilities are generally re-priced to reflect interest rate changes more frequently than our interest-earning assets, changes in the rate of inflation or in the monetary policy interest rate published by the Central Bank of Chile are reflected in the interest rates we pay on our liabilities before such changes are reflected in the interest rates we earn on our assets. Therefore, when short-term interest rates fall, our net interest margin is positively impacted, but when short-term rates increase, our interest margin is negatively affected. At the same time, our net interest margin

tends to be adversely affected in the short-term by a decrease in inflation because, generally, our UF-denominated assets exceed our UF-denominated liabilities. An increase in long-term interest rates also has a positive effect on our net interest margin because our interest-earning assets generally have a longer duration than our interest-bearing liabilities. In addition, because our Chilean peso-denominated liabilities have relatively short re-pricing periods, they are generally more responsive to changes in inflation or short-term rates than our UF-Denominated liabilities. As a result, during periods when current inflation or expected inflation exceeds the previous month's inflation, customers often switch funds from Chilean peso-denominated deposits to more expensive UF-Denominated deposits, thereby adversely affecting our net interest margin.

Despite these dynamics, Banco Itaú Chile seeks to maintain the stability of its net interest margin through active management of its asset and liability structure, complemented by results from client funding, derivatives, and foreign exchange operations. This has allowed the Bank to offset the impact of lower credit activity and variations in the monetary policy rate, while sustaining stable net interest margin ratios.

Interest Rates in Colombia

The Central Bank of Colombia manages short-term interest rates based on its objectives of maintaining a low and stable inflation, stabilize output near its natural level, and support financial stability. It sets the policy interest rate as its primary monetary tool in pursuit of these goals. Colombian commercial banks, finance corporations, and financing companies report weekly data on 90-day certificates of deposit, from which the Central Bank of Colombia calculates the Fixed Term Deposit (“DTF”) rate—a weighted average interest rate serving as Colombia’s main benchmark rate. The Central Bank of Colombia also calculates the Interbank Rate (IBR) for overnight and one-month loans based on daily quotes from selected banks. Article 884 of the Colombian Commercial Code limits commercial interest rates to 1.5 times the current banking interest rate, certified by the Financial Superintendency. Changes in the DTF impact banking subsidiaries' net interest income, thus affecting their net interest margin.

Currency Exchange Rates

A material portion of our assets and liabilities is denominated in foreign currencies, principally the U.S. dollar and the Colombian peso. Our reported income is affected by changes in the value of the Chilean peso with respect to foreign currencies (principally the U.S. dollar and Colombian peso) because such assets and liabilities, as well as interest earned or paid on such assets and liabilities, and gains (losses) realized upon the sale of such assets, are converted to Chilean pesos in preparing our Unaudited Financial Statements and Audited Financial Statements. The Chilean government's economic policies and any future changes in the value of the Chilean peso against the U.S. dollar could adversely affect our financial condition and results of operations. In the past, the Chilean peso has been subject to significant volatility when compared to the U.S. dollar. The exchange rate between the Chilean peso and the U.S. dollar as of December 31, 2022, 2023 and 2024 was Ch\$854.31, Ch\$891.33 and Ch\$996.61 per US\$1.00, respectively. The exchange rate between the Chilean peso and the U.S. dollar as of March 31, 2025 was Ch\$954.72. The Chilean peso may be subject to significant fluctuations in the future and the Central Bank of Chile foreign exchange intervention strategy remains active with its utilization likely if the value of the Chilean Peso diverges significantly from its fundamental levels.

Entering into forward exchange transactions enables us to reduce the negative impact of material gaps between the balances of our foreign currency-denominated assets and liabilities. As of December 31, 2022, 2023 and 2024, the gap between foreign currency denominated assets and foreign currency denominated liabilities, including forward contracts, was Ch\$1,298,681 million, Ch\$1,160,132 million and Ch\$1,630,580 million, respectively, and Ch\$1,243,198 million as of March 31, 2025.

The Colombian peso traded at COP\$4,403.93, COP\$4,042.31 and COP\$4,851.28 per US\$1.00, as of December 31, 2024, 2023 and 2022, respectively, and as of March 31, 2025 it traded at COP\$4,203.96 per US\$1.00. The measures adopted by the Colombian government to mitigate the inflationary effects in the Colombian economy may impact the Colombian peso, preventing its meaningful appreciation.

Key Components of Our Results of Operations

Revenues and Expenses

The following classification of our primary revenues and expenses is based on our Unaudited Financial Statements and Audited Financial Statements.

Revenues

The main sources of revenue, which include both cash and non-cash items, are as follows:

Interest Income

We earn interest income from our interest-earning assets, which are mainly represented by loans to customers.

Commission Income

We earn commission and fee income for services related to checking accounts, loans, mutual funds, credit cards and other financial services.

Readjustments Income

We generate inflation readjustment income from our financial assets, such as loans and investments, denominated in inflation-indexed units, such as the Unidad de Fomento (“UF”). This income reflects the periodic revaluation of these instruments to account for changes in the inflation index, as required under accounting standards of the CMF.

Other Operating Income

We earn financial income relating to changes in the fair value of our securities portfolio, other trading activities and foreign exchange transactions.

Expenses

The primary categories of expenses, which include both cash and non-cash items, are as follows:

Interest Expense

We incur interest expense on our interest-bearing liabilities, such as deposits, short-term borrowings, and long-term debt.

Readjustments Expenses

We incur inflation readjustment expenses from our financial liabilities, such as deposits and borrowings, denominated in inflation-indexed units, such as the UF. This income reflects the periodic revaluation of these instruments to account for changes in the inflation index, as required under accounting standards of the CMF.

Expense for Credit Losses

Expense for credit losses includes provisions constituted for loan credit risk, special provision expenses or recoveries, recoveries from previously written-off credits, and impairment charges related to both financial assets at amortized cost and at fair value through other comprehensive income.

Other Operating Expenses

We incur expenses relating to salaries and benefits, administrative expenses, and other non-interest expenses.

Results of Operations for the Three-Month Periods Ended March 31, 2025 and 2024, and the Years Ended December 31, 2024, 2023 and 2022

Introduction

For the three-month period ended March 31, 2025, consolidated net income for the period increased by Ch\$11,535 million, to Ch\$110,759 million from Ch\$99,224 million in the same period of 2024. This increase was driven by lower tax and credit loss expenses, which more than offset the substantial decline in net financial income and net income from readjustments.

We ended 2024 with Ch\$376,702 million consolidated net income, an increase of Ch\$21,819 million compared to the year ended December 31, 2023. This increase was mainly due to higher net income from readjustments and financial income, partially offset by higher expenses and a decline in fee and commission income.

We ended 2023 with consolidated net income of Ch\$354,883 million, a decrease of Ch\$78,902 million compared to December 31, 2022. This decrease primarily reflects lower results from net income from readjustments and financial income, as well as higher credit loss provisions and a less favorable tax position, only partially offset by stronger net interest and fee income.

Consolidated Income

The following tables set forth the components of our consolidated income for the three-month periods ended March 31, 2025 and 2024, and the years ended December 31, 2024, 2023 and 2022:

	For the three-month periods ended as of March 31,		% Change from	
	2024	2025	2025/2024	
	(in millions of Ch\$ except for percentages)			
Net interest income.....	287,721	293,022	1.8%	
Net income from readjustments	29,004	(1,352)	(104.7)%	
Net fee and commission income	48,946	48,118	(1.7)%	
Financial income (loss), net.....	141,337	4,844	(96.6)%	
Other income	4,131	860	(79.2)%	
Total Operating Income	511,139	345,492	(32.4)%	
Operating Expenses	(210,225)	(201,979)	(3.9)%	
Expense for credit losses	(94,230)	(73,700)	(21.8)%	
Income tax	(107,460)	40,946	(138.1)%	
Consolidated Income For The Period.....	99,224	110,759	11.6 %	

	For the years ended December 31,			% Change from	
	2022	2023	2024	2023/2022	2024/2023
	(in millions of Ch\$ except for percentages)				
Net interest income	916,412	1,079,389	1,062,319	17.8%	(1.6)%
Net income from readjustments.....	204,945	39,126	115,836	(80.9)%	196.1%
Net fee and commission income.....	172,999	244,548	200,638	41.4 %	(18.0)%
Financial income (loss), net.....	146,847	117,459	226,507	(20.0)%	92.8%
Other income.....	8,077	21,470	20,451	165.8 %	(4.7)%
Total Operating Income	1,449,280	1,501,992	1,625,751	3.6 %	8.2%
Operating Expenses	(755,052)	(767,247)	(808,824)	1.6 %	5.4%
Expense for credit losses.....	(291,949)	(350,078)	(323,855)	19.9 %	(7.5)%
Income tax.....	31,506	(29,784)	(116,370)	(194.5)%	290.7%
Consolidated Income For The Period	433,785	354,883	376,702	(18.2)%	6.1%

For the three-month period ended March 31, 2025, consolidated income for the period increased by Ch\$11,535 million from Ch\$99,224 million in the same period of 2024. The principal factor contributing to this increase was a significant reduction in income tax expense, which shifted from an expense of Ch\$107,460 million in the three-month period ended March 31, 2024 to a tax benefit of Ch\$40,946 million in the same period of 2025 primarily due to the positive effect of higher inflation recorded during 2025 that resulted in inflation driven tax benefits in Chile. Furthermore, expense for credit losses in the three-month period ended March 31, 2025, declined by Ch\$20,530 million as compared to the same period of 2024 reflecting a more favorable credit cycle, primarily associated with stability in non-performing loans and improved quality in the retail loan portfolio. These positive effects more than offset a substantial decline in net income from readjustments (down Ch\$30,356 million) due to a lower net UF mismatch position and a decrease in net financial income (down Ch\$136,493 million), mainly explained by the impact of the Bank's hedging strategy on its U.S. dollar-denominated investments, which is designed to mitigate the tax effects of exchange rate fluctuations.

For the year ended December 31, 2024, consolidated income increased by Ch\$21,819 million from Ch\$354,883 million in the year ended December 31, 2023. The main contributors to this increase were a sharp rise in net income from readjustments (up Ch\$76,710 million, or 196.1%) and net financial income (up Ch\$109,048 million, or 92.8%), in each case in the year ended December 31, 2024, compared to the year ended December 31, 2023. These increases resulted from higher inflation during 2024, which positively impacted the value of inflation-indexed financial assets and contributed to better results in the management of the Bank's UF mismatch and fixed-income instruments and were complemented by a decrease of Ch\$26,223 million in expense for credit losses in the year ended December 31, 2024, compared to the year ended December 31, 2023, due to a more favorable credit cycle, including an increase in

recoveries of written-off loans and a decline in delinquency levels, particularly in consumer portfolios. These gains were partially offset by higher operating expenses, which increased by Ch\$41,577 million (5.4%) in the year ended December 31, 2024, compared to the year ended December 31, 2023, primarily as a result of higher salary adjustments, partly explained by the impact of higher inflation during 2024 on these disbursements, greater transaction-related costs, and the deployment of new technology projects and an income tax expense of Ch\$86,586 million, reflecting higher taxable income and a stable effective tax rate. Potential effects of exchange rate volatility on tax results were, as in prior years, partially mitigated by the Bank's tax hedging strategy. In addition, there was a Ch\$43,910 million decline in the year ended December 31, 2024, compared to the year ended December 31, 2023, in net fee and commission income mainly explained by the non-recurring effect from the Bank's commercial alliance with Cardif (insurance products) recognized in 2023. In addition, 2024 reflected lower current account and overdraft fees and reduced insurance fees as compared to 2023 due to weaker loan origination activity and regulatory changes, partially offset by stronger performance in credit card fees, financial advisory services, and mutual fund commissions.

For the year ended December 31, 2023, consolidated income decreased by Ch\$78,902 million to Ch\$354,883 million. This decline was primarily due to a significant reduction in net income from readjustments (down Ch\$165,819 million, or 80.9%), lower net financial income (down Ch\$29,388 million, or 20.0%), and a substantial increase in credit loss expense (up Ch\$58,129 million, or 19.9%). The decreases in net income from readjustments and financial income were mainly attributable to lower net exposure to inflation-indexed assets and lower inflation during the period. The increase in credit loss expense reflects the deterioration of the consumer loan portfolio and weaker credit conditions in certain commercial segments, consistent with the increase in non-performing loans observed across the industry. Furthermore, income tax shifted from a benefit of Ch\$31,506 million in 2022 to an expense of Ch\$29,784 million in 2023, primarily reflecting lower net income and the impact of foreign exchange hedge-related tax effects amid exchange rate volatility, partially mitigated by the Bank's tax hedging strategy./ These negative impacts were partially offset by an increase in net interest income of Ch\$162,977 million, driven by loan growth and improved profitability in retail portfolios, and higher net fee and commission income (up Ch\$71,549 million), mainly explained by the commercial alliance with Cardif, which generated one-off positive results in insurance-related fees during 2023.

Net Interest Income and Net Income from Readjustments

The following tables set forth the components of our net interest income and net income from readjustments for the three-month periods ended March 31, 2025 and 2024, and the years ended December 31, 2024, 2023 and 2022:

	For the three-month periods ended as of March 31,		% Change from 2025/2024
	2024	2025	
	(in millions of Ch\$ except for percentages)		
Interest income	749,027	629,788	(15.9)%
Interest expense	(461,306)	(336,766)	(27.0)%
Net interest income	287,721	293,022	1.8%
Readjustments income	97,451	105,489	8.2%
Readjustments expenses	(68,447)	(106,841)	56.1%
Net income from readjustments	29,004	(1,352)	(104.7)%

Net interest income	916,412	1,079,389	1,062,319	17.8	(1.6)%

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

Net interest income (“NII”) rose by Ch\$5,301 million (1.8%) to Ch\$293,022 million for the three-month period ended March 31, 2025, from Ch\$287,721 million in the same period in 2024, mainly due to a 27.0% (Ch\$124,540 million) decrease in interest expense, which offset a 15.9% (Ch\$119,239 million) drop in interest income. The decline in interest income was driven by lower revenues from commercial and consumer loans, and certain financial assets, partially offset by higher mortgage loan income and favorable interest rate hedge effects. The lower interest expense stemmed largely from reduced costs on deposits, bank obligations, and other liabilities primarily driven by a lower average MPR and fewer accrual calendar days during the quartering line with industry-wide reductions in funding costs amid monetary policy rate cuts.

Net income from readjustments (net inflation adjustment income) fell by Ch\$30,356 million to a loss of Ch\$1,352 million in the three-month period ended March 31, 2025, compared to income of Ch\$29,004 million in the same period in 2024. This was mainly due to a 56.1% (Ch\$38,394 million) rise in readjustment expenses, outpacing an 8.2% (Ch\$8,038 million) increase in readjustment income. Net income from readjustments (net inflation adjustment income) turned negative in the three-month period ended March 31, 2025, mainly due to a sharp increase in UF-linked expenses that significantly outpaced the growth in readjustment income. This reflects the effect of inflation adjustments on liabilities, which were not fully offset by income from UF-denominated assets.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

NII fell by Ch\$17,070 million (1.6%) to Ch\$1,062,319 million in the year ended December 31, 2024, from Ch\$1,079,389 million in the year ended December 31, 2023, mainly due to a 7.6% drop in interest income, partly offset by an 11.1% decline in interest expense. Lower interest income was driven by reduced revenues from commercial loans and financial assets, partially offset by higher mortgage and consumer loan income. The decline in interest expense resulted from reduced deposit costs, reflecting a lower average MPR, particularly in the second half of 2024, and an improved funding structure underpinned by growth in customer deposits (both demand and time deposits), which increased our self-funding ratio, reduced reliance on market funding, and supported better deposit pricing, as compared to 2023.

Net income from readjustments rose by Ch\$76,710 million (196.1%) to Ch\$115,836 million in the year ended December 31, 2024, reflecting a 13.0% increase in readjustment income and a 5.4% decrease in related expenses as compared to the year ended December 31, 2023. This was due to higher inflation-related asset revaluation and reduced inflationary impact on liabilities. The increase was driven by the positive effect of higher inflation recorded during 2024 on the net exposure to inflation-indexed financial instruments, particularly UF-denominated assets, along with a lower mismatch position in UF liabilities.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

Net interest income rose by 17.8% (Ch\$162,977 million) to Ch\$1,079,389 million in the year ended December 31, 2023, from Ch\$916,412 million in the year ended December 31, 2022, mainly due to a 44.4% increase in interest income (Ch\$897,509 million) that outpaced a 66.4% increase in interest expense (Ch\$734,532 million). Growth in interest income was driven by higher loan revenues and returns on financial assets. In turn, the rise in interest expense reflected higher funding costs, primarily associated with increased balances of time deposits and financial obligations, combined with the impact of a higher average market interest rate during 2023.

Net income from readjustments fell by 80.9% (Ch\$165,819 million) to Ch\$39,126 million in the year ended December 31, 2023, as compared to the year ended December 31, 2022, due to a 61.1% drop in readjustment income (Ch\$675,762 million) partially offset by a 56.6% reduction in readjustment expenses (Ch\$509,943 million). The decline mainly reflects lower inflation-driven asset revaluations, with the impact partly mitigated by lower inflation costs on liabilities. This was mainly explained by a sharp decline in the inflation rate (measured in UF variation), which reduced the valuation of inflation-linked assets and liabilities, and a lower UF net position during the year.

Allowances for Loan Losses

The table below presents information regarding our allowances for loan losses related to loans and accounts receivable from customers measured at amortized cost, in accordance with the requirements of the CMF Compendium, as of March 31, 2025, and December 31, 2024, 2023, and 2022:

	As of				% Change from December 31, 2023/2024	% Change from December 31, 2024/2023	% Change from March 31, 2025 December 31, 2024
	December 31, 2022	December 31, 2023	December 31, 2024	March 31, 2025			
	(in millions of Ch\$ except for percentages)						
Total loans (excludes interbank loans)	25,903,788	26,744,561	27,055,397	26,549,656	3.2%	1.2%	(1.9)%
Past due loans ⁽¹⁾	283,589	345,202	401,799	361,077	21.7 %	16.4 %	(10.1)%
Non-performing loans ⁽²⁾	525,500	632,979	625,976	621,506	20.5 %	(1.1)%	(0.7)%
Allowances for loan losses	723,437	825,400	834,843	793,751	14.1 %	1.1 %	(4.9)%
Allowances for loan losses as a percentage of total loans	2.8	3.1	3.1	3.0	10.5 %	(0.0)%	(3.1)%
Allowances for loan losses as a percentage of non-performing loans	137.7	130.4	133.4	127.7	(5.3)%	2.3 %	(4.2)%
Non-performing loans as a percentage of total loans	2.0	2.4	2.3	2.3	16.7 %	(2.2)%	1.2 %
Allowances for loan losses as a percentage of past due loans	255.1	239.1	207.8	219.8	(6.3)%	(13.1)%	5.8 %

(1) Past due loans include all installments and lines of credit more than 89 days overdue. Do not include the aggregate principal amount of such loans.

(2) Non-performing loans include the principal and interest on any loan with one installment more than 89 days overdue.

As of March 31, 2025 Compared to as of December 31, 2024

Allowances for loan losses fell by Ch\$41.1 million (4.9%) to Ch\$793.8 million as of March 31, 2025 from Ch\$834.8 million as of December 31, 2024, mainly due to a 1.9% drop in total loans to Ch\$26,549.7 million and a 10.1% decline in past due loans to Ch\$361.1 million. Allowances as a percentage of total loans decreased from 3.1% as of December 31, 2024, to 3.0% as of March 31, 2025, and as a percentage of non-performing loans from 133.4% as of December 31, 2024 to 127.7% as of March 31, 2025. These changes may be attributable to improved asset quality, as evidenced by lower past due loan balances and stable non-performing loan ratios.

Non-performing loans declined slightly by Ch\$4.5 million (0.7%) to Ch\$621.5 million as of March 31, 2025, from Ch\$626.0 million as of December 31, 2024, with the non-performing loan ratio stable at 2.3%. This, together with lower past due loans, suggests stabilizing asset quality. The decrease in non-performing loans is consistent with stabilizing asset quality and improvements in delinquency levels across the loan portfolio.

As of December 31, 2024 Compared to as of December 31, 2023

Allowances for loan losses rose by 1.1% (Ch\$9.4 million) to Ch\$834.8 million as of December 31, 2024, from Ch\$825.4 million as of December 31, 2023, despite only a 1.2% increase in total loans and a 1.1% reduction in the allowance as a percentage of total loans (now at 3.1%). This was mainly due to a 16.4% increase in the past due loans to Ch\$401.8 million as of December 31, 2024, even as non-performing loans decreased by 1.1% to Ch\$626.0 million. The allowance ratio to non-performing loans also increased, reflecting a conservative approach amid higher past due loans. The primary drivers for this increase include growth of the delinquent commercial loan portfolio observed in the fourth quarter of 2024 and a slower pace of credit activity during 2024. Additionally, the overall increase in delinquency levels across the financial industry following the expiration of Covid-19 economic support programs, combined with a high interest rate and inflationary environment and weaker household income, also contributed to this trend.

Non-performing loans decreased by Ch\$7.0 million (1.1%) to Ch\$626.0 million as of December 31, 2024, from Ch\$633.0 million as of December 31, 2023, with their ratio to total loans falling slightly from 2.4% to 2.3%. This dynamic, alongside the rise in past due loans, reflects changes in portfolio composition, primarily influenced by a higher level of commercial and mortgage NPLs, partially offset by a lower delinquency ratio in the consumer loan portfolio.

As of December 31, 2023 Compared to As of December 31, 2022

Allowances for loan losses rose by Ch\$101.9 million (14.1%) to Ch\$825.4 million as of December 31, 2023, from Ch\$723.4 million as of December 31, 2022, outpacing total loan growth of 3.2%. Past due loans increased 21.7%, and non-performing loans rose 20.5%, in each case as of December 31, 2023, as compared to as of December 31, 2022. The allowance to total loan ratio increased from 2.8% as of December 31, 2022 to 3.1% as of December 31, 2023, while the allowance-to-non-performing loans ratio declined from 137.7% to 130.4%, reflecting greater credit risk. The main drivers were weaker credit conditions in certain commercial loan portfolios, increased delinquency in retail products, and a higher volume of Stage 2 exposures, consistent with macroeconomic pressures and tighter financial conditions during the year.

Non-performing loans rose by Ch\$107.5 million (20.5%) to Ch\$633.0 million as of December 31, 2023, up from Ch\$525.5 million as of December 31, 2022. The ratio of non-performing loans to total loans increased from 2.0% to 2.4%, indicating worsening asset quality, mainly due to higher delinquencies in commercial and mortgage loans, together with a slowdown in credit activity observed across several segments.

Expense for Credit Losses

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

For the three-month period ended March 31, 2025, expense for credit losses decreased by Ch\$20.5 million, or 21.8%, to Ch\$73.7 million from Ch\$94.2 million for the same period in 2024. This significant decrease is primarily due to a reduction in provisions for credit risk due from banks and loans and accounts receivable from customers and is also consistent with a 1.9% decline in total loans and a 10.1% decrease in past due loans over the same period. This performance mainly reflects improved credit quality and a stronger focus on collection management, which has resulted in better credit risk ratios.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

For the year ended December 31, 2024, expense for credit losses fell by Ch\$26.2 million (7.5%) to Ch\$323.9 million, from Ch\$350.1 million in the year ended December 31, 2023, despite allowances for loan losses rising 1.1% to Ch\$834.8 million in the year ended December 31, 2024, as compared to the previous year. This decrease primarily resulted from improved recoveries related to written off loans and special provisions which reflected more favorable credit cycle, including better collection management efforts, including stronger recoveries of previously written-off loans, the reversal of additional provisions recorded in prior periods, and a reduction in delinquency levels, particularly in the consumer loan portfolio.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

Expense for credit losses rose by Ch\$58.1 million (19.9%) to Ch\$350.1 million for the year ended December 31, 2023, from Ch\$291.9 million in the year ended December 31, 2022. The increase in our allowances for loan loss expense reflects a 21.7% growth in past due loans and a 20.5% increase in non-performing loans in the year ended December 31, 2023 due to a deterioration in credit trends and asset quality during 2023, which led to increased non-performing loans and higher provisioning needs, particularly in the commercial loan portfolio.

Net Fees and Commission Income

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

Net fee and commission income fell by 1.7% to Ch\$48.1 million in the three-month period ended March 31, 2025, from Ch\$48.9 million in the same period of 2023, largely due to an 11.2% increase in commission expense (Ch\$3.0 million), which outpaced the modest rise in commission income. The increase in commission expense reflects higher transactional activity and services delivered by third-party providers driven by commercial focus on credit cards and cash management transactional products and other financial solutions.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Net fee and commission income for the year ended December 31, 2024, dropped by Ch\$43.9 million (18.0%) to Ch\$200.6 million, from Ch\$244.5 million in the same period of 2023, primarily due to a Ch\$29.7 million (8.9%) decrease in commission income and a Ch\$14.2 million (15.9%) rise in commission expense. The decline in commission income was related to lower results in asset management and financial advisory services, together with the absence of the higher insurance brokerage commissions recognized in 2023 from the commercial alliance with Cardif, partially offset by stable insurance brokerage commissions, while the increase in commission expense was due to higher use of external platforms and client acquisition costs related to the expansion of credit products.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

Net fee and commission income rose by Ch\$71.5 million (41.4%) to Ch\$244.5 million in 2023, from Ch\$173.0 million in the same period of 2022, mainly due to a Ch\$70.7 million (26.9%) increase in commission income (from Ch\$263.1 million to Ch\$333.8 million), while commission expense was nearly flat, edging down Ch\$0.9 million (1.0%) to Ch\$89.3 million. The growth in commission income may be attributable to higher revenues from financial advisory services in Colombia and improved performance in Chile related to contingent operations and asset management, and stable commission expense reflect a balanced cost structure across both markets.

Financial and Other Income

The following table sets forth the components of financial and other income for the three-month periods ended March 31, 2025 and 2024, and the years ended December 31, 2024, 2023 and 2022:

	For the three-month periods ended as of March 31,		% Change from
	2024	2025	2025/2024
	(in millions of Ch\$ except for percentages)		
<i>Financial income (loss) from:</i>			
Financial assets and liabilities for trading.....	73,008	(17,680)	(124.2)%
Financial assets not held for trading valued mandatorily at fair value through profit or loss	(3,560)	3,117	(187.6)%
Profit or loss on disposal of financial assets and liabilities at amortized cost and financial assets at fair value through other comprehensive income.....	16,284	(532)	(103.3)%

Changes, readjustments and accounting hedge of foreign currencies	63,732	23,322	(63.4)%

Financial income (loss), net.....	141,337	4,844	(96.6)%
Income (loss) from investments in companies.....	1,941	1,218	(37.2)%
Income (loss) from non-current assets and disposal groups held for sale not qualifying as discontinued operations.....	(218)	(2,521)	1,056.4%
Other operating income.....	2,408	2,163	(10.2)%
Total	145,468	5,704	(96.1)%

	For the year end December 31,			% Change from	% Change from
	2022	2023	2024	2023/2022	2024/2023
	(in millions of Ch\$ except for percentages)				
<i>Financial income (loss) from:</i>					
Financial assets and liabilities for trading	218,194	(51,263)	142,712	(123.5)%	(378.4)%
Financial assets not held for trading valued mandatorily at fair value through profit or loss	(918)	(16,601)	(61,599)	1,708.4%	271.1 %
Profit or loss on disposal of financial assets and liabilities at amortized cost and financial assets at fair value through other comprehensive income	(20,184)	17,180	38,653	(185.1)%	125.0 %
Changes, readjustments and accounting hedge of foreign currencies	(51,516)	173,888	135,769	(437.5)%	(21.9)%
Other financial income (loss)	1,271	(5,745)	(29,028)	(552.0)%	405.3 %
Financial income (loss), net.....	146,847	117,459	226,507	(20.0)%	92.8 %
Income (loss) from investments in companies	4,224	4,562	3,343	8.0 %	(26.7)%
Income (loss) from non-current assets and disposal groups held for sale not qualifying as discontinued operations	(21,223)	(1,074)	(534)	(94.9)%	(50.3)%
Other operating income.....	25,076	17,982	17,642	(28.3)%	(1.9)%
Total	154,924	138,929	246,958	(10.3)%	77.8 %

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

Total financial and other income for the three-month period ended March 31, 2025, declined by Ch\$139.764 million (96.1%) as compared to the same period in 2024, mainly due to a Ch\$90.688 million swing from gain to loss in trading financial assets and liabilities, explained by the effects of exchange rate movements related to the tax hedge in Chile and Colombia, as well as market volatilities in both countries that impacted the management of derivatives. Part of these results are linked to the Bank's tax hedging strategy, which is designed to mitigate the impact of exchange rate fluctuations on taxable income but can introduce volatility in financial income. Additionally, high interest rates in Colombia continued to influence trading and hedge results. Foreign currency gains decreased by Ch\$40.410 million, driven by exchange rate fluctuations during the first quarter of 2025 compared to the same period in 2024. The decline in foreign currency was further influenced by moderate growth in demand deposits denominated in foreign currencies. A positive Ch\$6.677 million shift in financial assets not held for trading was offset by losses in other categories.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Total financial and other income rose by Ch\$108.029 million (77.8%) in the year ended December 31, 2024, as compared to the year ended December 31, 2023, mainly driven by a Ch\$193.975 million increase in income from financial assets and liabilities for trading. This was partially offset by higher losses from financial assets not held for trading (Ch\$44.998 million) and other categories. The improvement in trading income reflected the accounting impact of foreign exchange movements associated with the tax hedge maintained to manage volatility in income taxes related to the Bank's investments abroad (Colombia and New York), as well as positive results in fixed-income management and interest rate risk strategies.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

Total financial and other income for the year ended December 31, 2023 fell by Ch\$15.995 million (10.3%) from the year ended December 31, 2022, mainly due to a Ch\$269.457 million swing from income to loss related to trading of financial assets and liabilities and a decline in other operating income. This was partially offset by a Ch\$225.404 million increase in foreign currency hedging and adjustments, reflecting improved results from the valuation of derivative positions and fixed-income instruments in the fourth quarter.

Operating Expenses

The following table sets forth the components of our operating expenses for the three-month periods ended March 31, 2025 and 2024, and the years ended December 31, 2024, 2023 and 2022:

	For the three-month periods ended as of March 31,		% Change from	
	2024	2025	2024/2025	
	(in millions of Ch\$ except for percentages)			
Personnel salary and expenses	93,334	94,180		0.9%
Administration expenses	81,939	79,430		(3.1)%
Depreciation and amortization	29,132	25,685		(11.8)%
Impairment.....	37	—		(100.0)%
Other operating expenses	5,783	2,684		(53.6)%
Total operating expenses.....	210,225	201,979		(3.9)%

	For the year end December 31,			% Change from	
	2022	2023	2024	2023/2022	2024/2023
	(in millions of Ch\$ except for percentages)				
Personnel salary and expenses	341,498	340,092	357,000	(0.4)%	5.0%
Administration expenses	298,112	300,764	329,093	0.9%	9.4%
Depreciation and amortization	96,187	106,452	109,128	10.7%	2.5%
Impairment.....	10	608	192	5,980.0%	(68.4)%
Other operating expenses	19,245	19,331	13,411	0.4%	(30.6)%
Total operating expenses.....	755,052	767,247	808,824	1.6%	5.4%

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

For the three-month period ended March 31, 2025, operating expenses fell by Ch\$8,246 million (3.9%) to Ch\$201,979 million compared to the same period in 2024, mainly due to lower depreciation, amortization, driven by the absence of technology project write-offs recognized in Colombia during the first quarter of 2024. Additionally, other operating expenses decreased in the three-month period ended March 31, 2025, as compared to the same period in 2024, due to the non-recurrence of higher technology expenses in Chile linked to specific commercial initiatives recorded in 2024. Consulting and professional service fees also declined as several 2024 contracts were not renewed in the current year. Personnel expenses decreased in the three-month period ended March 31, 2025, reflecting lower severance payments compared to the same period in 2024.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Operating expenses during the year ended December 31, 2024 rose by Ch\$41,577 million (5.4%) to Ch\$808,824 million compared to the year ended December 31, 2023, mainly due to higher administration expenses (up Ch\$28,329 million) and personnel salary and expenses (up Ch\$16,908 million), partially offset by a Ch\$5,920 million decline in other operating expenses. The increase in administration expenses and personnel salary and expenses was principally driven by greater transaction-related costs due to higher transaction volumes, higher salary adjustments, and new technology investments. These effects were partially offset by lower severance costs and improved contract efficiencies.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

In the year ended December 31, 2023, operating expenses increased by Ch\$12,195 million (1.6%) to Ch\$767,247 million compared to the year ended December 31 2022, primarily due to a Ch\$10,265 million (10.7%) rise in depreciation and amortization. The cause of this rise is the activation of new technology projects as part of the Bank's digital transformation. In addition, higher consulting and marketing expenses contributed to the increase, while lower personnel costs, driven by a reduced headcount, partially offset these effects.

Income Taxes

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

In the three-month period ended March 31, 2025, an income tax benefit of Ch\$40.946 million was recorded, compared to a Ch\$107.460 million income tax expense for the same period in 2024. This shift is mainly due to lower

consolidated pre-tax income, which fell from Ch\$206.684 million in the three-month period ended March 31, 2024 to Ch\$69.813 million in the three-month period ended March 31, 2025, primarily because of reduced financial income within the Chile segment. Additionally, the swing from tax expense to tax benefit in Chile reflects higher inflation-driven tax benefits in the first quarter of 2025, as monetary correction over the Bank's capital generated a positive effect on income taxes and the impact of foreign exchange hedge-related tax effects amid exchange rate volatility, partially mitigated by the Bank's tax hedging strategy.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Income tax expense rose by Ch\$86.586 million to Ch\$116.370 million for the year ended December 31, 2024, as compared to a benefit of Ch\$29.784 million in the year ended December 31, 2023. This shift reflects higher consolidated income before tax, up from Ch\$325.099 million in the year ended December 31, 2023 to Ch\$493.072 million in the year ended December 31, 2024, together with the impact of foreign exchange volatility on the Bank's tax expense arising from its international investments. These effects were partially mitigated by the Bank's tax hedging strategy, which aims to reduce volatility in income tax results.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

For the year ended December 31, 2023, the shift from a Ch\$31.506 million income tax benefit in the year ended December 31, 2022 to a Ch\$29.784 million expense in the year ended December 31, 2023 resulted from lower consolidated income before tax, which fell from Ch\$465.291 million to Ch\$384.667 million due to reduced net interest and inflation adjustment income in Chile. This change also reflects the impact of tax effects from foreign exchange hedge accounting under our managerial model, in a context of exchange rate volatility. Additionally, the result reflects the impact of foreign exchange volatility on the Bank's tax expense, partially mitigated by the use of a tax hedging strategy designed to reduce volatility in income tax results.

Results of Operating Segments

Overview

Reporting segments are determined based on our main operating segments: (i) Chile, which includes our New York Branch, and (ii) Colombia, which includes Panama. Each of Chile and Colombia are mainly differentiated by the risks and returns that affect them in their own markets. The description of each operating segment is as follows:

Chile: The Bank's business activities in Chile take place mainly in the local market. The Bank has strategically aligned its operations into the following business areas that are directly related to its customers' needs and the Bank's strategy: (1) Itaú Corporate (which includes (a) Corporate and Investment Banking, (b), Large Corporates, Multinationals and Institutions, (c) Real Estate and Construction, and (d) Private Bank); (2) Retail Banking (which includes (a) Personal Bank, (b) Itaú Branches, and (c) Medium and Small companies); (3) Treasury; (4) Corporate; and (5) Other Financial Services. The Bank manages these business areas using a reporting system for internal profitability. The operating results are reviewed regularly by the entity's Chief Operating Decision Maker, or the "CODM" for operating decisions as one single reporting segment, to decide about resource allocation for the segment and evaluate its performance.

Colombia: Colombia has been identified as a separate reporting segment based on the business activities. Its operating results are regularly reviewed by the CODM for operating decisions as one single reporting segment, to decide on the resource allocation for the segment and evaluate its performance. Separate financial information is available for this reporting segment. The commercial activities of this segment are carried out by Itaú Colombia S.A. and subsidiaries.

Three-Month Period Ended March 31, 2025 Results

The following table presents summary information related to each of our reporting segments for the three-month period ended as of March 31, 2025:

	For the three-month periods ended as of March 31, 2025		
	Chile	Colombia	Total
	(in millions of Ch\$)		
Net interest income.....	239,455	53,567	293,022

For the three-month periods ended as of March 31, 2025			
	Chile	Colombia	Total
	(in millions of Ch\$)		
Net inflation adjustment income.....	(1,352)	—	(1,352)
Net commission income	37,277	10,841	48,118
Net financial income (loss).....	(14,934)	19,778	4,844
Other income	260	600	860
Total Operating Income	260,706	84,786	345,492
Operating expenses.....	(136,928)	(65,051)	(201,979)
Expense for credit losses	(58,829)	(14,871)	(73,700)
Income tax	40,451	495	40,946
Consolidated income (loss) for the year	105,400	5,359	110,759
Quarter-end loans ⁽¹⁾	22,354,214	4,195,442	26,549,656
Quarter-end investments ⁽²⁾	6,476,240	1,477,218	7,953,458

(1) Total loans include commercial, mortgage, and consumer loans.

(2) Investments include financial assets held for trading at fair value through profit or loss, debt financial instruments from financial assets at fair value through other comprehensive income, financial assets at amortized cost, and rights under repurchase agreements.

Analysis of Segment Results

Three-Month Period Ended March 31, 2025 Compared to Three-Month Period Ended March 31, 2024

For the three-month period ended March 31, 2025, consolidated income was Ch\$110,759 million, with an increase of Ch\$11,535 million as compared to the same period in 2024. In the three-month period ended March 31, 2025, consolidated income was Ch\$105,400 million in Chile and Ch\$5,359 million in Colombia.

In Chile, results benefited from a Ch\$149,744 million reduction in income tax expense, a Ch\$8,895 million growth in net interest income, and a Ch\$19,179 million decrease in credit loss expense, in each case in the three-month period ended March 31, 2025 as compared to the same period in 2024, with the tax benefit mainly reflecting the effects of the Bank's fiscal hedge, which offsets exchange rate impacts on its foreign investments (Colombia and New York), a greater decrease in interest expense than the decrease in interest income in an environment of lower average MPR, and improved customer loan collections driven by better risk management and stable non-performing loans, respectively. These gains were partly offset by a Ch\$137,557 million decline in net financial income caused by less market volatility and diminished trading opportunities, and a Ch\$30,355 million swing in net inflation adjustment income from positive to negative due to a lower net UF mismatch position during the three-month period ended March 31, 2025.

In Colombia, consolidated income improved by Ch\$5,551 million the three-month period ended March 31, 2025, moving from a loss of Ch\$0.192 million in the three-month period ended March 31, 2024, mainly due to Ch\$11,811 million lower operating expenses, offset by a collective decrease of Ch\$5,229 million in net interest and commission income. Our results in Colombia in the three-month period ended March 31, 2025 were mainly impacted by lower personnel and administrative expenses and declines in net interest income and commissions due to slower loan growth, lower spreads, and reduced activity in credit cards and advisory services, together with an improvement in credit cost resulting from better provisioning management and lower loan write-offs.

Year Ended December 31, 2024 Compared to Year Ended December 31, 2023

Consolidated net income in the year ended December 31, 2024 was Ch\$376,702, up Ch\$21,819 million over the year ended December 31, 2023, with Ch\$362,133 million from Chile and Ch\$14,569 million from Colombia.

The improved results in Chile in the year ended December 31, 2024 were mainly driven by net interest and indexation income, which were higher by Ch\$59,640 million, a Ch\$19,493 million increase in net financial income compared to the previous year due to net gains obtained from the management of the derivatives and fixed income instruments portfolio, and a decrease of Ch\$23,223 million in credit loss expense caused by stronger credit quality in the retail loan portfolio and a stable level of non-performing loans. These were partially offset by a Ch\$43,910 million decrease in net fee and commission income. This result was due to the recognition of income generated by the commercial alliance with Cardiff, which materialized in the previous year. Excluding this impact, the results for 2024 show an increase of 9.1% compared to the previous year. The income supporting this growth includes investment management, increased credit and debit card activity, as well as an improvements in structuring services and those associated with cash management. In addition, support costs increased by Ch\$47,497 million compared to 2023, equivalent to an increase of 6.4%. This variation was significantly influenced by the translation effects of the profit or loss of Itaú Colombia upon its consolidation in Chile, since, after isolating the effect of the exchange rate variation, the increase in costs is reduced to 1.7%, with an increase of 9.2% in Colombia (expressed in constant currency) and a reduction of 1.3% in Chile, placing the inflation below inflation for the year.

In Colombia, a turnaround of Ch\$15,207 million in the year ended December 31, 2024 from a loss of Ch\$0.638 million in the year ended December 31, 2023 was driven by higher net interest income (Ch\$28,892 million), net commission income (Ch\$10,935 million), net financial income (Ch\$40,437 million), and lower credit expense (Ch\$9,206 million) caused by improved retail portfolio performance and lower delinquency levels. These improvements were partially offset by a Ch\$12,260 million swing from tax benefit to expense and a Ch\$57,381 million increase in operating expenses caused by higher personnel and administrative costs, including foreign currency exchange effects on peso-denominated expenses.

Year Ended December 31, 2023 Compared to Year Ended December 31, 2022

For the year ended December 31, 2023, consolidated income declined by Ch\$78,902 million to Ch\$354,883 million as compared to year ended December 31, 2022. The Chile segment accounted for most of the decrease, down

Ch\$70,672 million to Ch\$355,521 million, while Colombia's income fell by Ch\$8,230 million to Ch\$0.638 million in the year ended December 31, 2023 as compared to year ended December 31, 2022.

The decrease in Chile in the year ended December 31, 2023 as compared to year ended December 31, 2022, was primarily due to reductions in inflation adjustment revenue (Ch\$165,819 million), net financial income (Ch\$69,045 million), the shift from an income tax benefit to expense (Ch\$68,281 million), higher credit loss expenses (Ch\$36,899 million), and increased operating expenses (Ch\$25,778 million). These mainly reflected lower UF variation, reduced gains from derivatives and Asset and Liability Management (ALM) positions, lower fixed-income tax exemptions, and higher amortizations and seasonal bonuses. The swing in income taxes also reflects the impact of foreign exchange volatility on the Bank's investments abroad, partially mitigated by the fiscal hedge executed in Chile. Offsetting impacts included higher net interest income (Ch\$210,738 million) and net commission income (Ch\$66,519 million) due to wider loan spreads, growth in demand deposits, and stronger credit card and asset management fees.

In Colombia, the decrease in the year ended December 31, 2023 as compared to year ended December 31, 2022, was mainly due to lower net interest income (Ch\$47,761 million), higher operating expenses (Ch\$13,583 million), and increased credit loss expenses (Ch\$21,230 million), partially offset by higher net commission income (Ch\$5,039 million) and net financial income (Ch\$39,657 million). These changes were driven by lower loan volumes and spreads, higher costs from business expansion, and greater provisions. The positive effects were due to stronger commercial activity and better trading performance.

Liquidity and Capital Resources

We maintain adequate liquidity to ensure our ability to honor withdrawals of deposits, repayments of other liabilities at maturity, and meet our own working capital requirements.

Sources of Liquidity

Our funding strategy aims for diversification of counterparties and maturities, both in the domestic and foreign markets. We are permanently monitoring the main factors that could affect our current and potential capacity to obtain funding. Our objective is to maintain a diversified funding base within our risk appetite framework and cost structure. Stable and diversified funding is obtained through different sources, products, and markets.

The liquidity reserves that each area must maintain and manage are approved by the Assets and Liabilities Committee, or the "ALCO", and the board of directors. These limits depend, among other things, on the maturity structure, the type of customers holding short-term deposits and on-demand deposits and other obligations we maintain. Additionally, the ALCO defines the type of eligible instruments to be considered liquidity reserves, and it periodically monitors the liquidity levels maintained at all times. Compliance with the limit structure is monitored on a daily basis by our market risk department.

For our operations in Chile, the main source of funding are deposits provided by three major types of clients: (i) institutional investors; (ii) large corporations; and (iii) retail clients.

For short-term funding (less than one year), we usually issue deposits. Interest rates granted to clients consider stability of the funding by type of customer and market conditions.

If the funding requirements are longer than one year, we may also carry out other operations such as bilateral loans with correspondent banks, syndicated loans with foreign banks, and the issuance of bonds in both the local and foreign markets.

The choice of one or the other of the aforementioned options will depend, among other factors, on the tenor, the specific price conditions, the currency, and the market. In general, in transactions between one and three years, we negotiate bilateral and syndicated loans. For operations exceeding these terms, we access the capital markets through bonds. The price conditions and the size of the transaction will determine if the issuance will be carried out in the domestic or in the foreign market.

On the other hand, our funding strategy considers not having currency mismatches and, therefore, for operations carried out in foreign markets to finance operations in local currency, derivatives are used to convert the foreign currency into local currency we required.

Our funding strategy aims to optimize all sources of funding in accordance with their costs, their availability, and our general asset and liability management strategy. In terms of bond issuances, our strategy is to seek longer

maturities and maintain comfortable liquidity levels under BIS III standards. In this context, with the aim of further strengthening its capital base, Itaú Chile issued under the Program its first perpetual bond for US\$200 million in December 2024 and its second for US\$100 million in the February 2025, each of which qualifies as Additional Tier 1 (“AT1”) capital.

Capital

Itaú Chile is subject to the minimum capital requirements established by the CMF in accordance with the Chilean General Banking Act. In 2019, the Chilean General Banking Act was amended, aiming to adopt the Basel III standards, from which capital requirements, both in terms of levels and type, have increased, highlighting the incorporation of the measurement of new risks and the precision in the quantification of the Bank's capital, in addition to incorporating requirements for self-assessment processes (Pillar 2) and discipline of transparency of information to the market (Pillar 3).

As of the date of this Base Prospectus, our minimum capital requirements are expressed as the ratio (quotient) of capital – effective equity composed of Tier 1 and Tier 2 capital – and Risk-Weighted Assets, which as of December 1, 2024, consider 65% of deductions from the capital base, in accordance with the provisions of Chapter 21-1 of the RAN. In December 2024 and February 2025, the Bank issued AT1 notes under the Program, strengthening its capital base.

As a result of the supervisory process conducted in 2024 by the regulator, the CMF determined not to make Pillar 2 capital charges for Itaú Chile for the second consecutive year. On the other hand, the CMF together with the Central Bank of Chile have decided to maintain Itaú Chile's status and capital charge as a systemically important bank.

The minimum total capital requirement for the Bank is set at 11.8% and the current level is 16.56% (15.77% at the end of 2024), reflecting a solid capital position and a buffer close to 475 basis points with respect to regulatory minimums.

Regarding the first quarter of 2025, the solvency ratio increased by 153 basis points, from 15.03% to 16.56%. As a result, similar to the comparison with the previous quarter, of the decrease in RWA and the issuance of AT1 capital. The solvency ratio increased by 79 basis points, from 15.77% to 16.56% in the first quarter of 2025, mainly explained by the decrease in RWA and the issuance of AT1 capital.

Reserves

Under the Chilean General Banking Act, unless an exception applies, a bank must have an (1) effective equity (*Patrimonio Efectivo*) of at least 8% of its risk-weighted assets, net of required allowance for loan losses, and (2) paid-in capital and reserves, or basic capital (*Capital Básico*), not lower than (y) 4.5% of its risk-weighted assets and (z) 3% of its total assets, in both cases, net of required allowance for loan losses.

The following tables set forth our minimum capital requirements as of the dates indicated. For a description of the minimum capital requirements, see Note 48 to each of our Unaudited Financial Statements and Audited Financial Statements included herein

	For the three-month periods ended as of March 31,	
	2024	2025
	(in millions of Ch\$ except for percentages)	
Common Equity Tier 1	3,283,849	3,351,796
3% total net assets	(1,364,280)	(1,255,830)
Excess over minimum required equity	1,919,569	2,095,966
Net capital base as a percentage of the total net assets (Leverage indicator) .	7.22%	8.01%
Effective equity	4,586,899	4,914,197
10% of the risk-weighted assets	(3,050,899)	(2,968,097)
Excess over minimum required equity	1,536,000	1,946,100
Capital Adequacy Ratio (Effective equity indicator).....	15.0 %	16.6 %

	For the year end December 31,		
	2022	2023	2024
	(in millions of Ch\$ except for percentages)		
Common Equity Tier 1	2,790,694	3,161,509	3,320,950
3% total net assets	(1,175,551)	(1,262,227)	(1,291,006)
Excess over minimum required equity	1,615,143	1,899,282	2,029,944
Net capital base as a percentage of the total net assets (Leverage indicator)	7.12%	7.51%	7.72%
Effective equity	4,086,900	4,468,830	4,799,570
10% of the risk-weighted assets	(2,678,895)	(2,861,053)	(3,043,942)
Excess over minimum required equity	1,408,005	1,607,777	1,755,628
Capital Adequacy Ratio (Effective equity indicator).....	15.3%	15.6%	15.8%

As of March 31, 2025, we fully complied with all of the above capital adequacy requirements. Our capital ratio levels increased to 16.6% as of March 31, 2025 when compared to 15.8% as of December 31, 2024, primarily driven by the issuance of AT1 instruments within the framework of Basel III.

Unused Sources of Liquidity

We classify our financial investments into measurement categories based on both our business model for managing the financial asset and the contractual cash flow characteristics of the financial asset. As part of our liquidity policy, we maintain at all times a diversified portfolio of highly liquid assets that can be quickly monetized, including cash, financial investments and Central Bank of Chile and other government securities.

Working Capital

The majority of our funding is derived from deposits and other borrowings from the public. In the opinion of management, our working capital is sufficient for our present needs.

Liquidity Management

We seek to ensure that, even under adverse conditions, we have access to the funds necessary to cover client needs, maturing liabilities and capital requirements. Liquidity risk arises in the general funding for our financing, trading, and investment activities. It includes the risk of unexpected increases in the cost of funding the portfolio of assets at appropriate maturities and rates, and the risk of being unable to liquidate a position in a timely manner at a reasonable price. In addition, it is important to highlight that early withdrawal for time deposits are not allowed and demand deposits have government insurance without limit amount.

Liquidity ratios are managed in accordance with international standards, utilizing the Liquidity Coverage Ratio (“LCR”) and Net Stable Funding Ratio (“NSFR”) as outlined by the Basel III Committee and adopted by the CMF and Brazilian Central Bank (BACEN). Regulatory minimums are set at 100% for LCR and currently 80% for NSFR, with the NSFR threshold increasing by 10 percentage points annually to reach 100% in January 2026. Regulatory minimums have been met as of March 31, 2025 and for comparative periods reflected in the table below. Changes in LCR are driven by factors such as variations in high-quality liquid assets (ALAC), demand deposits, money market activity, and efficiency and timing related to liability movements and portfolio maturities.

	As of December 31,			As of March 31,	
	2022	2023	2024	2024	2025
The Liquidity Coverage Ratio (LCR).....	219.48	191.00	221.82	259.40	217.96
Net Stable Financing Ratio (NSFR)	114.50	110.23	107.64	110.36	110.73

Cash Flow

The tables below set forth information about our main sources and uses of cash. No legal or economic restrictions exist on the ability of our Chilean subsidiaries to transfer funds to us in the form of loans or cash dividends as long as

these subsidiaries abide by the regulations in the Chilean Corporations Law regarding loans to related parties, and dividend payments. In addition, no legal or economic restrictions exist on the ability of our Colombian subsidiaries to transfer funds to us in the form of cash dividends. However, in the case of Itaú Colombia, there is a possibility that shareholders may vote to capitalize such dividends either for growth or to meet capital adequacy requirements following Basel standards. Itaú Colombia may also transfer funds to Itaú Chile in the form of loans, as long as they abide by the regulations in the Colombian financial law regarding loans to related parties. Colombian subsidiaries (other than Itaú Colombia) may not transfer funds to us in the form of loans, due to their limited corporate purpose.

Net Cash (Used in) Provided by Operating Activities

	For the year end December 31,			For the three-month periods ended as of March 31,	
	2022	2023	2024	2024	2025
	in millions of Ch\$			in millions of Ch\$	
Net cash (used in) provided by operating activities.....	<u>(408,848)</u>	<u>(521,831)</u>	<u>3,397,188</u>	<u>33,605</u>	<u>(1,185,020)</u>

Operating cash flow shifted from positive during 2024 to a negative result of Ch\$1,185,020 million for the three-month period ended March 31, 2025 primarily attributable to large net outflows from changes in operating assets and liabilities, particularly a substantial decrease in financial liabilities at amortized cost and increased outflows related to financial assets and liabilities measured at fair value through other comprehensive income.

Our net cash used in operating activities was Ch\$521,831 million in the year ended December 31, 2023, compared to net cash provided by operating activities of Ch\$3,397,188 million in the year ended December 31, 2024, due to higher interest income received, a reduced increase in financial assets, particularly in securities lending and assets measured at fair value through Other Comprehensive Income.

Our net cash used in operating activities was Ch\$408,848 million in the year ended December 31, 2022, compared to net cash used in operating activities of Ch\$521,831 million in the year ended December 31, 2023. This increase was mainly due to an increase of financial assets measured at fair value through other comprehensive income and payments of debt instruments and Interbank loans and loans and borrowings.

Net Cash (Used in) Provided by Investing Activities

	For the year end December 31,			For the three-month periods ended as of March 31,	
	2022	2023	2024	2024	2025
	in millions of Ch\$			in millions of Ch\$	
Net cash (used in) provided by investing activities.....	<u>(401,612)</u>	<u>(56,561)</u>	<u>(54,129)</u>	<u>(8,113)</u>	<u>(14,341)</u>

Our net cash used in investing activities increased from Ch\$8,113 million in three-month period ended March 31, 2024 to Ch\$14,341 million for the three-month period ended March 31, 2025. This increase was mainly driven by increased expenditures for acquisition of intangible assets, as well as a reduction in dividends received.

Our net cash used in investing activities in the year ended December 31, 2024 was Ch\$54,129 million, compared to Ch\$56,561 million in the year ended December 31, 2023. This decrease was primarily due to higher capital expenditures on intangible assets, partially offset by proceeds from the sale of fixed assets.

Our net cash used in investing activities in the year ended December 31, 2023 was Ch\$56,561 million, compared to Ch\$401,602 million in the year ended December 31, 2022. This decrease was primarily due to Ch\$351,434 million used in acquiring participation in Colombia in 2022.

Net Cash (Used in) Provided by Financing Activities

	For the year end December 31,			For the three-month periods ended as of March 31,	
	2022	2023	2024	2024	2025
	in millions of Ch\$			in millions of Ch\$	
Net cash (used in) provided by financing activities.....	134,218	(481,295)	(3,055,545)	(170,912)	67,224

Our net cash provided by financing activities was Ch\$67,224 million in the three-month period ended March 31, 2025, compared to net cash used in financing activities of Ch\$170,912 million in the three-month period ended March 31, 2024, primarily reflecting proceeds from the issuance of new bonds, including perpetual and tender bonds. These inflows more than offset the cash used for repayments and lease obligations during the period.

Our net cash used in financing activities increased from Ch\$481,295 million in the year ended December 31, 2023 to Ch\$3,055,545 million in the year ended December 31, 2024 primarily due to the repayment of a significant loan from the Central Bank of Chile, along with other scheduled debt repayments, which were only partially offset by new bond issuances.

Our net cash provided by financing activities was Ch\$134,218 million in the year ended December 31, 2022, compared to net cash used in financing activities of Ch\$481,295 million in the year ended December 31, 2023, primarily due to a decrease of inflow cash from issuances of bonds.

Deposits and Other Borrowings

The following tables set forth the long-term, short-term, and total outstanding amounts of our principal categories of borrowings for the three-month periods ended March 31, 2025 and 2024, and the years ended December 31, 2024, 2023 and 2022.

Critical Accounting Policies and Estimates

General

Note 2 in each of our Unaudited Financial Statements and Audited Financial Statements provide a full description of our significant accounting policies. These highlight the policies, estimates, and assumptions management deems most critical for understanding our financial statements due to their subjective or complex nature. Management

regularly evaluates its estimates and assumptions, which are based on historical experience and other factors considered reasonable under the circumstances. These form the basis for judgments about the carrying value of assets and liabilities and related impact on financial performance. Given the uncertainty inherent in these judgments in a dynamic economic environment, actual results may differ from our estimates.

Allowances for Loan Losses

The Bank establishes allowances for loan losses to cover potential credit losses in its loan portfolio, as required by Chapters B-1, B-2, and B-3 of the CMF Compendium. These allowances are determined through both individual and collective assessments, reflecting the credit risk of borrowers. For individually significant debtors, the Bank assigns risk categories (A1–A6 for normal, B1–B4 for substandard, and C1–C6 for impaired portfolios) based on payment capacity and financial condition, applying probability of default (PD) and loss given default (LGD) metrics. Collective assessments group smaller, homogeneous loans (e.g., consumer and mortgage loans) and use standard models considering delinquency and loan-to-value (LTV) ratios. The estimation process involves subjective judgments about economic conditions, borrower creditworthiness, and collateral recoverability. While changes in these assumptions, such as deteriorating economic trends or shifts in collateral values, can significantly affect the allowance levels, the Bank has maintained stability in its credit risk indicators, supported by improved collection management and enhanced risk models. Notably, during 2025, following the regulatory change in consumer loans (application of the standard model), the Bank did not record impacts from this adjustment, in contrast to what was observed at the industry level.

Current Taxes and Deferred Taxes

The Bank recognizes current and deferred tax expenses based on applicable tax laws in each operating jurisdiction, primarily Chile, Colombia, and the United States. Current taxes are calculated by applying statutory rates to taxable income, adjusted for allowable tax credits. Deferred taxes arise from temporary differences between the carrying amounts of assets and liabilities and their tax bases, measured at enacted tax rates expected to apply when these differences reverse. Management exercises judgment in estimating taxable income, assessing the realizability of deferred tax assets, and interpreting complex tax regulations. Uncertainties in tax audits or changes in tax laws could lead to adjustments in tax provisions, affecting net income and equity in the Unaudited Financial Statements and the Audited Financial Statements.

Provision for Contingencies

Provisions for contingencies are recognized when (i) the Bank has a present (legal or constructive) obligation from past events, (ii) it is probable that an outflow of resources will be required to settle these obligations, and (iii) the amount of these resources can be reliably estimated. These provisions cover various risks, including legal disputes and off-balance-sheet commitments, such as guarantees and letters of credit. Estimating these provisions involves subjective assessments of the likelihood and magnitude of potential outflows, often based on legal advice and historical experience. Changes in the outcome of litigation or unexpected events could result in significant adjustments to these provisions, impacting the Bank's financial position and results of operations.

Provision for Dividends, Interest Payments, and Repricing of Issued Regulatory Capital Financial Instruments

The Bank records provisions for mandatory dividends (at least 30% of net income, per its bylaws and Chilean law), interest payments, and repricing of regulatory capital instruments, such as bonds with no fixed maturity. These provisions require estimates of net income, interest obligations, and adjustments for inflation-linked units (such as UF) or foreign exchange rates. Management's judgment is critical in forecasting distributable profits and ensuring compliance with capital requirements. Actual results may differ from our estimates affecting equity allocations and liquidity.

Special Provisions for Loan Loss Risk

The Bank maintains additional provisions beyond standard loan loss allowances to address macroeconomic fluctuations, acting as a countercyclical buffer. These provisions, amounting to MCh\$107,380 as of March 31, 2025, are established for commercial, consumer, and mortgage loan portfolios to mitigate risks from potential economic downturns. The determination of these provisions involves qualitative and quantitative judgments about future economic conditions, such as GDP growth, unemployment rates, and industry-specific trends. Actual economic conditions may deviate from the assumptions made, potentially impacting earnings and capital adequacy.

Contingencies and Commitments

The Bank discloses contingencies and commitments, including guarantees, letters of credit, and unused credit lines, which represent potential obligations contingent on future events. Estimating provisions for these off-balance-sheet items involves assessing the likelihood of drawdowns and potential losses, using credit conversion factors (CCFs) prescribed by the CMF. Management applies judgment in evaluating client credit risk and economic scenarios that could trigger these obligations.

Fair Value of Financial Assets and Liabilities

The Bank measures certain financial assets and liabilities at fair value, as defined by IFRS 13, using quoted prices in active markets (Level 1) when available, or valuation techniques like discounted cash flow models or Black-Scholes for unquoted instruments (Levels 2 and 3). These valuations require assumptions about interest rates, credit spreads, volatilities, and market liquidity, particularly for over-the-counter derivatives, which include credit valuation adjustments (CVA) and debit valuation adjustments (DVA). Subjective inputs, especially for Level 3 instruments, introduce uncertainty, and changes in market conditions or model assumptions can significantly alter fair value estimates, affecting the consolidated statement of financial position and income.

Impairment Losses on Certain Assets, Including Goodwill

The Bank assesses impairment for non-financial assets, such as goodwill, intangible assets, and fixed assets, by comparing their carrying amounts to recoverable amounts (the higher of fair value less costs to sell or value in use). Goodwill, arising from business combinations like the Itaú Chile and CorpBanca merger, is tested annually for impairment by allocating it to cash-generating units (CGUs) and estimating recoverable amounts using discounted cash flow models. These models rely on projections of future cash flows, discount rates, and growth assumptions, all of which involve significant judgment. For other assets, impairment triggers include changes in market conditions or asset utility. These matters affect the recognition of impairment losses, impacting reported equity and net income.

Recently Adopted and New Accounting Pronouncements

New standards and interpretations introduced by the CMF and the International Accounting Standards Board have been issued but not yet adopted in our Unaudited Financial Statements. Management is currently evaluating the potential impact of these standards and interpretations. For those that have been evaluated, management has determined that no material impacts are expected. Meanwhile, the evaluation of the remaining standards and interpretations is ongoing.

BUSINESS

Overview of the Issuer

We are one of the leading private banks in Chile, with over 150 years of history and a nationwide presence in Chile through an extensive network of branches and digital channels. We are part of the Itaú Unibanco group, the largest private bank in Latin America, which holds a controlling interest of 67.42% as of March 31, 2025.

Through our operations in Chile, Colombia, and Panama, as well as a branch in New York and a representative office in Panama and Peru, we offer a comprehensive suite of financial products and services. These include commercial banking, investment banking, asset management, treasury, and digital solutions for individuals, businesses, and institutional clients.

We are a publicly traded company organized under the laws of Chile, and licensed by the CMF to operate as a commercial bank. Our business is conducted in accordance with applicable banking laws and regulations, and we are committed to maintaining compliance with local and international regulatory standards, including capital adequacy and risk management requirements.

We are the resulting entity from the merger of two leading banks in Chile: Corpbanca, the oldest private bank in Chile, and Banco Itaú Chile, a wholly-owned subsidiary of Itaú Unibanco Holding that, since the Merger, has been our sole controlling shareholder. On March 28, 2023, the CMF approved the by-laws amendment resolved at our extraordinary shareholders meeting held on January 19, 2023, including among other things the change of our legal name from Itaú Corpbanca to Banco Itaú Chile. This name change became effective retroactively as of March 28, 2023, following the completion of the required registration and publication on April 3 and 6, 2023, respectively. Our common shares are currently listed in Chile on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange under the ticker symbol “ITAUCL” (prior to April 24, 2023, the ticker symbol was “ITAUCORP”).

Our business model combines local expertise, a culture of client-centric innovation, and the strategic and technological backing of Itaú Unibanco. This approach has allowed us to consolidate a leading position in the Chilean market and to support our growth in Colombia and other regional markets.

We provide a broad range of wholesale and retail banking services to our customers in Chile and Colombia. In addition, we provide financial advisory services, asset management, insurance brokerage and securities brokerage services through our subsidiaries, and banking services through our New York Branch. For more information on our services offerings, see “Business”.

We are one of Chile’s largest private financial institutions, ranking as the fourth largest private bank by deposits and as the fifth largest private bank with a market share of 9.5% (considering only loan operations in Chile) as of December 31, 2024, according to the CMF. In Colombia, as of December 31, 2024, we were the tenth largest bank in terms of total assets, the eighth largest bank in terms of total loans and the tenth largest bank in terms of total deposits as reported under local regulatory and accounting principles, according to the Colombian Financial Superintendency.

As of March 31, 2025, we operated a network of 216 branches, both physical and digital, with high adoption of digital channels, which account for a significant share of client interactions and product originations. Of these, 144 branch offices were in Chile, comprising 130 physical branches and 14 digital branches.

As of March 31, 2025, we operated 132 ATMs in Chile, and through our agreement with Redbanc, our customers had access to more than 7,500 additional ATMs in Chile. Additionally, in Colombia, as of March 31, 2025, we operated 72 branch offices and 120 ATMs, and provided our customers with access to 16,000 additional ATMs through Colombia’s other financial institutions.

As of March 31, 2025, we had total assets of Ch\$41,021,041 million, total loans of Ch\$27,343,407 million, a workforce of 6,860 employees (4,698 in Chile and 2,162 in Colombia), total liabilities of Ch\$36,985,147 million including time deposits and other time liabilities of Ch\$13,409,053 million; and shareholders’ equity of Ch\$4,032,353 million. Our annualized return on average tangible shareholders’ equity was 12.4% as of March 31, 2025. For the three-month period ended March 31, 2025, we had net interest income of Ch\$293,022 million, and consolidated net income for the period was Ch\$110,759 million.

Our strategy is centered on client satisfaction, operational efficiency, digital innovation, and building long-term relationships, leveraging a distinctive organizational culture that fosters transformation and continuous learning. We

are recognized for our brand, corporate culture, sustainability focus, and leadership in client satisfaction, having been named as the market leader for retail client satisfaction for the third consecutive year by Ipsos Servitest.

Banco Itaú Chile's risk management strategy has enabled it to maintain what Banco Itaú Chile believes are stable solvency ratios and risk indicators. As of March 31, 2025, the regulatory capital to risk-weighted assets ratio was 65% under CMF rules aligned with Basel III. Our allowance for loan losses, as of March 31, 2025, was Ch\$793,751 million (excluding allowances for loan losses on loans and receivable to banks), and our risk index (ratio of allowance for loan losses over total loans) was 2.9%, as of the same date.

We have specialized subsidiaries in brokerage, asset management, insurance, and financial advisory, allowing us to deliver integrated solutions across all client segments. Our commercial segmentation groups products and services into two major business units: Corporate and Investment Banking (including large companies, real estate, and high-net-worth clients) and Retail Banking (individuals, SMEs), supported by an active treasury and asset-liability management platform.

Commitment to sustainability, robust corporate governance, and prudent risk management are central to our vision, mission, and strategy, as reflected in transparent dividend policies, a three-lines-of-defense risk model, and recognition for workplace culture and gender equity. Our mission is to deliver comprehensive financial solutions to individuals and businesses, with the purpose of empowering transformation. For a discussion of the material risks that could affect our business, financial condition, and results of operations, see "Risk Factors".

Ownership Structure

We have one class of common shares, without par value.

As of March 31, 2025, we had 216,340,749 outstanding common shares of which were fully subscribed and paid. At our shareholders' meetings, each shareholder has one vote for each common share he/she owns or represents. Our common shares are listed in Chile on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange under the symbol "ITAACL" ("ITAUCORP" prior to April 24, 2023).

As of March 31, 2025, we had 5,350 shareholders of record, but Itaú Unibanco Holding was our sole controlling shareholder and beneficially owned 67.42% of our outstanding common shares. The remaining shares constitute our public float held by minority shareholders.

Our shareholder structure is as follows:

Shareholders

% Total share capital as of March 31, 2025

Policy and Regulatory Framework for the Performance of Our Businesses

We operate under a comprehensive regulatory framework, overseen by various bodies that ensure compliance with rules and principles that are fundamental to the transparency, stability and protection of our operations.

Chilean Regulation

Among the main entities that regulate our activities in Chile are the CMF and the Central Bank of Chile.

- **CMF:** The CMF, according to Decree Law No. 3.538, is a decentralized public service of a technical nature, with legal personality and its own assets. Its mission is to ensure the proper functioning, development and stability of the financial market, promote public confidence and facilitate the participation of market participants. It monitors the compliance of audited individuals and entities, such as Itaú Chile, with the laws, regulations and bylaws that govern them, exercising comprehensive supervision from the beginning of their activities until their eventual liquidation. It performs periodic evaluations of the management and solvency of banks. It also requires the monthly filing of financial statements and their quarterly publication in a

newspaper with national circulation. The Bank's annual financial statements, together with the independent auditor's report, must be submitted to the CMF.

- *Central Bank of Chile:* In accordance with the Constitutional Organic Law No. 18.840, the Central Bank of Chile is an autonomous agency of constitutional rank, with legal personality and its own assets. Its purpose is to ensure the stability of the currency and the normal functioning of internal and external payments. The legal purpose of the Central Bank of Chile is to maintain the stability of the Chilean peso and the orderly functioning of Chile's internal and external payment system. It regulates the amount of money and credit in circulation, dictates rules on monetary and financial matters, and supervises international credit and exchange operations.

Both the CMF and the Central Bank of Chile act in a coordinated manner within their respective legal competencies, ensuring the financial stability of the system. In addition to the supervision of these entities, we are governed by the following set of essential laws:

- *Decree with Force of Law No. 3 (General Banking Law):* Establishes the provisions governing the operation of banking institutions in Chile, including their operating structure, solvency requirements and supervision by the CMF. Under the General Banking Law and regulations issued by the CMF, banks in Chile are subject to minimum capital adequacy and liquidity requirements, including those aligned with the Basel III framework. These rules establish minimum capital ratios and require banks to maintain sufficient high-quality liquid assets to meet short- and long-term obligations. Maintaining strong regulatory capital and liquidity positions is a core component of our business strategy and is essential for meeting regulatory requirements and supporting sustainable growth. We manage our capital and liquidity in accordance with the Basel III framework and local regulations.
- *Securities Market Law No. 18.045 (Securities Market Law):* Regulates the issuance and trading of financial securities and establishes the basis for activities related to the issuance of financial instruments, investor relations and the disclosure of relevant financial information.
- *Law No. 18.046 on Shareholders' Corporations (Law on Shareholders' Corporations):* Defines principles of corporate governance, regulating the functioning of boards of directors, relations with shareholders and decision-making processes.
- *Law No. 19.496 on Consumer Rights Protection (Consumer Law):* Requires the Bank to ensure transparency and clarity in the information provided to customers and to establish conflict resolution mechanisms to protect their rights.

This legal framework is fundamental for corporate governance, risk management and financial transparency of Itaú Chile. In addition, the Bank is regulated by entities such as the Financial Analysis Unit (UAF), the Internal Revenue Service (SII) and the National Consumer Service (SERNAC). These institutions complement regulatory oversight by promoting compliance with national and international standards for the prevention of money laundering, tax obligations, and the protection of consumer rights.

Colombian Regulation

Pursuant to the Colombian Constitution, the Colombian Congress has the power to prescribe the general legal framework within which the government may regulate the financial system. The agencies vested with the authority to regulate the financial system are the board of directors of the Central Bank of Colombia, the Colombian Ministry of Finance and Public Credit, the Colombian Financial Superintendency, the Normative Projection and Financial Regulation Studies Unit (*Unidad de Proyección Normativa y Estudios de Regulación Financiera*, or the "URF"), the Deposit Insurance Fund (*Fondo de Garantías de Instituciones Financieras*, or the "FOGAFIN") and the Self-Regulatory Organization (*Autorregulador del Mercado de Valores*, or the "SRO").

- *Central Bank of Colombia:* The Central Bank of Colombia exercises the customary functions of a central bank, including price stabilization, monetary policy, regulation of currency circulation, regulation of credit, exchange rate monitoring and management of international reserves. Its board of directors is the regulatory

authority for monetary, currency exchange and credit policies, and is responsible for the direction of the Central Bank of Colombia's duties. The Central Bank of Colombia also acts as lender of last resort to financial institutions.

- *Colombian Ministry of Finance and Public Credit:* One of the functions of the Colombian Ministry of Finance and Public Credit is to regulate all aspects of finance and insurance activities. As part of its duties, the Colombian Ministry of Finance and Public Credit issues decrees relating to financial matters that may affect banking operations in Colombia. In particular, the Colombian Ministry of Finance and Public Credit is responsible for regulations relating to capital adequacy, risk limitations, authorized operations, disclosure of information and accounting of financial institutions.
- *Colombian Financial Superintendency:* The Colombian Financial Superintendency is the authority responsible for supervising and regulating financial institutions, including commercial banks such as Itaú Colombia, finance companies, financial services companies and insurance companies. The Colombian Financial Superintendency has broad discretionary powers to supervise financial institutions, including the authority to impose fines on financial institutions and their directors and officers for violations of applicable regulations and certain judicial attributions regarding controversies among customers and banks. The Colombian Financial Superintendency can also conduct on-site inspections of Colombian financial institutions. The Colombian Financial Superintendency is also responsible for monitoring and regulating the market for publicly traded securities in Colombia and for monitoring and supervising securities market participants, including the Colombian Stock Exchange, brokers, dealers, mutual funds and issuers. Financial institutions must obtain the prior authorization of the Colombian Financial Superintendency before commencing operations. Violations of the financial system rules and regulations are subject to administrative, and in some cases, criminal sanctions.
- *URF:* The URF, within the policy framework established by the Colombian Ministry of Finance and Public Credit and without prejudice to the board of directors of the Colombian Central Bank, is responsible for the preparation of regulations for the exercise of the power of regulation in exchange matters and monetary, credit, regulation and intervention in financial, stock market, insurance activities and any other activities related to the management, use and investment of the resources captured from the public, for their subsequent issuance by the Colombian government.
- *FOGAFIN:* The FOGAFIN is in charge of protecting the savings of citizens deposited in banks, financial corporations, financing companies, and companies specialized in SEDPEs (a Company Specialized in Electronic Deposits and Payments) that, by obligation, are registered in the FOGAFIN. The FOGAFIN is part of the Safety Network of the Colombian Financial System, formed by the Colombian Ministry of Finance and Public Credit, the Colombian Central Bank and the Colombian Financial Superintendency. To protect the public's savings and thereby ensure the stability of the financial sector, the FOGAFIN applies, if necessary, different support operations to its registered entities to reduce or minimize the adverse effects of crisis situations in the financial system; administers and pays out deposit insurance; and monitors financial entities in possession and in liquidation of such funds.
- *SRO:* The SRO is a private entity responsible for the regulation of intermediaries participating in the Colombian capital markets. The SRO may issue mandatory instructions to its members and supervise its members' compliance and impose sanctions for violations. The sanctions of the SRO can coexist with the sanctions of the Colombian Financial Superintendency. Itaú Colombia and Itaú Asset Management Colombia are members of the SRO and are subject to its regulations.
- Our Colombian operations are primarily governed by the following essential norms and regulations:
 - *Decree 663 of 1993 (Financial System Organic Statute) and Decree 2,555 of 2010.* These instruments establish the prudential framework for Colombian financial institutions, broadly aligned with Basel standards. Subsequent decrees (including Decree 1,477 of 2018 and Decree 1,421 of 2019) introduced complementary solvency and leverage tools and updated the operational risk methodology.

- *Resolution 5 of 2008 (Reserve Requirements)*: The Central Bank of Colombia sets statutory reserve requirements under Resolution 5 of 2008.
- *Decree 1,533 of 2022 (Large Exposures), Commercial Code (Banking Interest Rate), and External Resolution No. 1 of 2018 (Foreign Exchange)*: Regulations address concentration and connected counterparty limits; establish the mechanism for interest-rate caps and certain fee restrictions; and set limits and reporting for foreign-exchange positions and leverage.

Regulatory and Structural Developments

In 2024, no material regulatory or structural changes were introduced in the Chilean or Colombian banking sectors that significantly affected our operations. The overall regulatory framework remained stable, with ongoing initiatives to promote digitalization and operational efficiency across the industry. The absence of major changes allowed us to maintain our strategic focus on client-centric innovation, digital transformation, and prudent risk management without the need for significant adjustments to our operating model.

Organizational Structure

The Bank's operations are carried out directly and through a network of domestic and foreign subsidiaries, as well as minority investments in affiliates. The group's structure supports a wide range of banking, insurance, brokerage, asset management, collection, and advisory services, both in Chile and internationally, with operations in Colombia, Panama, and a branch in New York City.

Principal Subsidiaries

In Chile, the Bank's principal wholly-owned subsidiaries and their primary activities include:

- Itaú Corredores de Bolsa Limitada – securities brokerage.
- Itaú Administradora General de Fondos S.A. – asset management.
- Itaú Corredores de Seguros Limitada – insurance brokerage.
- Itaú Asesorías Financieras Limitada – corporate finance and advisory services.
- Recaudaciones y Cobranzas Limitada – loan and payment collections.

Internationally, the Bank's main subsidiaries and their primary activities are:

- Itaú Colombia S.A. – commercial banking in Colombia.
- Itaú (Panamá) S.A. – offshore banking in Panama.
- Itaú Fiduciaria Colombia S.A. – fiduciary services in Colombia.
- Itaú Comisionista de Bolsa Colombia S.A. – securities brokerage in Colombia.
- Itaú Corredor de Seguros Colombia S.A. – insurance brokerage in Colombia.
- Itaú Holding Colombia S.A.S. – investment holding company in Colombia.

The following diagram presents our current corporate structure, including our principal subsidiaries, as of March 31, 2025:

Subsidiaries and Affiliates as of December 31, 2024	Total Equity of Subsidiary	Direct Ownership %	Indirect Ownership %	Total Ownership %	Investment	Parent Assets	% Investment over total assets of the parent

Imerc OTC S.A.	15,431	8.66%	0.00%	8.66%	1,334	34,201,646	0.004%

Affiliates

The Bank also holds minority stakes in companies such as Transbank S.A., Combanc S.A., and Imerc OTC S.A., which are classified as affiliates.

Business Scope by Jurisdiction

Our principal lines of business conducted in each relevant jurisdiction are as follows:

- *Chile*: Full-service banking complemented by insurance, brokerage, asset management, collections, and advisory services.
- *Colombia*: Commercial banking, securities brokerage, fiduciary services, insurance brokerage, and corporate finance.
- *Panama*: Offshore banking services.
- *United States*: Specialized corporate banking through the New York branch.

Organizational Chart

The following diagram presents our corporate structure, including our principal subsidiaries and affiliates, as of March 31, 2025.

Strategy

Our strategy is based on a management model focused on sustainable value creation through capital mobilization and responsible financial intermediation.

From our business, we raise funds in the marketplace and transfer them to our clients in the form of loans and investments, charging interest rates that reward the risks of the business and our capital providers.

In this way, we seek to create value through sustainable results that increase our profitability and benefit all of our stakeholders, not just those who provide capital.

The elements of this framework are not new and can be organized in many ways, so the value is not in the framework itself, but in its application in the form of our management model, where we define goals and key results that truly permeate the entire organization and are linked to evaluation and incentive systems.

To achieve our goals, we have developed a plan that includes objectives and key results (OKRs) and key performance indicators (KPIs), aligned with our strategic levers and distributed across our subsidiaries and all business segments. Similarly, the goals and incentives of all areas of the Bank are structured around these metrics.

Our management model in Chile and Colombia aligns our vision, goals and incentives. Our strategic plan is guided by four pillars:

1. **Customer relationship:** Customer satisfaction is the cornerstone of our business success, directly influencing our recommendation and loyalty rates. In 2024, at Itaú Chile, we were recognized for the third year as the market leader in customer satisfaction in the retail segment, in the Servitest survey conducted by Ipsos. We also achieved first place in the business and high-income consumer segments and second place in the SME segment.
2. **Better financial solutions:** We continuously innovate to optimize and simplify our customers' experience, ensuring exceptional and differentiated service. At Itaú Chile, we offer a cross-functional portfolio of digital products and services across our product chain and infrastructure. By the end of 2024, we had 14 digital branches, and a significant portion of our product purchases was made through digital channels, including our website and app. Our app has been voted the #1 app by users on app stores in 2023 and 2024.
3. **Operational efficiency:** In 2024, we achieved significantly higher growth than the industry in products that demonstrate improvements in the level of transaction activities our customers have with us. For example, at Itaú Chile, there has been a 16.3% growth in demand balances versus an industry-wide growth of 6.7% in the year ended December 31, 2024 and a 56.9% growth in assets under management compared to an industry-wide growth of 36.4% in the year ended December 31, 2024, as compared to the year ended December 31, 2023. We also recorded in 2024 significant growth in the uptake of services not related to credit products. Furthermore, in 2024, we achieved consistent improvements in the self-funding and commission ratios relative to total operating income.
4. **Key capabilities:** To achieve our goals related to our strategic levers, we mobilized talent across the Bank and developed a culture that fosters development and seeks to encourage the transformative power of people.

Competitive Strengths

Our business model is based on the combination of local bank strengths and local knowledge and benefits from Itaú Unibanco's experience and global platform. In the nine years since the Merger, we believe we have emerged as a leading banking platform and deepened our expansion in the Andean Region because of the following strengths:

1. **Key banking player in the Andean Region, with the support from the largest private bank in Latin America: Itaú Unibanco.** We conduct most of our business in Chile and a significant share in Colombia, two countries in the Andean Region with banking systems that have high growth potential and improving trends, as well as substantial room for banking sector penetration. We believe that our increased footprint in Chile and Colombia gives us an enhanced ability to grow and compete more effectively within these countries, further strengthening our market position there. Our largest shareholder is the largest private bank in Latin America and a premier banking franchise, Itaú Unibanco. We believe its sponsorship and support provides us with an opportunity to leverage its strong global client relationships and enhance our opportunities to grow regionally, adapt more quickly to changing trends in the banking sector and share the best practices. We have been able to expand our offering of banking products by learning from Itaú Unibanco's management model, as well as its segmentation and digitalization strategies.
2. **Attractive portfolio in Chile with a strong wholesale segment and increasing retail share.** We believe we have the scale and resources to grow and compete effectively, particularly in Chile. We have an attractive credit portfolio in Chile, which represents a significant part of our consolidated business, with a strong wholesale segment complemented by our mortgage and consumer loan portfolios. Since 2016, we have pursued a strategy focused on balancing our wholesale and retail loan portfolios. During this period, the share of retail loans in our portfolio has increased, strengthening our position in consumer lending and supporting our continued growth in the Chilean market.

3. **Focus on increasing functionality and improving customer experience on digital channels.** One of the key elements of our strategy is to drive customer satisfaction and efficiency through the development of better technological solutions. Our senior management is focused on implementing technological solutions that will allow us to identify means of improving our overall profitability and to optimize our cost structure.
4. **Customer-centric business model.** We have a strategic customer-centric business model with strong focus on digital transformation, including a program that aims to transform us into a customer-centric organization, that is agile, digital and simple, data-driven, and that takes risks and experiments. As a pillar of our culture, we aim to achieve a top position on client experience in Chile and Colombia. This pillar is reflected in the way we do business and serve our clients and the basis of our digital transformation.
5. **Expanding and enhancing our financial services with different partnerships.** We have worked alongside our partners to offer new products to our clients, benefiting from the synergies generated by their expertise in order to provide our customers with world-class products.
6. **Strong corporate governance and experienced management team in line with long-term growth strategy.** We have an experienced management team and strive to ensure that we have the right structure and the right talent with the necessary skillset to lead our transformation. As part of these efforts, we have (i) created the Digital Business Development Management Division, which is in charge of our digital transformation overall and takes the lead in innovation; (ii) decentralized back-office operations, which is key to reinforce customer centricity and agility; and (iii) strengthened our leadership team in Colombia.

Competition

Competition in Chile and Colombia

In Chile and Colombia, we operate in highly competitive markets. Our main competitors are banks regulated by the CMF, especially those that are publicly listed and have the largest market capitalization. These include Banco Santander-Chile, Banco de Chile, Banco de Crédito e Inversiones and Scotiabank Chile.

In terms of competition, we face both banking and nonbanking institutions in the various products we offer. In the consumer and other credit businesses, we compete with banks, savings and credit cooperatives, and compensation funds. For some credit products, we also compete with department stores, supermarket chains, leasing, factoring and auto loan entities, and other non-bank companies that issue private-label credit cards. In the savings and mortgage loan businesses, we compete with mutual funds, pension funds, insurance companies, and residential mortgage loan servicers.

Loans

In March 2025, our aggregate gross loan portfolio decreased by 3.45% compared to March 2024, which was mainly driven by a decrease in commercial loans in Chile. As of December 31, 2024, 2023 and 2022, our gross consolidated loan portfolio (excluding interbank loans), as reported to the CMF under local regulatory and accounting principles, was Ch\$27,916,861 million, Ch\$27,634,742 million and Ch\$26,712,397 million, respectively. This placed us as the fifth largest financial institution among private Chilean banks, and sixth place among all banks operating in Chile, both as measured by loans. Our gross consolidated loan portfolio represented 10.5%, 11.0% and 11.1%, respectively, of the market for loans in the Chilean financial system (comprising all commercial banks).

The following table sets forth the aggregate outstanding loans for us and other private sector banks with the largest market shares in Chile as of December 31, 2024, 2023 and 2022, and as of March 31, 2025 and 2024, based on information as reported to the CMF prepared under local regulatory and accounting principles:

Bank Loans ⁽¹⁾	
As of December 31,	As of March 31,

	2022	2023	2024	2024	2025
		(in millions of Ch\$)		(in millions of Ch\$)	
Banco Santander-Chile	38,871,708	40,917,143	41,398,746	41,360,775	41,206,797

(1) Excludes interbank loans.

Deposits

In March 2025, our consolidated deposits decreased by 9.6% compared to March 2024, which was mainly driven by a decrease of our time deposits Chile.

We had consolidated deposits of Ch\$20,826,565 million as of December 31, 2024, as reported under local regulatory and accounting principles, which consisted of our current accounts, demand deposits accounts, other demand deposits, other obligations on demand, term savings accounts, and time deposits. Our market share of 10.0% for deposits and other obligations as of December 31, 2024, ranked us in fourth place among private sector banks in Chile. In 2023, our market share also placed us in fourth place among private banks in Chile.

The following table sets forth the aggregate deposits for us and other private sector banks with the largest market share as of December 31, 2024, 2023, and 2022 and as of March 31, 2025 and 2024, based on information as reported to the CMF calculated under local regulatory and accounting principles:

	Bank Deposits and Other Obligations

Shareholders' Equity

As of March 31, 2025, our shareholders' equity as reported to the CMF was Ch\$4,032,353 million. This placed us as the fourth-largest financial institution among private Chilean banks and the sixth-largest among all banks operating in Chile, both as measured by shareholder's equity.

We were the fourth largest among private sector banks in Chile with Ch\$3,971,313 million, Ch\$3,733,075 million and Ch\$3,320,109 million, respectively, in shareholders' equity (excluding net income and provision for

mandatory dividends) as of December 31, 2024, 2023 and 2022, as reported to the CMF reported under local regulatory and accounting principles.

The following table sets forth the level of shareholders' equity for us and the other largest private sector banks in Chile (measured by shareholders' equity) as of December 31, 2024, 2023, 2022 and as of March 31, 2025 and 2024, based on information as reported to the CMF reported under local regulatory and accounting principles:

	Shareholders' Equity ⁽¹⁾

⁽¹⁾ Shareholders equity means equity attributable to shareholders excluding net income and provision for mandatory dividend.

Lines of Business

Wholesale Banking

Our wholesale banking segment serves corporate and high-net-worth customers through five main segments in Chile—(i) corporate and investment banking, (ii) corporate banking, (iii) multinational and institutional banking, and (iv) real estate banking.

In 2024, we implemented a new digital portal “Itaú Corporate” that offers personalized attention to our corporate customers. This platform not only optimizes the user experience, but also collects key data that allows us to continuously improve our management tools and services.

In this segment, the main sales channel is face-to-face, through the relationship of sales executives and multiple product specialists with customers. The solutions cover different types of services grouped into five main segments:

Corporate Banking

This segment serves the largest economic groups in the country. This unit is characterized by an understanding and knowledge of its customer' business, a focus on serving them with value propositions tailored to their needs, a constant search for quality in the services provided, and a genuine concern for the application environmental, social and governance criteria.

This area provides financial advisory services in the areas of mergers, acquisitions, divestitures and valuations of companies, as well as capital raising transactions in the capital markets, either for capital increases or initial public offerings. In addition, through corporate finance, it provides advisory services for companies in the structuring of bank debt, bonds (local and international capital markets) and financial advisory services for the economic evaluation of project bids.

Multinational and institutional corporations

This segment serves legal entities and/or economic groups that do not operate in the real estate or construction industry. It stands out for its national presence from the business center in Santiago. It serves domestic and international companies.

It offers a value proposition based on attracting, retaining, financially advising and creating value for customers across a range of industries and sectors, enhancing their businesses through a wide range of customized financial products, both debt and investment.

In the case of multinational corporations, the focus is on developing different value propositions for companies operating in Latin America, while in the case of institutional customers, the focus is on financial and non-financial institutional customers, focusing on financing, non-credit products and services for their daily operations.

Real estate banking

This segment primarily serves customers that develop and sell real estate, lease commercial, industrial and residential properties, and construction companies. It manages the financing of the construction and sale of real estate projects, as well as the financing of the needs of construction companies and the structuring of financial solutions tailored to the financial needs of companies involved in the rental of real estate in the warehouse, commercial, residential and office sectors, being one of the main players in the market.

Retail banking

Our retail banking business provides services to individuals of all income levels, as well as to small and medium- sized entities, the latter grouped under “Itaú for your business.” We focus on customer service through multiple channels, such as face-to-face in our branches from Arica to Punta Arenas, digitally through our website and app, and through direct contact via email with account managers and calls to our contact center. Our retail banking is organized in the following segments:

Itaú Branches

This segment is targeted at individuals with medium to high income levels (focusing on customers with monthly incomes between Ch\$600,000 and Ch\$2.5 million). This segment offers checking account products, debit and credit cards, personal installment loans, mortgage loans, bank insurance, time deposits, mutual funds and savings and checking accounts in local and foreign currency.

Itaú Personal Bank

This segment specializes in serving customers with high income levels. Our service model offers specialized and personalized attention by highly qualified managers, to deliver solutions and financial advice tailored to each customer, offering the best experience and exclusive benefits.

Private bank

This is a segment within our wholesale banking segment with a mixed portfolio of individuals and corporations. They are identified as economic groups and, in general terms, correspond to high-net-worth customers.

The products and services offered are both on the banking side (which are attended by account managers), as well as the whole part of in-shore and off-shore investments, such as local and international investments. We also have an investor who advises customers with more particular and specific investment needs.

Itaú Retail Companies and SMEs

This segment is focused on companies with annual turnover between UF2,400 and UF200,000. We have a wide range of products for this segment, such as: commercial loans, loans with state-guaranteed loans, Comex, leasing, factoring and guarantee deposits.

Banco Condell (Consumer Finance)

In addition, our retail banking business contains the segment of Banco Condell that serves low-income people who have low banking access providing an offer focused mainly on insurance policies and consumer loans.

Itaú Colombia

At Itaú Colombia we offer savings and checking accounts for everyday money management, credit cards with multiple benefits, free investment and consumer loans, and mortgage loans for the acquisition, construction or remodeling of homes. We also offer low-volatility investment instruments, insurance brokerage services to protect assets and wealth, and trusts for the administration of future assets and rights.

New York Branch

For information regarding the New York Branch, see “Description of The New York Branch.”

Distribution Channels, Electronic Banking and Technology

We offer a wide range of financial solutions ranging from digital checking accounts and insurance to economic advisory and foreign trade products. We provide cash management, financing, investment banking, consumer loans, asset management and treasury services. Each of these instruments and services is designed to meet the specific needs of our customers, guaranteeing security, efficiency and support in all their operations.

Property, Plant and Equipment

Our principal executive offices are located at Presidente Riesco 5537, Las Condes, Santiago, Chile since 2017. As of March 31, 2025, we owned 8 of the 84 properties where our branches and corporate facilities were located. Our branches are located throughout Chile, including the Santiago metropolitan region, Colombia, including in the cities of Bogotá, Medellín, Cali, Bucaramanga and Barranquilla.

Sustainability in Business and Operations

Climate Strategy

At Itaú Chile, we have been part of the Task Force on Climate-Related Financial Disclosures (TCFD) since July 2022, aiming to accelerate the integration of climate-related financial risk identification, management, and disclosure. We are currently measuring our financed emissions to set reduction targets in the most carbon-intensive sectors, following the guidelines of the NZBA, of which our controller, Itaú Unibanco, is a member. Our goal is to limit the global temperature increase to 1.5°C and achieve Net Zero by 2050, including neutralizing emissions from our loan portfolio.

We have set interim targets for 2030, such as reducing waste generation, water consumption, and energy use. Financed emissions are calculated at the group level and disclosed in Itaú Unibanco’s Climate Report. Itaú Chile aligns with Itaú Unibanco’s decarbonization goals, following Net-Zero Banking Alliance (NZBA), Glasgow Financial Alliance for Net Zero (GFANZ), and other climate standards, and seeks to encourage clients to adopt best practices in emission management.

Operational Decarbonization

Our strategy targets a 42% reduction in CO₂ emissions across all scopes by 2030, as compared to 2021, including a 25% reduction in energy, water, and waste. Since 2021, we have reduced CO₂ equivalent emissions by 49%, achieving four of six sub-targets for 2030. In 2024, we received the “Huella Chile: Cuantificación” seal for 2022 and 2023 and will apply for the “Reducción” seal in 2025.

Climate-Related Governance and Management

Climate risk policies are approved by the Board of Directors, with oversight from the Senior Sustainability and Diversity Committee, which includes the CEO and business leaders. Itaú Unibanco's Board monitors climate risks at least three times a year, and annual objectives and key results (OKRs) tied to ESG performance are part of employee evaluations.

Climate Risk Management

We manage physical risks (such as droughts, floods, sea-level rise) and transitional risks (such as regulatory, technological, and market changes) as outlined in our Socio-Environmental Risk Policy. We use Network for Greening the Financial System (NGFS) scenarios to model potential impacts, including Orderly Transition, Disorderly Transition, Too Little Too Late, and Hot House World.

Social, Environmental, and Climate Risks in Credit Risk Management

Social, environmental, and climate risks are assessed through exclusion lists, sector risk ratings for wholesale clients, and transaction-specific reviews for credit and capital market products. Our priorities to 2025 include enhancing assessment capabilities and developing risk appetite metrics.

Financed Emissions

We target net-zero emissions by 2050 for operations and portfolio, with interim 2030 goals (base year 2021). Scope 3 financed emissions are quantified using the Partnership for Carbon Accounting Financials (PCAF) methodology and disclosed in Itaú Unibanco's Climate Report.

Decarbonization Policies

We follow Itaú Unibanco's guidelines to restrict or exclude coal financing, support client decarbonization efforts, and promote renewable energy. These guidelines will be incorporated into Banco Itaú Chile's processes in 2025.

Sustainable Finance

Our policies integrate active stewardship, ESG criteria in investment, and responsible lending practices. We apply the Equator Principles and International Finance Corporation (IFC) standards for large projects, with 19 projects reviewed in the last fiscal year. In 2024, US\$48.6 million in sustainable loans were granted, including green, social, and sustainability-linked products.

Financial Inclusion

We promote inclusion through digital banking services, financial literacy programs, and support for small businesses and agribusiness. In 2024, 10,035 customers were reached through "Itu," a 100% digital checking account for the unbanked, and over Ch\$300 billion in loans were granted to small businesses through Guarantee Fund for Small Entrepreneurs (or "FOGAPE", for its acronym in Spanish) and other programs.

Lawsuits and Legal Proceedings

Lawsuits in Chile against the Bank

As of March 31, 2025, legal actions have been filed against the Bank and its subsidiaries involving their transactions in the ordinary course of business. They are mainly lawsuits pending against the Bank related to loans and other matters, most of which, according to the Bank's legal services division involved in the suits, present no risk of significant loss.

The amount of claims is approximately Ch\$124,559 million as of March 31, 2025 (Ch\$138,291 million as of December 31, 2024). However, management's opinion based on reports from our legal division as of December 31,

2024, is that it is not possible at this time to conclude whether these could result in significant losses not contemplated by the Bank in the Audited Financial Statements. Notwithstanding the above, as of March 31, 2025, provisions amounted to Ch\$2,617 million (Ch\$2,246 million as of December 31, 2024).

Itaú Colombia

Itaú Colombia and its subsidiaries are involved in civil, administrative and labor proceedings. The outstanding civil and administrative proceedings are related to banking transactions, and the remaining ones derive from the ownership of leased assets.

Such claims amount to Ch\$315,542 million as of March 31, 2025 (Ch\$313,885 million as of December 31, 2024). According to the evaluation of the expected results in each lawsuits the Bank has recorded a provision of Ch\$2,429 million as of March 31, 2025 (Ch\$2,501 million as of December 31, 2024). The increase is mainly due to claims received by Itaú Fiduciaria in its capacity as an agent on certain businesses managed. Among the lawsuits received, eight are related to a real estate trust business in Bogota, for a total amount of Ch\$175,753 million, as well as administrative proceeds with no monetary value. Itaú Fiduciaria believes it has acted faithfully in accordance with the terms established on the contracts, applicable regulations and will defend itself. Based on the current status of the lawsuits, and considering that one case has resulted unfavorable on a first-instance ruling, a provision of Ch\$867 million has been recognized as of March 31, 2025. For the remaining lawsuits, the risk of loss is considered remote, and it is not possible to make a reasonable estimate of a potential loss.

DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Directors and Executive Officers

General

Banco Itaú Chile is managed by its CEO (*Gerente General*) under the direction of its board of directors, which, in accordance with Banco Itaú Chile's by-laws, as amended at the extraordinary shareholders' meeting of Banco Itaú Chile held on January 19, 2023, and approved by the CMF on March 28, 2023, consists of seven directors and one alternate who are elected at Banco Itaú Chile's annual ordinary shareholders' meetings. Pursuant to the provisions of Banco Itaú Chile's bylaws, members of the board of directors are generally elected for three-year terms. All of the members of the board of directors were elected on April 20, 2023, at Banco Itaú Chile's annual ordinary shareholders' meeting for a three-year period, except for (i) Mr. Gabriel Amado de Moura, who was elected on July 5, 2024, as Banco Itaú Chile's vice chairman and director, effective as of October 1, 2024, and (ii) Mr. Kevin Cowan Logan, who was elected on December 17, 2024 as Banco Itaú Chile's independent director, effective as of April 1, 2025, replacing Mr. Pedro Samhan Escáandar. Directors Mr. Moura and Mr. Cowan were elected as permanent members of the board of directors by the annual ordinary shareholders' meeting of Banco Itaú Chile, held on April 24, 2025.

Cumulative voting is permitted for the election of directors. Banco Itaú Chile's board of directors may appoint replacements to fill any vacancies that occur during periods between elections. Banco Itaú Chile's principal executive officers are appointed by the board of directors and the CEO and hold their offices at the discretion of the board of directors and the CEO. Scheduled meetings of the board of directors are held monthly. Extraordinary meetings can be held whenever called by the chairman, whether at his own will or upon the request of one or more directors, so long as the chairman determines in advance that the meeting is justified, except if the request is made by the absolute majority of the directors in office, in which case the meeting shall be held without such prior determination. None of the members of Banco Itaú Chile's board of directors has a contract or agreement which entitles any director to any benefits upon termination of employment with us.

Directors

Banco Itaú Chile's current directors are as follows:

Directors	Position	Age
Ricardo Villela Marino	Chairman and Director	51
Gabriel Amado de Moura	Vice Chairman and Director	50
Diego Fresco Gutiérrez	Director	55
Matias Granata	Director	51
Pedro Paulo Giubbina Lorenzini	Director	57
Luis Octavio Bofill Genzsch	Independent Director	61
Rogério Carvalho Braga	Alternate Board Member	69
Kevin Cowan Logan	Independent Director	55

Ricardo Villela Marino became a director on April 11, 2016. Since July 27, 2022, he is the Chairman of Banco Itaú Chile's board of directors. Mr. Marino has served as a member of the board of Itaú Unibanco Holding since 2010 and as its non-executive vice chairman since 2020. Mr. Marino has also been the chairman of Itaú Unibanco's Latin America Strategic Council since 2018. He has held several positions at the Itaú Unibanco Group since 2002, including Vice President (2010 to 2018). He has also been an alternate member of the board of directors of Itaúsa S.A. since 2011; alternate member of the board of directors of Duratex S.A. since 2009; alternate member of the board of directors of Itaútec S.A. (2009 to 2019); and alternate member of the board of directors of Elekeiroz S.A. (2009 to 2018). He holds a Bachelor's degree in Mechanical Engineering from the *Escola Politécnica da Universidade de São Paulo* (USP), São Paulo, Brazil, and a Master's degree in Business Administration from the MIT Sloan School of Management, Cambridge, Massachusetts, U.S.

Gabriel Amado de Moura is Banco Itaú Chile's vice chairman and director since October 1, 2024 and chief financial officer of Banco Itaú Chile since April 1, 2016, after serving as chief executive officer of Banco Itaú Chile since January 30, 2020 until September 30, 2024. Mr. Moura joined Itaú Unibanco in 2000 and became a partner in 2017. He has more than 25 years of experience in investment management, risk management, finance and M&A. Mr. Moura held the position of chief investment officer for Itaú's pension funds, endowments and insurance businesses. He was also chief risk officer for wealth management, as well as a member of the board of directors of different companies in Brazil and abroad. Prior to joining Banco Itaú Chile, he worked at BBVA Asset Management and Itaú Bankers Trust. Mr. Moura holds an M.B.A. from the Wharton School at the University of Pennsylvania.

Diego Fresco Gutiérrez became a director on March 24, 2022 and he was reelected on April 20, 2023. He previously served as an alternate director between March 28, 2018, and March 23, 2022. Mr. Fresco is currently a member of the audit committee of Banco Itaú Chile and of Itaú Colombia. He is director and audit committee member of StoneCo as well as audit committee member of Votorantim Cimentos S.A. Mr. Fresco previously served as a partner at PwC - São Paulo (2000 to June 2013) in the capital markets and accounting advisory services area, and prior to that he held several positions at PwC in Uruguay (1998 to 2000 and 1990 to 1997) and in the United States (1997 to 1998). He has a B.A. in Accounting from Universidad de la República Oriental del Uruguay in 1994. He is a certified public accountant registered in the State of Virginia (United States) since 2002 (Registration 27,245) and an accountant registered with the Regional Council of Accountancy of the State of São Paulo.

Matias Granata became a director on January 27, 2021, and he was reelected on April 20, 2023. Mr. Granata is a partner in the Partners Program and a member of the executive committee at the Itaú Unibanco Group. He is currently the chief risk officer of the Itaú Unibanco Group, responsible for the risks department since 2021. He has held several positions at the Itaú Unibanco Group, including officer responsible for AML, credit risk, modeling and market and liquidity risks (2014 to 2021). He holds a Bachelor's degree in Economics from the Universidad de Buenos Aires (UBA), Buenos Aires, Argentina, a postgraduate degree in Economics from the Universidad Torcuato Di Tella (UTDT), Buenos Aires, Argentina, and a Master's degree in International Economic Policy from the University of Warwick, United Kingdom with the British Chevening Scholarship.

Pedro Paulo Giubbina Lorenzini became a director on March 24, 2022 and he was reelected on April 20, 2023. Mr. Lorenzini is a Member of the Partners Program and has been an officer of the executive committee at the Itaú Unibanco Group since 2021. He is currently responsible for the treasury, client and product desks and macroeconomics departments at the Itaú Unibanco Group and for its operations in South America (Argentina, Paraguay, Uruguay and Itaú Chile), having held the position of executive officer (2021). He is a member of the board of directors and a member of the risk and financial committee at B3 S.A. - Brasil, Bolsa, Balcão (2021-2023 two-year period). Mr. Lorenzini was responsible for the markets, securities services and treasury (2008 to 2021); sales and structuring, ALM management (2004 to 2008); trading and currency management (2000 to 2004); management of the ALM department (1997 to 2000); several departments of the treasury products sales to corporate clients (1995 to 1997); structuring and development of treasury products (1993 to 1995); product and risk management manager (1992 to 1993); and responsible for controllership and management of managerial results from corporate products (1991 to 1992) at Citigroup Brazil, and was a trainee (1989 to 1991) at Citibank Brazil. He was the chairman of the treasury committee (2010 to 2013) and Citibank's representative at the board of executive officers at the Federação Brasileira de Bancos (FEBRABAN) (2013 to 2021), and chairman of the treasury committee (2010 to 2012) and vice president of the Associação Brasileira das Entidades dos Mercados Financeiro e de Capitais (ANBIMA) (2010 to 2021). He holds a Bachelor's degree in Business Administration from the Pontifícia Universidade Católica de São Paulo (PUC-SP), São Paulo, Brazil.

Luis Octavio Bofill Genzsch became a director on April 20, 2023. He received a law degree from the Pontifícia Universidad Católica de Valparaíso. He is a partner and founder of Bofill Mir Abogados. He has focused his more than 30 years of legal professional practice in corporate and commercial matters, advising local and international clients in several areas and industries, including public and private organizations. He has also been an academic since 1991, including Professor of Commercial Law at the School of Law of the Universidad de Chile. He is a member of the list of arbitrators at the Center of Arbitration and Mediation of the Santiago Chamber of Commerce, member of the List of Experts for the Integration of the Arbitration Court for the Concessions Law, and member of the Chilean Bar Association. He has been a board member at several closed and publicly-held companies in Chile, in several industries.

Kevin Cowan Logan became a director on April 1, 2025. Mr. Cowan has held significant roles in the banking and financial sector, including, among others, the positions of manager of the financial policy division at the Central Bank of Chile, macroeconomic and financial advisor at the Ministry of Finance of Chile, director at the Inter-American Development Bank, and commissioner of the Commission for the Financial Market. Mr. Cowan is a commercial engineer from the Pontificia Universidad Católica de Chile and holds a Ph.D. in Economics from the Massachusetts Institute of Technology (MIT).

Rogério Carvalho Braga became a director on April 29, 2020, and in April 20, 2023 he became an alternate member of the board of directors. Mr. Braga is a former senior executive of Itaú Unibanco and also a former corporate director of marketing & products at Itaú Chile between April 1, 2016 and December 31, 2018. He has been a member of the audit committee at the Itaú Unibanco Group since 2021. He has held a number of positions at the Itaú Unibanco Group, including officer (2020). He joined the Itaú Unibanco Group in 1999 and was elected officer in 2000. Before joining Itaú Unibanco, Mr. Braga worked for six years in AIG (American International Group) in New York and Lisbon, and for 11 years with the Moreira Sales group, in charge of the food industry sector. Mr. Braga holds a degree law degree from the Pontificia Universidade Católica de São Paulo and an M.B.A. from Pepperdine University.

* Mr. Daniel Brasil is expected to leave office in December 2025. He is expected to be replaced by Mr. Eduardo Martins, who currently serves as Head of Treasury & Sales at Itaú BBA International plc (UK).

** Mr. Emerson Bastian reports to the audit committee.

*** Mr. Montecino coordinates with senior management through the chief risk officer and has direct communication with the audit committee and the board of directors.

André Carvalho Whyte Gailey is Banco Itaú Chile's chief executive officer since October 1, 2024. Mr. Gailey has been working for Itaú for more than 20 years. Mr. Gailey served as Itaú Unibanco's regional chief executive officer for Argentina, Uruguay and Paraguay and chief executive officer of Banco Itaú Uruguay. Previously, he led the wholesale banking products, consumer desk and wholesale banking planning areas of Banco Itaú BBA. He holds a Law Degree from the University of São Paulo, a Master in Comparative Law and Finance from Stanford University and an Executive MBA in Finance from INSPER, São Paulo.

Emiliano Muratore became chief financial officer of Banco Itaú Chile in March 2025. Mr. Muratore has more than 25 years of international experience in the banking sector. He became the chief financial officer for Santander-Chile in April 2016. Before that, he served for 8 years as manager of the financial division (ALM). Before joining Santander Chile in 2006, he worked at Santander Group's headquarters in Madrid for 4 years. Before that, he worked at Santander Rio (Argentina) for 4 years. Mr. Muratore has a degree in business from Universidad Católica Argentina in Buenos Aires and a postgraduate degree in finance from Universidad de San Andrés in Buenos Aires. In 2018, he completed the advanced management program at Harvard Business School.

Sebastián Romero became corporate director of the Wholesale and Investment Banking on September 20, 2021. Mr. Romero has extensive experience leading teams that serve global corporations, financial institutions, and financial sponsors. Prior to joining us, Mr. Romero held a wide range of executive roles at Santander Group in Chile, Spain, and London. He served as global head of multinational corporations based in London, being a member of the global executive committee of banking & corporate finance. Previously, he led the Corporate and Investment Banking unit in Chile. In March 2009, Mr. Romero was appointed managing director and global head of export & agency finance based in Madrid, with global responsibilities to oversee all structured export finance activities of the Santander Group. Mr. Romero received a B.A. in Business and Administration from Universidad Gabriela Mistral and a post-degree from Universidad Adolfo Ibáñez and Universidad de los Andes.

Julián Acuña Moreno became corporate director of the Retail Banking in September 2016. Mr. Acuña has vast experience in both national and international banking, having worked as commercial division manager at Banco Santander-Chile, in Chile, and at Banco Santander Colombia, in Colombia. Mr. Acuña holds an Accountant Auditor degree from the Universidad Diego Portales, Chile.

Daniel Brasil became corporate director of Treasury on January 1, 2023. Mr. Brasil has more than 17 years of experience in the Latin American banking industry in the Treasury area. He began his career at Citibank Brazil as a trader banking, then he joined Itaú Unibanco, where, for nine years, he also worked as a trader banking, was in charge of the functions of transfer price, hedge investments abroad and Latam market trader, in addition to participating in the merger of Itaú Unibanco. He has spent the last six years of his career at Itaú Chile as Banking Manager and ALM. He also participated in the merger process of Itaú with Corpbanca. Mr. Brasil holds a degree in Engineer from University of São Paulo.

Mauricio Baeza Letelier became chief risk officer in September 2016. With more than 33 years of experience in the banking industry, Mr. Baeza Letelier has held diverse executive positions in risk management areas of local banking institutions. He served as chief risk officer of Banco de Chile and is currently the vice president of the Risk Committee of the Bank and of the Financial Institution Association of Chile (*Asociación de Bancos e Instituciones Financieras de Chile*). Mr. Baeza holds an undergraduate degree in Civil Engineering from the Pontificia Universidad Católica de Chile.

Eduardo Neves became corporate director of IT on April 2, 2021. Mr. Neves has more than 26 years of experience in technology, working mainly in the financial and telecommunications sectors. Previously, he served as vice president of Cloud Applications and Innovation for Latin America at IBM, from Brazil, where he led large-scale projects since joining in 2013. He was responsible for the accounts of Bradesco and later Itaú Unibanco, managing most of the IBM consulting business for Latin America. He studied Engineering in Technology and has an MBA from the Federal University of Rio de Janeiro (UFRJ).

Cristián Toro Cañas became general counsel in June 2016. Mr. Toro worked for more than 10 years in Citibank Chile, acting as general counsel since 2004. In 1999 he worked at Shearman & Sterling in New York. In 2008 he joined Lan Airlines as legal vice-president. After the merger of Lan and Tam, he continued to work as legal vice-president and as the secretary of the board of directors of Latam Airlines Group. Mr. Toro received a law degree from the Pontificia Universidad de Católica de Chile and a Master of Law degree from the New York University School of Law.

Marcela Jiménez Pardo became corporate director of human resources in April 2016 and since April 2022 also became responsible for sustainability. She also served as chief human resources officer at Corpbanca between July 2012 and March 2016. Previously, she served in the global banking consulting group at Banco de Chile from 2008 to 2012. Mrs. Jiménez received an undergraduate degree in Psychology from the Pontificia Universidad Católica de Chile and a postgraduate degree in Human Resources Management from Universidad Adolfo Ibáñez.

Emerson Bastian Vergara became chief audit executive in April 2017. Previously, Mr. Bastian was a partner at Deloitte Chile's governance, regulatory and risk strategies practices. Mr. Bastian received an undergraduate degree in Accounting from Universidad de Chile and a Master's degree in Business Administration from Universidad Adolfo Ibáñez.

Max Montecino Malky became chief compliance officer in January 2023. Mr. Montecino has an extensive career in both the public and private sectors, having served as head of the financial division at the Superintendency of

Pensions and Head of Intelligence at the Financial Intelligence Unit of Chile for 11 years. Previously, he worked for 12 years in various management positions related to investments, finance, and financial risk control in international insurance companies, such as the Interamericana Insurance Company, a subsidiary of AIG, and BNP Paribas Cardif. Mr. Montecino received a B.A. in Business and Administration from Universidad de Chile and a master's in Financial Direction from Universidad Adolfo Ibañez.

Joaquín Rojas Walbaum became general manager of Itaú Chile New York Branch in October 2017. Mr. Rojas has more than 19 years of experience in the financial industry. Prior to his current position he was the head of Treasury at the New York Branch. Before that, he worked in the investment division at MetLife Chile and credit division at MetLife Investments Latin America. He holds an undergraduate degree in Economics from Universidad de Chile and a Master of Business Administration from Columbia University.

Jorge Villa became chief executive officer of Itaú Colombia on March 21, 2025, after serving as vice president of corporate banking. He has held different positions in different financial institutions, among them: commercial manager at BBVA, manager of the distribution desk at Banco Ganadero, vice president of corporate banking at Itaú BBA Colombia and vice president of wholesale banking at Itaú Colombia. He holds a master's degree in Economics-Finance and an MBA from Babson College.

Corporate Governance

Itaú Chile's board of directors is its highest governance body of the Bank and delegates the day-to-day management of the Bank to the Chief Executive Officer. The board of directors is responsible for steering the Bank's business activities and strategic objectives, while the corporate management team is responsible for implementing Itaú Chile's priorities and meeting customer expectations in a professional manner.

The Bank's governance framework is supported by a comprehensive committee structure. In addition to the board committees (including the comprehensive risk committee, directors' committee, audit committee, and remuneration and talent committee), the Bank maintains a series of senior committees covering key operational, risk, compliance, sustainability, and business areas. These include the senior credit committees (wholesale and retail), senior ethics and compliance committee, senior capital management committee, senior technology committee, senior sustainability and diversity committee, and others.

Management Structure

The Chief Executive Officer is supported by corporate management areas, which include corporate strategy, investment & marketing, corporate treasury, corporate risk, corporate finance, corporate technology, corporate people & sustainability, and corporate legal, among others. The Bank also operates retail banking management and corporate banking management units to serve its client base.

Employees and Labor Relations

As of March 31, 2025, the Bank employed in Chile and Colombia a combined total of 6,750 employees, the vast majority of whom were permanent and full-time employees. The workforce is diverse, spanning more than 20 nationalities, with Chilean and Colombian nationals comprising the largest groups. Other nationalities include Venezuelan, Brazilian, and Peruvian.

Roles across both countries range from senior management and line management to sales, administrative, technical, and professional positions. The Bank maintains collective bargaining agreements in both Chile and Colombia and fosters ongoing engagement with employee representatives.

Talent development, retention, diversity, and inclusion are key pillars of Itaú Chile's human capital strategy, supported by training programs and policies designed to promote equal opportunities and an inclusive work environment throughout its Latin American operations. As of March 31, 2025, the total employees in Chile decreased by 0.4% compared to December 31, 2024, while in Colombia the decrease was 5.8%, reflecting ongoing efficiency measures and stable staffing levels following the main adjustments carried out by Itaú Chile.

RELATED PARTY TRANSACTIONS

In the ordinary course of our business, we engage in a variety of transactions with certain of our affiliates and related parties. *Ley 18,046 sobre Sociedades Anónimas* and the *Reglamento de Sociedades Anónimas* (together, the “**Chilean Corporations Act**”) requires that our transactions with related parties be in our interest and also on an arm’s-length basis or on similar terms to those customarily prevailing in the market. We are required to compare the terms of any such transaction to those prevailing in the market at the date the transaction is to be entered into. In the event that the transaction is not within the ordinary course of business, prior to its effectiveness, the directors committee must prepare a report describing the conditions of the operation and present it to the board of directors for its express approval. Directors of companies that violate this provision are liable for the resulting losses. Under *Ley General de Bancos* (the “**Chilean General Banking Act**”), transactions between a bank and its affiliates are subject to certain additional restrictions.

Under the Chilean Corporations Act, a “related party transaction,” in the case of an open stock corporation, is any operation between such corporation and (i) one or more related persons under Article 100 of *Ley No. 18,045 de Mercado de Valores* (the “**Chilean Securities Market Act**”), (ii) a director, manager, administrator, principal officer or liquidator of the corporation, by him/herself or on behalf of persons other than the corporation, or their respective spouses or blood or marriage relatives to the second degree, (iii) an entity of which any of the persons indicated in the previous numeral is the direct or indirect owner of 10% or more of its capital or a director, manager or officer, (iv) a person or entity determined as such by the by-laws of the corporation or the board committee, and (v) an entity in which a director, manager, administrator, principal officer or liquidator of the corporation, has acted in any of those capacities during the immediately previous 18 months.

Article 100 of the Chilean Securities Market Act provides that the following persons are “related” to a company: (i) the other entities of the business conglomerate to which the company belongs, (ii) parents, subsidiaries and equity-method investors and investees of the company, (iii) all directors, managers, officers and liquidators of the company and their spouses or blood relatives to the second degree, or any entity controlled, directly or indirectly, by any of the referred individuals, (iv) any person that, by him/herself or with other persons under a joint action agreement, may appoint at least one member of the management of the company or control ten percent or more of the capital or voting capital of a stock company and (v) other entities or persons determined as such by the CMF.

A publicly-traded corporation may only enter into a related transaction when its aim is to contribute to the corporate general interests, its conditions are set at arm’s length and the corporation has followed the procedure indicated in the Chilean Corporations Act. The procedure to approve a related transaction can be summarized as follows: (i) the directors, managers, administrators, principal officers and liquidators involved in the potential transaction must give notice thereof to the board (these persons are obligated to disclose their interest in the transaction and, if required by the board, the director involved will be obliged to make public his/her opinion on the transaction), (ii) the absolute majority of the board, excluding any director involved in the transaction, must approve the transaction, (iii) the approval given by the board must be announced in the next shareholders’ meeting, (iv) if the directors involved in the transaction form the majority of the board, the transaction may only be approved by the unanimity of the remaining directors or by two-thirds of the issued voting shares in the corporation in a shareholders’ meeting, and (v) where the approval of the shareholders’ meeting is required, the board will request an independent appraiser to submit to the shareholders the conclusions regarding the conditions of the transaction.

These rules are not applicable to non-material transactions in terms of amounts involved, transactions included in the ordinary course of business of the corporation, according to the policies approved by the board and transactions with another entity of which the corporation owns at least 95% of its shares or rights.

Non-compliance with these rules does not invalidate the transaction, but the persons involved will be obligated to transfer the benefit accrued thereby from the transaction to the corporation and will be held liable for the potential damages suffered by the corporation. These rules apply to all publicly-traded corporations and to their subsidiaries, regardless of their corporate type.

For a description of our related party transactions see Note 43 to the Unaudited Financial Statements.

USE OF PROCEEDS

The net proceeds of any issue of Notes under the Program are to be used by the Issuer for general corporate purposes, unless otherwise specified in the relevant Final Terms.

EXCHANGE RATES

Chile has two currency markets, the Formal Exchange Market (*Mercado Cambiario Formal*) and the Informal Exchange Market (*Mercado Cambiario Informal*). The Formal Exchange Market is comprised of banks and other entities authorized by the Central Bank of Chile. The Informal Exchange Market is comprised of entities that are not expressly authorized to operate in the Formal Exchange Market, such as certain foreign exchange houses and travel agencies, among others. The Central Bank of Chile is empowered to require that certain purchases and sales of foreign currencies be carried out on the Formal Exchange Market. Both the Formal and Informal Exchange Markets are driven by free market forces. Current regulations require that the Central Bank of Chile be informed of certain transactions and that they be affected through the Formal Exchange Market.

The U.S. dollar observed exchange rate (*dólar observado*), or the Observed Exchange Rate, which is reported by the Central Bank of Chile and published daily in the Official Gazette (*Diario Oficial*) is the weighted average exchange rate of the previous business day's transactions in the Formal Exchange Market. Nevertheless, the Central Bank of Chile may intervene by buying or selling foreign currency on the Formal Exchange Market to attempt to maintain the Observed Exchange Rate within a desired range. Even though the Central Bank of Chile is authorized to carry out its transactions at the Observed Exchange Rate, it often uses spot rates instead. Many other banks carry out foreign exchange transactions at spot rates as well.

The Informal Exchange Market reflects transactions carried out at an informal exchange rate. There are no limits imposed on the extent to which the rate of exchange in the Informal Exchange Market can fluctuate above or below the Observed Exchange Rate.

The Federal Reserve Bank of New York does not report a noon buying rate for Chilean pesos.

The exchange rate between the Chilean peso and the U.S. dollar as of December 31, 2022, 2023 and 2024 was Ch\$854.31, Ch\$891.33 and Ch\$996.61 per US\$1.00, respectively. The exchange rate between the Chilean peso and the U.S. dollar as of March 31, 2025, was Ch\$954.72 per US\$1.00 and the Colombian peso was COP\$4,403.93, COP\$4,042.31 and COP\$4,851.28 per US\$1.00, as of December 31, 2024, 2023 and 2022, respectively, and as of March 31, 2025 it traded at COP\$4,203.96 per US\$1.00.

DESCRIPTION OF THE NOTES

General

Banco Itaú Chile, directly or through the New York Branch, may issue and have outstanding from time to time up to U.S.\$2,000,000,000 principal amount in the aggregate of the Notes under this Program. The minimum specified denomination of the Notes will be EUR 100,000 (or, if the Notes are denominated in a currency other than euro, the equivalent amount in such currency) or such higher amount as may be allowed or required from time to time by the relevant central bank (or equivalent body) or any laws or regulations applicable to the relevant Specified Currency. The Notes will have the terms described below, including, as described below, the terms specified in the Final Terms of the applicable Series, except that references below to interest payments and interest-related information do not apply to certain Original Issue Discount Notes (as defined in “Taxation”).

The Notes are to be issued under an Amended and Restated Fiscal and Paying Agency Agreement dated as of November 12, 2025, among the Issuer, Citibank, N.A., London Branch, as fiscal agent (in such capacity, the “**Fiscal Agent**”), paying agent (in such capacity, together with its capacity as Fiscal Agent, and including any successor fiscal and paying agent appointed thereunder, the “**Fiscal and Paying Agent**”), transfer agent, calculation agent and registrar, as further amended and supplemented from time to time (the “**Fiscal Agency Agreement**”), in registered or bearer form as specified in the applicable Final Terms. The following description of certain provisions of the Fiscal Agency Agreement is subject to, and qualified in its entirety by reference to, all the provisions of the Fiscal Agency Agreement, including the definitions therein of certain terms.

The Issuer may, from time to time, re-open one or more Series and issue Additional Notes (as defined below in “Additional Notes”) with the same terms (including maturity and interest payment terms but excluding original issue date and public offering price) as Notes issued on an earlier date; provided that a Series may not comprise both Notes in bearer form and Notes in registered form. After such Additional Notes are issued they will be fungible with the previously issued Notes to the extent specified in the applicable Final Terms (except that any such Additional Notes offered and sold in compliance with Regulation S will have temporary ISIN and Common Code numbers during a 40-day distribution compliance period commencing on the date of issuance of such Additional Notes), provided further that if the Additional Notes are not fungible with the earlier Notes for U.S. federal income tax purposes, the Additional Notes will have a separate ISIN or Common Code number. Each such Series may contain one or more tranches of Notes (each, a “**Tranche**”) having identical terms, including the original issue date and the public offering price; provided that a Tranche of Notes may not comprise both Notes in bearer form and Notes in registered form, and provided further that each Series issued by the New York Branch will be comprised solely of Notes in registered form.

The Final Terms relating to a Tranche of Notes issued by the Issuer will describe the following terms: (i) the currency or composite currency in which the Notes of such Tranche will be denominated (each such currency or composite currency, a “**Specified Currency**”) and, if other than the Specified Currency, the currency or composite currency in which payments on the Notes of such Series will be made (and, if the Specified Currency or currency or composite currency of payment is other than U.S. Dollars, certain other terms relating to such Notes (a “**Foreign Currency Note**”) and such Specified Currency or such currency or composite currency of payment); (ii) whether such Notes are Fixed Rate Notes or Floating Rate Notes (including whether such Notes are Regular Floating Rate Notes, Floating Rate/Fixed Rate Notes or Inverse Floating Rate Notes, each as defined below); (iii) the price at which such Notes will be issued (the “**Issue Price**”); (iv) the date on which such Notes will be issued (the “**Original Issue Date**”); (v) the date on which such Notes will mature; (vi) whether such notes are senior, subordinated and, if subordinated, the terms of the subordination, or capital securities and, if capital securities, the terms and conditions of such capital securities; (vii) if such Notes are Fixed Rate Notes, the rate per annum at which such Notes will bear interest, if any; (viii) if such Notes are Floating Rate Notes, the interest rate basis or bases (the “**Interest Rate Basis or Bases**”), the initial interest rate (the “**Initial Interest Rate**”), the minimum interest rate (the “**Minimum Interest Rate**”) (provided that if no Minimum Interest Rate is specified or if indicated that the Minimum Interest Rate is “not applicable,” the Minimum Interest Rate shall be zero), the maximum interest rate (the “**Maximum Interest Rate**”), the Interest Payment Dates, the period to maturity of the instrument, obligation or index with respect to which the Calculation Agent (as defined below) will calculate the interest rate basis or bases (the “**Index Maturity**”), the Spread and/or Spread Multiplier (each as defined below), if any, and any other terms relating to the particular method of calculating the interest rate for such Notes; (ix) if such Notes are Indexed Notes, the terms relating to the particular Notes; (x) if such Notes are Dual Currency Notes, the terms relating to the particular Notes; (xi) if such Notes are Amortizing

Notes, the amortization schedule and any other terms relating to the particular Notes; (xii) whether such Notes may be redeemed at the option of the Issuer, or repaid at the option of the holder, prior to its stated maturity as described under “Optional Redemption” and “Repurchase” below and, if so, the provisions relating to such redemption or repayment, including, in the case of any Original Issue Discount Notes, the information necessary to determine the amount due upon redemption or repayment; (xiii) any relevant tax consequences associated with the terms of the Notes which have not been described under “Taxation” below; (xiv) if such Notes are Additional Notes (as defined below), a description of the original issue date and aggregate principal amount of the prior Tranche of Notes having terms (other than the original issue date and public offering price) identical to such Additional Notes; and (xv) any other terms of such Notes not inconsistent with the provisions of the Fiscal Agency Agreement. In addition, each Final Terms with respect to a Tranche of Notes will identify the Dealer(s) participating in the distribution of such Notes. See “Plan of Distribution.” Each Final Terms relating to Notes will be in, or substantially in, the relevant forms included under “Form of Final Terms” below.

If any Notes are to be issued as Foreign Currency Notes, the applicable Final Terms will specify the currency or currencies, which may be composite currencies, in which the purchase price of such Notes are to be paid by the purchaser, and the currency or currencies, which may be composite currencies, in which the principal at maturity or earlier redemption, premium, if any, and interest, if any, with respect to such Notes may be paid, if applicable, along with any other terms relating to the non-U.S. Dollar denomination. See “Special Provisions Relating to Foreign Currency Notes.”

Subject to such additional restrictions as are described under “Special Provisions Relating to Foreign Currency Notes,” Notes of each Tranche will mature on a day specified in the applicable Final Terms, as selected by the initial purchaser and agreed to by the Issuer. In the event that such maturity date of any Notes or any date fixed for redemption or repayment of any Notes (collectively, the “**Maturity Date**”) is not a Business Day (as defined below), principal and interest payable at maturity or upon such redemption or repayment will be paid on the next succeeding Business Day with the same effect as if such Business Day were the Maturity Date. No interest shall accrue for the period from and after the Maturity Date to such next succeeding Business Day. Except as may be specified in the applicable Final Terms and except for Indexed Notes (as defined below), all Notes will mature at par.

In the case of Fixed Rate Notes, the applicable Final Terms will specify the yield as of the Original Issue Date. The yield is calculated at the Original Issue Date on the basis of the Issue Price. It is not an indication of future yield.

“**Business Day**” means, unless otherwise specified herein and in the applicable Final Terms, any day other than a Saturday or Sunday or any other day on which banking institutions are generally authorized or obligated by law or regulation to close in (i) the principal financial center of the country in which the Issuer is incorporated, (ii) the principal financial center of the country of the currency in which the Notes are denominated (if the Note is denominated in a Specified Currency other than Euro) and (iii) any additional financial center specified in the applicable Final Terms (as the case may be); provided, however, that with respect to Notes denominated in Euro, such day is a day on which the Trans-European Automated Real-Time Gross Settlement Express Transfer (**TARGET**) System (“**TARGET2**”) is open.

The Notes

Each Note will be unsecured and will be either a senior or subordinated debt obligation or capital securities.

Senior Notes

Notes which are senior debt obligations will rank equally in right of payment with all other unsecured and unsubordinated obligations of the Issuer thereof.

Subordinated Notes and Capital Securities

Notes which are subordinated debt obligations will rank junior in right of payment to all senior indebtedness as specified in the applicable Final Terms, which will set forth the precise terms of such subordination. The terms and

conditions of Notes intended to be treated as capital securities pursuant to applicable local Chilean and/or international capital adequacy regulations will be set forth in the applicable Final Terms.

Forms of Notes

Bearer Notes

If specified in the applicable Final Terms, Notes of each Tranche (other than any Notes issued by the New York Branch, which will be in registered form) will be in bearer form (“**Bearer Notes**”) and will initially be represented by one or more temporary global Notes or permanent global Notes, without interest coupons attached and, in the case of definitive Notes, will be serially numbered and will:

- (i) if any such global Note is intended to be issued in NGN form, as stated in the applicable Final Terms, be delivered to a common safekeeper (the “**Common Safekeeper**”) for Euroclear Bank S.A./N.V. as operator of the Euroclear System (“**Euroclear**”) and/or Clearstream Banking S.A. (“**Clearstream, Luxembourg**”) (each an “**ICSD**” and together the “**ICSDs**”).
- (ii) if any such global Note is intended to be issued in CGN form, as stated in the applicable Final Terms, be delivered to a common depositary (the “**Common Depositary**”) for Euroclear and/or Clearstream Banking S.A.

Bearer Notes in definitive form will be issued with coupons attached. Except as set out below, title to Bearer Notes and any coupons will pass by delivery. The Issuer, the Fiscal Agent and any Paying Agent (as defined below) may deem and treat the bearer of any Bearer Note or coupon as the absolute owner thereof (whether or not overdue and notwithstanding any notice of ownership or writing thereon or notice of any previous loss or theft thereof) for all purposes but, in the case of any global Note, without prejudice to the provisions set out in the next succeeding sentence. For so long as any of the Notes are represented by a global Note, each person who is for the time being shown in the records of Euroclear or Clearstream, Luxembourg as the holder of a particular principal amount of Notes (in which regard any certificate or other document issued by Euroclear or Clearstream, Luxembourg as to the principal amount of such Notes standing to the account of any person shall be conclusive and binding for all purposes except in the case of manifest error) shall be treated by the Issuer, the Fiscal Agent and any Paying Agent as the holder of such principal amount of such Notes for all purposes other than with respect to the payment of principal or interest on the Notes, the right to which shall be vested, as against the Issuer, the Fiscal Agent and any Paying Agent solely in the bearer of the relevant global Note in accordance with and subject to its terms (and the expressions “**Noteholder**” and “**Holder of Notes**” and related expressions shall be construed accordingly). Notes which are represented by a global Note will be transferable only in accordance with the rules and procedures for the time being of Euroclear or of Clearstream, Luxembourg, as the case may be.

References herein to “**Bearer Notes**” shall, except where otherwise indicated, include interests in a temporary or permanent global Note as well as definitive Notes and any coupons attached thereto.

The applicable Final Terms will specify whether (i) Treasury Regulation §1.163-5(c)(2)(i)(C) (or any successor rules in substantially the same form as such rules for purposes of Section 4701 of the Code) (the “**TEFRA C Rules**”), (ii) Treasury Regulation §1.163-5(c)(2)(i)(D) (or any successor rules in substantially the same form as such rules for purposes of Section 4701 of the Code) (the “**TEFRA D Rules**”) or (iii) if the Notes do not have a maturity of more than 365 days (including unilateral rights to rollover or extend), neither the TEFRA C Rules nor the TEFRA D Rules, are applicable to the Notes. If so specified in the applicable Final Terms, in the case of a Bearer Note to which the TEFRA D Rules have not been specified to apply, the Bearer Notes may be represented upon issue by one or more permanent global Notes.

Each Bearer Note having a maturity of more than 365 days (including unilateral rights to rollover or extend) and interest coupons pertaining to such Note, if any, will bear the following legend: “Any United States person who holds this obligation will be subject to limitations under the U.S. income tax laws, including the limitations provided in Sections 165(j) and 1287(a) of the Code.”

In general, Bearer Notes that are subject to the TEFRA C Rules or the TEFRA D Rules may not be offered, sold or delivered within the United States or to United States persons. In particular, if the applicable Final Terms specify that the TEFRA D Rules apply, the Bearer Notes may not be delivered, offered, sold or resold, directly or indirectly, in connection with their original issuance or during the Restricted Period (as defined below), in the United States (as defined below) or to or for the account of any United States person (as defined below), other than to certain persons as provided under Treasury Regulations. An offer or sale will be considered to be made to a person within the United States if the offeror or seller has an address within the United States for the offeree or purchaser with respect to the offer or sale. In addition, any underwriters, agents and dealers will represent that they have procedures reasonably designed to ensure that their employees or agents who are directly engaged in selling Bearer Notes are aware of the restrictions on the offering, sale, resale or delivery of Bearer Notes.

As used herein:

“United States” means the United States (including the States and the District of Columbia), its territories and its possessions. **“United States person”** means (i) a citizen or individual resident of the United States, (ii) a corporation, partnership or other entity created or organized in or under the laws of the United States, any state thereof or the District of Columbia or (iii) an estate or a trust the income of which is subject to U.S. federal income taxation regardless of its source.

“Restricted Period” with respect to each Tranche of Notes, means the period which begins on the earlier of the settlement date (or the date on which the Issuer receives the proceeds of the sale of Bearer Notes of such Tranche), or the first date on which the Bearer Notes of such Tranche are offered to persons other than the Dealer(s), and which ends 40 days after the settlement date (or the date on which the Issuer receives the proceeds of the sale of such Bearer Notes); provided that with respect to a Bearer Note held as part of an unsold allotment or subscription, any offer or sale of such Bearer Note by the Issuer or any Dealer(s) shall be deemed to be during the Restricted Period.

“Ownership Certificate” means, a certificate (in a form to be provided), signed or sent by the beneficial owner of the relevant Bearer Note or by a financial institution or clearing organization through which the beneficial owner holds the Bearer Note providing certification that the beneficial owner is not a United States person or person who has purchased for resale to any United States person as required by Treasury Regulations.

Unless otherwise specified in the applicable Final Terms, each Bearer Note will be represented initially by a temporary global Note, without interest coupons which will (a) if the temporary global Note is intended to be issued in NGN form, be delivered on or prior to the Original Issue Date of the tranche of Notes to a Common Safekeeper or (b) if the temporary global Note is intended to be issued in CGN form, be delivered on or prior to the Original Issue Date of the tranche of Notes to a Common Depositary, or any other recognized or agreed clearing system in the case of a temporary global Note issued in CGN form. Upon deposit of each such temporary global Note, Euroclear or Clearstream, Luxembourg, as the case may be, will credit each subscriber with a principal amount of Notes equal to the principal amount thereof for which it has subscribed and paid. The interests of the beneficial owner or owners in a temporary global Note will be exchangeable after the Exchange Date for an interest in a permanent global Note which will (a) if the permanent global Note is intended to be issued in NGN form be delivered to a Common Safekeeper or (b) if the permanent global Note is intended to be issued in CGN form, be delivered to a Common Depositary, for credit to the account designated by or on behalf of the beneficial owner thereof, or for definitive Bearer Notes or definitive Registered Notes, as provided in the applicable Final Terms; provided, however, that such exchange will be made only upon receipt of Ownership Certificates in the case of Bearer Notes to which the TEFRA D Rules have been specified to apply.

For purposes of this Base Prospectus, **“Exchange Date”** for any Series of Notes means the first Business Day that is at least 40 calendar days after the issue date of such Series; provided that in the event a Tranche of Additional Notes of the same Series is issued prior to the Exchange Date of a prior Tranche of such Series (as such Exchange Date may have been extended pursuant to this sentence), such Exchange Date will be extended (or further extended, as the case may be) to a date not earlier than 40 calendar days after the issue date of such subsequent

Tranche; provided, however in no event will the Exchange Date for any Tranche of Notes be extended to a date more than 160 calendar days after their issue date.

If so specified in the applicable Final Terms, in the case of a Bearer Note to which the TEFRA D Rules have not been specified to apply, the Bearer Notes may be represented upon issue by one or more permanent global Notes.

Registered Notes

If specified in the applicable Final Terms, Notes of each Tranche may be issued in fully registered form (“**Registered Notes**”), provided, however, that all Notes issued by the New York Branch shall be issued in fully registered form.

The Registered Notes of each Tranche offered and sold in reliance on Regulation S, which will be sold to non-U.S. Persons outside the United States, will be represented by a global note in registered form (a “**Regulation S Global Note**” or a “**Registered Global Note**”). Prior to expiry of the distribution compliance period (as defined in Regulation S) applicable to each Tranche of Notes, beneficial interests in a Regulation S Global Note may not be offered or sold to, or for the account or benefit of, a U.S. Person and such Regulation S Global Note will bear a legend regarding such restrictions on transfer.

Each Tranche of Notes issued by the New York Branch, including any Tranche of Additional Notes issued prior to the Exchange Date for a prior Tranche of Notes of the same Series, shall initially be issued in the form of a single temporary global Note.

The Registered Global Notes will either (i) be deposited with a common depositary for, and registered in the name of a common nominee of, Euroclear and Clearstream, Luxembourg, as specified in the applicable Final Terms, or (ii) be deposited with a custodian or depositary for, and registered in the name of, a nominee of any other clearing system specified for a particular Tranche or Series of Notes, in each case, as specified in the applicable Final Terms. Persons holding beneficial interests in Registered Global Notes will be entitled or required, as the case may be, under the circumstances described below, to receive physical delivery of definitive Notes in fully registered form.

The Registrar (as defined below) will keep a register for each Series of Registered Notes (the “**Register**”) in which, subject to such reasonable regulations as it may prescribe, the Registrar will register Registered Notes and will register the transfer of Registered Notes as provided in the Fiscal Agency Agreement.

Payments of principal, interest and any other amount in respect of the Registered Global Notes will be made to the person shown on the Register as the registered holder of the Registered Global Notes. None of the Issuer, any Paying Agent or any Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Registered Global Notes or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Payments of principal, interest or any other amount in respect of the Registered Notes in definitive form will be made to the persons shown on the Register on the relevant Record Date (as defined below) immediately preceding the due date for payment in the manner provided in that paragraph.

Interests in a Registered Global Note will be exchangeable (free of charge), in whole but not in part, for definitive Registered Notes without interest coupons, receipts or talons attached only upon the occurrence of an Exchange Event. For these purposes, “**Exchange Event**” means that (i) in the case of Notes registered in the name of a nominee for a common depositary for Euroclear and Clearstream, Luxembourg, the Issuer has been notified that both Euroclear and Clearstream, Luxembourg have been closed for business for a continuous period of fourteen days (other than by reason of holiday, statutory or otherwise) or have announced an intention to permanently cease business or have in fact done so and, in any such case, no successor clearing system is available, (ii) the Issuer has or will become subject to adverse tax consequences which would not be suffered were the Notes represented by the Registered Global Note in definitive Registered Note form or (iii) at the request of a holder if there is an Event of Default under the Notes.

In the event of the occurrence of an Exchange Event, Euroclear and/or Clearstream, Luxembourg (acting on the instructions of any holder of an interest in such Registered Global Note) may give notice to the Registrar requesting exchange and, in the event of the occurrence of an Exchange Event as described in (iii) above, the Issuer may also give notice to the Registrar requesting exchange. Any such exchange shall occur not later than ten days after the date of receipt of the first relevant notice by the Registrar.

Exchange and Transfer of Notes

A temporary global Note will be exchangeable in whole but not in part for definitive Bearer Notes (i) if Euroclear and/or Clearstream, Luxembourg has informed the Issuer that it has or they have, as the case may be, ceased or will cease to act as the clearing system(s) in respect of the relevant temporary global Note or, (ii) if required by law; but only, in each case, in the case of Bearer Notes to which the TEFRA D Rules have been specified to apply, on or after the Exchange Date and upon delivery of Ownership Certificates. No definitive Bearer Note will be delivered in or to the United States or to a United States person, except as specifically provided by applicable Treasury Regulations. In the event that the relevant temporary global Note is not, in the case of (i) or (ii) above, duly exchanged for definitive Bearer Notes then the terms of such temporary global Note provide for relevant account holders with Euroclear and Clearstream, Luxembourg and any other agreed clearing system, as applicable, to be able to enforce against the Issuer all rights which they would have had if they had been holding definitive Bearer Notes of the relevant value at the time of such event. Payments by the Issuer to the relevant account holders will be considered as payments to the relevant Noteholder and operate as full and final discharge to the Issuer in this respect.

Interests in any temporary global Note issued by the New York Branch will be exchangeable for interests in a permanent global Note in registered form (i) on or after the Exchange Date, and (ii) upon certain certification as to non-U.S. beneficial ownership.

A permanent global Note will be exchangeable in whole but not in part for definitive Bearer Notes or Registered Notes if Euroclear and/or Clearstream, Luxembourg has informed the Issuer that it has or they have, as the case may be, ceased or will cease to act as the clearing system(s) in respect of the relevant permanent global Note, provided that in the case of permanent global Notes issued by the New York Branch, such Notes shall be exchangeable only for definitive Registered Notes. In order to make such request the holder must, not less than 45 days before the date on which delivery of definitive Bearer Notes or Registered Notes is required, deposit the relevant permanent global Note with the relevant Paying Agent (as defined below) at its specified office outside the United States for the purposes of the Notes with the form of exchange notice endorsed thereon duly completed. No definitive Bearer Note will be delivered in or to the United States or to a United States person, except as specifically provided by applicable Treasury Regulations. In the event that the relevant permanent global Note is not, in the case of (i) or (ii) above, duly exchanged for definitive Bearer Notes or Registered Notes then the terms of such permanent global Note provide for relevant account holders with Euroclear and/or Clearstream, Luxembourg to be able to enforce against the Issuer all rights which they would have had if they had been holding definitive Bearer Notes or Registered Notes of the relevant value at the time of such event. Payments by the Issuer to the relevant account holders will be considered as payments to the relevant Noteholder and operate as full and final discharge to the Issuer in this respect.

Global Notes exchangeable for definitive Notes at the option of the Noteholders in circumstances other than in the limited circumstances set forth above shall be tradeable only in principal amounts of at least the Specified Denomination (or if more than one Specified Denomination, the lowest Specified Denomination).

If specified in the applicable Final Terms, and subject to the terms of the Fiscal Agency Agreement, definitive Bearer Notes (along with all unmatured coupons, and all matured coupons, if any, in default) will be exchangeable at the option of the holder into Registered Notes of any authorized denominations of like tenor and in an equal aggregate principal amount, in accordance with the provisions of the Fiscal Agency Agreement at the office of the Registrar or at the office of any Transfer Agent outside the United States designated by the Issuer for such purpose. See “Registrars, Transfer Agents, Calculation Agent and Authenticating Agent” below. Definitive Bearer Notes surrendered in exchange for Registered Notes after the close of business at any such office (i) on or after any record date for the payment of interest (a “**Regular Record Date**”) on a Registered Note on an Interest Payment Date (as defined below) and before the close of business at such office on the date prior to the relevant Interest Payment Date, or (ii) on or after any record date to be established for the payment of defaulted interest on a Registered Note (“**Special Record Date**”) and before the opening of business at such office on the related proposed date for payment of defaulted interest,

shall be surrendered without the coupon relating to such date for payment of interest. Definitive Bearer Notes will be exchangeable for definitive Bearer Notes in other authorized denominations, in an equal aggregate principal amount, in accordance with the provisions of the Fiscal Agency Agreement and at the offices of any Paying Agent outside the United States appointed by the Issuer for such purpose. See “Registrars, Transfer Agents, Calculation Agent and Authenticating Agent” below.

Registered Notes will be exchangeable for Registered Notes in other authorized denominations, in an equal aggregate principal amount upon surrender of any such Notes to be exchanged at the offices of the Registrar or any transfer agent designated by the Issuer for such purpose. Registered Notes will not be exchangeable for Bearer Notes. Registered Notes may be presented for registration of transfer at the offices of the Registrar or any transfer agent designated by the Issuer and for such purpose. See “Registrars, Transfer Agents, Calculation Agent and Authenticating Agent” below. No service charge will be made for any registration of transfer or exchange of Notes but the Issuer may require payment of a sum sufficient to cover any transfer taxes payable in connection therewith. Except as described above, Bearer Notes and any coupons appertaining thereto will be transferable by delivery. See “Forms of Notes—Bearer Notes” above.

The Issuer shall not be required (i) to register the transfer of or exchange Notes to be redeemed for a period of fifteen calendar days preceding the first publication of the relevant notice of redemption, or if Registered Notes are outstanding and there is no publication, the mailing of the relevant notice of redemption, (ii) to register the transfer of or exchange any Registered Note selected for redemption or surrendered for optional repayment, in whole or in part, except the unredeemed or unpaid portion of any such Registered Note being redeemed or repaid, as the case may be, in part, (iii) to exchange any Bearer Note selected for redemption or surrendered for optional repayment, except that such Bearer Note may be exchanged for a Registered Note of like tenor, provided that such Registered Note shall be simultaneously surrendered for redemption or repayment, as the case may be, or (iv) to register transfer of or exchange any Notes surrendered for optional repayment, in whole or in part.

Payments and Paying Agents

Pursuant to the Fiscal Agency Agreement, the Issuer has initially designated Citibank, N.A., London Branch, as its paying agent (in such capacity and including any successor paying agent appointed thereunder, the “**Paying Agent**,” and together with any other paying agents appointed by the Issuer, the “**Paying Agents**”).

Principal and premium, if any, and interest, if any, payable on a Bearer Note represented by a temporary global Note or any portion thereof in respect of an Interest Payment Date will be paid in the Specified Currency (unless otherwise specified in the applicable Final Terms) by the relevant Paying Agent to each of Euroclear and Clearstream, Luxembourg, as the case may be, with respect to that portion of such temporary global Note held for its account (upon presentation to the Paying Agent of the temporary global Note) and, in the case of a Note to which the TEFRA D Rules have been specified to apply, upon delivery of an Ownership Certificate signed by Euroclear or Clearstream, Luxembourg, as the case may be, dated no earlier than such Interest Payment Date, which certificate must be based on Ownership Certificates provided to Euroclear or Clearstream, Luxembourg, as the case may be, by its member organizations. Each of Euroclear and Clearstream, Luxembourg, as the case may be, will in such circumstances credit any principal and interest received by it in respect of such temporary global Note or any portion thereof to the accounts of the beneficial owners thereof.

Principal and premium, if any, and interest, if any, payable on a Bearer Note represented by a permanent global Note in respect of an Interest Payment Date will be paid in the Specified Currency (unless otherwise specified in the applicable Final Terms) by the relevant Paying Agent to each of Euroclear and Clearstream, Luxembourg, as the case may be, with respect to that portion of such permanent global Note held for its account (upon presentation to the Paying Agent of the permanent global Note). Each of Euroclear and Clearstream, Luxembourg will in such circumstances credit any principal and interest received by it in respect of such permanent global Note to the respective accounts of the beneficial owners of such permanent global Note at maturity, redemption or repayment or on such Interest Payment Date, as the case may be. If a Registered Note is issued in exchange for a permanent global Note after the close of business at the office or agency where such exchange occurs (a) on or after any Regular Record Date and before the opening of business at such office or agency on the relevant Interest Payment Date, or (b) on or after any Special Record Date and before the opening of business at such office or agency on the related proposed date for payment of defaulted interest, any interest or defaulted interest, as the case may be, will not be payable on such Interest

Payment Date or proposed date for payment, as the case may be, in respect of such Registered Note, but will be payable on such Interest Payment Date or proposed date for payment, as the case may be, only to Euroclear and Clearstream, Luxembourg, and Euroclear and Clearstream, Luxembourg will in such circumstances credit any such interest to the account of the beneficial owner of such permanent global Note on such Regular Record Date or Special Record Date, as the case may be. Payment of principal and of premium, if any, and any interest due at maturity, redemption or repayment (in the event, with respect to payment of interest, that any such maturity date or redemption or repayment date is other than an Interest Payment Date) in respect of any permanent global Note will be made to Euroclear and Clearstream, Luxembourg in immediately available funds.

Payments of principal and of premium, if any, and interest on definitive Bearer Notes will be made in immediately available funds in the Specified Currency (unless otherwise specified in the applicable Final Terms), subject to any applicable laws and regulations, only against presentation and surrender of such Note and any coupons at the offices of a Paying Agent outside the United States or, at the option of the holder, by wire transfer of immediately available funds to an account maintained by the payee with a bank located outside the United States if appropriate wire instructions have been received by a Paying Agent not less than 10 calendar days prior to an applicable payment date. No payment with respect to any Bearer Note will be made at any office or agency of the Issuer in the United States or by wire transfer to an account maintained with a bank located in the United States, except as may be permitted under U.S. federal tax laws and regulations then in effect. Notwithstanding the foregoing, payments of principal and of premium, if any, and interest on Bearer Notes denominated and payable in U.S. Dollars will be made at the office of the paying agent of the Issuer, in New York County, The City of New York, if and only if (i) payment of the full amount thereof in U.S. Dollars at all offices or agencies outside the United States is illegal or effectively precluded by exchange controls or other similar restrictions and (ii) such paying agent in New York County, The City of New York, under applicable law and regulations, would be able to make such payment.

Payment of principal and of premium, if any, and interest on Registered Notes at maturity or upon redemption or repayment will be made in immediately available funds in the Specified Currency (unless otherwise specified in the applicable Final Terms) against presentation of such Note at the office of the relevant Paying Agent. Payment of interest on Registered Notes will be made to the person in whose name such Note is registered at the close of business on the Regular Record Date next preceding the Interest Payment Date by wire transfer to an account selected by the person entitled thereto if appropriate wire instructions have been received by the relevant Paying Agent not less than 10 calendar days prior to the applicable payment date; provided, however, that (i) if the Issuer fails to pay such interest on such Interest Payment Date, such defaulted interest will be paid to the person in whose name such Note is registered at the close of business on the Special Record Date and (ii) interest payable at maturity, redemption or repayment will be payable to the person to whom principal shall be payable. The first payment of interest on any Registered Note originally issued between a Regular Record Date and an Interest Payment Date will be made on the Interest Payment Date following the next succeeding Regular Record Date to the registered owner on such next Regular Record Date.

Interest rates and interest rate formulae are subject to change by the Issuer from time to time but no such change will affect any Note theretofore issued. Unless otherwise specified in the applicable Final Terms, the Interest Payment Dates and the Regular Record Dates for Fixed Rate Notes shall be as described below under “Interest and Interest Rates—Fixed Rate Notes.” The Interest Payment Dates for Floating Rate Notes shall be as indicated in the applicable Final Terms and in such Note, and, unless otherwise specified in the applicable Final Terms, each Regular Record Date for a Registered Note will be the calendar day (whether or not a Business Day) next preceding each Interest Payment Date.

Payments of principal, interest and any other amount in respect of the Registered Notes will, in the absence of provision to the contrary, be made to the person shown on the Register on the relevant Record Date (as defined below) as the registered holder of the Registered Notes. None of the Issuer, any Paying and Transfer Agent or the Registrar will have any responsibility or liability for any aspect of the records relating to or payments or deliveries made on account of beneficial ownership interests in the Notes or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests. Payments in respect of Registered Notes represented by global Notes shall be made to the person shown on the Register at the close of business on the first Business Day prior to the Entitlement date (the “**Record Date**”). For definitive Notes, the Record Date shall be considered as the close of business on the fifteenth Business Day before the Entitlement date.

So long as any Notes are listed and/or admitted to trading on or by any stock exchange, competent authority and/or market, there will at all times be a Paying Agent with a specified office in each location, if any, required by the rules and regulations of the relevant stock exchange(s), competent authority(ies) and/or market(s) on or by which such Notes are listed and/or admitted to trading. So long as any Notes are listed and/or admitted to trading on or by any stock exchange, competent authority and/or market and the rules of such stock exchange, competent authority and/or market so require, the Issuer will notify Noteholders in the manner specified under “Notices” below in the event that the Issuer appoints a Paying Agent with respect to such Notes other than the Paying Agents designated as such in this Base Prospectus or in the applicable Final Terms.

All moneys paid by the Issuer to any Paying Agent for the payment of any amounts payable on any Notes which remain unclaimed at the end of three years after such amounts shall have become due and payable shall be repaid to the Issuer and the holders of the Notes shall thereafter look only to the Issuer for payment. The Notes shall become void unless presented for payment within a period of ten years (in the case of principal) and five years (in the case of interest) after the Relevant Date therefor.

“**Entitlement**” is defined to include any distribution of cash or securities, being the payment due date, as determined by the issue specific terms, for cash or the settlement date for securities.

“**Relevant Date**” means the date on which such payment first becomes due, except that, if the full amount of moneys payable has not been duly received by the Fiscal Agent on or prior to such due date, it means the date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the holders of the Notes as described under “Notices” below.

Registrars, Transfer Agents, Calculation Agent and Authenticating Agent

Pursuant to the Fiscal Agency Agreement, the Issuer has initially designated Citibank, N.A., London Branch, as registrar in respect of the Regulation S Global Notes which are deposited with a common depositary for, and registered in the name of a common nominee of Euroclear or Clearstream (in such capacity and including any successor registrar appointed thereunder, the “**Registrar**” and together with any other registrar appointed by the Issuer, the “**Registrars**”). The Issuer has initially designated Citibank, N.A., London Branch, as transfer agent in respect of the Notes (in such capacity and including any successor transfer agent appointed thereunder, the “**Transfer Agent**” and together with any other transfer agent appointed by the Issuer, the “**Transfer Agents**”) (and the Transfer Agents together with the Registrars, the Paying Agents and the Calculation Agents, the “**Agents**” and each an “**Agent**”). For so long as any Notes are listed and/or admitted to trading on or by any stock exchange, competent authority and/or market, the Issuer will maintain a Transfer Agent with a specified office in each location required by the rules and regulations of the relevant stock exchange, competent authority and/or market. Any initial designation by the Issuer of the Registrar or a Transfer Agent may be rescinded at any time. The Issuer may at any time designate additional Transfer Agents with respect to the Notes. So long as any Notes are listed and/or admitted to trading on or by any stock exchange, competent authority and/or market and the rules of such stock exchange, competent authority and/or market so require, the Issuer will notify Noteholders in the manner specified under “Notices” below in the event that the Issuer appoints a Registrar or Transfer Agent with respect to such Notes other than the Registrar and Transfer Agent designated as such in this Base Prospectus or in the applicable Final Terms.

Pursuant to the Fiscal Agency Agreement and unless otherwise specified in the applicable Final Terms, the Issuer has also initially designated (i) Citibank, N.A., London Branch, as calculation agent in respect of the Notes (in such capacity and including any successor calculation agent appointed thereunder, the “**Calculation Agent**”), and (ii) Citibank, N.A., London Branch, as authenticating agent (the “**Authenticating Agent**”). For the avoidance of doubt, the Fiscal and Paying Agent shall itself authenticate any Notes registered in the name of a nominee for a common depositary for Euroclear and Clearstream, Luxembourg.

Optional Redemption

Each applicable Final Terms will indicate either that the relevant Tranche of Notes of a Series cannot be redeemed prior to maturity (other than as provided under “—Redemption Prior to Maturity Solely for Taxation Reasons” below) or that the Notes will be redeemable at the option of the Issuer, and such Final Terms shall specify the price at which such Notes are to be redeemed (which price shall in no event be less than 100% of the outstanding

principal amount of the Notes to be redeemed), including, but not limited to, any USD Make Whole Amount or Non-USD Make Whole Amount, in each case as defined below, and specify the relevant date upon which such Notes will be so redeemed (each such date, an “**Issuer Optional Redemption Date**”); provided, however, that Notes denominated in currencies other than U.S. Dollars may be subject to different restrictions on redemption as set forth under “Special Provisions Relating to Foreign Currency Notes—Minimum Denominations, Restrictions on Maturities, Repayment and Redemption” herein. In particular, each applicable Final Terms may indicate that the relevant Tranche of Notes of a Series may be redeemed at the option of the Issuer at a fixed redemption price plus accrued and unpaid interest to the applicable Issuer Optional Redemption Date, at any time and from time to time on or after a date set forth in such Final Terms (such date, the “**First Call Date**”).

Notice of any redemption to holders of Bearer Notes shall be published as described under “Notices” below once in each of three successive calendar weeks, the first publication to be not less than 30 nor more than 60 calendar days prior to the Issuer Optional Redemption Date.

Notice of any redemption of Registered Notes will be mailed or electronically delivered (or otherwise transmitted in accordance with the applicable depositary’s procedures) at least 10 days but not more than 60 days before the redemption date to each holder of Notes to be redeemed. The Issuer will give the notice in the manner described below in “— Notices.”

Optional Redemption by Issuer in Foreign Currency

The “**Non-USD Make Whole Amount**” per Note shall be an amount equal to the greater of (i) 100% of the principal amount of the Notes and (ii) the sum of the present values of the remaining scheduled payments of principal and interest thereon through the Maturity Date or the First Call Date, if applicable (exclusive of interest accrued to the date of redemption) discounted to the redemption date on a semiannual basis (assuming a 360-day year consisting of twelve 30-day months) at the Benchmark Yield plus an amount of basis points to be specified in the applicable Final Terms, plus, in each case, accrued interest thereon to the date of redemption and any Additional Amounts payable with respect thereto. The “**Benchmark Yield**” shall be the yield to maturity at the Redemption Calculation Date of a benchmark security selected by the Issuer with a constant maturity (as compiled and published in a publicly available source of market data selected by the Issuer) most nearly equal to the period from the Issuer Optional Redemption Date to the Maturity Date (or to the First Call Date, if applicable); provided, however, that if the period from the Issuer Optional Redemption Date to the Maturity Date (or to the First Call Date, if applicable) is not equal to the constant maturity of such benchmark security for which a weekly average yield is given, the Benchmark Yield shall be obtained by a linear interpolation (calculated to the nearest one-twelfth of a year) from the weekly average yields of such benchmark security for which such yields are given, except that if the period from the Issuer Optional Redemption Date to the Maturity Date (or to the First Call Date, if applicable) is less than one year, the weekly average yield on such actually traded benchmark security adjusted to a constant maturity of one year shall be used.

“**Redemption Calculation Date**” means the sixth Business Day prior to the date on which the Notes are redeemed pursuant to this section (“**Optional Redemption—Optional Redemption by Issuer in Foreign Currency**”).

Optional Redemption by Issuer in USD

The “**USD Make Whole Amount**” per Note shall be an amount equal to the greater of:

(1) (a) the sum of the present values of the remaining scheduled payments of principal and interest on the Notes being redeemed discounted to the redemption date (assuming the Notes matured on the First Call Date) on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the Treasury Rate plus the USD Make Whole Premium less (b) interest accrued to the date of redemption, and

(2) 100% of the principal amount of the Notes to be redeemed,

plus, in either case, accrued and unpaid interest thereon to the redemption date and any Additional Amounts payable with respect thereto.

On or after the First Call Date, the Issuer may redeem the Notes, in whole or in part, at any time and from time to time, at a redemption price equal set forth in the Final Terms plus accrued and unpaid interest thereon to the redemption date.

“**Treasury Rate**” means, with respect to any redemption date, the yield determined by the Issuer in accordance with the following two paragraphs:

The Treasury Rate shall be determined by the Issuer after 4:15 p.m., New York City time (or after such time as yields on U.S. government securities are posted daily by the Board of Governors of the Federal Reserve System), on the third business day preceding the redemption date based upon the yield or yields for the most recent day that appear after such time on such day in the most recent statistical release published by the Board of Governors of the Federal Reserve System designated as “Selected Interest Rates (Daily) - H.15” (or any successor designation or publication) (“**H.15**”) under the caption “U.S. government securities–Treasury constant maturities–Nominal” (or any successor caption or heading) (“**H.15 TCM**”). In determining the Treasury Rate, the Issuer shall select, as applicable: (1) the yield for the Treasury constant maturity on H.15 exactly equal to the period from the redemption date to the First Call Date (the “**Remaining Life**”); or (2) if there is no such Treasury constant maturity on H.15 exactly equal to the Remaining Life, the two yields – one yield corresponding to the Treasury constant maturity on H.15 immediately shorter than and one yield corresponding to the Treasury constant maturity on H.15 immediately longer than the Remaining Life – and shall interpolate to the First Call Date on a straight-line basis (using the actual number of days) using such yields and rounding the result to three decimal places; or (3) if there is no such Treasury constant maturity on H.15 shorter than or longer than the Remaining Life, the yield for the single Treasury constant maturity on H.15 closest to the Remaining Life. For purposes of this paragraph, the applicable Treasury constant maturity or maturities on H.15 shall be deemed to have a maturity date equal to the relevant number of months or years, as applicable, of such Treasury constant maturity from the redemption date.

If on the third business day preceding the redemption date H.15 TCM is no longer published, the Issuer shall calculate the Treasury Rate based on the rate per annum equal to the semi-annual equivalent yield to maturity at 11:00 a.m., New York City time, on the second business day preceding such redemption date of the United States Treasury security maturing on, or with a maturity that is closest to, the First Call Date, as applicable. If there is no United States Treasury security maturing on the First Call Date but there are two or more United States Treasury securities with a maturity date equally distant from the First Call Date, one with a maturity date preceding the First Call Date and one with a maturity date following the First Call Date, the Issuer shall select the United States Treasury security with a maturity date preceding the First Call Date. If there are two or more United States Treasury securities maturing on the First Call Date or two or more United States Treasury securities meeting the criteria of the preceding sentence, the Issuer shall select from among these two or more United States Treasury securities the United States Treasury security that is trading closest to par based upon the average of the bid and asked prices for such United States Treasury securities at 11:00 a.m., New York City time. In determining the Treasury Rate in accordance with the terms of this paragraph, the semi-annual yield to maturity of the applicable United States Treasury security shall be based upon the average of the bid and asked prices (expressed as a percentage of principal amount) at 11:00 a.m., New York City time, of such United States Treasury security, and rounded to three decimal places.

The Issuer’s actions and determinations in determining the redemption price shall be conclusive and binding for all purposes, absent manifest error.

On and after the redemption date, interest on the Notes or any portion of the Notes called for redemption will cease to accrue (unless the Issuer defaults in the payment of the redemption price and accrued interest). On or before the redemption date, the Issuer will deposit with the relevant Paying Agent funds sufficient to pay the redemption price and accrued interest, through the redemption date, on the Notes subject to redemption. If the redemption date falls after a record date but on or prior to the corresponding interest payment date, the Issuer will pay accrued interest to the holder of record on the corresponding record date, which may or may not be the person who will receive payment of the redemption price (which will exclude such accrued interest). In the case of a partial redemption, selection of the Notes for redemption will be made pro rata, by lot or by such other method as the Issuer in its sole discretion deems appropriate and fair, provided, however, that for so long as the Notes are held by Euroclear or Clearstream (or another depository), the redemption of the Notes shall be done in accordance with the policies and procedures of the applicable depository. If any Note is to be redeemed in part only, the notice of redemption that relates to the Note will state the portion of the principal amount of the Note to be redeemed. A new Note in a principal amount equal to the unredeemed

portion of the Note will be issued in the name of the holder of the Note upon surrender for cancellation of the original Note.

Repurchase

The Issuer may at any time purchase Notes at any price in the open market or otherwise.

Redemption Prior to Maturity Solely for Taxation Reasons

The Issuer may at its election, subject to applicable Chilean law, redeem any Series of the Notes in whole, but not in part, upon giving not less than 10 nor more than 60 days' written notice to the holders of the Notes of such Series, at their principal amount outstanding, plus Additional Amounts (as defined in "Payment of Additional Amounts"), if any, together with accrued but unpaid interest to the date fixed for redemption, if the Issuer certifies to the Fiscal and Paying Agent and any other relevant Paying Agent immediately prior to the giving of such notice that (A) the Issuer has or will become obligated to pay Additional Amounts with respect to such Series (in excess of the 4.0% withholding tax payable on payments of interest on such Series) as a result of any change in or amendment to the laws, regulations or rulings of a Relevant Taxing Jurisdiction (as defined below), or any change in the application, administration or official interpretation of such laws, regulations or rulings, or any execution of, or amendment to, any treaty or treaties affecting taxation to which a Relevant Taxing Jurisdiction is a party, which change or amendment occurs after the later of the date of issuance of such Series and the date a Relevant Taxing Jurisdiction becomes a Relevant Taxing Jurisdiction, and (B) the Issuer has determined in good faith that such obligation cannot be avoided by the Issuer taking reasonable measures available to the Issuer; provided, however, that no such notice of redemption shall be given earlier than 60 days prior to the earliest date on which the Issuer would be obligated to pay such Additional Amounts if a payment in respect of any such Series were then due. For the avoidance of doubt, a reasonable measure shall not include changing the Issuer's jurisdiction of organization or the location of its principal executive office or incurring any cost or expense that the Issuer deems in good faith to be material.

Before giving notice of redemption, the Issuer shall deliver to the Fiscal and Paying Agent and any other relevant Paying Agent an officers' certificate stating that the Issuer is entitled to effect such redemption in accordance with the terms set forth in the Fiscal Agency Agreement and setting forth in reasonable detail a statement of the facts relating thereto. The statement will be accompanied by a written opinion of counsel to the effect that the Issuer has become obligated to pay the Additional Amounts as a result of a change or amendment described above.

For the avoidance of doubt, none of the Agents shall have any duty to examine or make any determinations with respect to such certificate and opinion.

Interest and Interest Rates

General

Each Note will bear interest at either:

- (a) a fixed rate; or
- (b) a floating rate determined by reference to an Interest Rate Basis, which may be adjusted by a Spread and/or Spread Multiplier (as defined below). Any Floating Rate Note may also have either or both of the following:
 - (i) a maximum interest rate limitation, or ceiling, on the rate at which interest may accrue during any interest period; and
 - (ii) a minimum interest rate limitation, or floor, on the rate at which interest may accrue during any interest period, provided that if no minimum interest rate is specified or if the Final Terms indicate that the minimum interest rate is "not applicable," then the minimum interest rate shall be zero.

The applicable Final Terms will designate:

- (a) a fixed rate per annum, in which case such Notes will be “**Fixed Rate Notes**,” or
- (b) one or more of the following Interest Rate Bases as applicable to such Notes, in which case such Notes will be “**Floating Rate Notes**,”
 - (i) the CD Rate, in which case such Notes will be “**CD Rate Notes**,”
 - (ii) the Commercial Paper Rate, in which case such Notes will be “**Commercial Paper Rate Notes**,”
 - (iii) the Federal Funds Rate, in which case such Notes will be “**Federal Funds Rate Notes**,”
 - (iv) SOFR Arithmetic Mean or SOFR Compound, in which case such Notes will be “**SOFR Notes**,”
 - (v) Term SOFR, in which case such notes will be “**Term SOFR Notes**,”
 - (vi) EURIBOR, in which case such Notes will be “**EURIBOR Notes**,”
 - (vii) SONIA, in which case such Notes will be “**SONIA Rate Notes**,”
 - (viii) the Treasury Rate, in which case such Notes will be “**Treasury Rate Notes**,”
 - (ix) the Prime Rate, in which case such Notes will be “**Prime Rate Notes**,” or
 - (x) such other Interest Rate Basis or formula as is set forth in such Final Terms.

Each Note will bear interest from its date of issue or from the most recent date to which interest on such Note has been paid or duly provided for, at the annual rate, or at a rate determined pursuant to an interest rate formula, stated in the Final Terms. Interest will accrue on a Note until the principal thereof is paid or made available for payment.

Interest will be payable on each Interest Payment Date and at maturity or on redemption or repayment, if any, except for:

- (a) certain Original Issue Discount Notes; and
- (b) Notes originally issued between a Regular Record Date and an Interest Payment Date.

The first payment of interest on any Registered Note originally issued between a Regular Record Date and an Interest Payment Date will be made on the Interest Payment Date following the next succeeding Regular Record Date. Such interest will be payable by the Issuer to the registered owner on such next Regular Record Date.

Interest will be payable on a Registered Note on each Interest Payment Date to the person in whose name such Note is registered at the close of business on the Regular Record Date next preceding the Interest Payment Date; provided, however, that:

- (c) if the Issuer fails to pay such interest on such Interest Payment Date, such defaulted interest will be paid to the person in whose name such Registered Note is registered at the close of business on the record date to be established for the payment of defaulted interest; and
- (d) interest payable at maturity, redemption or repayment will be payable to the person to whom principal shall be payable.

Unless otherwise specified in the applicable Final Terms:

- (a) for Fixed Rate Notes, the Interest Payment Dates and any Regular Record Dates shall be as described below under “—Fixed Rate Notes,” and
- (b) for Floating Rate Notes:

- (i) the Interest Payment Dates shall be as indicated in the applicable Final Terms and in such Note; and
- (ii) any Regular Record Date will be the calendar day (whether or not a Business Day) next preceding each Interest Payment Date.

“**Spread**” means the number of basis points expressed as a percentage (one basis point equals one-hundredth of a percentage point) that the Calculation Agent will add or subtract from the related Interest Rate Basis or Bases applicable to a Floating Rate Note.

“**Spread Multiplier**” means the percentage of the related Interest Rate Basis or Bases applicable to a Floating Rate Note by which the Calculation Agent will multiply such Interest Rate Basis or Bases to determine the applicable interest rate on such Floating Rate Note.

Fixed Rate Notes

General. Each Fixed Rate Note will bear interest at the annual rate specified in the Note and in the applicable Final Terms (the “**Fixed Rate of Interest**”). Interest on the Fixed Rate Notes will be paid on the dates specified in the applicable Final Terms (each, a “**Fixed Interest Payment Date**”). The Regular Record Dates for Fixed Rate Notes in registered form will be on the dates specified in the applicable Final Terms. In the event that any Fixed Interest Payment Date or Maturity Date for any Fixed Rate Note is not a Business Day, interest on such Fixed Rate Note will be paid on the next succeeding Business Day without additional interest. If interest is required to be calculated for a period other than a Fixed Interest Period (as defined below), such interest shall be calculated by applying the Fixed Rate of Interest to each specified denomination of the Notes of such Series, multiplying such sum by the applicable Fixed Day Count Fraction, and rounding the resultant figure to the nearest sub-unit of the relevant Specified Currency, half of any such sub-unit being rounded upwards, or otherwise in accordance with applicable market convention.

Day Count Fraction. Unless otherwise indicated in the applicable Final Terms, “**Fixed Day Count Fraction**” means:

- (1) in the case of Notes denominated in a currency other than U.S. Dollars, “**Actual/Actual (ICMA)**,” meaning:
 - (a) in the case of Notes where the number of days in the relevant period from (and including) the most recent Fixed Interest Payment Date (or, if none, the interest commencement date (each such date, the “**Interest Commencement Date**”) (as specified in the applicable Final Terms)) to (but excluding) the relevant payment date (the “**Calculation Period**”) is equal to or shorter than the Determination Period (as defined below) during which the Calculation Period ends, the number of days in such Calculation Period divided by the product of (1) the number of days in such Determination Period and (2) the number of determination dates (each, a “**Determination Date**”) (as specified in the applicable Final Terms) that would occur in one calendar year; or
 - (b) in the case of Notes where the Calculation Period is longer than the Determination Period during which the Calculation Period ends, the sum of:
 - (i) the number of days in such Calculation Period falling in the Determination Period in which the Calculation Period begins divided by the product of (x) the number of days in such Determination Period and (y) the number of Determination Dates (as specified in the applicable Final Terms) that would occur in one calendar year; and
 - (ii) the number of days in such Calculation Period falling in the next Determination Period divided by the product of (x) the number of days in such Determination Period and (y) the number of Determination Dates that would occur in one calendar year; and
- (2) in the case of Notes denominated in U.S. Dollars “30/360,” meaning the number of days in the period from and including the most recent Fixed Interest Payment Date (or, if none, the Interest Commencement Date (as specified in the applicable Final Terms)) to but excluding the relevant payment date (such

number of days being calculated on the basis of a year of 360 days with twelve 30-day months) divided by 360.

Where:

“**Determination Period**” means the period from (and including) a Determination Date to (but excluding) the next Determination Date (including, where either the Interest Commencement Date (as specified in the applicable Final Terms) or the final Fixed Interest Payment Date is not a Determination Date, the period commencing on the first Determination Date prior to, and ending on the first Determination Date falling after, such date).

“**Fixed Interest Period**” means the period from (and including) a Fixed Interest Payment Date (or, if none, the Interest Commencement Date (as specified in the applicable Final Terms)) to (but excluding) the next (or first) Fixed Interest Payment Date.

“**sub-unit**” means, with respect to any currency other than euro, the lowest amount of such currency that is available as legal tender in the country of such currency and, with respect to euro, means one cent.

Floating Rate Notes

General. Floating Rate Notes generally will be issued as described below. Each applicable Final Terms will specify the following terms with respect to which such Floating Rate Note is being delivered:

- (a) whether such Floating Rate Note is a Regular Floating Rate Note, a Floating Rate/Fixed Rate Note or an Inverse Floating Rate Note, each as defined below;
- (b) the Interest Rate Basis or Bases, Initial Interest Rate, Interest Reset Dates, Interest Reset Period, Regular Record Dates (if any) and Interest Payment Dates;
- (c) the Index Maturity;
- (d) the Spread and/or Spread Multiplier, if any; and
- (e) the maximum interest rate and minimum interest rate, if any (provided that, if no minimum interest rate is specified or if the Final Terms indicate that the minimum interest rate is “not applicable,” then the minimum interest rate shall be zero).

The Issuer may change the Spread, Spread Multiplier, Index Maturity and other variable terms of the Floating Rate Notes from time to time. However, no such change will affect any Floating Rate Note previously issued or as to which an offer has been accepted by the Issuer.

The interest rate in effect on each day shall be:

- (a) if such day is an Interest Reset Date, the interest rate determined on the Interest Determination Date immediately preceding such Interest Reset Date; or
- (b) if such day is not an Interest Reset Date, the interest rate determined on the Interest Determination Date immediately preceding the next preceding Interest Reset Date.

Regular Floating Rate Note; Floating Rate/Fixed Rate Note; Inverse Floating Rate Note

The Interest Rate Basis applicable to each Regular Floating Rate Note, Floating Rate/Fixed Rate Note and Inverse Floating Rate Note may be subject to a Spread or Spread Multiplier, provided that the interest rate on an Inverse Floating Rate Note will not be less than zero.

Regular Floating Rate Note. A “**Regular Floating Rate Note**” will bear interest at the rate determined by reference to the applicable Interest Rate Basis. The rate at which interest shall be payable shall be reset as of each Interest Reset Date commencing on the Interest Reset Date. However:

- (a) the interest rate in effect for the period from the Original Issue Date to the Interest Reset Date will be the Initial Interest Rate; and
- (b) the interest rate in effect for the ten calendar days immediately prior to a Maturity Date shall be that in effect on the tenth calendar day preceding such Maturity Date, unless otherwise specified in the applicable Final Terms.

Floating Rate/Fixed Rate Note. A “**Floating Rate/Fixed Rate Note**” will initially bear interest at the rate determined by reference to the applicable Interest Rate Basis. The rate at which interest shall be payable shall be reset as of each Interest Reset Date commencing on the Initial Interest Reset Date. However:

- (a) the interest rate in effect for the period from the Original Issue Date to the Initial Interest Reset Date will be the Initial Interest Rate;
- (b) the interest rate in effect for the 10 calendar days immediately prior to the fixed rate commencement date shall be that in effect on the tenth calendar day preceding the fixed rate commencement date, unless otherwise specified in the applicable Final Terms; and
- (c) the interest rate in effect commencing on, and including, the fixed rate commencement date to the Maturity Date shall be the “**Fixed Interest Rate**,” if such rate is specified in the applicable Final Terms, or if no such Fixed Interest Rate is so specified and the Floating Rate/Fixed Rate Note is still outstanding on such day, the interest rate in effect thereon on the day immediately preceding the fixed rate commencement date.

Inverse Floating Rate Note. An “**Inverse Floating Rate Note**” will bear interest equal to the Fixed Interest Rate specified in the related Final Terms minus the rate determined by reference to the Interest Rate Basis. The rate at which interest is payable shall be reset as of each Interest Reset Date commencing on the Initial Interest Reset Date. However:

- (a) the interest rate in effect for the period from the Original Issue Date to the Interest Reset Date will be the Initial Interest Rate; and
- (b) the interest rate in effect for the ten calendar days immediately prior to a Maturity Date shall be that in effect on the tenth calendar day preceding such Maturity Date, unless otherwise specified in the applicable Final Terms.

Interest Rate Bases

Each Floating Rate Note will have one or more of the following Interest Rate Bases, as specified in the Final Terms:

- (a) the CD Rate;
- (b) the Commercial Paper Rate;
- (c) the Federal Funds Rate;
- (d) SOFR;
- (e) Term SOFR;
- (f) EURIBOR;
- (g) SONIA;
- (h) the Treasury Rate;
- (i) the Prime Rate;
- (j) the lowest of two or more Interest Rate Bases; or
- (k) such other rate specified in the applicable Final Terms.

Date of Interest Rate Change

Unless otherwise specified in the applicable Final Terms, the interest rate on each Floating Rate Note may be reset daily, weekly, monthly, quarterly, semi-annually or annually, as specified in the applicable Final Terms (this period is the “**Interest Reset Period**” and the first day of each Interest Reset Period is the “**Interest Reset Date**”).

If an Interest Reset Date for any Floating Rate Note falls on a day that is not a Business Day, it will be postponed to the following Business Day, except that if that Business Day is in the next calendar month, the Interest Reset Date will be the immediately preceding Business Day.

How Interest Is Calculated

General. Unless otherwise specified in the applicable Final Terms, the Calculation Agent will be the calculation agent for each Series of Floating Rate Notes. Floating Rate Notes will accrue interest from and including the original issue date or the last date to which the Issuer has paid or provided for interest, to but excluding the applicable Interest Payment Date, as described below, or the Maturity Date, as the case may be. However, in the case of Registered Notes that are Floating Rate Notes on which the interest rate is reset daily or weekly, each interest payment will include interest accrued from and including the date of issue or from but excluding the last Regular Record Date on which, unless otherwise specified in the applicable Final Terms, interest has been paid, through and including the Regular Record Date next preceding the applicable Interest Payment Date, and provided further that the interest payments on Floating Rate Notes made on the Maturity Date will include interest accrued to but excluding such Maturity Date.

Day Count Fraction. The amount of interest (the “**Interest Amount**”) payable on any Series of Floating Rate Notes shall be calculated with respect to each specified denomination of such Floating Rate Notes of such Series for the relevant Interest Reset Period. Each Interest Amount shall be calculated by applying the relevant Interest Rate Basis, Spread and/or Spread Multiplier to each specified denomination and multiplying such sum by the applicable Floating Day Count Fraction.

“**Floating Day Count Fraction**” means, in respect of the calculation of the Interest Amount for any Interest Reset Period:

- (a) if “**Actual/Actual**” or “**Actual/Actual (ISDA)**” is specified in the applicable Final Terms, the actual number of days in the Interest Reset Period divided by 365 (or, if any portion of that Interest Reset Period falls in a leap year, the sum of (A) the actual number of days in that portion of the Interest Reset Period falling in a leap year divided by 366 and (B) the actual number of days in that portion of the Interest Reset Period falling in a non-leap year divided by 365);
- (b) if “**Actual/365 (Fixed)**” is specified in the applicable Final Terms, the actual number of days in the Interest Reset Period divided by 365;
- (c) if “**Actual/360**” is specified in the applicable Final Terms, the actual number of days in the Interest Reset Period divided by 360;
- (d) if “**30/360**,” “**360/360**” or “**Bond Basis**” is specified in the applicable Final Terms, the number of days in the Interest Reset Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y2 - Y1)] + [30 \times (M2 - M1)] + (D2 - D1)}{360}$$

where:

“Y1” is the year, expressed as a number, in which the first day of the Interest Reset Period falls;

“Y2” is the year, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“M1” is the calendar month, expressed as a number, in which the first day of the Interest Reset Period falls;

“M2” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“D1” is the first calendar day, expressed as a number, of the Interest Reset Period, unless such number is 31, in which case D1 will be 30; and

“D2” is the calendar day, expressed as a number, immediately following the last day included in the Interest Reset Period, unless such number would be 31 and D1 is greater than 29, in which case D2 will be 30;

- (e) if “**30E/360**” or “Eurobond Basis” is specified in the applicable Final Terms, the number of days in the Interest Reset Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y2 - Y1)] + [30 \times (M2 - M1)] + (D2 - D1)}{360}$$

where:

“Y1” is the year, expressed as a number, in which the first day of the Interest Reset Period falls;

“Y2” is the year, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“M1” is the calendar month, expressed as a number, in which the first day of the Interest Reset Period falls;

“M2” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“D1” is the first calendar day, expressed as a number, of the Interest Reset Period, unless such number would be 31, in which case D1 will be 30; and

“D2” is the calendar day, expressed as a number, immediately following the last day included in the Interest Reset Period, unless such number would be 31, in which case D2 will be 30; and

- (f) if “**30E/360 (ISDA)**” is specified in the applicable Final Terms, the number of days in the Interest Reset Period divided by 360, calculated on a formula basis as follows:

$$\text{Day Count Fraction} = \frac{[360 \times (Y2 - Y1)] + [30 \times (M2 - M1)] + (D2 - D1)}{360}$$

where:

“Y1” is the year, expressed as a number, in which the first day of the Interest Reset Period falls;

“Y2” is the year, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“M1” is the calendar month, expressed as a number, in which the first day of the Interest Reset Period falls;

“M2” is the calendar month, expressed as a number, in which the day immediately following the last day of the Interest Reset Period falls;

“D1” is the first calendar day, expressed as a number, of the Interest Reset Period, unless (i) that day is the last day of February or (ii) such number would be 31, in which case D1 will be 30; and

“D2” is the calendar day, expressed as a number, immediately following the last day included in the Interest Reset Period, unless (i) that day is the last day of February but not the Maturity Date or (ii) such number would be 31, in which case D2 will be 30.

Unless otherwise specified in the applicable Final Terms, the Day Count Fraction in respect of the calculation of the Interest Amount on any Floating Rate Note will (a) in the case of a Note denominated in U.S. Dollars be Actual/360 or (b) in the case of a Note denominated in any other Specified Currency be Actual/Actual. Notes for which the interest rate may be calculated with reference to two or more Interest Rate Bases will be calculated in each period by selecting one such Interest Rate Basis for such period. For these calculations, the interest rate in effect on any Interest Reset Date will be the new reset rate.

The Calculation Agent will round all percentages resulting from any calculation of the rate of interest on a Floating Rate Note, to the nearest 1/100,000 of 1% (0.0000001), with five one-millionths of a percentage point rounded upward (e.g., 9.876545% (or 0.09876545) would be rounded to 9.87655% (or 0.0987655)) and the Calculation Agent will round all currency amounts used in or resulting from any calculation to the nearest one-hundredth of a unit (with 0.005 of a unit being rounded upward).

The Calculation Agent will promptly, and no later than the fourth Business Day following the Interest Determination Date, notify the Fiscal Agent and the Issuer of each determination of the interest rate. The Calculation Agent will also notify the relevant stock exchange, competent authority and/or market (in the case of Notes that are listed or admitted to trading on or by a stock exchange, competent authority and/or market) and the relevant Paying Agents of the interest rate, the interest amount, the interest period and the Interest Payment Date related to each Interest Reset Date as soon as such information is available, and no later than the first Business Day of the interest period. The relevant Paying Agents will make such information available to the holders of Notes. The Issuer will, upon the request of the holder of any Floating Rate Note, provide the interest rate then in effect and, if determined, the interest rate which will become effective as a result of a determination made with respect to the most recent Interest Determination Date relating to such Note.

So long as any Notes are listed on or by any stock exchange, competent authority and/or market and the rules of such stock exchange(s), competent authority(ies) and/or market(s) so require, the Issuer shall maintain a calculation agent for the Notes, and the Issuer will notify Noteholders in the manner specified under “Notices” below in the event that the Issuer appoints a calculation agent with respect to such Notes other than the Calculation Agent or the calculation agent designated as such in the applicable Final Terms.

When Interest Is Paid

The Issuer will pay interest on Floating Rate Notes on the dates specified in the applicable Final Terms. For purposes of this Base Prospectus, unless otherwise specified in the applicable Final Terms, “**Interest Payment Date**” means each date upon which the Issuer is required to pay interest and ending on the Maturity Date or, if the Issuer elects to redeem the notes on the Issuer Optional Redemption Date, the Issuer Optional Redemption Date.

If an Interest Payment Date (other than the Maturity Date) for a Floating Rate Note falls on a day that is not a Business Day, the Issuer will postpone payment of interest to the following Business Day at which time the Issuer will pay additional interest that has accrued up to but excluding such following Business Day, except that if that Business Day would fall in the next calendar month, the Interest Payment Date will be the immediately preceding Business Day.

If the Maturity Date for a Floating Rate Note falls on a day that is not a Business Day, the Issuer will make the payment on the next Business Day, without additional interest.

Date of Interest Rate Determination

The interest rate for each Interest Reset Period commencing on the Interest Reset Date will be the rate determined on the relevant “**Interest Determination Date**” for such Interest Reset Date for the relevant type of Floating Rate Note, as set forth in the applicable Final Terms; provided that for SOFR Notes, the “Interest Determination Date” means the date that is the number of U.S. Government Securities Business Days before each Interest Payment Date as specified in the applicable Final Terms.

Additional Definitions Relating to Certain Floating Rate Notes

In connection with certain Floating Rate Notes, unless the applicable Final Terms specifies otherwise, the following definitions apply:

“**H.15**” means the daily statistical release published by the Board of Governors of the United States Federal Reserve System, or its successor, designated as “Selected Interest Rates (Daily) - H.15”, available through the website of the Board of Governors of the United States Federal Reserve System at <https://www.federalreserve.gov/releases/h15/>, or any successor site or publication.

“**Interest Period**” means applicable period from, and including, an Interest Payment Date (or, in the case of the first Interest Period, the Interest Commencement Date) to, but excluding, the next Interest Payment Date (or, in the case of the final Interest Period, the Maturity Date or, if the Issuer elects to redeem the notes on the Issuer Optional Redemption Date, the Issuer Optional Redemption Date).

“**Money Market Yield**” means a yield (expressed as a percentage) calculated in accordance with the following formula:

$$\text{Money Market Yield} = \frac{D \times 360 \times 100}{360 - (D \times M)}$$

where “D” refers to the applicable per annum rate for commercial paper quoted on a bank discount basis and expressed as a decimal, and “M” refers to the actual number of days in the period for which interest is being calculated.

Types of Floating Rate Notes

CD Rate Notes

Unless the applicable Final Terms specifies otherwise, each CD Rate Note will bear interest at a specified rate that will be reset periodically based on the CD Rate and any Spread and/or Spread Multiplier.

“**CD Rate**” means, with respect to any Interest Determination Date, the rate on that Interest Determination Date for negotiable certificates of deposit having the specified Index Maturity as published in H.15 under the heading “**CDs (secondary market)**.”

The following procedures will apply if the rate cannot be set as described above:

- (a) If the rate is not published in H.15 prior to 3:00 p.m., New York City time, on the Interest Determination Date, then the CD Rate will be the rate for negotiable certificates of deposit having the specified Index Maturity as published in H.15, or such other recognized electronic source used for the purpose of displaying such rate, under the caption “**CDs (secondary market)**.”
- (b) If the rate is not yet published in H.15 or another recognized electronic source by 3:00 p.m., New York City time, on the Interest Determination Date, the CD Rate will be the average of the secondary market offered rates, as of 10:00 a.m., New York City time, of three leading non-bank dealers of negotiable U.S. Dollar certificates of deposit in The City of New York selected by the Issuer for negotiable certificates of deposit of major money market banks with a remaining maturity closest to the specified Index Maturity in a denomination of U.S.\$5,000,000.

- (c) If fewer than three dealers are providing quotes, the rate will be the same as the rate used in the prior interest period.

Commercial Paper Rate Notes

Unless the applicable Final Terms specifies otherwise, each Commercial Paper Rate Note will bear interest at a specified rate that will be reset periodically based on the Commercial Paper Rate and any Spread and/or Spread Multiplier, if any, specified in the applicable Final Terms.

“Commercial Paper Rate” means, with respect to any Interest Determination Date, unless otherwise specified in any applicable Final Terms, the Money Market Yield of the rate on that Interest Determination Date for commercial paper having the specified Index Maturity as published in H.15 under the heading **“Commercial Paper—Nonfinancial.”**

If the Commercial Paper Rate cannot be determined as described above, the following procedures will apply:

- (a) If the rate is not published in H.15 or another recognized electronic source by 3:00 p.m., New York City time, on the Interest Determination Date, the Commercial Paper Rate will be the Money Market Yield of the average for the offered rates, as of 11:00 a.m., New York City time, on that Interest Determination Date, of three leading dealers of commercial paper in The City of New York selected by the Issuer for commercial paper having the specified Index Maturity placed for an industrial issuer whose bond rating is “AA,” or the equivalent, by a nationally recognized rating agency.
- (b) If fewer than three dealers are providing quotes, the Commercial Paper Rate for the new interest period will be the Commercial Paper Rate in effect for the prior interest period.

Federal Funds Rate Notes

Unless the applicable Final Terms specifies otherwise, each Federal Funds Rate Note will bear interest at a specified rate that will be reset periodically based on the Federal Funds Rate and any Spread and/or Spread Multiplier, if any, specified in the applicable Final Terms.

“Federal Funds Rate” means, with respect to any Interest Determination Date unless otherwise specified in any applicable Final Terms, the rate on specified dates for federal funds published in H.15 prior to 11:00 a.m., New York City time, under the heading **“Federal Funds (Effective),”** as such rate is displayed on Reuters Screen FEDFUNDS1 Page (or any such other page as specified in the applicable Final Terms).

If the Federal Funds Rate cannot be determined as described above, the following procedures will apply:

- (a) If the rate does not appear on Reuters Screen FEDFUNDS1 Page (or any other pages as may replace such pages on such service) at 3:00 p.m., New York City time, on the Interest Determination Date, then the Federal Funds Rate will be the rate on such Interest Determination Date published in H.15, or such other recognized electronic source used for the purpose of displaying such rate, under the caption **“Federal Funds (Effective).”**
- (b) If the rate does not appear on Reuters Screen FEDFUNDS1 Page (or any other pages as may replace such pages on such service) or is not published in H.15 or another recognized electronic source by 3:00 p.m., New York City time, on the Interest Determination Date, the Federal Funds Rate will be the average of the rates, as of 11:00 a.m., New York City time, on that Interest Determination Date, for the last transaction in overnight federal funds arranged by three leading brokers of federal funds transactions in The City of New York selected by the Issuer.
- (c) If fewer than three dealers are providing quotes, the Federal Funds Rate in effect for the new interest period will be the Federal Funds Rate in effect for the prior interest period.

SOFR Notes

Unless the applicable Final Terms specifies otherwise, each SOFR Note will bear interest at a specified rate that will be reset periodically based on SOFR Arithmetic Mean or SOFR Compound (or any applicable Benchmark Replacement), in each case plus the Spread and/or Spread Multiplier (if any, as specified in the applicable Final Terms), subject to the Benchmark Replacement Provisions specified below. To the extent the provisions below relating to SOFR Notes are inconsistent with the description of Floating Rate Notes described elsewhere in this Base Prospectus, the provisions below shall prevail.

- (a) If SOFR Arithmetic Mean (“**SOFR Arithmetic Mean**”) is specified as applicable in the applicable Final Terms, the rate of interest for each interest period shall be based on the arithmetic mean of the SOFR rates for each day during the period, as calculated by the Calculation Agent, where the SOFR rate on the SOFR Rate Cut-Off Date shall be used for the days in the period from and including the SOFR Rate Cut-Off Date to but excluding the Interest Payment Date. For these purposes, SOFR in respect of any calendar day which is not a U.S. Government Securities Business Day shall be deemed to be SOFR in respect of the U.S. Government Securities Business Day immediately preceding such calendar day.
- (b) If SOFR Compound (“**SOFR Compound**”) is specified in the applicable Final Terms, the rate of interest for each interest period shall be based on the value of the SOFR rates for each day during the period, compounded daily, as calculated by the Calculation Agent. Where SOFR Compound is not specified in the applicable Final Terms, the SOFR Rate Cut-Off Date (as defined below) shall be the number of U.S. Government Securities Business Days specified in the Final Terms prior to the Interest Payment Date in respect of the relevant Interest Period.
- (c) In connection with the SOFR Compound definition above, one of the following formulas will be specified in the applicable Final Terms:

- (i) *SOFR Compound with Lookback*

$$\left[\left(\prod_{i=1}^{d_0} \left(1 + \frac{SOFR_{i-xUSBD} \times n_i}{360} \right) - 1 \right) \times \frac{360}{d} \right]$$

where:

“**d**” means the number of calendar days in the relevant Interest Period;

“**d₀**” for any interest period, means the number of U.S. Government Securities Business Days in the relevant Interest Period;

“**i**” means a series of whole numbers from one to **d₀**, each representing the relevant U.S. Government Securities Business Days in chronological order from, and including, the first U.S. Government Securities Business Day in the relevant Interest Period;

“**x**” means the lookback number of U.S. Government Securities Business Days specified in the applicable Final Terms;

“**n_i**” for any U.S. Government Securities Business Day *i*, means the number of calendar days from, and including, such U.S. Government Securities Business Day *i* up to, but excluding, the following U.S. Government Securities Business Day;

“**SOFR_{i-xUSBD}**” means for any U.S. Government Securities Business Day *i* that is a SOFR Interest Reset Date, SOFR in respect of the U.S. Government Securities Business Day falling a number of U.S. Government Securities Business Days prior to that day *i* equal to *x*; provided, however, that where a SOFR Rate Cut-Off Date applies, the SOFR with respect to any SOFR Interest Reset Date in the period from and including, the SOFR Rate Cut-Off Date to, but excluding, the corresponding Interest Payment Date of an interest

period, will be the SOFR with respect to the SOFR Interest Reset Date coinciding with the SOFR Rate Cut-Off Date for such interest period;

(ii) SOFR Compound with Observation Period Shift

$$\left[\left(\prod_{i=1}^{d_0} \left(1 + \frac{SOFR_i \times n_i}{360} \right) - 1 \right) \times \frac{360}{d} \right]$$

where:

“**d**” means the number of calendar days in the relevant Observation Period;

“**d₀**” for any Observation Period, means the number of U.S. Government Securities Business Days in the relevant Observation Period;

“**i**” means a series of whole numbers from one to d₀, each representing the relevant U.S. Government Securities Business Days in chronological order from, and including, the first U.S. Government Securities Business Day in the relevant Observation Period;

“**n_i**” for any U.S. Government Securities Business Day *i* in the relevant Observation Period, means the number of calendar days from, and including, such U.S. Government Securities Business Day *i* up to, but excluding, the following U.S. Government Securities Business Day;

“**Observation Period**” means, in respect of each interest period, the period from, and including, the date that is a number of U.S. Government Securities Business Days equal to the Observation Shift Days preceding the first date in such interest period to, but excluding, the date that is a number of U.S. Government Securities Business Days equal to the number of Observation Shift Days, preceding the Interest Payment Date for such interest period;

“**Observation Shift Days**” means the number of U.S. Government Securities Business Days specified in the applicable Final Terms;

“**SOFR_i**” means for any U.S. Government Securities Business Day *i* in the relevant Observation Period, is equal to SOFR in respect of that day *i*.

(iii) SOFR Compound with Payment Delay

$$\left[\left(\prod_{i=1}^{d_0} \left(1 + \frac{SOFR_i \times n_i}{360} \right) - 1 \right) \times \frac{360}{d} \right]$$

where:

“**d**” means the number of calendar days in the relevant Interest Accrual Period;

“**d₀**” for any Interest Accrual Period, means the number of U.S. Government Securities Business Days in the relevant Interest Accrual Period;

“**i**” means a series of whole numbers from one to d₀, each representing the relevant U.S. Government Securities Business Days in chronological order from, and including, the first U.S. Government Securities Business Day in the relevant Interest Accrual Period;

“**Interest Accrual Periods**” means each period from, and including, an Interest Accrual Period End Date (or in the case of the first Interest Accrual Period, the Interest

Commencement Date) to, but excluding, the next Interest Accrual Period End Date (or, in the case of the final Interest Accrual Period, the Maturity Date or, if the Issuer elects to redeem the notes prior to the Maturity Date, the Redemption Date);

“Interest Accrual Period End Dates” shall have the meaning specified in the applicable Final Terms;

“Interest Payment Dates” shall be the dates occurring the number of Business Days equal to the Interest Payment Delay following each Interest Accrual Period End Date; provided that the Interest Payment Date with respect to the final Interest Accrual Period will be the Maturity Date or, if the Issuer elects to redeem the notes prior to the Maturity Date, the Redemption Date;

“Interest Payment Delay” means the number of U.S. Government Securities Business Days specified in the applicable Final Terms;

“Interest Payment Determination Dates” shall be the Interest Accrual Period End Date at the end of each Interest Accrual Period; provided that the Interest Payment Determination Date with respect to the final Interest Accrual Period will be the SOFR Rate Cut-Off Date;

“ n_i ” for any U.S. Government Securities Business Day i , means the number of calendar days from, and including, such U.S. Government Securities Business Day i up to, but excluding, the following U.S. Government Securities Business Day; and

“SOFR _{i} ” means for any U.S. Government Securities Business Day i that is a SOFR Interest Reset Date, SOFR in respect of this SOFR Interest Reset Date; provided, however, that where a SOFR Rate Cut-Off Date applies, the SOFR with respect to any SOFR Interest Reset Date in the period from and including, the SOFR Rate Cut-Off Date to, but excluding, the corresponding Interest Payment Date of an interest period, will be the SOFR with respect to the SOFR Interest Reset Date coinciding with the SOFR Rate Cut- Off Date for such interest period;

(iv) SOFR Index with Observation Period Shift

“SOFR Index” with respect to any U.S. Government Securities Business Day, means:

(a) the SOFR Index value as published by the SOFR Administrator as such index appears on the SOFR Administrator’s Website at 3:00 p.m. (New York time) on such U.S. Government Securities Business Day (the **“SOFR Index Determination Time”**); provided that:

(b) if a SOFR Index value does not so appear as specified in (1) above at the SOFR Index Determination Time, then:

(i) if a Benchmark Transition Event and its related Benchmark Replacement Date have not occurred with respect to SOFR, then Compounded SOFR shall be the rate determined pursuant to the “SOFR Index Unavailable” provisions; or

(ii) if a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to SOFR, then Compounded SOFR shall be the rate determined pursuant to the “Benchmark Replacement Provisions”.

where:

“SOFR” means the daily secured overnight financing rate as provided by the SOFR Administrator on the SOFR Administrator’s Website.

“SOFR Administrator” means the Federal Reserve Bank of New York (or a successor administrator of SOFR); and

“SOFR Administrator’s Website” means the website of the Federal Reserve Bank of New York, or any successor source.

“Compounded SOFR” with respect to any Interest Period, means the rate computed in accordance with the following formula:

$$\left(\frac{SOFR\ Index_{End}}{SOFR\ Index_{Start}} - 1 \right) \times \left(\frac{360}{d_c} \right)$$

where:

“SOFR Index_{Start}” is the SOFR Index value on the date that is the number of U.S. Government Securities Business Days specified in the applicable Final Terms preceding the first date of the relevant Interest Period;

“SOFR Index_{End}” is the SOFR Index value on the date that is the number of U.S. Government Securities Business Days specified in the applicable Final Terms preceding the Interest Payment Date relating to such Interest Period;

“d_c” means the number of calendar days from (and including) the date of the SOFR Index_{Start} to (but excluding) the date of the SOFR Index_{End} (i.e., the number of calendar days in the applicable Observation Period);

“Observation Period” means, in respect of each interest period, the period from, and including, the date that is a number of U.S. Government Securities Business Days equal to the Observation Shift Days preceding the first date in such interest period to, but excluding, the date that is a number of U.S. Government Securities Business Days equal to the number of Observation Shift Days, preceding the Interest Payment Date for such interest period; and

“Observation Shift Days” means the number of U.S. Government Securities Business Days specified in the applicable Final Terms.

SOFR Index Unavailable: If a SOFR Index_{Start} or SOFR Index_{End} is not published on the associated Interest Determination Date and a Benchmark Transition Event and its related Benchmark Replacement Date have not occurred with respect to SOFR, “Compounded SOFR” means, for the applicable Interest Period for which such index is not available, the rate of return on a daily compounded interest investment calculated in accordance with the formula for SOFR Averages, and definitions required for such formula, published on the SOFR Administrator’s Website at <https://www.newyorkfed.org/markets/treasury-repo-reference-rates-information>. For the purposes of this provision, references in the SOFR Averages compounding formula and related definitions to “calculation period” shall be replaced with “Observation Period” and the words “that is, 30-, 90-, or 180- calendar days” shall be removed. If the daily SOFR (“SOFR_i”) does not so appear for any day, “i” in the Observation Period, SOFR_i for such day “i” shall be SOFR published in respect of the first

preceding U.S. Government Securities Business Day for which SOFR was published
on the SOFR Administrator's Website.

In connection with the definition of SOFR Arithmetic Mean and the SOFR Compound formulas described above, “**SOFR**” means the rate determined by the Calculation Agent, as the case may be, in accordance with the following provisions:

- (a) the Secured Overnight Financing Rate for trades made on the Interest Determination Date corresponding to the related SOFR Interest Reset Date that appears at approximately 3:00 p.m. (New York City time) (the “**SOFR Determination Time**”) on the Federal Reserve Bank of New York’s Website on the immediately following U.S. Government Securities Business Day, as such rate is reported on the Bloomberg Screen SOFRRATE Page for such SOFR Interest Reset Date or, if no such rate is reported on the Bloomberg Screen SOFRRATE Page, then the Secured Overnight Financing Rate that is reported on the Reuters Page USDSOFR= or, if no such rate is reported on the Reuters Page USDSOFR=, then the Secured Overnight Financing Rate that appears at approximately 3:00 p.m. (New York City time) on the Federal Reserve Bank of New York’s Website on such SOFR Interest Reset Date (the “**SOFR Screen Page**”); or
- (b) if the rate specified in (a) above does not so appear, and the Issuer determines that Benchmark Transition Event and its related Benchmark Replacement Date have not occurred, the Secured Overnight Financing Rate published on the Federal Reserve Bank of New York’s Website for the first preceding U.S. Government Securities Business Day for which the Secured Overnight Financing Rate was published on the Federal Reserve Bank of New York’s Website; and
- (c) if we determine on or prior to the relevant SOFR Reference Time, that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to the relevant reference rate, then the provisions set forth in “Benchmark Replacement Provisions” below will thereafter apply to all determinations of the interest rate on the Notes for each interest period during the floating rate period.

In connection with the SOFR provisions above, the following definitions apply:

“**Bloomberg Screen SOFRRATE Page**” means the Bloomberg screen designated “SOFRRATE” or any successor page or service.

“**Reuters Page USDSOFR=**” means the Reuters page designated “USDSOFR=” or any successor page or service.

“**SOFR Interest Reset Date**” means each U.S. Government Securities Business Day in the relevant Interest Period or Observation Period, as the case may be.

“**SOFR Rate Cut-Off Date**” means, if applicable, the date that is the specified U.S. Government Securities Business Day, or such other date as is specified in the applicable Final Terms, prior to the Interest Payment Date in respect of the relevant Interest Period or such other date specified in the applicable Final Terms; for the avoidance of doubt, the SOFR Rate Cut-Off Date can be zero or none, in which case no SOFR Rate Cut-Off Date is applicable.

“**SOFR Reference Time**” means (1) if the reference rate is SOFR Arithmetic Mean or SOFR Compound, the SOFR Determination Time or (2) if the reference rate is not SOFR Arithmetic Mean or SOFR Compound, the time determined by the Issuer or Calculation Agent after giving effect to the Benchmark Replacement Conforming Changes.

“**U.S. Government Securities Business Day**” means any day except for a Saturday, Sunday or a day on which the Securities Industry and Financial Markets Association (SIFMA) recommends that the fixed

income departments of its members be closed for the entire day for purposes of trading in U.S. government securities.

Term SOFR Notes

Unless the applicable Final Terms specifies otherwise, each Term SOFR Note will bear interest at the rates, calculated with reference to Term SOFR, in each case plus the Spread and/or Spread Multiplier (if any, as specified in the applicable Final Terms), subject to the Benchmark Replacement Provisions specified below. To the extent the provisions below relating to Term SOFR Notes are inconsistent with the description of Floating Rate Notes described elsewhere in this Base Prospectus, the provisions below shall prevail.

Unless the applicable Final Terms specifies otherwise, “**Term SOFR**” means, for any Interest Period other than the initial Interest Period, the Term SOFR Reference Rate for a tenor comparable to the applicable Interest Period on the day (such day, the “**Term SOFR Determination Day**”) that is two (2) U.S. Government Securities Business Days prior to the first day of such Interest Period, as such rate is published by the Term SOFR Administrator; *provided, however*, that if as of 5:00 p.m. (New York City time) on any Term SOFR Determination Day the Term SOFR Reference Rate for the applicable tenor has not been published by the Term SOFR Administrator and a Benchmark Replacement Date with respect to the Term SOFR Reference Rate has not occurred, then Term SOFR will be the Term SOFR Reference Rate for such tenor as published by the Term SOFR Administrator on the first preceding U.S. Government Securities Business Day for which such Term SOFR Reference Rate for such tenor was published by the Term SOFR Administrator so long as such first preceding U.S. Government Securities Business Day is not more than three (3) U.S. Government Securities Business Days prior to such Term SOFR Determination Day; *provided, further*, that if Term SOFR determined as provided above shall ever be less than the Floor, then Term SOFR shall be deemed to be the Floor.

In connection with the Term SOFR provisions above, unless the applicable Final Terms specifies otherwise, the following definitions apply:

“**Floor**” means a rate of interest equal to 0%.

“**Term SOFR Administrator**” means CME Group Benchmark Administration Limited (CBA) (or a successor administrator of the Term SOFR Reference Rate selected by the Issuer in its reasonable discretion).

“**Term SOFR Reference Rate**” means the forward-looking term rate based on the SOFR.

“**U.S. Government Securities Business Day**” means any day except for (a) a Saturday, (b) a Sunday or (c) a day on which the Securities Industry and Financial Markets Association recommends that the fixed income departments of its members be closed for the entire day for purposes of trading in United States government securities.

EURIBOR Notes

Unless the applicable Final Terms specifies otherwise, each EURIBOR Note will bear interest at a specified rate that will be reset periodically based on EURIBOR (or any applicable Benchmark Replacement), in each case plus the Spread and/or Spread Multiplier (if any, as specified in the applicable Final Terms), subject to the Benchmark Replacement Provisions specified below.

The following procedures will apply if the rate cannot be set as described above:

- (a) If such rate does not appear on the Designated EURIBOR Page as of 11:00 a.m., Brussels time, on the related Interest Determination Date, then the Issuer will request the principal offices of four major banks in the Euro-zone selected by the Issuer to provide such bank’s offered quotation to prime banks in the Euro-zone interbank market for deposits in Euro having the Index Maturity beginning on the relevant Interest Reset Date as of 11:00 a.m., Brussels time, on such Interest Determination Date and in a representative amount. If at least two quotations are provided, EURIBOR for that date will be the average (if necessary rounded upwards) of the quotations.
- (b) If fewer than two quotations are provided, EURIBOR will be the average (if necessary rounded upwards) of the rates quoted by major banks in the Euro-zone, selected by the Issuer, at approximately 11:00 a.m.,

Brussels time, on the Interest Determination Date for loans in euro to leading European banks for a period of time corresponding to the Index Maturity beginning on the relevant Interest Reset Date and in a representative amount.

- (c) If no rates are quoted by major banks, the rate will be the same as the rate used for the prior interest period.

Notwithstanding any other provision herein, if in the Calculation Agent's opinion, or in the opinion of the other party responsible for the calculation of EURIBOR as specified in the relevant Final Terms, as applicable, there is any uncertainty between two or more alternative courses of action in making any determination or calculation, the Issuer shall promptly notify the Calculation Agent, as applicable, in writing as to which alternative course of action to adopt. If the Calculation Agent, as applicable, is not promptly provided with such direction, or is otherwise unable to make such calculation or determination for any reason, it shall notify the Issuer thereof and the Calculation Agent, as applicable, shall be under no obligation to make such calculation or determination and shall not incur any liability for not doing so.

Notwithstanding any other provision herein, neither the Calculation Agent, the Fiscal Agent or the Paying Agent shall be obliged to concur with the Issuer, in respect of any changes made which, in the sole opinion of the Calculation Agent, the Fiscal Agent or the Paying Agent (as applicable), would have the effect of (i) exposing the Calculation Agent, the Fiscal Agent or the Paying Agent (as applicable) to any liability against which it has not been indemnified and/or secured and/or prefunded to its satisfaction or (ii) increasing the obligations or duties, or decreasing the rights or protections, of the Calculation Agent, the Fiscal Agent or the Paying Agent (as applicable) in the Fiscal Agency Agreement and/or the term and conditions of the Notes.

In connection with the EURIBOR provisions above, the following definitions apply:

"EURIBOR" means the European Interbank Offered Rate and, with respect to each Interest Determination Date, the rate for deposits in euro having the Index Maturity beginning on the relevant Interest Reset Date that appears on the Designated EURIBOR Page as of 11:00 a.m., Brussels time, on that Interest Determination Date.

"Designated EURIBOR Page" means Capital Markets Report Screen EURIBOR01 of Reuters, or any other page as may replace such page on such service.

SONIA Rate Notes

Unless the applicable Final Terms specifies otherwise, each SONIA Rate Note will bear interest at a specified rate equal to Compounded Daily SONIA (as defined below), in each case plus the Spread and/or Spread Multiplier (if any, as specified in the applicable Final Terms) as specified below.

- The rate of interest for each Interest Accrual Period shall, subject as provided below, be Compounded Daily SONIA plus or minus (as indicated in the applicable Final Terms) the Spread.
- If, in respect of any London Banking Day, the applicable SONIA Reference Rate is not available on the Relevant Screen Page or has not otherwise been published by the relevant authorized distributors, then the SONIA Reference Rate in respect of such London Banking Day shall be: (A) (1) the Bank of England's Bank Rate (the **"Bank Rate"**) prevailing at 5:00 PM (or, if earlier, close of business) on such London Banking Day plus (2) the mean of the spread of the SONIA Reference Rate to the Bank Rate over the previous five London Banking Days on which a SONIA Reference Rate has been published, excluding the highest spread (or, if there are more than one highest spread, then only one of those highest spreads) and the lowest spread (or, if there are more than one lowest spread, then only one of those lowest spreads) to the Bank Rate; or (B) if the Bank Rate is not available on the relevant London Banking Day, the most recent SONIA Reference Rate in respect of a London Banking Day.

- Notwithstanding the previous paragraph, in the event the Bank of England publishes guidance as to: (1) how the SONIA Reference Rate is to be determined or (2) any rate that is to replace the SONIA Reference Rate, then the Calculation Agent shall, to the extent that is reasonably practicable and as set forth in a direction from the Issuer in writing, follow such guidance in order to determine the SONIA Reference Rate for any London Banking Day “*i*” for the purposes of the Notes and for so long as the SONIA Reference Rate is not available or has not been published by the relevant authorized distributors.
- If the Notes become due and payable pursuant to an Event of Default, as described under “—Events of Default” below, then the final rate of interest shall be calculated for the Interest Accrual Period to (but excluding) the date on which such Notes become due and payable and such rate of interest on the Notes shall apply for so long as such Notes remain outstanding.

In connection with the SONIA provisions above, one of the following formulas will be specified in the applicable Final Terms:

“**Compounded Daily SONIA**” means, with respect to an Interest Accrual Period, the rate of return of a daily compound interest investment (with the daily SONIA rate as reference rate for the calculation of interest) and will be calculated by the Calculation Agent on the relevant SONIA Interest Determination Date, as follows, and the resulting percentage shall be rounded if necessary to the fifth decimal place (with .000005 being rounded upwards),

(i) Observation Period Shift

$$\left[\prod_{i=1}^{d_o} \left(1 + \frac{r_i \times n_i}{365} \right) - 1 \right] \times \frac{365}{d}$$

where:

“*d*” is, for a relevant Observation Period, the number of calendar days in such Observation Period;

“*d_o*” is, for a relevant Observation Period, the number of Relevant Business Days in such Observation Period;

“*i*” is a series of whole numbers from one to *d_o*, each representing the relevant London Banking Day in chronological order from, and including, the first London Banking Day in the relevant Observation Period;

“*n_i*”, for any London Banking Day “*i*”, means the number of calendar days from and including such London Banking Day “*i*” up to but excluding the following London Banking Day;

“**Observation Period**” means, in respect of a relevant Interest Period, the period from (and including) the date falling “*p*” London Banking Days prior to the first day of such Interest Period to (but excluding) the date which is “*p*” London Banking Days prior to the Interest Payment Date for such Interest Period (or the date falling “*p*” London Banking Days prior to such earlier date, if any, on which the Notes become due and payable);

“*p*”, for any Interest Accrual Period, is the number of London Banking Days included in the Observation Look-Back Period, as specified in the applicable Final Terms, which shall not be specified in the applicable Final Terms as less than five London Banking Days without the prior agreement of the Calculation Agent;

“*r*” means, in respect of any London Banking Day, the applicable SONIA rate in respect of such London Banking Day; and

“ r_i ” means, for any London Banking Day, the applicable SONIA rate as set out in the definition of “ r ” above in respect of such London Banking Day.

(ii) Lag

$$\left[\prod_{i=1}^{d_o} \left(1 + \frac{SONIA_{i-pLBD} \times n_i}{365} \right) - 1 \right] \times \frac{365}{d}$$

where:

“ d ” is the number of calendar days in the relevant Interest Accrual Period,

“ d_o ” is the number of London Banking Days in the relevant Interest Accrual Period,

“ i ” is a series of whole numbers from one to d_o , each representing the relevant London Banking Day in chronological order from, and including, the first London Banking Day in the relevant Interest Accrual Period,

“**Interest Accrual Period**” means: (a) any given interest period or (b) in the event the SONIA Rate Notes become due and payable on a date other than an interest payment date, the period beginning on and including the last interest payment date and ending on but excluding the date on which the relevant payment of interest and principal on the SONIA Rate Notes falls due,

“ n_i ”, for any London Banking Day “ i ”, means the number of calendar days from and including such London Banking Day “ i ” up to but excluding the following London Banking Day,

“Observation Look-Back Period” is as specified in the applicable Final Terms,

“ p ”, for any Interest Accrual Period, is the number of London Banking Days included in the Observation Look-Back Period, as specified in the applicable Final Terms, which shall not be specified in the applicable Final Terms as less than five London Banking Days without the prior agreement of the Calculation Agent;

“**SONIA Reference Rate,**” in respect of any London Banking Day, is a reference rate equal to the daily Sterling Overnight Index Average (“**SONIA**”) rate for such London Banking Day as provided by the administrator of SONIA to authorized distributors and as then published on the Relevant Screen Page or, if the Relevant Screen Page is unavailable, as otherwise published by such authorized distributors, in each case on the London Banking Day immediately following such London Banking Day, and

“**SONIA i -pLBD**” means, in respect of any London Banking Day “ i ”, the SONIA Reference Rate for the London Banking Day falling “ p ” London Banking Days prior to the relevant London Banking Day “ i .”

In connection with the SONIA provisions above, the following definition applies:

“**London Banking Day**” or “**LBD**” means any day on which commercial banks are open for general business (including dealing in foreign exchange and foreign currency deposits) in London.

Treasury Rate Notes

Each Treasury Rate Note will bear interest at a specified rate that will be revised periodically based on the Treasury Rate and any Spread and/or Spread Multiplier, if any, specified in the applicable Final Terms.

Unless the applicable Final Terms specifies otherwise, “**Treasury Rate**” means, with respect to any Interest Determination Date, the rate for the most recent auction of direct obligations of the United States (“**Treasury bills**”) having the specified Index Maturity as it appears under the caption “**INVEST RATE**” on either Reuters Screen

USAUCTION10 Page or Reuters Screen USAUCTION11 Page (or any other pages as may replace such pages on such service).

If the Treasury Rate cannot be determined as described above, the following procedures will apply:

- (a) If the rate is not so published by 3:00 p.m., New York City time, on the Interest Determination Date, the rate will be the auction average rate for such Treasury bills (expressed as a bond equivalent, on the basis of a year of 365 or 366 days as applicable, and applied on a daily basis) for such auction as otherwise announced by the U.S. Department of the Treasury.
- (b) If the results of the auction of Treasury bills are not so published by 3:00 p.m., New York City time, on the Interest Determination Date, or if no such auction is held, the Treasury Rate will be the rate (expressed as a bond equivalent on the basis of a year of 365 or 366 days, as applicable, and applied on a daily basis) on such Interest Determination Date of such Treasury bills having the specified Index Maturity as published in H.15, or such other recognized electronic source used for the purpose of displaying such rate, under the caption **“U.S. Government Securities—Treasury Bills (Secondary Market).”**
- (c) If such rate is not yet published in H.15 or another recognized electronic source, then the Treasury Rate will be a yield to maturity (expressed as a bond equivalent on the basis of a year of 365 or 366 days, as applicable, and applied on a daily basis) of the average of the secondary market bid rates as of approximately 3:30 p.m., New York City time, on the Interest Determination Date, of three leading primary U.S. government securities dealers in The City of New York selected by the Issuer for the issue of Treasury bills with a remaining maturity closest to the specified Index Maturity.
- (d) If fewer than three dealers are providing quotes, the Treasury Rate for the new interest period will be the Treasury Rate in effect for the prior interest period.

Prime Rate Notes

Each Prime Rate Note will bear interest at a specified rate that will be reset periodically based on the Prime Rate and any Spread and/or Spread Multiplier.

Unless the applicable Final Terms specifies otherwise, **“Prime Rate”** means, with respect to any Interest Determination Date, the rate set forth on that Interest Determination Date in H.15 under the heading **“Bank Prime Loan”** (recognized electronic source used for the purpose of displaying such rate).

If the Prime Rate cannot be determined as described above, the following procedures will apply:

- (a) If the rate is not published in H.15 or another recognized electronic source by 3:00 p.m., New York City time, on the Interest Determination Date, then the Prime Rate will be the average (rounded upwards, if necessary, to the next higher one-hundred thousandth of a percentage point) of the rates publicly announced by each bank on the Reuters Screen USPRIME1 Page as its prime rate or base lending rate, as of 11:00 a.m., New York City time, for that Interest Determination Date.
- (b) If fewer than four, but more than two, rates appear on the Reuters Screen USPRIME1 Page, the Prime Rate will be the average of the prime rates (quoted on the basis of the actual number of days in the year divided by a 360-day year) as of the close of business on the Interest Determination Date by three major money center banks in The City of New York selected by the Issuer.
- (c) If fewer than two rates appear, the Prime Rate will be determined based on the rates furnished in The City of New York by the appropriate number of substitute banks or trust companies organized and doing business under the laws of the United States, or any State thereof, having total equity capital of at least U.S.\$500 million and being subject to supervision or examination by a Federal or State authority, as selected by the Issuer.

- (d) If no banks are providing quotes, the Prime Rate for the new interest period will be the Prime Rate in effect for the prior interest period.

Benchmark Replacement Provisions

SOFR Fallback Provisions

If the Issuer, or its designee (which may be an affiliate of the Issuer), determines on or prior to the relevant Reference Time that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to the then-current Benchmark, the applicable Benchmark Replacement will replace the then-current Benchmark for the Notes of such Series for all purposes relating to such Notes in respect of all determinations on the relevant Interest Determination Date and all subsequent Interest Reset Period.

In connection with the implementation of a Benchmark Replacement, the Issuer or its designee (which may be an affiliate of the Issuer), will have the right to make Benchmark Replacement Conforming Changes from time to time.

Any determination, decision or election that may be made by the Issuer or its designee pursuant to this section, including any determination with respect to a tenor, rate or adjustment or of the occurrence or non-occurrence of an event, circumstance or date and any decision to take or refrain from taking any action or any selection:

- (a) will be conclusive and binding absent manifest error;
- (b) will be made in the sole discretion of the Issuer or its designee, as applicable; and
- (c) notwithstanding anything to the contrary in the Fiscal Agency Agreement or the Notes, shall become effective without consent from the holders of the Notes or any other party.

As used in this Base Prospectus with respect to any Benchmark Transition Event and its related Benchmark Replacement Date in connection with the SOFR Notes:

“Benchmark” means, initially, Compounded SOFR, as such terms is defined above; provided that if the Issuer or its designee determines on or prior to the Reference Time that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to Compounded SOFR (or the published daily SOFR used in the calculation thereof) or the then-current Benchmark, then “Benchmark” means the applicable Benchmark Replacement.

“Benchmark Replacement” means the first alternative set forth in the order below that can be determined by the Issuer or its designee as of the Benchmark Replacement Date:

(i) the sum of: (a) the alternate rate of interest that has been selected or recommended by the Relevant Governmental Body as the replacement for the then-current Benchmark and (b) the Benchmark Replacement Adjustment;

(ii) the sum of: (a) the ISDA Fallback Rate and (b) the Benchmark Replacement Adjustment;
or

(iii) the sum of: (a) the alternate rate of interest that has been selected by the Issuer or its designee as the replacement for the then-current Benchmark giving due consideration to any industry-accepted rate of interest as a replacement for the then-current Benchmark for U.S. dollar-denominated floating rate notes at such time and (b) the Benchmark Replacement Adjustment.

“Benchmark Replacement Adjustment” means the first alternative set forth in the order below that can be determined by the Issuer or its designee as of the Benchmark Replacement Date:

(i) the Spread adjustment or method for calculating or determining such Spread adjustment (which may be a positive or negative value or zero), that has been selected or recommended by the Relevant Governmental Body for the applicable Unadjusted Benchmark Replacement;

(ii) if the applicable Unadjusted Benchmark Replacement is equivalent to the ISDA Fallback Rate, then the ISDA Fallback Adjustment;

(iii) the Spread adjustment (which may be a positive or negative value or zero) that has been selected by the Issuer or its designee giving due consideration to any industry-accepted spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of the then-current Benchmark with the applicable Unadjusted Benchmark Replacement for U.S. dollar-denominated Floating Rate Notes at such time.

“Benchmark Replacement Conforming Changes” means, with respect to any Benchmark Replacement, any technical, administrative or operational changes (including changes to the timing and frequency of determining rates and making payments of interest, rounding of amounts or tenors, and other administrative matters) that the Issuer or its designee decides may be appropriate to reflect the adoption of such Benchmark Replacement in a manner substantially consistent with market practice (or, if the Issuer or its designee decides that adoption of any portion of such market practice is not administratively feasible or if the Issuer or its designee determine that no market practice for use of the Benchmark Replacement exists, in such other manner as the Issuer or its designee determines is reasonably necessary).

“Benchmark Replacement Date” means the earliest to occur of the following events with respect to the then-current Benchmark (including the daily published component used in the calculation thereof):

(i) in the case of clause (1) or (2) of the definition of “Benchmark Transition Event,” the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of the Benchmark permanently or indefinitely ceases to provide the Benchmark (or such component); or

(ii) in the case of clause (3) of the definition of “Benchmark Transition Event,” the date of the public statement or publication of information referenced therein.

For the avoidance of doubt, if the event that gives rise to the Benchmark Replacement Date occurs on the same day as, but earlier than, the Reference Time in respect of any determination, the Benchmark Replacement Date will be deemed to have occurred prior to the Reference Time for such determination.

“Benchmark Transition Event” means the occurrence of one or more of the following events with respect to the then-current Benchmark (including the daily published component used in the calculation thereof):

(i) a public statement or publication of information by or on behalf of the administrator of the Benchmark (or such component) announcing that such administrator has ceased or will cease to provide the Benchmark (or such component), permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark (or such component);

(ii) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark (or such component), the central bank for the currency of the Benchmark (or such component), an insolvency official with jurisdiction over the administrator for the Benchmark (or such component), a resolution authority with jurisdiction over the administrator for the Benchmark (or such component) or a court or an entity with similar insolvency or resolution authority over the administrator for the Benchmark, which states that the administrator of the Benchmark (or such component) has ceased or will cease to provide the Benchmark permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide the Benchmark (or such component); or

(iii) a public statement or publication of information by the regulatory supervisor for the administrator of the Benchmark announcing that the Benchmark is no longer representative.

“ISDA Definitions” means the 2021 ISDA Definitions published by the International Swaps and Derivatives Association, Inc. or any successor thereto, as amended or supplemented from time to time, or any successor definitional booklet for interest rate derivatives published from time to time.

“ISDA Fallback Adjustment” means the spread adjustment (which may be a positive or negative value or zero) that would apply for derivatives transactions referencing the ISDA Definitions to be determined upon the occurrence of an index cessation event with respect to the Benchmark.

“ISDA Fallback Rate” means the rate that would apply for derivatives transactions referencing the ISDA Definitions to be effective upon the occurrence of an index cessation date with respect to the Benchmark for the applicable tenor excluding the applicable ISDA Fallback Adjustment.

“Reference Time” with respect to any determination of the Benchmark means (1) if the Benchmark is Compounded SOFR, the SOFR Determination Time, and (2) if the Benchmark is not Compounded SOFR, the time determined by the Issuer or its designee after giving effect to the Benchmark Replacement Conforming Changes.

“Relevant Governmental Body” means the Federal Reserve Board and/or the Federal Reserve Bank of New York, or a committee officially endorsed or convened by the Federal Reserve Board and/or the Federal Reserve Bank of New York or any successor thereto.

“Unadjusted Benchmark Replacement” means the Benchmark Replacement excluding the Benchmark Replacement Adjustment.

Term SOFR Fallback Provisions

If the Issuer, or its designee (which may be an affiliate of the Issuer), determines on or prior to the relevant Reference Time that a Benchmark Transition Event and its related Benchmark Replacement Date have occurred with respect to the then-current Benchmark, the applicable Benchmark Replacement will replace the then-current Benchmark for the Notes of such Series for all purposes relating to such Notes in respect of all determinations on the relevant Term SOFR Determination Day and all subsequent Interest Periods.

In connection with the implementation of a Benchmark Replacement, the Issuer or its designee (which may be an affiliate of the Issuer), will have the right to make Benchmark Replacement Conforming Changes from time to time.

Any determination, decision or election that may be made by the Issuer or its designee pursuant this section, including any determination with respect to a tenor, rate or adjustment or of the occurrence or non-occurrence of an event, circumstance or date and any decision to take or refrain from taking any action or any selection:

- (a) will be conclusive and binding absent manifest error;
- (b) will be made in the sole discretion of the Issuer or its designee, as applicable; and
- (c) notwithstanding anything to the contrary in the Fiscal Agency Agreement or the Notes, shall become effective without consent from the holders of the Notes or any other Party.

As used in this Base Prospectus with respect to any Benchmark Transition Event and its related Benchmark Replacement Date in connection with the Term SOFR Notes:

“Available Tenor” means, as of any date of determination and with respect to the then-current Benchmark, as applicable, if such Benchmark is a term rate, any tenor for such Benchmark (or component thereof) that is or may be used for determining the length of an interest period as of such date and not including, for the avoidance of doubt, any tenor for such Benchmark that is then removed from the definition of “Interest Period.”

“Benchmark” means, initially, the Term SOFR; provided that if a Benchmark Transition Event has occurred with respect to the Term SOFR Reference Rate or the then-current Benchmark, then “Benchmark” means the

applicable Benchmark Replacement to the extent that such Benchmark Replacement has replaced such prior benchmark rate.

“Benchmark Replacement” means, with respect to any Benchmark Transition Event, as determined by the Issuer or its designee as for the applicable Benchmark Replacement Date, the sum of: (a) the alternate benchmark rate that has been selected by the Issuer or its designee as the replacement giving due consideration to (x) any selection or recommendation of a replacement benchmark rate or the mechanism for determining such a rate by the Relevant Governmental Body or (y) any evolving or then-prevailing market convention for determining a benchmark rate as a replacement to the then-current Benchmark for U.S. dollar-denominated floating rate notes and (b) the related Benchmark Replacement Adjustment. If the Benchmark Replacement as determined pursuant to the above would be less than the Floor, the Benchmark Replacement will be deemed to be the Floor.

“Benchmark Replacement Adjustment” means the spread adjustment, or method for calculating or determining such spread adjustment, (which may be a positive or negative value or zero) that has been selected by the Issuer or its designee giving due consideration to (a) any selection or recommendation of a spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of such Benchmark with the applicable Unadjusted Benchmark Replacement by the Relevant Governmental Body or (b) any evolving or then-prevailing market convention for determining a spread adjustment, or method for calculating or determining such spread adjustment, for the replacement of such Benchmark with the applicable Unadjusted Benchmark Replacement for U.S. dollar-denominated floating rate notes at such time.

“Benchmark Replacement Conforming Changes” means, with respect to any Benchmark Replacement, any technical, administrative or operational changes (including changes to the definition of “Business Day,” the definition of “U.S. Government Securities Business Day,” the definition of “Interest Period” or any similar or analogous definition (or the addition of a concept of “interest period”), timing and frequency of determining rates and making payments of interest, and other technical, administrative or operational matters) that the Issuer or its designee decides may be appropriate to reflect the adoption of such rate or to permit the use and administration thereof by the Issuer or its designee in a manner substantially consistent with market practice (or, if the Issuer or its designee decides that adoption of any portion of such market practice is not administratively feasible or if the Issuer or its designee determines that no market practice for the administration of any such rate exists, in such other manner of administration as the Issuer or its designee decides is reasonably necessary).

“Benchmark Replacement Date” means a date and time determined by the Issuer or its designee, which date shall be no later than the earliest to occur of the following events with respect to the then-current Benchmark:

(i) in the case of clause (i) or (ii) of the definition of “Benchmark Transition Event,” the later of (a) the date of the public statement or publication of information referenced therein and (b) the date on which the administrator of such Benchmark (or the published component used in the calculation thereof) permanently or indefinitely ceases to provide such Benchmark (or such component thereof) or, if such Benchmark is a term rate, all Available Tenors of such Benchmark (or such component thereof); or

(ii) in the case of clause (iii) of the definition of “Benchmark Transition Event,” the first date on which such Benchmark (or the published component used in the calculation thereof) has been or, if such Benchmark is a term rate, all Available Tenors of such Benchmark (or such component thereof) have been determined and announced by the regulatory supervisor for the administrator of such Benchmark (or such component thereof) to be non-representative; provided that such non-representativeness will be determined by reference to the most recent statement or publication referenced in such clause (iii) and even if such Benchmark (or such component thereof) or, if such Benchmark is a term rate, any Available Tenor of such Benchmark (or such component thereof) continues to be provided on such date.

For the avoidance of doubt, if such Benchmark is a term rate, the “Benchmark Replacement Date” will be deemed to have occurred in the case of clause (i) or (ii) with respect to any Benchmark upon the occurrence of the applicable event or events set forth therein with respect to all then-current Available Tenors of such Benchmark (or the published component used in the calculation thereof).

“Benchmark Transition Event” means the occurrence of one or more of the following events with respect to the then-current Benchmark:

(iii) a public statement or publication of information by or on behalf of the administrator of such Benchmark (or the published component used in the calculation thereof) announcing that such administrator has ceased or will cease to provide such Benchmark (or such component thereof) or, if such Benchmark is a term rate, all Available Tenors of such Benchmark (or such component thereof), permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide such Benchmark (or such component thereof) or, if such Benchmark is a term rate, any Available Tenor of such Benchmark (or such component thereof);

(iv) a public statement or publication of information by the regulatory supervisor for the administrator of such Benchmark (or the published component used in the calculation thereof), the Federal Reserve Board, the Federal Reserve Bank of New York, an insolvency official with jurisdiction over the administrator for such Benchmark (or such component), a resolution authority with jurisdiction over the administrator for such Benchmark (or such component) or a court or an entity with similar insolvency or resolution authority over the administrator for such Benchmark (or such component), which states that the administrator of such Benchmark (or such component) has ceased or will cease to provide such Benchmark (or such component thereof) or, if such Benchmark is a term rate, all Available Tenors of such Benchmark (or such component thereof) permanently or indefinitely, provided that, at the time of such statement or publication, there is no successor administrator that will continue to provide such Benchmark (or such component thereof) or, if such Benchmark is a term rate, any Available Tenor of such Benchmark (or such component thereof); or

(v) a public statement or publication of information by the regulatory supervisor for the administrator of such Benchmark (or the published component used in the calculation thereof) announcing that such Benchmark (or such component thereof) or, if such Benchmark is a term rate, all Available Tenors of such Benchmark (or such component thereof) are not, or as of a specified future date will not be, representative.

For the avoidance of doubt, if such Benchmark is a term rate, a “Benchmark Transition Event” will be deemed to have occurred with respect to any Benchmark if a public statement or publication of information set forth above has occurred with respect to each then-current Available Tenor of such Benchmark (or the published component used in the calculation thereof).

“Reference Time” with respect to any determination of the Benchmark means (i) if the Benchmark is Term SOFR, the Term SOFR Determination Day, and (ii) if the Benchmark is not Term SOFR, the time determined by the Issuer or its designee after giving effect to the Benchmark Replacement Conforming Changes.

“Relevant Governmental Body” means the Federal Reserve Board or the Federal Reserve Bank of New York, or a committee officially endorsed or convened by the Federal Reserve Board or the Federal Reserve Bank of New York, or any successor thereto.

“Unadjusted Benchmark Replacement” means the applicable Benchmark Replacement excluding the related Benchmark Replacement Adjustment.

EURIBOR Notes Fallback Provisions

Notwithstanding the foregoing, if the Issuer, in its sole discretion, or the Calculation Agent, in its sole discretion, determine on or prior to an Interest Determination Date that EURIBOR has been permanently discontinued and the Issuer or the Calculation Agent have notified the other of such determination, the Calculation Agent will use, as a substitute for EURIBOR (the **“EURIBOR Alternative Rate”**) for that Interest Determination Date and each Interest Determination Date thereafter, the reference rate selected as an alternative to EURIBOR by the central bank, reserve bank, monetary authority or any similar institution (including any committee or working group thereof) in the jurisdiction of the currency in which the EURIBOR Notes are denominated and that is consistent with accepted market

practice regarding the selection and use of a substitute for EURIBOR, all as determined by the Issuer and/or its independent investment banker and notified to the Calculation Agent in writing. As part of such substitution, the Issuer, or an independent investment banker appointed by the Issuer, will make such adjustments (“**Adjustments**”) to the EURIBOR Alternative Rate or the spread thereon, as well as the business day convention, Interest Determination Dates and related provisions and definitions, in each case that are consistent with accepted market practice for the use of such EURIBOR Alternative Rate for the EURIBOR Notes. If the Issuer or its independent investment banker determines that there is no clear market consensus as to whether any rate has replaced EURIBOR in customary market usage, the Issuer may appoint, in its sole discretion, a new calculation agent, which may be the Issuer’s affiliate, to determine the EURIBOR Alternative Rate and make any EURIBOR Adjustments thereto, and the determinations of such calculation agent will be binding on the Issuer, the trustee and the holders of the EURIBOR Notes. If, however, the Issuer, its independent investment banker or new calculation agent determines that EURIBOR has been discontinued, but for any reason a EURIBOR Alternative Rate has not been determined, EURIBOR will be equal to such rate as the rate in effect for the EURIBOR Notes on such Interest Determination Date.

Extendible Notes

Notes may be issued with an initial maturity date (the “**Initial Maturity Date**”) which may be extended from time to time upon the election of the holders on specified dates (each, an “**Election Date**”) up to a final maturity date (the “**Final Maturity Date**”) as set forth in the applicable Final Terms (“**Extendible Notes**”). The Final Terms relating to each issue of Extendible Notes will set forth the terms of such Notes, including the Initial Maturity Date, the Final Maturity Date and the Election Dates, and will also describe certain tax considerations associated with an investment in Extendible Notes, the manner in which holders may elect to extend the Notes and such other terms and conditions as may apply to such issue.

Indexed Notes

Notes may be issued with the principal amount payable at maturity or interest to be paid thereon, or both, to be determined with reference to the price or prices of specified commodities or stocks, indices, formulae or other assets or bases of reference as may be specified in such Note and the applicable Final Terms (“**Indexed Notes**”). Holders of such Indexed Notes may receive a principal amount on the Maturity Date that is greater than or less than the face amount of the Indexed Notes, or an interest rate that is greater than or less than the stated interest rate on the Indexed Notes, or both, depending upon the structure of the Indexed Note and the relative value on the Maturity Date or at the relevant Interest Payment Date, as the case may be, of the specified indexed item. Information as to the method for determining the principal amount payable on the Maturity Date, the currency base rate (the “**Currency Base Rate**”), the manner of determining the interest rate, the determination agent (the “**Determination Agent**”), certain historical information with respect to the specified indexed item and tax considerations associated with an investment in Indexed Notes will be set forth in the applicable Final Terms.

A separate prospectus with respect to the relevant Note will be used for the documentation of an issuance of Indexed Notes, including, but not limited to a discussion of market and settlement disruptions and adjustments.

Dual Currency Notes

In general, “**Dual Currency Notes**” refer to Notes as to which the Issuer is permitted under certain specified circumstances to pay principal, premium, if any, and/or interest, in more than one currency or composite currency. The terms of any Dual Currency Notes will be as set forth in the applicable Final Terms related to any such Notes, including the face amount currency (the “**Face Amount Currency**”), the option value calculation agent (the “**Option Value Calculation Agent**”), the optional payment currency (the “**Optional Payment Currency**”), the option election date(s) (the “**Option Election Date(s)**”), and the designated exchange rate (the “**Designated Exchange Rate**”).

For further information regarding certain risks inherent in Notes denominated in currencies other than U.S. Dollars, see “Risk Factors—Risks Related to the Notes—Exchange rate risk and exchange controls.”

Amortizing Notes

Amortizing Notes are Fixed Rate Notes for which payments combining principal and interest are made in installments over the life of the Note (“**Amortizing Notes**”). Unless otherwise specified herein and in the applicable

Final Terms, interest on each Amortizing Note will be computed on the basis of a 360-day year of twelve 30-day months. Payments with respect to Amortizing Notes will be applied first to interest due and payable thereon and then to the reduction of the unpaid principal amount thereof. Further information concerning specific terms of any issue of Amortizing Notes, including the amortization schedule (the “**Amortization Schedule**”), will be provided in the applicable Final Terms. A table setting forth repayment information in respect of each Amortizing Note will be included in the applicable Final Terms and set forth on such Notes.

Original Issue Discount Notes

Original Issue Discount Notes are Notes issued at more than a *de minimis* discount from the principal amount payable at maturity. Certain additional considerations relating to Original Issue Discount Notes may be described in the applicable Final Terms relating thereto.

Additional Notes

The Issuer may issue Additional Notes. Any such Additional Notes that are Regulation S Global Notes to which the TEFRA D Rules apply will be issued in the form of a temporary global Note which will be exchangeable for a beneficial interest in a permanent global Note on or after the Exchange Date specified in the applicable Final Terms relating to such Additional Notes. Additional Notes may be issued prior to or after the Exchange Date relating to such prior Tranche of Notes of the same Series. In the event Additional Notes are issued prior to the Exchange Date for the prior Tranche, the Exchange Date relating to such prior Tranche shall be moved to a date not earlier than 40 calendar days after the original issue date of the related Additional Notes; provided, however, in no event shall the Exchange Date for a Tranche of Notes be extended to a date more than 160 calendar days after the date such Tranche was issued. Once any Additional Notes have been issued, such Additional Notes together with each prior and subsequent Tranche of Notes of the same Series, shall constitute one and the same Series for all purposes to the extent specified in the applicable Final Terms (except that any such Additional Notes offered and sold in compliance with Regulation S will have temporary ISIN and Common Code numbers during a 40-day distribution compliance period commencing on the date of issuance of such Additional Notes); provided, however, that for Regulation S Global Notes, or Notes to which the TEFRA D Rules apply, such consolidation of Additional Notes issued after the Exchange Date will occur only following the exchange of interests in the temporary global Note for interests in the permanent global Note upon receipt of certificates described below; and provided further that, if the Additional Notes are not fungible with the earlier Notes for United States federal income tax purposes, the Additional Notes will have a separate ISIN and Common Code. The Final Terms relating to any Additional Notes will set forth matters related to the issuance, exchange and transfer of Additional Notes, including identifying the prior Tranche of Notes, their original issue date and aggregate principal amount. Any Additional Notes that are Bearer Notes will be subject to the same restrictions as are set forth under “Forms of Notes—Bearer Notes” above.

Other Provisions

Any provisions with respect to Notes, including without limitation the determination of an Interest Rate Basis, the specification of an Interest Rate Basis, calculation of the interest rate applicable to a Floating Rate Note, its Interest Payment Dates or any other matter relating thereto may be modified by the terms specified under “Other Provisions” on the face thereof, if so specified on the face thereof or in the applicable Final Terms.

Covenants

The Issuer has agreed to restrictions on its activities for the benefit of holders of each Series. The following restrictions will apply separately to each Series:

Consolidation, Merger, Sale or Conveyance

The Issuer may not consolidate with or merge into any other corporation or convey or transfer its properties and assets substantially as an entirety to any person, unless:

- (i) the successor corporation shall be a corporation organized and existing under the laws of Chile or the United States of America (or any state thereof) and shall expressly assume, by a supplemental Fiscal

Agency Agreement, delivered to and in a form satisfactory to the Fiscal and Paying Agent, the due and punctual payment of the principal of, premium, if any, and interest on all the outstanding Notes and the performance of every covenant in the Fiscal Agency Agreement on the part of the Issuer to be performed or observed;

- (ii) immediately after giving effect to such transaction, no Event of Default, and no event which, after notice or lapse of time or both would become an Event of Default, shall have happened and be continuing; and
- (iii) the Issuer shall have delivered to the Fiscal and Paying Agent an officers' certificate and an opinion of counsel, each stating that such consolidation, merger, conveyance or transfer and, if a supplemental Fiscal Agency Agreement is required, such supplemental Fiscal Agency Agreement, comply with the foregoing provisions relating to such transaction and all conditions precedent in the Fiscal Agency Agreement relating to such a transaction have been complied with.

In case of any such consolidation, merger, conveyance or transfer such successor corporation will succeed to and be substituted for the Issuer as obligor on each Series with the same effect as if it had issued such Series. Upon the assumption of its obligations by any such successor corporation in such circumstances subject to certain exceptions, the Issuer will be discharged from all obligations under the Notes and the Fiscal Agency Agreement.

Periodic Reports

For so long as any of the Notes remain outstanding, the Issuer will make available at its expense, upon request, to any holder of such Notes and any prospective purchasers thereof the information specified in Rule 144A(d)(4) under the Securities Act, unless the Bank is then subject to Section 13 or 15(d) of the Exchange Act or is exempt from registration pursuant to compliance with Rule 12g3-2(b) of the Exchange Act.

Events of Default

An “**Event of Default**,” with respect to each Series is defined in the Fiscal Agency Agreement as:

- (i) The Issuer's default in the payment of any principal of any of the Notes of each Series, when due and payable, whether at maturity or otherwise; or
- (ii) The Issuer's default in the payment of any interest or any Additional Amounts when due and payable on any of the Notes of such Series and the continuance of such default for a period of 30 days; or
- (iii) The Issuer's default in the performance or observance of any other term, covenant, warranty or obligation in respect of the Notes of such Series or the Fiscal Agency Agreement, not otherwise expressly defined as an Event of Default in (i) or (ii) above, and the continuance of such default for more than 60 days after written notice of such default has been received by the Issuer from the holders of at least 25.0% in aggregate principal amount of the Notes of such Series outstanding specifying such default or breach and requiring it to be remedied and stating that such notice is a “Notice of Default;”
- (iv) If any of the Issuer's Indebtedness (as defined below) or that of its Subsidiaries becomes due and repayable prematurely by reason of an event of default (however described) or the Issuer or any of its Subsidiaries fails to make any payment in respect of any Indebtedness on the due date for such payment or within any originally applicable grace period, provided that no such event as aforesaid shall constitute an Event of Default unless such Indebtedness either alone or when aggregated with other Indebtedness in respect of which one or more of the events mentioned in this paragraph has occurred shall amount to at least U.S.\$50,000,000 (or its equivalent in any other currency on the basis of the middle spot rate for any relevant currency against the U.S. Dollar, as quoted by any leading bank on the day on which this paragraph operates);
- (v) The entry of an order for relief against the Issuer under any Bankruptcy Law by a court or regulatory entity having jurisdiction in the premises or a decree or order by a court or regulatory entity having jurisdiction in the premises adjudging the Issuer as bankrupt or insolvent under any other applicable

law, or the entry of a decree or order approving as properly filed a petition seeking reorganization, arrangement, adjustment or composition of or in respect of the Issuer under any Bankruptcy Law, or appointing a receiver, liquidator, assignee, trustee, sequestrator (or other similar official under any Bankruptcy Law, including a “*síndico*”) of the Issuer or of any substantial part of its property, or ordering the winding up or liquidation of its affairs, and the continuance of any such decree or order unstayed and in effect for a period of 60 consecutive days; or

- (vi) The consent by the Issuer to the institution of bankruptcy or insolvency proceedings against it, or the filing by it of a petition or answer or consent seeking reorganization or relief under any Bankruptcy Law, or the consent by it to the filing of any such petition or to the appointment of a custodian, receiver, liquidator, assignee, trustee, sequestrator (or other similar official under any Bankruptcy Law, including a “*síndico*”) of the Issuer or of any substantial part of its property, or the making of an assignment for the benefit of creditors, or the admission in writing of its inability to pay its debts generally as they become due, or the taking of corporate action by the Issuer in furtherance of any such action.

The term “Bankruptcy Law” as used in this section means (i) articles 120 et seq. of the Chilean Banking Law (D.F.L. 3 of 1997, as amended), (ii) the Chilean “*Ley de Insolvencia y Reorganización de Empresas y Personas*” (Law No. 20.720, as amended) or (iii) any other applicable law that amends, supplements or supersedes the Chilean Banking Law and/or the *Ley de Insolvencia y Reorganización de Empresas y Personas*, and any applicable bankruptcy, insolvency, reorganization or other similar law of any applicable jurisdiction.

For purposes of the above, “**Indebtedness**” means (i) money borrowed and premiums and accrued interest in respect thereof, (ii) liabilities under or in respect of any acceptance or credit and (iii) the principal and premium (if any) and accrued interest in respect of any bonds, notes, debentures, debenture stock, loan stock, certificates of deposit or other securities whether issued for cash or in whole or in part for a consideration other than cash.

The term “**Subsidiary**” as used in this section (“**Events of Default**”) means any corporation or other business entity of which the Issuer owns or controls (either directly or through one or more other Subsidiaries) more than 50.0% of the issued capital or other ownership interests, in each case having ordinary voting power to elect or appoint directors, managers or trustees of such corporation or other business entity (whether or not capital stock or other ownership interests or any other class or classes shall or might have voting power upon the occurrence of any contingency).

The Fiscal Agency Agreement provides that (i) if an Event of Default with respect to any Series (other than an Event of Default described in clause (v) above) shall have occurred and be continuing with respect to the Notes of such Series, the holders of not less than 25.0% of the total principal amount of the Notes of such Series then outstanding may declare the principal of all outstanding Notes of such Series and the interest accrued thereon, if any, to be due and payable immediately and (ii) if an Event of Default described in clause (v) above shall have occurred, principal of all outstanding Notes of such Series and the interest accrued thereon, if any, shall become and be immediately due and payable without any declaration or other act on the part of the Fiscal and Paying Agent or any holder of Notes of such Series. The Fiscal Agency Agreement provides that the Notes owned by the Issuer or any of its affiliates shall be deemed not to be outstanding for, among other purposes, declaring the acceleration of the maturity of the Notes. Upon the satisfaction by the Issuer of certain conditions, the declaration described in clause (i) of this paragraph may be annulled by the holders of a majority of the total principal amount of the Notes of such Series then outstanding. Past defaults, other than non-payment of principal, interest and compliance with certain covenants, may be waived by the holders of a majority of the total principal amount of the Notes of such Series outstanding.

Payment of Additional Amounts

The Issuer is required to make all payments in respect of each Series free and clear of, and without withholding or deduction for or on account of, any present or future taxes, duties, fines, penalties, assessments or other governmental charges (or interest, penalties or additions to tax on those taxes, duties, fines, penalties, assessments or other governmental charges) (collectively, “**Taxes**”) imposed, levied, collected, withheld or assessed by, within or on behalf of (i) Chile (or any political subdivision or governmental authority thereof or therein having power to tax), (ii)

in the case of Notes issued by the New York Branch, the United States (or any political subdivision or governmental authority thereof having power to tax) and (iii) in the event of a transaction permitted under “Covenants—Consolidation, Merger, Sale or Conveyance” above, any jurisdiction where a successor corporation of the Issuer is incorporated or considered to be a resident, if other than Chile (or any political subdivision or governmental authority thereof or therein having power to tax), or any other jurisdiction from or through which the Issuer (or a successor) makes any payment under a Series (or any political subdivision or governmental authority thereof or therein having power to tax) (each of (i), (ii) and (iii), a “**Relevant Taxing Jurisdiction**”), unless such withholding or deduction is required by law. In that event the Issuer will pay to the Holders of such Series, or the relevant Paying Agent, as the case may be, such additional amounts (“**Additional Amounts**”) as may be necessary to ensure that the net amounts received by the Holders of such Series after such withholding or deduction (including such withholding or deduction on Additional Amounts) shall not be less than the amounts of principal, interest and premium, if any, which would have been received in respect of such Series in the absence of such withholding or deduction, except that no such Additional Amounts shall be payable in respect of any Note:

- (i) in the case of payments for which presentation of such Note is required, presented for payment more than 30 days after the later of:
 - (a) the date on which such payment first became due, and
 - (b) if the full amount payable has not been received in the place of payment by the relevant Paying Agent on or prior to such due date, the date on which, the full amount having been so received, notice to that effect shall have been given to the Holders by the relevant Paying Agent, except to the extent that the Holder would have been entitled to such Additional Amounts on presenting such Note for payment on the last day of such period of 30 days;
- (ii) for any estate, inheritance, gift, sales, transfer, excise, personal property or similar Taxes;
- (iii) held by or on behalf of a Holder who is liable for Taxes imposed in respect of such Note by reason of such Holder (or fiduciary, settlor, beneficiary, or possessor of power over the relevant Holder, if the relevant Holder is an estate, a nominee, a trust, or a partnership) or a beneficial owner of the Note having some present or former connection with the Relevant Taxing Jurisdiction imposing such Taxes, other than the mere holding of such Note or the receipt of payments or the enforcement of rights in respect thereto;
- (iv) for any Taxes which are payable other than by deduction or withholding from payments of principal of, or interest or premium on the Notes;
- (v) with respect to Taxes imposed on a payment to a Holder that would not have been imposed but for the failure of the Holder or a beneficial owner of the Note to comply with any certification, documentation, information or other reporting requirements concerning the nationality, residence, identity or connection with a Relevant Taxing Jurisdiction or to make other similar claim for exemption to a Relevant Taxing Jurisdiction, if, after having been requested in writing by the Issuer to provide such applicable certification, documentation or information or to make such a claim, such Holder or beneficial owner fails to do so within 30 days; provided that in no event shall such obligation to provide such certification, documentation or information require such Holder or beneficial owner to provide any more onerous information, documents, or other evidence than would be required to be provided had such Holder or beneficial owner been required to provide the U.S. Internal Revenue Service (“**IRS**”) Form W-8BEN-E that (a) imposes on such person any material unreimbursed cost or expense or (b) requires the disclosure of any material non-public information to any unrelated person;
- (vi) any Taxes that would not have been imposed but for the status of the Holder (or a beneficial owner thereof) as (i) a “10-percent shareholder” of the Issuer, as defined in Section 871(h)(3) of the Code, or any successor provisions; (ii) a bank receiving interest pursuant to a loan agreement entered into in the ordinary course of its trade or business as described in section 881(c)(3)(A) of the Code; (iii) a controlled foreign corporation within the meaning of section 957 of the Code that is related to the

Issuer within the meaning of section 864(d)(4) of the Code; or (iv) a personal holding company or passive foreign investment company with respect to the United States or a corporation that accumulates earnings to avoid U.S. federal income tax;

- (vii) for any Taxes imposed under Sections 1471-1474 of the Code, any current or future regulations thereunder or interpretations thereof, any agreements entered into pursuant to Section 1471(b) of the Code, any intergovernmental agreement entered into (or treated as being in effect) in connection with the implementation of such sections of the Code, and any fiscal or regulatory legislation, rules, or official practices adopted pursuant to any such intergovernmental agreement;
- (viii) with respect to any payment on a Note to a Holder who is a fiduciary, a partnership or other than the sole beneficial owner of that payment to the extent that payment would be required by the laws of the applicable Relevant Taxing Jurisdiction to be included in the income, for tax purposes, of a beneficiary or settlor with respect to the fiduciary, a member of that partnership or a beneficial owner who would not have been entitled to the Additional Amounts had that beneficiary, settlor, interest holder or beneficial owner been the Holder; or
- (ix) any combination of (i) through (vii).

As used in this section (“**Payment of Additional Amounts**”), a “**Holder**” shall mean, (a) with respect to any Registered Note, the person in whose name at the time such Registered Note is registered or (b) with respect to any Bearer Note, the bearer thereof.

References to principal, interest, premium or other amounts payable in respect of any Series also refer to any Additional Amounts that may be payable. Refunds, if any, of Taxes with respect to which the Issuer pays Additional Amounts are for the Issuer’s account.

The Issuer will pay when due any present or future stamp, transfer, court or documentary Taxes or any other excise or property Taxes, charges or similar levies imposed in connection with the initial execution, delivery or registration of each Series or any other document or instrument relating thereto, except as described in the Fiscal Agency Agreement with respect to transfer or exchange of the Notes.

Modification of Fiscal Agency Agreement and Notes

The Fiscal Agency Agreement may be amended by the parties thereto, without the consent of the holder of any Note of a Series for the purposes, among others, of curing any ambiguity, or of correcting or supplementing any defective or inconsistent provisions contained therein, to effect any assumption of the Issuer’s obligations thereunder and under the Notes of a Series under the circumstances described under “Covenants—Consolidation, Merger, Sale or Conveyance” above, to change the paying agent if such change is made to avoid or mitigate the Issuer’s obligation to pay Additional Amounts with respect to any Series, or in any other manner which the Issuer deems necessary or desirable which does not adversely affect in any material respect the interests of the holders of Notes of such Series outstanding on the date of such amendment. Nothing in the Fiscal Agency Agreement prevents the Issuer from amending the Fiscal Agency Agreement in such a manner as to only have a prospective effect on Notes issued on or after the date of such amendment.

Modifications and amendments to the Fiscal Agency Agreement and, to the terms of the Notes of a Series may also be made, and future compliance therewith or past Events of Default by the Issuer may be waived, by holders of a majority in aggregate principal amount of the Notes of such Series (or, in each case, such lesser amount as shall have acted at a meeting of holders of such Notes, as described below), provided, however, that no such modification or amendment to the Fiscal Agency Agreement, or to the terms of the Notes of a Series may, without the consent of the holders of each Note of such Series directly and adversely affected thereby:

- (a) change the stated maturity of the principal of any Note of such Series or extend the scheduled date for payment of interest or Additional Amounts thereon;
- (b) change the redemption date or the redemption price;

- (c) reduce the principal amount of any Note of such Series or reduce the stated rate of interest or Additional Amounts payable thereon or the amount payable thereon in the event of redemption or acceleration (or in the case of Original Issue Discount Notes, change the amount that would be due and payable upon an acceleration thereof);
- (d) change the currency of payment of principal of, or any other amounts payable on, any Note of such Series;
- (e) change the place where payment of principal of or interest on the Notes of any Series is made to the registered holder(s) of such Notes;
- (f) amend the contractual right in the Notes of any Series to institute suit for any payment on or with respect to the Notes of such Series on or after the respective due dates provided for in such Notes;
- (g) reduce the above-stated percentage of the principal amount of Notes of such Series, the consent of whose holders is necessary to modify or amend the Fiscal Agency Agreement, the terms of the Notes or reduce the percentage of Notes of such Series required for the taking of action or the quorum required at any such meeting of holders of Notes of such Series; or
- (h) amend the foregoing requirements to reduce the percentage of outstanding Notes of such Series necessary to waive any future compliance or past default.

The persons entitled to vote a majority in principal amount of the Notes of a Series outstanding shall constitute a quorum at a meeting of Noteholders of such Series except as hereinafter provided. In the absence of such a quorum, a meeting of Noteholders called by the Issuer shall be adjourned for a period of not less than 10 days, and in the absence of a quorum at any such adjourned meeting, the meeting shall be further adjourned for another period of not less than 10 days, at which further adjourned meeting persons entitled to vote 25% in principal amount of Notes of a Series at the time outstanding shall constitute a quorum. Except for modifications or amendments in (a) to (h) above which require the consent of the holders of each Note of such series directly and adversely affected thereby, any modifications, amendments or waivers to the Fiscal Agency Agreement, the terms of the Notes of a Series at a meeting of Noteholders require a favorable vote of holders of the lesser of (i) a majority in principal amount of the outstanding Notes of such Series or (ii) 75% of the principal amount of Notes of such Series represented and voting at the meeting. Any such modifications, amendments or waivers will be conclusive and binding on all holders of Notes of such Series, whether or not they have given such consent or were present at such meeting and whether or not notation of such modifications, amendments or waivers is made upon the Notes, and on all future holders of Notes of such Series. Any instruments given by or on behalf of any holder of a Note of a Series in connection with any consent to any such modification, amendment or waiver will be irrevocable once given and will be conclusive and binding on all subsequent holders of such Note.

Replacement of Notes and Coupons

Any Notes or coupons that become mutilated, destroyed, lost or stolen or are apparently destroyed, lost or stolen will be replaced by the Issuer at the expense of the holder upon delivery of the Notes or coupons or satisfactory evidence of the destruction, loss or theft thereof to the Issuer and the Fiscal and Paying Agent. In each case, an indemnity satisfactory to the Issuer and the Fiscal and Paying Agent may be required at the expense of the holder of such Note or coupon before a replacement Note or coupon will be issued. For so long as the Notes are listed or admitted to trading on or by any other stock exchange, competent authority and/or market and the rules of such stock exchange(s), competent authority(ies) and/or market(s) so require, a noteholder shall be able to obtain a replacement Note or coupon at the offices of the paying agent located in each location required by the rules and regulations of such stock exchange(s), competent authority(ies) and/or market(s).

Applicable Law

The Fiscal Agency Agreement and the Notes will be governed by, and construed in accordance with, the laws of the State of New York, United States of America.

Notices

Under Chapter 3 Part VII (Debt Securities – Continuing Listing Obligations) of the SGX-ST listing rules, (1) information which may have a material effect on the price or value of the Issuer's debt securities or on an investor's decision whether to trade in such debt securities; (2) redemptions or cancellations of the debt securities, when every 5% of the total principal amount of those securities (calculated based on the principal amount at the time of initial listing) is redeemed or cancelled; (3) details of any interest payment(s) to be made (except for fixed rate debt securities to which Rule 308 of the SGX-ST mainboard rules does not apply pursuant to Rule 308(2)); and (4) any appointment of a replacement trustee; need to be disclosed to the SGX-ST or announced, as the case may be. In case the Issuers decide to list any Notes in other stock exchanges, the Issuers intend to comply with all applicable notice and ongoing requirements pursuant to regulation therefrom. Any notice so given will be deemed to have been validly given on the date of such publication (or, if published more than once, on the date of the first such publication). All notices to holders of Notes will be published through SGX-ST (or through such other stock exchange, if applicable) as required under the SGX-ST listing rules (or the rules of such other exchange, as applicable).

Notices to holders of Registered Notes will also be given by mailing such notices to each holder by first class mail, postage prepaid, at the respective address of each holder as that address appears upon the books of the Registrar.

So long as no definitive Bearer Notes or definitive Registered Notes are in issue in respect of a particular Series, there may, so long as the global Note(s) for such Series is or are held in its or their entirety on behalf of Euroclear and/or Clearstream, Luxembourg, and/or another clearance system, as the case may be, and the Notes for such Series are not listed and/or admitted to trading on a stock exchange, competent authority and/or market, or if so listed or admitted to trading, for so long as the relevant stock exchange, competent authority and/or market so permits, be substituted for such publication in such newspaper(s) the delivery of the relevant notice to Euroclear, Clearstream, Luxembourg and/or such other clearance system for communication by them to the holders of the Notes. Any such notice shall be deemed to have been given to the holders of the Notes on the seventh day after the day on which the said notice was given to Euroclear, Clearstream, Luxembourg and/or such other clearance system.

Notices to be given by a Noteholder shall be in writing and given by together with proof of such Noteholder's holding to the Issuer.

Consent to Service

The Issuer has designated Itaú Chile New York Branch, presently located at 885 Third Avenue, 33rd floor, New York, NY 10022, as authorized agent for service of process in any legal action or proceeding arising out of or relating to the Fiscal Agency Agreement or the Notes brought in any federal or state court in New York County, The City of New York, State of New York.

Consent to Jurisdiction

- (a) The Issuer irrevocably consents to the nonexclusive jurisdiction of (i) the New York State courts sitting in New York County, State of New York, and (ii) any federal court in the Southern District of New York, in each case including all applicable courts with jurisdiction to hear any appeal therefrom, for purposes of all legal proceedings arising out of or relating to the Fiscal Agency Agreement and the Notes, and waives any immunity from the jurisdiction of such courts over any suit, action or proceeding that may be brought by the Fiscal and Paying Agent or a holder in connection with the Fiscal Agency Agreement or the Notes. The Issuer irrevocably waives, to the fullest extent permitted by law, any objection to any suit, action or proceeding that may be brought in connection with the Fiscal Agency Agreement or the Notes in such courts on the grounds of venue or on the ground that any such suit, action or proceeding has been brought in an inconvenient forum. The Issuer agrees that final judgment in any such suit, action or proceeding brought in such court shall be conclusive and binding upon the Issuer and may be enforced in any court to the jurisdiction of which the Issuer is subject by a suit upon such judgment; provided that service of process is effected upon the Issuer in the manner provided by the Fiscal Agency Agreement. Notwithstanding the foregoing, any suit, action or proceeding brought in connection with the Fiscal Agency Agreement or the Notes against the Issuer may be instituted in any competent court in the Chile.

- (b) The Issuer agrees that service of all writs, process and summonses in any suit, action or proceeding brought in connection with the Fiscal Agency Agreement or the Notes against the Issuer in any court of the State of New York or any United States Federal court sitting, in each case, in New York County, The City of New York, may be made upon Itaú Chile New York Branch, presently located at 885 Third Avenue, 33rd floor, New York, NY 10022.
- (c) Nothing in this section (“**Consent to Jurisdiction**”) shall affect the right of any party to serve legal process in any other manner permitted by law or affect the right of any party to bring any action or proceeding against any other party or its property in the courts of other jurisdictions.

Judgment Currency

The Issuer agrees, to the fullest extent that it may effectively do so under applicable law, that (a) if for the purpose of obtaining judgment in any court it is necessary to convert the sum due in respect of the principal of, or premium or interest, if any, on the Notes of any Series (the “**Required Currency**”) into a currency in which a judgment will be rendered (the “**Judgment Currency**”), the rate of exchange used shall be the rate at which, in accordance with normal banking procedures, the Issuer could purchase the Required Currency with the Judgment Currency and (b) its obligations under the Fiscal Agency Agreement to make payments in the Required Currency (i) shall not be discharged or satisfied by any tender, or any recovery pursuant to any judgment (whether or not entered in accordance with subsection (a)), in any currency other than the Required Currency, except to the extent that such tender or recovery shall result in the actual receipt, by the payee, of the full amount of the Required Currency expressed to be payable in respect of such payments, (ii) shall be enforceable as an alternative or additional cause of action for the purpose of recovering in the Required Currency the amount, if any, by which such actual receipt shall fall short of the full amount of the Required Currency so expressed to be payable and (iii) shall not be affected by judgment being obtained for any other sum due under the Fiscal Agency Agreement.

BOOK ENTRY CLEARING SYSTEMS

The information set out below is subject to any change in or reinterpretation of the rules, regulations and procedures of Euroclear or Clearstream, Luxembourg (together, the “**Clearing Systems**”) currently in effect. The information in this section concerning the Clearing Systems has been accurately reproduced and as far as the Issuer is aware and able to ascertain from information published by such third-party Clearing Systems, no facts have been omitted that would render the reproduced information inaccurate or misleading. Investors wishing to use the facilities of any of the Clearing Systems are advised to confirm the continued applicability of the rules, regulations and procedures of the relevant Clearing System. Neither the Issuer nor any other party to the Fiscal Agency Agreement will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the Notes held through the facilities of any Clearing System or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

Book-Entry Systems

Euroclear and Clearstream, Luxembourg each holds securities for its customers and facilitates the clearance and settlement of securities transactions by electronic book-entry transfer between their respective accountholders. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective participants may settle trades with each other.

Euroclear and Clearstream, Luxembourg customers are world-wide financial institutions, including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions that clear through or maintain a custodial relationship with an account holder of either system.

Transfers of Notes Represented by Registered Global Notes

Transfers of any interests in Notes represented by a Registered Global Note within Euroclear and Clearstream, Luxembourg will be effected in accordance with the customary rules and operating procedures of the relevant Clearing System. The laws in some States within the United States require that certain persons take physical delivery of notes in definitive form. Consequently, the ability to transfer Notes represented by a Registered Global Note to such persons may depend upon the ability to exchange such Notes for Notes in definitive form. However, such exchanges will generally not be available.

On or after the Original Issue Date for any Series, transfers of Notes of such Series between accountholders in Euroclear and Clearstream, Luxembourg will generally have a settlement date 2 business days after the trade date (T+2). The customary arrangements for delivery versus payment will apply to such transfers.

Transfers of interests in the relevant Registered Global Notes will be effected through the relevant Registrar, the relevant Paying Agent and the Custodian receiving instructions (and, where appropriate, certification) from the transferor and arranging for delivery of the interests being transferred to the credit of the designated account for the transferee. The notes will be delivered on a free delivery basis and arrangements for payment must be made separately. However, in the case of transfers within Euroclear or Clearstream, Luxembourg, transfers can be made on a delivery versus payment basis.

Euroclear and Clearstream, Luxembourg have each published rules and operating procedures designed to facilitate transfers of beneficial interests in Registered Global Notes among participants and accountholders of Euroclear and Clearstream, Luxembourg. However, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or changed at any time. The Issuer, nor the Agents, nor any Dealer(s) will be responsible for any performance by Euroclear or Clearstream, Luxembourg or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations and none of them will have any liability for any aspect of the records relating to or payments made on account of beneficial interests in the Notes represented by Registered Global Notes or for maintaining, supervising or reviewing any records relating to such beneficial interests.

SPECIAL PROVISIONS RELATING TO FOREIGN CURRENCY NOTES

General

Unless otherwise specified in the applicable Final Terms, the following provisions shall apply to Foreign Currency Notes which are in addition to, and to the extent inconsistent therewith replace, the description of general terms and provisions of the Notes set forth elsewhere in this Base Prospectus.

Payments on Foreign Currency Notes

Purchasers are required to pay for the Notes in the currency specified in the applicable Final Terms. In certain jurisdictions, there may be limited facilities for conversion of home currencies into foreign currencies, and vice versa. In addition, in certain jurisdictions, many banks may not offer foreign currency denominated checking or savings account facilities.

Payment of principal, premium, if any, and interest, if any, on each Note will be made in immediately available funds in the Specified Currency unless otherwise specified in the applicable Final Terms and except as provided under “Changing the Specified Currency of Foreign Currency Notes” below.

If so provided in the applicable Final Terms, a holder of the equivalent of US\$1,000,000 or more aggregate principal amount of a definitive Registered Note denominated in a Specified Currency other than U.S. dollars may elect subsequent to the issuance thereof that future payments be converted, or not be converted, as the case may be, at the Market Exchange Rate to U.S. dollars by transmitting a written request for such payments to the relevant Paying Agent on or prior to the Regular Record Date or at least 16 days prior to maturity or earlier repurchase, redemption or repayment, as the case may be. Such request shall include appropriate payment instructions and shall be in writing (mail, hand delivered, facsimile or e-mail transmission). A holder may elect to receive all future payments of principal, premium, if any, and interest in either the Specified Currency or in U.S. dollars, as specified in the written request, and need not file a separate election for each payment. Such election will remain in effect until revoked by a subsequent election made in the manner and at the times prescribed in this paragraph. Owners of beneficial interests in permanent global Notes or holders of definitive Bearer Notes should contact their broker or nominee to determine whether and how an election to receive payment in either U.S. dollars or the Specified Currency may be made.

The “**Market Exchange Rate**” means, as of any time of determination which shall be two business days prior to payment date the Specified Currencies (other than U.S. dollars) to U.S. dollar exchange rate as quoted by the Exchange Rate Agent for similar client driven orders.

All determinations made by the Exchange Rate Agent shall be at its sole discretion and, in the absence of manifest error, shall be conclusive for all purposes and binding on holders of the Notes and the Exchange Rate Agent shall have no liability therefor. Under no circumstances shall the Issuer bear any responsibility for losses incurred by a holder due to fluctuations in the Market Exchange Rate.

Specific information about the Specified Currency in which a particular Foreign Currency Note is denominated will be set forth in the applicable Final Terms. Any information therein concerning exchange rates is furnished as a matter of information only and should not be regarded as indicative of the range of or trends in fluctuations in currency exchange rates that may occur in the future.

Minimum Denominations, Restrictions on Maturities, Repayment, Repurchase and Redemption

General. Notes denominated in Specified Currencies other than U.S. dollars shall have such minimum denominations and be subject to such restrictions on maturities, repayment, repurchase and redemption as are set forth below or as are set forth in the applicable Final Terms in the event different restrictions on minimum denominations, maturities, repayment, repurchase and redemption may be permitted or required from time to time by any relevant central bank or equivalent governmental body, however designated, or by such laws or regulations as are applicable to the Notes or the Specified Currency. Certain restrictions related to the distribution of Notes denominated in Specified Currencies other than U.S. dollars are set forth under “Plan of Distribution” in this Base Prospectus. Any other restrictions applicable to Notes denominated in Specified Currencies other than U.S. dollars will be set forth in the applicable Final Terms relating to such Notes.

Restrictions on Maturities, Repayment, Repurchase and Redemption. All Notes (irrespective of the Specified Currency in which they are denominated) will comply with applicable legal, regulatory and/or central bank

requirements in respect of minimum required maturities and limitations on repurchase or redemption by the Issuer or holder of such Note.

Redenomination

The Issuer may, without the consent of holders of Notes denominated in a Specified Currency of a member state of the European Union, which on or after the issue date of such Notes participates in the European Economic and Monetary Union, on giving at least 30 days' prior notice (the "**Redenomination Notice**") to the holders of such Notes and on prior notice to the Fiscal Agent, and Euroclear, Clearstream, Luxembourg, and/or any other relevant clearing system, elect that, with effect from the date specified in the Redenomination Notice (the "**Redenomination Date**"), such Notes shall be redenominated in euro.

The election will have effect as follows:

- (a) the Notes shall be deemed to be redenominated into euro in the denomination of €0.01 with a nominal amount for each Note equal to the nominal amount of that Note in the Specified Currency, converted into euro at the Established Rate (defined below); provided that, if the Issuer determines after consultation with the Fiscal Agent that the then market practice in respect of the redenomination into euro of internationally offered securities is different from the provisions specified above, such provisions shall be deemed to be amended so as to comply with such market practice and the Issuer shall promptly notify the holders of Notes, any stock exchange on which the Notes may be listed, the Fiscal Agent and the relevant Paying Agents of such deemed amendments;
- (b) save to the extent that an Exchange Notice (defined below) has been given in accordance with paragraph (d) below, the amount of interest due in respect of the Notes will be calculated by reference to the aggregate nominal amount of Notes presented (or, as the case may be, in respect of which coupons are presented) for payment by the relevant holder and the amount of such payment shall be rounded down to the nearest €0.01;
- (c) if definitive Notes are required to be issued after the Redenomination Date, they shall be issued, subject to compliance with all applicable laws and regulations, at the expense of the Issuer in the denominations of €1,000, €10,000, €100,000 and (but only to the extent of any remaining amounts less than €1,000 or such smaller denominations as the relevant Paying Agent may approve) €0.01 and such other denominations as the Issuer shall determine and notify to the Noteholders;
- (d) if issued prior to the Redenomination Date, all unmatured coupons denominated in the Specified Currency (whether or not attached to the Notes) will become void with effect from the date on which the Issuer gives notice (the "**Exchange Notice**") that replacement euro-denominated Notes and coupons are available for exchange (provided that such securities are so available) and no payments will be made in respect of them. The payment obligations contained in any Notes so issued will also become void on that date although such Notes will continue to constitute valid exchange obligations of the Issuer. New euro-denominated Notes and coupons, if any, will be issued in exchange for Notes and coupons, if any, denominated in the Specified Currency in such manner as the relevant Paying Agent may specify and as shall be notified to the holders of Notes in the Exchange Notice. No Exchange Notice may be given less than 15 days prior to any date for payment of principal or interest on the Notes;
- (e) after the Redenomination Date, all payments in respect of the Notes and the coupons, if any, including payments of interest in respect of periods commencing before the Redenomination Date, will be made solely in euro as though references in the Notes to the Specified Currency were to euro. Payments will be made in euro by credit or transfer to a euro account outside the United States (or any other account to which euro may be credited or transferred) specified by the payee;
- (f) if the Notes are Fixed Rate Notes and interest for any period ending on or after the Redenomination Date is required to be calculated for a period ending other than on an Interest Payment Date, it will be calculated by applying the Fixed Interest Rate to each specified denomination, multiplying such sum by the applicable Fixed Day Count Fraction specified in the applicable Final Terms, and rounding the resultant figure to the nearest sub-unit of the relevant Specified Currency, half of any such sub-unit being rounded upwards or otherwise in accordance with applicable market convention;
- (g) if the Notes are Floating Rate Notes, the applicable Final Terms will specify any relevant changes to the provisions relating to interest; and

- (h) such other changes shall be made as the Issuer may decide, after consultation with the relevant Paying Agent and the Calculation Agent (if applicable), and as may be specified in the Redenomination Notice, to conform them to conventions then applicable to instruments denominated in euro.

“**Established Rate**” means the rate for the conversion of the Specified Currency (including compliance with rules relating to rounding in accordance with applicable European Union regulations) into euro established by the Council of European Union pursuant to Article 140(3) of the Treaty on the Functioning of the European Union (as amended or superseded).

“**sub-unit**” means, with respect to any Specified Currency other than euro, the lowest amount of such Specified Currency that is available as legal tender in the country of such Specified Currency and, with respect to euro, means one cent.

Changing the Specified Currency of Foreign Currency Notes

Unless otherwise specified in the Final Terms, payments of principal, premium, if any, and interest, if any, on any Note denominated in a Specified Currency other than U.S. dollars shall be made in U.S. dollars if, on any payment date, such Specified Currency (a) is unavailable due to imposition of exchange controls or other circumstances beyond the Issuer’s control or (b) is no longer used by the government of the country issuing such Specified Currency or for the settlement of transactions by public institutions in that country or within the international banking community. Such payments shall be made in U.S. dollars on such payment date and on all subsequent payment dates until such Specified Currency is again available or so used as determined by such Issuer.

Amounts so payable on any such date in such Specified Currency shall be converted into U.S. dollars at a rate determined by the Exchange Rate Agent (as defined below) on the basis of the most recently available Market Exchange Rate or as otherwise indicated in the applicable Final Terms. The “**Exchange Rate Agent**” at the date of this Base Prospectus is Citibank, N.A., London Branch, unless otherwise stated in the applicable Final Terms. Any payment required to be made on Foreign Currency Notes denominated in a Specified Currency that is instead made in U.S. dollars under the circumstances described above will not constitute a default of any obligation of the Issuer under such Notes.

The provisions of the two preceding paragraphs shall not apply in the event of the introduction in the country issuing any Specified Currency of the euro pursuant to the entry of such country into European Economic and Monetary Union. In such an event, payments of principal, premium, if any, and interest, if any, on any Note denominated in any such Specified Currency shall be effected in euro at such time as is required by, and otherwise in conformity with, legally applicable measures adopted with reference to such country’s entry into the European Economic and Monetary Union.

TAXATION

General

The following discussion summarizes certain Chilean tax, U.S. federal income, European Union, Singapore and other Asia jurisdictional tax consequences to beneficial owners arising from the acquisition, ownership, and disposition of the Notes. This overview does not purport to be a comprehensive description of all potential tax considerations that may be relevant and is not intended as tax advice to any particular investor. This overview does not describe any tax consequences arising under the laws of any state, locality, or other taxing jurisdiction other than Chile, United States European Union, Singapore, and Asia.

On December 19, 2023, an applicable income tax treaty between the United States and Chile (the “**Treaty**”) entered into force. The Treaty provides for reduced withholding tax rates on income, such as dividends, interest and royalties, to reduce double taxation and increase commerce and investments between the United States and Chile. The Treaty (i) is effective since February 1, 2024 with respect to taxes withheld at source, and (ii) is effective for taxable periods beginning on or after January 1, 2024, with respect to all other taxes.

Investors should consult their own tax advisors as to the tax consequences of the acquisition, ownership, and disposition of the Notes in their particular situations, including the application of tax laws in Chile, United States, Singapore, the European Union, Asia, or other relevant jurisdictions.

Chilean Taxation

The following is a general overview of the principal consequences under Chilean tax law as currently in effect with respect to an investment in the Notes made by a Foreign Holder (as defined below). It is based on the tax laws of Chile as in effect on the date of this Base Prospectus, including the tax reform enacted by Law 21,713 dated October 24, 2024, as amended, as well as regulations, rulings and decisions of Chile available on or before such date and now in effect. All of the foregoing is subject to change. Under Chilean law, provisions contained in statutes such as tax rates applicable to foreign investors, the computation of taxable income for Chilean purposes, and the manner in which Chilean taxes are imposed and collected may be amended only by another law. In addition, the Chilean tax authorities enact rulings and regulations of either general or specific application and interpret the provisions of Chilean tax law. Chilean tax law may not be assessed retroactively against taxpayers who act in good faith relying on such rulings, regulations, or interpretations, but Chilean tax authorities may change their rulings, regulations, or interpretations prospectively. For purposes of this overview, the term “Foreign Holder” means either (1) in the case of an individual, a person who is not resident or domiciled in Chile (for purposes of Chilean taxation, (a) an individual holder is resident in Chile if he or she has remained in Chile, uninterruptedly or not, in one or more periods that in total exceed 183 days, within any lapse of 12 months, and (b) an individual is domiciled in Chile if he or she resides in Chile with the actual or presumptive intent of staying in Chile (such intention to be evidenced by circumstances such as the acceptance of employment in Chile or the relocation of one’s family to Chile)); or (2) in the case of a legal entity, a legal entity that is not organized under the laws of Chile, unless the Notes are assigned to a branch or a permanent establishment of such entity in Chile.

Under the *Ley de Impuesto a la Renta* (the “Income Tax Law”), payments of interest or premium, if any, made to a Foreign Holder in respect of the Notes will generally be subject to a Chilean withholding tax currently at the rate of 4.0%. Under existing Chilean law and regulations, a Foreign Holder will not be subject to any Chilean taxes in respect of payments of principal made by the Issuer with respect to the Notes. Any other payment to be made by the Issuer (other than interest, premium or principal on the Notes, and except for special exceptions granted by Chilean law and tax treaties subscribed by Chile and currently in force) will be subject to up to 35% withholding tax.

The Issuer has agreed, subject to specific exceptions and limitations, to pay to the holders of the Notes Additional Amounts in respect of the taxes described in the preceding sentence in order that the interest and premium, if any, the Foreign Holder receives, net of such taxes, equals the amount which would have been received by such Foreign Holder in the absence of such taxes.

The Income Tax Law provides that a Foreign Holder is subject to income tax on its Chilean source income. For this purpose, Chilean source income means earnings from activities performed in Chile or from the sale, disposition, or other transactions in connection with assets or goods located in Chile. As of August 2025, there are no rulings from

the Chilean tax authorities under which the capital gain earned by a Foreign Holder on the sale or other disposition of a note issued abroad by a Chilean company may be considered Chilean source income. Therefore, any capital gains realized on the sale or other disposition by a Foreign Holder of the Notes generally will not be subject to any Chilean taxes provided that such sales or other dispositions occur outside of Chile to a Foreign Holder (except that any premium payable on redemption of the Notes will be treated as interest and subject to the Chilean interest withholding tax, as described above).

A Foreign Holder will not be liable for estate, gift, inheritance, or similar taxes with respect to its holdings unless Notes held by a Foreign Holder are either located in Chile at the time of such Foreign Holder's death, or, if the Notes are not located in Chile at the time of a Foreign Holder's death, if such Notes were purchased or acquired with cash obtained from Chilean sources. A Foreign Holder will not be liable for Chilean stamp, registration, or similar taxes.

The issuance of the Notes is subject to a 0.8% stamp tax which is payable by the Issuer. If the stamp tax is not paid when due, Chile's Stamp Tax Law imposes a penalty of three times the amount of the tax plus inflation adjustments and interest. Until such tax (and any penalty) is paid, Chilean courts will not enforce any action brought with respect to the Notes. The Issuer has agreed, subject to specific exceptions and limitations, to pay any present or future stamp, court, or documentary taxes that arise in Chile from the initial execution, delivery, or registration of the Notes or any other document or instrument in relation thereto. See "Description of the Notes—Payment of Additional Amounts."

United States Federal Income Taxation

The following is an overview of certain U.S. federal income tax consequences, as of the date hereof, of the purchase, ownership and disposition of Notes. Except where noted, this overview deals only with Notes that are held as capital assets, and does not represent a detailed description of the U.S. federal income tax consequences applicable to you if you are subject to special treatment under the U.S. federal income tax laws, including if you are:

- a dealer in securities or currencies;
- a financial institution;
- a regulated investment company;
- a real estate investment trust;
- a tax-exempt organization;
- an insurance company;
- a person holding the Notes as part of a hedging, integrated, conversion or constructive sale transaction or a straddle;
- a trader in securities that has elected the mark-to-market method of accounting for your securities;
- a partnership or other pass-through entity for U.S. federal income tax purposes;
- a United States Holder whose "functional currency" is not the U.S. dollar; or
- a United States expatriate.

This overview is based upon provisions of the Code, and regulations, rulings and judicial decisions as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in U.S. federal income tax consequences different from those summarized below.

The discussion below assumes that all Notes issued under this program will be classified for U.S. federal income tax purposes as the Issuer's indebtedness and you should note that in the event of an alternative characterization, the tax consequences would differ from those discussed below. The Issuer will summarize any special U.S. federal tax considerations relevant to a particular issue of the Notes in the applicable Final Terms. Furthermore, this summary deals only with the ownership and disposition of Registered Notes, and does not address Bearer Notes, which may not be issued by the New York Branch and, if issued by the Bank, generally may not be offered or sold in the United States.

If a partnership holds Notes, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding Notes, you should consult your tax advisors.

This discussion does not contain a detailed description of all the U.S. federal income tax consequences to you in light of your particular circumstances and does not address the Medicare contribution tax on net investment income, any alternative minimum tax consequences, the special timing rules prescribed under Section 451(b) of the Code or the effects of any state, local or non-U. S. tax laws. If you are considering the purchase of Notes, you should consult your own tax advisors concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of the Notes, as well as the consequences to you arising under the laws of any other taxing jurisdiction.

As used herein, “**United States Holder**” means a beneficial owner of a Note that is for U.S. federal income tax purposes:

- an individual citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable Treasury Regulations to be treated as a United States person.

As used herein, “**Non-United States Holder**” means a beneficial owner of a Note that is not an entity or arrangement treated as a partnership or other pass-through entity for U.S. federal income tax purposes and that is not a United States Holder.

Treatment of Notes Issued by the New York Branch

Unless otherwise specified in the Final Terms, the Issuer intends to treat any Notes issued by the New York Branch as U.S. booked liabilities, and the discussion below assumes such treatment. The applicable Final Terms will discuss the treatment of any Notes that are not treated as U.S. booked liabilities. The remainder of this discussion assumes that any Notes issued by the New York Branch will be treated as U.S. booked liabilities.

United States Holders

Payments of Interest

Except as set forth below, interest on a Note will generally be includible as ordinary income at the time it is paid or accrued in accordance with your method of accounting for U.S. federal income tax purposes.

In addition to interest on the Notes (which includes any Chilean tax withheld from the interest payments you receive), you will be required to include in income any Additional Amounts paid in respect of such Chilean tax withheld. You may be entitled to deduct or credit this tax, subject to certain limitations (including that the election to deduct or credit foreign income taxes applies to all of your foreign income taxes for a particular tax year). Interest income (including any Additional Amounts) and any OID (as defined below) on a Note issued by the Bank (other than by the New York Branch) generally will be considered foreign source income and, for purposes of the U.S. foreign tax credit, generally will be considered “passive category” income. Payments of interest on Notes issued by the New York Branch generally will be treated as U.S. source income for the purposes of calculating your foreign tax credit limitation. Consequently, you may not be able to credit the Chilean tax withheld from payments of interest on Notes issued by the New York Branch, if any, against your federal income tax liability unless you have sufficient other income that is treated as derived from foreign sources.

Furthermore, you should be aware that recently issued Treasury Regulations impose new requirements for foreign taxes to qualify as creditable taxes for U.S. federal income tax purposes, and as a result of these new requirements, you may be able to claim a foreign tax credit for taxes imposed by Chile only if (i) you are eligible for, and properly elect to claim, the benefits of the income tax treaty between the United States and Chile or (ii) you consistently apply a modified version of these rules under recently issued temporary guidance and comply with specific requirements set forth in such guidance. Absent a valid claim of benefits under such treaty (or compliance with the guidance described in (ii) above), there can be no assurance that any taxes imposed by Chile will qualify under these new requirements. Furthermore, you will generally be denied a foreign tax credit for foreign taxes imposed with respect to the Notes

where you do not meet a minimum holding period requirement during which you are not protected from risk of loss. Alternatively, if taxes imposed by Chile are not creditable taxes or if you so elect, you may deduct such taxes in computing taxable income for U.S. federal income tax purposes, provided that you do not elect to claim a foreign tax credit for any foreign income taxes paid or accrued for the relevant taxable year. The rules governing the foreign tax credit are complex. You are urged to consult your tax advisors regarding the availability of the foreign tax credit under your particular circumstances.

Original Issue Discount

If you own Notes issued with original issue discount (“**OID**” and such Notes, “**Original Issue Discount Notes**”), you will be subject to special tax accounting rules, as described in greater detail below. In that case, you should be aware that you generally must include OID in gross income (as ordinary income), as it accrues in accordance with a constant yield method described below, often in advance of the receipt of cash attributable to that income. However, you generally will not be required to include separately in income cash payments received on the Notes, even if denominated as interest, to the extent those payments do not constitute “qualified stated interest,” as defined below. Notice will be given in the applicable Final Terms when the Issuer determines that a particular Note will be an Original Issue Discount Note.

Additional OID rules applicable to Notes that are denominated in or determined by reference to a currency other than the U.S. dollar (“**Foreign Currency Notes**”) are described under “Foreign Currency Notes” below.

A Note with an “issue price” that is less than its stated redemption price at maturity (the sum of all payments to be made on the Note other than “qualified stated interest”) generally will be issued with OID in an amount equal to that difference if that difference is at least 0.25% of the stated redemption price at maturity multiplied by the number of complete years to maturity or, in the case of an Amortizing Note, the weighted average maturity. The “issue price” of each Note in a particular offering will be the first price at which a substantial amount of that particular offering is sold to the public. The term “qualified stated interest” means stated interest that is unconditionally payable in cash or in property, other than debt instruments of the issuer, and meets all of the following conditions:

- it is payable at least once per year;
- it is payable over the entire term of the Note; and
- it is payable at a single fixed rate or, subject to certain conditions, based on one or more interest indices.

The Issuer will give you notice in the applicable Final Terms when it determines that a particular Note will bear interest that is not qualified stated interest.

If you own a Note issued with de minimis OID, which is discount that is not OID because it is less than 0.25% of the stated redemption price at maturity multiplied by the number of complete years to maturity (or, in certain cases, the weighted average maturity), you generally must include the de minimis OID in income at the time principal payments on the Notes are made in proportion to the amount paid. Any amount of de minimis OID that you have included in income will be treated as capital gain.

Certain of the Notes may contain provisions permitting them to be redeemed prior to their stated maturity at the Issuer’s option and/or at your option. Original Issue Discount Notes containing those features may be subject to rules that differ from the general rules discussed herein. If you are considering the purchase of Original Issue Discount Notes with those features, you should carefully examine the applicable Final Terms and should consult your own tax advisors with respect to those features since the tax consequences to you with respect to OID will depend, in part, on the particular terms and features of the Notes.

If you own Original Issue Discount Notes with a maturity upon issuance of more than one year, you generally must include OID in income in advance of the receipt of some or all of the related cash payments using the “constant yield method” described in the following paragraphs.

The amount of OID that you must include in income if you are the initial United States Holder of an Original Issue Discount Note is the sum of the “daily portions” of OID with respect to the Note for each day during the taxable year or portion of the taxable year in which you held that Note (“**accrued OID**”). The daily portion is determined by allocating to each day in any “accrual period” a pro rata portion of the OID allocable to that accrual period. The “accrual period” for an Original Issue Discount Note may be of any length and may vary in length over the term of the Note, provided that each accrual period is no longer than one year and each scheduled payment of principal or

interest occurs on the first day or the final day of an accrual period. The amount of OID allocable to any accrual period other than the final accrual period is an amount equal to the excess, if any, of:

- the Note's "adjusted issue price" at the beginning of the accrual period multiplied by its yield to maturity, determined on the basis of compounding at the close of each accrual period and properly adjusted for the length of the accrual period, over
- the aggregate of all qualified stated interest allocable to the accrual period.

OID allocable to a final accrual period is the difference between the amount payable at maturity, other than a payment of qualified stated interest, and the adjusted issue price at the beginning of the final accrual period. Special rules will apply for calculating OID for an initial short accrual period. The "adjusted issue price" of a Note at the beginning of any accrual period is equal to its issue price increased by the accrued OID for each prior accrual period, determined without regard to the amortization of any acquisition or bond premium, as described below, and reduced by any payments previously made on the Note other than a payment of qualified stated interest. Under these rules, you generally will have to include in income increasingly greater amounts of OID in successive accrual periods. The Issuer is required to provide information returns stating the amount of OID accrued on Notes held by persons of record other than certain exempt holders.

Floating Rate Notes generally will be treated as "variable rate debt instruments" under the OID Regulations. Accordingly, the stated interest on a Floating Rate Note generally will be treated as "qualified stated interest" and such a Note will not have OID solely as a result of the fact that it provides for interest at a variable rate. In the case of an Original Issue Discount Note that is a Floating Rate Note, the "yield to maturity" and "qualified stated interest" will be determined solely for purposes of calculating the accrual of OID as though the Note will bear interest in all periods at a fixed rate generally equal to the rate that would be applicable to interest payments on the Note on its date of issue or, in the case of certain Floating Rate Notes, the rate that reflects the yield to maturity that is reasonably expected for the Note. Additional rules may apply if either:

- the interest on a Floating Rate Note is based on more than one interest index; or
- the principal amount of the Note is indexed in any manner.

If a Floating Rate Note does not qualify as a "variable rate debt instrument", such Note will be subject to special rules that govern the tax treatment of debt obligations that provide for contingent payments. The discussion above does not address such Floating Rate Notes or, more generally, the tax treatment of any Notes providing for contingent payments. You should carefully examine the applicable Final Terms regarding the U.S. federal income tax consequences of the holding and disposition of any Notes providing for contingent payments.

You may elect to treat all interest on any Note as OID and calculate the amount includible in gross income under the constant yield method described above. For purposes of this election, interest includes stated interest, acquisition discount, OID, *de minimis* OID, market discount, *de minimis* market discount and unstated interest, as adjusted by any amortizable bond premium or acquisition premium. You should consult with your own tax advisors about this election.

Any OID accrued with respect to a Note issued by the Issuer (other than by the New York Branch) generally will be treated as foreign source income for purposes of the foreign tax credit, whereas any OID accrued with respect to a Note issued by the New York Branch generally will be treated as U.S. source income. As discussed above with respect to interest, the rules governing the foreign tax credit are complex. You are urged to consult your tax advisors regarding the availability of the foreign tax credit under your particular circumstances.

Short-Term Notes

In the case of Notes having a term of one year or less after taking into account the last possible date the Notes could be outstanding under their terms ("**Short-Term Notes**"), all payments, including all stated interest, will be included in the stated redemption price at maturity and will not be qualified stated interest. As a result, you will generally be taxed on the discount instead of stated interest. The discount will be equal to the excess of the stated redemption price at maturity over the issue price of a Short-Term Note, unless you elect to compute this discount using tax basis instead of issue price. In general, cash method United States Holders of Short-Term Notes are not required to include accrued discount in their income currently unless they elect to do so, but may be required to include stated interest in income as the income is received. United States Holders that report income for U.S. federal income tax purposes on the accrual method and certain other United States Holders are required to accrue discount on Short-Term Notes (as ordinary income) on a straight-line basis, unless an election is made to accrue the discount according to a constant yield method based on daily compounding. If you are not required, and do not elect, to include discount

in income currently, any gain you realize on the sale, exchange or retirement of a Short-Term Note will generally be ordinary income to you to the extent of the discount accrued by you through the date of sale, exchange or retirement. In addition, if you do not elect to currently include accrued discount in income, you may be required to defer deductions for a portion of your interest expense with respect to any indebtedness attributable to the Short-Term Notes. Finally, the market discount rules (described below) will not apply to a Short-Term Note.

Market Discount

If you purchase a Note for an amount that is less than its stated redemption price at maturity (or, in the case of an Original Issue Discount Note, its adjusted issue price), the amount of the difference generally will be treated as “market discount” for U.S. federal income tax purposes, unless that difference is less than a specified de minimis amount. Under the market discount rules, you will be required to treat any principal payment on, or any gain on the sale, exchange, retirement or other disposition of, a Note as ordinary income to the extent of the market discount that you have not previously included in income and are treated as having accrued on the Note at the time of the payment or disposition.

In addition, you may be required to defer, until the maturity of the Note or its earlier disposition, the deduction of all or a portion of the interest expense on any indebtedness attributable to the Note. You may elect, on a Note-by-Note basis, to deduct the deferred interest expense in a tax year prior to the year of disposition. You should consult your own tax advisors before making this election.

Any market discount will be considered to accrue ratably during the period from the date of acquisition to the maturity date of the Note, unless you elect to accrue on a constant-yield method. You may elect to include market discount in income currently as it accrues, on either a ratable or constant-yield method, in which case the rule described above regarding deferral of interest deductions will not apply. This election will apply to all market discount debt instruments that you acquire on or after the first day of the first taxable year to which the election applies and may be revoked only with the consent of the IRS.

Acquisition Premium, Amortizable Bond Premium

If you purchase an Original Issue Discount Note for an amount that is greater than its adjusted issue price but equal to or less than the sum of all amounts payable on the Note after the purchase date other than payments of qualified stated interest, you will be considered to have purchased that Note at an “acquisition premium.” Under the acquisition premium rules, the amount of OID that you must include in gross income with respect to the Note for any taxable year will be reduced by the portion of the acquisition premium properly allocable to that year.

If you purchase a Note (including an Original Issue Discount Note) for an amount in excess of the sum of all amounts payable on the Note after the purchase date other than qualified stated interest, you will be considered to have purchased the Note with “amortizable bond premium” and, if it is an Original Issue Discount Note, you will not be required to include any OID in income. You generally may elect to amortize the premium over the remaining term of the Note on a constant-yield method as an offset to interest when includible in income under your regular accounting method. Special rules limit the amortization of amortizable bond premium in the case of convertible debt instruments. In addition, if the Note has an optional redemption feature, special rules will apply that may reduce, eliminate or defer the amount of amortizable bond premium that you may amortize. If you do not elect to amortize amortizable bond premium, that premium will decrease the gain or increase the loss you would otherwise recognize on retirement or other disposition of the Note. An election to amortize bond premium applies to all taxable debt obligations that you hold and subsequently acquire on or after the first day of the first taxable year to which the election applies and may be revoked only with the consent of the IRS.

Sale, Exchange, Retirement or other Disposition of Notes

Upon the sale, exchange, retirement or other disposition of a Note, you will recognize gain or loss equal to the difference between the amount you realize upon the sale, exchange, retirement or other disposition (less an amount equal to any accrued but unpaid qualified stated interest, which will be taxable as interest income to the extent not previously included in income) and the adjusted tax basis of the Note. Your adjusted tax basis in a Note will, in general, be your cost for that Note, increased by OID, market discount or any discount with respect to a Short-Term Note that you previously included in income, and reduced by any amortized premium and any cash payments on the Note other than qualified stated interest. Except as described above with respect to Short-Term Notes or market discount, or with respect to gain or loss attributable to changes in exchange rates as discussed below with respect to Foreign Currency Notes, that gain or loss will be capital gain or loss and will be long-term capital gain or loss if you have held the Note

for more than one year at the time of the sale, exchange, retirement or other disposition. Long-term capital gains of non-corporate holders (including individuals) are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Gain or loss realized by you on the sale, exchange, retirement or other disposition of a Note will generally be treated as U.S. source gain or loss. Consequently, you may not be able to claim a credit for any Chilean tax imposed upon a disposition of a Note unless such credit can be applied (subject to applicable limitations) against tax due on other income treated as derived from foreign sources. Furthermore, as discussed above, recently issued Treasury Regulations impose new requirements for foreign taxes to qualify as creditable taxes for U.S. federal income tax purposes, and you may be able to claim a foreign tax credit for taxes imposed by Chile only if (i) you are eligible for, and properly elect to claim, the benefits of the income tax treaty between the United States and Chile or (ii) you consistently apply a modified version of these rules under issued temporary guidance and comply with specific requirements set forth in such guidance. Absent a valid claim of benefits under such treaty (or compliance with the guidance described in (ii) above), there can be no assurance that any taxes imposed by Chile will qualify under these new requirements. Alternatively, if taxes imposed by Chile are not creditable taxes or if you so elect, you may deduct such taxes in computing taxable income for U.S. federal income tax purposes, provided that you do not elect to claim a foreign tax credit for any foreign income taxes paid or accrued for the relevant taxable year.

Foreign Currency Notes

Payments of Interest

If you receive payments of qualified stated interest made in a foreign currency and you use the cash basis method of accounting, you will be required to include in income the U.S. dollar value of the amount received, determined by translating the foreign currency received at the spot rate for such foreign currency on the date such payment is received regardless of whether the payment is in fact converted into U.S. dollars. You will not recognize exchange gain or loss with respect to the receipt of such payment. However, if such interest payment is not converted to U.S. dollars on the date of receipt, a United States Holder will have a basis in the foreign currency equal to its U.S. dollar value on that date and may recognize foreign currency exchange gain or loss attributable to the actual disposal of the foreign currency received.

If you use the accrual method of accounting, you may determine the amount of income recognized with respect to such interest in accordance with either of two methods. Under the first method, you will be required to include in income for each taxable year the U.S. dollar value of the interest that has accrued during such year, determined by translating such interest at the average rate of exchange for the period or periods (or portions thereof) during which such interest accrued or, with respect to an accrual period that spans two taxable years, at the average rate for the partial period within the taxable year. Under the second method, you may elect to translate interest income at the spot rate on:

- the last day of the accrual period,
- the last day of the taxable year if the accrual period straddles your taxable year, or
- the date the interest payment is received if such date is within five business days of the end of the accrual period.

If you elect to use the second method, then you generally must apply it consistently to all debt instruments from year to year and cannot change the election without the advance consent of the IRS. United States Holders should consult their own tax advisors as to the advisability of making the above election.

In addition, if you use the accrual method of accounting, upon receipt of an interest payment on a Note (including, upon the sale of a Note, the receipt of proceeds which include amounts attributable to accrued interest previously included in income), you will recognize exchange gain or loss in an amount equal to the difference between the U.S. dollar value of such payment (determined by translating the foreign currency received at the spot rate for such foreign currency on the date such payment is received) and the U.S. dollar value of the interest income you previously included in income with respect to such payment. Any such exchange gain or loss will be treated as ordinary income or loss and generally will be United States source gain or loss.

Original Issue Discount

OID on a Note that is also a Foreign Currency Note will be determined for any accrual period in the applicable foreign currency and then translated into U.S. dollars, in the same manner as interest income accrued by a holder on

the accrual basis, as described above. You will recognize exchange gain or loss, which is generally U.S. source ordinary income or loss, when OID is paid (including, upon the sale of a Note, the receipt of proceeds that include amounts attributable to OID previously included in income) to the extent of the difference between the U.S. dollar value of such payment (determined by translating the foreign currency received at the spot rate for such foreign currency on the date such payment is received) and the U.S. dollar value of the accrued OID (determined in the same manner as for accrued interest). For these purposes, all receipts on a Note will be viewed:

- first, as the receipt of any stated interest payments called for under the terms of the Note,
- second, as receipts of previously accrued OID (to the extent thereof), with payments considered made for the earliest accrual periods first, and
- third, as the receipt of principal.

Market Discount and Bond Premium

The amount of market discount on Foreign Currency Notes includible in income will generally be determined by translating the market discount determined in the foreign currency into U.S. dollars at the spot rate on the date the Foreign Currency Note is retired or otherwise disposed of. If you have elected to accrue market discount currently, then the amount which accrues is determined in the foreign currency and then translated into U.S. dollars on the basis of the average exchange rate in effect during the accrual period. You will recognize exchange gain or loss, which is generally U.S. source ordinary income or loss, with respect to market discount which is accrued currently using the approach applicable to the accrual of interest income as described above.

Bond premium on a Foreign Currency Note will be computed in the applicable foreign currency. If you have elected to amortize the premium, the amortizable bond premium will reduce interest income in the applicable foreign currency. At the time bond premium is amortized, exchange gain or loss, which is generally U.S. source ordinary income or loss, will be realized based on the difference between spot rates at such time and the time of acquisition of the Foreign Currency Note.

If you elect not to amortize bond premium, you must translate the bond premium computed in the foreign currency into U.S. dollars at the spot rate on the maturity date and such bond premium will constitute a capital loss.

Sale, Exchange, Retirement or other Disposition of Foreign Currency Notes

Upon the sale, exchange, retirement or other taxable disposition of a Foreign Currency Note, you will recognize gain or loss equal to the difference between the amount realized upon the sale, exchange, retirement or other disposition (less an amount equal to any accrued and unpaid qualified stated interest, which will be treated as a payment of interest for U.S. federal income tax purposes) and your adjusted tax basis in the Foreign Currency Note. Your initial tax basis in a Foreign Currency Note generally will be your U.S. dollar cost. If you purchased a Foreign Currency Note with foreign currency, your cost generally will be the U.S. dollar value of the foreign currency amount paid for such Foreign Currency Note determined at the time of such purchase. If your Foreign Currency Note is sold, exchanged, retired or disposed of for an amount denominated in foreign currency, then your amount realized generally will be based on the spot rate of the foreign currency on the date of sale, exchange, retirement or other disposition. If you are a cash method taxpayer and the Foreign Currency Notes are traded on an established securities market, foreign currency paid or received is translated into U.S. dollars at the spot rate on the settlement date of the purchase or sale. An accrual method taxpayer may elect the same treatment with respect to the purchase and sale of Foreign Currency Notes traded on an established securities market, provided that the election is applied consistently.

Except as described above with respect to Short-Term Notes or market discount, and subject to the foreign currency rules discussed below, such gain or loss will be capital gain or loss and will be long-term capital gain or loss if at the time of the sale, exchange, retirement or other disposition, the Foreign Currency Note has been held for more than one year. Capital gains of non-corporate holders (including individuals) derived with respect to capital assets held for more than one year are eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations. Gain or loss realized by you on the sale, exchange, retirement or other disposition of a Foreign Currency Note would generally be treated as U.S. source gain or loss.

A portion of your gain or loss with respect to the principal amount of a Foreign Currency Note may be treated as exchange gain or loss. Exchange gain or loss will be treated as ordinary income or loss and generally will be U.S. source gain or loss. For these purposes, the principal amount of the Foreign Currency Note is your purchase price for the Foreign Currency Note calculated in the foreign currency on the date of purchase, and the amount of exchange gain or loss recognized is equal to the difference between (i) the U.S. dollar value of the principal amount determined

on the date payment is received or the Foreign Currency Note is disposed of (or deemed disposed of) and (ii) the U.S. dollar value of the principal amount determined on the date you acquired the Foreign Currency Note (or are deemed to acquire the Foreign Currency Note). The amount of exchange gain or loss recognized on the disposition of the Foreign Currency Note (with respect to both principal and accrued interest) will be limited to the amount of overall gain or loss realized on the disposition of the Foreign Currency Note.

Exchange Gain or Loss with Respect to Foreign Currency

Your tax basis in the foreign currency received as interest on a Foreign Currency Note or on the sale, exchange, retirement or other taxable disposition of a Foreign Currency Note, will be the U.S. dollar value thereof at the spot rate in effect on the date the foreign currency is received. Any gain or loss recognized by you on a sale, exchange or other disposition of the foreign currency will be ordinary income or loss and generally will be United States source gain or loss.

Certain Payment Elections

If so specified in the applicable Final Terms for a Foreign Currency Note, a holder may elect subsequent to the issuance thereof to have future payments under such Note paid in U.S. dollars. United States Holders considering the purchase of any such Foreign Currency Notes should carefully examine the applicable Final Terms and should consult their own tax advisors regarding the U.S. federal income tax consequences of the holding and disposition of such Foreign Currency Notes.

Dual Currency Notes

If so specified in the applicable Final Terms relating to a Foreign Currency Note, the Issuer may have the option to make all payments of principal and interest scheduled after the exercise of such option in a currency other than the specified currency. Applicable Treasury Regulations generally (i) apply the principles contained in the regulations governing contingent debt instruments to Dual Currency Notes in the “predominant currency” of the Dual Currency Notes and (ii) apply the rules discussed above with respect to Foreign Currency Notes with OID for the translation of interest and principal into U.S. dollars. If you are considering the purchase of Dual Currency Notes, you should carefully examine the applicable Final Terms and should consult your own tax advisors regarding the U.S. federal income tax consequences of the holding and disposition of such Notes.

Indexed Notes

The tax treatment of a United States Holder that owns Indexed Notes will depend on factors including the specific index or indices used to determine indexed payments on the Notes and the amount and timing of any contingent payments of principal and interest. United States Holders considering the purchase of Indexed Notes should carefully examine the applicable Final Terms and should consult their own tax advisors regarding the U.S. federal income tax consequences of the holding and disposition of such Notes.

Backup Withholding and Information Reporting

In general, information reporting requirements will apply to certain payments of principal and interest (including OID) paid on the Notes and to the proceeds of sale of a Note paid to you (unless you are an exempt recipient). A backup withholding tax (currently at a rate of 24%) may apply to such payments if you fail to provide a taxpayer identification number or a certification of exempt status, or if you fail to report in full dividend and interest income.

Any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability provided the required information is timely furnished to the IRS.

Disclosure Requirements for Specified Foreign Financial Assets

United States Holders (including certain domestic corporations, partnerships, and trusts that are considered formed or availed of for the purpose of holding, directly or indirectly, “specified foreign financial assets,” referred to as “specified domestic entities” in applicable Treasury Regulations) that, during any taxable year, hold any interest in any “specified foreign financial asset” generally will be required to file with their U.S. federal income tax returns certain information on IRS Form 8938 if the aggregate value of all such assets exceeds certain specified amounts. The term “specified foreign financial asset” generally includes any financial account maintained with a non-U.S. financial institution, which may include the Notes if they are not held in an account maintained with a financial institution. Substantial penalties may be imposed, and the period of limitations on assessment and collection of U.S. federal

income taxes may be extended, in the event of a failure to comply with this reporting and filing requirement. United States Holders should consult their own tax advisers as to the possible application to them of these requirements.

Disclosure Requirements for Certain United States Holders Recognizing Significant Losses

A United States Holder that claims “significant losses” in respect of a Note for U.S. federal income tax purposes (generally (i) US\$10 million or more in a taxable year or US\$20 million or more in any combination of taxable years for corporations or partnerships all of whose partners are corporations; (ii) US\$2 million or more in a taxable year or US\$4 million or more in any combination of taxable years for all other taxpayers; or (iii) US\$50,000 or more in a taxable year for individuals or trusts with respect to a foreign currency transaction) may be required to file IRS Form 8886 for “reportable transactions.” United States Holders should consult their own tax advisers concerning any possible obligation to file IRS Form 8886 with respect to the Notes.

Non-United States Holders

In General

If you are a Non-United States Holder, payments of interest made to you on the Notes issued by the Bank (other than by the New York Branch) generally will not be subject to withholding of U.S. federal income tax, and payments of interest on Notes issued by the New York Branch generally will not be subject to withholding of U.S. federal income tax provided that (1) you do not actually or constructively own 10% or more of the total combined voting power of all classes of stock of the Bank entitled to vote and are not a controlled foreign corporation related to the Bank through stock ownership, and (2) you provide a statement signed under penalties of perjury that includes your name and address and certifies that you are a Non-United States Holder in compliance with applicable requirements.

If you are a Non-United States Holder, gain or loss realized by you on the sale or other taxable disposition of a Note generally will not be subject to U.S. federal income tax, unless you are an individual who is present in the United States for 183 days or more in the taxable year of the disposition and certain other conditions are met.

If you are a Non-United States Holder and interest paid on a Note to you, or gain realized upon the sale or other disposition of a Note by you, is effectively connected with the conduct of a trade or business in the United States by you, you generally will be taxed on a net income basis in essentially the same manner as if your Note were held by a United States Holder, as discussed above, unless such interest or gain is exempt or subject to reduced tax pursuant to an applicable income tax treaty and you are entitled to such treaty benefits. If you are a United States Holder that is a corporation, such income may also be subject to a branch profits tax. Any interest that is effectively connected with the conduct of a trade or business within the United States and is includible in gross income for the taxable year by you, as described in this paragraph, generally will be exempt from United States withholding tax if you satisfy applicable certification requirements to establish that it is effectively connected income.

Information Reporting

Information returns may be required to be filed and backup withholding may apply with respect to payments on the Notes. If you are a Non-United States Holder, you may be required to comply with applicable certification procedures to establish that you are not United States persons in order to avoid the application of such information reporting requirements and backup withholding.

FATCA

Sections 1471 through 1474 of the Code (commonly referred to as “**FATCA**”) generally impose a reporting and withholding regime with respect to certain U.S.-source payments, including payments of interest and amounts paid in respect of OID on Notes issued by the New York Branch. Additionally, under existing Treasury Regulations, FATCA withholding on gross proceeds from the sale or disposition of assets that produce certain U.S.-source payments was to take effect January 1, 2019; however, proposed Treasury Regulations, which may currently be relied upon, eliminate FATCA withholding on such types of payments. The FATCA legislation also requires certain foreign financial institutions (“**FFIs**”) to withhold on certain “foreign passthru payments” made to certain FFIs that do not comply with FATCA or are otherwise exempt from FATCA withholding and to holders that fail to provide the information required by FATCA. Although the definition of a “foreign passthru payment” is still reserved under current Treasury

Regulations, the term generally refers to payments that are from non-United States sources but that are “attributable to” certain United States payments described above. Debt obligations giving rise to foreign passthru payments will generally not be subject to withholding tax under FATCA until the date which is two years after the publication of final Treasury Regulations defining the term foreign passthru payment. It is unclear whether or to what extent payments on the Notes would be considered foreign passthru payments that are subject to withholding under FATCA.

On March 5, 2014, the United States and Chile entered into an intergovernmental agreement (“**IGA**”) to implement FATCA. Among other things, the IGA is intended to result in the automatic exchange of tax information through reporting by FFIs to the IRS. Under the current terms and conditions of the IGA, the Issuer does not expect payments made on or with respect to the Notes (other than Notes issued by the New York Branch) to be subject to withholding under FATCA.

Additionally, Singapore has an IGA with the United States (signed in 2014 and in effect), which generally exempts payments on the Notes from FATCA withholding if the Issuer complies with reporting requirements. Similarly, many EU Member States have entered into IGAs or have domestic laws implementing FATCA-like reporting requirements, which may affect Foreign Holders. Investors should consult their own tax advisors to determine the applicability of FATCA to their specific circumstances in these jurisdictions.

However, significant aspects of when and how FATCA will apply remain unclear, and no assurance can be given that withholding will not become relevant with respect to payments made on or with respect to the Notes.

The Proposed Financial Transactions Tax

On February 14, 2013, the European Commission published a proposal (the “**Commission’s Proposal**”) for a Directive for a common financial transactions tax (“**FTT**”) to be adopted in certain participating EU Member States, including in Austria, Belgium, France, Germany, Greece, Italy, Portugal, Slovakia, Slovenia, and Spain (each, a “**participating Member State**”). As of August 2025, the FTT remains under discussion, and no final directive has been adopted. The Commission’s Proposal has very broad scope and could, if introduced in its current form, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. Primary market transactions referred to in Article 5(c) of Regulation (EC) No. 1287/2006 are expected to be exempt. Under the Commission’s Proposal, the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, “established” in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State. However, the FTT remains subject to negotiation between participating Member States, and the scope, rates, and implementation timeline remain uncertain. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate and/or certain of the participating Member States may decide to withdraw. Prospective holders of the Notes are advised to seek their own professional advice in relation to the FTT.

United Kingdom Provision of Information Requirements

The comments below are of a general nature and are based on current United Kingdom (“**UK**”) tax law as applied in England and published practice of HM Revenue & Customs (“**HMRC**”), the UK tax authorities. Such law may be repealed, revoked, or modified, and such practice may not bind HMRC and/or may change (in each case, possibly with retrospective effect), resulting in UK tax consequences different from those discussed below. The comments below deal only with UK rules relating to information that may need to be provided to HMRC in connection with the Notes for holders in the European Union, Singapore, or Asia. They do not deal with any other UK tax consequences of acquiring, owning, or disposing of the Notes. Each prospective investor should seek advice based on its particular circumstances from an independent tax adviser. Information relating to the Notes may be required to be provided to HMRC in certain circumstances. This may include (but is not limited to) information relating to the value of the Notes, amounts paid or credited with respect to the Notes, details of the holders or the beneficial owners of the Notes (or the persons for whom the Notes are held), details of the persons who exercise control over entities that are, or are treated as, holders of the Notes, details of the persons to whom payments derived from the Notes are or may be paid, and information and documents in connection with transactions relating to the Notes. Information may be required to be provided by, amongst others, the Issuer, the holders of the Notes, persons by or through whom payments derived from

the Notes are made or credited or who receive such payments (or who would be entitled to receive such payments if they were made), persons who effect or are a party to transactions relating to the Notes on behalf of others, and certain registrars or administrators. Accordingly, in order to enable these requirements to be met, holders of the Notes in the European Union, Singapore, or Asia may be required to provide information to the Issuer or to other persons. In certain circumstances, the information obtained by HMRC may be exchanged with tax authorities in other countries, including those in the European Union, Singapore, or Asia, pursuant to international agreements or EU directives (such as the EU Directive on Administrative Cooperation (DAC6) for cross-border tax arrangements, where applicable).

The above overview is not intended to constitute a complete analysis of all tax consequences relating to the ownership of Notes. Prospective purchasers of Notes should consult their own tax advisors concerning the tax consequences of their particular situations.

CERTAIN ERISA AND OTHER CONSIDERATIONS

The U.S. Employee Retirement Income Security Act of 1974, as amended (“**ERISA**”) imposes certain requirements on “employee benefit plans” (as defined in Section 3(3) of ERISA) that are subject to Title I of ERISA, “plans” that are subject to Section 4975 of the Code, such as individual retirement accounts and “Keogh” plans, and entities whose assets are treated as assets of any such employee benefit plans or plans, such as certain collective investment funds and separate accounts of insurance companies (collectively, “**Plans**”), and on those persons who are fiduciaries with respect to Plans. Investments by Plans that are subject to Title I of ERISA are subject to ERISA’s general fiduciary requirements, including the requirement of investment prudence and diversification and the requirement that a Plan’s investments be made in accordance with the documents governing the Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit certain transactions involving the assets of such Plans and certain persons (referred to as “**parties in interest**” or “**disqualified persons**”) having certain relationships to such Plans, unless a statutory or administrative exemption is applicable to the transaction. A violation of these “prohibited transaction” rules may result in an excise tax or other penalties and liabilities under ERISA and the Code for such persons or the fiduciaries of the Plan. In addition, the persons involved in the prohibited transaction may have to rescind the transaction and pay an amount to the Plan for any losses realized by the Plan or profits realized by such persons and certain other liabilities could result that have a significant adverse effect on such persons.

Prohibited transactions within the meaning of Section 406 of ERISA or Section 4975 of the Code may arise, for example, if any Notes are acquired by a Plan with respect to which the Issuer or the Dealer(s) or any of their respective affiliates is a party in interest or a disqualified person. Certain exemptions from the prohibited transaction provisions of Section 406 of ERISA and Section 4975 of the Code may apply depending in part on the type of Plan fiduciary making the decision to acquire a Note and the circumstances under which such decision is made. There can be no assurance that any of these exemptions will be available with respect to any particular transaction involving the Notes or that, if an exemption is available, it will cover all aspects of any particular transaction.

Plans that are governmental plans (as defined in Section 3(32) of ERISA), church plans (as defined in Section 3(33) of ERISA) with respect to which no election has been made under Section 410(d) of the Code, and foreign plans (as described in Section 4(b) of ERISA), while not subject to the fiduciary responsibility provisions of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to state, local, or other federal or non-U.S. laws that are substantially similar to ERISA and the Code. Fiduciaries of any such plans should consult with their counsel before purchasing any Notes.

By its purchase of any Notes, the purchaser or transferee thereof will be deemed to have represented and agreed either that: (i) it is not and for so long as it holds Notes will not be (and is not acquiring the Notes directly or indirectly with the assets of a person who is or while the Notes are held will be) an ERISA Plan or other Plan, an entity whose underlying assets include the assets of any such ERISA Plan or other Plan, or a governmental or other employee benefit plan which is subject to any U.S. federal, state or local law, or non-U.S. law, that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code; or (ii) its purchase and holding of the Notes will not result in a prohibited transaction under Section 406 of ERISA or Section 4975 of the Code (or, in the case of such a governmental or other employee benefit plan, any such substantially similar U.S. federal, state or local law, or non-U.S. law).

In addition, if the purchaser or transferee of any Notes is a Plan, it will be deemed to have represented and agreed that (i) none of the Issuer or the Dealer(s), or any of its respective affiliates, has provided any investment advice on which the purchaser or transferee, or any fiduciary or other person investing the assets of the Plan (“**Plan Fiduciary**”), has relied in connection with its decision to purchase the Notes, and they are not otherwise acting as a fiduciary, as defined in Section 3(21) of ERISA or Section 4975(e)(3) of the Code, to the Plan or the Plan Fiduciary in connection with the Plan’s acquisition of Notes; and (ii) the Plan Fiduciary is exercising its own independent judgment in evaluating the transaction.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Any Plan fiduciary who proposes to cause a Plan to purchase any Notes should consult with its counsel regarding the applicability of the fiduciary responsibility and prohibited transaction provisions of ERISA and Section 4975 of the Code (or in the case of governmental or other employee benefit plans not subject to ERISA or section 4975 of the Code, any other applicable similar law) to such an investment, and to confirm that such investment will not constitute or result in a prohibited transaction or any other violation of an applicable requirement of ERISA or section 4975 of the Code (or any similar law, as applicable).

The sale of Notes to a Plan is in no respect a representation by the Issuer or the Dealer(s) that such an investment meets all relevant requirements with respect to investments by Plans generally or any particular Plan, or that such an investment is appropriate for Plans generally or any particular Plan.

PLAN OF DISTRIBUTION

The Dealers have, in the Dealer Agreement, agreed with the Issuer a basis upon which any of them may from time to time agree to purchase Notes. Any such agreement for the sale of Notes will, *inter alia*, extend to those matters stated under “Description of the Notes” including, but not limited to, to make provision for the form and terms and conditions of the relevant Notes, whether the placement of the Notes is underwritten or sold on an agency basis only, and the price at which such Notes will be purchased by the Dealers. In the Dealer Agreement, the Issuer has agreed to reimburse the Dealers for certain of their expenses in connection with the establishment and any future update of the Program and the issue of Notes under the Program and to indemnify the Dealers for certain liabilities incurred by them in connection therewith. Each Dealer has agreed under the Dealer Agreement, and each further Dealer appointed under the Program will be required to agree under the Dealer Agreement, that it has not entered and will not enter into any contractual arrangements with respect to the distribution or delivery of Notes except with its affiliates (if any) or with the prior written consent of the Issuer. The offering of Notes by the Dealers is subject to the applicable terms and conditions contained in the Dealer Agreement and the related agreement for the sale of Notes, such as receipt by the Dealers of officer’s certificates and legal opinions.

In connection with an offering of the Notes, one or more Dealers designated as Managers in the relevant Final Terms will initially propose to offer the Notes for resale at the issue price that appears in the relevant Final Terms. After the initial offering, the relevant Managers may change the offering price and any other selling terms. Managers may offer and sell Notes through certain of their affiliates.

In connection with any offering of Notes, the Managers may purchase and sell such Notes in the open market. These transactions may include short sales, purchases to cover positions created by short sales and stabilizing transactions.

Short sales involve the sale by a Manager of a greater principal amount of Notes than it is required to purchase in the offering. A Manager may close out any short position by purchasing Notes in the open market. A short position is more likely to be created if a Manager is concerned that there may be downward pressure on the price of the Notes in the open market prior to the completion of the offering that could adversely affect investors who purchase in the offering.

Stabilizing transactions consist of various bids for or purchases of the Notes made by a Manager in the open market prior to the completion of the offering.

Purchases to cover a short position and stabilizing transactions may have the effect of preventing or slowing a decline in the market price of the Notes. Additionally, these purchases may stabilize, maintain or otherwise affect the market price of the Notes (provided that, in the case of any Tranche of Notes within the scope of Regulation (EU) No 596/2014 (including as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018), the aggregate principal amount of Notes allotted does not exceed 105 per cent. of the aggregate principal amount of the relevant Tranche, or 115 per cent. of such amount where Article 8 of Commission Delegated Regulation (EU) 2016/1052 (including as it forms part of UK domestic law by virtue of European Union (Withdrawal) Act 2018) applies and there is a “greenshoe option” as defined in that Regulation). As a result, the price of the Notes may be higher than the price that might otherwise exist in the open market. In connection with the issue of any Tranche of Notes under the Program, the Dealer(s) (if any) named as the stabilizing manager(s) in the applicable Final Terms (the “**Stabilizing Managers**”) (or persons acting on their behalf) may over-allot Notes, or effect transactions with a view to supporting the market price of the Notes at a level higher than that which might otherwise prevail. However, stabilization actions may not necessarily occur. If the Stabilizing Managers engage in stabilizing or short-covering transactions, they may discontinue them at any time, and if begun, must be brought to an end after a limited period. Any stabilization action may begin on or after the date on which adequate public disclosure of the terms of the offer of the relevant Tranche of Notes is made and, if begun, may cease at any time, but it must end no later than the earlier of 30 calendar days after the date on which the Issuer received the proceeds of the relevant Tranche of Notes and 60 calendar days after the date of the allotment of the relevant Tranche of Notes. Any stabilization action or over-allotment must be conducted by the relevant Stabilizing Manager(s) (or persons acting on their behalf) in accordance with all applicable laws and rules and will be undertaken at the offices of the Stabilizing Manager(s) (or persons acting on their behalf) and on a trading venue where the Notes are listed, in the over-the-counter market or otherwise.

Some of the Dealers and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with the Issuer or its affiliates. They have received, or may in the future receive, customary fees and commissions for these transactions.

In addition, in the ordinary course of their business activities, the Managers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or its affiliates. If any of the Managers or their affiliates has a lending relationship with the Issuer, certain of those Managers or their affiliates routinely hedge, and certain other of those Managers or their affiliates may hedge, their credit exposure to the Issuer consistent with customary risk management policies. Typically, such Managers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in the Issuer's securities, including potentially the Notes offered hereby. Any such credit default swaps or short positions could adversely affect future trading prices of any issuance of Notes. The Managers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

Prior to the initial offering of the Notes under this Program, there has not been an established trading market for the Notes. The Issuers will apply to register the Program on the SGX-ST and Notes issued under the Program may be listed on the SGX-ST, or on another stock exchange or may be unlisted, as specified in the relevant Final Terms.

TRANSFER AND SELLING RESTRICTIONS

Transfer Restrictions

As a result of the following restrictions, purchasers of Notes in the United States are advised to consult legal counsel prior to making any purchase, offer, sale, resale or other transfer of such Notes. For the purpose of Regulation S, (i) Category 3 selling restrictions will apply to the Notes issued by the New York Branch, and (ii) unless otherwise indicated in the relevant Final Terms, Category 2 selling restrictions will apply to the Notes issued by the Bank. Each purchaser of Registered Notes or person wishing to transfer an interest from one Registered Note to another or from global to definitive form or vice versa, will be required to acknowledge, represent and agree as follows (terms used in this paragraph that are defined in Rule 144 and Regulation S are used herein as defined therein):

- (a) that it is not an affiliate (as defined in Rule 144 under the Securities Act) of the Issuer, that it is not acting on our behalf and that it is non-U.S. Person or purchasing Notes for the account or benefit of a U.S. Person and it is purchasing Notes in an offshore transaction in accordance with Regulation S;
- (b) that the Notes are being offered and sold in a transaction not involving a public offering in the United States within the meaning of the Securities Act, and that the Notes have not been and will not be registered under the Securities Act or any other applicable U.S. State securities laws and may not be offered, sold, pledged or otherwise transferred within the United States or to, or for the account or benefit of, U.S. Persons;
- (c) that it is purchasing Notes for its own account, or for one or more investor accounts for which it is acting as fiduciary or agent, in each case not with a view to, or for offer or sale in connection with, any distribution of Notes in violation of the Securities Act, subject to any requirement of law that the disposition of its property or the property of that investor account or accounts be at all times within its or their control and subject to its ability to resell the Notes pursuant to an available exemption from registration under the Securities Act. It agrees on its own behalf and on behalf of any investor account for which it is purchasing note, and each subsequent holder of the Notes by its acceptance of the Notes will agree, that until the end of any applicable Resale Restriction Period (as defined below) the Notes may be offered, sold or otherwise transferred only: (i) to us or any of our subsidiaries; (ii) under a registration statement that has been declared effective under the Securities Act; (iii) through offers and sales to non-U.S. Persons that occur outside the United States within the meaning of Regulation S under the Securities Act; or (iv) under any other available exemption from the registration requirements of the Securities Act, subject in each of these cases to any requirement of law that the disposition of the seller's property or the property of an investor account or accounts be at all times within the seller or account's control and to compliance with any applicable state securities laws;
- (d) that (i) in the case of the Regulation S Global Notes, the above restrictions on resale will apply from the issue date until 40 days after the later of the issue date, the issue date of the issuance of any Additional Notes and when the Notes are first offered to persons other than distributors (as defined in Rule 902 of Regulation S) in reliance on Regulation S (the "**Resale Restriction Period**"), and will not apply after the applicable Resale Restriction Period ends; (ii) we and the Fiscal and Paying Agent reserve the right to require in connection with any offer, sale or other transfer of the Notes under clause (c)(iv) above the delivery of an opinion of counsel, certifications and/or other information satisfactory to us and the Fiscal and Paying Agent and (iii) each Note will contain a legend to the following effect:

"THIS NOTE HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE "**SECURITIES ACT**"), OR ANY OTHER SECURITIES LAWS, OR WITH ANY SECURITIES REGULATORY AUTHORITY OF ANY STATE OR OTHER JURISDICTION OF THE UNITED STATES. ACCORDINGLY, THE HOLDER HEREOF, BY PURCHASING THIS NOTE, AGREES, ON ITS OWN BEHALF AND ON BEHALF OF ANY INVESTOR ACCOUNT FOR WHICH IT HAS PURCHASED NOTES, THAT NEITHER THIS NOTE NOR ANY INTEREST OR PARTICIPATION HEREIN MAY BE OFFERED, RESOLD, ASSIGNED, PLEDGED, ENCUMBERED OR OTHERWISE TRANSFERRED IN THE ABSENCE OF EFFECTIVE REGISTRATION UNDER THE SECURITIES ACT UNLESS SUCH TRANSACTION IS IN ACCORDANCE WITH THE AMENDED AND RESTATED FISCAL AND PAYING AGENCY

AGREEMENT AND EXEMPT FROM, OR OTHERWISE NOT SUBJECT TO, SUCH REGISTRATION.

THE FOREGOING LEGEND MAY BE REMOVED FROM THIS NOTE AFTER THE RESALE RESTRICTION TERMINATION DATE (WHICH IS 40 DAYS BEGINNING ON AND INCLUDING THE LATER OF (A) THE DAY ON WHICH THE SECURITIES ARE OFFERED TO PERSONS OTHER THAN DISTRIBUTORS (AS DEFINED IN REGULATIONS UNDER THE SECURITIES ACT) AND (B) THE ORIGINAL ISSUE DATE OF THIS NOTE). BY ITS ACQUISITION HEREOF, THE HOLDER HERE REPRESENTS THAT IT IS NOT A U.S. PERSON NOR IS IT PURCHASING FOR THE ACCOUNT OF A U.S. PERSON AND IS ACQUIRING THIS NOTE IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH REGULATIONS UNDER THE SECURITIES ACT.”

- (e) (i) that either: (A) no portion of the assets used by it to purchase and hold the Notes constitutes assets of any employee benefit plan subject to Title I of the U.S. Employee Retirement Income Security Act of 1974, amended (“**ERISA**”), any plan, account or other arrangement subject to section 4975 of the U.S. Internal Revenue Code of 1986, as amended (the “**Code**”), or provision under any federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (“**Similar Laws**”), or an entity whose underlying assets are considered to include “plan assets” of any such plan, account or arrangement or (B) the acquisition and holding of the Notes by you will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Law.

“EACH PURCHASER OR TRANSFEREE OF THIS NOTE WILL BE DEEMED TO HAVE REPRESENTED AND WARRANTED THAT EITHER (A) NO PORTION OF THE ASSETS USED BY IT TO PURCHASE AND HOLD THIS NOTE CONSTITUTES ASSETS OF AN EMPLOYEE BENEFIT PLAN THAT IS SUBJECT TO TITLE I OF THE U.S. EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974, AS AMENDED (“**ERISA**”), OF A PLAN, INDIVIDUAL RETIREMENT ACCOUNT OR OTHER ARRANGEMENT THAT IS SUBJECT TO SECTION 4975 OF THE U.S. INTERNAL REVENUE CODE OF 1986, AS AMENDED (THE “**CODE**”) OR PROVISIONS UNDER ANY OTHER FEDERAL, STATE, LOCAL, NON-U.S. OR OTHER LAWS OR REGULATIONS THAT ARE SIMILAR TO SUCH PROVISIONS OF ERISA OR THE CODE (“**SIMILAR LAWS**”), OR OF AN ENTITY WHOSE UNDERLYING ASSETS ARE CONSIDERED TO INCLUDE “PLAN ASSETS” OF ANY SUCH PLAN, ACCOUNT OR ARRANGEMENT, OR (B) THE PURCHASE AND HOLDING OF THIS NOTE WILL NOT CONSTITUTE OR RESULT IN A NON-EXEMPT PROHIBITED TRANSACTION UNDER SECTION 406 OF ERISA OR SECTION 4975 OF THE CODE OR A SIMILAR VIOLATION UNDER ANY APPLICABLE SIMILAR LAWS.”;

- (f) that the Issuer and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that if any of such acknowledgements, representations or agreements made by it are no longer accurate, it shall promptly notify the Issuer; and if it is acquiring any Notes as a fiduciary or agent for one or more accounts it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account.

No sale of Legended Notes in the United States to any one purchaser will be for less than EUR 100,000 (or its foreign currency equivalent) principal amount and no Legended Note will be issued in connection with such a sale in a smaller principal amount. If the purchaser is a non-bank fiduciary acting on behalf of others, each person for whom it is acting must purchase at least EUR 100,000 (or its foreign currency equivalent) of Registered Notes.

United States

The Notes have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. Persons, except in certain transactions exempt

from the registration requirements of the Securities Act. Terms used in this paragraph have the meanings given to them by Rule 144A or Regulation S under the Securities Act.

Each Dealer has represented and agreed under the Dealer Agreement, and each further Dealer appointed under the Program will be required to represent and agree under the Dealer Agreement, that it will not offer, sell or deliver the Notes (a) as part of their distribution at any time or (b) otherwise until forty days after the completion of the distribution, as determined and certified by the relevant Dealer(s) or, in the case of an issue of Notes on a syndicated basis, the relevant lead manager, of all Notes of the Tranche of which such Notes are a part, within the United States or to, or for the account or benefit of, U.S. Persons. Each Dealer has further agreed, and each further Dealer appointed under the Program will be required to agree, that it will send to each dealer to which it sells any Notes during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Notes within the United States or to, or for the account or benefit of, U.S. Persons.

Until forty days after the commencement of the offering of any Series, an offer or sale of such Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act.

Bearer Notes are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by Treasury Regulations. Terms used in this paragraph have the meanings given to them by the Code and regulations thereunder.

The applicable Final Terms will specify whether the TEFRA C Rules or the TEFRA D Rules are applicable to the Bearer Notes, or whether neither the TEFRA C Rules nor the TEFRA D Rules are applicable.

In the case of Bearer Notes to which the TEFRA D Rules have been specified to apply, the Notes may not be delivered, offered, sold or resold, directly or indirectly, in connection with their original issuance or during the Restricted Period in the United States to or for the account of any United States person, other than to certain persons as provided under Treasury Regulations. An offer or sale will be considered to be made to a person within the United States if the offeror or seller has an address within the United States for the offeree or purchaser with respect to the offer or sale. In addition, each Dealer has represented and agreed under the Dealer Agreement (and each further Dealer appointed under the Program will be required to represent and agree under the Dealer Agreement) that:

- (a) except to the extent permitted under the TEFRA D Rules, (i) it has not offered or sold, and during the Restricted Period will not offer or sell, Notes in bearer form to a person who is within the United States or to a United States person, and (ii) such Dealer has not delivered and will not deliver within the United States definitive Notes in bearer form that are sold during the Restricted Period;
- (b) it has and throughout the Restricted Period will have in effect procedures reasonably designed to ensure that its employees or agents who are directly engaged in selling Notes in bearer form are aware that such Notes may not be offered or sold during the Restricted Period to a person who is within the United States or to a United States person, except as permitted by the TEFRA D Rules;
- (c) if such Dealer is a United States person, it represents that it is acquiring the Notes in bearer form for purposes of resale in connection with their original issuance and, if such Dealer retains Notes in bearer form for its own account, it will only do so in accordance with the requirements of Treasury Regulation §1.163-5(c)(2)(i)(D)(6); and
- (d) with respect to each affiliate (if any) that acquires from such Dealer Notes in bearer form for the purposes of offering or selling such Notes during the Restricted Period, such Dealer either (i) hereby represents and agrees on behalf of such affiliate (if any) to the effect set forth in sub-paragraphs (a), (b) and (c) of this paragraph or (ii) agrees that it will obtain from such affiliate (if any) for the benefit of the Issuer the representations and agreements contained in sub-paragraphs (a), (b) and (c) of this paragraph.

Where the TEFRA C Rules are specified in the applicable Final Terms as being applicable to any Tranche of Bearer Notes, such Notes must be issued and delivered outside the United States or its possessions in connection with their original issuance. Accordingly, each Dealer has represented and agreed under the Dealer Agreement (and each

additional Dealer appointed under the Program will be required to represent and agree under the Dealer Agreement) in respect of such Notes that it has not offered, sold or delivered, and will not offer, sell or deliver, directly or indirectly, any such Notes within the United States or its possessions in connection with the original issuance. Further, each Dealer has represented and agreed under the Dealer Agreement (and each further Dealer appointed under the Program will be required to represent and agree under the Dealer Agreement) in connection with the original issuance of such Notes in bearer form, that it has not communicated, and will not communicate, directly or indirectly, with a prospective purchaser if such Dealer or such purchaser is within the United States or its possessions and will not otherwise involve the U.S. office of such Dealer in the offer and sale of Notes.

Each Dealer has agreed under the Dealer Agreement, and each further Dealer appointed under the Program will be required to agree under the Dealer Agreement, that it has not entered and will not enter into any contractual arrangements with respect to the distribution or delivery of Notes except with its affiliates (if any) or with the prior written consent of the Issuer.

Each Bearer Note having a maturity of more than 365 days (including unilateral rights to rollover) and interest coupons pertaining to such Note, if any, will bear the following legend: “Any United States person who holds this obligation will be subject to limitations under the United States income tax laws, including the limitations provided in Sections 165(j) and 1287(a) of the Code.”

Each issuance of Indexed Notes shall be subject to such additional U.S. selling restrictions as the Issuer and the relevant Dealer(s) may agree as a term of the issuance and purchase of such Notes, which additional selling restrictions shall be set out in the applicable Final Terms.

European Economic Area

This Base Prospectus has been prepared on the basis that any offer of Notes in any Member State of the European Economic Area (“EEA”) will be made pursuant to an exemption under Regulation (EU) 2017/1129 (as amended or superseded, the “**Prospectus Regulation**”) from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in that Member State of Notes which are the subject of the offering contemplated in this Base Prospectus may only do so to legal entities which are qualified investors as defined in the Prospectus Regulation, provided that no such offer of Notes shall require the Issuer or any of the Dealers to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case in relation to such offer. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes to any legal entity which is not a qualified investor as defined in the Prospectus Regulation. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes through any financial intermediary, other than offers made by the Dealers, which constitute the final placement of the Notes contemplated in this Base Prospectus.

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes a “retail investor” means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the “**IDD**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Each Dealer has represented and agreed, and each further Dealer appointed under the Program will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by the Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the EEA. For the purposes of this provision:

(a) the expression “retail investor” means a person who is one (or more) of the following:

(i) a retail client as defined in point (11) of Article 4(1) of MiFID II;

(ii) a customer within the meaning of the IDD, where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or

(iii) not a qualified investor as defined in the Prospectus Regulation; and

(b) the expression “an offer” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes.

Each person in a Member State of the European Economic Area who receives any communication in respect of, or who acquires any Notes under, the offers to the public contemplated in this Base Prospectus, or to whom the Notes are otherwise made available, will be deemed to have represented, warranted, acknowledged and agreed to and with each Dealer and the Issuer that it and any person on whose behalf it acquires Notes is not a “retail investor” (as defined above).

United Kingdom

This Base Prospectus has been prepared on the basis that any offer of Notes in the United Kingdom (“UK”) will be made pursuant to an exemption under the UK Prospectus Regulation and the Financial Services and Markets Act 2000 (as amended, the “FSMA”) from the requirement to publish a prospectus for offers of Notes. Accordingly any person making or intending to make an offer in the UK of Notes which are the subject of the offering contemplated in this Base Prospectus may only do so to legal entities which are qualified investors as defined in the UK Prospectus Regulation, provided that no such offer of Notes shall require the Issuer or any of the Dealers to publish a prospectus pursuant to Article 3 of the UK Prospectus Regulation or section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation, in each case in relation to such offer. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes to any legal entity which is not a qualified investor as defined in the UK Prospectus Regulation. Neither the Issuer nor the Dealers have authorised, nor do they authorize, the making of any offer of Notes through any financial intermediary, other than offers made by the Dealers, which constitute the final placement of the Notes contemplated in this Base Prospectus.

The expression “UK Prospectus Regulation” means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “EUWA”).

The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a “retail investor” means a person who is one (or more) of: (i) a retail client, as defined in the FCA Handbook; (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation. Consequently, no key information document required by the PRIIPs Regulation as it forms part of domestic law by virtue of the EUWA (the “UK PRIIPs Regulation”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

Each Dealer has represented and agreed, and each further Dealer appointed under the Program will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by the Base Prospectus as completed by the Final Terms in relation thereto to any retail investor in the UK. For the purposes of this provision:

(a) the expression “retail investor” means a person who is one (or more) of the following:

(i) a retail client, as defined in the FCA Handbook;

(ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify

as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or

(iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation.

(b) the expression “an offer” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes.

Each person in the UK who receives any communication in respect of, or who acquires any Notes under, the offers to the public contemplated in this Base Prospectus, or to whom the Notes are otherwise made available, will be deemed to have represented, warranted, acknowledged and agreed to and with each Dealer and the Issuer that it and any person on whose behalf it acquires Notes is not a “retail investor” (as defined above).

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “**Financial Promotion Order**”); (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations etc.”) of the Financial Promotion Order, (iii) are outside the United Kingdom; or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

Any invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) in connection with the issue or sale of any Notes included in this offering will only be communicated or caused to be communicated in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer and will comply with all applicable provisions of FSMA.

Each Dealer has represented and agreed, and each further Dealer appointed under the Program will be required to represent and agree, that:

- (a) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer;
- (b) it has complied and will comply with all applicable provisions of the FSMA and the Financial Services Act 2012 with respect to anything done by it in relation to the Notes in, from or otherwise involving the United Kingdom;
- (c) in relation to any Notes which have a maturity of less than one year, (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (ii) it has not offered or sold and will not offer or sell any Notes other than to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer.

Japan

The Notes have not been and will not be registered under the Securities and Exchange Law of Japan (the “**Securities and Exchange Law**”), and the Notes have not, directly or indirectly, been offered or sold and will not be, directly or indirectly, offered or sold in Japan or to, or for the benefit of, any resident of Japan (which term as used herein means any person resident in Japan, including any corporation or other entity organized under the laws of

Japan), or to others for re-offering or resale, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the Securities and Exchange Law and any other applicable laws and regulations of Japan.

People's Republic of China

The Notes may not be offered or sold directly or indirectly within the People's Republic of China (the "PRC"). This Base Prospectus or any information contained herein does not constitute an offer to sell or the solicitation of an offer to buy any securities in the PRC. This Base Prospectus, any information contained herein or the Notes have not been, and will not be, submitted to, approved by, verified by or registered with any relevant governmental authorities in the PRC and thus may not be supplied to the public in the PRC or used in connection with any offer for the subscription or sale of the Notes in the PRC. The Notes may only be invested in by PRC investors that are authorized to engage in the investment in the Notes of the type being offered or sold. Investors are responsible for obtaining all relevant governmental approvals, verifications, licenses or registrations (if any) from all relevant PRC governmental authorities, including, but not limited to, the State Administration of Foreign Exchange, the China Securities Regulatory Commission, the China Banking Regulatory Commission, the China Insurance Regulatory Commission and/or other relevant regulatory bodies, and complying with all relevant PRC regulations, including, but not limited to, any relevant foreign exchange regulations and/or overseas investment regulations.

Hong Kong

The Notes have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (i) to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made under that Ordinance; or (ii) in other circumstances which do not result in the document being a "prospectus" as defined in the Companies Ordinance (Cap. 32) of Hong Kong or which do not constitute an offer to the public within the meaning of that Ordinance. No advertisement, invitation or document relating to the Notes which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) has been issued or will be issued in Hong Kong or elsewhere other than with respect to the Notes which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong and any rules made under that Ordinance.

No advertisement, invitation or document relating to the Notes, whether in Hong Kong or elsewhere, which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong) has been issued, or is, or will be, in the possession of the Initial Purchasers for the purposes of issue, and will not be issued, other than with respect to Notes which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the Securities and Futures Ordinance (Cap. 571) and any rules made thereunder.

Singapore

This Base Prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this Base Prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase of the Notes, may not be circulated or distributed nor may the Notes be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to any person in Singapore other than:

- (a) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the "SFA")) pursuant to Section 274 of the SFA; or
- (b) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA and (where applicable) Regulation 3 of the Securities and Futures (Classes of Investors) Regulations 2018 of Singapore.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission (“ASIC”), in relation to the offering. This Base Prospectus does not constitute a prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (the “**Corporations Act**”), and does not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the Notes may only be made to persons (the “**Exempt Investors**”) who are “sophisticated investors” (within the meaning of section 708(8) of the Corporations Act), “professional investors” (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the Notes without disclosure to investors under Chapter 6D of the Corporations Act.

The Notes applied for by Exempt Investors in Australia must not be offered for sale in Australia in the period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This Base Prospectus contains general information only and does not take account of the investment objectives, financial situation or particular needs of any particular person. It does not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this Base Prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Switzerland

The Issuer has not and will not register with the Swiss Financial Market Supervisory Authority (“**FINMA**”) as a foreign collective investment scheme pursuant to Article 119 of the Federal Act on Collective Investment Scheme of 23 June 2006, as amended (“**CISA**”), and accordingly the securities being offered pursuant to this Base Prospectus have not and will not be approved, and may not be licensable, with FINMA. Therefore, the securities have not been authorized for distribution by FINMA as a foreign collective investment scheme pursuant to Article 119 CISA and the securities offered hereby may not be offered to the public (as this term is defined in Article 3 CISA) in or from Switzerland. The securities may solely be offered to “qualified investors,” as this term is defined in Article 10 CISA, and in the circumstances set out in Article 3 of the Ordinance on Collective Investment Scheme of 22 November 2006, as amended (“**CISO**”), such that there is no public offer. Investors, however, do not benefit from protection under CISA or CISO or supervision by FINMA. This Base Prospectus and any other materials relating to the securities are strictly personal and confidential to each offeree and do not constitute an offer to any other person. This Base Prospectus may only be used by those qualified investors to whom it has been handed out in connection with the offer described herein and may neither directly or indirectly be distributed or made available to any person or entity other than its recipients. It may not be used in connection with any other offer and shall in particular not be copied and/or distributed to the public in Switzerland or from Switzerland. This Base Prospectus does not constitute an issue prospectus as that term is understood pursuant to Article 652a and/or 1156 of the Swiss Federal Code of Obligations. The Issuer has not applied for a listing of the securities on the SIX Swiss Exchange or any other regulated securities market in Switzerland, and consequently, the information presented in this Base Prospectus does not necessarily comply with the information standards set out in the listing rules of the SIX Swiss Exchange and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange.

United Arab Emirates (excluding the Dubai International Financial Centre and Abu Dhabi Global Market)

The Notes have not been and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates other than in compliance with the laws of the United Arab Emirates governing the issue, offering and sale of securities. Further, this Base Prospectus does not constitute a public offer of securities in the United Arab Emirates and is not intended to be a public offer. This Base Prospectus has not been approved by or filed with the Central Bank of the United Arab Emirates or the Securities and Commodities Authority.

Dubai International Financial Centre

This document is for distribution only to persons who (a) are outside the Dubai International Financial Centre, (b) are persons who meet the Professional Client criteria set out in Rule 2.3.4 of the DFSA Conduct of Business Module or (c) are persons to whom an invitation or inducement in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons” for the purposes of this paragraph). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

This Base Prospectus relates to an “Exempt Offer” as prescribed under, and in accordance with the Markets Rules of the Dubai Financial Services Authority (“DFSA”). This Base Prospectus is intended for distribution only to persons of a type specified in the Markets Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this Base Prospectus nor taken steps to verify the information set forth herein and has no responsibility for the Base Prospectus. The Notes to which this Base Prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the Notes offered should conduct their own due diligence on the Notes. If you do not understand the contents of this Base Prospectus you should consult an authorized financial advisor.

Abu Dhabi Global Market

This Base Prospectus is for distribution only to persons who (a) are outside the Abu Dhabi Global Market, or (b) are Authorised Persons or Recognised Bodies (as such terms are defined in the Financial Services and Markets Regulations 2015 (“FSMR”)), or (c) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 18 of FSMR) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons” for the purposes of this paragraph). This Base Prospectus is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

This Base Prospectus is an “Exempt Offer” as prescribed under, and in accordance with, the Market Rules of the ADGM Financial Services Regulatory Authority. This Exempt Offer document is intended for distribution only to persons of a type specified in the Market Rules. It must not be delivered to, or relied on by, any other person. The ADGM Financial Services Regulatory Authority has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The ADGM Financial Services Regulatory Authority has not approved this Exempt Offer document nor taken steps to verify the information set out in it, and has no responsibility for it. The Notes to which this Exempt Offer relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the Notes offered should conduct their own due diligence on the Notes. If you do not understand the contents of this Exempt Offer document you should consult an authorised financial advisor.

Brazil

The offer of Notes described in this Base Prospectus have not been and will not be issued nor publicly placed, distributed, offered or negotiated in the Brazilian capital markets. The issuance of any such Notes will not be registered with the *Comissão de Valores Mobiliários* (“CVM” or Securities Commission). Any public offering or distribution, as defined under Brazilian laws and regulations, of any Notes in Brazil is not legal without prior registration under Law No. 6,385/76 and CVM Resolution No. 160. Documents relating to the offering of any Notes, as well as information contained therein, may not be publicly supplied in Brazil, nor be used in connection with any public offer for subscription or sale of any Notes in Brazil.

Peru

The information contained and the Notes described in this Base Prospectus are not being publicly marketed or offered in Peru and will not be distributed or caused to be distributed to the general public in Peru. Peruvian securities laws and regulations on public offerings will not be applicable to the offering of the Notes and therefore, the disclosure obligations set forth therein will not be applicable to the Issuer or the sellers of the Notes before or after their acquisition by prospective investors. The Notes and the information contained in this Base Prospectus have not been and will not be reviewed, confirmed, approved or in any way submitted to the SMV nor have they been registered

under the Peruvian Securities Market Law (*Ley del Mercado de Valores*) or any other Peruvian regulations. Accordingly, the Notes cannot be offered or sold within Peruvian territory except to the extent any such offering or sale qualifies as a private offering under Peruvian regulations and complies with the provisions on private offerings set forth therein.

The Notes may be registered with the Foreign Investment and Derivatives Instruments Registry (*Registro de Instrumentos de Inversión y de Operaciones de Cobertura de Riesgo Extranjeros*) of the Peruvian Superintendency of Banks, Insurance and Private Pension Funds Administrators (*Superintendencia de Bancos, Seguros y Administradoras Privadas de Fondos de Pensiones*) in order to make the Notes eligible for investment by Peruvian Private Pension Funds Administrators.

The Notes may not be offered or sold in Peru except in compliance with the securities law thereof.

Chile

The Notes may not be publicly offered or sold, directly or indirectly, in Chile, or to any resident of Chile, except as permitted by applicable Chilean law. The Notes will not be registered under Law No. 18,045, as amended (*Ley de Mercado de Valores* or the securities market law of Chile) with the Commission for the Financial Markets (*Comisión para el Mercado Financiero*, together with formerly the Superintendency of Securities and Insurance (*Superintendencia de Valores y Seguros*) and any other predecessor agency, commission or superintendency, the “CMF”) and, accordingly, the Notes cannot and will not be offered or sold to persons in Chile except in circumstances which have not resulted and will not result in a public offering under Chilean law, and in compliance with Rule (Norma de Carácter General) No. 336, dated June 27, 2012, issued by the CMF (“**CMF Rule 336**”). The Notes being offered will not be registered under the Securities Market Law in the Securities Registry (*Registro de Valores*) or in the Foreign Securities Registry (*Registro de Valores Extranjeros*) of the CMF and, therefore, the Notes are not subject to the supervision of the CMF. As unregistered securities, the Issuer is not required to disclose public information about the Notes in Chile. Accordingly, the Notes cannot and will not be publicly offered to persons in Chile unless they are registered in the corresponding securities registry. The Notes may only be offered in Chile in circumstances that do not constitute a public offering under Chilean law or in compliance with CMF Rule 336 of the CMF. Pursuant to CMF Rule 336, the Notes may be privately offered in Chile to certain “qualified investors” identified as such therein (which in turn are further described in General Rule No. 216, dated June 12, 2008, of the CMF).

Canada

The Notes may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Base Prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory for particulars of these rights or consult with a legal advisor.

Taiwan

The Notes will not be registered with the Financial Supervisory Commission of Taiwan pursuant to relevant securities laws and regulations and the Notes may not be sold, issued or offered within Taiwan through a public offering or in a circumstance which constitutes an offer within the meaning of the Securities and Exchange Act of Taiwan requiring registration or approval of the Financial Supervisory Commission of Taiwan. No person or entity in Taiwan has been authorized to offer, sell, give advice regarding or otherwise intermediate the offering and sale of the Notes in Taiwan.

General

Each Dealer has acknowledged and each further Dealer appointed under the Program will be required to acknowledge that it will (to the best of its knowledge and belief) comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Notes or possesses or distributes this Base Prospectus and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and neither the Issuer nor any of the other Dealers shall have any responsibility therefor.

None of the Issuer and the Dealer represents that Notes may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

With regard to each Tranche, the relevant Dealer will be required to comply with such other additional restrictions as the Issuer and the relevant Dealer shall agree and as shall be set out in the applicable Final Terms.

LEGAL MATTERS

The validity of the issuance of the Notes and certain other matters in connection with Chilean law will be passed upon for the Issuer by its general counsel. The validity of the Notes will be passed upon for the Issuer by Allen Overy Shearman Sterling US LLP, its special United States counsel. The validity of the Notes will also be passed upon for the Dealers by Paul Hastings LLP, special United States counsel to the Dealers.

INDEPENDENT AUDITORS

The Issuer's Audited Financial Statements included in this Base Prospectus have been audited by PricewaterhouseCoopers Consultores, Auditores y Compañía Limitada, independent auditors, as stated in their reports appearing therein. The address of PricewaterhouseCoopers Consultores, Auditores y Compañía Limitada is Torre de la Costanera Avenida Isidora Goyenechea 2.800, Piso 10, Las Condes, Santiago, Chile.

GENERAL INFORMATION

1. Application will be made to the SGX-ST for permission to deal in, and for quotation of, any Notes which are agreed at the time of issue thereof to be so listed on the SGX-ST. The Issuers may also apply to list, and for quotation of, any Notes in other stock exchanges outside the United States. There can be no assurance that such listings will occur on or prior to the date of issue of such Notes or at all and/or SGX-ST or other stock exchange for the listing of the Notes of any Series will be approved. The admission of any Notes to the Official List of the SGX-ST or to such other stock exchange, is not to be taken as an indication of the merits of the applicable Issuer, the Program or such Notes. The SGX-ST or any other stock exchange assume no responsibility for the accuracy of any of the statements made, opinions expressed or reports contained herein. The Notes will trade on the SGX-ST in a minimum board lot size of S\$200,000 or its equivalent in other currencies so long as any of the Notes remain listed on the SGX-ST. For so long as any Notes are listed on the SGX-ST or on any other stock exchange and the rules of SGX-ST or such other stock exchange so require, the Issuers shall appoint and maintain a paying agent in Singapore or in the country of such other stock exchange where such Notes may be presented or surrendered for payment or redemption, in the event that any of the global Notes representing such Notes is exchanged for definitive Notes. In addition, in the event that any of the global Notes representing such Notes is exchanged for definitive Notes, an announcement of such exchange shall be made by or on behalf of the Issuer through the SGX-ST or any other applicable stock exchange where the Notes are listed and such announcement will include all material information with respect to the delivery of the definitive Notes, including details of the paying agent in Singapore or in the country of such other stock exchange.

Notes may be issued under the Program which will not be listed on the SGX-ST or any other stock exchange, listing authority or quotation system or which will be listed on such stock exchange, listing authority or quotation system as the relevant Dealer(s) and the Issuer may agree.

2. The Bearer Notes and Registered Notes represented by a European Unrestricted Global Note are expected to be accepted for clearance through Euroclear and Clearstream. The Common Code and ISIN number for each Tranche of Bearer Notes and the ISIN number as well as the Common Code for each Tranche of Registered Notes will be contained in the Final Terms relating thereto.
3. The address of Euroclear is 1 Boulevard du Roi Albert II, B-1210 Brussels, Belgium and the address of Clearstream, Luxembourg is 42 Avenue JF Kennedy, L-1855 Luxembourg. The address of any alternative clearing system will be specified in the applicable Final Terms.
4. All consents, approvals, authorizations and other orders of all regulatory authorities under the laws of Chile have been given for the establishment of the Program, the issue of Notes under the Program and the execution of the Fiscal Agency Agreement and are in full force and effect.
5. Except as disclosed herein, neither the Issuer nor any of its subsidiaries is involved in any governmental, legal or arbitration proceedings which may have, or have had in the recent past, any significant effect on its financial position or profitability nor, so far as the Issuer is aware, are any such governmental, legal or arbitration proceedings pending or threatened.
6. Save as disclosed herein, there has been no significant change in the Issuer's financial or trading position or the financial or trading position of it and its subsidiaries and affiliates taken as a whole since December 31, 2024, being the date of its most recently published audited financial statements included in this Base Prospectus, and no material adverse change in its financial position or prospects or of the financial position or prospects of the Issuer and its subsidiaries and affiliates taken as a whole since December 31, 2024, being the date of its most recently published audited financial statements.
7. Banco Itaú Chile is a corporation incorporated in Chile. The business address of the members of its Board of Directors is Avenida Presidente Riesco 5537, 20th floor, Las Condes, Región Metropolitana de Santiago, Chile. None of the Bank's directors and the majority of its executive officers are not residents of the United States, the Bank is not a resident of the United States, and all or a substantial portion of the Bank's assets and those of such persons are located outside the United States. It may not be possible for investors to effect service of process within the United States upon the Issuer or such persons, or to enforce against any of them in United States courts judgments obtained in United States courts predicated upon the civil liability provisions of the federal securities laws of the United States.

8. Copies in English of the Issuer's by-laws (*estatutos*) and the Audited Financial Statements included in this Base Prospectus, may be obtained and copies of the Fiscal Agency Agreement and Final Terms will be available at the specified offices of each of the Paying Agents during normal business hours, so long as any of the Notes are outstanding.
9. The information contained in this Base Prospectus is true and correct and the Issuer accepts responsibility for such information.

ANNEX A – FORM OF FINAL TERMS OF THE NOTES

The Final Terms in respect of each Tranche of Notes will be substantially in the following form, duly supplemented (if necessary), amended (if necessary) and completed to reflect the particular terms of the relevant Notes and their issue. Text in this section appearing in italics does not form part of the form of the Final Terms but denotes directions for completing the Final Terms. Where the Notes are to be listed on a stock exchange or quotation system other than SGX-ST, the applicable Issuer will make the requisite filings or submissions to such stock exchange or system in accordance with rules therefrom.

FINAL TERMS

(IN CONNECTION WITH THE BASE PROSPECTUS DATED NOVEMBER 12, 2025)

Final Terms No. [] dated [date]

[Banco Itaú Chile
(a bank incorporated under the laws of the
Republic of Chile)]
[Itaú Chile New York Branch]

U.S.\$[]
Global Medium-Term Note Program
Series No: []
[TITLE OF NOTES] DUE []
Issue price: []

Part A - Contractual Terms

This document constitutes the Final Terms of the Notes described herein and must be read in conjunction with the base prospectus dated November 12, 2025 [and the supplement(s) to it dated [•]] ([collectively,] the “**Base Prospectus**”).

These Final Terms have been prepared on the basis that any offer of Notes in any Member State of the European Economic Area (“**EEA**”) will be made pursuant to an exemption under Regulation (EU) 2017/1129, as amended or superseded (the “**Prospectus Regulation**”) from the requirement to publish a prospectus for offers of Notes.

These Final Terms have been prepared on the basis that any offer of Notes in the United Kingdom (“**UK**”) will be made pursuant to an exemption under the UK Prospectus Regulation and the Financial Services and Markets Act 2000 (as amended, the “**FSMA**”) from the requirement to publish a prospectus for offers of Notes. The expression “**UK Prospectus Regulation**” means the Prospectus Regulation as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “**EUWA**”).

Full information on the issuer and the offer of the Notes is only available on the basis of the combination of these Final Terms and the Base Prospectus.

Prohibition of Sales to EEA Retail Investors - The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the EEA. For these purposes, a “retail investor” means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended, the “**IDD**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

Prohibition of Sales to UK Retail Investors - The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom. For these purposes, a “retail investor” means a person who is one (or more) of: (i) a retail client, as defined in the FCA Handbook; (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of the UK Prospectus Regulation. Consequently, no key information document required by the PRIIPs Regulation as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

MIFID II Product Governance / Professional Investors and ECPS Only Target Market. Solely for the purposes of [the/ each] manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in MiFID II; and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. [Consider any negative target market.] Any person subsequently offering, selling or recommending the Notes (for the purposes of this paragraph, a “**distributor**”) should take into consideration the manufacturer[‘s/s’] target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer[‘s/s’] target market assessment) and determining appropriate distribution channels.

UK MiFIR Product Governance / Professional Investors and ECPS Only Target Market. Solely for the purposes of [the/ each] manufacturer’s product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is only eligible counterparties as defined in the FCA Handbook Conduct of Business Sourcebook (“**COBS**”), and professional clients, as defined in Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA (“**UK MiFIR**”); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. [Consider any negative target market.] Any person subsequently offering, selling or recommending the Notes (for the purposes of this paragraph, a “**distributor**”) should take into consideration the manufacturer[‘s/s’] target market assessment; however, a distributor subject to the FCA Handbook Product Intervention and Product Governance Sourcebook (the “**UK MiFIR Product Governance Rules**”) is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer[‘s/s’] target market assessment) and determining appropriate distribution channels.

This document is for distribution only to persons who (i) have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “**Financial Promotion Order**”); (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations etc.”) of the Financial Promotion Order, (iii) are outside the United Kingdom; or (iv) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

1. **General Information:**

(i)	Issuer:	[Banco Itaú Chile] [Itaú Chile New York Branch]
(ii)	Series Number:	[•]
(iii)	Tranche Number:	[•] [The Notes will be fungible with, have identical terms and conditions (other than issue date and issue price) as, will

constitute part of the same series as, and vote together as a single class with, the [●] notes due [●], issued on [●]]

- (iv) Trade Date: [●]
- (v) Settlement Date (Original Issue Date): [●]
- (vi) Maturity Date: [●]
- (vii) Specified Currency: [●]
- (viii) Denominations: [●]
- (ix) Principal Amount (in Specified Currency): [●]

- (ii) Election Date: [•]
- (iii) Final Maturity: [•]
9. **Foreign Currency Notes:**
- (i) Exchange Rate Agent: [•]
- (ii) Exchange Rate: [•]
10. **Form of Notes:**
- (i) Form: [Temporary global Note exchangeable for permanent global Note] [Permanent global Note]
[Bearer Note]
[Registered Note]
[Exchange of Registered Notes into Registered Notes in other authorized denominations]
[Exchange of temporary global Notes into definitive Bearer Notes]
[Exchange of permanent global Notes into definitive Bearer Notes]
- (ii) New Global Note: Yes/No]
11. **U.S. Selling Restrictions:** [Regulation S Compliance Category 2]; [Regulation S Compliance Category 3]; [TEFRA C/TEFRA D/TEFRA not applicable]
12. **Distribution:** Regulation S
- The Dealers are offering the Notes, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the Notes, and other conditions contained in the Dealer Agreement and the related agreement for the sale of Notes, such as the receipt by the Dealers of officer's certificates and legal opinions. The Dealers reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.
13. **Denominations:** The Notes will be available in denominations of [•] and integral multiples of [•] in excess thereof.
14. **Managers:** [•]: [•](*List all Managers (legal names)*)
(*List amount*)
- (i) The Notes are being purchased[, on a several and not joint basis,] by the following financial institutions (each a "Manager" and collectively, the Total: [•])

“Managers”) in the respective amounts set forth next to the name of each Manager pursuant to a Terms Agreement between Issuer and the Managers dated [●], executed under the Dealer Agreement. To the extent that any of the Managers are not named as Dealers in the Dealer Agreement, Banco Itaú Chile has appointed them as Dealers thereunder for this transaction pursuant to the relevant Terms Agreement.

(ii) Stabilizing manager(s): [●][Not applicable]

Part B Other Information

1. Admissions to Listing and Trading:

[Application has been made by the Issuer (or on its behalf) for the Notes to be admitted to listing on the Official List of the Singapore Exchange Securities Trading Limited.]

[Other admissions to listing and trading (including, but not limited to, the Euro MTF) to be specified if applicable]

Estimated expenses related to the admission to trading:

2. Ratings:

The Notes to be issued [have been][are expected to be] rated:

(i) Moody's: [●][Not applicable]

(ii) Standard & Poor's: [●][Not applicable]

(iii) Fitch: [●][Not applicable]

(iv) [Other]: [●] [Insert *the full legal name of credit rating agency*]

[[Insert the full legal name of credit rating agency] is [not] incorporated in the European Union [or][and] registered under Regulation (EC) No 1060/2009, as amended by Regulation (EC) No 513/2011.]

A rating is not a recommendation to buy, sell or hold Notes issued under the Program and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. A suspension, reduction or withdrawal of the rating assigned to the Issuer may adversely affect the market price of the Notes issued under the Program.

3. Interests of Natural and Legal Persons Involved in the Issue:

[●]/[So far as the Issuer is aware, no person involved in the offer of the Notes has an interest material to the offer. The Dealer(s) and its affiliates have engaged, and/or may in the future engage, in investment banking

and/or commercial banking transactions with, and/or may perform other services for, the Issuer and its affiliates in the ordinary course of business. See “Plan of Distribution” in the Base Prospectus.]

4. Fixed Rate Notes only Yield:

- (i) Indication of yield as of the Original Issue Date: [•][Not applicable]

5. Operational Information:

- (i) ISIN: [•]
(ii) Common Code: [•]
(iii) Book-entry Clearing Systems: [Euroclear Bank S.A./N.V.][Clearstream Banking, *société anonyme*]
(iv) Names and addresses of additional Paying Agent(s) (if any): [Not applicable] [•]

- (v) [Intended to be held in a manner which would allow Eurosystem eligibility:] [Yes][No]
[Note that the designation “yes” simply means that the Notes are intended upon issue to be deposited with one of the international central securities depositaries as common safekeeper and does not necessarily mean that the Notes will be recognized as eligible collateral for Eurosystem monetary policy and intra-day credit operations by the Eurosystem either upon issue or at any or all times during their life. Such recognition will depend upon satisfaction of the Eurosystem eligibility criteria.] *[include this text if “yes” selected in which case Bearer Notes must be issued in NGN form]*

[No. Whilst the designation is specified as “No” at the date of these Final Terms, should the Eurosystem eligibility criteria be amended in the future such that the Notes are capable of meeting them the Notes may then be deposited with one of the ICSDs as common safekeeper. Note that this does not necessarily mean that the Notes will then be recognized as eligible collateral for Eurosystem monetary policy and intraday credit operations by the Eurosystem at any time during their life. Such recognition will depend upon the ECB being satisfied that Eurosystem eligibility criteria have been met.]

RESPONSIBILITY STATEMENT

The Issuer accepts responsibility for the information contained in these Final Terms which, when read together with the Base Prospectus referred to above, contain all information that is material to the offering of the Notes contemplated hereby.

[ADDITIONAL RISK FACTORS]

[Include any additional risk factors not already in the Base Prospectus.]

[ADDITIONAL ISSUER DISCLOSURE]

[Include disclosure of any material information to be conveyed that is not already in the Base Prospectus.]

[CERTAIN U.S. TAX CONSIDERATIONS]

Include disclosure of any U.S. tax considerations to be conveyed that are not already in the Base Prospectus.]

GOVERNING LAW AND JURISDICTION

The Notes and any non-contractual obligations arising out of or in connection with them are governed by, and shall be construed in accordance with, New York law. The courts of New York are to have jurisdiction to settle any disputes which may arise out of or in connection with the Notes or the Fiscal Agency Agreement and accordingly any legal action or proceedings arising out of or in connection with the Notes or the Fiscal Agency Agreement may be brought in such courts.

INDEPENDENT AUDITOR'S REVIEW REPORT
(This translation has been prepared and reviewed by PwC Chile)

Santiago April 29, 2025

To the Shareholders and Directors
Banco Itaú Chile

Introduction

We have reviewed the accompanying interim consolidated classified statement of financial position of Banco Itaú Chile and subsidiaries as of March 31, 2025, and the related interim consolidated statements of income and other comprehensive income, changes in equity and cash flows for the three-month period then ended, and the related interim consolidated notes, comprising material accounting policy information and other explanatory information. Management is responsible for the preparation and fair presentation of these interim consolidated financial statements in accordance with IAS 34 "Interim Financial Reporting" as incorporated into International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board. Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, 'Review of interim financial information performed by the independent auditor of the entity.' A review of interim consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Chilean Generally Accepted Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements do not present fairly, in all material respects, the interim consolidated financial position of the entity as of March 31, 2025, and the results of its operations and its cash flows for the three month period then ended in accordance with IAS 34 "Interim Financial Reporting" as incorporated into International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board.

Other matters

The Chilean Accountants' Association A.G. approved that the Generally Accepted Auditing Standards in Chile fully and unreservedly adopt the International Standards on Auditing (ISA) issued by the IAASB for audits of financial statements prepared for the period beginning on or after January 1, 2025.

The audit of the consolidated financial statements of Banco Itaú Chile and subsidiaries as of December 31, 2024, which include the consolidated statement of financial position as of the same date, included in the accompanying interim consolidated financial statements, was conducted in accordance with Chilean Generally Accepted Auditing Standards in Chile effective at that date, for which we issued an unqualified opinion on February 26, 2025. Likewise, the review of the interim consolidated financial statements of Banco Itaú Chile and subsidiaries as of March 31, 2024, which includes the interim consolidated statements of income and other comprehensive income, changes in equity and cash flows for the three-month period ended March 31, 2024, also included in the accompanying interim consolidated financial statements, was conducted in accordance with Chilean Generally Accepted Auditing Standards in Chile applicable to reviews of interim financial information effective at that date, for which we issued an unqualified conclusion on April 24, 2024.

Note 1 - Background of the Institution

General Information – Background of Banco Itaú Chile and subsidiaries

Banco Itaú Chile (ex Itaú CorpBanca) (hereinafter “Itaú Chile” or “the Bank”) is a corporation incorporated under the laws of the Republic of Chile and regulated by the Commission for the Financial Market (hereinafter CMF for its acronym in Spanish). As of June 1, 2019, the CMF took over the functions of the Superintendency of Banks and Financial Institutions (“SBIF”) in accordance with Decree with Force of Law (DFL) 3 dated January 12, 2019, which set a new consolidated, systematized and agreed wording for the General Banking Law. The entity is the consequence of the merger of Banco Itaú Chile and CorpBanca, which took place on April 1, 2016, with the latter being the legal successor¹.

The Bank is controlled by Itaú Unibanco, which holds a 67.42% ownership. The remaining 32.58% is owned by minority shareholders².

Banco Itaú Chile is headquartered in Chile and has operations in Colombia and Panamá. In addition, Banco Itaú Chile has a branch in New York and a representative office in Lima³. The Bank has total consolidated assets for MCh\$41,021,041 (MUS\$42,966) and its consolidated equity for MCh\$4,035,894 (MUS\$4,277), Focused on large and medium size companies and people, Itaú CorpBanca offers universal banking services.

The legal address of Banco Itaú Chile is Av. Presidente Riesco 5537, Las Condes, Santiago, Chile, and its web site is www.itaú.cl.

The Interim Consolidated Financial Statements as of March 31, 2025, were approved by the Board of Directors on April 29, 2025.

¹ The business combination was a “reverse acquisition” as established in IFRS 3, “Business Combinations”, in which Banco Itaú Chile is the successor for accounting purposes and CorpBanca is the legal successor.

² The percentage of minority interest has been rounded for presentation in this report. This percentage has been calculated on the basis of the total not rounded number of shares.

³ None of the markets in which Itaú Chile and subsidiaries operate qualify as a hyperinflationary economy.

Note 2 - Summary of Significant Accounting Policies

a) Accounting Year

The Interim Consolidated Financial Statements are referred as of March 31, 2025 and December 31, 2024 and cover the three months periods ended as of March 31, 2025 and 2024.

b) Basis of preparation of the Interim Consolidated Financial Statements

These Interim Consolidated Financial Statements have been prepared in accordance with the Banking Compendium of Accounting Standards (here in after "the compendium") issued by the CMF, and in force since January 1, 2022. Banks must use the accounting criteria set forth in the compendium and in everything that is not dealt with by it and does not contradict its instructions, they must adhere to International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). If there are discrepancies between IFRS and the accounting criteria set forth in the compendium, the latter will prevail.

Likewise, these Interim Consolidated Financial Statements in connection with the application of IAS 34 "Interim Financial Reporting", are prepared mainly with the intention of updating the content of the last Annual Consolidated Financial Statements, emphasizing new activities, events and circumstances that occurred during the three months periods ended as of March 31, 2025, subsequent to year-end, and not duplicating the information previously published in the last Consolidated Financial Statements.

These Interim Consolidated Financial Statements, by express provisions in Chapter C2, must include all the notes that apply to the annual financial statements in accordance with Chapter C1, plus additional requirements related to the disclosures of components of the Interim Consolidated Statements of Income for the period.

Notwithstanding the foregoing, for a correct understanding of the information included in these Interim Consolidated Financial Statements, they should be read together with the annual Consolidated Financial Statements for the immediately preceding annual period (information available at www.itaú.cl).

The notes to these Interim Consolidated Financial Statements contain additional information to that presented in the Interim Consolidated Statements of Financial Position, the Interim Consolidated Statements of Income, the Interim Consolidated Statements of Other Comprehensive Income, the Interim Consolidated Statements of Changes in Equity and the Interim Consolidated Statements of Cash Flows. On them descriptive and disaggregated information is presented. They provide narrative descriptions or disaggregation of such Interim Consolidated Financial Statements in a clear, relevant, reliable, and comparable manner. These Interim Consolidated Financial Statements as of March 31, 2025 and 2024 have not been audited.

Note 2 - Summary of Significant Accounting Policies, continued

c) Consolidation criteria

The same accounting policies, presentation and calculation methods applied in these Interim Consolidated Financial Statements were used in the preparation of the separate Financial Statements of Banco Itaú Chile and subsidiaries (hereinafter "Group" or the "Bank"), corresponding to the balances as of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024 and include the adjustments and reclassifications necessary to standardize the accounting policies and valuation criteria applied by the Bank, in accordance with the standards established by the compendium.

Intercompany balances and any unrealized income or loss arising from intercompany transactions are eliminated upon consolidation during the preparation of the Interim Consolidated Financial Statements.

Assets, liabilities, income, and results of operations of subsidiaries, net of consolidation adjustments, represent 20%, 22%, 26% and 14% respectively, of total consolidated assets, liabilities, income, and operating results as of March 31, 2025 (20% and 22% as of December 31, 2024, of our consolidated total assets and liabilities; and 20.3% and 6.9% of our consolidated income, and operating results as of March 31, 2024).

(i) Controlled entities

The Bank, regardless of the nature of its involvement with an entity (the investee), shall determine whether it is a parent by assessing whether it controls the investee.

The Bank controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Thus, the Bank controls an investee if and only if has all the following:

- 1) Power over the investee, which is related to the existing rights that give the Bank the current ability to direct the relevant activities, these being those that significantly affect the investee's returns;
- 2) Exposure, or rights, to variable returns from its involvement with the investee;
- 3) Ability to use its power over the investee to affect the amount of the Bank's returns.

When the Bank has less than a majority of the voting rights over an investee, but such voting rights are sufficient to have the actual ability to direct the relevant activities, then it will be concluded that the Bank has control over the investee.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank considers all relevant factors and circumstances when assessing if the voting rights are sufficient to obtain control, these include:

- The amount of voting rights held by the Bank in relation to the amount and dispersion of those held by other vote holders.
- Potential voting rights held by the Bank, other voting holders or other parties.
- Rights that arise from other contractual agreements.
- Any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time those decisions need to be made, including the patterns of voting behavior in previous shareholders meetings.

The Bank reassesses whether or not it has control over an investee when facts and circumstances indicate that there are changes in one or more of the control elements listed above.

The Financial Statements of the controlled companies are consolidated with those of the bank through the global integration method (line by line). In accordance with this method, all balances and transactions between consolidated companies are eliminated through the consolidation process. Therefore, the Interim Consolidated Financial Statements refer to assets, liabilities, equity, income, expenses, and cash flows of the parent and its subsidiaries presented as if they were a single economic entity.

The Bank prepares their Interim Consolidated Financial Statements using uniform accounting policies for transactions and other events that, being similar, have occurred in similar circumstances.

The following table details the entities controlled by Banco Itaú Chile, therefore, they are part of the consolidation perimeter:

	Market	Country	Functional Currency	Percentage of ownership					
				As of March 31, 2025			As of December 31, 2024		
				Direct	Indirect	Total	Direct	Indirect	Total
			%	%	%	%	%	%	%
Itaú Corredores de Bolsa Ltda. (1)	Domestic	Chile	\$	99.987	0.013	100.000	99.987	0.013	100.000
Itaú Administradora General de Fondos S.A. (1)		Chile	\$	99.994	0.006	100.000	99.994	0.006	100.000

Itaú (Panamá) S.A. (3)		Panamá	US\$	—	99.462	99.462	—	99.462	99.462
Itaú Holding Colombia S.A.S (2)		Colombia	COP\$	100.000	—	100.000	100.000	—	100.000

- (1) Company regulated by the Financial Market Commission (CMF) of Chile.
 (2) Companies regulated by the Colombian Financial Superintendency (CFS), which has a supervision agreement with the CMF.
 (3) Company regulated by the Superintendency of Banks of Panamá.
 (4) Company regulated by Office of the Comptroller of the Currency (OCC) and Federal Reserve (FED).

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Associated entities and/or business support

Associated entities are those over which the Bank has significant influence; although not control or joint control. If the Bank holds, directly or indirectly (e.g. through subsidiaries), 20% or more of the voting power of the investee, it is presumed that the Bank has significant influence, unless it can be clearly demonstrated that this is not the case, and subsequently increased or decreased to recognize either the Bank's proportional share in the net profit or loss of the associate and other movements recognized in its equity. The lower value arising from the acquisition of an associate is included in the book value of the investment net of any accumulated impairment loss.

Other factors considered to determine the significant influence on an entity are the representations in the Board of Directors and the existence of material transactions. The existence of these factors could determine the existence of significant influence on an entity, despite having a participation of less than 20% of the shares with the right to vote.

The following entities are considered "Associated entities", in which the Bank has participation and are accounted for by applying the equity method, according to IAS 28 "Investments in Companies and Joint Ventures".

Name of the Associates	Main Activity	Place of Operation	As of March 31, 2025	As of December 31, 2024
			% interest	% interest
Transbank S.A.	Credit and debit card services	Santiago, Chile	8.7188 %	8.7188 %
Combank S.A.	High-value payment clearing house	Santiago, Chile	10.3295 %	10.3295 %
Imerc OTC S.A.	Administration of financial instrument clearing and settlement systems	Santiago, Chile	8.6624 %	8.6624 %

(iii) Investments in other companies

Investments in other companies, represented by shares or rights in other companies, are those in which the Bank has neither control nor significant influence. These equity instruments must be measured in compliance with IFRS 9, at their fair value; however, equity instruments that are neither held for trading and on which the equity method is not applied for investments in companies with significant influence ("associates" or "joint ventures") according to IAS 28, may be recorded after their initial recognition and irrevocably at fair value, with variations recognized in Statements of Other Comprehensive Income instead of as "Non-trading financial assets mandatorily at fair value through profit or loss". Dividends received from these investments are recorded in "Income (loss) from investments in companies" in the Interim Consolidated Statement of Income. These instruments are not subject to the impairment model of IFRS 9.

**Note 2 - Summary of Significant Accounting Policies, continued****(iv) Funds management, trust business and other related businesses**

The Bank and its subsidiaries manage assets held in publicly offered investment funds and other investment vehicles on behalf of investors and receive market-rate compensation for providing this type of services. Managed funds belong to third parties and, therefore, are not included in the Interim Consolidated Statement of Financial Position.

The Bank provides trust commissions and other fiduciary services that result in the participation or investment of assets by clients. Assets held in a fiduciary activity are not reported in the Interim Consolidated Financial Statements, since they are not Bank assets and there is no control over them. Contingencies and commitments arising from this activity are disclosed in Note 29 "Contingencies and Commitments", letter c) Responsibilities recorded in off-balance-sheet accounts.

In accordance with IFRS 10 "Consolidated Financial Statements" for consolidation purposes, the role of the Bank and its subsidiaries with respect to the managed funds must be evaluated to determine whether it is acting as Agent or Principal. According to this standard, an Agent is a party primarily engaged in acting on behalf and for the benefit of another party or parties (the Principal or Principals) and, therefore, it does not control the investee when it exercises decision-making authority. This evaluation must take into account the following aspects:

- Scope of its decision-making authority over the investee.
- Rights held by other parties.
- The remuneration to which it is entitled to in accordance with the remuneration agreements.
- Decision-maker's exposure to variability of returns from other interests that it holds in the investee.

The Bank does not control or consolidate any trusts or other entities related to this type of business.

The Bank manages the funds on behalf and for the benefit of investors, acting solely as an Agent. The assets managed by the Bank and its subsidiaries are owned by third parties. Under this category, and in accordance with the aforementioned standard, they do not control the assets when they exercise their decision-making authority. Therefore, as of March 31, 2025 and December 31, 2024 they act as Agents and, therefore, none of these investment vehicles is consolidated.

d) Non-controlling interest

Non-controlling interest represents the portion of net income and net assets which the Bank does not own, either directly or indirectly. It is presented as "Attributable to non-controlling interest" separately in the Interim Consolidated Statement of Income, and separately from equity in the Consolidated Other Comprehensive Income.

Additionally, the non-controlling interests in the Interim Consolidated Statements of Financial Position will be presented, within the equity under item "Non-controlling interest", separately from the equity attributable to owners of the Bank. Changes in the ownership interest of a parent in a subsidiary that do not result in a loss of control are equity transactions (i.e., transactions with owners in their capacity as owners).

**Note 2 - Summary of Significant Accounting Policies, continued**

The Bank attributes the result of the year and each component of other comprehensive income to the owners of the Bank and to the non-controlling interests. The Bank also attributes the total integral result to the owners of the Bank and to the non-controlling interests even if the results of the non-controlling interests give rise to a debit balance.

e) Business combinations, Goodwill and Intangible Assets

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the sum of the consideration transferred, measured at its fair value at the acquisition date, and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the share, under the equity method, of the identifiable net assets acquired. Acquisition costs incurred are expensed and included in administrative expenses.

When Banco Itaú Chile and its subsidiaries (the Group) acquires a business, evaluates the identifiable assets acquired and liabilities assumed to determine proper classification and designation based on contractual conditions, economic circumstances, and other relevant conditions as of the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree and identification of intangible assets. Goodwill, defined as the difference between the consideration transferred and the amount recognized for the non-controlling interest in the net identifiable assets acquired and liabilities assumed, is measured initially at cost. If this consideration is less than the fair value of the net assets of the acquired subsidiary, the difference is recognized directly in profit or loss as of the acquisition date. While intangible assets are initially recorded at the value assigned to the identifiable asset in the business combination.

After initial recognition, both Goodwill and any identifiable or non-identifiable intangible assets are measured at cost less any accumulated impairment losses. Goodwill acquired in a business combination is assigned, from the date of acquisition, to each of the Group's cash generating units (CGU) that are expected to benefit from the combination, independently of whether other assets or liabilities of the acquiree are assigned to those units.

When goodwill is allocated to a CGU and an operation within that unit is sold, the goodwill associated with that operation is included in the carrying amount of the operation sold when determining the gain or loss on disposal. Goodwill that is derecognized under such circumstances is measured on the basis of the relative values of the operation disposed of and the retained portion of the CGU.

f) Common control transaction

A common control transaction is a transfer of assets or an exchange of equity interests among entities under the same parent's control. A common control transaction has no effect on the parent's Consolidated Financial Statements. Net assets are derecognized by the transferor and recognized by the transferee at their carrying amount. Any difference between the value of the item transferred or received and the carrying amount of the net assets is recognized in equity in the separate financial statements of the transferring and receiving entities and eliminated on consolidation.

Note 2 - Summary of Significant Accounting Policies, continued

g) Functional and presentation currency

The Bank has defined as its functional and presentation currency the Chilean peso, financial figures are expressed in millions of Chilean pesos (MCh\$), rounded to the nearest unit, for the purposes of these Interim Consolidated Financial Statements, which is the currency of the primary economic environment in which the Bank operates and the currency that influences its costs and revenue structure. Therefore, all balances and transactions denominated in currencies other than the Chilean peso are treated as "foreign currency".

The Bank translates accounting records of its subsidiaries in New York and in Colombia into Chilean pesos from US dollars and Colombian pesos, respectively, in accordance with instructions established by the CMF, which are consistent with IAS 21 "Effects of the variations in the exchange rates of the foreign currency". All amounts in the Interim Consolidated Statements of Income, Interim Consolidated Statements of Other Comprehensive Income and the Interim Consolidated Statement of Financial Position are translated into Chilean pesos according to the exchange rate indicated in letter g) below. None of the markets in which Banco Itaú Chile and subsidiaries operate qualify as a hyperinflationary economy.

h) Foreign currency

Transactions in foreign currency are initially recorded by the Bank entities at the exchange rates of their respective functional currencies at the date these transactions first meet the conditions for their recognition.

Monetary assets and liabilities denominated in foreign currency are converted at the closing exchange rate of the functional currency in force at the closing date of the reporting year.

All differences arising from the settlement or conversion of monetary items are recognized in the results, except for those that correspond to the monetary items that are part of the hedge of a net investment, at which time the cumulative difference in equity is reclassified to profit and loss (settlement). Tax effects attributable to the exchange differences on such monetary items are also recorded in Interim Consolidated Other Comprehensive Income.

Non-monetary items in foreign currency, which are measured in terms of historical cost, are converted using the exchange rate on the date of the transaction. Non-monetary items that are measured at their fair value in foreign currency are translated using the exchange rates on the date on which that fair value is measured. Gains or losses arising from the translation of non-monetary items measured at their fair value are recognized based on how the gains and losses arising from the change in fair value are recognized in Interim Consolidated Statements of Other Comprehensive Income or in Interim Consolidated Statements of Income, in accordance with IAS 21.

The Bank grants loans and receives deposits in amounts denominated in foreign currency, mainly in US dollars and Colombian pesos.

Note 2 - Summary of Significant Accounting Policies, continued

The balances of the Financial Statements of the consolidated entities whose functional currency is different from the Chilean peso are converted to the presentation currency, according to the following:

- Assets and liabilities, by using exchange rates as of the date of the Interim Consolidated Financial Statements.
- Income and expenses and cash flows, by using the exchange rates as of the date of each transaction.

Exchange differences arising from translating balances in functional currencies of the consolidated entities other than Chilean pesos into Chilean pesos, are recorded as "Exchange differences" in Equity under the line item "Valuation accounts", until they meet the derecognition criteria for the Consolidated Statement of Financial Position, and are subsequently recorded in profit or loss.

The net amount of foreign exchange gains and losses includes the recognition of the effects of changes in the exchange rate over assets and liabilities denominated in foreign currencies and gains and losses arising from exchange rate changes affecting current and future transactions (highly probable transactions) entered into by the Bank.

Assets and liabilities in foreign currencies are shown at their equivalent amount in pesos, calculated using the exchange rate of \$954.72 per US\$1 (US dollar) as of March 31, 2025 (\$996.61 as of December 31, 2024) and the exchange rate of \$0.2271 per COP\$1 (Colombian peso) as of March 31, 2025 (\$0.2263 as of December 31, 2024). The Interim Financial Statements of the New York branch, as well as the Colombian subsidiaries, have been translated using these exchange rates for consolidation purposes, in accordance with IAS 21, related to the valuation of investments abroad in countries with stable economy.

i) Use of estimates and judgments

The preparation of the Interim Consolidated Financial Statements requires Bank's management to make estimates, judgments and assumptions that affect the application of the accounting policies and the reported balances of assets and liabilities, disclosures of contingencies with respect to assets and liabilities as of the date of the Interim Consolidated Financial Statements, as well as income and expenses during the year. Actual results may differ from these estimates.

Estimates and relevant assumptions are regularly reviewed by Management in order to properly measure some assets, liabilities, income, and expenses. Accounting estimates changes due to reviews are recognized in the year in which the estimate is reviewed and in any future year affected.

In certain cases, CMF rules and International Financial Reporting Standards require that assets and liabilities be recorded or disclosed at their fair values. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When market prices in active markets are available, they have been used as a basis for valuation. When market prices in active markets are not available, the Bank has estimated those values as values based on the best available information, including the use of modeling and other valuation techniques.

**Note 2 - Summary of Significant Accounting Policies, continued**

The Bank has established allowances to cover possible credit losses in accordance with the compendium criteria. These criteria require that, in order to estimate allowances, they be evaluated regularly, taking into account factors such as changes in the nature and size of the loan portfolio, trends in the expected portfolio, credit quality and economic conditions that may affect the payment capacity of the debtors. Changes in allowances for loan losses are reflected as "Special provisions for credit risk" in the Interim Consolidated Statement of Income.

Loans are charged-off when the Bank's management determines that the loan or a portion cannot be collected, in accordance with the compendium, as stated in chapter B-2 "Impaired loans and charge-offs". Charge offs are recorded as a reduction of the allowance for loan losses.

In particular, information on most significant areas of estimate due to uncertainties and critical judgments in the application of accounting policies that have the most important effect on the amounts recorded in the Interim Consolidated Financial Statements are the following:

- Allowances for loan losses (Notes 13 and 41).
- Current taxes and deferred taxes (Note 18).
- Provision for contingencies (Note 24).
- Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments (Note 25).
- Special provisions for loan loss risk (Note 26).
- Contingencies and commitments (Note 29).
- Fair value of financial assets and liabilities (Note 44).
- Impairment losses on certain assets, including Goodwill (Notes 13, 15, 16, 17, 40 and 41).

During the three months period ended as of March 31, 2025, there have been no significant changes in estimates (see Notes 40 and 41).

j) Operating segments

The Bank provides financial information for each operating segment in conformity with IFRS 8 "Operating Segments" in order to disclose information that enables Interim Consolidated Financial Statement users to evaluate the nature and financial effects of the business activities in which the Bank engages and the economic environments in which it operates and to allow them to:

- Better understand the Bank's performance.
- Better evaluate its future cash flow projections.
- Form better opinions regarding the Bank as a whole.

Note 2 - Summary of Significant Accounting Policies, continued

To comply with IFRS 8, Banco Itaú Chile identifies operating segments (Chile and Colombia) used by the Executive Committee to analyze and make decisions regarding operating, financing and investment matters, based on the following elements:

- (i) The nature of the products and services;
- (ii) The nature of the processes;
- (iii) The type or class of customer for their products and services;
- (iv) The methods used to distribute their products or provide their services; and
- (v) If applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.

The Executive Committee manages these segments using an in-house system of internal profitability reports and reviews its segments on the basis of the operating results and uses efficiency, profitability and other indicators to evaluate performance and allocate resources. The Bank has also included geographic disclosures on its operations in New York and Colombia. More information on each segment is presented in Note 6 "Reporting Segments".

k) Operations with Repurchase and Resale Agreements

Transactions with resale agreements are entered into as a form of investment. Under these agreements, financial instruments are purchased, which are included as assets under "Rights under resale agreements and securities lending agreements", and are accounted for at amortized cost using the effective interest rate of the agreement. There are also sales transactions with a repurchase agreement as a form of financing. In this regard, investments that are sold under a repurchase obligation and that serve as collateral for the loan, are part of the investment items "Financial assets held for trading at fair value through profit or loss", "Financial assets at fair value through other comprehensive income" or "Financial assets at amortized cost".

The obligation to repurchase the investment is classified in Liabilities under "Obligations under repurchase agreements and securities lending transactions" and recognized in financial liabilities at amortized cost, recognizing accrued interest and indexation at the closing date or "Financial assets at amortized cost".

The Bank applies IFRS 9 for determining the impairment of its financial assets carried at amortized cost, except for assets classified under the compendium as "Interbank Loans", "Loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. See Note 13 "Financial assets at amortized cost" and Note 41 "Credit loss expenses".

Note 2 - Summary of Significant Accounting Policies, continued

I) Classifications of Financial Instruments

i. Classifications of Financial Instruments

a) Classification of Financial Assets

The Bank classifies its Financial Assets under the following category as established by IFRS 9:

- Measured at amortized cost,
- Measured at fair value through other comprehensive income
- Measured at fair value through profit or loss
- And those that by management's decision are irrevocably measured at fair value through other comprehensive income.

The classification of financial instruments into an amortized cost or fair value category depends on the business model with which the entity manages the assets and the contractual characteristics of the cash flows, commonly referred to as the "Solely Payments of Principal and Interest" approach (hereinafter "SPPI"). The business model valuation should reflect how the Bank manages groups of financial assets and is not dependent on the intent for an individual instrument. Therefore, in each Interim Consolidated Financial Statement there are different business models for managing assets.

In determining the business model, the following are taken into account:

- How the performance of the business model (and the assets that are part of the business model) is evaluated and reported to the entity's key personnel.
- The risks and the way in which risks that affect the performance of the business model are managed.
- How business model managers are remunerated. The frequency, amount and timing of sales in prior years, the reasons for such sales and expectations regarding future sales.

With regard to the assessment of contractual cash flows, it determines whether the cash flows of the financial asset meet the SPPI criterion, i.e. whether the contractual terms of the financial asset give rise, on specific dates, to cash flows that are solely payments of principal and interest. Principal is the fair value of the financial asset at initial recognition, and interest is the consideration for the time value of money, the credit risk associated with the principal outstanding and may also include liquidity risk, administrative cost and profit margin.

For the classification, the Bank performs the SPPI test, which evaluates the contractual term to identify whether it meets the SPPI criteria, and whether the contract is a basic loan agreement. The Bank applies its judgment and considers relevant factors such as the currency in which the financial asset is denominated and the year for which the interest rate is set.

**Note 2 - Summary of Significant Accounting Policies, continued**

The Bank's business model represents how financial assets are managed to generate cash flows and does not depend on management's intent with respect to an individual instrument, but relates to a higher aggregate portfolio level, and is based on observable factors such as: risks affecting business model performance; how business managers are compensated; and how business model performance is evaluated and reported to management.

In addition, the Bank's business model is not evaluated on an instrument-by-instrument basis, but at a higher aggregate portfolio level, and is based on observable factors such as: the performance of financial assets, the risk affecting performance, and the frequency, value and timing of sales, among others.

In accordance with IFRS 9, the business models are:

- Business model held for collection: financial assets that are held under a business model whose objective is to collect principal and interest flows over the life of the instrument and on which there are no significant unjustified sales and fair value is not a key element in the management of these assets and the contractual conditions give rise to cash flows on specific dates, which are only payments of principal and interest on the principal amount outstanding. In this sense, sales other than those related to an increase in credit risk, to manage credit concentration risk, or unforeseen financing needs (liquidity stress scenarios) are considered unjustified, and are not incompatible with a business model whose objective is to hold financial assets to collect the contractual cash flows.
- Held to collect and sell: financial assets under this business model whose objective is achieved through the collection of principal and interest flows and the sale of such assets, with fair value being a key element in the management of these assets. This model involves a higher frequency and value of sales than the model held for collection.
- Another business model: includes financial assets with the objective of realizing cash flows through the sale of the assets. The Bank makes decisions based on the assets' fair values and manages the assets to realize those fair values.

Financial assets will only be reclassified when there is a change in the business model. In this case, all financial assets in that business model are reclassified. The change in the business model objective must be prior to the reclassification date.

b) Classification of financial liabilities

Financial liabilities are classified in the following categories:

- Financial liabilities at amortized cost: contractual obligation to deliver cash to a third party which is measured at its effective rate.
- Financial liabilities that are accounted for at fair value through profit or loss: these correspond to financial liabilities that meet the definition of held for trading;
- Financial liabilities designated at fair value through profit or loss at the time of initial recognition (Fair value option): financial instruments in which the Bank should carry the effective rate, but upon initial recognition it exercises the option to recognize them at market value or significantly reduce any accounting asymmetry.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank has the option to irrevocably designate, at the time of initial recognition, a financial liability as measured at fair value through profit or loss if the application of this criterion eliminates or significantly reduces inconsistencies in valuation or recognition, or if it is a group of financial liabilities, or a group of financial assets and liabilities, that is managed, and its performance evaluated, on a fair value basis in line with a risk management or investment strategy.

c) Embedded derivatives in hybrid financial instruments

Embedded derivatives in other financial instruments or in other host contracts are accounted for separately as financial derivatives contracts when the following criteria are met:

- Its risks and characteristics are not directly related with those of the host contract.
- A separated instrument with same characteristics of the embedded derivative meets the derivative instrument definition, and
- The host contract is not classified as “other financial assets (liabilities) at FVTPL” or as “trading instruments”.

d) Reclassifications

Reclassification of financial assets is required if, and only if, the objective of the Bank's business model for managing those financial assets changes. Financial liabilities cannot be reclassified. There are no reclassifications in these Interim Consolidated Financial Statements.

ii. Measurement of financial instruments

a) Initial measurement

On initial recognition, financial assets and liabilities are measured at the transaction price, i.e. the fair value of the consideration given or received (IFRS 13). In the case of financial instruments that are not measured at fair value through profit or loss, transaction costs of financial assets and financial liabilities recorded at fair value are recorded in profit or loss.

b) Subsequent measurement - Financial assets

After initial recognition, the Bank will measure a financial asset at:

i. Amortized cost

Financial assets that are held in a business model to collect contractual cash flows and contain contractual terms that give rise on specified dates to cash flows that are SPPI are measured at amortized cost.

**Note 2 - Summary of Significant Accounting Policies, continued**

The effective rate method is used in the calculation of the amortized cost of a financial asset or financial liability and in the allocation and recognition of interest income or interest expense in profit or loss for the relevant year. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash payments or collection through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or the amortized cost of a financial liability.

The net impairment losses of the assets recorded in these items occurring in each year are determined in accordance with IFRS 9, except for assets classified under the compendium as "due from banks", "loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. For purposes of recording the impairment loss, this is recorded under the caption "Provisions for credit risk due from banks and loans and accounts receivable from customers" and "Impairment for credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Interim Consolidated Statements of Income. See note 41 "Credit loss expense".

ii. Fair value through other comprehensive income (FVTOCI)

Financial assets that are debt instruments held in a business model that is achieved through the collection of contractual cash flows and sale, and that contain contractual terms that result on specified dates in cash flows that are SPPI, are measured at FVTOCI. They are subsequently remeasured at fair value and changes in fair value (except for those related to impairment, interest income and foreign exchange gains and losses) are recognized in other comprehensive income, until the assets are sold. At the time of disposal, gains and losses accumulated in other comprehensive income are recognized in the Interim Consolidated Statement of Income.

On the other hand, the net impairment losses on financial assets at fair value through other comprehensive income occurring during the year are recorded under the item "Impairment due to credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Interim Consolidated Statements of Income. (See Note 41).

Interest income on these instruments is recorded in the consolidated income and loss account for that year. Exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Interim Consolidated Statements of Income.

iii. Fair value through profit or loss (FVTPL)

The caption "Financial assets held for trading at fair value through profit or loss" includes financial assets whose business model is intended to generate profits through the realization of purchases and sales or to generate results in the short term.

Note 2 - Summary of Significant Accounting Policies, continued

Financial assets recorded under "Financial assets not held for trading mandatorily measured at fair value through profit or loss" are assigned to a business model whose objective is achieved by obtaining contractual cash flows and/or selling financial assets but the contractual cash flows have not met the conditions of the SPPI test. Financial assets are classified under "Financial assets designated at fair value through profit or loss" only when such designation eliminates or significantly reduces the inconsistency in valuation or recognition that would arise from valuing or recognizing the assets on a different basis.

The assets recorded in these captions of the Interim Consolidated Statements of Financial Position are valued after their acquisition at fair value and the changes in their value (gains or losses) are recorded, at their net amount, in the items "Financial income or loss from financial assets and liabilities held for trading" and "Financial income or loss from financial assets not held for trading mandatorily valued at fair value through profit or loss" of the Interim Consolidated Statements of Income.

Changes arising from exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Interim Consolidated Statements of Income.

iv. Financial assets not held for trading mandatorily measured at fair value through profit or loss

Under this item, they are allocated to a business model the objective of which is achieved by obtaining contractual cash flows and/or by selling financial assets, but where the contractual cash flows have not met the SPPI test conditions. The assets recorded under this item of the Interim Consolidated Statement of Financial Position are measured subsequently to their acquisition at fair value and their market value variations are recorded, at their net amount, under "Financial income (loss), net".

v. Equity instruments

For certain equity instruments, the Bank may make an irrevocable election to present subsequent changes in the fair value of the instrument in other comprehensive income, except for dividend income which is recognized in profit or loss.

Gains or losses on derecognition of these equity instruments are not transferred to income. These instruments are not subject to the impairment model of IFRS 9.

c) Subsequent measurement - Financial liabilities

After initial recognition, the Bank will measure a financial liability at amortized cost, except for derivatives that are measured at fair value through profit or loss.

Note 2 - Summary of Significant Accounting Policies, continued

iii. Derecognition of financial assets and liabilities

Financial assets are derecognized when, and only when:

- The contractual rights to the cash flows from the financial asset expire, or
- The Bank transfers substantially all the risks and rewards of ownership of the financial asset, and therefore the Bank derecognizes the financial asset and separately recognizes the rights and obligations created or retained in the transfer.

In certain cases, the Bank engages in transactions in which it retains the contractual rights to receive the cash flow of a financial asset and assumes an obligation to pay those cash flows under an agreement that meets all required conditions; that is, the Bank transfers the financial assets. Additionally, the contractual arrangement must prohibit the sale or pledging of the original asset except as security, and the entity must remit the cash flow without delay and is not permitted to reinvest them, except in short-term cash or cash equivalent investments.

When a financial asset is sold and the Bank simultaneously agrees to repurchase it (or an asset that is substantially the same) at a fixed price on a future date, the Bank continues to recognize the financial asset in its entirety in the Interim Statements of Financial position because it retains substantially all the risks and rewards of ownership. The cash consideration received is recognized as a financial asset and a financial liability is recognized for the obligation to pay the repurchase price.

Financial liabilities are derecognized when, and only when, they are extinguished, canceled or mature.

a) Derecognition due to substantial modification of terms and conditions

The Bank derecognizes a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that it has essentially become a new asset, with the difference recognized as a gain or loss on derecognition, to the extent that an impairment loss has not yet been recorded.

A change in terms and conditions does not result in derecognition if it does not result in cash flows that are substantially different. Based on the change in cash flows discounted at the original Effective Interest Rate ("EIR"), the Bank records a gain or loss on modification, to the extent that an impairment loss has not yet been recorded. For financial liabilities, the Bank considers a substantial modification based on qualitative factors, and if it results in a difference between the adjusted discounted present value and the original carrying amount of the financial liability of ten percent or more. For financial assets, this assessment is based on qualitative factors.

**Note 2 - Summary of Significant Accounting Policies, continued****iv. Renegotiated and modified loans**

The Bank in certain situations makes concessions or modifications to the original terms of loans in response to the borrower's financial difficulties, in lieu of taking possession or enforcing collection of collateral, or in some cases to renegotiate loans. The Bank considers a loan modified when such concessions are made as a result of the borrower's present or expected financial difficulties and the Bank would not have accepted them had the borrower been in good financial standing. Indicators of financial difficulties include covenant defaults and/or significant additional history identified by the Credit Risk area. Modification may involve extending payment terms and agreeing to new loan terms. It is the Bank's policy to monitor refinanced loans to help ensure that future payments are probable.

If the modifications are substantial, the loan is written off, as explained in "III. Derecognition of financial assets and liabilities". If the terms have been renegotiated without resulting in the derecognition of the loan, any impairment is measured using the original EIR calculated prior to the modification of the terms. The Bank also reassesses whether there has been a significant increase in credit risk and whether the assets should be classified in another credit risk portfolio.

Derecognition decisions and classifications in the substandard and non-performing portfolios are determined on a case-by-case basis. If these procedures identify a loss related to a loan, it is disclosed and managed as a refinanced asset of the impaired non-performing portfolio until collected or paid.

v. Contingent Credits

The Bank provides standby loans (including letters of credit, foreign letters of credit and performance bonds) and loan commitments.

Contingent loans and unused loan commitments are commitments under which, during the term of the commitment, the Bank is obligated to provide a loan with a pre-specified term to the customer.

The face value of the contractual loan, when the agreed loan is on market terms, is not recorded in the Interim Statement of Financial Position. The related provision for expected credit loss is disclosed in Note 24 "Provisions for contingencies", letter b).

vi. Offsetting

Financial assets and financial liabilities are offset in the Interim Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle them on a net basis, or to realize the asset and settle the liability simultaneously.

Note 2 - Summary of Significant Accounting Policies, continued

vii. Derivatives and hedging activities

The Bank has decided to continue to apply the hedge accounting requirements of IAS 39 when adopting IFRS 9.

For presentation purposes, derivatives are presented according to their positive or negative fair value as assets or liabilities, respectively, and include trading and hedging instruments separately (see Notes 8 "Financial assets held for trading through profit or loss" and Note 12 "Financial derivative contracts for accounting hedges").

a) Hedging transactions

The Bank uses financial derivatives for the following purposes:

- i. To sell to customers who request these instruments in the management of their market and credit risks.
- ii. To use these derivatives in managing the risks of the Bank's own positions and assets and liabilities of the Bank's entities ("hedging derivatives"); and
- iii. To obtain gains from changes in the price of these derivatives ("trading derivatives").

All financial derivatives that are not held for hedging purposes are accounted for as trading derivatives.

A derivative qualifies for hedge accounting if all of the following conditions are met:

- i. The derivative hedges one of the following three types of risks to which the Bank is exposed:
 - a) Changes in the value of assets and liabilities due to fluctuations, among others, in the interest rate and/or exchange rate to which the position or balance to be hedged is subject ("fair value hedge");
 - b) Changes in the estimated cash flows derived from financial assets and liabilities, and highly probable forecast transactions ("cash flow hedge");
 - c) The net investment in a foreign operation ("hedge of a net investment in a foreign operation").
- ii. It is effective in offsetting the exposure inherent in the hedged item or position over the expected term of the hedge, which means that:
 - a) At the trade date the hedge is expected, under normal conditions, to be highly effective ("prospective effectiveness").
 - b) There is sufficient evidence that the hedge was effective during the life of the hedged item or position ("retrospective effectiveness").

There must be adequate documentation evidencing the specific designation of the financial derivative to hedge certain balances or transactions and how this effective hedge was expected to be achieved and measured, provided that it is consistent with the Bank's own risk management.

Note 2 - Summary of Significant Accounting Policies, continued

Changes in the value of financial instruments that qualify for hedge accounting are recorded as follows:

- a. For fair value hedges, gains or losses arising on both hedging instruments and hedged items (attributable to the type of risk being hedged) are included as "Financial income (loss) from Financial Asset and Liabilities for trading" in the Interim Consolidated Statement of Income.
- b. For fair value hedges of interest rate risk in a portfolio of financial instruments, gains or losses arising on measurement of the hedging instruments within "Interest income and expense", and other gains or losses due to changes in the fair value of the underlying hedged item (attributable to the hedged risk) are recorded in the Interim Consolidated Statement of Income (Loss) under "Net trading income (expense)".
- c. For cash flow hedges, the effective portion of the fair value of the hedging instrument is included as "Cash flow hedges" in the Interim Consolidated Statements of Other Comprehensive Income".
- d. The valuation differences of the hedging instrument corresponding to the ineffective portion of cash flow hedging transactions are recorded directly in the Interim Consolidated Statement of Income under "Net income (expense) from financial operations".

If a derivative designated as a hedging instrument ceases to meet the conditions described above due to maturity, ineffectiveness or any other reason, the hedge accounting treatment is discontinued. When the "fair value hedge" is discontinued, the fair value adjustments to the carrying amount of the hedged item arising from the hedged risk are amortized to profit or loss as of that date, as appropriate.

Sources of hedge ineffectiveness may arise from basis risk, including, but not limited to, discount rates used to calculate the fair value of derivatives, hedges using instruments with a fair value other than zero, and timing and notional differences between hedged items and hedging instruments.

When cash flow hedges are discontinued, any cumulative gain or loss on the hedging instrument recognized in "Interim Statements Other Comprehensive Income" (from the year in which the hedge was effective) remains recorded in equity until the hedged transaction occurs, at which time it is recorded in the Consolidated Statement of Income, unless the transaction is no longer expected to occur, in which case any cumulative gain or loss is recorded immediately in the Interim Consolidated Statement of Income.

(m) Measurement and techniques used in determining fair value

In general terms, financial assets and liabilities are initially recognized at fair value, which, unless there is evidence to the contrary, is considered to be the transaction price. Financial instruments, other than those measured at fair value through profit or loss, are initially recognized at fair value plus transaction costs. Subsequently, and at the end of each reporting period, financial instruments are valued in accordance with the following criteria:

Note 2 - Summary of Significant Accounting Policies, continued

(i) Measurement of financial instruments

Financial assets are measured at fair value, gross of any transaction costs that may be incurred in the course of a sale, except for loans and receivables from customers.

In accordance with IFRS 13 "Fair value measurement", "fair value" is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In measuring fair value, an entity shall take into account the characteristics of the asset or liability if market participants would take those characteristics into account in pricing the asset or liability at the measurement date.

The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place:

- In the main market for the asset or liability, or
- In the absence of a main market, the most advantageous market for the asset or liability.

Even if there is no observable market that provides pricing information in relation to the sale of an asset or transfer of a liability at the measurement date, the fair value measurement shall assume that the transaction takes place, considered from the perspective of a potential market participant who intends to maximize the value associated with the asset or liability.

In using valuation techniques, the Bank shall maximize the use of relevant observable inputs and minimize the use of available unobservable inputs. If an asset or liability measured at fair value has a bid price and a ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used to measure fair value, regardless of where the input is classified within the fair value hierarchy (i.e. Level 1, 2 or 3). IFRS 13 establishes a fair value hierarchy that classifies inputs to valuation techniques used to measure fair value into three levels.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

All derivatives are recorded in the Interim Consolidated Statements of Financial Position at the fair value described above. This value is compared to the valuation on the trade date. If the fair value is subsequently measured positive, it is recorded as an asset. If the fair value is subsequently measured negative, it is recorded as a liability. The fair value on the trade date is, unless there is evidence to the contrary, considered to be the transaction price.

Changes in the fair value of derivatives since the trade date are recorded in "Financial income (loss)" in the Interim Consolidated Statements of Income.

Specifically, the fair value of financial derivatives included in portfolios of financial assets or liabilities held for trading is considered to be their daily quoted price. If, for exceptional reasons, the quoted price cannot be determined on a given date, the fair value is determined using methods similar to those used to measure over-the-counter derivatives.

**Note 2 - Summary of Significant Accounting Policies, continued**

The fair value of OTC derivatives is the sum of the future cash flows resulting from the instrument, discounted to present value at the valuation date ("present value" or "theoretical close") using valuation techniques commonly used in financial markets: "net present value" (NPV) and option valuation models, among other methods.

In addition, the fair value of derivatives includes the CVA and DVA adjustment, so that the fair value of each instrument includes the credit risk of its counterpart and the Bank's own risk. The credit valuation adjustment (CVA) is a valuation adjustment of OTC derivatives as a consequence of the risk associated with the credit exposure assumed by each counterpart. The CVA is calculated taking into account the potential exposure to each counterpart in each future year. The debit valuation adjustment (DVA) is a valuation adjustment similar to the CVA but, in this case, arises as a consequence of the Bank's own risk assumed by its counterparts in OTC derivatives.

(ii) Valuation techniques

Financial instruments at fair value, determined on the basis of quoted prices in active markets, include government debt securities, private sector debt securities, equity shares, short positions and fixed income securities issued.

In cases where price quotations are not observable in available markets, the Bank's management determines the best estimate of the price that would be set by the market using its own internal models. In most cases, these models use data based on observable market parameters as significant inputs; however, for some financial instrument valuations, significant inputs are not observable in the market. To determine a value for these instruments, various techniques are used to make these estimates, including extrapolation of observable market data.

The most reliable evidence of the fair value of a financial instrument at initial recognition is usually the transaction price; however, due to the unavailability of market information, the value of the instrument may be derived from other market transactions involving the same or similar instruments or may be measured using a valuation technique in which the inputs used include only observable market data, principally interest rates.

The main techniques used as of March 31, 2025 and December 31, 2024 by the Bank's internal models to determine the fair value of financial instruments are as follows:

- i. The present value method is used in the valuation of financial instruments that allow static hedges (mainly forwards and swaps). The estimated future cash flows are discounted using interest rate curves of the related currencies. Interest rate curves are generally observable market data.
- ii. In the valuation of financial instruments requiring dynamic hedging (mainly structured options and other structured instruments), the Black-Scholes model is typically used. Where appropriate, observable market data is used to derive factors such as bid spread, exchange rates, volatility, correlation indicators and market liquidity.
- iii. In the valuation of certain financial instruments exposed to interest rate risk, such as interest rate futures, caps and floors, the present value method (futures) and the Black-Scholes model (plain vanilla options) are used. The main inputs used in these models are observable market data, including interest rate curves, volatilities, correlations and related exchange rates.

Note 2 - Summary of Significant Accounting Policies, continued

The fair value of financial instruments calculated by the aforementioned internal models considers contractual terms and observable market data, including interest rates, credit risk, exchange rates, stock price, volatility and prepayments, among others. The Bank's management believes that its valuation models are not significantly subjective, as these methodologies can be adjusted and evaluated, as appropriate, through internal calculation of fair value and subsequent comparison with the related actively quoted price (See note 44).

n) Revenue and expense recognition

The following is a summary of the most significant criteria used by the Bank for the recognition of its revenues and expenses:

(i) Interest income, interest expense and similar items

Interest income, interest expense and similar items are recognized on an accrual basis using the effective interest rate method.

However, when an operation is evaluated either individually or collectively, and as a result of such evaluation the loan is recognized as part of the impaired portfolio (the compendium Cap. B2 numeral 1 letter b) and presents default for equal to or greater than 90 days in any of their installments, the recognition of income on the accrual basis is suspended.

The suspension of revenue recognition on an accrual basis implies that, from the date on which it should be suspended in each case and until such loans are no longer impaired, the respective assets included in the Interim Consolidated Statement of Financial Position will not be increased by interest, adjustments or commissions and no revenue for these items will be recognized in the Interim Consolidated Statement of Income, unless they are actually received. These standards only refer to the criteria for valuation and recognition of income for financial accounting information.

Interest income from "transactions with accrual suspended" is only re-recorded when such transactions become current (that is, payments were received that make them less than 90 days past due) and when they are no longer in the impaired portfolio.

(ii) Dividends received

Dividends received from investments in other companies are recognized on income when the right to receive them arises and are recorded in the item "Income from investments in companies".

Note 2 - Summary of Significant Accounting Policies, continued

(iii) Commissions, fees and similar items

Income and expenses from commissions and fees are recognized in the Interim Consolidated Statement of Income using the criteria established in IFRS 15 "Revenue from contracts with customers", based on consideration of the terms of the contract with the customers, excluding amounts collected on behalf of third parties. Revenue is recognized when performance obligations are satisfied by transferring a promised good or service to a customer, which is evidenced by transferring control over an asset or the rendering of a service:

Commissions recorded by the Bank correspond mainly to:

- Line of credit and overdraft commissions: includes earned commissions during the period related to lines of credit granted and checking accounts overdrafts.
- Guarantee and letters of credit fees: includes earned commissions during the period related to bank guarantees granted over actual or contingent obligations to third parties.
- Credit card fees: includes earned and received commissions during the period related to credit and debit cards usage.
- Accounts management fees: includes earned fees related to maintenance of checking accounts, savings accounts, and other accounts.
- Collection and payment services fees: includes fee income related to collection services as well as payment services rendered by the Bank and its subsidiaries.
- Brokerage and securities management fees: includes fee income related to financial assets brokerage and securities management and custody.
- Insurance brokerage fees: includes insurance brokerage fees.
- Other fee and commissions: includes income arising from currency exchange, financial advisory services, cashier checks issuance, placement of financial products and online banking services.

Commission expenses include:

- Cards transactions fees: includes credit and debit card transaction fees related to income generated in those transactions.
- Securities transactions fees: includes fees related to custody of securities and securities brokerage.
- Other fees and commissions: includes mainly expenses generated from online services.

The Bank grants a group of benefits to its cardholders for which, in accordance with IFRS 15, has established provisions enough to comply with its performance obligations when these benefits become enforceable.

(iv) Non-financial income and expenses

They are recorded in accordance with IFRS 15, identifying the performance obligations, allocating the transaction price to separate performance obligations, and recognizing income when these are satisfied.

Note 2 - Summary of Significant Accounting Policies, continued

(v) Loan arrangement fees

Fees that arise from loans arrangement, opening accounts, study and information fees, they are accrued and recognized on a systematic basis on the Interim Consolidated Statement of Income throughout the life of the loan. In the case of arrangement fees, the portion corresponding to the related direct costs incurred in the formalization of such transactions are immediately recorded in the income statement.

o) Impairment

Assets are acquired or purchased based on the future economic benefits they produce. Consequently, impairment is recorded when the carrying amount of such assets is less than their recoverable amount. Assets are subject to impairment tests to adequately reflect the future economic benefits that the assets are capable of producing when used by the Bank.

The Bank assesses the expected future credit losses ("ECL") associated with its financial instrument assets carried at amortized cost and FVTOCI, subject to the limitations defined in paragraph 5 of Chapter A-2 of the Compendium of Accounting Standards. The Bank recognizes a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased, probability-weighted amount determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Bank follows the criteria described below to assess impairment, when applicable:

(i) Impairment of financial assets except "Interbank Loans", "Loans and receivables from customers and "Contingent loans".

The Bank applies IFRS 9 to determine the impairment of its financial assets at amortized cost and at fair value through other comprehensive income, except for "Interbank Loans", "Loans and accounts receivable from customers" and "Contingent loans", whose impairment is determined by applying the provisions of Chapter B1, B2 and B3 of the compendium, for the rest of the assets the following is applicable.

IFRS 9 introduces the concept of "expected losses" which is developed in the credit risk model applied by the Bank. The "expected loss" impairment model is applied to financial assets measured at amortized cost, debt instruments measured at fair value through other comprehensive income, financial guarantee contracts and other commitments. All financial instruments measured at fair value through profit or loss are excluded from the impairment model. The standard classifies financial instruments into three categories, which depend on the evolution of their credit risk from the time of initial recognition, and which determine the calculation of their credit risk hedges.

Note 2 - Summary of Significant Accounting Policies, continued

Stage 1: No significant increase in risk: "The allowance for losses on these financial instruments is calculated as the expected credit losses resulting from possible events of default within 12 months after the reporting date (12-month expected loss)."

Stage 2: With significant increase in risk: "When the credit risk of a financial asset has increased significantly since initial recognition, the allowance for losses on that financial instrument is calculated as the expected credit loss over the entire life of the transaction. In other words, it is the expected credit losses resulting from all possible events of default during the expected life of the financial instrument".

Stage 3: Impairment: "When there is objective evidence that the financial asset is impaired, it is transferred to this category in which the write-down for losses on that financial instrument is calculated, as in Stage 2, as the expected credit loss over the life of the asset."

In cases in which the recovery of any recorded amount is considered remote, the asset is removed from the consolidated balance sheet, without prejudice to any actions that may be taken to attempt to collect the amount until the rights to receive it have been extinguished definitively, whether by expiration, forgiveness or other causes.

The Bank takes into account reasonable and supportable information that is available without undue cost or effort and that may affect the credit risk of a financial instrument, including forward-looking information to determine a significant increase in credit risk since initial recognition. Forward-looking information includes past events, current conditions and expected or future economic conditions (macroeconomic data).

Credit risk assessment and forward-looking information (including macroeconomic factors), includes quantitative and qualitative information based on the Bank's historical experience, examples include:

- Financial or economic conditions that are expected to cause a significant change in the borrower's ability to meet its debt obligations.
- An actual or expected downgrade of the borrower's internal credit rating or a decrease in the borrower's performance score.
- An actual or expected significant change in the borrower's operating results.
- Significant increases in credit risk on other financial instruments of the same borrower.
- Significant changes in the value of the collateral backing the obligation or in the quality of third-party guarantees or credit enhancements.
- Reductions in financial support from a parent entity or other subsidiary.
- Expected changes in the loan documentation, including an expected breach of contract that may result in waivers or modifications of covenants, suspension of interest payments, increased interest rates, requirements for additional collateral or guarantees, or other changes in the contractual framework of the facility.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank has considered that if contractual payments are more than 30 days past due, credit risk is considered to have increased significantly since the initial recognition of the credit, but this is not an absolute indicator.

The Bank has not rebutted the IFRS 9 presumption of significant increase in risk ("SIR") or default.

Regarding the use of present, past and future information required by the application of the expected loss approach described in IFRS 9, this requires the incorporation of present, past and future information for both the detection of significant increase in risk and the measurement of expected losses, which should be performed on a probability-weighted basis. When estimating expected losses, the standard does not require the identification of all possible scenarios. However, the probability of a loss event occurring and the probability of it not occurring must be considered, even if the possibility of a loss occurring is very low.

To achieve this, the Bank evaluates the linear relationship between its estimated loss parameters (PD, LGD, and EAD) with the history and future forecasts of macroeconomic scenarios. Also, when there is no linear relationship between the different future economic scenarios and their associated expected losses, more than one future economic scenario should be used for the estimation.

Expected losses are then derived from the following parameters:

PD: Estimate of the probability of default in each period.

EAD: Estimate of the exposure in the event of default in each future period, taking into account changes in exposure after the reference date of the Interim Financial Statements.

LGD: Estimated loss given default, as the difference between the contractual cash flows and those expected to be received, including collateral. For these purposes, the estimate considers the probability of execution of the guarantee, the time until possession and subsequent realization is reached, the expected cash flows and the acquisition and sale costs.

CCF: Cash Conversion Factor, is the estimate made on off-balance sheet balances to determine the exposure subject to credit risk in the event of default.

The expected credit losses calculated are based on the internal models developed for all portfolios within the scope of IFRS 9, except for those cases that are subject to individualized estimation. Internal models have been developed that take into account as sources of information the data provided by external rating agencies or others observed in the market, such as changes in bond yields, credit default swap quotes or any other public information on them.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Non-financial assets

The carrying amounts of the Bank's non-financial assets are reviewed regularly or at least at each reporting date to determine whether there is any indication of impairment. If such indications exist, then the recoverable amount of the asset is estimated. The recoverable amount of an asset is the higher of fair value less costs to sell and value in use. That recoverable amount is determined for an individual asset, unless the asset does not generate cash flows that are substantially independent of the cash flows from other assets or group of assets.

When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and its value is reduced to its recoverable amount.

The recoverable amount is the higher of fair value less costs to sell and value in use. If we assess the value in use of an asset, the estimated cash flows are discounted to their present value by applying a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

The Bank shall assess at the end of each reporting period whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased. If any such indication exists, the entity shall estimate the recoverable amount of that asset. In assessing whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased, an entity shall consider, as a minimum, external sources of information (the asset's value has increased significantly during the year; significant changes with a favorable effect on the entity have taken place during the year, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which the asset is dedicated; market interest rates or other market rates of return on investments have decreased during the year, and those decreases are likely to affect the discount rate used in calculating the asset's value in use and increase the asset's recoverable amount materially) and internal sources of information such as significant changes with a favorable effect on the entity have taken place during the year, or are expected to take place in the near future, in the extent to which, or manner in which, the asset is used or is expected to be used. These changes include costs incurred during the year to improve or enhance the asset's performance or restructure the operation to which the asset belongs. In the case of goodwill and indefinite useful life intangible assets or not yet available for use, the recoverable amount is estimated annually, at year end.

When impairment exists the carrying amount of the asset shall be reduced to its recoverable amount if, and only if, the recoverable amount of an asset is less than its carrying amount. This reduction is an impairment loss.

Note 2 - Summary of Significant Accounting Policies, continued

The impairment loss is recognized immediately in income, unless the asset is carried at its revalued value in accordance with another standard. Any impairment loss on revalued assets will be treated as a decrease in the revaluation made in accordance with that other standard. When the amount estimated for an impairment loss is greater than the carrying amount of the asset to which it relates, the Bank shall recognize a liability if, and only if, that is required by another standard. After the recognition of an impairment loss, the depreciation (amortization) charge for the asset shall be adjusted in future years to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

If an impairment loss is recognized, any related deferred tax assets or liabilities are determined in accordance with IAS 12 "Income taxes" by comparing the revised carrying amount of the asset with its tax base.

Impairment losses recognized in prior periods are tested at each reporting date for any indication that the loss has decreased or disappeared. An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(iii) Goodwill

Goodwill is tested annually in order to determine if impairment losses exist and whenever there is an indication that the carrying value may be impaired. The impairment of goodwill is determined by evaluating the recoverable amount of each CGU (or group of CGU) to which the goodwill relates. An impairment loss is recognized when the recoverable amount of the CGU is less than its carrying amount.

For the purpose of impairment testing, goodwill acquired in a business combination shall, from the acquisition date, be allocated to each of the acquirer's cash-generating units, or groups of cash-generating units irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. An impairment loss recognized for goodwill shall not be reversed in a subsequent years.

According to IAS 36 "Impairment of assets" the annual impairment test for a cash-generating unit to which goodwill has been allocated or for intangible assets with indefinite useful lives may be performed at any time during an annual year, as long the test is performed at the same time every year. Different cash-generating units may be tested for impairment at different times.

p) Fixed assets

Items of fixed assets are measured at acquisition cost, net of accumulated depreciation and impairment, if any.

In addition to the price paid to acquire each item, the cost also includes, where applicable, the capitalized cost. The capitalized cost includes expenses attributed directly to the asset acquisition and any other costs directly attributable to the process of placing the asset in conditions to be used.

Note 2 - Summary of Significant Accounting Policies, continued

When some part of an item of the fixed assets has a different useful life to that fixed asset, it is recognized as a separate component (significant components of fixed assets).

This item includes the amounts of property, land, furniture, vehicles, technological equipment, and other facilities own by the consolidated entities or acquired under financial leases. These assets are classified based on their use in:

(i) Fixed assets for own use

Fixed assets for own use includes, but is not limited to, tangible assets received by the consolidated entities in full or partial satisfaction of financial assets representing accounts receivable from third parties which are intended to be held for continuing own use and tangible assets acquired under finance leases. These assets are recorded at acquisition cost less the related accumulated depreciation and, if applicable, any impairment losses (when net carrying amount was higher than recoverable amount). For accounting purposes, acquisition cost of the received asset is considered to be its net amount.

Depreciation is calculated using the straight line method over the acquisition cost of assets less their residual value, assuming that the land on which buildings and other structures stand has an indefinite life and, therefore, is not subject to depreciation. Fixed assets in leased properties are depreciated over the shorter period of time between their useful lives or the term of the lease, unless it is certain that the Bank will acquire the property at the end of the lease.

The consolidated entities assess at each reporting date whether there is any indication that the carrying amount of any tangible asset exceeds its recoverable amount. If this is the case, the carrying amount of the asset is reduced to its recoverable amount and future depreciation charges are adjusted in accordance with the revised carrying amount and to the new remaining useful life.

In a similar manner, when indication exists that a material asset has recovered its value, the consolidated entities recognize the impairment loss reversal and the future depreciation charges are adjusted accordingly. In no case the impairment loss reversal of an asset can increase its value over the initial value as it no impairment losses were recognized in previous years.

Also, at least at the end of the period, the estimated useful lives of the items of property, plant and equipment for own use are reviewed in order to detect significant changes therein, which, if any, will be adjusted by means of the corresponding correction of the charge to the consolidated statement of income for future years, by recalculating the depreciation, by virtue of the new useful lives.

Upkeep and maintenance expenses relating to tangible assets held for own use are recorded as an expense in the period in which they are incurred.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Assets leased out under operating leases

The criteria used to record the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives, and to record the impairment losses thereof, are consistent with those described in relation to fixed assets held for own use.

q) Intangible assets

Intangible assets are identified as non-monetary assets (separately identifiable from other assets) without physical substance which arise as a result of legal or contractual rights, internally developed by the consolidated entities, as well as those generated in a business combination. These are assets for which the cost can be reliably measured and it is probable that future economic benefits attributable to the asset will flow to the Bank. The cost of intangible assets acquired or originated in a business combination correspond to its fair value at the acquisition date.

Intangible assets are recorded initially at acquisition or production cost and are subsequently measured at cost less any accumulated amortization and any accumulated impairment losses.

The Bank shall assess whether the useful life of an intangible asset is finite or indefinite and, if finite, the length of, or number of production or similar units constituting, that useful life. An intangible asset shall be assessed by the Bank as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Bank.

The accounting for an intangible asset is based on its useful life. An intangible asset with a finite useful life is amortized over its economic useful life and is reviewed to determine whether there was any indication that the intangible asset may have suffered any impairment, the period and method of amortization are reviewed at least at the end of each reporting year. An intangible asset with an indefinite useful life is not amortized. The Bank tests for impairment by comparing its recoverable amount with its carrying amount annually and whenever there is an indication that the intangible asset may be impaired.

(i) Software

The software acquired by the Bank is recognized at cost less the accumulated amortization and impairment, if any.

The expenses in software developed internally are recorded as assets when the Bank is capable of proving its intention and ability to complete development, when internal use will generate future economic benefits and/or decrease in costs, and when the cost of completing its development can be reliably measured. The capitalized costs of the software developed internally include all the direct costs attributable to the development of the software, and it is amortized over the course of its useful life. Software developed internally is recorded at cost less the accumulated amortization and losses from impairment.

Note 2 - Summary of Significant Accounting Policies, continued

The subsequent expenditures associated with the asset are capitalized only when future economic benefits from them will flow to the Bank. The rest of the expenditures are recognized in income.

Intangible assets are amortized on a straight-line basis over their estimated useful life; starting on the date it is ready for use.

(ii) Generated in a business combination

According to IFRS 3 “Business Combinations”, when an intangible asset is acquired or generated in a business combination its cost will be the fair value at the acquisition date. The fair value of an intangible asset represents expectations of market participants at the acquisition date over the probability that future economic benefits from the asset will flow to the entity. In other words, the entity expects that economic benefits flow to them, even though there is uncertainty about the date or the amount of them.

As set forth by IAS 38 “Intangibles Assets” and IFRS 3, the acquirer will recognize an intangible asset from the acquiree at the acquisition date separately from Goodwill independently if the asset was previously recognized by the acquiree before the business combination.

In connection with the aforementioned, the business combination between Itaú Chile and CorpBanca gave rise to intangible assets and Goodwill as indicated in Note 15 “Intangible Assets”.

(iii) Other identifiable intangible assets

Correspond to those intangible assets that can be identified, the Bank controls them, can be reliably measured and it is probable that future benefits will flow to the Bank.

r) Factoring transactions

The Bank performs operations with their clients, in which they receive invoices and other credit representative trading instruments with or without recourse to the transferor, anticipating a percentage of the total amount receivable of the borrower upon collection. These transactions are valued at the disbursed amounts by the Bank in exchange for invoices or other credit representative trading instruments.

The price differences between the disbursed amounts and the nominal amount of the documents are recorded in the Interim Consolidated Statement of Income as interest income applying the effective interest rate method, over the term of the transaction. The responsibility of payment of the documents remains with the client (assignor).

Note 2 - Summary of Significant Accounting Policies, continued

s) Leases

On the date of commencement of a lease the Bank recognizes an asset for right of use and a liability for lease in accordance with the provisions of IFRS 16 "Leases".

(i) Assets for right-of-use

At the beginning of a lease, the right-of-use asset is measured at cost. The cost includes:

- the amount of the initial measurement of the lease liability
- lease payments made before or from the start date, less lease incentives received
- the initial direct costs incurred by the lessee
- a modification of the costs to be incurred by the lessee when dismantling and eliminating the underlying asset, restoring the place in which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

After the initial recognition date, the Bank measures the assets by right of use applying the cost model, which is defined as the asset by right of use measured at cost (a) less accumulated depreciation and accumulated risk losses of value; and (b) adjusted for any new measurement of the lease liability.

The Bank applies the depreciation requirements established by IAS 16 "Property, plant and equipment" over the right-of-use in these type of transactions.

If the lease transfers ownership of the underlying asset to the Bank at the end of the lease term or if the cost of the right-of-use asset reflects that the Bank exercises a purchase option, the Bank depreciates the right-of use asset from the date of beginning of it until the end of the useful life of the underlying asset. In another case, the Bank depreciates the asset by right of use from the start date until the end of the useful life of the asset whose right of use has or until the end of the lease term, whichever comes first.

The Bank applies IAS 36 "Impairment of assets" to determine if the right-of-use asset presents changes in value and accounts for identified value risk losses.

As of March 31, 2025 and December 31, 2024, the Bank has not identified impairment in the value of the right-of-use assets.

(ii) Lease liability

The Bank measures the lease liability at the present value of lease payments that have not been paid as of that date. Lease payments are discounted using the interest rate implicit in the lease, if that rate could be easily determined. Since that rate cannot be easily determined, the Bank uses the incremental rate for loans (cost of funding).

Note 2 - Summary of Significant Accounting Policies, continued

The lease payments included in the measurement of the lease liability determined the payments for the right of use the underlying asset during the term of the not cancelable lease at the measurement date which includes:

- fixed payments, less any lease incentive receivable;
- variable lease payments, which depends on an index or rate, recently measured using the index or rate on the start date;
- it matters that the lessee expects to pay as residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably sure to exercise that option; and
- payments for penalties arising from the termination of the lease, if the term of the lease reflects that the lessee exercises an option to terminate the lease.

After the date of initial recognition, the Bank measures the lease liability in order to recognize:

- the interest on the lease liability;
- lease payments made; and
- the new measurements or modifications of the lease, and also for fixed lease payments that have essentially been reviewed.

The Bank makes new measures of the lease liability discounting the modified lease payments, if (a) there is a change in the expected amounts payable related to a residual value guarantee. A lessee will determine the lease payments to determine the change in the amounts expected to be paid under the residual value guarantee; (b) there will be a change in future lease payments determined from a change in an index or a rate used to determine those payments.

The Bank measures the lease liability again to modify the modified lease payments only when there is a change in cash flows. The Bank will determine the revised lease payments, for the remainder of the lease term, based on the revised contractual payments.

The Bank measured the lease liability at the present value of the lease payments discounted using the incremental interest rate for loans (cost of funding).

t) Provisions for credit risk on "Interbank Loans" and "Loans and accounts receivable from customers"

The Bank has established provisions for impairment losses due to credit risk on "Interbank Loans", "Loans and receivables from customers" and "Contingent loans", in accordance with the instructions defined in the compendium, issued by the Commission for the Financial Market (CMF), and the credit risk rating and evaluation models approved by the Bank's Corporate Governance, in order to make the necessary and sufficient provisions in a timely manner to cover the expected losses associated with the characteristics of the debtors and their receivables, which determine the payment behavior and subsequent recovery.

The processes and compliance with the policy are evaluated and supervised in accordance with internal control procedures, in order to ensure compliance and the maintenance of an adequate level of provisions to support expected losses.

Note 2 - Summary of Significant Accounting Policies, continued

Provisions determined and denominated "individual allowances", correspond to debtors that are individually, assessed due to size, complexity or level of exposure to the Bank, it is necessary to know and analyze in detail.

Provisions determined and denominated "group allowances", includes individuals or smaller companies, and are associated to a high number of transactions with homogeneous characteristics and that due to such conditions are evaluated collectively.

In order to establish allowances for loan losses, an assessment of the loans and contingent loans portfolios is performed as indicated below:

- Individual allowances for the normal portfolio.
- Individual allowances for the substandard portfolio.
- Individual allowances for the impaired portfolio.
- Group allowances for the normal portfolio.
- Group allowances for the impaired portfolio.

(i) Individual allowances

When a debtor is considered as individually significant, i.e. with significant levels of debt and for those ones that are not significant but cannot be classified in groups of financial assets with homogeneous credit risk characteristics, and due to its size and complexity or exposure it is required to be individually assessed.

The methodology used to classify and determine its allowances is performed in accordance with Chapter B-1 "Provisions for credit risk" from the compendium, assigning risk categories to each debtor according to the following portfolio:

a) Normal portfolio

Corresponds to debtors whose capacity payments allows them to comply with their obligations and commitments, and according to the economic-financial situation this condition will not change. The classifications assigned to this portfolio are the categories that goes from A1 to A6. Notwithstanding the above, the Bank must maintain a minimal allowance percentage of 0.5% over its loan portfolio and contingent loans that form part of the Normal portfolio.

b) Substandard portfolio

Includes the borrowers which have financial difficulties, or whose payment capacity worsened significantly, presenting reasonable doubt regarding the probability principal and interest under the contractually agreed terms, indicating that they are less likely to comply with their financial obligations in the short term. In addition, borrowers that recently held loans in default for over 30 days also are included in the substandard portfolio. The classifications assigned to this portfolio are categories B1 to B4.

Note 2 - Summary of Significant Accounting Policies, continued

c) Normal and Substandard portfolios

As part of the debtors' individual analysis, the Bank classifies its debtors into the aforementioned categories, assigning probabilities of default (PD) and loss given default (LGD), which yield the expected loss percentages as a result. These variables are regulated by the CMF- to be applied to each of the individual categories.

The following table presents the probability of default (PD) and loss given default (LGD) established by the CMF":

Type of portfolio	Category of debtor	Probability of default (DP)	Loss given default (LGD)	Expected loss (EL)
		(%)	(%)	(% Provision)
Normal portfolio	A1	0.04	90.00	0.03600
	A2	0.10	82.50	0.08250
	A3	0.25	87.50	0.21850
	A4	2.00	87.50	1.75000
	A5	4.75	90.00	4.27500
	A6	10.00	90.00	9.00000
Substandard portfolio	B1	15.00	92.50	13.87500
	B2	22.00	92.50	20.35000
	B3	33.00	97.50	32.17500
	B4	45.00	97.50	43.87500

In order to determine the amount of provisions, the Bank first determines the affected exposure, which comprises the book value of the customer's placements plus the contingent credits, less the amounts that are feasible to recover through the execution of the guarantees, financial or real, backing the operations, to which the respective loss percentages are applied. In the case of collateral, the Bank must demonstrate that the value assigned to this deduction reasonably reflects the value it would obtain on the disposal of the assets or equity instruments. In the case of substitution of the debtor's credit risk for the credit quality of the guarantor or surety, this methodology will only be applicable when the guarantor or surety is an entity rated in a category similar to investment grade by a local or international rating agency recognized by the regulator.

Guaranteed values may not be deducted from the exposure amount. The procedure apply only in the case of financial or real guarantees.

Note 2 - Summary of Significant Accounting Policies, continued

d) Impaired portfolio

Includes the loans to borrowers for which recovery is considered remote, given that they have suffered a loss event resulting in impairment. This portfolio includes borrowers with evident signs of possible bankruptcy, as well as those in which a forced debt renegotiation is required, and also includes any borrower with loans in default for equal to or greater than 90 days in the payment of interest or principal of any loan.

The classifications assigned to this portfolio are categories C1 to C6. Applied to all credits, including 100% of the amount of contingent credits, held by those same debtors.

For purposes of establishing provisions on this portfolio, in the first instance an expected loss rate is determined, deducting from the amount of the exposure the amounts susceptible to recovery through the execution of financial and real guarantees that support the operations and also deducting the present value of the recoveries obtained through collection actions net of associated expenses.

Once the expected loss range has been determined, the respective allowance percentage is applied to the amount of the exposure comprising the placements plus the contingent credits of the same debtor.

Allowance percentages to be applied over the exposition are as follows:

Type of portfolio	Risk scale	Expected loss range	Provision
Impaired portfolio	C1	Up to 3%	2%
	C2	More than 3% and up to 20%	10%
	C3	More than 20% and up to 30%	25%
	C4	More than 30% and up to 50%	40%
	C5	More than 50% and up to 80%	65%
	C6	More than 80%	90%

Loans are maintained in this portfolio until a normalization of their payment capacity or behavior is observed, without prejudice to the write-off of each particular loan that meets the condition set forth in Title II of Chapter B-2 of the compendium.

In order to remove a debtor from this portfolio, once the circumstances that led to its classification in this portfolio under these rules have been overcome, at least the following copulative conditions must be met:

- None of the debtor obligations with the Bank are overdue for more than 30 days.
- No new re-financing of loans has been granted.
- At least one of the payments received includes principal payment (total or partial).
- If the debtor has a loan with partial payments due within six months, two payments have been made.
- If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Group allowances

Collective assessment are used to deal with a large number of loan transactions with small amounts granted to individuals and small size companies. This type of assessment, as well as the criteria to apply for them, must be consistent with those used when loans were granted.

To establish allowances, collective assessment requires grouping loans with homogeneous characteristics in terms of type of debtor and loan conditions, in order to conform, by technically formulated methodologies and following prudential criteria, the payment behavior of the group and the recoveries for defaulted loans.

Based on the above, the groups are assigned with a probability of default (PD) and loss given default (LGD) considering the profile that best suits the loan. Net exposure is calculated, which includes the book value of the loan plus contingent loans.

a) Standard method for mortgage loans allowances

For the purposes of calculating credit risk provisions of the mortgage loan portfolio for mortgage, the Bank uses the standard provision method for mortgage loans established in the compendium. According to this method the provision factor to be applied, represented by the expected loss (EL) over the amount of the mortgage loans, depends on the overdue of each loan and the relation, at the end of each month, between the gross exposure and the corresponding collateral (LTV), according to the following table:

LTV tranche	Days past due at month-end	0	1 - 29	30 - 59	60 - 89	Portfolio in default
LTV ≤ 40%	PD (%)	1.0916	21.3407	46.0536	75.1614	100
	LGD (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	EL (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40% < LTV ≤ 80%	PD (%)	1.9158	27.4332	52.0824	78.9511	100
	LGD (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	EL (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80% < LTV ≤ 90%	PD (%)	2.5150	27.9300	52.5800	79.6952	100
	LGD (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	EL (%)	0.5421	6.0496	11.5255	17.6390	22.2310
LTV > 90%	PD (%)	2.7400	28.4300	53.0800	80.3677	100
	LGD (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	EL (%)	0.7453	8.2532	15.7064	24.2355	30.2436

In case the same debtor has more than one mortgage loan with the Bank and one of those loans is 90 days overdue or more all those loans are incorporated to the Impaired portfolio, calculating allowances for each one of those loans applying the corresponding percentage according to the LTV.

Note 2 - Summary of Significant Accounting Policies, continued

For mortgage loans related to housing programs and benefits from the Government, when guaranteed by the corresponding auction insurance, the allowance percentage could be weighted for a loss mitigating factor, which depends on the LTV percentage and the value of the property at inception. The loss mitigating factors are those shown in the table below:

LTV tranche	MP loss mitigation factor for credits with state auction insurance	
	V tranche: Price of the house upon executing sale agreement (UF)	
	V ≤ 1,000	1,000 < V ≤ 2,000
LTV ≤ 40%	100%	100%
40% < LTV ≤ 80%	100%	100%
80% < LTV ≤ 90%	95%	96%
LTV > 90%	84%	89%

b) Provisions for Commercial Loans

The Bank uses the three standard models established in the compendium, in order to determine the provisions of the group commercial portfolio. The applicable percentages of provision and the parameters used to determine the provision, are set out on the compendium.

c) Commercial leasing operations

The allowance is determined based on the book value of the commercial lease operations (including the purchase option). The allowance percentage used in the calculation will depend on the delinquency of each operation, the type of leased asset and the relationship, at the end of each month, between the book value of each operation and the value of the leased asset (LTV), as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and type of asset (%)		
Days of delinquency of transaction at end of month	Type of asset	
	Real Estate	Non-real estate
0	0.79	1.61
1 - 29	7.94	12.02
30 - 59	28.76	40.88
60 - 89	58.76	69.38
More than 90	100.00	100.00

Loss Given Default (LGD) applicable according to PVB tranche and type of asset (%)		
PVB= Current value of transaction/ Value of leased asset		
PVB tranche	Real Estate	Non-real estate
PVB ≤ 40%	0.05	18.20
40% < PVB ≤ 50%	0.05	57.00
50% < PVB ≤ 80%	5.10	68.40
80% < PVB ≤ 90%	23.20	75.10
PVB > 90%	36.20	78.90

**Note 2 - Summary of Significant Accounting Policies, continued**

The LTV relationship is determined considering the guarantee appraisal value, expressed in UF for real estate and in Chilean pesos for non-real estate, recorded at inception, considering any transitory event that may cause an increase on the value of the asset.

d) Student loans

The expected loss (%) is applied over the amount of the student loan and the exposure of the contingent credit when applicable. The factor used is determined based on the type of student loan and the collectable payment of principal or interest, at the end of each month. Only when payment is due, the factor will also depend on overdue.

Probability of Default (PD) applicable according to payment due date, delinquency and type of loan (%)				
Payment of principal or interest due at month-end	Days past due at closing of closing	Student Loan		
		CAE	CORFO or other	
Yes	0	5.20	2.90	
	1-29	37.20	15.00	
	30-59	59.00	43.40	
	60-89	72.80	71.90	
	Portfolio in default	100.00	100.00	
No	n/a	41.60	16.50	

Loss Given Default applicable according to payment due date and type of loan (LGD) (%)			
Payment of principal or interest due at month-end		Student Loan	
		CAE	CORFO or other
Yes		70.90	70.90
No		50.30	45.80

For loans granted in accordance with Law 20,027, the Bank considers the Government as a qualified guarantor for 90% of the loan.

Note 2 - Summary of Significant Accounting Policies, continued

e) Consumer Portfolio

The Bank recognizes the higher allowances for loan losses resulting from the application of internal models and the standard models established by the CNCB. The standard models set forth the applicable expected loss for transactions and the parameters to be used in the determination of the allowances for loan losses. The expected loss (EL) corresponds to the product of the Probability of Default (PD) and the Loss Given Default (LGD). This factor is uniformly applied to all consumer loans and contingent consumer credit exposures, including consumer leasing transactions, except for exposures of the Bank's foreign subsidiaries and/or branches.

To determine the value of the PD, the following factors are calculated for each debtor: overdue level within the Bank, 30-day overdue in the financial system, and possession of a mortgage loan. Based on these variables, the PD is determined according to the parameters set out in the following table:

Maximun past due level in the month and the Bank (interval in days, inclusive)	With mortgage loan in the financial system		Without mortgage loan in the financial system	
	No past due over 30 days in the system	Past due over 30 days in the system	No past due over 30 days in the system	Past due over 30 days in the system
0 y 7	3.30%	14.60%	6.60%	19.80%
8 y 30	20.40%	41.60%	30.60%	48.50%
31 y 60	50.20%	63.00%	65.10%	66.30%
61 y 89	62.60%	81.70%	72.30%	86.90%

If the debtor is in default, the assigned PD will be 100%.

To determine the value of the LGD, it must be identified whether the debtor holds a residential mortgage loan within the financial system, as defined for determining the PD value, and the type of credit involved. The LGD to be used is determined according to the following table:

	Leasing operations and automotive loans	Installment loans	Credit cards, credit lines, and other consumer loans
With mortgage loan in the financial system	33.2%	47.7%	49.5%
Without mortgage loan in the financial system	33.2%	56.6%	60.3%

Note 2 - Summary of Significant Accounting Policies, continued

f) Generic commercial placements and factoring

Factoring operations and commercial loans, other than those indicated above, expected loss (%) is applied over the amount of the loan and on the exposure of the contingent credit. The factor used is determined based on whether the operation has guarantees and it's overdue. In addition for those operations with guarantees, the relationship between the debtor's obligations to the bank and the value of the guarantees (LTV) is used to determine the factor as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and PTVG tranche (%)				
Days past due at month-end	With guarantee		Without guarantee	
	PTVG <=100	%	PTVG >100	%
0		1.86	2.68	4.91
1-29		11.60	13.45	22.93
30-59		25.33	26.92	45.30
60-89		41.31	41.31	61.63
Portfolio in default		100.00	100.00	100.00

Loss Given Default (LGD) applicable according to PTVG tranche (%)			
	PTVG tranche	Commercial generic transactions or factoring without liability of the assigner	Factoring with liability of the assigner
With guarantee	PTVG <= 60%	5.00	3.20
	60% <PTVG <= 75%	20.30	12.80
	75% <PTVG <= 90%	32.20	20.30
	90% < PTVG	43.00	27.10
	Without guarantee	56.90	35.90

A guarantee or collateral can only be considered if, the guarantee was constituted in favor of the Bank with preference and if the guarantees is directly associates with the debtor's credits (not shared with other debtors). For the purposes of calculating the LTV, the invoices assigned in the factoring operations, nor the guarantees associated with mortgage loans can be considered.

The guarantees used in calculating the LTV relationship may be of a specific or general purpose, including those that are simultaneously specific and general. In the case of specific guarantees, the PTVG ratio must be calculated independently for each secured transaction, as the division between the amount of the placement and the contingent credit exposure and the value of the collateral securing it. For general and specific guarantees, LTV is determined as the division between the sum of the amounts of the loan and exposures of contingent credits and the general and specific guarantees considering any restriction.

**Note 2 - Summary of Significant Accounting Policies, continued****g) Provisions associated with financing guaranteed by FOGAPE**

As of July 2020, the CMF (Chilean Financial Market Commission) required that the effect of the deductible be considered in the determination of the allowances for loan losses, replacing the risk quality of the debtor to the credit quality of the FOGAPE Covid-19 and FOGAPE Reactiva guarantees. The risk assessment in performance for each transaction without considering the guarantee of the respective FOGAPE guarantee, following the method of individual or group analysis as appropriate, in accordance with Chapter B-1 of the Compendium of Accounting Standards. The analysis should be carried out at an aggregated portfolio level, grouping all those exposures that present the same deductible percentage. Therefore, the total amount of expected losses should be compared against the aggregate deductible amount for each group of operations and contrasted with the respective guarantee. If the expected losses, assessed this way, exceed the deductible, provisions should be determined using the substitution method set forth in numeral 4.1, letter a) of Chapter B-1 of the Compendium of Accounting Standards. If the expected losses are greater than the deductible aggregate amount, provisions related to the deductible must be recognized in separate accounts within the commercial, consumer, and mortgage loan provisions. As of March 31, 2025, and December 31, 2024, the Bank recorded provisions for this concept amounting to MCh\$3,540 and MCh\$3,580, respectively.

h) Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting year in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium, using the methodology set forth in letter b) "Guarantees".

i) Impaired portfolio - Collectively assessed loan

The group in default loan portfolio comprises all loans and 100% of the amount of contingent loans of debtors who at the end of a month are 90 days or more past due in the payment of interest or principal on any loan. It will also include debtors who have been granted a loan to leave in force a transaction that was more than 60 days overdue, as well as debtors who have been subject to forced restructuring or partial forgiveness of a debt.

The following can be excluded from the group impaired portfolio:

- a) Mortgage loans overdue for less than 90 days, unless the debtor has another loan of the same type with large overdue; and, loans for financing higher education under Law 20,027,
- b) that do not yet meet the default conditions set forth in Circular 3,454 of December 10, 2008.

**Note 2 - Summary of Significant Accounting Policies, continued**

All debtor's loans should be classified in the Impaired portfolio until a normalization of its behavior and management capacity can be observed, regardless of charge-offs requirements indicated in the accounting policy detailed in letter w), charge-offs section title II, Chapter B-2 of the Compendium. In order to remove a debtor from the Impaired portfolio, once the circumstances that made it be classified in this category are overcome according to these standards, all the following requirements must be met:

- 1) None of the debtor obligations with the Bank are overdue for more than 30 days.
- 2) No new re-financing of loans has been granted.
- 3) At least one of the payments received includes principal payment (total or partial).
- 4) If the debtor has a loan with partial payments due within six months, two payments have been made.
- 5) If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- 6) The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

(iii) Guarantees

Las Guarantees can be considered for allowances calculation purposes only if they are legally documented and comply with all conditions and requirements to be executable in Bank's favor.

In all cases, for purposes of the standards established by the CMF, the Bank should be able to demonstrate the mitigating effect of the guarantees over the inherent credit risk of the exposures. For allowances calculation purposes, guarantees will be treated according to the following, as applicable:

- (1) Collateral and guarantees: Considers contractual agreements to guarantee a specific loan or loans in a way that the coverage over the exposure can be clearly defined and where the rights to collect have been unquestionably transferred over to the guarantor.
- (2) Guarantees: In order to apply the deduction method or to determine recovery rates, valuation of property and other guarantees (mortgages or financial instruments guarantees) must reflect the net inflow that will be obtained from the sale of the assets, debts instruments or shares in the event that the borrower falls into default and a secondary source of payment is required. In applying the deduction method, the amount to be recovered by executing the guarantee, corresponds to the present value of the asset sold in its current market condition at disposal, minus all expenses required to keep the asset in its current conditions and to sell them, all in accordance with the Bank policies and terms established by Law for assets disposal.
- (3) Security deposit: On this type of guarantees the adjustment of its fair value may be deducted from the exposition, solely when the guarantee can be established with the unique aim to guarantee compliance with the related loans.

Note 2 - Summary of Significant Accounting Policies, continued

- (4) Leased assets: Estimated losses when establishing allowances based on the assessment method corresponding to each debtor, consider the amount that will be obtained if the leased asset are sold, taking into account any potential impairment for the assets in case of debtor's default and the related recovery and relocation expenses.
- (5) Factoring operations: Establishing allowances for factoring operations will consider as counterparty the entity ceding rights over the endorsed in favor of the Bank, when the cession is recourse for the latter, and to the debtor when the cession has been made without recourse.

(iv) Additional provisions

The Bank can establish provisions in addition to those calculated by applying the loan portfolio assessment models, according to the set forth in number 9 of Chapter B-1 of the compendium. These provisions can be established with the purpose of addressing the risks arising from macroeconomic fluctuations by anticipating expansive economic cycle downturns which could materialize in the worsening of the economic environment in the future and, in that manner, operate as an anti-cycle mechanism to accumulate additional provisions during positive economic conditions and release or use provisions when negative economic conditions are present.

According to the above, additional provisions shall always correspond to general allowances for commercial, consumer or mortgage loans, or to identify segments of them and in no case can be used to compensate deficiencies in the Bank's models.

As of March 31, 2025 the Bank maintained additional provisions for its commercial, consumer and mortgage loan portfolio amounting to MCh\$107,380 (as of December 31, 2024, the Bank maintained additional provisions of MCh\$109,052).

u) Impaired credits and charge-offs

i) Impaired loans

This portfolio is comprised of the following assets:

- For individually assessed debtors, includes loans classified in the "Impaired portfolio" and those classified under categories B3 and B4 of the "Substandard portfolio", as described above.
- For those debtors collectively assessed, includes all loans classified in the "Impaired portfolio".

ii) Charge-offs

As a general rule, charge-offs should be applied when contractual rights to cash flows expire. In the case of placements, even if this does not occur, the respective asset balances will be written off in accordance with the provisions of the compendium, Chapter B-2, Title II "Impaired and written-off loans".

Note 2 - Summary of Significant Accounting Policies, continued

The write-offs in question refer to the derecognition in the Interim Consolidated Statement of Financial Position of the asset corresponding to the respective operation, including, therefore, that part which might not be due if it were a loan payable in instalments or partial payments, or a leasing operation.

Charge-offs are always recognized against provisions for loan losses, according to Chapter B-1 of the compendium, regardless of the reason.

Charge-off of loans and accounts receivable must take place when the following circumstances exist, whichever happens first:

- 1) The Bank, based on all available information, concludes that no inflow related to the recorded loan will be received.
- 2) When a loan or account receivable with no legal documentation is 90 days overdue since recorded as an asset.
- 3) When the legal term for all legal shares to collect the loan have expired.

When a loan is overdue for a period of time that complies with the term listed below:

Type of loan	Term
Consumer loans with or without collateral	6 months
Consumer leasing	6 months
Other operations of non real estate leasing	12 months
Other transactions without collateral	24 months
Commercial loans with collateral	36 months
Real estate leasing (commercial and home purchase)	36 months
Mortgage loans for home	48 months

The term corresponds to the time passed since the date in which the loan became collectable partially or totally.

iii) Recovery of assets previously charged-off

Payments received from loans previously charged-off are recognized directly as income, as recoveries of loans previously charged-off in “Expense for credit losses” compensating the provision expense.

In the event that recoveries through goods or non-financial assets income will be recognized for the amount in which those assets are recorded, according to Chapter B-5 “Assets received in lieu of payment” of the compendium. Same criteria will be followed for repossessed leased assets granted under finance leases, after being charged-off when incorporated back as assets.

Note 2 - Summary of Significant Accounting Policies, continued

iv) Renegotiation of previously charged-off loans

Any renegotiation of a written-off loan will not give rise to income as long as the transaction continues to be impaired, and the actual payments received must be treated as recoveries of written-off loans.

The renegotiated loan is recorded as an actual asset when losses its characteristic of impaired, recording income as a recovery of a loan previously charged-off. Same criteria is applied when a loan is granted to pay for a loan previously charged-off.

v) Contingent loans

Contingent loans are understood as those transactions or commitments for which the Bank is taking a risk when obligating in third parties benefit as requested by its customer subject to the occurrence or nonoccurrence of a future event to pay a certain amount which will subsequently recovered from its customer.

The Bank maintains recorded in off-balance accounts the following amounts related to commitments or responsibilities in the normal course of business.

- Guarantees agreement: Includes collaterals, guarantees and stand by letter of credit as indicated in Chapter 8-10 of the Updated Compilation of Rules (RAN). Additionally, includes payment guarantees for factoring operations as indicated in Chapter 838 of the RAN.
- Confirmed foreign letters of credit: Corresponds to letters of credit confirmed by the Bank.
- Letters of credit issued: Includes documentary letters of credit issued by the Bank not yet negotiated.
- Documented guarantees: Corresponds to documented guarantees granted with promissory notes as indicated in Chapter 8-11 of the RAN.
- Available lines of credit: Considers the not used amounts of lines of credit which allow clients to use loans without additional approval from the Bank (i.e. for the usage of credit cards or checking account overdrafts).
- Other loans commitments: Includes amounts for loan commitments not disbursed which should be granted in a future agreed date or disbursed when agreed terms are met, such as credit lines linked to stage of completion of projects or student loans (Law 20,027).
- Other contingent loans: Includes any other type of commitment of the Bank that could exist and could give rise to an effective loan when certain future events take place. In general, includes unusual transactions such as delivery of instruments as collateral to guarantee payment for loan transactions between third parties or derivative contracts transactions entered into on behalf of third parties that could imply a payment obligation not covered by a deposit.

Note 2 - Summary of Significant Accounting Policies, continued

The amount of these contingent loans are considered at the end of each reporting period to calculate allowances for loan losses required by Chapter B-1 “Provisions for loan losses” of the compendium, and the amounts must be calculated according to the exposition factor, according to the following table:

Type of contingent exposure	FCC (1)
1) Freely disposable lines of credit with immediate cancellation	10%
2) Contingent credits linked to the CAE	15%
3) Letters of credit for goods movement transactions	20%
4) Other freely disposable lines of credit	40%
5) Commitments to purchase foreign debt in local currency	50%
6) Transactions related to contingent events	50%
7) Guarantees and sureties	100%
8) Other credit commitments	100%
9) Other contingent credits	100%

(1) Credit conversion factor

However, when evaluating contingent loans for clients with non-compliant loans the amount to be considered to calculate provisions for loan losses shall be 100% of the contingent loan as indicated in Chapter B-1 as previously indicated.

v) Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting period in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium of Accounting Standards, using the methodology set forth in letter b) “Guarantees”.

w) Income taxes and deferred taxes

The Bank has recognized an expense (income) arising from gains or losses for each period, according to the applicable taxation rules for each country or jurisdiction it operates.

The income tax expense for the year includes the sum of current tax, which results from applying the current rates to the taxable profit for the year (after deducting the tax credits allowed), and the change in deferred tax assets and liabilities recognized in the Consolidated Statement of Income. The Bank records, when appropriate, deferred tax assets and liabilities for the estimated future tax effects attributable to differences between the carrying amount of assets and liabilities and their tax basis.

Note 2 - Summary of Significant Accounting Policies, continued

The measurement of deferred tax assets and liabilities is based on the tax rate, in accordance with the applicable tax laws, using the tax rate that applies to the period when the deferred asset and liability will be settled. The effects of deferred taxes on temporary differences between the balance sheet and the income statement are recognized in deferred taxes as of the date on which the law approves such changes. The effects of deferred taxes on temporary differences between the tax balance sheet and the financial balance sheet are recorded on an accrual basis, in accordance with IAS 12 "Income Taxes" and presented in accordance with the same IAS.

x) Provisions and contingent liabilities

A provision is a liability of uncertain timing or amount. Provisions are recorded in the Interim Consolidated Statement of Financial Position when the Bank:

- Has a present obligation (legal or constructive) as a result of past events,
- It is probable that an outflow of resources will be required to settle these obligations, and
- The amount of these resources can be reliably measured.

A contingent liability is any possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events that are not wholly within the control of the Bank.

Guarantees agreement, confirmed foreign letters of credit, letters of credit, letters of guarantee, unused lines of credit, other credit commitments, other contingent credits (see letter v) are classified as contingent in supplementary information.

Provisions (quantified using the best available information on the consequences of the event giving rise to them and are reviewed and adjusted at the end of each year) are used to satisfy specific obligations for which they were originally recognized. Partial or total reversals are recognized when such liabilities cease to exist or are reduced.

Provisions are classified according to the obligations covered, being for the purpose of these Consolidated Financial Statements, those detailed in note 24 "Provisions for contingencies", note 25 "Provisions for dividends, interest payments and repricing of regulatory capital financial instruments issued" and note 26 "Special provisions for credit risk".

Note 2 - Summary of Significant Accounting Policies, continued

y) Employee benefits

i) Employee benefits Short-term benefits

Correspond to personnel benefits (other than termination benefits) that are expected to be settled within twelve months after year end over which the employees have rendered their services.

These are recognized when the employee has rendered the service and are measured at the undiscounted amount of benefits expected to be paid in exchange for that service:

- As a liability (accrued expense), after deducting any obligation already satisfied. If the amount already paid is higher than the gross amount of the benefits, the Bank will recognize this excess as an asset (amount paid in advance), when it represents a reduction of future payments or a recoverable amount in cash.
- As an expense, unless other IFRS requires or allows the recognition of those disbursements as part of the cost of an asset.

ii) Personnel vacations

The annual cost of personnel vacations and benefits are recognized on an accrual basis.

iii) Post-employment benefits

Correspond to employee benefits (other than termination benefits and short-term employee benefits) that are expected to be settled after the completion of employment. Post-employment benefits plans are agreements, formal and informal, in which the Bank is committed to provide benefits to one or more employees after completion of their employment. Plans providing these benefits are classified as either defined contribution plans or defined benefit plans, depending on the economic substance of the plan as derived from its principal terms and conditions.

Defined contribution plans, the obligation is recognized for the amounts to be contributed in the period.

Defined benefit plans, a liability is recognized based on the estimated benefit cost that employees have accrued for services rendered, less the present value of the defined benefit obligation and present value of present services. Present service cost and gain or loss upon settlement will be recognized in the income statement for the year. Gains and losses generated from the remeasurement of the liability will be recognized in other comprehensive income.

Note 2 - Summary of Significant Accounting Policies, continued

iv) Other long-term benefits

Other long-term employee benefits are employee benefits, other than short-term, post-employment and termination benefits, which are not due for payment within 12 months after the end of the period in which the employees render the service.

The regulations require the recognition of a liability for the present value of the defined benefit obligation less the fair value of the plan assets, if any. The results generated from its remediation will be recognized in the results of the period.

v) Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment, as a consequence of:

- A decision of the entity to terminate the employee's employment before the normal termination date; or
- The decision of an employee to accept an offer with benefits in order to terminate the employment before the normal termination date.

An entity recognizes a liability and expense for termination benefits at the earlier of the following dates:

- When the entity can no longer withdraw the offer of those benefits; and
- When the entity recognizes costs for a restructuring that is within the scope of IAS 37 "Provisions, contingent liabilities and contingent assets" and involves the payment of termination benefits.

vi) Cash-settled share-based payment transactions.

The Bank recognizes a liability for cash-settled share-based payment transactions at fair value at the inception of each contract. Until the liability is settled, the Bank will remeasure the fair value of the liability at the end of each reporting period and at the settlement date, and will recognize any fair value variation in profit or loss for the period.

z) Provision for mandatory dividends

A liability recognized due to the legal obligation to distribute 30% of the profit of the year in compliance with Public Company Law (30%) or in accordance with the provisions of the company bylaws. As of March 31, 2025 and December 31, 2024, the Bank provisioned 30% of its net income. This provision is recorded as a decrease in "Retained earnings" under "Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments" in the Interim Consolidated Statement of Changes in Shareholders' Equity.

Note 2 - Summary of Significant Accounting Policies, continued

In the Bank's bylaws, title VII, it is established that the Bank should distribute annually as a dividend to its shareholders, as a proposal of the Board of Directors and based on the number of shares, at least thirty percent (30%) of the net income of the year. Furthermore, no dividends distribution will take place if there are equity losses (negative reserves) until these losses are recovered or if a dividend distribution will cause a non-compliance of the capital requirements established by the General Bank Law.

aa) Assets received or awarded in lieu of payment

Assets received or awarded in lieu of payment of loans and accounts receivable from clients are recognized at their fair value (as determined by an independent appraisal). A price is agreed upon by the parties through negotiation or, when the parties do not reach an agreement, at the amount at which the Bank is awarded those assets at a judicial auction. In both cases, an independent appraisal is performed.

These assets are subsequently adjusted to their net realizable value less cost to sale, and the difference between the carrying value of the asset and the estimated fair value less costs to sell is charged to income, under "Other operating expenses".

Assets received or foreclosed in payment are valued at the lower of initial value and net realizable value, i.e. fair value (independent appraisal) less costs to hold and dispose of, plus regulatory write-offs. Regulatory write-offs are required by the regulator if the asset is not sold within one year of receipt.

Such net realizable value of an assets is determined mainly in conformity with the current market conditions, and should correspond to its fair value less the necessary costs to maintain and dispose it.

In general, it is estimated that these assets will be disposed of within one year from the date of award. However, the regulator, by means of general rules, may establish that, in justified cases, the Bank may have an additional term of up to eighteen months for the disposal of the assets. In order to be eligible for the extension, the value of the asset must have been written off for accounting purposes, in compliance with Article 84 of the General Banking Law.

bb) Customer loyalty programs

The Bank maintains a loyalty program to provide incentives to its customers, allowing them to purchase goods or services with certain benefits which are granted through credit cards issued by the Bank when they purchase according to the conditions established for each loyalty program.

The Bank has an adequate level of provisions in order comply with its current obligations and to properly reflect the associated expense when providing the benefits.

Note 2 - Summary of Significant Accounting Policies, continued

cc) Non-current assets held for sale

Non-current assets (or a group holding assets and liabilities for disposal) expected to be recovered mainly through the sale of these items rather than through the continued use, are classified as held for sale. Immediately prior to this classification, assets (or elements of a disposable group) are re-measured in accordance with the Bank's policies. The assets (or disposal group) are measured at the lower of carrying amount and fair value less cost to sell.

Impairment losses in initial classification of non-current assets held for sale and with subsequent gains and losses are recorded in income. Gains are not recorded over previously recorded losses.

dd) Bonds with no fixed maturity

Bonds with no fixed maturity are measured on initial recognition at fair value less any transaction costs that are directly attributable to the issuance. The financial expenses included in the effective interest method correspond to transaction costs, including issuance expenses, these expenses are recognized together with interest. Transaction costs are deferred over a maximum term of 5 years from the issuance date and will be recognized in the Interim Consolidated Income Statement. Exchange differences from foreign currency, exchange rate adjustments and adjustments for the *Unidad de Fomento* (an inflation-linked unit of account used in Chile) with respect to these bonds must be recorded in the Interim Income Statement.

The accrual of interest on are recognized in "Provisions for dividends, interest payments and revaluation of regulatory capital financial instruments issued" in the Interim Statement of Changes in Consolidated Equity, the provision is reversed "Retained earnings (accumulated losses) from prior years" and "Profit from the prior year to be allocated" each time a payment of interest is made.

ee) Earnings per share

Basic earnings per share are determined by dividing the net income attributable to the equity holders of the Bank for the reported period by the weighted average number of shares outstanding during the reported period.

Diluted earnings per share are determined in the same way as basic earnings, but the weighted average number of outstanding shares is adjusted to take into consideration the potential diluting effect of stock options, warrants, and convertible debt.

As of March 31, 2025 and December 31, 2024 the Bank did not have any instruments that generated dilution.

Note 2 - Summary of Significant Accounting Policies, continued

ff) Interim Consolidated Statement of Cash Flows

The Bank presents cash flows from operating activities, investing activities, and financing activities in a manner that best represent the nature of its activities. The classification of cash flows into the aforementioned categories provides information that allows users to evaluate the impact of the transactions in the financial position of the Bank, as well as over the ending balance of cash and cash equivalents. This information can be also useful when evaluating the relation between those activities (IAS7) .

For the preparation of the Interim Statement of Cash Flows, the Bank used the indirect method, in which from the consolidated income for the year before income tax, non-cash transactions are subsequently added/subtracted, as well as income and expenses associated with cash flows classified as investing or financing activities.

For the preparation of the Interim Statement of Cash Flow, the following items are considered:

- **Cash flows:** Inflows and outflows of cash and cash equivalents, such as deposits with the Central Bank of Chile, deposits in domestic banks, and deposits in foreign banks (includes deposits from the Bank of the Republic of Colombia).
- **Operating activities:** Principal revenue-producing activities performed by banks and other activities that cannot be classified as investing or financing activities. This section includes, among others, loans obtained from abroad, dividends received from investments, financial instruments at fair value through other comprehensive income and amortized cost, etc.
- **Investing activities:** Correspond to the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- **Financing activities:** Activities that result in changes in the size and composition of the equity and liabilities that are not part of operating activities nor investing activities.

For the purposes of the Interim Statement of Cash Flows, cash and cash equivalents have been considered as cash and cash equivalents, the balances of "Cash and bank deposits" plus the net balance of operations in liquidation in progress, plus financial instruments for trading at fair value through profit or loss and financial instruments at fair value through other comprehensive income with high liquidity and with insignificant risk of change in value, whose maturity does not exceed three months from the date of acquisition and the rights under resale agreements and securities lending that are in that situation.

Includes also investments in fixed income mutual funds which are presented under trading investments in the Interim Consolidated Statement of Financial Position. Cash and cash equivalents balances and their reconciliation to the Interim Consolidated Statement of Cash Flows are detailed in Note 7 "Cash and Cash Equivalents".

The provision for loan losses included under the operating activities section differs from the amount presented in the Interim Consolidated Statement of Income, because for cash flows purposes such amount excludes recoveries of transactions previously charged-off.

Note 2 - Summary of Significant Accounting Policies, continued

gg) Consolidated Statement of Changes in Equity

The Consolidated Statement of Changes in Equity presents all movements affecting net equity, including those originated by accounting changes or errors recognition. This statement shows a conciliation between opening and ending balances for the year for all items that form part of consolidated equity, grouping transactions based on their nature, according to the following:

- Adjustments for changes in accounting criteria and correction of errors: which include changes in consolidated net equity arising as a result of the retrospective restatement of balances in the Interim Consolidated Financial Statements due to changes in accounting criteria or correction of errors.
- Net comprehensive income: Includes in an aggregated manner net income recorded in the Interim Statement of Other Comprehensive Income, as previously indicated.
- Other changes in equity: Includes retained earnings distributions, equity increases, provision for mandatory dividends, dividends paid, among other increases or decreases in consolidated equity.

This information is presented in two statements: The Interim Consolidated Statement of Other Comprehensive Income and the Interim Consolidated Statement of Changes in Equity.

hh) Consolidated Statement of Other Comprehensive Income

In the Interim Consolidated Statement of Other Comprehensive Income are presented income and expenses generated by the Bank as a consequence of its regular activities during the year, clearly identifying those recorded in profit and loss from those recorded in net equity.

Due to this, in this statement the following is shown:

- The consolidated income.
- Net amount of income and expenses recorded in equity as "Valuation accounts".
- Deferred income taxes originated by transactions described above, except for those amounts related to exchange differences from foreign net investments.

Total amount of consolidated income and expenses recorded, calculated as the sum of the items listed above, presenting in those attributable equity holders of the Bank from non-controlling interest.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted

New accounting pronouncements introduced by CMF

1. Standards and interpretations issued in the current period

Circular No. 2,346 - Compendium of Accounting Standards for Banks. Chapter B-1 and E. Standard model for allowances for losses on consumer loans.

On March 6, 2024, the Financial Market Commission, developed a standardized methodology for calculating the allowances associated with the risk of loss on the consumer loans portfolio. Based on the above, chapter "3.1.3 Consumer Loans Portfolio" was incorporated into Chapter B-1 of the Compendium of Accounting Standards for Banks, detailing the risk matrix used to define Expected Loss, Default Probability, and Loss Given Default. This method establishes PD and LGD parameters that must be used to determine the provision factor that will be applied to the exposures of the consumer portfolio of banking institutions in Chile.

The regulation came into effect starting with the accounting information for January 2025

The Bank's Management evaluated the potential impact of the adoption of the new standard method and has concluded that its adoption does not have significant impacts on the Interim Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

New accounting pronouncements introduced by IASB

1. Standards and interpretations issued in the current period

Amendment to IAS 21 - Effects of Changes in Foreign Currency Exchange Rates

On August 15, 2023, the IASB has issued "Amendments to IAS 21 Effects of Changes in Foreign Currency Exchange Rates" which will require companies to provide more useful information in their financial statements when a currency cannot be exchanged for another currency.

The main modifications are as follows:

- Specify when a currency is exchangeable for another currency and when it is not.
- Specify how an entity establishes the exchange rate to be applied when a currency is not exchangeable.
- Require additional disclosures when a currency is not exchangeable.

The effective date is effective for annual reporting periods beginning on or after January 1, 2025, early adoption is permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Interim Consolidated Financial Statements; however, no material impacts are anticipated.

2. Standards and Interpretation issued but not yet effective

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (amendments to IFRS 10 and IAS 28)

The amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Companies and Joint Ventures (2011) address a recognized inconsistency between the requirements of IFRS 10 and those of IAS 28 (2011) in the treatment of the sale or contribution of assets between an investor and its associate or joint venture. The amendments, issued in September 2014, state that when the transaction involves a business (whether it is in a subsidiary or not) the entire generated gain or loss is recognized. A partial gain or loss is recognized when the transaction involves assets that do not constitute a business, even when the assets are in a subsidiary.

The effective date for these amendments is yet to be determined because the IASB is awaiting the results of its research project on the equity method accounting. These amendments must be applied retrospectively and early adoption is permitted, which must be disclosed.

The Bank's management will await the new effective date to evaluate the potential effects of these amendments.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

IFRS 18 – Presentation and Disclosure in Financial Statements

On April 9, 2024, the IASB published a new standard, “IFRS 18 Presentation and Disclosure in Financial Statements” that will replace IAS 1 “Presentation of Financial Statements”. This new standard aims at improving the presentation of the Statement of Profit or Loss. The new key topics introduced by this standard include:

- Report specific totals and subtotals in the Statement of Profit or Loss.
- Disclosures about Management-defined Performance Measures (MPMs) in the notes to the financial statements.
- Improve aggregation and disaggregation in presentation and disclosure of information in the Financial Statements.
- Adjust the cash flows structure under the indirect method, starting from Operating Profit or Loss.

IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027 and will be applied to comparative information. Earlier adoption is permitted.

The Bank's Management is evaluating the potential impact of the adoption of this new standard on its Interim Consolidated Financial Statements. As of the date of issuance of these Interim Consolidated Financial Statements, the local regulator, the Financial Market Commission (CMF, for short in Spanish), has not issued a pronouncement regarding the adoption of IFRS 18.

IFRS 19 - Subsidiaries without Public Accountability: Disclosures.

On May 9, 2024, the International Accounting Standards Board (IASB) issued a new standard that is optional for subsidiaries that are eligible. It is “IFRS 19 Subsidiaries without Public Accountability: Disclosures”, which permits subsidiaries without public accountability that meet the requirements to be considered as such to provide much more reduced disclosures that meet the needs of their financial statement users.

IFRS 19 is effective for reporting periods beginning on or after January 1, 2027, and must be applied on comparative information. Earlier and revocable application is permitted.

The Bank's Management is evaluating the potential impact of the adoption of this new standard. However, it does not foresee material impacts on its Interim Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendment-Annual Improvements to IFRS Accounting Standards

On July 18, 2024, the International Accounting Standards Board (IASB) issued narrow amendments to IFRS Accounting Standards. These amendments, published in a single document "Annual Improvements to IFRS Accounting Standards—Volume 11", include clarifications, simplifications, corrections and changes aimed at improving the consistency of five IFRS Accounting Standards. IFRS 1 First-time Adoption of International Financial Reporting Standards; IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; IFRS 9 Financial Instruments; IFRS 10 Consolidated Financial Statements; and IAS 7 Statement of Cash Flows.

The amendments are effective for annual periods beginning on or after 1 January 2026, with earlier application permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Interim Consolidated Financial Statements. However, no material impacts are anticipated.

Amendments to IFRS 9 and IFRS 7: Contracts Referencing Nature-Dependent Electricity

On 18 December 2024, the International Accounting Standards Board (IASB) issued amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures, which are targeted amendments to help companies better report the financial effects of nature-dependent electricity contracts. Nature-dependent electricity contracts help companies to secure their electricity supply from sources such as wind and solar power. The amount of electricity generated under these contracts can vary based on uncontrollable factors such as weather conditions. The amendments include:

- clarifying the application of the "own use" requirements;
- permitting hedge accounting if these contracts are used as hedging instruments; and
- adding new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

These amendments are required to be applied for annual reporting periods beginning on or after January 1, 2026, with earlier application permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Interim Consolidated Financial Statements. However, no material impacts are anticipated.

Note 4 - Accounting Changes

There are no new standards to be adopted in the Interim Consolidated Financial Statements.

Note 5 - Significant Events

During the three-month periods ended as of March 31, 2025, the following significant events have influenced the operations of the Bank and its subsidiaries or these Interim Consolidated Financial Statements:

BANCO ITAÚ CHILE

Notice of Ordinary Shareholders' Meeting

On February 26, 2025, a material event was reported indicating that, at an ordinary meeting of the Board of Directors held on the same date, it was resolved to convene an Ordinary Shareholders' Meeting to be held on April 24, 2025, at 10:00 a.m., to address matters within its authority.

Proposal for Dividend Distribution

On March 26, 2025, a material event was reported to the Financial Market Commission, stating that at an ordinary meeting of the Board of Directors held on that date, it was resolved to propose to the Ordinary Shareholders' Meeting, scheduled for April 24, 2025, the distribution of 30% of the profit for the fiscal year 2024, amounting to CLP 112,988,077,742, as dividends to shareholders based on the total of 216,340,749 shares outstanding issued by the Bank. If approved as proposed, this would result in a dividend of CLP 522.690513919520 per share. It was further proposed that the remaining 70% of net income be retained.

It was also informed that dividends approved will be made available to shareholders as from May 7, 2025. Shareholders entitled to receive dividends will be those registered in the Bank's Shareholders' Register as of noon on April 30, 2025, that is, those recorded in the Register five business days prior to the payment date.

Feller Rate Upgrades Banco Itaú Chile's Credit Rating to "AAA" with a "Stable" Outlook

As of March 31, 2025, Feller Rate upgraded Banco Itaú Chile's solvency rating from "AA+" to "AAA", accompanied by a "Stable" outlook. At the same time, the ratings of its debt instruments were also upgraded. The upgrade reflects the Bank's strong and stable financial profile, which is now more aligned with the system's average. According to Feller, the actions implemented by the Bank's management in recent years have enabled it to successfully navigate market adjustments, while the diversification of its income sources and liabilities continues to strengthen, supporting the Bank's overall financial performance.

**Note 5 - Significant Events, continued****Debt securities placed in the local market**

As of March 31, 2025, the following debt security have been placed in the local market:

Date of placement	Serie	Currency	Amount placed	Date of maturity
1-6-2025	BITADV1022	UF	700.000	10-6-2036
1-7-2025	BITADV1022	UF	220.000	10-6-2036

2-5-2025	BITADV1022	UF	200.000	10-6-2036

Debt securities placed in the international market

As of March 31, 2025, the following debt securities with no fixed maturity date have been issued:

Date of placement	Currency	Amount placed	First voluntary rescue date	Emission rate
2-20-2025	USD	100.000.000	5-20-2030	TSFR6M+3.45%

Note 6 - Reporting Segments

Segment reporting is determined by the Bank on the basis of its operating segments (Chile, which includes the New York branch, and Colombia, which includes Panamá), which are differentiated mainly by the risks and returns that affect them.

The reportable segments and the criteria used to inform the Bank's chief operating decision maker are in accordance with IFRS 8 "Operating segments".

a) Segments

Accordingly, the descriptions of each operating segment are as follows:

(i) Chile

The Bank's commercial activities in Chile are mainly located in the domestic market, the operations have been strategically aligned in five commercial areas directly related to the needs of its customers and the Bank's strategy, being these:

- 1) Itaú Corporate which includes (a) Corporate and Investment Banking, (b) Large Corporates, Multinationals and Institutions, (c) Real Estate and Construction Banking and (d) Private Bank.
- 2) Retail Banking which includes (a) Personal Bank, (b) Itaú Branches and (c) Medium and Small companies.
- 3) Treasury.
- 4) Corporate.
- 5) Other Financial Services.

The Bank manages these business areas using a reporting system for internal profitability. The operating results are regularly reviewed by the entity's highest decision-making authority for operating decisions as one single Cash Generating Unit, to decide on the resource allocation for the segment and evaluate its performance.

(ii) Colombia

Colombia has been identified as a separate operating segment based on its business activities. Its operating results are reviewed regularly by the entity's highest decision-making authority for operating decisions as one single cash generating unit, to decide about resource allocation for the segment and evaluate its performance, and separate financial information is available for it.

The commercial activities of this segment are carried out by Itaú Colombia S.A. and its subsidiaries.

The Bank did not enter into transactions with a particular customer or third party in excess of 10% of its total income during the three months periods ended as of March 31, 2025 and December 31, 2024.

Note 6 - Reporting Segments, continued

b) Geographic Information

Banco Itaú Chile reports revenue by segment from external customers that is:

- Attributed to the entity's country of domicile and
- Attributed, in aggregate, to all foreign countries where the entity obtains revenue.

When income from ordinary activities from external clients attributed to a particular foreign country is significant, they will be disclosed separately. According to the previous, the group operates in two main geographical areas: Chile and Colombia. Chile segment includes the operations carried out by Itaú Chile New York Branch and Colombia segment includes the operations carried out by Itaú (Panamá) S.A. and Itaú Corredores de Seguros Colombia S.A.

Interest income and expense and repricing income and expense information for the three months periods ended as of March 31, 2025 and 2024, for these geographic areas is shown below:

	For the three months periods ended as of 31 March,					
	2025			2024

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b) Hedge accounting

b.1) Fair value hedges

The Bank uses interest rate derivatives to manage its structural risk by minimizing accounting asymmetries in the Interim Consolidated Statement of Financial Position. Through different hedging strategies, it redenominates an element originally at a fixed rate to a floating rate, thus decreasing the financial duration and consequently risk, aligning the balance sheet structure with expected movements in the yield curve.

(1) Only includes cash flows forecast portion of the hedge instruments used to cover interest rate risk.

b.2) Cash flow hedges

Cash flow hedges are used by the Bank mainly to:

- Reduce the volatility of cash flows on inflation-adjusted Interim Consolidated Statement of Financial Position items through the use of inflation forward contracts and combinations of pesos and index-units swap contracts.
- Fixing the rate of a portion of the short-term liability pool in pesos, reducing the risk of a significant portion of the Bank's funding cost, while maintaining the liquidity risk in the liability pool.
- Setting the funding source rate at a floating rate, reducing the risk of an increase in the cost of funds.

(1) Includes only that portion of the projected cash flows of the hedging instrument (derivative) that is used to hedge the risk defined in the hedging relationship.

**Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued**

The balance recognized in the Interim Consolidated Statements of Other Comprehensive Income for cash flow hedges as of March 31, 2025 and December 31, 2024 is presented below:

	Portion Effective	
	As of March 31,	As of December 31,
	2025	2024
	MCh\$	MCh\$
Hedged items		
Loans and receivables to customers		
Loans (Inflation - indexed)	(8,129)	(8,634)
Commercial loans (interest rate)	12,177	9,499
Financial instruments at FVTOCI		
Chilean Treasury bonds	—	—
Time deposits and other deposits		
Time deposits	(11,146)	(10,514)
Debt instruments issued		
Current bonds	511	490
Bonds with banks		
Interbank loans	(1,478)	(1,764)
Highly probable transaction		
Disbursement USD	1,950	2,307
Total	(6,115)	(8,616)

The effective portion generated by those cash flow derivatives was recognized in the Interim Consolidated Statements of Changes in Equity as of March 31, 2025 and December 31, 2024.

The ineffective portion generated by cash flow derivatives is due to the fact that both the hedged item and the item being hedged are not a mirror image of each other, which means that the variations in value attributable to rate and restatement components are not fully offset, but remain within the range of effectiveness defined by the standard.

The following table presents the results generated by the hedging instruments used in the cash flow hedge. The effective portion is recognized in other comprehensive income while the ineffective portion is recognized in the statement of profit or loss. The profit or loss recognized for the periods ended as of March 31, 2025 and 2024 is presented below:

	As of March 31,

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b.3) Hedge of net investments in foreign operations

Banco Itaú Chile, parent company with Chilean peso functional currency, has investments in foreign businesses corresponding to a branch in New York and businesses in Colombia. As a result of the accounting treatment that these investments must receive, fluctuations in the value of the investments caused by the variability of the exchange rate between the Chilean peso in relation to the U.S. dollar and the Colombian peso generate changes in the value of the parent company's equity. The objective of the hedges is to safeguard the value of the equity by managing the exchange rate risk of the investments.

Hedges of a net investment in a foreign business, including the hedging of a monetary item that is accounted for as part of a net investment, will be recorded in a manner similar to cash flow hedges, where:

- The ineffective portion will be recognized in income,
- The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge will be recognized in equity; the effects are presented below:

	As of March 31, 2025											
	Notional amount											
	On demand	Up to 1 month	More than 1 month and less than 3 months	More than 3 months and up to 1 year	Between 1 and 3 years	More than 3 and up to 5 years	More than 5 years	Total	Effective portion of the year	Ineffective portion	Changes in fair value used in measuring effectiveness	Average Price

Other	—	—	—	—
Balances as of December 31, 2024	(254,118)	—	(179,368)	(433,486)

Note 15 - Intangible Assets, continued

d) Impairment

At the end of each reporting period, Banco Itaú Chile assesses whether there is any indication of impairment of any asset (including Goodwill). If this indication exists, or when proof of impairment is required, the Bank estimates the recoverable amount of the asset.

As of March 31, 2025 there have been no indications or evidence of specific impairment events that would require recognition of impairment of these Interim Consolidated Financial Statements.

e) Restrictions

Banco Itaú Chile and subsidiaries have no restrictions on intangible assets as of March 31, 2025 and December 31, 2024. Additionally, no intangible assets have been pledged as collateral for the performance of obligations.

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Note 16 - Fixed Assets

a) The breakdown of this item as of March 31, 2025 and December 31, 2024 is as follows:

Item	Useful life years	Remaining depreciation years	Net assets as of January 1, 2025	Gross balance	Accumulated depreciation	Net assets as of March 31, 2025
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	26	14	9,031	15,522	(6,633)	8,889
Land	—	—	2,979	2,990	—	2,990
Equipment	6	4	12,128	95,820	(84,359)	11,461
Other fixet asset	14	8	6,889	29,887	(23,516)	6,371
Total			31,027	144,219	(114,508)	29,711

Item	Useful life years	Remaining amortization years	Net assets as of January 01, 2024	Gross balance	Accumulated depreciation	Net assets as of December 31, 2024
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	26	14	9,280	15,507	(6,476)	9,031
Land	—	—	2,994	2,979	—	2,979
Equipment	6	4	17,624	96,165	(84,037)	12,128
Other fixet asset	14	8	8,148	30,192	(23,303)	6,889
Total			38,046	144,843	(113,816)	31,027

The useful life presented in the tables above corresponds to the total useful life and residual life of the fixed assets of the Bank and subsidiaries. The total useful life was calculated based on the expected use considering the quality of the original construction, the environment where the assets are located, the quality and level of maintenance carried out and the appraisal performed by external specialists independent from the Bank.

b) The changes in the gross balance of fixed assets as of March 31, 2025 and December 31, 2024 are as follows:

	Buildings	Land	Equipment	Other	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2025	15,507	2,979	96,165	30,192	144,843

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

- d) Banco Itaú Chile evaluates at the end of each reporting year whether there is any indication of impairment of any asset. If this indication exists, or when an impairment test is required, the Bank estimates the recoverable amount of the asset and recognizes it in the Interim Consolidated Statement of Income. (see Note 40).
- e) The Bank and its subsidiaries have no restrictions on fixed assets as of March 31, 2025 and December 31, 2024. In addition, fixed assets have not been pledged as collateral for the performance of obligations. On the other hand, there are no amounts owed on fixed assets by the Bank as of the aforementioned dates.

Note 17 - Right to use Asset and Obligations for Lease Contracts

a) Right to use asset for lease contracts

(i) The Bank mainly has lease contracts for its branches and corporate building. The composition of the item as of March 31, 2025 and December 31, 2024 is as follows:

	Useful life years	Average remaining depreciation years	Net assets as of January 1, 2025	Gross balances	Accumulated depreciation	Net assets as of March 31, 2025
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	8	4	116,473	204,100	(91,123)	112,977
Improvements in leased premises	9	3	22,919	65,690	(44,685)	21,005
Others leased assets	—	—	—	—	—	—
Total			139,392	269,790	(135,808)	133,982

Remeasurements of liabilities due to restatement	2,339	—	—	2,339
Remeasurements of liabilities due to modifications (2)	55	—	—	55
Exchange differences	(330)	9	—	(321)
Balances as of March 31, 2025	204,100	65,690	—	269,790

	Buildings	Improvements in leased premises	Others leased assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2024	175,809	57,179	—	232,988
Additions (1)	64,140	9,875	—	74,015
Sales and/or disposals for the year	(49,037)	(1,572)	—	(50,609)
Remeasurements of liabilities due to restatement	9,820	—	—	9,820
Remeasurements of liabilities due to modifications (2)	51	—	—	51
Exchange differences	1,152	41	—	1,193
Balances as of December 31, 2024	201,935	65,523	—	267,458

(1) Include contract renewals.

(2) Include remeasurement of liabilities due to contract amendments.

(iii) The changes in accumulated depreciation of assets for right to use leased assets for March 31, 2025 and December 31, 2024 are as follows:

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2025	(85,462)	(42,604)	—	(128,066)
Depreciation	(5,876)	(2,067)	—	(7,943)
Sales and/or disposals for the period	—	—	—	—
Exchange differences	217	(14)	—	203

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Reclassifications	(2)	—	—	(2)
Balances as of March 31, 2025	(91,123)	(44,685)	—	(135,808)

Note 17 - Right to use Asset and Obligations for Lease Contracts, continued

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2024	(98,345)	(35,429)	—	(133,774)
Depreciation	(22,997)	(8,095)	—	(31,092)
Sales and/or disposals for the year	36,368	924	—	37,292
Exchange differences	(488)	(4)	—	(492)
Reclassifications	—	—	—	—
Balances as of December 31, 2024	(85,462)	(42,604)	—	(128,066)

b) Lease contracts liabilities

(i) Lease contracts liabilities as of March 31, 2025 and December 31, 2024 are as follows:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Lease contract liabilities	121,171	124,545
Total	121,171	124,545

The Bank and its subsidiaries have contracts with certain renewal options and for which there is reasonable certainty that such option will be exercised. In such cases, the lease period used to measure the liabilities and assets corresponds to an estimate of future renewals.

(ii) The changes in lease contract liabilities and cash flows as of March 31, 2025 and December 31, 2024 are as follows:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Balances as of January 1st	124,545	83,807
Additions due to new contracts (1)	101	64,140
Disposals due to early termination	—	(14,537)
Interest expense	1,610	6,699
Remeasurements of the liabilities due to modifications (2)	55	51
Inflation rate adjustments	2,339	9,820

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Exchange rate adjustment	38	28
Exchange differences	(172)	570
Capital and interest payments	(7,345)	(26,033)
Balances as of ended period/year	121,171	124,545

- (1) Include contract renewals.
(2) Include remeasurement of liabilities due to contract amendments.

Note 18 – Taxes

a) Current taxes

The Bank and its subsidiaries, at the end of each reporting period, have established a provision for first category income tax, which was determined based on current tax legislation. The net provision for recoverable taxes has been reflected in assets for MCh\$46,391 as of March 31, 2025 (MCh\$18,175 as of December 31, 2024), as detailed below:

a.1) Current tax assets and liabilities by geographical area

	As of March 31, 2025			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax assets	117	782	88,590	89,489

Total	(61,142)	824	78,493	18,175

(1) Correspond to the Itaú Chile New York Branch.

(2) Income tax rate of 40%

b) Income tax results

The tax expense for the three months periods ended as of March 31, 2025 and 2024 consists of the following items:

	For the three months periods ended as of March 31,	
	2025	2024
	MCh\$	MCh\$
Income tax expense:		
Current tax expenses	(4,663)	(110,587)
Deferred taxes:		
Deferred taxes expenses	45,704	3,127
Subtotal	41,041	(107,460)
Other	(95)	—
Net expense for income taxes	40,946	(107,460)

c) Reconciliation of effective tax rate

The reconciliation between the current statutory nominal income tax rates and the effective rates applied to the determination of the tax expense as of March 31, 2025 and December 31, 2024 is as follows

Nominal rates by geographic area	2025	2024
	Rate	Rate
Chile	27.0%	27.0%
Colombia (1)	40.0%	40.0%
United States	21.0%	21.0%

(1) On December 13, 2022, Law 2.277 was issued, which modified the tax rate to 35% starting in 2023. The modification also included an additional income tax surcharge to certain institutions of 5% for a fix period ended on 2027, resulting in a transitory consolidated tax rate of 40%.

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Note 18 - Taxes, continued

The main tax effects, according to the nominal tax rates of the countries reported on a consolidated basis, are as follows:

	For the three months periods ended as of March 31,			
	2025		2024	
	Tax Rate	Amount	Tax Rate	Amount
	%	MCh\$	%	MCh\$
Amount calculated by using the statutory rates	27.00	18,850	27.00	55,805
Equity price level restatement for tax purposes (1)	(30.18)	(21,071)	(4.72)	(9,750)
Exchange differences due to investments in Colombia, U.S.A and Panamá (2)	(3.14)	(2,191)	(0.32)	(653)
Exchange rate effect on net investments and other capital income (3)	(52.22)	(36,454)	29.61	61,203
Taxes in U.S.A	(2.93)	(2,045)	1.14	2,360
Other Adjustments	2.81	1,965	(0.73)	(1,505)
Totals	(58.66)	(40,946)	51.98	107,460

(1) During the year ended December 31, 2024, the CPI factor used to restate the Tax-Basis Equity was 4.2% (compared to 4.8% in 2023).

(2) This line reflects the differences in tax rates of other jurisdictions, with respect to the tax rate of Chile. It should be noted that Itaú Chile indirectly consolidates the profits of Itaú Panamá, which is a subsidiary of Colombia.

(3) For tax purposes, the investments in Colombia and the U.S. are measured in U.S. dollars. The devaluation (appreciation) of the Chilean peso against the U.S. dollar can lead to taxable revenue (deductible expenses) for tax purposes without a corresponding effect on the accounting results. The figure presented here represents the income tax expense (income) due to the effect of the exchange rate on investments in Colombia and the United States. As part of its exchange rate risk management policy, the Bank has utilized market instruments to economically hedge against the tax effects generated by exchange rate fluctuations. The effect of these instruments, which offsets the tax effect discussed here, is recognized in the "Net exchange income (loss)" line of the Consolidated Income Statement for the year. Additionally, capital gains generated on sales of fixed-income instruments subject to the tax exemption under Article 104 of the Chilean Income Tax Law are not subject to income tax.

d) Effect of taxes recorded in equity

d.1) Tax effect of other comprehensive income that may be reclassified to income in subsequent periods:

	For the three months periods ended as of March 31,	
	2025	2024
	MCh\$	MCh\$
Effect of investments at FVTOCI	2,174	(2,433)
Effect of change in hedge accounting net investment	(6,106)	8,949
Effect of change in cash flow hedging	(692)	1,188
Total charge to other comprehensive income	(4,624)	7,704

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

d.2) Other comprehensive income that will not be reclassified to income in subsequent periods:

	For the three months periods ended as of March 31,	
	2025	2024
	MCh\$	MCh\$
Income taxes related to changes in fair value of equity instruments designated at fair value through other comprehensive income	(106)	(17)
Income taxes related to defined benefits obligations	18	428
Total charge to other comprehensive income	(88)	411

Note 18 - Taxes, continued

c) Provisions for employee benefit obligations

	Reference	As of March 31, 2025	As of December 31, 2024
		MCh\$	MCh\$
Provision of short-term employee benefits	(1)	34,194	57,996
Provision of benefits to post-employment employees		—	—
Provision of long-term employee benefits	(d.1)	9,356	9,095
Provision of benefits to employees for termination of employment contract	(d.4)	7,273	5,846

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Provision for payments to employees based on shares or equity instruments	(2)	8,702	7,443
Provision for obligations for defined contribution post-employment plans		—	—
Provision for obligations for post-employment defined benefit plans	(d.2)	28,639	28,565
Provision for other staff obligations	(d.3)	4,591	5,481
Total		92,755	114,426

(1) Includes the provision for the payment of performance bonuses, year-end bonuses and other compensation of a similar nature to employees.

(2) During 2021 and 2022, the Bank entered into an agreement consisting in the granting of an extraordinary long-term variable remuneration which will be paid in march 2025, 2026 and 2027, respectively, The remuneration is determined based on a defined nominal amount which will be adjusted by the variation of the share price in the value of the shares; this will be settled in cash when the agreement milestones are met.

d) The detail of the main aspects of long-term employee benefits is presented below:

d.1) Compensation for years of service (long-term)

Description: Annual payment in the month in which the employee completes years of service in Colombia (every 5 years, from 5 to 50 years of service).

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”) was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

Note 24 – Provisions for Contingencies, continued

The summary of the economic assumptions used as of March 31, 2025 and December 31, 2024 is as follows:

	As of March 31, 2025	As of December 31, 2024
	%	%
Assumptions		
Discount rate	8.50	8.50
Expected rate of salary increase	7.30	7.30
Inflation rate	5.10	5.10

The changes in the present value of the obligation for this type of benefit and the amounts recognized in the Interim Consolidated Income Statement are determined using the Projected Unit Credit Method and consist of the following:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Balances as of January 1st	8,966	9,018
Net cost of benefits	526	792
Payments	(306)	(800)
Exchange differences	32	85
Total	9,218	9,095

The detail of the cost of the net benefit is as follows:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Current benefit cost	526	1,105
Reduction - past service costs	—	(975)
Interest expense on the obligation	—	662
Balances as of ended period/ year	526	792

d.2) Pension plan

Description: Old Age or Survivors' Pension in accordance with the Social Security Law in Colombia and benefits acquired with the Entity.

Financing: The Projected Unit Credit Method is the method used to determine the present value of the benefit obligation and the cost associated with it. Under this method, the benefit obligation is the present value of the benefits earned for past service, with the plan's benefit calculated based on the projected salary as of the date on which the participant is assumed to receive the benefit. The plan does not have policies or associated assets, and therefore, no reimbursements. It is financing structured according to the financial conditions of the entity.

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

Note 24 – Provisions for Contingencies, continued

The detail of the cost of the net benefit is as follows:

	As of March 31, 2025 %	As of December 31, 2024 %
Assumptions		
Discount rate	8.50	8.50
Expected rate of pay increase	5.10	5.10
Inflation rate	5.10	5.10

The detail of the movements of the balances of the Pension Plan is as follows:

	As of March 31, 2025 MCh\$	As of December 31, 2024 MCh\$
Balances as of January 1st	28,565	30,245
Interest expense on the obligation	575	2,214
Payment	(602)	(3,164)
Actuarial losses (gains)	33	(632)
Exchange differences	68	(98)
Balances as of ended period/year	28,639	28,565

d.3) Retroactive severance plan

Description: Retroactive severance plan prior to Law 50 of 1990 in Colombia.

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”), in English, was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

The summary of the economic assumptions is as follows:

	As of March 31, 2025	As of December 31, 2024
	%	%
Assumptions		
Discount rate	7.25	7.25
Expected rate of pay increase	7.30	7.30
Inflation rate	5.10	5.10

Banco Itaú Chile and subsidiaries**Notes to the Interim Consolidated Financial Statements**

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

**Note 24 – Provisions for Contingencies, continued**

The movements for this benefit as of March 31, 2025 and December 31, 2024 are detailed below:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Balances as of January 1st	242	328
Current service cost	7	89
Interest expense on debentures	3	16
Actuarial losses (gains)	(1)	(34)
Payment of benefits	(68)	(155)
Exchange differences	2	(2)
Balances as of ended period/year	185	242

d.4) Retirement Bonus Plan

Description: Payment of a fixed amount at the time of retirement for retirement.

Financing: The method called “Projected unit credit” is the method used to determine the present value of the obligation for benefits and the cost associated with it. Under this method, the obligation for benefits is the present value of the current benefits for past services, but calculating the plan benefit based on the projected salary on the date on which the participant is supposed to receive the benefit.

The summary of the economic assumptions is as follows:

	As of March 31, 2025	As of December 31, 2024
	%	%
Assumptions		
Discount rate	8.50	8.50
Expected rate of pay increase	7.10	7.10
Inflation rate	5.10	5.10

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

The amounts recognized for this benefit were as follows:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Balances at January 1st	580	726
Current service cost	—	(169)
Interest expense on debentures	20	97
Actuarial losses (gains)	—	(55)
Payment of benefits	(11)	(15)
Exchange differences	2	(4)
Balances as of ended period/year	591	580

Note 24 – Provisions for Contingencies, continued

The effect recorded in the Interim Consolidated Statement of Other Comprehensive Income as of March 31, 2025 and December 31, 2024, is as follows:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Pension plan	33	(632)
Retroactive severance plan	(1)	(34)
Retirement Bonus Plan	—	(55)
Total recognition of defined benefit obligations	32	(721)

Future payments

Future actuarial calculations may differ from the calculations presented, due to the following factors:

- The experience of the plans differs from those anticipated by the selected economic and demographic assumptions.
- Changes in economic and demographic assumptions.
- Expected increases or decreases as a natural part of the functioning of the methodology for these calculations (for example, the end of the amortization period or additional costs based on the financing situation of the plan).

Banco Itaú Chile and subsidiaries

Notes to the Interim Consolidated Financial Statements

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

- Changes in the characteristics of the plan or applicable law, and with respect to it, there are no significant events affecting the results presented since the last valuation.

Below is the detail of future payments for 2025 and 2024:

2025	Severance indemnity (long term)	Plan of pensions	Retroactive Severance plan	Plan bonus for retirement

Note 29 – Contingencies and Commitments

a) Lawsuits and Legal Proceedings

Lawsuits in Chile against the Bank with provision

As of the date of issuance of these Consolidated Financial Statements, legal actions have been filed against the Bank and its subsidiaries involving its transactions in the ordinary course of business. They are mainly lawsuits pending against the Bank related to loans and other matters, most of which, according to the Bank's Legal Services Divisions involved in the suits, present no risk of significant loss.

The amount of the claims amounts to approximately MCh\$124,559 as of March 31, 2025 (MCh\$138,291 as of December 31, 2024). However, Management's opinion based on reports from the Legal Division as of December 31, 2024, attended the procedural state of said trials, it is not possible at this time to conclude whether these could result in significant losses not contemplated by the Bank in these Consolidated Financial Statements. Notwithstanding the above, as of March 31, 2025, provisions amounted to MCh\$2,617 (MCh\$2,246 as of December 31, 2024) are maintained.

Itaú Colombia S.A.

Itaú Colombia S.A. and its subsidiaries are involved in civil, administrative and labor proceedings. The outstanding civil and administrative proceedings, they are related to banking transactions, and the remaining ones derive from the ownership of leased assets.

Such claims amount to MCh\$315,542 as of March 31, 2025 (MCh\$313,885, as of December 31, 2024). According to the evaluation of the expected results in each lawsuits the Bank has recorded a provision of MCh\$2,429 as of March 31, 2025 (MCh\$2,501 as of December 31, 2024). The increase is mainly due to claims received by Itaú Fiduciaria in its capacity as an agent on certain businesses managed. Among the lawsuits received, eight are related to a real estate trust business in Bogota,

Banco Itaú Chile and subsidiaries**Notes to the Interim Consolidated Financial Statements**

As of March 31, 2025 and December 31, 2024 and for the three months periods ended as of March 31, 2025 and 2024

for a total amount of MCh\$175.753, as well as administrative proceeds with no monetary value. Itaú Fiduciaria believes it has acted in faithfully accordance with the terms established on the contracts, applicable regulations and will defend itself in all process. Based on the current status of the lawsuits, and considering that one case has resulted unfavorable on a first-instance ruling, a provision of MCh\$867 has been recognized. For the remaining lawsuits, the risk of loss is considered remote, and it is not possible to make a reasonable estimate of a potential loss.

Note 29 – Contingencies and Commitments, continued

Note 44 – Fair Value of Financial Assets and Liabilities

This disclosure was prepared based on the application of the local regulatory guidelines stated in Chapter 7-12 “Fair value of financial instruments” of the CMF and IFRS 13 “Fair value measurement”. These standards have been applied to both financial assets and non-financial assets measured at fair value (recurecurring and non-recurring).

The following section details the main guidelines and definitions used by the Group:

Fair value. The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The transaction is carried out in the principal or most advantageous market and is not forced, that is, it does not consider factors specific to the Group that may influence a real transaction.

Market participants. Buyers and sellers in the principal (or most advantageous) market for the asset or liability that have all of the following characteristics:

- a) They are independent of each other, i.e. they are not related parties as defined in IAS 24 “Related Party Disclosures”, although the price in a related party transaction may be used as an input to a fair value measurement if the entity has evidence that the transaction was entered into at market terms.
- b) They are knowledgeable, having a reasonable understanding about the asset or liability and the transaction using all available information, including information that might be obtained through due diligence efforts that are usual and customary.

- c) They are able to enter into a transaction for the asset or liability.
- d) They are willing to enter into a transaction for the asset or liability i.e. they are motivated, but not forced or otherwise compelled, to do so.

Fair value measurement. When measuring fair value, the Group takes into account the same characteristics of the asset or liability that market participants would consider in pricing that asset or liability on the measurement date.

Aspects of the transaction. A fair value measurement assumes that the asset or liability is exchanged in an orderly transaction between market participants to sell the asset or transfer the liability at the measurement date under current market conditions. The measurement assumes that the transaction to sell the asset or transfer the liability takes place: (a) on the principal market for the asset or liability; or (b) in the absence of a principal market, on the most advantageous market for the asset.

Market participants. The fair value measurement measures the fair value of the asset or liability using the assumptions that the market participants would use in pricing the asset or liability, assuming that the participants act in their best economic interest.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Prices. Fair value is the price that will be received for the sale of an asset or paid for the transfer of a liability in an orderly transaction on the main (or most advantageous) market as of the measurement date under current market conditions (i.e. Starting price) regardless of whether that price is directly observable or estimated using another valuation technique.

Highest and best use of non-financial assets. The fair value measurement of these assets takes into account the market participant's ability to generate economic benefits through the highest and best use of the asset or through the sale of the asset to another market participant that would maximize the value of the asset.

Bank's own liabilities and equity instruments. The fair value measurement assumes that these items are transferred to a market participant on the date of measurement. The transfer of these items assumes that:

- a) A liability would remain outstanding and the market participant transferee would be required to fulfill the obligation. The liability would not be settled with the counterparty or otherwise extinguished on the measurement date.
- b) An entity's own equity instrument would remain outstanding and the market participant transferee would take on the rights and responsibilities associated with the instrument. The instrument would not be canceled or otherwise extinguished on the measurement date.

Default risk. The fair value of a liability reflects the effect of the default risk. This risk includes, but is not limited to, the entity's own credit risk. This risk is assumed to be the same before and after the liability is transferred.

Initial recognition. When an asset is acquired or a liability assumed in an exchange transaction involving that asset or liability, the transaction price is the price paid to acquire the asset or received to assume the liability (the entry price). In contrast, the fair value of the asset or liability is the price received to sell the asset or paid to transfer the liability (the exit price). Entities do not necessarily sell assets at the prices paid to acquire them. Likewise, they do not necessarily transfer liabilities at the price received to assume them.

Valuation techniques. The Bank will use techniques that are appropriate for the circumstances and for which sufficient data is available to measure the fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. In this sense, the following approaches stand out, being the first two the most used by the group:

- a) **Market approach** Uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities, or a group of assets and liabilities.
- b) **Income approach.** Converts future amounts for example cash flows or income and expenses to a single current (discounted) amount, reflecting current market expectations about those future amounts. The fair value measurement is determined based on the value indicated by the current market expectations about those future amounts.
- c) **Cost approach** Reflects the amount that would be required currently to replace the service capacity of an asset (current replacement cost).

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Present value techniques. Technique to adjust the discount rate and expected cash flows (expected present value). The present value technique used to measure the fair value will depend on the specific facts and circumstances of the asset or liability being measured and the availability of sufficient data.

Components of the present value measurement. Present value is the tool used to link future amounts (e.g. cash flows or values) to a present amount using a discount rate. A fair value measurement of an asset or a liability using a present value technique captures all the following elements from the perspective of market participants at the measurement date:

- a) An estimate of future cash flows for the asset or liability being measured.
- b) Expectations about possible variations in the amount and timing of the cash flows representing the uncertainty inherent in the cash flows.
- c) The temporary value of money, represented by the rate on risk-free monetary assets that have expiration dates or duration that coincides with the period covered by the cash flows and do not raise uncertainty in the temporary distribution or risk of default for the holder (that is, risk-free interest rate).
- d) The price to bear the uncertainty inherent in the cash flows (i.e., a risk premium).
- e) Other factors that market participants would take into account in these circumstances.
- f) For a liability, the default risk related to that liability, including the entity's own credit risk (i.e. the debtor's).

Fair value hierarchy. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets and liabilities (Level 1 inputs) and lowest priority to unobservable inputs (Level 3 inputs). Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Determination of fair value

The following is a summary of the fair values of the main financial assets and liabilities as of March 31, 2025 and December 31, 2024, including those that are not presented at fair value in the Interim Consolidated Statement of Financial Position.

	As of March 31, 2025		
	Carrying amount value MCh\$	Estimated fair value	
		Recurrent (a) MCh\$	Non recurrent (b) MCh\$
ASSETS			
Cash and deposits in banks	2,654,068	—	2,654,068
Cash items in process of collection	639,037	—	639,037
Financial assets for trading at fair value through profit or loss	4,043,206	4,043,206	—
Financial derivative contracts	3,434,852	3,434,852	—
Financial debt instruments	558,910	558,910	—
Other	49,444	49,444	—
Financial assets not held for trading valued mandatorily at fair value through profit or loss	8,555	8,555	—
Financial assets designated at fair value through profit or loss	—	—	—
Financial assets at fair value through other comprehensive income	3,636,495	3,636,495	—

(a) Correspond to assets and liabilities that are measured and recognized at fair value in the financial statements.

(b) Correspond to assets and liabilities that are measured and recognized on a basis other than fair value in the financial statements. The fair values presented here are for disclosure purposes only and have no impact on the balances in the financial statements.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

In addition, the fair value estimates presented above do not attempt to estimate the value of the Group's profits generated by its business, nor future business activities, and, therefore, do not represent the value of the Group as a going concern.

The following section describes the methods used to estimate fair value:

a) Measurement of the fair value of assets and liabilities for disclosure purposes (Non-recurring)

Cash, short-term assets and short-term liabilities

The fair value of these items approximates their book value given their short-term nature. These items include:

- Cash and deposits in Banks
- Cash in the process of collection
- Rights for repurchase agreements and securities loans and obligations for repurchase agreements and securities loans
- Demand deposits and other demand obligations
- Other financial obligations

Loans

The fair value of loans is determined using a discounted cash flow analysis. In the case of mortgage loans and consumer loans, the cash flows were discounted by using the effective average placement rate of the last month of the reporting period for each type of product. The fair value of commercial loans is determined using a discounted cash flow analysis, using a risk-free interest rate adjusted for expected losses from debtors based on their credit quality. The credit risk adjustment is based on variables observable in the market and the Group's policies for qualitative and quantitative credit risk methodologies.

This methodology was applied to:

- Interbank loans
- Loans and accounts receivable from customers

Financial instruments at amortized cost

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Medium and long-term liabilities

The fair value of medium and long-term liabilities is determined using a discounted cash flow analysis, using an interest rate curve that reflects current market conditions at which the entity's debt instruments are traded. Medium and long-term liabilities include:

- Term deposits and other term loans
- Interbank borrowings
- Debt instruments issued
- Instruments of regulatory capital

b) Value Measurement of financial assets and liabilities for recording purposes (recurring)

Financial instruments

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers. These financial instruments are classified as follows:

- Financial instruments held for trading at fair value through profit or loss
- Financial instruments at fair value with changes in other comprehensive income

Financial derivative contracts

The estimated fair value of derivative instruments is calculated using prices quoted in the market for financial instruments with similar characteristics. The methodology recognizes the credit risk of each counterparty. The adjustment is known internationally as counterparty risk adjustment, which is composed of CVA (Credit Value Adjustment) and DVA (Debit Value Adjustment), the sum of both risk adjustments the effective counterparty risk that must be recognized. This adjustment is periodically recorded in the Consolidated Financial Statements.

Banco Itaú Chile and subsidiaries

c) Fair value hierarchy

IFRS 13 establishes a fair value hierarchy that classifies assets and liabilities based on the characteristics of the data that the technique requires for its valuation:

- Level 1

Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Entity can access at the measurement date. The inputs needed to value the instruments in this category are available daily and used directly.

In the case of Currency, Shares and Mutual funds, prices are observed directly in over-the-counter markets and the Stock Exchange. These prices correspond to the values at which the exact same assets are traded. As a result, the portfolio valuation does not require assumptions or models of any type.

For instruments issued by the Chilean Central Bank and the Chilean Treasury, benchmark prices are used. Benchmark prices are defined using similar durations, type of currency and are traded the equivalent of every day. The valuation of these instruments is identical to the valuation of the Santiago Stock Exchange, which is a standard international methodology. This methodology uses the internal rate of return to discount the instrument's cash flows.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

- Level 2

The specific instrument does not have daily quotes. However, similar instruments can be observed (e.g. same issuer, different maturity; or different issuer, same maturity and risk rating). In general, they are diverse combinations of pseudo-arbitration. Although the inputs are not directly observable, observable inputs are available with the needed periodicity.

In this category, instruments are valued by discounting contractual cash flows based on a zero-coupon curve determined through the price of instruments with similar characteristics and a similar issuer risk. The income approach is used, which converts future amounts to present amounts.

For derivative instruments within this category, quotes from other-the-counter transactions reported by the most important brokers in the Chilean market and the Bloomberg platform are used. The inputs observed include forward prices, interest rates and volatilities. Based on these inputs, market curves are modeled. They are a numerical representation of the opportunity costs of the instrument's cash flows or the price volatility of an asset. Finally, cash flows are discounted.

The Black and Scholes model is used for options based on prices of brokers in the OTC market. For money market instruments, prices of transactions on the Santiago Stock Exchange are observed and used to model market curves.

For corporate or bank bonds, given the lack of market depth, the Bank uses transactions (if any) in the Chilean market, on foreign markets, zero-coupon curves of risk-free instruments, adjustment curves, spread modeling, correlation with similar financial instruments, etc. and gives market curves as the final result. These market curves are provided by a pricing supplier and are widely accepted by the market and its regulators.

- Level 3

This is used when prices, data or necessary inputs are not directly or indirectly observable for similar instruments for the asset or liability as of the valuation date. These fair value valuation models are subjective in nature. Therefore, they base their estimate of prices on a series of assumptions that are widely accepted by the market.

Due to the lack of liquidity in the basis of the active banking rate (TAB) over the chamber rate (camera), the price is not observable and, therefore, models must be used to estimate the future cash flows of the contract. This spread is calculated on a historical basis using the IRS with the greatest market depth, which is the chamber swap.

In addition, the Bank offers American forwards to meet its customers' needs. They do not have a secondary market and, therefore, their value is estimated using an extension of the Hull-White model, used widely by the financial services industry.

With respect to financial assets, a negotiation is not required, mandatorily valued at fair value with changes in results, the valuation is made based on the determination of a rate that allows obtaining the fair value based on market references:

Note 44 – Fair Value of Financial Assets and Liabilities, continued

- Determining an average rate from “Comparable Instruments” according to the rating of the issuer and term of the instrument.
- Decomposing the rate into a risk-free base observable in the market and a spread that represents the credit risk of the issuer.

The periodic valuation of the instrument is carried out based on the value of the risk-free rate of each day plus the determined credit spread.

The table below summarizes the impacts on the portfolio of a recalibration of the models based on a stress scenario, recalibrating parameters with the shock incorporated.

TAB 360	—	—	—
Total	—	28	4

Note 44 – Fair Value of Financial Assets and Liabilities, continued

The following table summarizes the fair value hierarchy for the Group's recurring valuation of financial instruments:

Level	Instrument	Issuer	Price Source	Model
1	Currency	N/A	OTC, Bloomberg	Directly observable price.
	Shares	Others	Santiago Exchange	Directly observable price.
	Mutual funds	Asset Managers	Risk America	Directly observable price.
	Bonds	Chilean Central Bank	Santiago Stock Exchange	Internal rate of return (IRR) based on prices.
2	Derivatives	N/A	OTC (Brokers), Bloomberg	Interest rate curves based on forward prices and coupon rates.
	IIF	Chilean Central Bank and Chilean Treasury	Santiago Stock Exchange	Interest rate curves based on prices.
	IIF	Banks	Santiago Stock Exchange	Interest rate curves based on prices.
	Bonds	Companies, banks	Pricing supplier	Interest rate curves based on correlations, spreads, extrapolations, etc.
3	Derivatives TAB	N/A	OTC (Brokers)	Interest rate curves based on modeling of TAB-Chamber spread.
	Derivatives, American forwards	N/A	Blomberg	Black and Scholes with inputs from European options.
	Bonds	Companies, banks	Blomberg	Interest rate curves based on modeling of SOFR and spreads

Note 44 – Fair Value of Financial Assets and Liabilities, continued

The following table classifies assets and liabilities measured at fair value on a recurring basis, in accordance with the fair value hierarchy established in IFRS 13, for the as of March 31, 2025 and December 31, 2024.

Measurement at fair value of instruments on on a recurring basis using	As of March 31, 2025

e) Disclosures Regarding Level 3 Assets and Liabilities

Level 3 assets and liabilities are valued using techniques that require inputs that are not observable on the market, for which the income approach is used to convert future amounts to present amounts.

This category includes:

- Financial derivative instruments indexed to the TAB rate, this rate is comprised of an interbank rate and a liquidity premium charged to financial institutions and is determined using a short-rate model with mean reversion.
- American forward options.
- Financial assets whose contractual cash flows have not met the conditions of the SPPI test.
- Corporate bond whose data are not observable in the market.

As none of these products has a market, the Bank uses financial engineering valuation techniques that use unobservable variables.

These techniques use as transaction prices from the main financial instrument markets and assumptions that are widely accepted by the financial services industry. Using this information, unobservable variables are constructed such as: adjustment curves, spreads, volatilities and other variables necessary for the valuation. Lastly, all of the models are subject to internal contrasts by independent areas and have been reviewed by internal auditors and regulators.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

None of these products generate significant impacts on the Bank's results as a result of recalibration. The American forward is only offered for the US dollar-Chilean peso market and until now, given the important differential between these interest rates, the product behaves like a traditional forward. The TAB swap does not have significant impacts on the valuation as the modeled liquidity premiums have a quick mean reversion for the short part and low volatility for the long part, concentrating on the book's sensitivity in the longest part of the curve.

The following table presents a reconciliation of assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2025 and December 31, 2024.

Reconciliation level 3	As of March 31, 2025

Note 47 – Risk Management

The Bank and its subsidiaries, through their activity, are exposed to several types of risk mainly related to loans portfolio and financial instruments. Risk management policies are established in order to identify and analyze the risks faced by the Bank, establish adequate limits and controls, monitor risks and comply with limits. Risk management policies and risk management structures are periodically reviewed to reflect changes in the institution's activities. The Bank, through its rules and procedures, intends to develop an adequate control environment, in which all employees understand their functions and responsibilities.

The main activities and policies of the Bank in terms of risk management are described below.

(A) Risk Management Structure

(i) Board of Directors

In the Bank and its Subsidiaries, the Board of Directors plays a prominent role in corporate governance. It is responsible for establishing and monitoring the Bank's risk management structure, for which it has a corporate governance system aligned with international best practices and Chilean regulations, mainly from the CMF. One of its main functions is to ensure the existence of measures that allow senior management to be supervised, evaluated and guided so that their actions are in line with best practices and defined levels of risk appetite. To this end, a governance structure has been created made up of various committees and internal standards. These committees and standards establish behavioral guidelines for the Bank's employees and help them perform their functions related to risk control and management.

(ii) Audit Committee

The Audit Committee is responsible for monitoring the control environment and the effectiveness and efficiency of the company's internal control systems as well as the compliance with regulations and internal standards, including oversight of the internal audit unit. The Audit Committee is also responsible for proposing to the Directors' Committee a list of external auditors and risk rating agencies for the Bank and subsidiaries. In addition, the Audit Committee shall be responsible for supervising the different aspects that have to do with the maintenance, application and operation of the Bank's internal controls, and shall be responsible also for closely monitoring compliance with the standards and procedures that govern its practice. It must also have a clear understanding of the risks that the Bank's business may pose to the institution and their mitigation.

To establish a link with the Audit Committee, the Board of Directors will appoint at least two of its members to this Committee. These members must inform the Board of Directors of the situations and facts the Committee is dealing with, thus committing the responsibility of the Bank's directors, both in self-control policies that are established and practiced by the institution, as well as in the compliance with the legal and regulatory standards to which the Bank is subject.

Note 47 – Risk Management, continued

The Audit Committee must reinforce and support both the role of the Bank's Internal Audit (also called Internal Comptroller in the CMF regulations) and its independence from management, and act as a liaison and coordinator of the tasks between the internal audit and the external auditors, acting as a liaison between the latter and the Bank's Board of Directors.

(iii) Director's Committee

The purpose of the Director's Committee is to make the self-regulation of the Bank and other entities within the scope of its competence stronger, thus making the performance of the Board of Directors more efficient by incorporating greater oversight over the activities carried out by management.

It will also be responsible for adopting the necessary resolutions to protect shareholders, especially minority shareholders, examining executive compensation systems and approving related party transactions.

In its role as overseer of corporate activity, the Directors' Committee must inform the market in the event of violations or major corporate events, as well as transactions that the company carries out with parties related to the controlling shareholder or takeovers in any form.

(iv) Integral Risk Management Committee

The objective of this Committee is to propose, and support the Board of Directors in, the definition of the risk appetite and the general policy framework that allows an adequate alignment with the Bank's global strategy. Oversee the correct identification, measurement and control of all risks, allocate capital to identified risks and meet regulatory requirements.

(v) Financial Management and Market Higher Commission (ALCO)

After the Board of Directors and its specialized committees, the Financial Management and Market Higher Commission (hereinafter, also "ALCO") is the highest body involved in the management of the institution's financial policies.

The main objective of the Commission is to follow the financial guidelines established by the Board of Directors. In this regard, it must approve and supervise the financial strategies that guide the Bank in terms of the composition of its assets and liabilities, cash inflows and outflows, and transactions with financial instruments.

It must ponder the various alternatives available to make decisions that ensure the highest and most sustainable profitability with financial risk levels compatible with the business, current regulations and internal standards.

(vi) Anti-Money Laundering Committee Superior (AML)

The main purpose of this Committee is to plan and coordinate the activities of compliance with the policies and procedures for anti-money laundering and prevention of funding of terrorism, to pay attention to the work carried out by the Compliance Officer, in accordance with the applicable regulations in force, as well as to adopt agreements aimed at obtaining improvements to the prevention and control measures proposed by the Compliance Officer.

Note 47 – Risk Management, continued

(vii) Operational Risk Higher Commission

The purpose of this Commission is to identify, understand and evaluate the risks involved in the Bank's processes and businesses and to define operational risk management guidelines for the Bank and evaluate the results of the audit and

compliance systems. It is also responsible for defining the operational risk management framework and the structure and policies for the identification, measurement, evaluation and monitoring of risk and business continuity. In addition, it reviews the follow-up and adequacy of regulatory commitments and emerging regulations.

Evaluate the status of critical processes that are directly related to the Bank's operational risk, according to the current regulations of the Financial Market Commission, in order to detect and correct the deficiencies that may be affecting the Bank and ensure proper implementation of regulatory changes.

The goal is to ensure that critical processes run under a control environment that allows the Bank to operate with stability and consistency, achieving the objectives consisting in confidentiality, integrity and availability of information resources.

(viii) Ethics and Compliance Higher Commission

The main purpose of this Commission is to define, promote and ensure high standards of professional and personal excellence in the behavior of all Banco Itaú Chile employees, its local subsidiaries, and the representation office in Peru (the "Representation Office"). This Commission must always be guided by corporate principles and values that reflect Banco Itaú Chile's vision, philosophy and good business practices.

The Commission must evaluate, and make decisions on, issues of conduct and ethics in business and operations. Monitor and examine compliance with policies and procedures related to the ethical conduct of the Bank's employees and suppliers.

Also, ensure the application of the Regulatory Compliance Model within the framework of the definitions established by this Commission; pay attention to the work performed by the Compliance Officer and the AML in these matters; and make agreements to obtain improvements to the control measures proposed by the Compliance Officer.

The Commission must promote, and may request, information from the international units, through the Compliance & AML Sub-Management, on the matters discussed herein, in order to align the ethical and regulatory standards across the Banco Itaú Chile Group entities.

Note 47 – Risk Management, continued

(ix) Capital Management Higher Commission

The Senior Capital Management Higher Commission was created to assist the Board of Directors and the Bank's management in the evaluation and management of market and liquidity risks, earnings, and capital adequacy, in accordance with the economic principles and standards established in local regulations, and in Basel I, II and III as applicable, in order to provide oversight and management of market and liquidity risks, accounting management and capital principles, to review the effectiveness of risk and capital policies and limits, and to review compliance with risk, liquidity and capital policies and procedures in the company.

(x) Credit Higher Commission

The purpose of this Commission is to resolve the transactions and matters submitted to its knowledge, under the defined limits and procedures, ensuring the application of and compliance with the current credit risk policies defined by Banco Itaú Chile (the "Bank").

(xi) Wholesale Credit Higher Commission

The objective of the Wholesale Credit Commission is to monitor the evolution of the Bank's wholesale portfolios in terms of their risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. Analyze the behavior of the wholesale portfolio, delinquency, cost of credit, industry or economic groups concentrations and watchlist. Evaluate debt collection management and strategy, collateral structure and market benchmarks. Discuss and propose credit and credit appetite policies for the wholesale segment. Identify emerging portfolio risks and prioritize mitigation initiatives.

(xii) Retail Credit Higher Commission

The objective of the Higher Retail Credit Commission is to monitor the evolution of the Bank's retail portfolio in terms of its risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. In this regard, the Commission must consider in its analysis the competition, the movements of the most relevant players and the main risks that may affect portfolio management, as well as the projects that have an impact on this matter.

(xiii) Model Evaluation Technical Commission

The purpose of this Commission is to analyze and propose the credit risk, financial risk and operational risk management models according to the different levels determined by the Models Policy.

Note 47 – Risk Management, continued

(xiv) Internal Audit Corporate Management

The main function of Internal Audit is to assist the Board of Directors and Senior Management by independently evaluating the maintenance, implementation and proper operation of the Bank's internal control system, which also involves the oversight of compliance with standards and procedures.

(xv) Code of Conduct and Market Information Manual

Our clients' trust is critical to our success. Therefore, all employees and directors must strive to preserve this trust by strictly complying with the General Code of Conduct.

(B) Main Risks and Requirements Affecting the Bank and its Subsidiaries:

(i) Credit Risk

Credit risk is the risk that a client or a counterparty fails to meet its contractual obligations, resulting in a financial loss for the Bank. The Bank's main income-generating activity is lending to customers, so credit risk is one of the main risks to be managed. Credit risk arises primarily from loans and advances to customers and other banks (including related loan commitments such as loan or credit card facilities), investments in debt securities and derivatives that constitute an asset position. The Bank takes into account all the elements of exposure to credit risk, such as counterparty default risk, geographic risk and sectoral risk, for the purposes of its management.

Credit Risk Management

The Bank's credit commissions are responsible for managing the Bank's credit risk through:

- Ensure that the Bank has appropriate credit risk practices, including an effective internal control system, to systematically determine adequate provisions in accordance with the policies and procedures established by the Bank, IFRS and supervisory guidance relevant.
- Identify, assess and measure credit risk across the Bank, from an individual instrument to a portfolio level.
- Create credit policies to protect the Bank against identified risks, including the requirement to obtain guarantees from borrowers, perform a solid ongoing credit assessment of borrowers and continuously monitor exposures against internal risk limits.
- Limit concentrations of exposure by type of asset, counterparties, sector, credit rating, geographic location, etc.
- Establish a solid control framework in relation to the authorization structure for the approval and renewal of lines of credit.
- Develop and maintain the Bank's risk classification to categorize exposures according to the degree of default risk. The degrees of risk are subject to periodic review.
- Develop and maintain the Bank's processes to measure the Expected Credit Loss "ECL", including credit risk monitoring, the incorporation of prospective information and the method used to measure ECL.
- Ensure that the Bank has policies and procedures to properly maintain and validate the models used to assess and measure ECL.

Note 47 – Risk Management, continued

- Provide advice, guidance and expertise to business units to promote best practices across the Bank in credit risk management.

Credit Quality

The following table offers an analysis of the gross amount in arrears in books of loans and advances to customers by maturity:

	Balances as of March 31, 2025			
	Less than 30 days past due	Between 30 and 89 days due	More than 90 due	Total overdue
	MCh\$	MCh\$	MCh\$	MCh\$
Interbank loans	—	—	—	—
Loans and accounts receivable from customers				
Commercial loans	361,657	134,676	403,677	900,010
Mortgage loans	207,228	127,415	131,831	466,474
Consumer loans	158,399	98,986	85,998	343,383

Note 47 – Risk Management, continued

Maximum Exposure to Credit Risk

For financial assets recognized in the Interim Consolidated Statements of Financial Position, exposure to credit risk is equal to their book value. For the financial guarantees granted, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the guarantee were called.

The following table shows the maximum exposure to the Bank's credit risk per financial asset as of March 31, 2025 and December 31, 2024, for different balance items, including derivatives, without deducting real guarantees or other credit enhancements received:

Maximum credit risk exposure	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Financial assets to be traded at fair value through profit or loss		
Financial derivative contracts	3,434,852	3,980,222
Financial debt instruments	558,910	713,984
Other	49,444	64,175
Financial assets not held for trading valued mandatorily at fair value through profit or loss	8,555	8,650
Financial assets designated at fair value through profit or loss	—	—
Financial assets at fair value through other comprehensive income	3,636,495	3,077,290
Derivative financial instruments held for hedge accounting	71,779	79,887
Investments under resale agreements	273,757	212,225
Financial debt instruments	1,012,770	1,176,360
Interbank loans	4,501	—
Loans and accounts receivable from customers - Commercial	16,047,663	16,716,618
Loans and accounts receivable from customers - Mortgage	8,075,805	7,933,264
Loans and accounts receivable from customers - Consumer	3,219,939	3,240,358
Off-Balance Sheet Assets		
Contingent loans		
Guarantees and bonds	1,024,490	1,005,704
Letters of credit for merchandise circulation operations	184,932	146,163
Transactions related to contingent events	2,351,801	2,371,792
Available lines of credit	—	—
Other loan commitments	235,886	348,519
Lines of credit of free disposal of immediate cancellation	5,751,717	5,818,330
Debt purchase commitments in local currency abroad	4,217	7,337
Other contingent loans	—	—
Total	45,947,513	46,900,878

The following is a summary of the provisions for loan losses:

	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Loans and accounts receivable at amortized cost	(793,751)	(834,843)
Interbank loans	(260)	—
Provisions for contingent loan risks	(47,435)	(40,257)
Total provisions	(841,446)	(875,100)

Note 47 – Risk Management, continued

The following table shows the concentration of credit risk by sector for financial assets:

**Note 47 – Risk Management, continued****Guarantees and Other Credit Enhancements**

In order to mitigate credit risk, guarantees have been established in favor of the Bank, credit enhancements and other actions that mitigate total exposure.

The main types of guarantees provided by customers are as follows:

For loans to companies	For loans to individuals
- Agricultural land - Machinery and/or equipment - Ships and maritime aircraft - Buildings for specific purposes under construction - Mining infrastructure - Inventory - Agricultural assets - Industrial assets - Biological assets - Other guarantees	- Mortgage - Parcels or urban land - Vehicles

The guarantees taken by the Bank to ensure the collection of the rights reflected in its loan portfolios are mortgage-type guarantees (urban and rural properties, agricultural land, ships and aircraft, mining claims and other assets) and pledges (inventory, agricultural assets, industrial assets, plantations and other pledged assets).

The procedures used for the valuation of the guarantees are carried out in accordance with the best market practices, which include the use of appraisals in real estate guarantees, market price in stock securities, value of shares in an investment fund, etc. All collateral received must be properly legalized and registered in the corresponding registry.

On the other hand, financial derivative operations are guaranteed by guarantee agreements, which are deposited or transferred by a third party in favor of the other, these can be in cash or in financial instruments, and reduce the counter party's credit risk.

Credit limits of debtors related to the property or bank management

The Bank manages credit limits, in accordance with Article 84 of the General Banking Law ("LGB"), which establishes prudential limits for credit exposures to a single individual or related group. This management seeks to prevent excessive concentrations of risk that could compromise the stability of the Bank.

The General Banking Law stipulates that no financial institution may grant direct or indirect credit to a single natural or legal person for an amount exceeding 10% of its effective equity. This limit may be increased to 15% if the excess relates to loans destined for the financing of public works awarded through a concession system, provided that such loans are collateralized by the special pledge associated with public works concessions, or where two or more banks have entered into a joint credit agreement with the concessionaire. Additionally, the limit may be increased up to 30% of effective equity if the excess over 10% is fully secured by real guarantees, including corporate movable assets or real estate, or financial instruments that meet specific standards established by regulation. Based on this, the Bank has implemented appropriate controls and procedures to measure, monitor, and mitigate the risk of concentration in its portfolio.

Note 47 – Risk Management, continued

In line with the above, the Bank also manages credit limits for debtors related to the ownership or management of the Bank, according to Article 84 N°2 of the General Banking Law ("LGB") and Chapter 12-4 of the Compendium of Accounting Standards ("RAN")."

-

- The set of credits granted to a group of related persons may not exceed 5% of the effective equity of the bank, this limit increases to 25% if what exceeds 5% corresponds to credits secured by guarantees. In no case may the total of these credits granted by a bank exceed the amount of its effective equity.
- These loans shall not be granted under more favorable terms in connection with term, interest rates or guarantees than those granted to third parties in similar transactions.
- The relationship of a person with the Bank occurs when they have direct, indirect or through third party participation in the property of the Bank, participate in the management or it is presumed that there is relationship as long as sufficient background information is not presented to eliminate that presumption. It will be understood that the same group of people related to the Bank is made up of all those natural and legal persons that can exert significant and permanent influence on the decisions of the other, there is a presumption that the credits granted to one person will be used for the benefit of another or the founded presumption that people maintain a relationship and form a unit of economic interest.
- Subsidiaries, business support companies and associates constitute companies related to a bank.
- Guarantees on movable or immovable property, or any other property legitimately susceptible of being received as collateral, constitute valid guarantees.

As of March 31, 2025 and December 31, 2024, the credit limit to debtors related to the ownership or management of the Bank according to article 84 No. 2 of the GBL and Chapter 12-4 of the RAN are the following:

	As of March 31, 2025		As of December 31, 2024	
	MCh\$	%	MCh\$	%
Global limit to groups of related people(1)	4,887,891		4,654,801	
Use of the global limit for loans granted to groups of people related to the bank	124,769	2.55	139,483	3.00

(1) Corresponds to effective equity

ii) Financial Risk

• Market Risk

Market Risk is the exposure to economic gains or losses caused by movements in prices and market variables. This risk stems from the activities of the Trading and Banking Books. In the first case, it comes from activities intended to obtain short-term gains and from the intensive use of fair value instruments. In the second case, with a more long-term vision, it stems from commercial activities with products valued at amortized cost.

The following section describes the main market risk factors to which the Bank and its subsidiaries are exposed:

Note 47 – Risk Management, continued

- **Currency Risk**

Currency risk is the exposure to adverse movements in the exchange rates of currencies other than their base currency (CLP in the case of operations in Chile and COP in the case of operations in Colombia) for all those positions inside and outside of balance. The main sources of exchange risk are:

- Positions in foreign currency (MX) within the attributions of the Trading Book.
- Currency mismatches between the assets and liabilities of the Banking Book.
- Currency flow mismatches.

- **Inflation and Other Indexes Adjustments Risk**

The risk of readjustment is the exposure due to changes in the units or indexes of readjustment (such as UF, UVR or others) defined in national or foreign currency, in which some of the instruments, contracts or other operations registered in the balance with such characteristics.

- **Interest Rate Risk**

Interest Rate Risk is the exposure to movements in market interest rates. Changes in market interest rates can affect both the price of instruments recorded at fair value and the financial margin and other gains from the Banking Book such as fees. Fluctuations in interest rates also affect the Bank's economic value.

Interest rate risk can be represented by sensitivities to parallel and/or non-parallel yield shifts with the effects reflected in the prices of instruments, the financial margin, equity and economic value.

The measurement of the structural interest rate risk is carried out through the representation by risk factor of the cash flows expressed in fair value, assigned on the dates of re-pricing and by currency. This methodology facilitates the detection of interest risk concentrations in the different terms.

All the balance sheet and off balance sheet items are unbundled in their flows and placed at the re-pricing/maturity. In the case of those accounts that do not have a contractual maturity, an internal model of analysis and estimation of their durations and sensitivities is used.

- **Volatility Risk**

In addition to the exposure related to the underlying asset, issuing options has other risks. These risks arise from the non-linear relationship between the gain generated by the option and the price and level of the underlying factors, as well as exposure to changes in the price volatility of the underlying asset.

Note 47 – Risk Management, continued

- **Liquidity Risk**

Liquidity Risk is the exposure of the Bank's and its subsidiaries to events that affect their ability to meet, in a timely manner and at reasonable costs, cash payment obligations arising from maturities of time deposits that are not renewed, withdrawals from demand accounts, maturities or settlements of derivatives, liquidations of investments or any other payment obligation.

Financial institutions are exposed to funding liquidity risk that is intrinsic to the role of intermediary that they play in the economy. In general, in financial markets demand for medium or long-term financing is usually much greater than the supply of funds for those terms while short-term financing is in considerable supply. In this sense, the role of intermediary played by financial institutions, which assume the risk of satisfying the demand for medium and long-term financing by brokering short-term available funds, is essential for the economy to function properly.

Appropriately managing funding liquidity risk not only allows contractual obligations to be met in a timely manner, but also enables:

- The liquidation of positions, when it so decides, to occur without significant losses.
- The commercial and treasury activities of the Bank and its subsidiaries to be financed at competitive rates.
- The Bank to avoid fines or regulatory penalties for not complying with regulations.

Regulatory measurement of adjusted liquidity mismatch

The mismatch in the net foreign currency position at the 7, 15 and 30-day terms as of March 31, 2025 and December 31, 2024 is as follows:

Net position	As of March 31, 2025		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	1,777,233	1,971,474	2,226,953
Expenses	(1,111,479)	(1,455,594)	(2,161,233)
Income (expenses), net	665,754	515,880	65,720

Net position	As of December 31, 2024		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	2,278,654	2,435,808	2,787,481
Expenses	(1,145,208)	(1,631,549)	(2,584,883)
Income (expenses), net	1,133,446	804,259	202,598

Note 47 – Risk Management, continued

The contractual maturities (Capital plus interest) as of March 31, 2025 and December 31, 2024, are as follows:

	As of March 31, 2025							
	On demand	Up to 1 months	Between 1 and 3 months	More than 3 months up to 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Financial liabilities	7,065,652	6,983,861	4,056,970	6,706,701	2,998,577	2,395,730	4,275,853	34,483,345
Financial liabilities to be traded at fair value through profit or loss	—	609,858	899,581	1,571,012	90,487	60,312	33,661	3,264,911
Financial liabilities designated at fair value through profit or loss	—	—	—	—	—	—	—	—
Financial derivative contracts and accounting hedges	—	9,331	22,694	51,899	14,827	769	793	100,313
Financial liabilities at amortized cost	7,065,652	6,360,343	3,129,949	5,067,968	2,840,247	2,315,582	3,082,556	29,862,298
Lease contracts liabilities	—	1,641	4,746	13,811	44,970	11,021	28,182	104,371
Financial instruments of regulatory capital issued	—	2,688	—	2,011	8,046	8,046	1,130,661	1,151,452

	As of December 31, 2024							
	On demand	Up to 1 months	Between 1 and 3 months	More than 3 months up to 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Financial liabilities	6,699,279	7,646,710	4,944,498	6,958,801	3,049,173	2,124,075	4,445,354	35,867,890
Financial liabilities to be traded at fair value through profit or loss	—	640,840	1,237,511	1,828,717	120,116	53,950	38,489	3,919,623
Financial liabilities designated at fair value through profit or loss	—	—	—	—	—	—	—	—
Financial derivative contracts and accounting hedges	—	12,030	32,350	47,184	15,161	1,777	1,178	109,680
Financial liabilities at amortized cost	6,699,279	6,978,292	3,662,406	5,066,138	2,858,766	2,048,704	3,261,734	30,575,319
Lease contracts liabilities	—	1,638	4,868	14,774	47,179	11,693	26,606	106,758
Financial instruments of regulatory capital issued	—	13,910	7,363	1,988	7,951	7,951	1,117,347	1,156,510

The volume of liquid assets as of March 31, 2025 and December 31, 2024, are as follows:

Liquid assets (consolidated balance)	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Level 1	3,541,392	3,557,638
Level 2	—	—
Other	5,373,982	5,595,996
Total	8,915,374	9,153,634

Liquid assets are in compliance with the regulatory definition established in Section 9.1 of Chapter III.B.2.1 of the Compendium of Financial Regulations issued by the Central Bank of Chile. Level 1 liquid assets comprise cash on hand, debt securities issued by the General Treasury of the Republic or the Central Bank of Chile, and financial instruments issued by foreign sovereigns or central banks that are rated in the highest credit risk category.

Note 47 – Risk Management, continued

Level 2 liquid assets include mortgage bonds and credit notes without special guarantees, as well as financial instruments denominated in the currency of their country of origin, issued or guaranteed by foreign sovereigns, multilateral development banks, or central banks of countries rated between categories A- and AA+.

The composition of the main sources of financing of liquid assets as of March 31, 2025 and December 31, 2024, is as follows:

Main sources of individual financing Consolidated	As of March 31, 2025	As of December 31, 2024
		%
Deposits and other obligations on demand	13.82	13.38
Transactions with Settlement in Progress	1.94	1.06
Repurchase Agreements and Securities Loans	1.13	0.43
Deposits and Other Term Collections	35.40	37.55
Term Savings Accounts	—	—
Obligations with Banks	3.69	4.61
Debt Instruments Issued	26.60	24.74
Other financial liabilities	17.42	18.23
Total	100.00	100.00

Main sources of consolidated financing Individual	As of March 31, 2025	As of December 31, 2024
	%	%
Deposits and other obligations on demand	12.74	12.27
Transactions with Settlement in Progress	2.06	1.15
Repurchase Agreements and Securities Loans	1.22	0.47
Deposits and Other Term Collections	36.32	38.28
Term Savings Accounts	—	—
Obligations with Banks	3.39	4.55
Debt Instruments Issued	28.72	26.65
Other financial liabilities	15.55	16.65
Total	100.00	100.00

Note 47 – Risk Management, continued

The Liquidity Coverage Ratio (LCR) and Net Stable Financing Ratio (NSFR) as of March 31, 2025 and December 31, 2024, is as follows:

Liquidity Coverage Ratio	As of March 31,	As of December 31,
	2025	2024
	%	%
NSFR	110,73	107.64
LCR	217,96	221.82

Financial Risk Management

Continuous and interconnected process that originates in the first instance with the identification of the risks to which the Institution is exposed, in order to then quantify the potential impact as a result of said exposure and to limit it to the level desired by the Bank. The above implies an active monitoring of the risks, studying their temporal evolution. The risk management process can be subdivided into the following stages:

- **Financial Risks Identification**

The Financial Risk Management has a high-level technical team that constantly monitors the activities of the bank transfer and its subsidiaries in search of potential unquantified and controlled risks. In addition, the Bank Treasury as the first line of defense also plays a fundamental role in the detection of risks. Banco Itaú Chile provides a structure that facilitates this risk identification role by maintaining independence in its tasks and ensuring the active participation of management in the creation/ modification of products.

- **Quantification and Control of Exposure to Financial Risk**

Once all the risks have been identified, the Financial Risk Management is responsible for the quantification of the financial risk factors and the establishment of limits at different levels, according to the risk defined by the Board of Directors and the applicable regulations.

The Financial Risk Management proposes a framework of quantitative and qualitative limits and alerts that are reviewed and approved by the ALCO and the Board of Directors. Additionally, it periodically measures the risk incurred, develops valuation tools and models, performs periodic stress analyses, measures the degree of concentration with interbank counterparties, prepares the manual of policies and procedures, as well as monitoring authorized limits and alerts, which are reviewed at least annually.

Note 47 – Risk Management, continued

The metrics, by type of risk, used to quantify exposures are explained below:

- **Market Risk Metrics and Limits for the Trading and Banking Portfolio**

In accordance with current regulations, the Bank measures its market risk exposures using standardized methodologies established by the CMF, as set forth in Chapters 21-7 and 21-13 of the RAN, in line with the provisions of the first paragraph of Article 67 and Title V of the General Banking Law, as well as Chapter 1-13 of the Updated Compilation of Regulations. This is consistent with the international standards established by the Basel Committee

The measurement of regulatory risk for the Banking Portfolio is used to estimate the Bank's potential losses from standardized adverse movements in interest and exchange rates.

The standardized regulatory report for the Banking Portfolio is used to estimate the Bank's potential economic losses due to standardized adverse movements in interest rates defined by the CMF. Currently, the limit on the net interest margin (NII) in the Banking Portfolio must not exceed 25% of the annual operating result (LTM rolling period), while the consumption of the limit on the economic value of the Bank (EVE) must be less than 13% of the Bank's Tier 1 capital."

As of March 31, 2025 and December 31, 2024, the Bank has complied with all regulatory requirements and limits, as well as with all financial covenants, such as risk-weighted capital adequacy ratio, single borrower exposure, aggregate exposure, concentration risk, equity to asset ratio, provision coverage ratio, among others.

Note 47 – Risk Management, continued

Value at Risk (VaR)

Calculation of Historical Value at Risk (Non-parametric). This measurement provides the maximum potential economic loss at a certain confidence level and a given time horizon. Historical VaR, as opposed to Statistical or Parametric VaR, is based on the observed distribution of past returns, does not need to make assumptions of probability distributions (frequently normal distribution) and, therefore, does not need a mean (assumed 0), standard deviation and correlations across returns (parameters). The Bank's uses a 99% confidence level and a time horizon of 1 day.

- Calculation of Volatility-Adjusted Historical Value at Risk (Non-parametric). This measurement is based on the above and the profit and loss vector is adjusted according to whether it is facing a period of greater or less volatility.

The Board of Directors and senior management define the limits on the Value at Risk, which is monitored on a daily basis. In turn, the measurement is subjected to retrospective tests that allow verifying that the losses actually incurred do not exceed the VaR, more than once every 100 days. The result is monitored daily to test the validity of the assumptions, hypotheses and the adequacy of the parameters and risk factors used in the calculation of the VaR.

The Bank calculates the VaR for sub-portfolios and risk factors, which allows it to quickly detect sources of risk. Since the VaR does not take into account stress scenarios, it is complemented with stress tests taking into account prospective, historical and standardized scenarios. Although the VaR is one of the most frequently used models by the local financial industry, and considering that it is a model, as such it has limitations that must be considered:

- It does not take into account the expected loss in the event that the return on the portfolio is above the confidence level defined in the VaR. That is, in the case of the Bank it does not reflect what happens in the 1% of the queue. This is mitigated with the stress measures detailed below.
- It does not consider intraday results, but only reflects the potential loss given current positions.
- It does not take into account the potential changes in the dynamics of the movements of the market variables (that is, the possible changes in the variance and covariance matrix).

Sensitivity measures

The Bank uses stress tests as a sensitivity analysis tool to control financial risk. This measurement is performed separately for the trading and banking portfolios.

The sensitivity is estimated using the DV01 indicator, which corresponds to a measure of sensitivity of the portfolio results if the zero coupon interest rate of the risk factor increases by 1 basis point (0.01%) for different maturities and in annualized terms.

Note 47 – Risk Management, continued

In accordance with IFRS 7, it is presented an estimate of the likely, but reasonable, impact of fluctuations in interest rates, exchange rates and implied volatilities (market factors) that would affect the trading and banking portfolios.

The fluctuations in market factors correspond to highly probable scenarios chosen from a set of scenarios agreed on the basis of the opinion of specialists in economics and financial risk and traders. To estimate the sensitivity, the sensitivity (DV01) and the reasonably probable scenarios are multiplied by the market factor.

Interest rate scenarios - Chile (basis points - 0.01%)

The interest rate shock scenarios on income accounting average +512 basis points in the case of the CLP chamber. An average of +174 basis points for CLF chamber and government factors (CLF y CLP) and +422 for the rest of the yields.

In the case of interest rate shock associated with fair value accounting in other comprehensive income, this shock averages +525 basis points in the case of the CLP chamber factor, -174 basis points for CLF chamber and +345 for the rest of the yields.

Interest rate scenarios Colombia (basis points - 0.01%)

Interest rate shock scenarios on income accounting and fair value accounting in other comprehensive income average -49 basis points for all yields.

Chile exchange rate scenarios

As of March 31, 2025, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of -5,8% in the Chilean peso-US dollar parity, and +7,17% in the COP-US dollar parity.

As of December 31, 2024, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of 7.0% in the Chilean peso-US dollar parity, and 13.3 % in the COP-US dollar parity.

Colombia exchange rate scenarios

As of March 31, 2025, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +4,33% in the COP-US dollar parity.

As of December 31, 2024, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +4.49% in the COP-US dollar parity.

**Note 47 – Risk Management, continued****Impact on P&L derived from the sensitivity analysis**

The following table presents the impact of the movements or reasonably probable scenarios explained above applied to the positions of the Trading Portfolio that affect the P&L (net income from financial operations, net foreign exchange gains/losses and interest margin, as applicable) as of March 31, 2025 and December 31, 2024.

Potential impact on P&L	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
CLP rate risk	(21,351)	(32,532)
Derivatives	(21,026)	(31,746)
Debt instruments	(325)	(786)
CLF rate risk	(17,273)	(23,528)
Derivatives	(17,273)	(23,528)
Debt instruments	—	—
COP rate risk	2,429	2,996
Derivatives	2,429	2,996
Debt instruments	—	—
UVR rate risk	—	—
Derivatives	—	—
Debt instruments	—	—
USD rate risk	(19,720)	(25,236)
Risk rate other currencies	(9,845)	(4,351)
Total rate risk	(65,760)	(82,651)
Exchange rate risk	—	3,159
Risk options	—	3
Total impact	(65,760)	(79,489)

Note 47 – Risk Management, continued

The impact on the margin of reasonably possible movements or scenarios on positions in the Accrual accounting banking book at the end of March 31, 2025 and December 31, 2024 is presented below.

Potential Impact on Accrual Accounting	As of March 31, 2025	As of December 31, 2024
	MCh\$	MCh\$
Interest rate shock sensitivity impact	(20,492)	2.296

The impact on the Banking Book does not necessarily mean a gain/loss but it does mean smaller/larger net income from the generation of funds (net funding income, which is the net interest from the accrual portfolio) for the next 12 months.

Impact on net equity derived from the sensitivity analysis

As well as the effects on profit and loss of positions carried at fair value and at amortized cost, variations in market factors due to reasonably possible movements in interest rates and exchange rates also generate impacts on the equity accounts as a result of the possible variation in the market value of the investment portfolio at fair value/available-for-sale instruments and of the cash flow hedge and net foreign investment portfolios, which are presented in the following table:

Potential impact on FVTOCI	Potential impact on FVTOCI					
	As of March 31, 2025			As of December 31, 2024		
	DV01 (+1 bp)	Impact of interest change intereses		DV01 (+1 bp)	Impact of interest change intereses	
	USD	MUSD	MCh\$	USD	MUSD	MCh\$
CLP	(566,724)	(287.94)	(273,032)	(665,419)	(341.60)	(339,336)
CLF	246,489	(86.28)	(81,814)	359,439	(123.67)	(122,847)
COP	(63,101)	0.47	512	(65,379)	(0.27)	(272)
UVR	—	—	—	—	—	—
USD	(35,841)	(3.82)	(3,897)	(24,606)	(4.33)	(4,707)
Other	—	—	—	—	—	—
Total impact of interest rates	(419,177)	(377.57)	(358,231)	(395,965)	(469.87)	(467,162)

Exchange rate	Impact due to changes in prices			
	As of March 31, 2025		As of December 31, 2024	
	US\$	MCh\$	US\$	MCh\$
USD	(10.09)	(9,567.00)	(18.42)	(18,302)
COP	(39.63)	(37,583.00)	(38.66)	(38,405)
Total exchange rate risk	(49.72)	(47,150)	(57.08)	(56,707)
Total impact	(427.29)	(405,380)	(526.95)	(523,869)

Note 47 – Risk Management, continued

Hedge

The Bank uses a variety of hedging strategies and instruments to manage the risks generated in the trading book and bank. In the case where the hedging instrument is subject to an accounting treatment different from the exposure of the underlying object of coverage, the Bank may use the accounting hedge treatment to eliminate the accounting asymmetries that could generate undue volatility in the results and/or Bank assets.

The use of accounting hedges is subject to the limits defined by the Board of Directors, to the definitions of the Financial Management and Market Higher Commission (ALCO) and to the Hedging Policy.

The Treasury is responsible for designing and implementing the strategies, the Financial Risk Management is responsible for measuring and monitoring the effectiveness of the hedges, generating effectiveness indicators that are constantly monitored, and the Financial Control Management is responsible for qualifying adequate regulatory compliance. In the case of accounting hedges (For more details on accounting hedge strategies, review Note 12 “Derivative contracts for accounting hedges”).

Operational Risk

The Bank and its subsidiaries define operational risk as the possibility of occurrence of losses resulting from failures, deficiencies or inadequacies in internal processes, people, and systems or external events, including in this definition the legal risk and excluding strategic risks and reputation. Operational risk is recognized as a manageable risk, for which it has defined a function in charge of this task within its corporate structure.

The Bank adopts a model of three lines of defense as the primary way to implement its operational risk management structure, internal controls and compliance, ensuring compliance with corporate guidelines.

The defense lines are composed by; the business and support areas (first line of defense) responsible for managing the risks related to their processes; Operational Risk, Internal Control, and the area of AML and Compliance (second line of defense) area in charge of supporting the first line of defense in relation to the fulfillment of its direct responsibilities; and Internal Audit function (third line of defense) responsible for verifying, independently and periodically, the adequacy of the risk identification and management processes and procedures, in accordance with the guidelines established in the Internal Audit Policy and submitting the results of its recommendations for improvement to the Audit Committee.

The risk management program contemplates that all relevant risk issues must be reported to the higher levels and to the Operational Risk Higher Commission.

Our methodology consists in the evaluation of the risks and controls of a business from a broad perspective and includes a plan to monitor the effectiveness of such controls and the identification of eventual weaknesses. The main objectives of the Bank and its subsidiaries in terms of operational risk management are the following:

- Identification, evaluation, information, management, and monitoring of the operational risk in connection with activities, products, and processes carried out or commercialized by the Bank and its subsidiaries;

Note 47 – Risk Management, continued

- Build a strong culture of operational risk management and internal controls, with clearly defined and adequately segregated responsibilities between business and support functions;
- Generate effective internal reports in connection with issues related to operational risk management, with a clearly defined escalation protocol;

- Control the design and application of effective plans to deal with contingencies that ensure business continuity and losses control.

Regarding training and awareness, the risk culture continues to be reinforced through face-to-face training in the field of operational risk, internal control, prevention of external and internal fraud, and the implementation of the annual "more security" program for all collaborators and induction programs for new employees.

Finally, it is worth mentioning that Sarbanes-Oxley methodologies (SOX) continue to be applied for their main products and processes, the application of this methodology is annually certified by an external consultant.

Below are the net losses due to operational risk events as of March 31, 2025 and March 31, 2024:

	As of March 31, 2025		
	Gross loss in the year due to operational risk events	Recovery of Gross loss in the year due to operational risk events	Exposure to net loss
Internal fraud	143	—	143
External fraud	3,601	1,250	2,351
Labor practices and safety in the business	112	53	59
Customers, products and business practices	11	—	11
Damage to physical assets	102	13	89
Business interruption and system failures	45	52	(7)
Execution, delivery and process management	352	28	324
Total	4,366	1,396	2,970

	As of March 31, 2024		
	Gross loss in the year due to operational risk events	Recovery of Gross loss in the year due to operational risk events	Exposure to net loss
Internal fraud	23	—	23
External fraud	2,841	1,163	1,678
Labor practices and safety in the business	427	135	292
Customers, products and business practices	—	—	—
Damage to physical assets	74	2	72
Business interruption and system failures	74	5	69
Execution, delivery and process management	449	378	71
Total	3,888	1,683	2,205

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators

Objectives of capital management, policies and governance

Proper capital management plays a fundamental role in the Bank, requiring constant monitoring and analysis to ensure compliance with current regulations and the Bank's internal objectives in this area.

In this regard, the Bank has a Capital Management unit, responsible for ensuring that the nature and levels of risk assumed by the Bank are consistent with the business strategy and with the level of capital required to meet its strategic objectives. To comply with this, the Bank relies on different management tools that allow it to identify, analyze, evaluate and monitor the risks that may affect capital.

Itaú Chile, within its management framework, has a "Capital Management Policy" that contains the guidelines and directives provided by the Board of Directors to guide the management decision-making process. This policy also includes the monitoring and control of the Bank's capital level, with the aim of ensuring the solvency and profitability of the ongoing business, as well as ensuring adequate regulatory compliance in this area. The Capital Management Policy establishes the guiding principles and objectives that govern this area, and defines the responsibilities associated with the capital function and its respective governance.

The Bank's internal regulations also establish that capital management must adhere to specific objectives to comply with regulatory requirements and correctly manage financial resources. The general objectives that the functions associated with capital management must ensure are:

- Determine the level of capital required by the Bank at the individual, subsidiary, and consolidated levels, in accordance with the risk appetite profile established by the Board of Directors and the approved strategy and business plans.
- Define the optimal level of capital required by the Bank, ensuring adequate compliance with the rules and other regulations established on the matter by the competent authority.
- Identify possible macro-financial scenarios, both internal and external, that may affect the Bank's capital and evaluate their potential impacts through stress testing methodologies or other methodologies appropriate for that purpose.

A key element of capital management is the definition of the internal effective equity target, which is formally set out in the Bank's capital planning process. This process is both annual and dynamic. Based on this, the Bank can assess its current and future capital needs and establish action plans to return to the capital levels admissible for the Bank, in accordance with its defined risk appetite.

In relation to roles and responsibilities, the Board of Directors is the primary entity responsible for the prudent management of the risks faced by the organization and the associated capital. In this regard, the Board of Directors, in accordance with its functions, must define and approve both the objectives and the strategic plan of the Bank. It should promote medium and long-term capital management in line with the defined risk profile, while ensuring the protection of shareholders and other stakeholders who may be affected by decisions in this area.

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

To support the Board of Directors in the functions described above, the Higher Capital Management Commission has been established. This commission assists the Board of Directors and the Bank's management in the assessment, management, and adequacy of capital, in accordance with local regulations and international standards (such as Basel). It also reviews the effectiveness of risk and capital policies and limits, and ensures adherence to these policies and procedures within the Company.

Capital Management Processes

The following processes are developed to carry out capital management in the Bank:

- Regular measurement of key capital indicators.
- Review of limits in relation to regulatory minimums and risk appetite, with escalation in case of excesses.
- Allocation of capital to the Bank's businesses.
- Capital projections in a base scenario and stress scenarios.
- Determination of the internal capital target and the limits and alert levels for risk appetite.
- Management of the capital self-assessment process.

This, together with policies and governance, allows capital management objectives to be met.

Capital requirements

In January 2019, Law No. 21,130 was published in the Official Gazette, modernizing banking legislation with the aim of implementing the practices promoted internationally by the Basel III agreement and introducing modifications to the Chilean General Banking Law. In order to implement the standards, the Financial Market Commission initiated the regulatory process by incorporating amendments and new chapters into the Updated Compilation of Standards (referred to as 'RAN'), providing guidelines for the calculation of risk-weighted assets, capital deductions, and additional capital requirements.

Effective equity corresponds to the sum of core capital (CET1) after regulatory adjustments, plus instruments eligible as Additional Tier 1 (AT1) capital (perpetual bonds and preferred shares), in addition to Tier 2 capital instruments, which include subordinated bonds and additional provisions. Capital deductions are subject to an implementation schedule. The deduction is currently at 65%, and its implementation ends in December 2025.

According to Article 66 of the Chilean General Banking Law, the base capital requirement corresponds to 4.5% of CET1 on risk-weighted assets (or RWA), 6.0% of T1 on RWA, and 8.0% of effective equity on RWA. In addition, a leverage ratio greater than or equal to 3.0% must be maintained.

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

The Bank is also subject to an additional core capital requirement due to systemic importance, as indicated in Article 66 quarter of the Chilean General Banking Law. The requirement determined for the Bank is 1.0%, and it is subject to gradual implementation until December 2025. Currently, 75% of the total charge must be constituted. On the other hand, Article 66 'Quinquies' of the General Banking Law empowers the CMF to determine a Pillar 2 charge of up to 4.0% of the total RWA. The Bank is not currently subject to capital requirements for this item.

On the other hand, Article 66 bis of the Chilean General Banking Law determines the capital conservation buffer, which corresponds to an additional 2.5% of basic capital on risk-weighted assets, with a transitional implementation period that ended in December 2024. Finally, Article 66 ter of the Chilean General Banking Law empowers the Central Bank of Chile to impose a counter-cyclical capital requirement of up to 2.5% of risk-weighted assets. The current charge in the country is 0.5%.

With this, the Bank's current total capital requirement is 11.8%¹. As of the end of March 31, 2025, the Bank's capital level was 16.6% at the consolidated level, comfortably complying with the minimum regulatory requirements.

(1) Considers 8% basis, 2.5% capital conservation buffer, 0.8% systemic importance charge and 0.5% countercyclical capital requirement. The requirement remains unchanged from December 2024..

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

- a) This corresponds to the value of the investment in subsidiaries that are not consolidated. It applies only in local consolidation when the bank has subsidiaries abroad, deducting their full value in assets and CET1.
- b) It corresponds to the value of the asset items that are deducted from regulatory capital, in accordance with paragraph a) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN). Item No. Note Total assets, risk-weighted assets and components of effective equity according to Basel III - Description of the item
- c) It corresponds to the credit equivalents of derivative instruments in accordance with paragraph b) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- d) It corresponds to contingent exposures as established in paragraph c) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- e) It corresponds to the assets related to the intermediation of financial instruments in one's own name on behalf of third parties, which are within the consolidation perimeter of the bank, as established in paragraph d) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- f) It corresponds to the assets weighted by credit risk, estimated according to Chapter 21-6 of the Updated Compilation of Standards (RAN). If the bank is not authorized to apply internal methodologies, it must report field 8.b with zero and add 8.a in the field 11.a. If it has the authorization, it must add 8.b in 11.a.
- g) It corresponds to assets weighted by market risk, estimated according to Chapter 21-7 of the Updated Compilation of Standards (RAN).
- h) It corresponds to assets weighted by transactional risk, estimated according to Chapter 21-8 of the Updated Compilation of Standards (RAN)
- i) It corresponds to the non-controlling interest, depending on the level of consolidation, for up to 20% of the owners' equity.
- j) Assets that correspond to goodwill
- k) It corresponds to the balances of investment assets in companies other than line-of-business support companies that do not participate in consolidation, in excess of 5% of the owners' equity.
- l) In the case of CET1 and T2, banks must estimate the equivalent value for each level of capital, as well as the value obtained by fully applying Chapter 21-1 of the Updated Compilation of Standards (RAN). The difference between the equivalent value and the value obtained by fully applying the above Chapter 21-1 must then be weighted by the discount factor in force on the reporting date, according to the interim standards of Chapter 21-1 of the Updated Compilation of Standards (RAN), and reported in this row. For AT1, discounts apply directly if they exist.
- m) Provisions and subordinated bonds charged to Additional Tier 1 (AT1) capital, as set out in Chapter 21-2 of the Updated Compilation of Standards (RAN)
- n) Provisions and subordinated bonds charged to the equivalent definition of Tier 2 (T2) capital, as set out in Chapter 21-1 of the Updated Compilation of Standards (RAN).
- o) In accordance with the interim standards, as of 1 December 2022, solvency requirements will also be applied at the local consolidated level, with the figures at this level being reported in this column. Banks without subsidiaries abroad do not have to fill in this data.
- p) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for the capital conservation buffer, as established in Chapter 21-12 of the Updated Compilation of Standards (RAN).
- q) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for the countercyclical buffer, as established in Chapter 21-12 of the Updated Compilation of Standards (RAN).
- r) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for banks designated as systemic, as established in Chapter 21-11 of the Updated Compilation of Standards (RAN).
- s) It corresponds to the additional capital required for the assessment of the adequacy of the bank's effective equity (Pillar 2), as established in Chapter 21-13 of the Updated Compilation of Standards (RAN).

9	Voluntary provisions (additional) and subordinated bonds that are charged to additional tier 1 capital (AT1) in relation to RWAs ((T1_I19+T1_I20)/(T1_I11.b))	h	—	—	—	—

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

- a) In the case of leverage, the minimum level is 3%, without prejudice to the additional requirements for systemic banks that may be set under Chapter 21-30 of the Updated Compilation of Standards (RAN). In the case of core capital, the bank should consider a minimum limit of 4.5% of risk-weighted assets (RWA). In addition, if applicable, the bank must include the systemic charge in force according to the interim standards, as well as the Pillar 2 requirement defined for this capital level. For new banks that have not paid the paid-in capital of UF 400,000, they must add 2% to their minimum requirement in accordance with Article 51 of the Chilean General Banking Law. This percentage decreases to 1% if the paid capital is above UF 600,000 but less than UF 800,000. For Tier 1 capital, the bank must consider a minimum requirement of 6% and the Pillar 2 charge defined for this capital tier. Finally, at the level of effective equity, the bank must consider a minimum requirement of 8% of risk-weighted assets (RWA). Additional charges for Pillar 2, systemic bank and those indicated in Article 51 of the Chilean General Banking Law for new banks must be added to this.
- b) The capital buffer deficit must be estimated in accordance with Chapter 21-12 of the Updated Compilation of Standards (RAN). This figure defines the restriction on the distribution of dividends if it is positive, in accordance with the aforementioned Chapter. For effective equity, the figures for the capital conservation and countercyclical buffers in force on the reporting date according to interim standards must be added to the amount defined in note a), even if there is a requirement under Article 35 bis of the Chilean General Banking Law.
- c) If the bank has an effective equity requirement in force under Article 35 bis of the Chilean General Banking Law, it must report this amount in this cell in accordance with the interim standards.
- d) It corresponds to the solvency classification as established in Article 61 of the General Banking Law.
- e) Limit of 1.25% if the bank uses standard methodologies (field T1_8.a), or 0.625% if the bank uses internal methodologies (field T1_8.b) in the estimation of RWAs.
- f) Subordinated bonds charged to Tier 2 capital must not exceed 50% of Common Equity Tier 1 (CET1) capital, taking into account the discounts applied to these instruments under Chapter 21-1 of the Updated Compilation of Standards (RAN).
- g) Additional Tier 1 (AT1) capital cannot exceed one-third of Common Equity Tier 1 (CET1) capital.
- h) Additional provisions and subordinated bonds charged to AT1 may not exceed 0.5% of RWAs as of December 1, 2022, in accordance with the interim rules of Chapter 21-2 of the Updated Compilation of Standards (RAN).
- i) In accordance with the interim rules, as of December 1, 2022, solvency requirements are also applied at the local consolidated level. The figures at this level are reported in this column. Banks without subsidiaries abroad do not have to fill in this data.

Note 49 - Subsequent Events

Other

As of April 1st, 2025 and the date of issuance of these Interim Consolidated Financial Statements, the following subsequent events have occurred that significantly affect them.

Ordinary Shareholders' Meeting 2025

At the ordinary shareholders meeting of Banco Itaú Chile held on April 24, 2025, the shareholders agreed, among other matters, to distribute 30% of the profits for the 2024 fiscal year, amounting to \$112,988,077,742 as dividends to the shareholders, among the total of 216,340,749 validly issued and outstanding shares of the bank, which corresponds to a dividend of \$522.2690513195920 per share. Additionally, the meeting agreed that the remaining 70% of the profits will be retained.

Furthermore, the appointment of , Mr. Gabriel Amado de Moura and Mr. Kevin Cowan Logan as directors, was agreed upon, positions they will hold until the next board renewal. Their appointments as such were reported through essential facts dated September 24, 2024, and December 17, 2024, respectively.

Director Mr. Kevin Cowan Logan has the status of an independent director for the purposes of Article 50 bis of Law No. 18.046 on Corporations.

At the ordinary shareholders meeting, PricewaterhouseCoopers Consultores Auditores was also approved as external auditors for the 2025 fiscal year, and the local risk rating agencies, International Credit Rating, Compañía Clasificadora de Riesgo Ltda. ("ICR Chile") and Feller-Rate Clasificadora de Riesgo Limitada, also were approved.

INDEPENDENT AUDITOR'S REPORT

(This translation has been prepared and reviewed by PwC Chile)

Santiago, February 26, 2025

To the Shareholders and Directors of
Banco Itaú Chile

Opinion

We have audited the consolidated financial statements of Banco Itaú Chile and subsidiaries, which comprise the consolidated statements of financial position as of December 31, 2024 and 2023, and the related consolidated statements of income, comprehensive income, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Banco Itaú Chile and subsidiaries as of December 31, 2024 and 2023, and the results of its operations and its cash flows for the years then ended in accordance with accounting standards and instructions issued by the Financial Market Commission.

Basis for Opinion

We conducted our audits in accordance with Generally Accepted Auditing Standards in Chile. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Banco Itaú Chile and subsidiaries and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the *consolidated* financial statements in accordance with accounting standards and instructions issued by the Financial Market Commission., and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Banco Itaú Chile and subsidiary's ability to continue as a going concern for at least, but not limited to, twelve months from the end of the reporting period.

Banco Itaú Chil

2

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with **Generally Accepted Auditing Standards** in Chile will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with **Generally Accepted Auditing Standards** in Chile, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Banco Itaú Chile and subsidiary's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Banco Itaú Chile and subsidiary's ability to continue as a going concern for a reasonable period of time.

Santiago, February 26, 2025

Banco Itaú Chil

3

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and any internal control significant deficiency and material weakness that we identified during the audit.

Note 1 - Background of the Institution

General Information – Background of Banco Itaú Chile and subsidiaries

Banco Itaú Chile (ex Itaú CorpBanca) (hereinafter “Itaú Chile” or “the Bank”) is a corporation incorporated under the laws of the Republic of Chile and regulated by the Commission for the Financial **Market** (hereinafter CMF for its acronym in Spanish). As of June 1, 2019, the CMF took over the functions of the Superintendency of Banks and Financial Institutions (“SBIF”) in accordance with Decree with Force of Law (DFL) 3 dated January 12, 2019, which set a new consolidated, systematized and agreed wording for the General Banking Law. The entity is the consequence of the merger of Banco Itaú Chile and CorpBanca, which took place on April 1, 2016, with the latter being the legal successor¹.

The Bank is controlled by Itaú Unibanco, which holds a 67.42% ownership. The remaining 32.58% is owned by minority shareholders².

Banco Itaú Chile is headquartered in Chile and has operations in Colombia and Panamá. In addition, Banco Itaú Chile has a branch in New York and a representative office in Lima³. The Bank has total consolidated assets for MCh\$42,531,714 (MUS\$42,676) and its consolidated equity for MCh\$3,974,831 (MUS\$3,988). Focused on large and medium size companies and people, Itaú CorpBanca offers universal banking services.

The legal address of Banco Itaú Chile is Av. Presidente Riesco 5537, Las Condes, Santiago, Chile, and its web site is www.ita.cl.

The Consolidated Financial Statements as of December 31, 2024, were approved by the Board of Directors on February 26, 2025.

¹ The business combination was a “reverse acquisition” as established in IFRS 3, “Business Combinations”, in which Banco Itaú Chile is the successor for accounting purposes and CorpBanca is the legal successor.

² The percentage of minority interest has been rounded for presentation in this report. This percentage has been calculated on the basis of the total not rounded number of shares.

³ None of the markets in which Itaú Chile and subsidiaries operate qualify as a hyperinflationary economy.

Note 2 - Summary of Significant Accounting Policies

a) Accounting Year

The Consolidated Financial Statements are referred as of December 31, 2024 and 2023 and cover the years ended on those.

b) Basis of preparation of the Consolidated Financial Statements

These Consolidated Financial Statements have been prepared in accordance with the Banking Compendium of Accounting Standards (here in after "the compendium") issued by the CMF, and in force since January 1, 2022. Banks must use the accounting criteria set forth in the compendium and in everything that is not dealt with by it and does not contradict its instructions, they must adhere to International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). If there are discrepancies between IFRS and the accounting criteria set forth in the compendium, the latter will prevail.

The notes to these Consolidated Financial Statements contain additional information to that presented in the Consolidated Statements of Financial Position, the Consolidated Statements of Income, the Consolidated Statements of Other Comprehensive Income, the Consolidated Statements of Changes in Equity and the Consolidated Statements of Cash Flows. On them descriptive and disaggregated information is presented. They provide narrative descriptions or disaggregation of such Consolidated Financial Statements in a clear, relevant, reliable, and comparable manner. These Consolidated Financial Statements as of December 31, 2024 and 2023 have not been audited.

c) Consolidation criteria

The same accounting policies, presentation and calculation methods applied in these Consolidated Financial Statements were used in the preparation of the separate Financial Statements of Banco Itaú Chile and subsidiaries (hereinafter "Group" or the "Bank"), corresponding to the balances as of December 31, 2024 and 2023 and cover the years ended on those date and include the adjustments and reclassifications necessary to standardize the accounting policies and valuation criteria applied by the Bank, in accordance with the standards established by the compendium.

Intercompany balances and any unrealized income or loss arising from intercompany transactions are eliminated upon consolidation during the preparation of the Consolidated Financial Statements.

Assets, liabilities, income, and results of operations of subsidiaries, net of consolidation adjustments, represent 20%, 22%, 24% and 13% respectively, of total consolidated assets, liabilities, income, and operating results as of December 31, 2024 (18% and 19% of our consolidated total assets and liabilities; 20% and 11% of our consolidated income, and operating results as of December 31, 2023).

Note 2 - Summary of Significant Accounting Policies, continued

(i) Controlled entities

The Bank, regardless of the nature of its involvement with an entity (the investee), shall determine whether it is a parent by assessing whether it controls the investee.

The Bank controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Thus, the Bank controls an investee if and only if has all the following:

- 1) Power over the investee, which is related to the existing rights that give the Bank the current ability to direct the relevant activities, these being those that significantly affect the investee's returns;
- 2) Exposure, or rights, to variable returns from its involvement with the investee;
- 3) Ability to use its power over the investee to affect the amount of the Bank's returns.

When the Bank has less than a majority of the voting rights over an investee, but such voting rights are sufficient to have the actual ability to direct the relevant activities, then it will be concluded that the Bank has control over the investee.

The Bank considers all relevant factors and circumstances when assessing if the voting rights are sufficient to obtain control, these include:

- The amount of voting rights held by the Bank in relation to the amount and dispersion of those held by other vote holders.
- Potential voting rights held by the Bank, other voting holders or other parties.
- Rights that arise from other contractual agreements.
- Any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time those decisions need to be made, including the patterns of voting behavior in previous shareholders meetings.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank reassesses whether or not it has control over an investee when facts and circumstances indicate that there are changes in one or more of the control elements listed above.

The Financial Statements of the controlled companies are consolidated with those of the bank through the global integration method (line by line). In accordance with this method, all balances and transactions between consolidated companies are eliminated through the consolidation process. Therefore, the Consolidated Financial Statements refer to assets, liabilities, equity, income, expenses, and cash flows of the parent and its subsidiaries presented as if they were a single economic entity. The Bank prepares the Consolidated Financial Statements using uniform accounting policies for transactions and other events that, being similar, have occurred in similar circumstances.

The following table details the entities controlled by Banco Itaú Chile, therefore, they are part of the consolidation perimeter:

	Market	Country	Functional Currency %	Percentage of ownership					
				As of December 31, 2024			As of December 31, 2023		
				Direct %	Indirect %	Total %	Direct %	Indirect %	Total %
Itaú Corredores de Bolsa Ltda. (1)	Domestic	Chile	\$	99.987	0.013	100.000	99.987	0.013	100.000
Itaú Administradora General de Fondos S.A. (1)		Chile	\$	99.994	0.006	100.000	99.994	0.006	100.000
Itaú Corredores de Seguros Ltda. (1)		Chile	\$	99.990	0.010	100.000	99.990	0.010	100.000
Itaú Asesorías Financieras Ltda. (1)		Chile	\$	99.990	0.010	100.000	99.990	0.010	100.000
Recaudaciones y Cobranzas Ltda. (1)		Chile	\$	99.990	0.010	100.000	99.990	0.010	100.000
Itaú Chile New York Branch (1) (4)	Foreign	EE.UU	US\$	100.000	—	100.000	100.000	—	100.000

Itaú (Panamá) S.A. (3)		Panamá	US\$	—	99.462	99.462	—	99.462	99.462
Itaú Holding Colombia S.A.S (2)		Colombia	COP\$	100.000	—	100.000	100.000	—	100.000

- (1) Company regulated by the Financial Market Commission (CMF) of Chile.
(2) Companies regulated by the Colombian Financial Superintendency (CFS), which has a supervision agreement with the CMF.
(3) Company regulated by the Superintendency of Banks of Panamá.
(4) Company regulated by Office of the Comptroller of the Currency (OCC) and Federal Reserve (FED).

(ii) Associated entities and/or business support

Associated entities are those over which the Bank has significant influence; although not control or joint control. If the Bank holds, directly or indirectly (e.g. through subsidiaries), 20% or more of the voting power of the investee, it is presumed that the Bank has significant influence, unless it can be clearly demonstrated that this is not the case, and subsequently increased or decreased to recognize either the Bank's proportional share in the net profit or loss of the associate and other movements recognized in its equity. The lower value arising from the acquisition of an associate is included in the book value of the investment net of any accumulated impairment loss.

Note 2 - Summary of Significant Accounting Policies, continued

Other factors considered to determine the significant influence on an entity are the representations in the Board of Directors and the existence of material transactions. The existence of these factors could determine the existence of significant influence on an entity, despite having a participation of less than 20% of the shares with the right to vote.

The following entities are considered “Associated entities”, in which the Bank has participation and are accounted for by applying the equity method, according to IAS 28 “*Investments in Companies and Joint Ventures*”.

Name of the Associates	Main Activity	Place of Operation	As of December 31, 2024	As of December 31, 2023
			% interest	% interest
Transbank S.A.	Credit and debit card services	Santiago, Chile	8.7188 %	8.7188 %
Combank S.A.	High-value payment clearing house	Santiago, Chile	10.3295 %	9.8114 %
Imerc OTC S.A	Administration of financial instrument clearing and settlement systems	Santiago, Chile	8.6624 %	8.6602 %

(iii) Investments in other companies

Investments in other companies, represented by shares or rights in other companies, are those in which the Bank has neither control nor significant influence. These equity instruments must be measured in compliance with IFRS 9, at their fair value; however, equity instruments that are neither held for trading and on which the equity method is not applied for investments in companies with significant influence (“associates” or “joint ventures”) according to IAS 28, may be recorded after their initial recognition and irrevocably at fair value, with variations recognized in Statements of Other Comprehensive Income instead of as “Non-trading financial assets mandatorily at fair value through profit or loss”. Dividends received from these investments are recorded in “Income (loss) from investments in companies” in the Consolidated Statement of Income. These instruments are not subject to the impairment model of IFRS 9.

(iv) Funds management, trust business and other related businesses

The Bank and its subsidiaries manage assets held in publicly offered investment funds and other investment vehicles on behalf of investors and receive market-rate compensation for providing this type of services. Managed funds belong to third parties and, therefore, are not included in the Consolidated Statement of Financial Position.

The Bank provides trust commissions and other fiduciary services that result in the participation or investment of assets by clients. Assets held in a fiduciary activity are not reported in the Consolidated Financial Statements, since they are not Bank assets and there is no control over them. Contingencies and commitments arising from this activity are disclosed in Note 29 “Contingencies and Commitments”, letter c) Responsibilities recorded in off-balance-sheet accounts.

In accordance with IFRS 10 “Consolidated Financial Statements” for consolidation purposes, the role of the Bank and its subsidiaries with respect to the managed funds must be evaluated to determine whether it is acting as Agent or Principal. According to this standard, an Agent is a party primarily engaged in acting on behalf and for the benefit of another party or parties (the Principal or Principals) and, therefore, it does not control the investee when it exercises decision-making authority. This evaluation must take into account the following aspects:

Note 2 - Summary of Significant Accounting Policies, continued

- Scope of its decision-making authority over the investee.
- Rights held by other parties.
- The remuneration to which it is entitled to in accordance with the remuneration agreements.
- Decision-maker's exposure to variability of returns from other interests that it holds in the investee.

The Bank does not control or consolidate any trusts or other entities related to this type of business.

The Bank manages the funds on behalf and for the benefit of investors, acting solely as an Agent. The assets managed by the Bank and its subsidiaries are owned by third parties. Under this category, and in accordance with the aforementioned standard, they do not control the assets when they exercise their decision-making authority. Therefore, as of December 31, 2024 and 2023 they act as Agents and, therefore, none of these investment vehicles is consolidated.

d) Non-controlling interest

Non-controlling interest represents the portion of net income and net assets which the Bank does not own, either directly or indirectly. It is presented as "Attributable to non-controlling interest" separately in the Consolidated Statement of Income, and separately from equity in the Consolidated Other Comprehensive Income.

Additionally, the non-controlling interests in the Consolidated Statements of Financial Position will be presented, within the equity under item "Non-controlling interest", separately from the equity attributable to owners of the Bank. Changes in the ownership interest of a parent in a subsidiary that do not result in a loss of control are equity transactions (i.e., transactions with owners in their capacity as owners).

The Bank attributes the result of the year and each component of other comprehensive income to the owners of the Bank and to the non-controlling interests. The Bank also attributes the total integral result to the owners of the Bank and to the non-controlling interests even if the results of the non-controlling interests give rise to a debit balance.

e) Business combinations, Goodwill and Intangible Assets

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the sum of the consideration transferred, measured at its fair value at the acquisition date, and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the share, under the equity method, of the identifiable net assets acquired. Acquisition costs incurred are expensed and included in administrative expenses.

When Banco Itaú Chile and its subsidiaries (the Group) acquires a business, evaluates the identifiable assets acquired and liabilities assumed to determine proper classification and designation based on contractual conditions, economic circumstances, and other relevant conditions as of the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree and identification of intangible assets.

Note 2 - Summary of Significant Accounting Policies, continued

Goodwill, defined as the difference between the consideration transferred and the amount recognized for the non-controlling interest in the net identifiable assets acquired and liabilities assumed, is measured initially at cost. If this consideration is less than the fair value of the net assets of the acquired subsidiary, the difference is recognized directly in profit or loss as of the acquisition date. While intangible assets are initially recorded at the value assigned to the identifiable asset in the business combination.

After initial recognition, both Goodwill and any identifiable or non-identifiable intangible assets are measured at cost less any accumulated impairment losses. Goodwill acquired in a business combination is assigned, from the date of acquisition, to each of the Group's cash generating units (CGU) that are expected to benefit from the combination, independently of whether other assets or liabilities of the acquiree are assigned to those units.

When goodwill is allocated to a CGU and an operation within that unit is sold, the goodwill associated with that operation is included in the carrying amount of the operation sold when determining the gain or loss on disposal. Goodwill that is derecognized under such circumstances is measured on the basis of the relative values of the operation disposed of and the retained portion of the CGU.

f) Common control transaction

A common control transaction is a transfer of assets or an exchange of equity interests among entities under the same parent's control. A common control transaction has no effect on the parent's Consolidated Financial Statements. Net assets are derecognized by the transferor and recognized by the transferee at their carrying amount. Any difference between the value of the item transferred or received and the carrying amount of the net assets is recognized in equity in the separate financial statements of the transferring and receiving entities and eliminated on consolidation.

g) Functional and presentation currency

The Bank has defined as its functional and presentation currency the Chilean peso, financial figures are expressed in millions of Chilean pesos (MM\$), rounded to the nearest unit, for the purposes of these Consolidated Financial Statements, which is the currency of the primary economic environment in which the Bank operates and the currency that influences its costs and revenue structure. Therefore, all balances and transactions denominated in currencies other than the Chilean peso are treated as "foreign currency".

The Bank translates accounting records of its subsidiaries in New York and in Colombia into Chilean pesos from US dollars and Colombian pesos, respectively, in accordance with instructions established by the CMF, which are consistent with IAS 21 "Effects of the variations in the exchange rates of the foreign currency". All amounts in the Consolidated Statements of Income, Consolidated Statements of Other Comprehensive Income and the Consolidated Statement of Financial Position are translated into Chilean pesos according to the exchange rate indicated in letter g) below. None of the markets in which Banco Itaú Chile and subsidiaries operate qualify as a hyperinflationary economy.

Note 2 - Summary of Significant Accounting Policies, continued

h) Foreign currency

Transactions in foreign currency are initially recorded by the Bank entities at the exchange rates of their respective functional currencies at the date these transactions first meet the conditions for their recognition.

Monetary assets and liabilities denominated in foreign currency are converted at the closing exchange rate of the functional currency in force at the closing date of the reporting year.

All differences arising from the settlement or conversion of monetary items are recognized in the results, except for those that correspond to the monetary items that are part of the hedge of a net investment, at which time the cumulative difference in equity is reclassified to profit and loss (settlement). Tax effects attributable to the exchange differences on such monetary items are also recorded in Consolidated Other Comprehensive Income.

Non-monetary items in foreign currency, which are measured in terms of historical cost, are converted using the exchange rate on the date of the transaction. Non-monetary items that are measured at their fair value in foreign currency are translated using the exchange rates on the date on which that fair value is measured. Gains or losses arising from the translation of non-monetary items measured at their fair value are recognized based on how the gains and losses arising from the change in fair value are recognized in Consolidated Statements of Other Comprehensive Income or in Consolidated Statements of Income, in accordance with IAS 21.

The Bank grants loans and receives deposits in amounts denominated in foreign currency, mainly in US dollars and Colombian pesos.

The balances of the Financial Statements of the consolidated entities whose functional currency is different from the Chilean peso are converted to the presentation currency, according to the following:

- Assets and liabilities, by using exchange rates as of the date of the Consolidated Financial Statements.
- Income and expenses and cash flows, by using the exchange rates as of the date of each transaction.

Exchange differences arising from translating balances in functional currencies of the consolidated entities other than Chilean pesos into Chilean pesos, are recorded as "Exchange differences" in Equity under the line item "Valuation accounts", until they meet the derecognition criteria for the Consolidated Statement of Financial Position, and are subsequently recorded in profit or loss.

The net amount of foreign exchange gains and losses includes the recognition of the effects of changes in the exchange rate over assets and liabilities denominated in foreign currencies and gains and losses arising from exchange rate changes affecting current and future transactions (highly probable transactions) entered into by the Bank.

Note 2 - Summary of Significant Accounting Policies, continued

Assets and liabilities in foreign currencies are shown at their equivalent amount in pesos, calculated using the exchange rate of \$996.61 per US\$1 (US dollar) as of December 31, 2024 (\$876.69 as of December 31, 2023) and the exchange rate of \$0.2263 per COP\$1 (Colombian peso) as of December 31, 2024 (\$0.2274 as of December 31, 2023). The Financial Statements of the New York branch, as well as the Colombian subsidiaries, have been translated using these exchange rates for consolidation purposes, in accordance with IAS 21, related to the valuation of investments abroad in countries with stable economy.

i) Use of estimates and judgments

The preparation of the Consolidated Financial Statements requires Bank's management to make estimates, judgments and assumptions that affect the application of the accounting policies and the reported balances of assets and liabilities, disclosures of contingencies with respect to assets and liabilities as of the date of the Consolidated Financial Statements, as well as income and expenses during the year. Actual results may differ from these estimates.

Estimates and relevant assumptions are regularly reviewed by Management in order to properly measure some assets, liabilities, income, and expenses. Accounting estimates changes due to reviews are recognized in the year in which the estimate is reviewed and in any future year affected.

In certain cases, CMF rules and International Financial Reporting Standards require that assets and liabilities be recorded or disclosed at their fair values. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When market prices in active markets are available, they have been used as a basis for valuation. When market prices in active markets are not available, the Bank has estimated those values as values based on the best available information, including the use of modeling and other valuation techniques.

The Bank has established allowances to cover possible credit losses in accordance with the compendium criteria. These criteria require that, in order to estimate allowances, they be evaluated regularly, taking into account factors such as changes in the nature and size of the loan portfolio, trends in the expected portfolio, credit quality and economic conditions that may affect the payment capacity of the debtors. Changes in allowances for loan losses are reflected as "Special provisions for credit risk" in the Consolidated Statement of Income.

Loans are charged-off when the Bank's management determines that the loan or a portion cannot be collected, in accordance with the compendium, as stated in chapter B-2 "Impaired loans and charge-offs". Charge offs are recorded as a reduction of the allowance for loan losses.

Note 2 - Summary of Significant Accounting Policies, continued

In particular, information on most significant areas of estimate due to uncertainties and critical judgments in the application of accounting policies that have the most important effect on the amounts recorded in the Consolidated Financial Statements are the following:

- Allowances for loan losses (Notes 13 and 41).
- Current taxes and deferred taxes (Note 18).
- Provision for contingencies (Note 24).
- Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments (Note 25).
- Special provisions for loan loss risk (Note 26).
- Contingencies and commitments (Note 29).
- Fair value of financial assets and liabilities (Note 44).
- Impairment losses on certain assets, including Goodwill (Notes 13, 15, 16, 17, 40 and 41).

During the year ended as of December 31, 2024, there have been no significant changes in estimates (see Notes 40 and 41).

j) Operating segments

The Bank provides financial information for each operating segment in conformity with IFRS 8 “Operating Segments” in order to disclose information that enables Consolidated Financial Statement users to evaluate the nature and financial effects of the business activities in which the Bank engages and the economic environments in which it operates and to allow them to:

- Better understand the Bank’s performance.
- Better evaluate its future cash flow projections.
- Form better opinions regarding the Bank as a whole.

To comply with IFRS 8, Banco Itaú Chile identifies operating segments (Chile and Colombia) used by the Executive Committee to analyze and make decisions regarding operating, financing and investment matters, based on the following elements:

- (i) The nature of the products and services;
- (ii) The nature of the processes;
- (iii) The type or class of customer for their products and services;
- (iv) The methods used to distribute their products or provide their services; and
- (v) If applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.

Note 2 - Summary of Significant Accounting Policies, continued

The Executive Committee manages these segments using an in-house system of internal profitability reports and reviews its segments on the basis of the operating results and uses efficiency, profitability and other indicators to evaluate performance and allocate resources. The Bank has also included geographic disclosures on its operations in New York and Colombia. More information on each segment is presented in Note 6 "Reporting Segments".

k) Operations with Repurchase and Resale Agreements

Transactions with resale agreements are entered into as a form of investment. Under these agreements, financial instruments are purchased, which are included as assets under "Rights under resale agreements and securities lending agreements", and are accounted for at amortized cost using the effective interest rate of the agreement. There are also sales transactions with a repurchase agreement as a form of financing. In this regard, investments that are sold under a repurchase obligation and that serve as collateral for the loan, are part of the investment items "Financial assets held for trading at fair value through profit or loss", "Financial assets at fair value through other comprehensive income" or "Financial assets at amortized cost".

The obligation to repurchase the investment is classified in Liabilities under "Obligations under repurchase agreements and securities lending transactions" and recognized in financial liabilities at amortized cost, recognizing accrued interest and indexation at the closing date or "Financial assets at amortized cost".

The Bank applies IFRS 9 for determining the impairment of its financial assets carried at amortized cost, except for assets classified under the compendium as "Interbank Loans", "Loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. See Note 13 "Financial assets at amortized cost" and Note 41 "Credit loss expenses".

l) Classifications of Financial Instruments

i. Classifications of Financial Instruments

a) Classification of Financial Assets

The Bank classifies its Financial Assets under the following category as established by IFRS 9:

- Measured at amortized cost,
- Measured at fair value through other comprehensive income
- Measured at fair value through profit or loss
- And those that by management's decision are irrevocably measured at fair value through other comprehensive income.

Note 2 - Summary of Significant Accounting Policies, continued

The classification of financial instruments into an amortized cost or fair value category depends on the business model with which the entity manages the assets and the contractual characteristics of the cash flows, commonly referred to as the "Solely Payments of Principal and Interest" approach (hereinafter "SPPI"). The business model valuation should reflect how the Bank manages groups of financial assets and is not dependent on the intent for an individual instrument. Therefore, in each Consolidated Financial Statement there are different business models for managing assets.

In determining the business model, the following are taken into account:

- How the performance of the business model (and the assets that are part of the business model) is evaluated and reported to the entity's key personnel.
- The risks and the way in which risks that affect the performance of the business model are managed.
- How business model managers are remunerated. The frequency, amount and timing of sales in prior years, the reasons for such sales and expectations regarding future sales.

With regard to the assessment of contractual cash flows, it determines whether the cash flows of the financial asset meet the SPPI criterion, i.e. whether the contractual terms of the financial asset give rise, on specific dates, to cash flows that are solely payments of principal and interest. Principal is the fair value of the financial asset at initial recognition, and interest is the consideration for the time value of money, the credit risk associated with the principal outstanding and may also include liquidity risk, administrative cost and profit margin.

For the classification, the Bank performs the SPPI test, which evaluates the contractual term to identify whether it meets the SPPI criteria, and whether the contract is a basic loan agreement. The Bank applies its judgment and considers relevant factors such as the currency in which the financial asset is denominated and the year for which the interest rate is set.

The Bank's business model represents how financial assets are managed to generate cash flows and does not depend on management's intent with respect to an individual instrument, but relates to a higher aggregate portfolio level, and is based on observable factors such as: risks affecting business model performance; how business managers are compensated; and how business model performance is evaluated and reported to management.

In addition, the Bank's business model is not evaluated on an instrument-by-instrument basis, but at a higher aggregate portfolio level, and is based on observable factors such as: the performance of financial assets, the risk affecting performance, and the frequency, value and timing of sales, among others.

Note 2 - Summary of Significant Accounting Policies, continued

In accordance with IFRS 9, the business models are:

- Business model held for collection: financial assets that are held under a business model whose objective is to collect principal and interest flows over the life of the instrument and on which there are no significant unjustified sales and fair value is not a key element in the management of these assets and the contractual conditions give rise to cash flows on specific dates, which are only payments of principal and interest on the principal amount outstanding. In this sense, sales other than those related to an increase in credit risk, to manage credit concentration risk, or unforeseen financing needs (liquidity stress scenarios) are considered unjustified, and are not incompatible with a business model whose objective is to hold financial assets to collect the contractual cash flows.
- Held to collect and sell: financial assets under this business model whose objective is achieved through the collection of principal and interest flows and the sale of such assets, with fair value being a key element in the management of these assets. This model involves a higher frequency and value of sales than the model.
- Another business model: includes financial assets with the objective of realizing cash flows through the sale of the assets. The Bank makes decisions based on the assets' fair values and manages the assets to realize those fair values.

Financial assets will only be reclassified when there is a change in the business model. In this case, all financial assets in that business model are reclassified. The change in the business model objective must be prior to the reclassification date.

b) Classification of financial liabilities

Financial liabilities are classified in the following categories:

- Financial liabilities at amortized cost: contractual obligation to deliver cash to a third party which is measured at its effective rate.
- Financial liabilities that are accounted for at fair value through profit or loss: these correspond to financial liabilities that meet the definition of held for trading;
- Financial liabilities designated at fair value through profit or loss at the time of initial recognition (Fair value option): financial instruments in which the Bank should carry the effective rate, but upon initial recognition it exercises the option to recognize them at market value or significantly reduce any accounting asymmetry.

The Bank has the option to irrevocably designate, at the time of initial recognition, a financial liability as measured at fair value through profit or loss if the application of this criterion eliminates or significantly reduces inconsistencies in valuation or recognition, or if it is a group of financial liabilities, or a group of financial assets and liabilities, that is managed, and its performance evaluated, on a fair value basis in line with a risk management or investment strategy.

Note 2 - Summary of Significant Accounting Policies, continued

c) Embedded derivatives in hybrid financial instruments

Embedded derivatives in other financial instruments or in other host contracts are accounted for separately as financial derivatives contracts when the following criteria are met:

- Its risks and characteristics are not directly related with those of the host contract.
- A separated instrument with same characteristics of the embedded derivative meets the derivative instrument definition, and
- The host contract is not classified as “other financial assets (liabilities) at FVTPL” or as “trading instruments”.

d) Reclassifications

Reclassification of financial assets is required if, and only if, the objective of the Bank's business model for managing those financial assets changes. Financial liabilities cannot be reclassified. There are no reclassifications in these Consolidated Financial Statements.

ii. Measurement of financial instruments

a) Initial measurement

On initial recognition, financial assets and liabilities are measured at the transaction price, i.e. the fair value of the consideration given or received (IFRS 13). In the case of financial instruments that are not measured at fair value through profit or loss, transaction costs of financial assets and financial liabilities recorded at fair value are recorded in profit or loss.

b) Subsequent measurement - Financial assets

After initial recognition, the Bank will measure a financial asset at:

i. Amortized cost

Financial assets that are held in a business model to collect contractual cash flows and contain contractual terms that give rise on specified dates to cash flows that are SPPI are measured at amortized cost.

The effective rate method is used in the calculation of the amortized cost of a financial asset or financial liability and in the allocation and recognition of interest income or interest expense in profit or loss for the relevant year. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash payments or collection through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or the amortized cost of a financial liability.

Note 2 - Summary of Significant Accounting Policies, continued

The net impairment losses of the assets recorded in these items occurring in each year are determined in accordance with IFRS 9, except for assets classified under the compendium as "due from banks", "loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. For purposes of recording the impairment loss, this is recorded under the caption "Provisions for credit risk due from banks and loans and accounts receivable from customers" and "Impairment for credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Consolidated Statements of Income. See note 41 "Credit loss expense".

ii. Fair value through other comprehensive income (FVTOCI)

Financial assets that are debt instruments held in a business model that is achieved through the collection of contractual cash flows and sale, and that contain contractual terms that result on specified dates in cash flows that are SPPI, are measured at FVTOCI. They are subsequently remeasured at fair value and changes in fair value (except for those related to impairment, interest income and foreign exchange gains and losses) are recognized in other comprehensive income, until the assets are sold. At the time of disposal, gains and losses accumulated in other comprehensive income are recognized in the Consolidated Statement of Income.

On the other hand, the net impairment losses on financial assets at fair value through other comprehensive income occurring during the year are recorded under the item "Impairment due to credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Consolidated Statements of Income. (See Note 41).

Interest income on these instruments is recorded in the consolidated income and loss account for that year. Exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Consolidated Statements of Income.

iii. Fair value through profit or loss (FVTPL)

The caption "Financial assets held for trading at fair value through profit or loss" includes financial assets whose business model is intended to generate profits through the realization of purchases and sales or to generate results in the short term.

Financial assets recorded under "Financial assets not held for trading mandatorily measured at fair value through profit or loss" are assigned to a business model whose objective is achieved by obtaining contractual cash flows and/or selling financial assets but the contractual cash flows have not met the conditions of the SPPI test. Financial assets are classified under "Financial assets designated at fair value through profit or loss" only when such designation eliminates or significantly reduces the inconsistency in valuation or recognition that would arise from valuing or recognizing the assets on a different basis.

Note 2 - Summary of Significant Accounting Policies, continued

The assets recorded in these captions of the Consolidated Statements of Financial Position are valued after their acquisition at fair value and the changes in their value (gains or losses) are recorded, at their net amount, in the items "Financial income or loss from financial assets and liabilities held for trading" and "Financial income or loss from financial assets not held for trading mandatorily valued at fair value through profit or loss" of the Consolidated Statements of Income.

Changes arising from exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Consolidated Statements of Income.

iv. Financial assets not held for trading mandatorily measured at fair value through profit or loss

Under this item, they are allocated to a business model the objective of which is achieved by obtaining contractual cash flows and/or by selling financial assets, but where the contractual cash flows have not met the SPPI test conditions. The assets recorded under this item of the Consolidated Statement of Financial Position are measured subsequently to their acquisition at fair value and their market value variations are recorded, at their net amount, under "Financial income (loss), net".

v. Equity instruments

For certain equity instruments, the Bank may make an irrevocable election to present subsequent changes in the fair value of the instrument in other comprehensive income, except for dividend income which is recognized in profit or loss.

Gains or losses on derecognition of these equity instruments are not transferred to income. These instruments are not subject to the impairment model of IFRS 9.

c) Subsequent measurement - Financial liabilities

After initial recognition, the Bank will measure a financial liability at amortized cost, except for derivatives that are measured at fair value through profit or loss.

iii. Derecognition of financial assets and liabilities

Financial assets are derecognized when, and only when:

- The contractual rights to the cash flows from the financial asset expire, or
- The Bank transfers substantially all the risks and rewards of ownership of the financial asset, and therefore the Bank derecognizes the financial asset and separately recognizes the rights and obligations created or retained in the transfer.

Note 2 - Summary of Significant Accounting Policies, continued

In some cases, the Bank enters into transactions whereby it retains the contractual rights to receive the cash flows from the financial asset, but assumes a contractual obligation to pay the cash flows in an arrangement that meets all the required conditions, that is, the Bank only transfers the cash flows collected.

Amounts of the original assets, the original assets are prohibited from being sold or pledged, and the Bank has an obligation to send the cash flows collected without significant delay.

When a financial asset is sold and the Bank simultaneously agrees to repurchase it (or an asset that is substantially the same) at a fixed price on a future date, the Bank continues to recognize the financial asset in its entirety in the Statements of Financial position because it retains substantially all the risks and rewards of ownership. The cash consideration received is recognized as a financial asset and a financial liability is recognized for the obligation to pay the repurchase price.

Financial liabilities are derecognized when, and only when, they are extinguished, canceled or mature.

a) Derecognition due to substantial modification of terms and conditions

The Bank derecognizes a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that it has essentially become a new asset, with the difference recognized as a gain or loss on derecognition, to the extent that an impairment loss has not yet been recorded.

A change in terms and conditions does not result in derecognition if it does not result in cash flows that are substantially different. Based on the change in cash flows discounted at the original Effective Interest Rate ("EIR"), the Bank records a gain or loss on modification, to the extent that an impairment loss has not yet been recorded. For financial liabilities, the Bank considers a substantial modification based on qualitative factors, and if it results in a difference between the adjusted discounted present value and the original carrying amount of the financial liability of ten percent or more. For financial assets, this assessment is based on qualitative factors.

iv. Renegotiated and modified loans

The Bank in certain situations makes concessions or modifications to the original terms of loans in response to the borrower's financial difficulties, in lieu of taking possession or enforcing collection of collateral, or in some cases to renegotiate loans. The Bank considers a loan modified when such concessions are made as a result of the borrower's present or expected financial difficulties and the Bank would not have accepted them had the borrower been in good financial standing. Indicators of financial difficulties include covenant defaults and/or significant additional history identified by the Credit Risk area. Modification may involve extending payment terms and agreeing to new loan terms. It is the Bank's policy to monitor refinanced loans to help ensure that future payments are probable.

If the modifications are substantial, the loan is written off, as explained in "III. Derecognition of financial assets and liabilities". If the terms have been renegotiated without resulting in the derecognition of the loan, any impairment is measured using the original EIR calculated prior to the modification of the terms. The Bank also reassesses whether there has been a significant increase in credit risk and whether the assets should be classified in another credit risk portfolio.

Note 2 - Summary of Significant Accounting Policies, continued

Derecognition decisions and classifications in the substandard and non-performing portfolios are determined on a case-by-case basis. If these procedures identify a loss related to a loan, it is disclosed and managed as a refinanced asset of the impaired non-performing portfolio until collected or paid.

v. Contingent Credits

The Bank provides standby loans (including letters of credit, foreign letters of credit and performance bonds) and loan commitments.

Contingent loans and unused loan commitments are commitments under which, during the term of the commitment, the Bank is obligated to provide a loan with a pre-specified term to the customer.

The face value of the contractual loan, when the agreed loan is on market terms, is not recorded in the Statement of Financial Position. The related provision for expected credit loss is disclosed in Note 24 "Provisions for contingencies", letter b).

vi. Offsetting

Financial assets and financial liabilities are offset in the Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle them on a net basis, or to realize the asset and settle the liability simultaneously.

vii. Derivatives and hedging activities

The Bank has decided to continue to apply the hedge accounting requirements of IAS 39 when adopting IFRS 9.

For presentation purposes, derivatives are presented according to their positive or negative fair value as assets or liabilities, respectively, and include trading and hedging instruments separately (see Notes 8 "Financial assets held for trading through profit or loss" and Note 12 "Financial derivative contracts for accounting hedges").

a) Hedging transactions

The Bank uses financial derivatives for the following purposes:

- i. To sell to customers who request these instruments in the management of their market and credit risks.
- ii. To use these derivatives in managing the risks of the Bank's own positions and assets and liabilities of the Bank's entities ("hedging derivatives"); and
- iii. To obtain gains from changes in the price of these derivatives ("trading derivatives").

Note 2 - Summary of Significant Accounting Policies, continued

All financial derivatives that are not held for hedging purposes are accounted for as trading derivatives.

A derivative qualifies for hedge accounting if all of the following conditions are met:

- i. The derivative hedges one of the following three types of risks to which the Bank is exposed:
 - a) Changes in the value of assets and liabilities due to fluctuations, among others, in the interest rate and/or exchange rate to which the position or balance to be hedged is subject ("fair value hedge");
 - b) Changes in the estimated cash flows derived from financial assets and liabilities, and highly probable forecast transactions ("cash flow hedge");
 - c) The net investment in a foreign operation ("hedge of a net investment in a foreign operation").
- ii. It is effective in offsetting the exposure inherent in the hedged item or position over the expected term of the hedge, which means that:
 - a) At the trade date the hedge is expected, under normal conditions, to be highly effective ("prospective effectiveness").
 - b) There is sufficient evidence that the hedge was effective during the life of the hedged item or position ("retrospective effectiveness").

There must be adequate documentation evidencing the specific designation of the financial derivative to hedge certain balances or transactions and how this effective hedge was expected to be achieved and measured, provided that it is consistent with the Bank's own risk management.

Changes in the value of financial instruments that qualify for hedge accounting are recorded as follows:

- a. For fair value hedges, gains or losses arising on both hedging instruments and hedged items (attributable to the type of risk being hedged) are included as "Financial income (loss) from Financial Asset and Liabilities for trading" in the Consolidated Statement of Income.
- b. For fair value hedges of interest rate risk in a portfolio of financial instruments, gains or losses arising on measurement of the hedging instruments within "Interest income and expense", and other gains or losses due to changes in the fair value of the underlying hedged item (attributable to the hedged risk) are recorded in the Consolidated Statement of Income (Loss) under "Net trading income (expense)".
- c. For cash flow hedges, the effective portion of the fair value of the hedging instrument is included as "Cash flow hedges" in the Consolidated Statements of Other Comprehensive Income".
- d. The valuation differences of the hedging instrument corresponding to the ineffective portion of cash flow hedging transactions are recorded directly in the Consolidated Statement of Income under "Net income (expense) from financial operations".

Note 2 - Summary of Significant Accounting Policies, continued

If a derivative designated as a hedging instrument ceases to meet the conditions described above due to maturity, ineffectiveness or any other reason, the hedge accounting treatment is discontinued. When the "fair value hedge" is discontinued, the fair value adjustments to the carrying amount of the hedged item arising from the hedged risk are amortized to profit or loss as of that date, as appropriate.

Sources of hedge ineffectiveness may arise from basis risk, including, but not limited to, discount rates used to calculate the fair value of derivatives, hedges using instruments with a fair value other than zero, and timing and notional differences between hedged items and hedging instruments.

When cash flow hedges are discontinued, any cumulative gain or loss on the hedging instrument recognized in "Statements Other Comprehensive Income" (from the year in which the hedge was effective) remains recorded in equity until the hedged transaction occurs, at which time it is recorded in the Consolidated Statement of Income, unless the transaction is no longer expected to occur, in which case any cumulative gain or loss is recorded immediately in the Consolidated Statement of Income.

(m) Measurement and techniques used in determining fair value

In general terms, financial assets and liabilities are initially recognized at fair value, which, unless there is evidence to the contrary, is considered to be the transaction price. Financial instruments, other than those measured at fair value through profit or loss, are initially recognized at fair value plus transaction costs. Subsequently, and at the end of each reporting year, financial instruments are valued in accordance with the following criteria:

(i) Measurement of financial instruments

Financial assets are measured at fair value, gross of any transaction costs that may be incurred in the course of a sale, except for loans and receivables from customers.

In accordance with IFRS 13 "Fair value measurement", "fair value" is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In measuring fair value, an entity shall take into account the characteristics of the asset or liability if market participants would take those characteristics into account in pricing the asset or liability at the measurement date.

The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place:

- In the main market for the asset or liability, or
- In the absence of a main market, the most advantageous market for the asset or liability.

Note 2 - Summary of Significant Accounting Policies, continued

Even if there is no observable market that provides pricing information in relation to the sale of an asset or transfer of a liability at the measurement date, the fair value measurement shall assume that the transaction takes place, considered from the perspective of a potential market participant who intends to maximize the value associated with the asset or liability.

In using valuation techniques, the Bank shall maximize the use of relevant observable inputs and minimize the use of available unobservable inputs. If an asset or liability measured at fair value has a bid price and a ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used to measure fair value, regardless of where the input is classified within the fair value hierarchy (i.e. Level 1, 2 or 3). IFRS 13 establishes a fair value hierarchy that classifies inputs to valuation techniques used to measure fair value into three levels.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

All derivatives are recorded in the Consolidated Statements of Financial Position at the fair value described above. This value is compared to the valuation on the trade date. If the fair value is subsequently measured positive, it is recorded as an asset. If the fair value is subsequently measured negative, it is recorded as a liability. The fair value on the trade date is, unless there is evidence to the contrary, considered to be the transaction price.

Changes in the fair value of derivatives since the trade date are recorded in "Financial income (loss)" in the Consolidated Statements of Income.

Specifically, the fair value of financial derivatives included in portfolios of financial assets or liabilities held for trading is considered to be their daily quoted price. If, for exceptional reasons, the quoted price cannot be determined on a given date, the fair value is determined using methods similar to those used to measure over-the-counter derivatives.

The fair value of OTC derivatives is the sum of the future cash flows resulting from the instrument, discounted to present value at the valuation date ("present value" or "theoretical close") using valuation techniques commonly used in financial markets: "net present value" (NPV) and option valuation models, among other methods.

In addition, the fair value of derivatives includes the CVA and DVA adjustment, so that the fair value of each instrument includes the credit risk of its counterpart and the Bank's own risk. The credit valuation adjustment (CVA) is a valuation adjustment of OTC derivatives as a consequence of the risk associated with the credit exposure assumed by each counterpart. The CVA is calculated taking into account the potential exposure to each counterpart in each future year. The debit valuation adjustment (DVA) is a valuation adjustment similar to the CVA but, in this case, arises as a consequence of the Bank's own risk assumed by its counterparts in OTC derivatives.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Valuation techniques

Financial instruments at fair value, determined on the basis of quoted prices in active markets, include government debt securities, private sector debt securities, equity shares, short positions and fixed income securities issued.

In cases where price quotations are not observable in available markets, the Bank's management determines the best estimate of the price that would be set by the market using its own internal models. In most cases, these models use data based on observable market parameters as significant inputs; however, for some financial instrument valuations, significant inputs are not observable in the market. To determine a value for these instruments, various techniques are used to make these estimates, including extrapolation of observable market data.

The most reliable evidence of the fair value of a financial instrument at initial recognition is usually the transaction price; however, due to the unavailability of market information, the value of the instrument may be derived from other market transactions involving the same or similar instruments or may be measured using a valuation technique in which the inputs used include only observable market data, principally interest rates.

The main techniques used as of December 31, 2024 and 2023 by the Bank's internal models to determine the fair value of financial instruments are as follows:

- i. The present value method is used in the valuation of financial instruments that allow static hedges (mainly forwards and swaps). The estimated future cash flows are discounted using interest rate curves of the related currencies. Interest rate curves are generally observable market data.
- ii. In the valuation of financial instruments requiring dynamic hedging (mainly structured options and other structured instruments), the Black-Scholes model is typically used. Where appropriate, observable market data is used to derive factors such as bid spread, exchange rates, volatility, correlation indicators and market liquidity.
- iii. In the valuation of certain financial instruments exposed to interest rate risk, such as interest rate futures, caps and floors, the present value method (futures) and the Black-Scholes model (plain vanilla options) are used. The main inputs used in these models are observable market data, including interest rate curves, volatilities, correlations and related exchange rates.

The fair value of financial instruments calculated by the aforementioned internal models considers contractual terms and observable market data, including interest rates, credit risk, exchange rates, stock price, volatility and prepayments, among others. The Bank's management believes that its valuation models are not significantly subjective, as these methodologies can be adjusted and evaluated, as appropriate, through internal calculation of fair value and subsequent comparison with the related actively quoted price (See note 44).

Note 2 - Summary of Significant Accounting Policies, continued

n) Revenue and expense recognition

The following is a summary of the most significant criteria used by the Bank for the recognition of its revenues and expenses:

(i) Interest income, interest expense and similar items

Interest income, interest expense and similar items are recognized on an accrual basis using the effective interest rate method.

However, when an operation is evaluated either individually or collectively, and as a result of such evaluation the loan is recognized as part of the impaired portfolio (the compendium Cap. B2 numeral 1 letter b) and presents default for equal to or greater than 90 days in any of their installments, the recognition of income on the accrual basis is suspended.

The suspension of revenue recognition on an accrual basis implies that, from the date on which it should be suspended in each case and until such loans are no longer impaired, the respective assets included in the Consolidated Statement of Financial Position will not be increased by interest, adjustments or commissions and no revenue for these items will be recognized in the Consolidated Statement of Income, unless they are actually received. These standards only refer to the criteria for valuation and recognition of income for financial accounting information.

Interest income from “transactions with accrual suspended” is only re-recorded when such transactions become current (that is, payments were received that make them less than 90 days past due) and when they are no longer in the impaired portfolio.

(ii) Dividends received

Dividends received from investments in other companies are recognized on income when the right to receive them arises and are recorded in the item “Income from investments in companies”.

Note 2 - Summary of Significant Accounting Policies, continued

(iii) Commissions, fees and similar items

Income and expenses from commissions and fees are recognized in the Consolidated Statement of Income using the criteria established in IFRS 15 "Revenue from contracts with customers", based on consideration of the terms of the contract with the customers, excluding amounts collected on behalf of third parties. Revenue is recognized when performance obligations are satisfied by transferring a promised good or service to a customer, which is evidenced by transferring control over an asset or the rendering of a service:

Commissions recorded by the Bank correspond mainly to:

- Line of credit and overdraft commissions: includes earned commissions during the year related to lines of credit granted and checking accounts overdrafts.
- Guarantee and letters of credit fees: includes earned commissions during the year related to bank guarantees granted over actual or contingent obligations to third parties.
- Credit card fees: includes earned and received commissions during the year related to credit and debit cards usage.
- Accounts management fees: includes earned fees related to maintenance of checking accounts, savings accounts, and other accounts.
- Collection and payment services fees: includes fee income related to collection services as well as payment services rendered by the Bank and its subsidiaries.
- Brokerage and securities management fees: includes fee income related to financial assets brokerage and securities management and custody.
- Insurance brokerage fees: includes insurance brokerage fees.
- Other fee and commissions: includes income arising from currency exchange, financial advisory services, cashier checks issuance, placement of financial products and online banking services.

Commission expenses include:

- Cards transactions fees: includes credit and debit card transaction fees related to income generated in those transactions.
- Securities transactions fees: includes fees related to custody of securities and securities brokerage.
- Other fees and commissions: includes mainly expenses generated from online services.

The Bank grants a group of benefits to its cardholders for which, in accordance with IFRS 15, has established provisions enough to comply with its performance obligations when these benefits become enforceable.

(iv) Non-financial income and expenses

They are recorded in accordance with IFRS 15, identifying the performance obligations, allocating the transaction price to separate performance obligations, and recognizing income when these are satisfied.

Note 2 - Summary of Significant Accounting Policies, continued

(v) Loan arrangement fees

Fees that arise from loans arrangement, opening accounts, study and information fees, they are accrued and recognized on a systematic basis on the Consolidated Statement of Income throughout the life of the loan. In the case of arrangement fees, the portion corresponding to the related direct costs incurred in the formalization of such transactions are immediately recorded in the income statement.

o) Impairment

Assets are acquired or purchased based on the future economic benefits they produce. Consequently, impairment is recorded when the carrying amount of such assets is less than their recoverable amount. Assets are subject to impairment tests to adequately reflect the future economic benefits that the assets are capable of producing when used by the Bank.

The Bank assesses the expected future credit losses ("ECL") associated with its financial instrument assets carried at amortized cost and FVTOCI, subject to the limitations defined in paragraph 5 of Chapter A-2 of the Compendium of Accounting Standards. The Bank recognizes a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased, probability-weighted amount determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Bank follows the criteria described below to assess impairment, when applicable:

(i) Impairment of financial assets except "Interbank Loans", "Loans and receivables from customers and "Contingent loans".

The Bank applies IFRS 9 to determine the impairment of its financial assets at amortized cost and at fair value through other comprehensive income, except for "Interbank Loans", "Loans and accounts receivable from customers" and "Contingent loans", whose impairment is determined by applying the provisions of Chapter B1, B2 and B3 of the compendium, for the rest of the assets the following is applicable.

IFRS 9 introduces the concept of "expected losses" which is developed in the credit risk model applied by the Bank. The "expected loss" impairment model is applied to financial assets measured at amortized cost, debt instruments measured at fair value through other comprehensive income, financial guarantee contracts and other commitments. All financial instruments measured at fair value through profit or loss are excluded from the impairment model. The standard classifies financial instruments into three categories, which depend on the evolution of their credit risk from the time of initial recognition, and which determine the calculation of their credit risk hedges.

Note 2 - Summary of Significant Accounting Policies, continued

Stage 1: No significant increase in risk: "The allowance for losses on these financial instruments is calculated as the expected credit losses resulting from possible events of default within 12 months after the reporting date (12-month expected loss)."

Stage 2: With significant increase in risk: "When the credit risk of a financial asset has increased significantly since initial recognition, the allowance for losses on that financial instrument is calculated as the expected credit loss over the entire life of the transaction. In other words, it is the expected credit losses resulting from all possible events of default during the expected life of the financial instrument".

Stage 3: Impairment: "When there is objective evidence that the financial asset is impaired, it is transferred to this category in which the write-down for losses on that financial instrument is calculated, as in Stage 2, as the expected credit loss over the life of the asset."

In cases in which the recovery of any recorded amount is considered remote, the asset is removed from the consolidated balance sheet, without prejudice to any actions that may be taken to attempt to collect the amount until the rights to receive it have been extinguished definitively, whether by expiration, forgiveness or other causes.

The Bank takes into account reasonable and supportable information that is available without undue cost or effort and that may affect the credit risk of a financial instrument, including forward-looking information to determine a significant increase in credit risk since initial recognition. Forward-looking information includes past events, current conditions and expected or future economic conditions (macroeconomic data).

Credit risk assessment and forward-looking information (including macroeconomic factors), includes quantitative and qualitative information based on the Bank's historical experience, examples include:

- Financial or economic conditions that are expected to cause a significant change in the borrower's ability to meet its debt obligations.
- An actual or expected downgrade of the borrower's internal credit rating or a decrease in the borrower's performance score.
- An actual or expected significant change in the borrower's operating results.
- Significant increases in credit risk on other financial instruments of the same borrower.
- Significant changes in the value of the collateral backing the obligation or in the quality of third-party guarantees or credit enhancements.
- Reductions in financial support from a parent entity or other subsidiary.
- Expected changes in the loan documentation, including an expected breach of contract that may result in waivers or modifications of covenants, suspension of interest payments, increased interest rates, requirements for additional collateral or guarantees, or other changes in the contractual framework of the facility.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank has considered that if contractual payments are more than 30 days past due, credit risk is considered to have increased significantly since the initial recognition of the credit, but this is not an absolute indicator.

The Bank has not rebutted the IFRS 9 presumption of significant increase in risk ("SIR") or default.

Regarding the use of present, past and future information required by the application of the expected loss approach described in IFRS 9, this requires the incorporation of present, past and future information for both the detection of significant increase in risk and the measurement of expected losses, which should be performed on a probability-weighted basis. When estimating expected losses, the standard does not require the identification of all possible scenarios. However, the probability of a loss event occurring and the probability of it not occurring must be considered, even if the possibility of a loss occurring is very low.

To achieve this, the Bank evaluates the linear relationship between its estimated loss parameters (PD, LGD, and EAD) with the history and future forecasts of macroeconomic scenarios. Also, when there is no linear relationship between the different future economic scenarios and their associated expected losses, more than one future economic scenario should be used for the estimation.

Expected losses are then derived from the following parameters:

PD: Estimate of the probability of default in each year.

EAD: Estimate of the exposure in the event of default in each future period, taking into account changes in exposure after the reference date of the Financial Statements.

LGD: Estimated loss given default, as the difference between the contractual cash flows and those expected to be received, including collateral. For these purposes, the estimate considers the probability of execution of the guarantee, the time until possession and subsequent realization is reached, the expected cash flows and the acquisition and sale costs.

CCF: Cash Conversion Factor, is the estimate made on off-balance sheet balances to determine the exposure subject to credit risk in the event of default.

The expected credit losses calculated are based on the internal models developed for all portfolios within the scope of IFRS 9, except for those cases that are subject to individualized estimation. Internal models have been developed that take into account as sources of information the data provided by external rating agencies or others observed in the market, such as changes in bond yields, credit default swap quotes or any other public information on them.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Non-financial assets

The carrying amounts of the Bank's non-financial assets are reviewed regularly or at least at each reporting date to determine whether there is any indication of impairment. If such indications exist, then the recoverable amount of the asset is estimated. The recoverable amount of an asset is the higher of fair value less costs to sell and value in use. That recoverable amount is determined for an individual asset, unless the asset does not generate cash flows that are substantially independent of the cash flows from other assets or group of assets.

When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and its value is reduced to its recoverable amount.

The recoverable amount is the higher of fair value less costs to sell and value in use. If we assess the value in use of an asset, the estimated cash flows are discounted to their present value by applying a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

The Bank shall assess at the end of each reporting year whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased. If any such indication exists, the entity shall estimate the recoverable amount of that asset. In assessing whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased, an entity shall consider, as a minimum, external sources of information (the asset's value has increased significantly during the year; significant changes with a favorable effect on the entity have taken place during the year, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which the asset is dedicated; market interest rates or other market rates of return on investments have decreased during the year, and those decreases are likely to affect the discount rate used in calculating the asset's value in use and increase the asset's recoverable amount materially) and internal sources of information such as significant changes with a favorable effect on the entity have taken place during the year, or are expected to take place in the near future, in the extent to which, or manner in which, the asset is used or is expected to be used. These changes include costs incurred during the year to improve or enhance the asset's performance or restructure the operation to which the asset belongs. In the case of goodwill and indefinite useful life intangible assets or not yet available for use, the recoverable amount is estimated annually, at year end.

When impairment exists the carrying amount of the asset shall be reduced to its recoverable amount if, and only if, the recoverable amount of an asset is less than its carrying amount. This reduction is an impairment loss.

Note 2 - Summary of Significant Accounting Policies, continued

The impairment loss is recognized immediately in income, unless the asset is carried at its revalued value in accordance with another standard. Any impairment loss on revalued assets will be treated as a decrease in the revaluation made in accordance with that other standard. When the amount estimated for an impairment loss is greater than the carrying amount of the asset to which it relates, the Bank shall recognize a liability if, and only if, that is required by another standard. After the recognition of an impairment loss, the depreciation (amortization) charge for the asset shall be adjusted in future years to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

If an impairment loss is recognized, any related deferred tax assets or liabilities are determined in accordance with IAS 12 "Income taxes" by comparing the revised carrying amount of the asset with its tax base.

Impairment losses recognized in prior years are tested at each reporting date for any indication that the loss has decreased or disappeared. An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(iii) Goodwill

Goodwill is tested annually in order to determine if impairment losses exist and whenever there is an indication that the carrying value may be impaired. The impairment of goodwill is determined by evaluating the recoverable amount of each CGU (or group of CGU) to which the goodwill relates. An impairment loss is recognized when the recoverable amount of the CGU is less than its carrying amount.

For the purpose of impairment testing, goodwill acquired in a business combination shall, from the acquisition date, be allocated to each of the acquirer's cash-generating units, or groups of cash-generating units irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. An impairment loss recognized for goodwill shall not be reversed in a subsequent years.

According to IAS 36 "Impairment of assets" the annual impairment test for a cash-generating unit to which goodwill has been allocated or for intangible assets with indefinite useful lives may be performed at any time during an annual year, as long the test is performed at the same time every year. Different cash-generating units may be tested for impairment at different times.

p) Fixed assets

Items of fixed assets are measured at acquisition cost, net of accumulated depreciation and impairment, if any.

In addition to the price paid to acquire each item, the cost also includes, where applicable, the capitalized cost. The capitalized cost includes expenses attributed directly to the asset acquisition and any other costs directly attributable to the process of placing the asset in conditions to be used.

Note 2 - Summary of Significant Accounting Policies, continued

When some part of an item of the fixed assets has a different useful life to that fixed asset, it is recognized as a separate component (significant components of fixed assets).

This item includes the amounts of property, land, furniture, vehicles, technological equipment, and other facilities own by the consolidated entities or acquired under financial leases. These assets are classified based on their use in:

(i) Fixed assets for own use

Fixed assets for own use includes, but is not limited to, tangible assets received by the consolidated entities in full or partial satisfaction of financial assets representing accounts receivable from third parties which are intended to be held for continuing own use and tangible assets acquired under finance leases. These assets are recorded at acquisition cost less the related accumulated depreciation and, if applicable, any impairment losses (when net carrying amount was higher than recoverable amount). For accounting purposes, acquisition cost of the received asset is considered to be its net amount.

Depreciation is calculated using the straight line method over the acquisition cost of assets less their residual value, assuming that the land on which buildings and other structures stand has an indefinite life and, therefore, is not subject to depreciation. Fixed assets in leased properties are depreciated over the shorter period of time between their useful lives or the term of the lease, unless it is certain that the Bank will acquire the property at the end of the lease.

The consolidated entities assess at each reporting date whether there is any indication that the carrying amount of any tangible asset exceeds its recoverable amount. If this is the case, the carrying amount of the asset is reduced to its recoverable amount and future depreciation charges are adjusted in accordance with the revised carrying amount and to the new remaining useful life.

In a similar manner, when indication exists that a material asset has recovered its value, the consolidated entities recognize the impairment loss reversal and the future depreciation charges are adjusted accordingly. In no case the impairment loss reversal of an asset can increase its value over the initial value as it no impairment losses were recognized in previous years.

Also, at least at the end of the year, the estimated useful lives of the items of property, plant and equipment for own use are reviewed in order to detect significant changes therein, which, if any, will be adjusted by means of the corresponding correction of the charge to the consolidated statement of income for future years, by recalculating the depreciation, by virtue of the new useful lives.

Upkeep and maintenance expenses relating to tangible assets held for own use are recorded as an expense in the year in which they are incurred.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Assets leased out under operating leases

The criteria used to record the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives, and to record the impairment losses thereof, are consistent with those described in relation to fixed assets held for own use.

q) Intangible assets

Intangible assets are identified as non-monetary assets (separately identifiable from other assets) without physical substance which arise as a result of legal or contractual rights, internally developed by the consolidated entities, as well as those generated in a business combination. These are assets for which the cost can be reliably measured and it is probable that future economic benefits attributable to the asset will flow to the Bank. The cost of intangible assets acquired or originated in a business combination correspond to its fair value at the acquisition date.

Intangible assets are recorded initially at acquisition or production cost and are subsequently measured at cost less any accumulated amortization and any accumulated impairment losses.

The Bank shall assess whether the useful life of an intangible asset is finite or indefinite and, if finite, the length of, or number of production or similar units constituting, that useful life. An intangible asset shall be assessed by the Bank as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Bank.

The accounting for an intangible asset is based on its useful life. An intangible asset with a finite useful life is amortized over its economic useful life and is reviewed to determine whether there was any indication that the intangible asset may have suffered any impairment, the period and method of amortization are reviewed at least at the end of each reporting year. An intangible asset with an indefinite useful life is not amortized. The Bank tests for impairment by comparing its recoverable amount with its carrying amount annually and whenever there is an indication that the intangible asset may be impaired.

(i) Software

The software acquired by the Bank is recognized at cost less the accumulated amortization and impairment, if any.

The expenses in software developed internally are recorded as assets when the Bank is capable of proving its intention and ability to complete development, when internal use will generate future economic benefits and/or decrease in costs, and when the cost of completing its development can be reliably measured. The capitalized costs of the software developed internally include all the direct costs attributable to the development of the software, and it is amortized over the course of its useful life. Software developed internally is recorded at cost less the accumulated amortization and losses from impairment.

Note 2 - Summary of Significant Accounting Policies, continued

The subsequent expenditures associated with the asset are capitalized only when future economic benefits from them will flow to the Bank. The rest of the expenditures are recognized in income.

Intangible assets are amortized on a straight-line basis over their estimated useful life; starting on the date it is ready for use.

(ii) Generated in a business combination

According to IFRS 3 “Business Combinations”, when an intangible asset is acquired or generated in a business combination its cost will be the fair value at the acquisition date. The fair value of an intangible asset represents expectations of market participants at the acquisition date over the probability that future economic benefits from the asset will flow to the entity. In other words, the entity expects that economic benefits flow to them, even though there is uncertainty about the date or the amount of them.

As set forth by IAS 38 “Intangibles Assets” and IFRS 3, the acquirer will recognize an intangible asset from the acquiree at the acquisition date separately from Goodwill independently if the asset was previously recognized by the acquiree before the business combination.

In connection with the aforementioned, the business combination between Itaú Chile and CorpBanca gave rise to intangible assets and Goodwill as indicated in Note 15 “Intangible Assets”.

(iii) Other identifiable intangible assets

Correspond to those intangible assets that can be identified, the Bank controls them, can be reliably measured and it is probable that future benefits will flow to the Bank.

r) Factoring transactions

The Bank performs operations with their clients, in which they receive invoices and other credit representative trading instruments with or without recourse to the transferor, anticipating a percentage of the total amount receivable of the borrower upon collection. These transactions are valued at the disbursed amounts by the Bank in exchange for invoices or other credit representative trading instruments.

The price differences between the disbursed amounts and the nominal amount of the documents are recorded in the Consolidated Statement of Income as interest income applying the effective interest rate method, over the term of the transaction. The responsibility of payment of the documents remains with the client (assignor).

Note 2 - Summary of Significant Accounting Policies, continued

s) Leases

On the date of commencement of a lease the Bank recognizes an asset for right of use and a liability for lease in accordance with the provisions of IFRS 16 "Leases".

(i) Assets for right-of-use

At the beginning of a lease, the right-of-use asset is measured at cost. The cost includes:

- (a) the amount of the initial measurement of the lease liability
- (b) lease payments made before or from the start date, less lease incentives received
- (c) the initial direct costs incurred by the lessee
- (d) a modification of the costs to be incurred by the lessee when dismantling and eliminating the underlying asset, restoring the place in which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

After the initial recognition date, the Bank measures the assets by right of use applying the cost model, which is defined as the asset by right of use measured at cost (a) less accumulated depreciation and accumulated risk losses of value; and (b) adjusted for any new measurement of the lease liability.

The Bank applies the depreciation requirements established by IAS 16 "Property, plant and equipment" over the right-of-use in these type of transactions.

If the lease transfers ownership of the underlying asset to the Bank at the end of the lease term or if the cost of the right-of-use asset reflects that the Bank exercises a purchase option, the Bank depreciates the right-of use asset from the date of beginning of it until the end of the useful life of the underlying asset. In another case, the Bank depreciates the asset by right of use from the start date until the end of the useful life of the asset whose right of use has or until the end of the lease term, whichever comes first.

The Bank applies IAS 36 "Impairment of assets" to determine if the right-of-use asset presents changes in value and accounts for identified value risk losses.

As of December 31, 2024 and 2023, the Bank has not identified impairment in the value of the right-of-use assets.

(ii) Lease liability

The Bank measures the lease liability at the present value of lease payments that have not been paid as of that date. Lease payments are discounted using the interest rate implicit in the lease, if that rate could be easily determined. Since that rate cannot be easily determined, the Bank uses the incremental rate for loans (cost of funding).

Note 2 - Summary of Significant Accounting Policies, continued

The lease payments included in the measurement of the lease liability determined the payments for the right of use the underlying asset during the term of the not cancelable lease at the measurement date which includes:

- fixed payments, less any lease incentive receivable;
- variable lease payments, which depends on an index or rate, recently measured using the index or rate on the start date;
- it matters that the lessee expects to pay as residual value guarantees;
- the exercise price of a purchase option if the lessee is reasonably sure to exercise that option; and
- payments for penalties arising from the termination of the lease, if the term of the lease reflects that the lessee exercises an option to terminate the lease.

After the date of initial recognition, the Bank measures the lease liability in order to recognize:

- the interest on the lease liability;
- lease payments made; and
- the new measurements or modifications of the lease, and also for fixed lease payments that have essentially been reviewed.

The Bank makes new measures of the lease liability discounting the modified lease payments, if (a) there is a change in the expected amounts payable related to a residual value guarantee. A lessee will determine the lease payments to determine the change in the amounts expected to be paid under the residual value guarantee; (b) there will be a change in future lease payments determined from a change in an index or a rate used to determine those payments.

The Bank measures the lease liability again to modify the modified lease payments only when there is a change in cash flows. The Bank will determine the revised lease payments, for the remainder of the lease term, based on the revised contractual payments.

The Bank measured the lease liability at the present value of the lease payments discounted using the incremental interest rate for loans (cost of funding).

t) Provisions for credit risk on "Interbank Loans" and "Loans and accounts receivable from customers"

The Bank has established provisions for impairment losses due to credit risk on "Interbank Loans", "Loans and receivables from customers" and "Contingent loans", in accordance with the instructions defined in the compendium, issued by the Commission for the Financial Market (CMF), and the credit risk rating and evaluation models approved by the Bank's Corporate Governance, in order to make the necessary and sufficient provisions in a timely manner to cover the expected losses associated with the characteristics of the debtors and their receivables, which determine the payment behavior and subsequent recovery.

Note 2 - Summary of Significant Accounting Policies, continued

The processes and compliance with the policy are evaluated and supervised in accordance with internal control procedures, in order to ensure compliance and the maintenance of an adequate level of provisions to support expected losses.

Provisions determined and denominated "individual allowances", correspond to debtors that are individually, assessed due to size, complexity or level of exposure to the Bank, it is necessary to know and analyze in detail.

Provisions determined and denominated "group allowances", includes individuals or smaller companies, and are associated to a high number of transactions with homogeneous characteristics and that due to such conditions are evaluated collectively.

In order to establish allowances for loan losses, an assessment of the loans and contingent loans portfolios is performed as indicated below:

- Individual allowances for the normal portfolio.
- Individual allowances for the substandard portfolio.
- Individual allowances for the impaired portfolio.
- Group allowances for the normal portfolio.
- Group allowances for the impaired portfolio.

(i) Individual allowances

When a debtor is considered as individually significant, i.e. with significant levels of debt and for those ones that are not significant but cannot be classified in groups of financial assets with homogeneous credit risk characteristics, and due to its size and complexity or exposure it is required to be individually assessed.

The methodology used to classify and determine its allowances is performed in accordance with Chapter B-1 "Provisions for credit risk" from the compendium, assigning risk categories to each debtor according to the following portfolio:

a) Normal portfolio

Corresponds to debtors whose capacity payments allows them to comply with their obligations and commitments, and according to the economic-financial situation this condition will not change. The classifications assigned to this portfolio are the categories that goes from A1 to A6. Notwithstanding the above, the Bank must maintain a minimal allowance percentage of 0.5% over its loan portfolio and contingent loans that form part of the Normal portfolio.

Note 2 - Summary of Significant Accounting Policies, continued

b) Substandard portfolio

Includes the borrowers which have financial difficulties, or whose payment capacity worsened significantly, presenting reasonable doubt regarding the probability principal and interest under the contractually agreed terms, indicating that they are less likely to comply with their financial obligations in the short term. In addition, borrowers that recently held loans in default for over 30 days also are included in the substandard portfolio. The classifications assigned to this portfolio are categories B1 to B4.

c) Normal and Substandard portfolios

As part of the debtors' individual analysis, the Bank classifies its debtors into the aforementioned categories, assigning probabilities of default (PD) and loss given default (LGD), which yield the expected loss percentages as a result. These variables are regulated by the CMF- to be applied to each of the individual categories.

The following table presents the probability of default (PD) and loss given default (LGD) established by the CMF":

Type of portfolio	Category of debtor	Probability of default (PD)	Loss given default (LGD)	Expected loss (EL)
		(%)	(%)	(% Provision)
Normal portfolio	A1	0.04	90.00	0.03600
	A2	0.10	82.50	0.08250
	A3	0.25	87.50	0.21850
	A4	2.00	87.50	1.75000
	A5	4.75	90.00	4.27500
	A6	10.00	90.00	9.00000
Substandard portfolio	B1	15.00	92.50	13.87500
	B2	22.00	92.50	20.35000
	B3	33.00	97.50	32.17500
	B4	45.00	97.50	43.87500

In order to determine the amount of provisions, the Bank first determines the affected exposure, which comprises the book value of the customer's placements plus the contingent credits, less the amounts that are feasible to recover through the execution of the guarantees, financial or real, backing the operations, to which the respective loss percentages are applied. In the case of collateral, the Bank must demonstrate that the value assigned to this deduction reasonably reflects the value it would obtain on the disposal of the assets or equity instruments. In the case of substitution of the debtor's credit risk for the credit quality of the guarantor or surety, this methodology will only be applicable when the guarantor or surety is an entity rated in a category similar to investment grade by a local or international rating agency recognized by the regulator.

Guaranteed values may not be deducted from the exposure amount. The procedure apply only in the case of financial or real guarantees.

Note 2 - Summary of Significant Accounting Policies, continued

d) Impaired portfolio

Includes the loans to borrowers for which recovery is considered remote, given that they have suffered a loss event resulting in impairment. This portfolio includes borrowers with evident signs of possible bankruptcy, as well as those in which a forced debt renegotiation is required, and also includes any borrower with loans in default for equal to or greater than 90 days in the payment of interest or principal of any loan.

The classifications assigned to this portfolio are categories C1 to C6. Applied to all credits, including 100% of the amount of contingent credits, held by those same debtors.

For purposes of establishing provisions on this portfolio, in the first instance an expected loss rate is determined, deducting from the amount of the exposure the amounts susceptible to recovery through the execution of financial and real guarantees that support the operations and also deducting the present value of the recoveries obtained through collection actions net of associated expenses.

Once the expected loss range has been determined, the respective allowance percentage is applied to the amount of the exposure comprising the placements plus the contingent credits of the same debtor.

Allowance percentages to be applied over the exposition are as follows:

Type of portfolio	Risk scale	Expected loss range	Provision
Impaired portfolio	C1	Up to 3%	2%
	C2	More than 3% and up to 20%	10%
	C3	More than 20% and up to 30%	25%
	C4	More than 30% and up to 50%	40%
	C5	More than 50% and up to 80%	65%
	C6	More than 80%	90%

Loans are maintained in this portfolio until a normalization of their payment capacity or behavior is observed, without prejudice to the write-off of each particular loan that meets the condition set forth in Title II of Chapter B-2 of the compendium.

In order to remove a debtor from this portfolio, once the circumstances that led to its classification in this portfolio under these rules have been overcome, at least the following copulative conditions must be met:

- None of the debtor obligations with the Bank are overdue for more than 30 days.
- No new re-financing of loans has been granted.
- At least one of the payments received includes principal payment (total or partial).
- If the debtor has a loan with partial payments due within six months, two payments have been made.
- If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Group allowances

Collective assessment are used to deal with a large number of loan transactions with small amounts granted to individuals and small size companies. This type of assessment, as well as the criteria to apply for them, must be consistent with those used when loans were granted.

To establish allowances, collective assessment requires grouping loans with homogeneous characteristics in terms of type of debtor and loan conditions, in order to conform, by technically formulated methodologies and following prudential criteria, the payment behavior of the group and the recoveries for defaulted loans.

Based on the above, the groups are assigned with a probability of default (PD) and loss given default (LGD) considering the profile that best suits the loan. Net exposure is calculated, which includes the book value of the loan plus contingent loans.

a) Standard method for mortgage loans allowances

For the purposes of calculating credit risk provisions of the mortgage loan portfolio for mortgage , the Bank uses the standard provision method for mortgage loans established in the compendium. According to this method the provision factor to be applied, represented by the expected loss (EL) over the amount of the mortgage loans, depends on the overdue of each loan and the relation, at the end of each month, between the gross exposure and the corresponding collateral (LTV), according to the following table:

LTV tranche	Days past due at month-end					Portfolio in default
		0	1 - 29	30 - 59	60 - 89	
LTV ≤ 40%	PD (%)	1.0916	21.3407	46.0536	75.1614	100
	LGD (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	EL (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40% < LTV ≤ 80%	PD (%)	1.9158	27.4332	52.0824	78.9511	100
	LGD (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	EL (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80% < LTV ≤ 90%	PD (%)	2.5150	27.9300	52.5800	79.6952	100
	LGD (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	EL (%)	0.5421	6.0496	11.5255	17.6390	22.2310
LTV > 90%	PD (%)	2.7400	28.4300	53.0800	80.3677	100
	LGD (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	EL (%)	0.7453	8.2532	15.7064	24.2355	30.2436

In case the same debtor has more than one mortgage loan with the Bank and one of those loans is 90 days overdue or more all those loans are incorporated to the Impaired portfolio, calculating allowances for each one of those loans applying the corresponding percentage according to the LTV.

Note 2 - Summary of Significant Accounting Policies, continued

For mortgage loans related to housing programs and benefits from the Government, when guaranteed by the corresponding auction insurance, the allowance percentage could be weighted for a loss mitigating factor, which depends on the LTV percentage and the value of the property at inception. The loss mitigating factors are those shown in the table below:

LTV tranche	MP loss mitigation factor for credits with state auction insurance	
	V tranche: Price of the house upon executing sale agreement (UF)	
	V ≤ 1,000	1,000 < V ≤ 2,000
LTV ≤ 40%	100%	100%
40% < LTV ≤ 80%	100%	100%
80% < LTV ≤ 90%	95%	96%
LTV > 90%	84%	89%

b) Provisions for Commercial Loans

The Bank uses the three standard models established in the compendium, in order to determine the provisions of the group commercial portfolio. The applicable percentages of provision and the parameters used to determine the provision, are set out on the compendium.

c) Commercial leasing operations

The allowance is determined based on the book value of the commercial lease operations (including the purchase option). The allowance percentage used in the calculation will depend on the delinquency of each operation, the type of leased asset and the relationship, at the end of each month, between the book value of each operation and the value of the leased asset (LTV), as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and type of asset (%)		
Days of delinquency of transaction at end of month	Type of asset	
	Real Estate	Non-real estate
0	0.79	1.61
1 - 29	7.94	12.02
30 - 59	28.76	40.88
60 - 89	58.76	69.38
More than 90	100.00	100.00

Note 2 - Summary of Significant Accounting Policies, continued

Loss Given Default (LGD) applicable according to PVB tranche and type of asset (%)			
PVB= Current value of transaction/ Value of leased asset			
PVB tranche	Real Estate	Non-real estate	
PVB <= 40%	0.05	18.20	
40% < PVB <= 50%	0.05	57.00	
50% < PVB <= 80%	5.10	68.40	
80% < PVB <= 90%	23.20	75.10	
PVB > 90%	36.20	78.90	

The LTV relationship is determined considering the guarantee appraisal value, expressed in UF for real estate and in Chilean pesos for non-real estate, recorded at inception, considering any transitory event that may cause an increase on the value of the asset.

d) Student loans

The expected loss (%) is applied over the amount of the student loan and the exposure of the contingent credit when applicable. The factor used is determined based on the type of student loan and the collectable payment of principal or interest, at the end of each month. Only when payment is due, the factor will also depend on overdue.

Probability of Default (PD) applicable according to payment due date, delinquency and type of loan (%)				
Payment of principal or interest due at month-end	Days past due at closing	Student Loan		
		CAE	CORFO or other	
Yes	0	5.20	2.90	
	1-29	37.20	15.00	
	30-59	59.00	43.40	
	60-89	72.80	71.90	
	Portfolio in default	100.00	100.00	
No	n/a	41.60	16.50	

Loss Given Default applicable according to payment due date and type of loan (LGD) (%)			
Payment of principal or interest due at month-end	Student Loan		
	CAE	CORFO or other	
Yes	70.90	70.90	
No	50.30	45.80	

For loans granted in accordance with Law 20,027, the Bank considers the Government as a qualified guarantor for 90% of the loan.

Note 2 - Summary of Significant Accounting Policies, continued

e) Generic commercial placements and factoring

Factoring operations and commercial loans, other than those indicated above, expected loss (%) is applied over the amount of the loan and on the exposure of the contingent credit. The factor used is determined based on whether the operation has guarantees and it's overdue. In addition for those operations with guarantees, the relationship between the debtor's obligations to the bank and the value of the guarantees (LTV) is used to determine the factor as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and PTVG tranche (%)				
Days past due at month-end	With guarantee		Without guarantee	
	PTVG <=100	%	PTVG >100	%
0		1.86	2.68	4.91
1-29		11.60	13.45	22.93
30-59		25.33	26.92	45.30
60-89		41.31	41.31	61.63
Portfolio in default		100.00	100.00	100.00

Loss Given Default (LGD) applicable according to PTVG tranche (%)			
	PTVG tranche	Commercial generic transactions or factoring without liability of the assigner	Factoring with liability of the assigner
With guarantee	PTVG <= 60%	5.00	3.20
	60% <PTVG <= 75%	20.30	12.80
	75% <PTVG <= 90%	32.20	20.30
	90% < PTVG	43.00	27.10
	Without guarantee	56.90	35.90

A guarantee or collateral can only be considered if, the guarantee was constituted in favor of the Bank with preference and if the guarantees is directly associates with the debtor's credits (not shared with other debtors). For the purposes of calculating the LTV, the invoices assigned in the factoring operations, nor the guarantees associated with mortgage loans can be considered.

The guarantees used in calculating the LTV relationship may be of a specific or general purpose, including those that are simultaneously specific and general. In the case of specific guarantees, the PTVG ratio must be calculated independently for each secured transaction, as the division between the amount of the placement and the contingent credit exposure and the value of the collateral securing it. For general and specific guarantees, LTV is determined as the division between the sum of the amounts of the loan and exposures of contingent credits and the general and specific guarantees considering any restriction.

Note 2 - Summary of Significant Accounting Policies, continued

f) Provisions associated with financing guaranteed by FOGAPE Covid 19

The CMF requested the determination of specific provisions for loans guaranteed by the FOGAPE Covid-19 guarantee, for which the expected losses should be determined by estimating the risk of each transaction, without considering the substitution of the credit quality of the guarantee, according to the individual or group analysis method, in accordance with the provisions of Chapter B-1 of the Compendium of Accounting Standards. This calculation must be made on an aggregate basis, grouping all those operations to which the same deductible percentage is applicable. Therefore, the total amount of expected losses resulting from the aggregate calculation of each group of operations must be contrasted with the respective total amount of deductible applicable to them and proceed as follows, when the expected losses of the operations of a group to which the same deductible percentage is applicable, determined according to the above procedure are less than or equal to the aggregate amount of the deductible, the provisions will be determined without considering the coverage of FOGAPE Covid-19, that is, without substituting the credit quality of the direct debtor for that of the guarantor, and when they are greater than the aggregate amount of the deductible, the provisions will be determined using the substitution method provided for in numeral 4. 1 letter a) of Chapter B-1 of the Compendium and will be recognized in accounts separate from commercial, consumer and mortgage provisions. As of December 31, 2024 and 2023 the Bank has recorded provisions of MCh\$3,580 and MCh\$4,528, respectively.

g) Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting year in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium, using the methodology set forth in letter b) "Guarantees".

h) Impaired portfolio - Collectively assessed loan

The group in default loan portfolio comprises all loans and 100% of the amount of contingent loans of debtors who at the end of a month are 90 days or more past due in the payment of interest or principal on any loan. It will also include debtors who have been granted a loan to leave in force a transaction that was more than 60 days overdue, as well as debtors who have been subject to forced restructuring or partial forgiveness of a debt.

The following can be excluded from the group impaired portfolio:

- a) Mortgage loans overdue for less than 90 days, unless the debtor has another loan of the same type with large overdue; and, loans for financing higher education under Law 20,027,
- b) that do not yet meet the default conditions set forth in Circular 3,454 of December 10, 2008.

Note 2 - Summary of Significant Accounting Policies, continued

All debtor's loans should be classified in the Impaired portfolio until a normalization of its behavior and management capacity can be observed, regardless of charge-offs requirements indicated in the accounting policy detailed in letter w), charge-offs section title II, Chapter B-2 of the Compendium. In order to remove a debtor from the Impaired portfolio, once the circumstances that made it be classified in this category are overcome according to these standards, all the following requirements must be met:

- 1) None of the debtor obligations with the Bank are overdue for more than 30 days.
- 2) No new re-financing of loans has been granted.
- 3) At least one of the payments received includes principal payment (total or partial).
- 4) If the debtor has a loan with partial payments due within six months, two payments have been made.
- 5) If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- 6) The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

(iii) Guarantees

Las Guarantees can be considered for allowances calculation purposes only if they are legally documented and comply with all conditions and requirements to be executable in Bank's favor.

In all cases, for purposes of the standards established by the CMF, the Bank should be able to demonstrate the mitigating effect of the guarantees over the inherent credit risk of the exposures. For allowances calculation purposes, guarantees will be treated according to the following, as applicable:

- a) Collateral and guarantees: Considers contractual agreements to guarantee a specific loan or loans in a way that the coverage over the exposure can be clearly defined and where the rights to collect have been unquestionably transferred over to the guarantor.
- b) Guarantees: In order to apply the deduction method or to determine recovery rates, valuation of property and other guarantees (mortgages or financial instruments guarantees) must reflect the net inflow that will be obtained from the sale of the assets, debts instruments or shares in the event that the borrower falls into default and a secondary source of payment is required. In applying the deduction method, the amount to be recovered by executing the guarantee, corresponds to the present value of the asset sold in its current market condition at disposal, minus all expenses required to keep the asset in its current conditions and to sell them, all in accordance with the Bank policies and terms established by Law for assets disposal.
- c) Security deposit: On this type of guarantees the adjustment of its fair value may be deducted from the exposition, solely when the guarantee can be established with the unique aim to guarantee compliance with the related loans.

Note 2 - Summary of Significant Accounting Policies, continued

- d) Leased assets: Estimated losses when establishing allowances based on the assessment method corresponding to each debtor, consider the amount that will be obtained if the leased asset are sold, taking into account any potential impairment for the assets in case of debtor's default and the related recovery and relocation expenses.
- e) Factoring operations: Establishing allowances for factoring operations will consider as counterparty the entity ceding rights over the endorsed in favor of the Bank, when the cession is recourse for the latter, and to the debtor when the cession has been made without recourse.

(iv) Additional provisions

The Bank can establish provisions in addition to those calculated by applying the loan portfolio assessment models, according to the set forth in number 9 of Chapter B-1 of the compendium. These provisions can be established with the purpose of addressing the risks arising from macroeconomic fluctuations by anticipating expansive economic cycle downturns which could materialize in the worsening of the economic environment in the future and, in that manner, operate as an anti-cycle mechanism to accumulate additional provisions during positive economic conditions and release or use provisions when negative economic conditions are present.

According to the above, additional provisions shall always correspond to general allowances for commercial, consumer or mortgage loans, or to identify segments of them and in no case can be used to compensate deficiencies in the Bank's models.

As of December 31, 2024, the Bank maintained additional provisions for its commercial, consumer and mortgage loan portfolio amounting to MCh\$109,052 (as of December 31, 2023, the Bank maintained additional provisions of MCh\$169,870).

u) Impaired credits and charge-offs

i) Impaired loans

This portfolio is comprised of the following assets:

- For individually assessed debtors, includes loans classified in the "Impaired portfolio" and those classified under categories B3 and B4 of the "Substandard portfolio", as described above.
- For those debtors collectively assessed, includes all loans classified in the "Impaired portfolio".

ii) Charge-offs

As a general rule, charge-offs should be applied when contractual rights to cash flows expire. In the case of placements, even if this does not occur, the respective asset balances will be written off in accordance with the provisions of the compendium, Chapter B-2, Title II "Impaired and written-off loans".

Note 2 - Summary of Significant Accounting Policies, continued

The write-offs in question refer to the derecognition in the Consolidated Statement of Financial Position of the asset corresponding to the respective operation, including, therefore, that part which might not be due if it were a loan payable in instalments or partial payments, or a leasing operation.

Charge-offs are always recognized against provisions for loan losses, according to Chapter B-1 of the compendium, regardless of the reason.

Charge-off of loans and accounts receivable must take place when the following circumstances exist, whichever happens first:

- 1) The Bank, based on all available information, concludes that no inflow related to the recorded loan will be received.
- 2) When a loan or account receivable with no legal documentation is 90 days overdue since recorded as an asset.
- 3) When the legal term for all legal shares to collect the loan have expired.

When a loan is overdue for a period of time that complies with the term listed below:

Type of loan	Term
Consumer loans with or without collateral	6 months
Consumer leasing	6 months
Other operations of non real estate leasing	12 months
Other transactions without collateral	24 months
Commercial loans with collateral	36 months
Real estate leasing (commercial and home purchase)	36 months
Mortgage loans for home	48 months

The term corresponds to the time passed since the date in which the loan became collectable partially or totally.

iii) Recovery of assets previously charged-off

Payments received from loans previously charged-off are recognized directly as income, as recoveries of loans previously charged-off in "Expense for credit losses" compensating the provision expense.

In the event that recoveries through goods or non-financial assets income will be recognized for the amount in which those assets are recorded, according to Chapter B-5 "Assets received in lieu of payment" of the compendium. Same criteria will be followed for repossessed leased assets granted under finance leases, after being charged-off when incorporated back as assets.

Note 2 - Summary of Significant Accounting Policies, continued

iv) Renegotiation of previously charged-off loans

Any renegotiation of a written-off loan will not give rise to income as long as the transaction continues to be impaired, and the actual payments received must be treated as recoveries of written-off loans.

The renegotiated loan is recorded as an actual asset when losses its characteristic of impaired, recording income as a recovery of a loan previously charged-off. Same criteria is applied when a loan is granted to pay for a loan previously charged-off.

v) Contingent loans

Contingent loans are understood as those transactions or commitments for which the Bank is taking a risk when obligating in third parties benefit as requested by its customer subject to the occurrence or nonoccurrence of a future event to pay a certain amount which will subsequently recovered from its customer.

The Bank maintains recorded in off-balance accounts the following amounts related to commitments or responsibilities in the normal course of business.

- Guarantees agreement: Includes collaterals, guarantees and stand by letter of credit as indicated in Chapter 8-10 of the Updated Compilation of Rules (RAN). Additionally, includes payment guarantees for factoring operations as indicated in Chapter 838 of the RAN.
- Confirmed foreign letters of credit: Corresponds to letters of credit confirmed by the Bank.
- Letters of credit issued: Includes documentary letters of credit issued by the Bank not yet negotiated.
- Documented guarantees: Corresponds to documented guarantees granted with promissory notes as indicated in Chapter 8-11 of the RAN.
- Available lines of credit: Considers the not used amounts of lines of credit which allow clients to use loans without additional approval from the Bank (i.e. for the usage of credit cards or checking account overdrafts).
- Other loans commitments: Includes amounts for loan commitments not disbursed which should be granted in a future agreed date or disbursed when agreed terms are met, such as credit lines linked to stage of completion of projects or student loans (Law 20,027).
- Other contingent loans: Includes any other type of commitment of the Bank that could exist and could give rise to an effective loan when certain future events take place. In general, includes unusual transactions such as delivery of instruments as collateral to guarantee payment for loan transactions between third parties or derivative contracts transactions entered into on behalf of third parties that could imply a payment obligation not covered by a deposit.

Note 2 - Summary of Significant Accounting Policies, continued

The amount of these contingent loans are considered at the end of each reporting period to calculate allowances for loan losses required by Chapter B-1 “Provisions for loan losses” of the compendium, and the amounts must be calculated according to the exposition factor, according to the following table:

Type of contingent exposure	FCC (1)
1) Freely disposable lines of credit with immediate cancellation	10%
2) Contingent credits linked to the CAE	15%
3) Letters of credit for goods movement transactions	20%
4) Other freely disposable lines of credit	40%
5) Commitments to purchase foreign debt in local currency	50%
6) Transactions related to contingent events	50%
7) Guarantees and sureties	100%
8) Other credit commitments	100%
9) Other contingent credits	100%
(1) Credit conversion factor	

However, when evaluating contingent loans for clients with non-compliant loans the amount to be considered to calculate provisions for loan losses shall be 100% of the contingent loan as indicated in Chapter B-1 as previously indicated.

v) Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting period in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium of Accounting Standards, using the methodology set forth in letter b) “Guarantees”.

w) Income taxes and deferred taxes

The Bank has recognized an expense (income) arising from gains or losses for each period, according to the applicable taxation rules for each country or jurisdiction it operates.

The income tax expense for the year includes the sum of current tax, which results from applying the current rates to the taxable profit for the year (after deducting the tax credits allowed), and the change in deferred tax assets and liabilities recognized in the Consolidated Statement of Income. The Bank records, when appropriate, deferred tax assets and liabilities for the estimated future tax effects attributable to differences between the carrying amount of assets and liabilities and their tax basis.

Note 2 - Summary of Significant Accounting Policies, continued

The measurement of deferred tax assets and liabilities is based on the tax rate, in accordance with the applicable tax laws, using the tax rate that applies to the period when the deferred asset and liability will be settled. The effects of deferred taxes on temporary differences between the balance sheet and the income statement are recognized in deferred taxes as of the date on which the law approves such changes. The effects of deferred taxes on temporary differences between the tax balance sheet and the financial balance sheet are recorded on an accrual basis, in accordance with IAS 12 "Income Taxes" and presented in accordance with the same IAS.

x) Provisions and contingent liabilities

A provision is a liability of uncertain timing or amount. Provisions are recorded in the Consolidated Statement of Financial Position when the Bank:

- Has a present obligation (legal or constructive) as a result of past events,
- It is probable that an outflow of resources will be required to settle these obligations, and
- The amount of these resources can be reliably measured.

A contingent liability is any possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events that are not wholly within the control of the Bank.

Guarantees agreement, confirmed foreign letters of credit, letters of credit, letters of guarantee, unused lines of credit, other credit commitments, other contingent credits (see letter v) are classified as contingent in supplementary information.

Provisions (quantified using the best available information on the consequences of the event giving rise to them and are reviewed and adjusted at the end of each year) are used to satisfy specific obligations for which they were originally recognized. Partial or total reversals are recognized when such liabilities cease to exist or are reduced.

Provisions are classified according to the obligations covered, being for the purpose of these Consolidated Financial Statements, those detailed in note 24 "Provisions for contingencies", note 25 "Provisions for dividends, interest payments and repricing of regulatory capital financial instruments issued" and note 26 "Special provisions for credit risk".

Note 2 - Summary of Significant Accounting Policies, continued

y) Employee benefits

i) Employee benefits Short-term benefits

Correspond to personnel benefits (other than termination benefits) that are expected to be settled within twelve months after year end over which the employees have rendered their services.

These are recognized when the employee has rendered the service and are measured at the undiscounted amount of benefits expected to be paid in exchange for that service:

- As a liability (accrued expense), after deducting any obligation already satisfied. If the amount already paid is higher than the gross amount of the benefits, the Bank will recognize this excess as an asset (amount paid in advance), when it represents a reduction of future payments or a recoverable amount in cash.
- As an expense, unless other IFRS requires or allows the recognition of those disbursements as part of the cost of an asset.

ii) Personnel vacations

The annual cost of personnel vacations and benefits are recognized on an accrual basis.

iii) Post-employment benefits

Correspond to employee benefits (other than termination benefits and short-term employee benefits) that are expected to be settled after the completion of employment. Post-employment benefits plans are agreements, formal and informal, in which the Bank is committed to provide benefits to one or more employees after completion of their employment. Plans providing these benefits are classified as either defined contribution plans or defined benefit plans, depending on the economic substance of the plan as derived from its principal terms and conditions.

Defined contribution plans, the obligation is recognized for the amounts to be contributed in the period.

Defined benefit plans, a liability is recognized based on the estimated benefit cost that employees have accrued for services rendered, less the present value of the defined benefit obligation and present value of present services. Present service cost and gain or loss upon settlement will be recognized in the income statement for the year. Gains and losses generated from the remeasurement of the liability will be recognized in other comprehensive income.

Note 2 - Summary of Significant Accounting Policies, continued

iv) Other long-term benefits

Other long-term employee benefits are employee benefits, other than short-term, post-employment and termination benefits, which are not due for payment within 12 months after the end of the period in which the employees render the service.

The regulations require the recognition of a liability for the present value of the defined benefit obligation less the fair value of the plan assets, if any. The results generated from its remediation will be recognized in the results of the period.

v) Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment, as a consequence of:

- A decision of the entity to terminate the employee's employment before the normal termination date; or
- The decision of an employee to accept an offer with benefits in order to terminate the employment before the normal termination date.

An entity recognizes a liability and expense for termination benefits at the earlier of the following dates:

- When the entity can no longer withdraw the offer of those benefits; and
- When the entity recognizes costs for a restructuring that is within the scope of IAS 37 "Provisions, contingent liabilities and contingent assets" and involves the payment of termination benefits.

vi) Cash-settled share-based payment transactions.

The Bank recognizes a liability for cash-settled share-based payment transactions at fair value at the inception of each contract. Until the liability is settled, the Bank will remeasure the fair value of the liability at the end of each reporting period and at the settlement date, and will recognize any fair value variation in profit or loss for the period.

z) Provision for mandatory dividends

A liability recognized due to the legal obligation to distribute 30% of the profit of the year in compliance with Public Company Law (30%) or in accordance with the provisions of the company bylaws. For the years ended December 31, 2024 and 2023 the Bank provisioned 30% of its net income. This provision is recorded as a decrease in "Retained earnings" under "Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments" in the Consolidated Statement of Changes in Shareholders' Equity.

Note 2 - Summary of Significant Accounting Policies, continued

In the Bank's bylaws, title VII, it is established that the Bank should distribute annually as a dividend to its shareholders, as a proposal of the Board of Directors and based on the number of shares, at least thirty percent (30%) of the net income of the year. Furthermore, no dividends distribution will take place if there are equity losses (negative reserves) until these losses are recovered or if a dividend distribution will cause a non-compliance of the capital requirements established by the General Bank Law.

aa) Assets received or awarded in lieu of payment

Assets received or awarded in lieu of payment of loans and accounts receivable from clients are recognized at their fair value (as determined by an independent appraisal). A price is agreed upon by the parties through negotiation or, when the parties do not reach an agreement, at the amount at which the Bank is awarded those assets at a judicial auction. In both cases, an independent appraisal is performed.

These assets are subsequently adjusted to their net realizable value less cost to sale, and the difference between the carrying value of the asset and the estimated fair value less costs to sell is charged to income, under "Other operating expenses".

Assets received or foreclosed in payment are valued at the lower of initial value and net realizable value, i.e. fair value (independent appraisal) less costs to hold and dispose of, plus regulatory write-offs. Regulatory write-offs are required by the regulator if the asset is not sold within one year of receipt.

Such net realizable value of an assets is determined mainly in conformity with the current market conditions, and should correspond to its fair value less the necessary costs to maintain and dispose it.

In general, it is estimated that these assets will be disposed of within one year from the date of award. However, the regulator, by means of general rules, may establish that, in justified cases, the Bank may have an additional term of up to eighteen months for the disposal of the assets. In order to be eligible for the extension, the value of the asset must have been written off for accounting purposes, in compliance with Article 84 of the General Banking Law.

bb) Customer loyalty programs

The Bank maintains a loyalty program to provide incentives to its customers, allowing them to purchase goods or services with certain benefits which are granted through credit cards issued by the Bank when they purchase according to the conditions established for each loyalty program.

The Bank has an adequate level of provisions in order comply with its current obligations and to properly reflect the associated expense when providing the benefits.

Note 2 - Summary of Significant Accounting Policies, continued

cc) Non-current assets held for sale

Non-current assets (or a group holding assets and liabilities for disposal) expected to be recovered mainly through the sale of these items rather than through the continued use, are classified as held for sale. Immediately prior to this classification, assets (or elements of a disposable group) are re-measured in accordance with the Bank's policies. The assets (or disposal group) are measured at the lower of carrying amount and fair value less cost to sell.

Impairment losses in initial classification of non-current assets held for sale and with subsequent gains and losses are recorded in income. Gains are not recorded over previously recorded losses.

dd) Bonds with no fixed maturity

Bonds with no fixed maturity are measured on initial recognition at fair value less any transaction costs that are directly attributable to the issuance. The financial expenses included in the effective interest method correspond to transaction costs, including issuance expenses, these expenses are recognized together with interest. Transaction costs are deferred over a maximum term of 5 years from the issuance date and will be recognized in the Consolidated Income Statement. Exchange differences from foreign currency, exchange rate adjustments and adjustments for the *Unidad de Fomento* (an inflation-linked unit of account used in Chile) with respect to these bonds must be recorded in the Income Statement.

The accrual of interest on are recognized in "Provisions for dividends, interest payments and revaluation of regulatory capital financial instruments issued" in the Statement of Changes in Consolidated Equity, the provision is reversed "Retained earnings (accumulated losses) from prior years" and "Profit from the prior year to be allocated" each time a payment of interest is made.

ee) Earnings per share

Basic earnings per share are determined by dividing the net income attributable to the equity holders of the Bank for the reported period by the weighted average number of shares outstanding during the reported period.

Diluted earnings per share are determined in the same way as basic earnings, but the weighted average number of outstanding shares is adjusted to take into consideration the potential diluting effect of stock options, warrants, and convertible debt.

As of December 31, 2024 and 2023 the Bank did not have any instruments that generated dilution.

Note 2 - Summary of Significant Accounting Policies, continued

ff) Consolidated Statement of Cash Flows

The Bank presents cash flows from operating activities, investing activities, and financing activities in a manner that best represent the nature of its activities. The classification of cash flows into the aforementioned categories provides information that allows users to evaluate the impact of the transactions in the financial position of the Bank, as well as over the ending balance of cash and cash equivalents. This information can be also useful when evaluating the relation between those activities (IAS7) .

For the preparation of the Statement of Cash Flows, the Bank used the indirect method, in which from the consolidated income for the year before income tax, non-cash transactions are subsequently added/subtracted, as well as income and expenses associated with cash flows classified as investing or financing activities.

For the preparation of the Statement of Cash Flow, the following items are considered:

- **Cash flows:** Inflows and outflows of cash and cash equivalents, such as deposits with the Central Bank of Chile, deposits in domestic banks, and deposits in foreign banks (includes deposits from the Bank of the Republic of Colombia).
- **Operating activities:** Principal revenue-producing activities performed by banks and other activities that cannot be classified as investing or financing activities. This section includes, among others, loans obtained from abroad, dividends received from investments, financial instruments at fair value through other comprehensive income and amortized cost, etc.
- **Investing activities:** Correspond to the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- **Financing activities:** Activities that result in changes in the size and composition of the equity and liabilities that are not part of operating activities nor investing activities.

For the purposes of the Statement of Cash Flows, cash and cash equivalents have been considered as cash and cash equivalents, the balances of "Cash and bank deposits" plus the net balance of operations in liquidation in progress, plus financial instruments for trading at fair value through profit or loss and financial instruments at fair value through other comprehensive income with high liquidity and with insignificant risk of change in value, whose maturity does not exceed three months from the date of acquisition and the rights under resale agreements and securities lending that are in that situation.

Includes also investments in fixed income mutual funds which are presented under trading investments in the Consolidated Statement of Financial Position. Cash and cash equivalents balances and their reconciliation to the Consolidated Statement of Cash Flows are detailed in Note 7 "Cash and Cash Equivalents".

The provision for loan losses included under the operating activities section differs from the amount presented in the Consolidated Statement of Income, because for cash flows purposes such amount excludes recoveries of transactions previously charged-off.

Note 2 - Summary of Significant Accounting Policies, continued

gg) Consolidated Statement of Changes in Equity

The Consolidated Statement of Changes in Equity presents all movements affecting net equity, including those originated by accounting changes or errors recognition. This statement shows a conciliation between opening and ending balances for the year for all items that form part of consolidated equity, grouping transactions based on their nature, according to the following:

- Adjustments for changes in accounting criteria and correction of errors: which include changes in consolidated net equity arising as a result of the retrospective restatement of balances in the Consolidated Financial Statements due to changes in accounting criteria or correction of errors.
- Net comprehensive income: Includes in an aggregated manner net income recorded in the Statement of Other Comprehensive Income, as previously indicated.
- Other changes in equity: Includes retained earnings distributions, equity increases, provision for mandatory dividends, dividends paid, among other increases or decreases in consolidated equity.

This information is presented in two statements: The Consolidated Statement of Other Comprehensive Income and the Consolidated Statement of Changes in Equity.

hh) Consolidated Statement of Other Comprehensive Income

In the Consolidated Statement of Other Comprehensive Income are presented income and expenses generated by the Bank as a consequence of its regular activities during the year, clearly identifying those recorded in profit and loss from those recorded in net equity.

Due to this, in this statement the following is shown:

- The consolidated income.
- Net amount of income and expenses recorded in equity as "Valuation accounts".
- Deferred income taxes originated by transactions described above, except for those amounts related to exchange differences from foreign net investments.

Total amount of consolidated income and expenses recorded, calculated as the sum of the items listed above, presenting in those attributable equity holders of the Bank from non-controlling interest.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted

New accounting pronouncements introduced by CMF

1. Standards and interpretations issued in the current year

General Regulation No. 500 - Issues instructions and regulatory file for compliance with the provisions of article 28 of Law No. 14.908 on family abandonment and payment of alimony.

On December 12, 2023, the CMF issued new regulations which establish instructions and a regulatory file to comply with the provisions of article 28 of Law No. 14,908 on family abandonment and payment of child support. This standard applies to Banks, banking support companies, supervised savings and credit cooperatives, insurance companies and managing agents of endorsable mortgage mutual funds, as well as other providers of financial products and services supervised by the CMF.

The obligation to consult the National Registry of Child Support Debtors (RNDPA, for its Spanish acronym) is established when carrying out money credit operations of 50 UF or more. In case of current registration in the RNDPA, 50% of the credit or a lower amount sufficient to cover the entire child support debt must be withheld. The entity must pay this sum to the custodial parent as soon as the withholding is made.

Entities must send detailed information on all money credit operations carried out with legal persons for amounts equal to or greater than 50 UF. The report will be made within the first 7 business days of the month following the reported period. The instructions issued by the CMF and the T01 regulatory file, which is incorporated into the Bank Information System Manual, are used to send the information through the module provided on the CMF's website.

The regulations come into force as of June 1, 2024, and the first report of the T01 file must be made within 10 business days of that month.

The Bank's Management has implemented the aforementioned Circular and has concluded that its adoption has no significant impact on the Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

2. Standards and Interpretation issued but not yet effective

Circular No. 2,346 - Compendium of Accounting Standards for Banks. Chapter B-1 and E. Standard model for allowances for losses on consumer loans.

On March 6, 2024, the Financial Market Commission, developed a standardized methodology for calculating the allowances associated with the risk of loss on the consumer loans portfolio. Based on the above, chapter "3.1.3 Consumer Loans Portfolio" was incorporated into Chapter B-1 of the Compendium of Accounting Standards for Banks, detailing the risk matrix used to define Expected Loss, Default Probability, and Loss Given Default. This method establishes PD and LGD parameters that must be used to determine the provision factor that will be applied to the exposures of the consumer portfolio of banking institutions in Chile.

The standard model for allowances for losses on consumer loans will be effective as from the accounting close in January 2025.

The Bank's Management evaluated the potential impact of the adoption of the new standard method and has concluded that its adoption does not have significant impacts on the Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

New accounting pronouncements introduced by IASB

1. Standards and interpretations issued in the current year

Amendments to IFRS 16 - Lease liability on a sale and leaseback

On September 22, 2022, the IASB issued this amendment which clarifies how a selling lessee subsequently measures sale and leaseback transactions that meet the requirements of IFRS 15 to be accounted for as a sale.

The new requirements do not prevent a seller-lessee from recognizing in profit or loss any gain or loss related to the partial or total termination of a lease.

The effective date for the amendments is January 1, 2024.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

Amendment to IAS 1 Presentation of Financial Statements - Non-current Liabilities with Covenants

On October 31, 2022, Amendments to IAS 1 was issued, which aims to improve the information companies provide about long-term debt with covenants. Such amendment specifies that covenants to be complied with after the reporting date do not affect the classification of debt as current or non-current at the reporting date. Instead, the amendments require a company to disclose information about these covenants in the notes to the financial statements.

The IASB expects the amendments to improve the information a company provides about long-term debt with covenants by enabling investors to understand the risk that such debt could become repayable early.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's Management is assessing the potential impact of the adoption of this amendment on its Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Modifications to the IAS 7 - Cash flow statement and IFRS 7 - Financial instruments: Disclosure

As of May 25, 2023, the IASB has published “Disclosure of supplier finance agreements - Modifications to the IAS 7 and the IFRS 7” in order to improve the transparency of supplier finance agreements and their effects on liabilities, cash flows, and liquidity risk exposure of a company. Among the changes, the company is asked to disclose:

- The terms and conditions;
- the amount of liabilities that are part of the agreements, breaking down the amounts that the providers have already received as payment from the financial providers, and indicating where these liabilities are placed in the general balance;
- maturity date range of the payment; and
- information about the liquidity risk.

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted

The Bank's Management is assessing the potential impact of the adoption of these modifications in their Consolidated Financial Statements.

IFRS S1 - General Requirements for Disclosure of Sustainability-related Financial Information Exposure

As of June 26, 2023, the IASB has issued the “IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information Exposure” which demands an entity to reveal qualitative information that is useful for the users, regarding risks and opportunities related to sustainability.

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's management has concluded that the issuance of this standard does not have a significant impact on the Consolidated Financial Statements. On October 28, 2024, the Financial Market Commission (referred to as “CMF”) issued General Standard No. 519, which implements IFRS S1 in the Integrated Annual Report and establishes that it is effective for Banks in 2026.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

IFRS S2 - Climate-related Disclosures

As of June 26, 2023, the IASB has issued the “IFRS S2 Climate-related Disclosures” which demands an entity to reveal information that is useful to the users, regarding risks and opportunities related to climate, with the objective of allowing them to understand the processes, controls and procedures of governance employed by the entity to monitor, manage and supervise the risks and opportunities related to the climate.

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's management has concluded that the issuance of this standard does not have a significant impact on the Consolidated Financial Statements. On October 28, 2024, the Financial Market Commission (referred to as “CMF”) issued General Standard No. 519, which implements IFRS S2 in the Integrated Annual Report and establishes that it is effective for Banks in 2026.

2. Standards and Interpretation issued but not yet effective

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (amendments to IFRS 10 and IAS 28)

The amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Companies and Joint Ventures (2011) address a recognized inconsistency between the requirements of IFRS 10 and those of IAS 28 (2011) in the treatment of the sale or contribution of assets between an investor and its associate or joint venture. The amendments, issued in September 2014, state that when the transaction involves a business (whether it is in a subsidiary or not) the entire generated gain or loss is recognized. A partial gain or loss is recognized when the transaction involves assets that do not constitute a business, even when the assets are in a subsidiary.

The effective date for these amendments is yet to be determined because the IASB is awaiting the results of its research project on the equity method accounting. These amendments must be applied retrospectively and early adoption is permitted, which must be disclosed.

The Bank's management will await the new effective date to evaluate the potential effects of these amendments.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendment to IAS 21 - Effects of Changes in Foreign Currency Exchange Rates

On August 15, 2023, the IASB has issued "Amendments to IAS 21 Effects of Changes in Foreign Currency Exchange Rates" which will require companies to provide more useful information in their financial statements when a currency cannot be exchanged for another currency.

The main modifications are as follows:

- Specify when a currency is exchangeable for another currency and when it is not.
- Specify how an entity establishes the exchange rate to be applied when a currency is not exchangeable.
- Require additional disclosures when a currency is not exchangeable.

The effective date is effective for annual reporting periods beginning on or after January 1, 2025, early adoption is permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Consolidated Financial Statements, however, no material impacts are anticipated.

IFRS 18 – Presentation and Disclosure in Financial Statements

On April 9, 2024, the IASB published a new standard, "IFRS 18 Presentation and Disclosure in Financial Statements" that will replace IAS 1 "Presentation of Financial Statements". This new standard aims at improving the presentation of the Statement of Profit or Loss. The new key topics introduced by this standard include:

- Report specific totals and subtotals in the Statement of Profit or Loss.
- Disclosures about Management-defined Performance Measures (MPMs) in the notes to the financial statements.
- Improve aggregation and disaggregation in presentation and disclosure of information in the Financial Statements.
- Adjust the cash flows structure under the indirect method, starting from Operating Profit or Loss.

IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027 and will be applied to comparative information. Earlier adoption is permitted.

The Bank's Management is evaluating the potential impact of the adoption of this new standard on its Consolidated Financial Statements. As of the date of issuance of these Consolidated Financial Statements, the local regulator, the Financial Market Commission (CMF, for short in Spanish), has not issued a pronouncement regarding the adoption of IFRS 18.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

IFRS 19 - Subsidiaries without Public Accountability: Disclosures.

On May 9, 2024, the International Accounting Standards Board (IASB) issued a new standard that is optional for subsidiaries that are eligible. It is "IFRS 19 Subsidiaries without Public Accountability: Disclosures", which permits subsidiaries without public accountability that meet the requirements to be considered as such to provide much more reduced disclosures that meet the needs of their financial statement users.

IFRS 19 is effective for reporting periods beginning on or after January 1, 2027, and must be applied on comparative information. Earlier and revocable application is permitted.

The Bank's Management is evaluating the potential impact of the adoption of this new standard. However, it does not foresee material impacts on its Consolidated Financial Statements.

Amendment-Annual Improvements to IFRS Accounting Standards

On July 18, 2024, the International Accounting Standards Board (IASB) issued narrow amendments to IFRS Accounting Standards. These amendments, published in a single document "Annual Improvements to IFRS Accounting Standards—Volume 11", include clarifications, simplifications, corrections and changes aimed at improving the consistency of five IFRS Accounting Standards. IFRS 1 First-time Adoption of International Financial Reporting Standards; IFRS 7 Financial Instruments: Disclosures and its accompanying Guidance on implementing IFRS 7; IFRS 9 Financial Instruments; IFRS 10 Consolidated Financial Statements; and IAS 7 Statement of Cash Flows.

The amendments are effective for annual periods beginning on or after 1 January 2026, with earlier application permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Consolidated Financial Statements. However, no material impacts are anticipated.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendments to IFRS 9 and IFRS 7: Contracts Referencing Nature-Dependent Electricity

On 18 December 2024, the International Accounting Standards Board (IASB) issued amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures, which are targeted amendments to help companies better report the financial effects of nature-dependent electricity contracts. Nature-dependent electricity contracts help companies to secure their electricity supply from sources such as wind and solar power. The amount of electricity generated under these contracts can vary based on uncontrollable factors such as weather conditions. The amendments include:

- clarifying the application of the "own use" requirements;
- permitting hedge accounting if these contracts are used as hedging instruments; and
- adding new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

These amendments are required to be applied for annual reporting periods beginning on or after January 1, 2026, with earlier application permitted.

The Bank's Management is evaluating the potential impact of the adoption of these amendments on its Consolidated Financial Statements. However, no material impacts are anticipated.

Note 4 - Accounting Changes

There are no new standards to be adopted in the Consolidated Financial Statements.

Note 5 - Significant Events

During the year ended as of December 31, 2024, the following significant events have influenced the operations of the Bank and its subsidiaries or these Consolidated Financial Statements:

BANCO ITAÚ CHILE

AT1 Bond Issuance purchased by a party related to the majority shareholder.

On December 24, 2024, it was reported through a material event that the Bank issued and privately placed, under its Global Medium-Term Note Program (the "MTN Program") subject to Regulation S of the Securities and Exchange Commission of the United States of America ("SEC"), perpetual bonds without a fixed maturity under Article 55 bis of the Chilean General Banking Law and Chapter 21-2 of the Updated Compilation of Standards of the CMF. The amount issued was US\$200,000,000 (two hundred million United States dollars) at a variable annual rate of the 6-month SOFR Term plus a spread of 360 basis points, with no possibility of redeemed before 5 years from the date of issuance (the "AT1 Bonds"). Interest will be paid semi-annually on June 20 and December 20 of each year, beginning on June 20, 2025.

The buyer of this AT1 Bond issuance under the MTN Program was Itaú BBA International (Cayman) Ltd., an entity related to the controlling entity of Banco Itaú Chile. This operation was examined and reviewed by the Committee of Directors and approved by the Board of Directors of the Bank as an operation between related parties, in accordance with the provisions set forth in Title XVI of Law No. 18,046 on Chilean Corporation Act and the approved Recurrent Operations Policy by the Bank as informed by material event notice dated July 31, 2024. Likewise, it is recorded that the Committee of Directors gave its approval to the interest rate of issuance and placement of the AT1 Bonds.

Changes to the Board of Directors

On December 17, 2024, it was reported as a material event that, the ordinary meeting held on the same day, the Board of Directors of the Bank was formally informed of the resignation of Mr. Pedro Samhan Escáandar from his position as director of the Bank, effective March 31, 2025. Additionally, on the same date, the Bank's Board of Directors appointed Mr. Kevin Cowan Logan as interim director, effective April 1, 2025. He will hold this position until the next Ordinary Shareholders' Meeting, at which a successor director will be appointed.

New CEO

As of October 1, 2024, Mr. André Gailey has been appointed as the new Chief Executive Officer of the Bank.

Note 5 - Significant Events, continued

Appointment of Director

On September 24, 2024, it was reported as a material event that the ordinary meeting held on September 24 the Board of Directors of the Bank was formally informed of the resignation of Mr. Milton Maluhy Filho from the position of director of the Bank, effective September 30, 2024. In addition, on the same date, the Bank's Board of Directors appointed Mr. Gabriel Amado de Moura as interim director, effective October 1, 2024. He will hold this position until the next Ordinary Shareholders' Meeting, at which a successor director will be appointed. Also as of that date, Mr. Gabriel Amado de Moura will assume the position of Vice Chairman of the Board of Directors of Banco Itaú Chile.

It was also reported that Mr. Gabriel Amado de Moura would continue as Chief Executive Officer of Banco Itaú Chile until September 30 of this year. Mr. André Gailey would assume the position of Chief Executive Officer of the Bank as of October 1, 2024.

Appointment of Chief Executive Officer

On July 5, 2024, it was reported as an essential fact that the Board of Directors of Banco Itaú Chile agreed on that date to appoint Mr. André Gailey as the new Chief Executive Officer of the Bank as of October 1, 2024. It was reported that, until September 30, 2024, Mr. Gabriel Amado de Moura would continue to serve in his role as Chief Executive Officer of Banco Itaú Chile, and then join the Executive Committee of Itaú Unibanco and assume the position of CFO of said entity.

Likewise, the director and vice-president of the Board of Directors, Mr. Milton Maluhy Filho, reported that he would remain in that capacity until September 30, 2024 and that Mr. Gabriel Amado de Moura would be proposed as director and vice-president of the Bank's Board of Directors to replace him. which would be formalized in due course.

In addition, it was reported that as of that date (July 5, 2024), a transition process in the position of Chief Executive Officer would begin, in order to ensure due continuity in the management and administration of the Bank. Mr. Gailey has worked at Itaú for more than 20 years and currently serves as Regional CEO for Argentina, Uruguay and Paraguay. Previously, he led the Wholesale Products, Customer Desk and Wholesale Banking Planning areas.

Mr. André Gailey has a Law Degree from the University of São Paulo, a Master in Comparative Law and Finance from Stanford University, and an Executive MBA in Finance from INSPER, São Paulo.

Finally, the Board of Directors thanked Mr. Gabriel Amado de Moura for his outstanding management at Banco Itaú Chile since 2016, first as CFO and then, as of January 30, 2020, as CEO of the Bank, and wished him the greatest success in his new functions at Itaú Unibanco.

Note 5 - Significant Events, continued

Fine for non-compliance with article 156 of the General Banking Law and the provisions of No. 6 of Chapter 2-13 of the Updated Compilation of CMF Standards

Through an essential event dated July 4, 2024, Banco Itaú Chile reported that it became aware of Exempt Resolution No. 5,670 issued by the CMF on June 21, 2024, through which it was resolved to apply a fine to the Bank for the amount of 1,000 Unidades de Fomento. The foregoing, as a consequence of not complying with the provisions of article 156 of the General Banking Law and the provisions of No. 6 of Chapter 2-13 on expiration of deposits or any other credit in favor of third parties. the Updated Compilation of CMF Standards, that is, regarding the obligation to timely report to the General Treasury of the Republic, the debts that expired in the year 2023.

Total Payment Conditional Credit Facility to Increase in Loans (FCIC)

In March 2020, in response to the financial tensions generated by the impact of the Covid-19 pandemic, the Board of the Central Bank of Chile agreed to have a special line of credit called the Conditional Credit Facility for the Increase in Placements ("Line FCIC").

During the year 2020, Banco Itaú Chile used the FCIC Line for up to an amount of MCh\$3,007,200, through different disbursements against said line of credit.

On April 1, 2024, Banco Itaú Chile made a payment of the FCIC Line to the Central Bank of Chile for MM\$2,004,200.

On July 1, 2024, Banco Itaú Chile made the second and last payment of the FCIC Line for a total amount of MCh\$1,003,000, with no amounts pending payment regarding this credit facility.

Fine for non-compliance with Article 28 of Law No. 14,908 (Chilean Law on Payment of Alimony)

Through an material event dated May 7, 2024, Banco Itaú Chile was informed through of Exempt Resolution No. 4,043 issued by the CMF on May 3, 2024, in which the CMF resolved to apply to Banco Itaú Chile a fine of 636.16 "Unidades de Fomento" (a unit of account used in Chile), over Banco Itaú Chile's failure to comply with the provisions of Article 28 of Law No. 14,908 (the Chilean Law on Payment of Alimony).

Agreements Ordinary Shareholders' Meeting 2024 | Dividend Payment

At the Bank's Ordinary Shareholders' Meeting, held on April 25, 2024, it was agreed to distribute a dividend of \$492.122037309763 per share, to be paid from 30% of the profits for the year 2023. Likewise, the Board agreed that the remaining 70% of profits be retained.

Dividends were made available to shareholders as of April 30, 2024. In this way, shareholders who were registered in the Bank's Shareholder Registry at midnight on April 24 were entitled to receive dividends. of 2024, that is, those who are registered in said registry 5 business days in advance of the date established for payment.

Note 5 - Significant Events, continued

Resolutions made by the Extraordinary Shareholders' Meeting

Through an material event dated April 25, 2024, it was reported that an Extraordinary Meeting of the Board of Directors held on that same date approved – among other matters – to formally cancel the 6,556 back-up shares that remained on May 26, 2023 as a result of the completion of the exchange of shares that took place among the Banco Itaú Chile's shareholders over the Reverse Stock Split agreed at the Extraordinary Meeting of Shareholders of Banco Itaú Chile held on January 19, 2023 and approved by the CMF through Resolution No. 2215 issued on March 28, 2023.

As a result of the foregoing, the Extraordinary Shareholders' Meeting approved to amend Banco Itaú Chile's bylaws so that they reflect the resolutions made at such meeting, approving in the end a new wording of Banco Itaú Chile's bylaws, which completely replaces the current one.

On May 16, Banco Itaú Chile requested authorization from the CMF to amend its bylaws and draft a new wording of them, which replaces the current one in its entirety.

Summons to Ordinary and Extraordinary Shareholders' Meetings 2024

The Bank informed as an material event dated February 28, 2024 that the Board of Directors, in an ordinary meeting held on that same date, agreed to convene an Ordinary Shareholders' Meeting for April 25, 2024, at 10:00 a.m. at the Bank's offices located at *"Avenida Presidente Riesco 5537, piso 3, comuna de Las Condes, Santiago"*, in order to discuss matters within the competence of such meetings.

The Bank's Board of Directors agreed to propose to the Ordinary Shareholders' Meeting the distribution of 30% of the profits for fiscal year 2023, amounting to CLP\$106,466,050,151, as dividends to the shareholders, to the total of 216,340,749 validly issued outstanding shares of the Bank. Therefore, if the profit distribution is approved as just described, a dividend of CLP\$492.122037309763 would be distributed per share. In addition, the Board of Directors will propose to the Ordinary Shareholders' Meeting that the remaining 70% of the profits be classified as retained earnings.

Likewise, the Board of Directors of Itaú Chile agreed to call an Extraordinary Shareholders' Meeting, to be held immediately following the aforementioned Ordinary Shareholders' Meeting, in order to formally cancel the 6,556 back-up shares remaining on May 26, 2023 as a result of the completion of the share exchange that took place among the Bank's shareholders in connection with the Reverse Stock Split agreed at the Bank's Extraordinary Shareholders' Meeting held on January 19, 2023 and approved by the Financial Market Commission in Resolution No. 2215 issued on March 28, 2023.

Note 5 - Significant Events, continued

Reports cancellation of ADS registration with SEC

On February 19, 2024, the Financial Market Commission was informed by means of an essential fact that on February 18, 2024, the cancellation of the registration of the American Depositary Shares (“ADS”) issued by the Bank before the Securities and Exchange Commission of the United States of America and the termination of the Bank's reporting obligations before said entity.

In consideration of the above, the termination process of the Bank's ADS program has been fully concluded, reported by means of an essential fact dated October 30, 2023, and carried out since that same date, complying with the applicable regulatory deadlines.

Finally, it was stated that the common shares of Banco Itaú Chile will continue to be registered in the CMF Securities Registry and will also begin trading and listing on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange.

Note 6 - Reporting Segments

Segment reporting is determined by the Bank on the basis of its operating segments (Chile, which includes the New York branch, and Colombia, which includes Panamá), which are differentiated mainly by the risks and returns that affect them.

The reportable segments and the criteria used to inform the Bank's chief operating decision maker are in accordance with IFRS 8 "Operating segments".

a) Segments

Accordingly, the descriptions of each operating segment are as follows:

(i) Chile

The Bank's commercial activities in Chile are mainly located in the domestic market, the operations have been strategically aligned in five commercial areas directly related to the needs of its customers and the Bank's strategy, being these:

1) Itaú Corporate (a) Corporate and Investment Banking, (b) Institucional, (c) Multinational, (d) Real Estate and Construction Banking and (e) Large Companies Banking; 2) Retail Banking (a) Private Bank, (b) Personal Bank, (c) Itaú and (d) Condell; 3) Treasury; 4) Corporate; and 5) Other Financial Services.

The Bank manages these business areas using a reporting system for internal profitability. The operating results are regularly reviewed by the entity's highest decision-making authority for operating decisions as one single Cash Generating Unit, to decide on the resource allocation for the segment and evaluate its performance.

(ii) Colombia

Colombia has been identified as a separate operating segment based on its business activities. Its operating results are reviewed regularly by the entity's highest decision-making authority for operating decisions as one single cash generating unit, to decide about resource allocation for the segment and evaluate its performance, and separate financial information is available for it.

The commercial activities of this segment are carried out by Itaú Colombia S.A. and its subsidiaries.

The Bank did not enter into transactions with a particular customer or third party in excess of 10% of its total income during the years ended as of December 31, 2024 and 2023.

Note 6 - Reporting Segments, continued

b) Geographic Information

Banco Itaú Chile reports revenue by segment from external customers that is:

- Attributed to the entity's country of domicile and
- Attributed, in aggregate, to all foreign countries where the entity obtains revenue.

When income from ordinary activities from external clients attributed to a particular foreign country is significant, they will be disclosed separately. According to the previous, the group operates in two main geographical areas: Chile and Colombia. Chile segment includes the operations carried out by Itaú Chile New York Branch and Colombia segment includes the operations carried out by Itaú (Panamá) S.A. and Itaú Corredores de Seguros Colombia S.A.

Interest income and expense and repricing income and expense information for the years ended as of December 31, 2024 and 2023, for these geographic areas is shown below:

	For the years ended as of December 31,					
	2024			2023		
	Chile MCh\$	Colombia MCh\$	Total MCh\$	Chile MCh\$	Colombia MCh\$	Total MCh\$

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b) Hedge accounting

b.1) Fair value hedges

The Bank uses interest rate derivatives to manage its structural risk by minimizing accounting asymmetries in the Consolidated Statement of Financial Position. Through different hedging strategies, it redenominates an element originally at a fixed rate to a floating rate, thus decreasing the financial duration and consequently risk, aligning the balance sheet structure with expected movements in the yield curve.

(1) Only includes cash flows forecast portion of the hedge instruments used to cover interest rate risk.

b.2) Cash flow hedges

Cash flow hedges are used by the Bank mainly to:

- Reduce the volatility of cash flows on inflation-adjusted Consolidated Statement of Financial Position items through the use of inflation forward contracts and combinations of pesos and index-units swap contracts.
- Fixing the rate of a portion of the short-term liability pool in pesos, reducing the risk of a significant portion of the Bank's funding cost, while maintaining the liquidity risk in the liability pool.
- Setting the funding source rate at a floating rate, reducing the risk of an increase in the cost of funds.

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

The notional amounts of hedged items and hedging instruments for December 31, 2024 and 2023 are presented below, according to their maturities:

(1) Includes only that portion of the projected cash flows of the hedging instrument (derivative) that is used to hedge the risk defined in the hedging relationship.

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

The balance recognized in the Consolidated Statements of Other Comprehensive Income for cash flow hedges as of December 31, 2024 and 2023 is presented below:

	Portion Effective	
	As of December 31,	As of December 31,
	2024	2023
	MCh\$	MCh\$
Hedged items		
Loans and receivables to customers		
Loans (Inflation - indexed)	(8,634)	3,923
Commercial loans (interest rate)	9,499	38,017
Financial instruments at FVTOCI		
Chilean Treasury bonds	—	—
Time deposits and other deposits		
Time deposits	(10,514)	(34,917)
Debt instruments issued		
Senior bonds	490	5,305
Bonds with banks		
Interbank loans	(1,764)	(2,194)
Highly probable transaction		
Disbursement USD	2,307	(852)
Total	(8,616)	9,282

The effective portion generated by those cash flow derivatives was recognized in the Consolidated Statements of Changes in Equity as of December 31, 2024 and 2023.

The ineffective portion generated by cash flow derivatives is due to the fact that both the hedged item and the item being hedged are not a mirror image of each other, which means that the variations in value attributable to rate and restatement components are not fully offset, but remain within the range of effectiveness defined by the standard.

The following table presents the results generated by the hedging instruments used in the cash flow hedge. The effective portion is recognized in other comprehensive income while the ineffective portion is recognized in the statement of profit or loss. The profit or loss recognized for the years ended as of December 31, 2024 and 2023 is presented below:

	As of December 31,

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b.3) Hedge of net investments in foreign operations

Banco Itaú Chile, parent company with Chilean peso functional currency, has investments in foreign businesses corresponding to a branch in New York and businesses in Colombia. As a result of the accounting treatment that these investments must receive, fluctuations in the value of the investments caused by the variability of the exchange rate between the Chilean peso in relation to the U.S. dollar and the Colombian peso generate changes in the value of the parent company's equity. The objective of the hedges is to safeguard the value of the equity by managing the exchange rate risk of the investments.

Hedges of a net investment in a foreign business, including the hedging of a monetary item that is accounted for as part of a net investment, will be recorded in a manner similar to cash flow hedges, where:

- The ineffective portion will be recognized in income,
- The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge will be recognized in equity; the effects are presented below:

	As of December 31, 2024											Average Price

Note 15 - Intangible Assets, continued

d) Impairment

At the end of each reporting period, Banco Itaú Chile assesses whether there is any indication of impairment of any asset (including Goodwill). If this indication exists, or when proof of impairment is required, the Bank estimates the recoverable amount of the asset.

As of December 31, 2024, an impairment was recognized on software of MCh\$30 (MCh\$507 as of December 31, 2023) is recognized for Software.

As of December 31, 2024, the Bank determined the recoverable amounts on Goodwill, whereby the recoverable amount is greater than its carrying value, therefore the Bank concluded that there is no impairment to be recognized in accordance with the requirements of IAS 36 (See more details in note 40).

e) Restrictions

Banco Itaú Chile and subsidiaries have no restrictions on intangible assets as of December 31, 2024 and 2023. Additionally, no intangible assets have been pledged as collateral for the performance of obligations.

Note 16 - Fixed Assets

a) The breakdown of this item as of December 31, 2024 and 2023 is as follows:

Item	Useful life years	Remaining depreciation years	Net assets as of January 1, 2024	Gross balance	Accumulated depreciation	Net assets as of December 31, 2024
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	26	14	9,280	15,507	(6,476)	9,031
Land	—	—	2,994	2,979	—	2,979
Equipment	6	4	17,624	96,165	(84,037)	12,128
Other fixet asset	14	8	8,148	30,192	(23,303)	6,889
Total			38,046	144,843	(113,816)	31,027

Item	Useful life years	Remaining amortization years	Net assets as of January 01, 2023	Gross balance	Accumulated depreciation	Net assets as of December 31, 2023
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	26	14	8,514	15,268	(5,988)	9,280
Land	—	—	2,319	2,994	—	2,994
Equipment	6	2	19,312	95,941	(78,317)	17,624
Other fixet asset	14	8	9,912	33,084	(24,936)	8,148
Total			40,057	147,287	(109,241)	38,046

The useful life presented in the tables above corresponds to the total useful life and residual life of the fixed assets of the Bank and subsidiaries. The total useful life was calculated based on the expected use considering the quality of the original construction, the environment where the assets are located, the quality and level of maintenance carried out and the appraisal performed by external specialists independent from the Bank.

b) The changes in the gross balance of fixed assets as of December 31, 2024 and 2023 are as follows:

	Buildings	Land	Equipment	Other	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2024	15,268	2,994	95,941	33,084	147,287

Balances as of December 31, 2024	(6,476)	—	(84,037)	(23,303)	(113,816)

	Buildings	Land	Equipment	Other	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2023	(4,926)	—	(63,573)	(25,523)	(94,022)
Depreciation for the year	(400)	—	(7,599)	(3,699)	(11,698)
Sales and/or disposals for the year	3	—	552	5,574	6,129
Exchange differences	(665)	—	(7,715)	(1,479)	(9,859)
Reclassification to assets held for sale	—	—	—	—	—
Impairment	—	—	18	191	209
Balances as of December 31, 2023	(5,988)	—	(78,317)	(24,936)	(109,241)

- d) Banco Itaú Chile evaluates at the end of each reporting year whether there is any indication of impairment of any asset. If this indication exists, or when an impairment test is required, the Bank estimates the recoverable amount of the asset and recognizes it in the Consolidated Statement of Income. (see Note 40).
- e) The Bank and its subsidiaries have no restrictions on fixed assets as of December 31, 2024 and 2023. In addition, fixed assets have not been pledged as collateral for the performance of obligations. On the other hand, there are no amounts owed on fixed assets by the Bank as of the aforementioned dates.

Note 17 - Right of use and Lease Contracts Liabilities

a) Right to use asset for lease contracts

- (i) The Bank mainly has lease contracts for its branches and corporate building. The composition of the item as of December 31, 2024 and 2023 is as follows:

	Useful life years	Average remaining depreciation years	Net assets as of January 1, 2024	Gross balances	Accumulated depreciation	Net assets as of December 31, 2024
	No.	No.	MCh\$	MCh\$	MCh\$	MCh\$
Buildings	8	4	77,464	201,935	(85,462)	116,473

Remeasurements of liabilities due to modifications (2)	3,240	—	—	3,240
Exchange differences	7,796	2,623	—	10,419
Balances as of December 31, 2023	175,809	57,179	—	232,988

(1) Include contract renewals.

(2) Include remeasurement of liabilities due to contract amendments.

(iii) The changes in accumulated depreciation of assets for right to use leased assets for December 31, 2024 and 2023 are as follows:

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2024	(98,345)	(35,429)	—	(133,774)
Depreciation	(22,997)	(8,095)	—	(31,092)
Sales and/or disposals for the year	36,368	924	—	37,292
Exchange differences	(488)	(4)	—	(492)
Reclassifications	—	—	—	—
Balances as of December 31, 2024	(85,462)	(42,604)	—	(128,066)

Note 17 - Right of use and Lease Contracts Liabilities, continued

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2023	(74,513)	(28,341)	—	(102,854)
Depreciation	(23,190)	(6,535)	—	(29,725)
Sales and/or disposals for the year	3,758	1,925	—	5,683
Exchange differences	(4,400)	(2,478)	—	(6,878)
Reclassifications	—	—	—	—
Balances as of December 31, 2023	(98,345)	(35,429)	—	(133,774)

b) Lease contracts liabilities

(i) Lease contracts liabilities as of December 31, 2024 and 2023 are as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Lease contract liabilities	124,545	83,807
Total	124,545	83,807

The Bank and its subsidiaries have contracts with certain renewal options and for which there is reasonable certainty that such option will be exercised. In such cases, the lease period used to measure the liabilities and assets corresponds to an estimate of future renewals.

(ii) The changes in lease contract liabilities and cash flows as of December 31, 2024 and 2023 are as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Balances as of January 1st	83,807	94,575
Additions due to new contracts (1)	64,140	2,327
Disposals due to early termination	(14,537)	(1,174)
Interest expense	6,699	5,038
Remeasurements of the liabilities due to modifications (2)	51	3,240
Inflation rate adjustments	9,820	3,171
Exchange rate adjustment	28	(6)
Exchange differences	570	4,599
Capital and interest payments	(26,033)	(27,963)
Balances as of ended year	124,545	83,807

(1) Include contract renewals.

(2) Include remeasurement of liabilities due to contract amendments.

Note 18 – Taxes

a) Current taxes

The Bank and its subsidiaries, at the end of each reporting period, have established a provision for first category income tax, which was determined based on current tax legislation. The net provision for recoverable taxes has been reflected in assets for MCh\$18,175 as of December 31, 2024 (MCh\$115,949 as of December 31, 2023), as detailed below:

a.1) Current tax assets and liabilities by geographical area

	As of December 31, 2024			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax assets	111	824	79,490	80,425
Current tax liabilities	(61,253)	—	(997)	(62,250)
Total net	(61,142)	824	78,493	18,175

	As of December 31, 2023			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax assets	47,335	—	70,953	118,288
Current tax liabilities	(1,145)	—	(1,194)	(2,339)
Total net	46,190	—	69,759	115,949

(1) Correspond to the Itaú Chile New York Branch.

a.2) Current tax components by geographical area

	As of December 31, 2024			
	Chile	U.S.A. (1)	Colombia (2)	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Income tax with effect in profit and loss	(132,155)	—	(5,696)	(137,851)
Income tax with effect equity	10,917	—	—	10,917
Income tax, 27% rate	(121,238)	—	(5,696)	(126,934)
Less:				
Monthly Provisional Payments	58,661	824	42,824	102,309
Credit for training costs	1,000	—	—	1,000

Taxes to be recovered from previous years	170	—	41,365	41,535
Other credits	12	—	—	12
Total	(61,142)	824	78,493	18,175

(1) Correspond to the Itaú Chile New York Branch.

(2) Income tax rate of 40%

Note 18 - Taxes, continued

	As of December 31, 2023			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Income tax with effect in profit and loss	(53,581)	—	(3,661)	(57,242)
Income tax effect on equity, net investments hedge	9,018	—	—	9,018
Income tax, 27% rate	(44,563)	—	(3,661)	(48,224)
Less:				
Monthly Provisional Payments	26,944	—	43,541	70,485
Credit for training costs	1,200	—	—	1,200
Credit donations	888	—	—	888
Taxes to be recovered from previous years	60,974	—	29,879	90,853
Other credits	747	—	—	747
Total	46,190	—	69,759	115,949

(1) Correspond to the Itaú Chile New York Branch.

b) Income tax results

The tax expense for the years ended as of December 31, 2024 and 2023 consists of the following items:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Income tax expense:		
Current tax expenses	(137,851)	(57,242)
Deferred taxes:		
Deferred taxes expenses	21,479	27,012
Subtotal	(116,372)	(30,230)
Other	2	446
Net expense for income taxes	(116,370)	(29,784)

c) Reconciliation of effective tax rate

The reconciliation between the current statutory nominal income tax rates and the effective rates applied to the determination of the tax expense as of December 31, 2024 and 2023 is as follows

Nominal rates by geographic area	2024	2023
	Rate	Rate
Chile	27.0%	27.0%
Colombia (1)	40.0%	40.0%
United States	21.0%	21.0%

(1) On December 13, 2022, Law 2.277 was issued, which modified the tax rate to 35% starting in 2023. The modification also included an additional income tax surcharge to certain institutions of 5% for a fix period ended on 2027, resulting in a transitory consolidated tax rate of 40%.

Note 18 - Taxes, continued

The main tax effects, according to the nominal tax rates of the countries reported on a consolidated basis, are as follows:

	For the years ended as of December 31,			
	2024		2023	
	Tax Rate	Amount	Tax Rate	Amount
	%	MCh\$	%	MCh\$
Amount calculated by using the statutory rates	27.00	133,129	27.00	103,860
Equity price level restatement for tax purposes (1)	(12.02)	(59,263)	(16.04)	(61,714)
Exchange differences due to investments in Colombia, U.S.A and Panamá (2)	(1.64)	(8,072)	(3.52)	(13,532)
Exchange rate effect on net investments and other capital income (3)	8.41	41,483	(2.82)	(10,854)
Taxes in U.S.A	1.59	7,846	2.45	9,419
Other Adjustments	0.25	1,247	0.68	2,605
Totals	23.59	116,370	7.75	29,784

- (1) During the year ended December 31, 2024, the CPI factor used to restate the Tax-Basis Equity was 4.2% (compared to 4.8% in 2023).
- (2) This line reflects the differences in tax rates of other jurisdictions, with respect to the tax rate of Chile. It should be noted that Itaú Chile indirectly consolidates the profits of Itaú Panamá, which is a subsidiary of Colombia.
- (3) For tax purposes, the investments in Colombia and the U.S. are measured in U.S. dollars. The devaluation (appreciation) of the Chilean peso against the U.S. dollar can lead to taxable revenue (deductible expenses) for tax purposes without a corresponding effect on the accounting results. The figure presented here represents the income tax expense (income) due to the effect of the exchange rate on investments in Colombia and the United States. As part of its exchange rate risk management policy, the Bank has utilized market instruments to economically hedge against the tax effects generated by exchange rate fluctuations. The effect of these instruments, which offsets the tax effect discussed here, is recognized in the "Net exchange income (loss)" line of the Consolidated Income Statement for the year. Additionally, capital gains generated on sales of fixed-income instruments subject to the tax exemption under Article 104 of the Chilean Income Tax Law are not subject to income tax.

d) Effect of taxes recorded in equity

d.1) Tax effect of other comprehensive income that may be reclassified to income in subsequent years:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Effect of investments at FVTOCI	(589)	(1,853)
Effect of change in hedge accounting net investment	14,510	(2,398)
Effect of change in cash flow hedging	4,681	1,979
Total charge to other comprehensive income	18,602	(2,272)

d.2) Other comprehensive income that will not be reclassified to income in subsequent periods:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Income taxes related to changes in fair value of equity instruments designated at fair value through other comprehensive income	(706)	(5)
Income taxes related to defined benefits obligations	(409)	2,279
Total charge to other comprehensive income	(1,115)	2,274

Note 18 - Taxes, continued

Through other comprehensive income	—	—
Through income	—	—
Total deferred tax liabilities	—	—

Note 18 - Taxes, continued

g) Effects of Joint Circular No. 3,478 issued by the CMF and No. 47 issued by the Chilean Internal Revenue Service.

The information presented here does not include the transactions of entities that are consolidated in the Financial Statements nor the leasing and factoring transactions, but only those of the taxpayer Bank, as of December 31, 2024 and 2023.

Total assets at financial value and assets at tax value are reported, regardless of whether the transactions are related to each other or whether they should be included in the past-due portfolio columns.

The details of such transactions for the year 2024 are presented below:

Loans and receivables due due from customers as of December 31, 2024	Assets at Financial Statement value MCh\$	Assets at tax value		
		Total MCh\$	Secured non- performing portfolio MCh\$	Unsecured non- performing portfolio MCh\$
Commercial loans	11,633,420	11,681,569	44,998	151,476
Mortgage loans	7,197,328	7,197,328	7,905	29,532
Consumer loans	2,489,921	2,489,921	1,345	43,235
Total	21,320,669	21,368,818	54,248	224,243

Direct write-offs Art. 31 No. 4, second paragraph	206,569	Write-offs as per first paragraph	—
Forgiveness resulting in the release of provisions	—	Forgiveness as per third paragraph	—
Recovery or renegotiation of written-off loans	(45,096)		

Note 19 - Other Assets

a) As of December 31, 2024 and 2023, the composition of the item is as follows:

	<u>As of December 31, 2024</u>	<u>As of December 31, 2023</u>
	<u>MCh\$</u>	<u>MCh\$</u>
Other assets		
Assets to be leased out as lessor (1)	29,348	32,552
Cash collateral provided for derivative financial transactions (2)	890,612	352,856
Receivables from brokerage of financial instruments	45,391	30,596
Accounts receivable from third parties	48,529	68,945
Investment properties	2,480	3,473
VAT credit receivable	7,096	5,614
Prepaid expenses	21,743	29,499
Assets for revenue from contracts with customers	8,812	10,161
Valuation adjustments for macro hedges	—	1,823
Other cash collateral provided	3,379	2,577
Pending transactions	59,012	28,474
Other assets	12,853	24,071
Total	1,129,255	590,641

(1) Correspond to assets available to be delivered under the financial lease modality.

(2) Correspond to guarantees associated with certain derivative contracts. These guarantees operate when the valuation of the derivatives exceeds the thresholds defined in the respective contracts and may be in favor of or against the Bank.

Note 20 - Non-current Assets and Disposal Group and Liabilities Included in Disposal Group for Sale

- a) The composition of non-current assets and disposal group for sale and liabilities in disposal group held for sale is as follows:

	As of December 31, 2024 MCh\$	As of December 31, 2023 MCh\$
Assets received in payment or foreclosed at judicial auction		
Assets received in lieu of payment	25,014	14,914
Assets foreclosed in judicial auction	4,350	8,903
Provisions for Assets received in lieu of payment or foreclosed at judicial auction	(8,940)	(6,058)
Non-current assets held for sale		
Investments in companies	—	—

Totales	1,864,542	5,015,403

- (1) Corresponds to credits obtained through the use of the Conditional Credit Facility for Increased Loans (FCIC) granted by the Central Bank of Chile in response to the financial tensions generated by the expansion of the Covid 19 virus. Credits obtained through FCIC They are guaranteed by placements of high credit quality and/or bonds issued by the same Central Bank of Chile and have monthly maturities that are automatically renewable and successively for equal periods, with a maximum term of 4 years from March 30, 2020, this es, until March 30, 2024. The FCIC accrues at the Monetary Policy Rate (MPR) in force on the date of each operation. On July 1, 2024, Banco Itaú Chile made the second and last payment of the FCIC Line for a total amount of MM\$1,003,042, with no amounts pending payment regarding this credit facility.

Note 22 - Financial Liabilities at Amortized Cost, continued

c) Debt instruments issued

As of December 31, 2024 and 2023, the composition of the item is as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Debt instruments issued		
Letters of credit	9,049	13,879
Senior bonds	7,057,584	6,956,813

c) Provisions for employee benefit obligations

	Reference	As of December 31,	As of December 31,
		2024	2023
		MCh\$	MCh\$
Provision of short-term employee benefits	(1)	57,996	47,705
Provision of benefits to post-employment employees		—	—
Provision of long-term employee benefits	(d.1)	9,095	14,082
Provision of benefits to employees for termination of employment contract	(d.4)	5,846	4,432
Provision for payments to employees based on shares or equity instruments	(2)	7,443	6,945
Provision for obligations for defined contribution post-employment plans		—	—
Provision for obligations for post-employment defined benefit plans	(d.2)	28,565	30,245
Provision for other staff obligations	(d.3)	5,481	6,179
Total		114,426	109,588

(1) Includes the provision for the payment of performance bonuses, year-end bonuses and other compensation of a similar nature to employees.

(2) During 2021 and 2022, the Bank entered into an agreement consisting in the granting of an extraordinary long-term variable remuneration which will be paid in march 2025, 2026 and 2027, respectively, The remuneration is determined based on a defined nominal amount which will be adjusted by the variation of the share price in the value of the shares; this will be settled in cash when the agreement milestones are met.

d) The detail of the main aspects of long-term employee benefits is presented below:

d.1) Compensation for years of service (long-term)

Description: Annual payment in the month in which the employee completes years of service in Colombia (every 5 years, from 5 to 50 years of service).

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”) was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

Note 24 – Provisions for Contingencies, continued

The detail of the net benefit cost is as follows:

	As of December 31, 2024	As of December 31, 2023
	%	%
Assumptions		
Discount rate	8.50	7.75
Expected rate of salary increase	7.30	12.00
Inflation rate	5.10	9.50

The changes in the present value of the obligation for this type of benefit and the amounts recognized in the Consolidated Income Statement are determined using the Projected Unit Credit Method and consist of the following:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Balances as of January 1st	9,018	6,183
Net cost of benefits	792	2,109
Payments	(800)	(1,075)
Exchange differences	85	1,801
Total	9,095	9,018

The detail of the cost of the net benefit is as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Current benefit cost	1,105	2,057
Reduction - past service costs	(975)	(668)
Interest expense on the obligation	662	720
Balances as of end year	792	2,109

d.2) Pension plan

Description: Old Age or Survivors' Pension in accordance with the Social Security Law in Colombia and benefits acquired with the Entity.

Financing: The Projected Unit Credit Method is the method used to determine the present value of the benefit obligation and the cost associated with it. Under this method, the benefit obligation is the present value of the benefits earned for past service, with the plan's benefit calculated based on the projected salary as of the date on which the participant is assumed to receive the benefit. The plan does not have policies or associated assets, and therefore, no reimbursements. It is financing structured according to the financial conditions of the entity.

Note 24 – Provisions for Contingencies, continued

The detail of the cost of the net benefit is as follows:

	As of December 31, 2024 %	As of December 31, 2023 %
Assumptions		
Discount rate	8.50	7.75
Expected rate of pay increase	5.10	9.50
Inflation rate	5.10	9.50

The detail of the movements of the balances of the Pension Plan is as follows:

	As of December 31, 2024 MCh\$	As of December 31, 2023 MCh\$
Balances as of January 1st	30,245	20,153
Interest expense on the obligation	2,214	2,397
Payment	(3,164)	(3,658)
Actuarial losses (gains)	(632)	6,490
Exchange differences	(98)	4,863
Balances as of end year	28,565	30,245

d.3) Retroactive severance plan

Description: Retroactive severance plan prior to Law 50 of 1990 in Colombia.

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”), in English, was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

The summary of the economic assumptions is as follows:

	As of December 31, 2024 %	As of December 31, 2023 %
Assumptions		
Discount rate	7.25	7.25
Expected rate of pay increase	7.30	12.00
Inflation rate	5.10	9.50

Note 24 – Provisions for Contingencies, continued

The movements for this benefit as of December 31, 2024 and 2023 are detailed below:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Balances as of January 1st	328	276
Current service cost	89	150
Interest expense on debentures	16	22
Actuarial losses (gains)	(34)	(136)
Payment of benefits	(155)	(119)
Exchange differences	(2)	135
Balances as of end year	242	328

d.4) Retirement Bonus Plan

Description: Payment of a fixed amount at the time of retirement for retirement.

Financing: The method called “Projected unit credit” is the method used to determine the present value of the obligation for benefits and the cost associated with it. Under this method, the obligation for benefits is the present value of the current benefits for past services, but calculating the plan benefit based on the projected salary on the date on which the participant is supposed to receive the benefit.

The summary of the economic assumptions is as follows:

	As of December 31, 2024	As of December 31, 2023
	%	%
Assumptions		
Discount rate	8.50	7.75
Expected rate of pay increase	7.10	11.50
Inflation rate	5.10	9.50

The amounts recognized for this benefit were as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Balances at January 1st	726	446
Current service cost	(169)	(24)
Interest expense on debentures	97	50
Actuarial losses (gains)	(55)	110
Payment of benefits	(15)	(15)
Exchange differences	(4)	159
Balances as of end year	580	726

Note 24 – Provisions for Contingencies, continued

The effect recorded in the Consolidated Statement of Other Comprehensive Income as of December 31, 2024 and 2023, is as follows:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Pension plan	(632)	6,490
Retroactive severance plan	(34)	(136)
Retirement Bonus Plan	(55)	110
Total recognition of defined benefit obligations	(721)	6,464

Future payments

Future actuarial calculations may differ from the calculations presented, due to the following factors:

- The experience of the plans differs from those anticipated by the selected economic and demographic assumptions.
- Changes in economic and demographic assumptions.
- Expected increases or decreases as a natural part of the functioning of the methodology for these calculations (for example, the end of the amortization period or additional costs based on the financing situation of the plan).
- Changes in the characteristics of the plan or applicable law, and with respect to it, there are no significant events affecting the results presented since the last valuation.

Below is the detail of future payments for 2024 and 2023:

2024	Severance indemnity (long term)	Plan of pensions	Retroactive Severance plan	Plan bonus for retirement
	MCh\$	MCh\$	MCh\$	MCh\$
Year 2025	934	3,133	155	106
Year 2026	1,093	3,120	1	32
Year 2027	1,509	3,075	29	21
Year 2028	1,492	3,019	1	22
Year 2029	1,002	2,955	1	30
Year 2030- 2034	5,846	13,673	86	229

Pending transactions	73,379	44,695
Other liabilities	43,784	12,495
Total	697,161	690,863

- (1) This group includes obligations that do not correspond to business operations, such as price balances for purchases of materials, price balances or obligations under leasing contracts for the acquisition of fixed assets or provisions for expenses pending payment.
- (2) Correspond to approved dividends pending payment.
- (3) Corresponds to commissions associated with the financial advisory and insurance brokerage businesses that must be deferred in accordance with the applicable accounting standards.

Note 28 – Equity

a) Movements in equity accounts and reserves (attributable to the equity holders of the Bank)

As of December 31, 2024 and 2023, the paid capital of the Bank is represented by ordinary shares subscribed and paid, without nominal value, as presented below:

	Number of ordinary shares	
	As of December 31, 2024	As of December 31, 2023
Issued as of January 1,	216,340,749	973,517,871,202
Issuance of paid shares	—	—
Issuance of due shares	—	—
Repurchase of company issued shares	—	—
Share exchange (1)	—	(973,301,530,453)
Sales of company issued shares	—	—
Total	216,340,749	216,340,749

(1) On May 26, 2023, a share exchange (Reverse Stock Split) took place in which each shareholder received one new share in exchange for every 4,500 shares of the Bank. As a result of this operation, the Bank's capital has been divided into 216,340,749 shares in circulation, fully subscribed and paid, amounting to MCh\$2,687,951.

- Subscribed and paid shares**

As of December 31, 2024, and according to its balance on that date, the Bank's paid-in capital is represented by 216,340,749 subscribed and paid ordinary shares, without par value for a total of MM\$2,687,951. This amount is broken down into MCh\$2,692,826 of paid capital and MCh\$4,875 for expenses associated with the capital increase. Payments were made in December 2021 for MCh\$4,695 and subsequently MCh\$180 in February 2022, which were recorded as a reducing effect. of the same, in accordance with the instructions provided in Chapter B-4 of the Compendium of Accounting Standards issued by the CMF.

- Purchase and sale of own shares**

As of December 31, 2024 and 2023, there were no transactions for the purchase and sale of company-issued shares.

Note 28 – Equity, continued

(1) Includes 26,759,736 shares owned by ITB Holding Brasil Participações Ltda. under custody as of December 31, 2024 (26,944,619 shares owned by ITB Holding Brasil Participações Ltda. under custody as of December 31, 2023).

(2) The percentages included in this column have been rounded for ease of presentation. These Percentages have been calculated on the basis of the unrounded figures presented in the “No. Shares” column.

(3) In February 2024, the ADR program was terminated, according to what was reported to the market in Essential Facts of October 30 and November 20, 2023, and February 19, 2024.

(4) In October 2024, a corporate restructuring was carried out within the controlling group of Banco Itaú Chile. As part of this restructuring, a merger was agreed upon, under which CGB III SpA, SAGA II SpA, and SAGA III SpA, all shareholders of the Bank, were incorporated into the shareholder CGB II SpA. In addition, CGB II SpA changed its corporate name to Itaú Chile Participaciones SpA. The restructuring had no impact on the number and percentage of shares of the Itaú Unibanco Group in Banco Itaú Chile.

b) Dividends

At the Ordinary Meeting of the Shareholders of Banco Itaú Chile held on April 25, 2024, the shareholders agreed to distribute profits for MCh\$106,466 representing 30% of the profits for 2023.

	Income attributable to equity holders of Banks	Allocated to reserves and earnings Retained	Allocated to dividends	Percentage distributed	Shares	dividends Per share
	MCh\$	MCh\$	MCh\$	%	No.	CLP
Year 2023, (Shareholders Meeting April 2024)	354,887	248,421	106,466	30 %	216,340,749	492.12181
Year 2022, (Shareholders Meeting April 2023)	433,744	303,621	130,123	30 %	973,517,871,202	0.13366
Year 2021, (Shareholders Meeting March 2022)	279,765	196,423	83,342	30 %	973,517,871,202	0.08561

Note 28 – Equity, continued

Below is the composition of the basic and diluted profit, attributable to the owners of the Bank, as of December 31, 2024 and 2023.

Basic earnings and diluted earnings	For the years ended as of December 31,			
	2024		2023	
	No. of shares Millions	Amount MCh\$	No. of shares (1) Millions	Amount MCh\$
Basic earnings per share				
Net income for the year	—	376,627	—	354,887
Weighted average number of outstanding shares	216	—	216	—
Assumed convertible debt conversion	—	—	—	—
Adjusted number of shares	—	—	216	—
Basic earnings per share (Chilean pesos)	—	1,741	—	1,640
Diluted earnings per share				
Net income for the year	—	376,627	—	354,887
Weighted average number of outstanding shares	216	—	216	—
Dilutive effects:				
Assumed convertible debt conversion	—	—	—	—
Conversion of common shares	—	—	—	—
Options rights	—	—	—	—
Adjusted number of shares	216	—	216	—
Diluted earnings per share (Chilean pesos)	—	1,741	—	1,640

(1) In accordance with IAS 33, for the year 2023 the number of shares was adjusted retroactively in order to reflect the reverse stock split.

As of December 31, 2024 and 2023, there were no dilutive effects.

c) Valuation accounts

Financial instruments to FVTOCI Includes accumulated net changes in the fair value of investments at fair value with effect on other comprehensive income.

Equity instruments designated to FVTOCI Includes the accumulated net changes in the fair value of investments at fair value with effect on other comprehensive income. These results come mainly from minority investments, which are not recyclable.

Cash flows hedge: It includes the effects of hedges on the Bank's exposure to variations in cash flows that are attributed to a particular risk related to a recognized asset and/or liability, which may affect the results for the year.

Investment in foreign operations hedge: Corresponds to adjustments for hedges of net investment in foreign business.

Conversion reserves: It includes the effects of converting the Financial Statements of the New York Branch and Colombian subsidiaries, whose functional currencies are the US dollar and Colombian peso, respectively, to the presentation currency of Banco Itaú Chile (Chilean peso).

Defined benefits obligations reserves: This includes the effects of applying IAS 19 "Employee Benefits".

Minority investments: Includes the accumulated net changes in the fair value of minority investments.

Note 29 – Contingencies and Commitments

a) Lawsuits and Legal Proceedings

Lawsuits in Chile against the Bank with provision

As of the date of issuance of these Consolidated Financial Statements, legal actions have been filed against the Bank and its subsidiaries involving its transactions in the ordinary course of business. They are mainly lawsuits pending against the Bank related to loans and other matters, most of which, according to the Bank's Legal Services Divisions involved in the suits, present no risk of significant loss.

The amount of the claims amounts to approximately MCh\$138,291 as of December 31, 2024 (MCh\$105,258 as of December 31, 2023). However, Management's opinion based on reports from the Legal Division as of December 31, 2024, attended the procedural state of said trials, it is not possible at this time to conclude whether these could result in significant losses not contemplated by the Bank in these Consolidated Financial Statements. Notwithstanding the above, as of December 31, 2024, provisions amounted to MCh\$2,246 (MCh\$2,016 as of December 31, 2023) are maintained.

Itaú Colombia S.A.

Itaú Colombia S.A. and its subsidiaries are involved in civil, administrative and labor proceedings. The outstanding civil and administrative proceedings, they are related to banking transactions, and the remaining ones derive from the ownership of leased assets.

Such claims amount to MCh\$313,885 as of December 31, 2024 (MCh\$37,339, as of December 31, 2023). According to the evaluation of the expected results in each lawsuits the Bank has recorded a provision of MCh\$2,501 as of December 31, 2024 (MCh\$1,581 as of December 31, 2023). The increase is mainly due to claims received by Itaú Fiduciaria in its capacity as an agent on certain businesses managed. Among the lawsuits received, six are related to a real estate trust business in Bogota, for a total amount of MCh\$174.3467, as well as administrative proceeds with no monetary value. Itaú Fiduciaria believes it has acted in faithfully accordance with the terms established on the contracts, applicable regulations and will defend itself in all process. Based on the current status of the lawsuits, and considering that one case has resulted unfavorable on a first-instance ruling, a provision of MCh\$865 has been recognized. For the remaining lawsuits, the risk of loss is considered remote, and it is not possible to make a reasonable estimate of a potential loss.

Note 29 – Contingencies and Commitments, continued

b) Contingent loans

The following table shows the contractual amounts of the operations that oblige the Bank and/or its subsidiaries to grant loans:

	Contingent loans

Itaú Corredores de Seguros Limitada

In order to comply with Article 58, letter d) of the Chilean Decree with Force of Law (“DFL”) 251 of 1930, which states that, “Insurance brokers, in order to conduct business, must comply with the requirement of contracting insurance policies as determined by the Financial Market Commission, in order to correctly and fully comply with the obligations arising from its activities and especially regarding damages that may be incurred by insured parties taking policies through the brokerage house,” the subsidiary has renewed the following insurance policies:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Consorcio Nacional de Seguros S.A	04-15-2024	04-14-2025	60,000 and 500	Itaú Corredores de Seguros Ltda.

Itaú Corredores de Bolsa Limitada

In order to comply with articles 30 and 31 of Chilean Law 18,045, this subsidiary kept a bank guarantee certificate with the Chilean Electronic Stock Exchange and Santiago Stock Exchange, to ensure the correct and complete fulfillment of its obligations as stockbroker, The beneficiaries are the current or future creditors that the subsidiary has or will have derived from its transactions:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Mapfre Compañía de Seguros S.A	04-23-2024	04-22-2026	16,000	Bolsa Electrónica de Chile
Mapfre Compañía de Seguros S.A	04-23-2024	04-22-2026	4,000	Bolsa de Comercio de Santiago

In addition, the Company has contracted a comprehensive insurance policy to provide for possible situations of operational fidelity. The detail of the comprehensive insurance policy is as follows:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Orion Seguros Generales S.A.	12-19-2024	12-19-2025	5,000 y 10,000	Bolsa Electrónica de Chile

Itaú Corredores de Bolsa Limitada maintains shares in the Stock Exchanges, to guarantee simultaneous transactions for CLP\$11,575 million (CLP\$6,830 million as of December 31, 2023).

Itaú Corredores de Bolsa Limitada has been registered in the Registry of Portfolio Administrators since November 22, 2017. To comply with this registration, it has constituted a guarantee through Mapfre Compañía de Seguros S.A. for an amount of UF 10,000, for a period ending on June 18, 2026. This guarantee compliance with Articles 98 and 99 of Law No. 20,172, to ensure the faithful and full compliance with its Portfolio Management obligations. There are guarantees constituted for US\$100,000, equivalent to CLP\$100 million, to guarantee transactions with foreign traders, Pershing.

As of December 31, 2024, Itaú Corredores de Bolsa Limitada maintains fixed-income securities to guarantee transactions in the Securities Clearing and Settlement House (referred to as “CCLV”) for CLP\$6,586 million (CLP\$6,736 million as of December 31, 2023).

Note 29 – Contingencies and Commitments, continued

Itaú Administradora General de Fondos S.A.

During the year 2024, the Company has contracted Guarantee Bonds in order to guarantee the faithful fulfillment of the obligations of the Administrator for the administration of third party funds and the indemnification of the damages resulting from non-compliance in accordance with the provisions of Articles 12 and 13 of the Sole Law: of Funds No. 20,712.

Below are the guarantee and beneficiary forms that Itaú Administradora General de Fondos S.A. maintains in effect to date, which were required to comply with the obligations of portfolio management contracts, their committees, funds, payment of labor and social obligations with the contractor's workers:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Banco Itaú Chile	12-29-2023	07-10-2028	17,780	Corporación de Fomento de la Producción CORFO

Note 30 – Interest Income and Expense

This item includes accrued interest for all financial assets and liabilities, interest income and expenses whose implicit or explicit return is obtained by applying the effective interest rate method regardless of whether they are measured at fair value, as well as product rectifications as a result of accounting hedges, the foregoing is part of the income and expenses for interest that are shown in the Consolidated Statement of Income.

- a) The details of interest incomes, including the result for accounting hedge, for the years ended as of December 31, 2024 and 2023, is as follows

Interest income	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$

Subtotal	—	—
Financial result from financial write-offs of assets and liabilities not measured at fair value through profit or loss		
Financial assets at amortized cost	13,895	18,368
Financial assets at fair value through other comprehensive income	24,163	(1,188)
Financial liabilities at amortized cost	595	—
Issued regulatory capital financial instrument	—	—
Subtotal	38,653	17,180
Results from exchanges, readjustment and hedging of foreign currency		
Result from foreign currency exchange	132,189	165,922
Results from adjustments in exchange rate	—	—
Financial assets to be traded at fair value through profit or loss	—	—
Financial assets not held for trading compulsorily valued at fair value through profit or loss	—	—
Financial assets designated at fair value through profit or loss	—	—
Financial assets at fair value through other comprehensive income	—	—
Financial assets at amortized cost	938	187
Other assets	28	16
Financial liabilities at amortized cost	(28)	(6)
Financial liabilities designated at fair value through profit or loss	—	—
Financial liabilities designated at fair value through profit or loss	—	—
Issued regulatory capital financial instrument	—	—
Net result of derivatives in accounting hedges of foreign currency risk	2,642	7,769
Subtotal	135,769	173,888
Financial result from reclassification of financial assets due to a change in the business model		
From financial assets at amortized cost to financial assets to be traded at fair value through profit or loss	—	—
From financial assets at fair value with changes in other comprehensive income to financial assets to be traded at fair value through profit or loss	—	—
Subtotal	—	—
Other financial result from changes in financial assets and liabilities		
Financial assets at amortized cost	—	—
Financial assets at fair value through other comprehensive income	—	—
Financial liabilities at amortized cost	—	—
Obligations from lease contracts	—	—
Issued regulatory capital financial instrument	—	—
Subtotal	—	—
Other financial result from ineffective accounting hedge	(10,371)	453
Other financial result from accounting hedges of different kind	(18,657)	(6,198)
Subtotal	(29,028)	(5,745)
Total	226,507	117,459

Note 33 – Net Financial Income, continued

The result of financial assets or liabilities includes the amount of adjustments for changes in financial instruments, except for those attributable to interest accrued by application of the effective interest rate method of asset value adjustments, as well as the results obtained in their purchase and sale.

Financial results from exchanges, readjustment and hedging of foreign currency, including incomes from foreign currency trading, the differences derived from the conversion of monetary items in foreign currency to the functional currency and those generated by non-monetary assets in foreign currency at the time of their disposal.

Financial results declared in this note do not relate to any change in the business model the bank may have had.

Note 34 – Income from Investment in Companies

- a) Consolidated Statement of Income presents results from investments in companies for MCh\$3,343 and MCh\$4,562 for the years ended as of December 31, 2024 and 2023, respectively, as follows:

Company	For the years ended as of December 31,			
	2024		2023	
	Ownership interest %	Investment value MCh\$	Ownership interest %	Investment value MCh\$
Investments valued at equity value				
Transbank S.A.	8.7188%	999	8.7188%	2,356
Combanc S.A.	10.3295%	100	9.8114%	56
Imerc OTC S.A.	8.6624%	98	8.6624%	92
Dividends received from minority investments		2,146		2,058
Total		3,343		4,562

Note 35 – Non-Current Assets and Disposal Groups not Admissible as Discontinued Operations

The details of the item result of non-current assets and disposal groups not admissible as discontinued operations (assets received in payment) is as follows:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Result of non-current assets and disposal groups not qualifying as discontinued operations		
Net result for goods received in payment or adjudicated in judicial auction	8,226	2,996
Other incomes for goods received in payment or adjudicated in judicial auction	14,695	1,948
Provisions for adjustments to the net realizable value of assets received in payment or adjudicated in judicial auction	(16,849)	(2,468)
Write-offs of goods received in payment or adjudicated in judicial auction	(5,844)	(2,534)
Expenses for maintenance of goods received in payment or awarded in judicial auction	(1,534)	(1,069)
Non-current assets for sale	772	53
Total	(534)	(1,074)

Note 36 – Other Operating Income and Expenses

During the years ended as of December 31, 2024 and 2023, the bank presents other operating income and expenses according to the following detail:

a) Other operating incomes

Detail of other operating incomes, is as follows:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Compensation from insurance companies for claims other than operational risk events	2	—
Net income from investment properties	—	—
Income from issued card brands (VISA, MC, etc.)	992	71
Correspondent bank income	—	—
Income other than interests and commissions from lease agreements	—	—
Income from expense recovery	3,575	2,621
Other leasing income	13	552
Other income from assigned credits	564	2,214
Other income	12,496	12,524
Totals	17,642	17,982

b) Other operating expenses

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Expense of provisions for operational risk	(1,895)	(612)
Expense recoveries for operational risk events	3,786	3,404
Provisions for lawsuits and litigation	(304)	(524)
Other provisions for other contingencies	1,078	140
Expenses for credit operations of financial leasing	(1,160)	(918)
Provisions for restructuring plans	(220)	(5,338)
Expenses for credit operations of factoring	(220)	(204)
Expenses on issuance of financial instruments of regulatory capital	(38)	—
Losses from commercial decision	(452)	(2,970)
Expenses and provisions associated with loans under Law No. 20,027	(2,873)	—
Other operational expenses	(11,113)	(12,309)
Total	(13,411)	(19,331)

Note 37 – Employee Benefit Obligations Expenses

The details of the item compensation and personnel expenses for the years ended as of December 31, 2024 and 2023, is as follows:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Expenses for short-term employee benefit	(305,399)	(288,232)
Compensation	(204,253)	(196,219)
Incentives (performance-related bonus)	(71,280)	(60,979)
Profit-sharing	(29,700)	(30,698)
Other	(166)	(336)
Expenses for post employment employee benefits	—	—
Expenses for long-term employee benefit	(859)	(1,946)
Compensation	(859)	(1,946)
Incentives (performance-related bonus)	—	—
Other	—	—
Expense for employee benefits due to termination of employment contract	(18,048)	(21,410)
Severance indemnities	(18,048)	(21,410)
Other	—	—
Expenses for employee payments based on shares or equity instruments	(3,524)	(3,435)
Equity-settled share-based payment transactions	—	—
Cash-settled share-based payment transactions	(3,524)	(3,435)
Expenses for obligations for defined contribution post-employment plans	—	—
Expenses for obligations for post-employment defined benefit plans	(2,267)	(2,076)
Expenses for other obligations with personnel	—	—
Other personnel expenses	(26,903)	(22,993)
Training expenses	(2,926)	(1,884)
Expenses for nursery and kindergarten	(598)	(641)
Other	(23,379)	(20,468)
Total	(357,000)	(340,092)

Nota 38 – Administrative Expenses

The details of the item Administrative Expenses for the years ended as December 3, 2024 and 2023 is as follows:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Administrative expenses	(211,476)	(200,893)
Expenses for short-term leases	(1,814)	(1,776)
Expenses for low-value leases	—	—
Other expenses of obligations for lease contracts	(173)	(236)
Maintenance and repair of fixed assets	(34,147)	(30,838)
Insurance premiums except to cover operational risk events	(17,983)	(16,809)
Office supplies	(1,737)	(1,771)
IT and communications expenses	(49,812)	(50,339)
Lighting, heating and other services	(2,937)	(2,701)
Surveillance services and transportation of valuables	(4,826)	(5,422)
Expenses for personnel representation and travel	(3,274)	(2,410)
Legal and notarial expenses	(24,087)	(22,537)
Fees for review and audit of the financial statements by the external auditor	(1,538)	(1,497)
Fees for advice and consultancies carried out by the external auditor	—	—
Fees for advice and consultancies carried out by other auditing companies	(81)	(69)
Title classification fees	—	—
Fees for other technical reports	(21,288)	(17,699)
Fines applied by the Financial Market Commission	(61)	(65)
Fines applied by other agencies	(73)	(177)
Other general management expenses	(47,645)	(46,547)
Outsourced services	(40,678)	(36,229)
Data processing	(14,039)	(13,125)
Technological development service, certification and technological testing	—	(9)
External human resource administration service and external personnel	(60)	—
Appraisal service	(174)	(70)
Call center service for sales, marketing, quality assurance and customer service	(518)	(394)
External collection service	(3,991)	(3,276)
External ATM administration and maintenance service	—	—
External cleaning service, casino, files and documents custody, furniture and equipment storage	(651)	(520)
Sale services and product distribution	(252)	(227)
External credit evaluation service	—	—
Other outsourced services	(20,993)	(18,608)
Board of directors expenses	(1,059)	(951)
Board of directors compensations	(1,059)	(951)
Other board of directors expenses	—	—
Advertisement	(24,383)	(18,568)
Taxes, real estate tax and other legal charges	(51,497)	(44,123)
Real estate taxes	(462)	(376)
Municipal licenses	(1,220)	(1,459)
Other taxes other than income	(38,309)	(31,342)
Control contributions to the regulator	(11,506)	(10,946)
Other legal fees	—	—
Total	(329,093)	(300,764)

}

Note 39 – Depreciation and Amortization

Values corresponding to fees by concept of depreciation and amortization for the years ended as of December 31, 2024 and 2023, is as follows:

	For the years ended as of	
	December 31,	
	2024	2023
	MCh\$	MCh\$
Amortization of intangible assets	(67,691)	(65,029)
Depreciation for fixed assets	(10,345)	(11,698)
Depreciation and amortizations for assets with rights to use in leases	(31,092)	(29,725)
Depreciation of other assets for investment properties	—	—
Amortization of other assets per revenue asset from ordinary activities from costumer contracts	—	—
Total Depreciation and amortization	(109,128)	(106,452)

Note 40 – Impairment of non-Financial Assets

For the years ended December 31, 2024 and 2023, the detail is as follows:

	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Impairment of investments in associates	—	—
Impairment of intangible assets	(30)	(507)
Impairment of fixed assets	(162)	(101)
Impairment of right-of-use assets	—	—
Impairment of other assets for investment properties	—	—
Impairment of other assets for income from ordinary activities from contracts with customers	—	—
Gain on an acquisition through a business combination on highly advantageous terms	—	—
Total	(192)	(608)

At the end of each reporting period, Itaú Chile and its subsidiaries assess whether there is any indication of impairment of any asset.

Cash-generating units	As of December 31,	
	2024	2023
	MCh\$	MCh\$
Chile	3,123,143	2,895,740
Colombia	851,688	840,797

Note 40 – Impairment of non-Financial Assets, continued

Goodwill impairment test as of December 31, 2024

I. Goodwill Allocation

The allocation of the Goodwill to each of the CGUs identified generated in the reverse acquisition mentioned in Note 2 of the Significant accounting criteria used, and its changes are presented below:

Goodwill	Chile CGU	
	2024	2023
	MCh\$	MCh\$
Balances as of January 1,	492,512	492,512
Conversion difference	—	—
Impairment	—	—
Balances as of December 31,	492,512	492,512

II. Methodology Used by the Bank

Consistent with previous years, the recoverable amount of the Chile CGU has been determined using the Dividend Discount Model. This methodology considers the cash flows generated by the dividends distributed to shareholders over a perpetual projection horizon, discounted at the cost of capital rate as of the valuation date. In this way, the economic value of equity can be estimated using projections of dividend flows derived from financial budgets and other assumptions approved by management.

In its process of carrying out the impairment test of goodwill, management considered various sources of information, including the following:

- The existing historical information, which was reconciled considering those events judged as one-time and non-recurring.
- The budgets approved by Management.
- Information from external sources, such as reports from analysts, supervisors, Central Banks, and press releases.
- Observable market information, such as rate curves, inflation and growth projections.
- The competitive strategy defined for the Bank.
- The projected financing structure and its impact on the Bank's capital requirements and internal policy.

Note 40 – Impairment of non-Financial Assets, continued

III. Key assumptions used in the recoverable amount calculations

Key assumptions	As of December 31,	
	2024	2023
	%	%
Perpetuity rates	5.20	5.20
Projected inflation rates (1)	3.00	3.00
Discount rate	11.51	12.23
Loans growth	6,00 - 7,40	6.20 - 8.60
Solvency index limit	12,68 - 17,10	15.84 - 17.59

(1) This corresponds to the projected long-term inflation rate

- Projection and perpetuity period**

For the years 2024 and 2023, the cash flow projections were made with a 5 years periods through, 2029 and 2028, respectively. After this period, the present value of the cash flows for the years 2029 and 2028 is calculated, projected in perpetuity using growth rates of the Gross Domestic Product aligned with those expected for the markets in which the CGU operates.

- Loan and deposits**

The loan were projected for the periods prior to perpetuity, considering an annual increase of approximately 7.4% for Chile. The deposit portfolio was projected in relation to the established reciprocity target, with both concepts aligned with market growth expectations and target market share.

- Net income**

The projected net income was estimated based on the sensitivity analysis of GDP growth and the effects of inflation on the banking industry. The projected growth rate was obtained by considering the mix of products (consumer, housing, and commercial loan placements) and the target market share set by management. The projection of financing costs is primarily determined by the average balances of demand deposits, term deposits, and other liabilities.

- Discount rate**

The discount rate was considered to be the Cost of Equity (Ke) in local currency, which was used to discount the cash flows of the CGU. This calculation considered a premium for country risk, where the CGU maintains its transactions.

- Perpetuity Rate**

A growth rate in perpetuity was considered in accordance with the rates observed in the market where each CGU operates. Consequently, they were constructed considering local inflation and nominal GDP growth projections.

Note 40 – Impairment of non-Financial Assets, continued

• **Dividend Payment**

The dividend payment was made to maximize shareholders' cash flows, with the restriction that the solvency indicator (ratio of effective equity to risk-weighted assets) does not fall below the limits required by regulatory entities. In this way, a dividend of 30% in 2025, 40% in 2026 and 50% between 2027 and 2029, and 55% in perpetuity, was considered.

IV. Impairment Assessment Results

Due to the impairment assessment process described above, management concludes that the relationship between the recoverable amount and the book value of the CGU as of December 31, 2024, and December 31, 2023, is as follows:

Key assumptions	As of December 31,	
	2024	2023
	%	%
Recoverable amount / Carrying amount	125.60	111.78

The recoverable amount for each CGU corresponds to the value in use, as it is the largest amount when comparing fair value less costs to sell and value in use.

As of December 31, 2024, management has not identified an impairment charge that should be recognized in these Consolidated Financial Statements.

V. Pre- and post-tax rate reconciliation

The Bank has used the cost of equity (Ke) rate as the discount rate in its calculation of the recoverable amount, which is observable after taxes. The following table shows the effect of considering cash flows and discount rate before taxes:

	As of December 31,	
	2024	2023
	%	%
Discount rate	12.75	13.57
Recoverable amount / Carrying value	139.07	137.11

Note 41 – Credit Loss Expenses

a) Summary of credit loss expense for the years ended as of December 31, 2024 and 2023, is as follows:

Summary of credit loss in the year	For the years ended as of December 31,	
	2024	2023
	MCh\$	MCh\$
Expense of provisions constituted for loan credit risk	(483,380)	(430,911)
Expense (recovery) of special provisions for credit risk	59,699	14,632
Write-off credit recovery	100,149	65,904
Impairment due to credit risk of other financial assets at amortized cost	(21)	24
Impairment due to credit risk of financial assets at fair value through other comprehensive income	(302)	273
Total	(323,855)	(350,078)

b) Flow of provision expenses constituted for credit risk and expense for credit losses of loans for the years ended December 31, 2024 and 2023, is as follows:

Loan provision expense in the year	For the year ended as of December 31, 2024						Deductible guarantees FOGAPE Covid-19	Total

Note 44 – Fair Value of Financial Assets and Liabilities

This disclosure was prepared based on the application of the local regulatory guidelines stated in Chapter 7-12 “Fair value of financial instruments” of the CMF and IFRS 13 “Fair value measurement”. These standards have been applied to both financial assets and non-financial assets measured at fair value (recurrent and non-recurrent).

The following section details the main guidelines and definitions used by the Group:

Fair value. The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The transaction is carried out in the principal or most advantageous market and is not forced, that is, it does not consider factors specific to the Group that may influence a real transaction.

Market participants. Buyers and sellers in the principal (or most advantageous) market for the asset or liability that have all of the following characteristics:

- a) They are independent of each other, i.e. they are not related parties as defined in IAS 24 “Related Party Disclosures”, although the price in a related party transaction may be used as an input to a fair value measurement if the entity has evidence that the transaction was entered into at market terms.
- b) They are knowledgeable, having a reasonable understanding about the asset or liability and the transaction using all available information, including information that might be obtained through due diligence efforts that are usual and customary.
- c) They are able to enter into a transaction for the asset or liability.
- d) They are willing to enter into a transaction for the asset or liability i.e. they are motivated, but not forced or otherwise compelled, to do so.

Fair value measurement. When measuring fair value, the Group takes into account the same characteristics of the asset or liability that market participants would consider in pricing that asset or liability on the measurement date.

Aspects of the transaction. A fair value measurement assumes that the asset or liability is exchanged in an orderly transaction between market participants to sell the asset or transfer the liability at the measurement date under current market conditions. The measurement assumes that the transaction to sell the asset or transfer the liability takes place: (a) on the principal market for the asset or liability; or (b) in the absence of a principal market, on the most advantageous market for the asset.

Market participants. The fair value measurement measures the fair value of the asset or liability using the assumptions that the market participants would use in pricing the asset or liability, assuming that the participants act in their best economic interest.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Prices. Fair value is the price that will be received for the sale of an asset or paid for the transfer of a liability in an orderly transaction on the main (or most advantageous) market as of the measurement date under current market conditions (i.e. Starting price) regardless of whether that price is directly observable or estimated using another valuation technique.

Highest and best use of non-financial assets. The fair value measurement of these assets takes into account the market participant's ability to generate economic benefits through the highest and best use of the asset or through the sale of the asset to another market participant that would maximize the value of the asset.

Bank's own liabilities and equity instruments. The fair value measurement assumes that these items are transferred to a market participant on the date of measurement. The transfer of these items assumes that:

- a) A liability would remain outstanding and the market participant transferee would be required to fulfill the obligation. The liability would not be settled with the counterparty or otherwise extinguished on the measurement date.
- b) An entity's own equity instrument would remain outstanding and the market participant transferee would take on the rights and responsibilities associated with the instrument. The instrument would not be canceled or otherwise extinguished on the measurement date.

Default risk. The fair value of a liability reflects the effect of the default risk. This risk includes, but is not limited to, the entity's own credit risk. This risk is assumed to be the same before and after the liability is transferred.

Initial recognition. When an asset is acquired or a liability assumed in an exchange transaction involving that asset or liability, the transaction price is the price paid to acquire the asset or received to assume the liability (the entry price). In contrast, the fair value of the asset or liability is the price received to sell the asset or paid to transfer the liability (the exit price). Entities do not necessarily sell assets at the prices paid to acquire them. Likewise, they do not necessarily transfer liabilities at the price received to assume them.

Valuation techniques. The Bank will use techniques that are appropriate for the circumstances and for which sufficient data is available to measure the fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. In this sense, the following approaches stand out, being the first two the most used by the group:

- a) **Market approach** Uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities, or a group of assets and liabilities.
- b) **Income approach.** Converts future amounts for example cash flows or income and expenses to a single current (discounted) amount, reflecting current market expectations about those future amounts. The fair value measurement is determined based on the value indicated by the current market expectations about those future amounts.
- c) **Cost approach** Reflects the amount that would be required currently to replace the service capacity of an asset (current replacement cost).

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Present value techniques. Technique to adjust the discount rate and expected cash flows (expected present value). The present value technique used to measure the fair value will depend on the specific facts and circumstances of the asset or liability being measured and the availability of sufficient data.

Components of the present value measurement. Present value is the tool used to link future amounts (e.g. cash flows or values) to a present amount using a discount rate. A fair value measurement of an asset or a liability using a present value technique captures all the following elements from the perspective of market participants at the measurement date:

- a) An estimate of future cash flows for the asset or liability being measured.
- b) Expectations about possible variations in the amount and timing of the cash flows representing the uncertainty inherent in the cash flows.
- c) The temporary value of money, represented by the rate on risk-free monetary assets that have expiration dates or duration that coincides with the period covered by the cash flows and do not raise uncertainty in the temporary distribution or risk of default for the holder (that is, risk-free interest rate).
- d) The price to bear the uncertainty inherent in the cash flows (i.e., a risk premium).
- e) Other factors that market participants would take into account in these circumstances.
- f) For a liability, the default risk related to that liability, including the entity's own credit risk (i.e. the debtor's).

Fair value hierarchy. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets and liabilities (Level 1 inputs) and lowest priority to unobservable inputs (Level 3 inputs). Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Determination of fair value

The following is a summary of the fair values of the main financial assets and liabilities as of December 31, 2024 and 2023, including those that are not presented at fair value in the Consolidated Statement of Financial Position.

	As of December 31, 2024		
	Carrying	Estimated fair value

(a) Correspond to assets and liabilities that are measured and recognized at fair value in the financial statements.

(b) Correspond to assets and liabilities that are measured and recognized on a basis other than fair value in the financial statements. The fair values presented here are for disclosure purposes only and have no impact on the balances in the financial statements.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

In addition, the fair value estimates presented above do not attempt to estimate the value of the Group's profits generated by its business, nor future business activities, and, therefore, do not represent the value of the Group as a going concern.

The following section describes the methods used to estimate fair value:

a) Measurement of the fair value of assets and liabilities for disclosure purposes (Non-recurring)

Cash, short-term assets and short-term liabilities

The fair value of these items approximates their book value given their short-term nature. These items include:

- Cash and deposits in Banks
- Cash in the process of collection
- Rights for repurchase agreements and securities loans and obligations for repurchase agreements and securities loans
- Demand deposits and other demand obligations
- Other financial obligations

Loans

The fair value of loans is determined using a discounted cash flow analysis. In the case of mortgage loans and consumer loans, the cash flows were discounted by using the effective average placement rate of the last month of the reporting period for each type of product. The fair value of commercial loans is determined using a discounted cash flow analysis, using a risk-free interest rate adjusted for expected losses from debtors based on their credit quality. The credit risk adjustment is based on variables observable in the market and the Group's policies for qualitative and quantitative credit risk methodologies.

This methodology was applied to:

- Interbank loans
- Loans and accounts receivable from customers

Financial instruments at amortized cost

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Medium and long-term liabilities

The fair value of medium and long-term liabilities is determined using a discounted cash flow analysis, using an interest rate curve that reflects current market conditions at which the entity's debt instruments are traded. Medium and long-term liabilities include:

- Term deposits and other term loans
- Interbank borrowings
- Debt instruments issued
- Instruments of regulatory capital

b) Value Measurement of financial assets and liabilities for recording purposes (recurring)

Financial instruments

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers. These financial instruments are classified as follows:

- Financial instruments held for trading at fair value through profit or loss
- Financial instruments at fair value with changes in other comprehensive income

Financial derivative contracts

The estimated fair value of derivative instruments is calculated using prices quoted in the market for financial instruments with similar characteristics. The methodology recognizes the credit risk of each counterparty. The adjustment is known internationally as counterparty risk adjustment, which is composed of CVA (Credit Value Adjustment) and DVA (Debit Value Adjustment), the sum of both risk adjustments the effective counterparty risk that must be recognized. This adjustment is periodically recorded in the Consolidated Financial Statements.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

As of December 31, 2024, the portfolio of derivative contracts both in Chile and Colombia have an accumulate net effect of MCh\$(5,282) (MCh\$(4,229) as of December 31, 2023)

c) Fair value hierarchy

IFRS 13 establishes a fair value hierarchy that classifies assets and liabilities based on the characteristics of the data that the technique requires for its valuation:

- Level 1

Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Entity can access at the measurement date. The inputs needed to value the instruments in this category are available daily and used directly.

In the case of Currency, Shares and Mutual funds, prices are observed directly in over-the-counter markets and the Stock Exchange. These prices correspond to the values at which the exact same assets are traded. As a result, the portfolio valuation does not require assumptions or models of any type.

For instruments issued by the Chilean Central Bank and the Chilean Treasury, benchmark prices are used. Benchmark prices are defined using similar durations, type of currency and are traded the equivalent of every day. The valuation of these instruments is identical to the valuation of the Santiago Stock Exchange, which is a standard international methodology. This methodology uses the internal rate of return to discount the instrument's cash flows.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Level 2

The specific instrument does not have daily quotes. However, similar instruments can be observed (e.g. same issuer, different maturity; or different issuer, same maturity and risk rating). In general, they are diverse combinations of pseudo-arbitration. Although the inputs are not directly observable, observable inputs are available with the needed periodicity.

In this category, instruments are valued by discounting contractual cash flows based on a zero-coupon curve determined through the price of instruments with similar characteristics and a similar issuer risk. The income approach is used, which converts future amounts to present amounts.

For derivative instruments within this category, quotes from other-the-counter transactions reported by the most important brokers in the Chilean market and the Bloomberg platform are used. The inputs observed include forward prices, interest rates and volatilities. Based on these inputs, market curves are modeled. They are a numerical representation of the opportunity costs of the instrument's cash flows or the price volatility of an asset. Finally, cash flows are discounted.

The Black and Scholes model is used for options based on prices of brokers in the OTC market. For money market instruments, prices of transactions on the Santiago Stock Exchange are observed and used to model market curves.

For corporate or bank bonds, given the lack of market depth, the Bank uses transactions (if any) in the Chilean market, on foreign markets, zero-coupon curves of risk-free instruments, adjustment curves, spread modeling, correlation with similar financial instruments, etc. and gives market curves as the final result. These market curves are provided by a pricing supplier and are widely accepted by the market and its regulators.

- Level 3

This is used when prices, data or necessary inputs are not directly or indirectly observable for similar instruments for the asset or liability as of the valuation date. These fair value valuation models are subjective in nature. Therefore, they base their estimate of prices on a series of assumptions that are widely accepted by the market.

Due to the lack of liquidity in the basis of the active banking rate (TAB) over the chamber rate (camera), the price is not observable and, therefore, models must be used to estimate the future cash flows of the contract. This spread is calculated on a historical basis using the IRS with the greatest market depth, which is the chamber swap.

In addition, the Bank offers American forwards to meet its customers' needs. They do not have a secondary market and, therefore, their value is estimated using an extension of the Hull-White model, used widely by the financial services industry.

With respect to financial assets, a negotiation is not required, mandatorily valued at fair value with changes in results, the valuation is made based on the determination of a rate that allows obtaining the fair value based on market references:

Note 44 – Fair Value of Financial Assets and Liabilities, continued

- Determining an average rate from “Comparable Instruments” according to the rating of the issuer and term of the instrument.
- Decomposing the rate into a risk-free base observable in the market and a spread that represents the credit risk of the issuer.

The periodic valuation of the instrument is carried out based on the value of the risk-free rate of each day plus the determined credit spread.

The table below summarizes the impacts on the portfolio of a recalibration of the models based on a stress scenario, recalibrating parameters with the shock incorporated.

Impact calibration	As of December 31, 2024

e) Disclosures Regarding Level 3 Assets and Liabilities

Level 3 assets and liabilities are valued using techniques that require inputs that are not observable on the market, for which the income approach is used to convert future amounts to present amounts.

This category includes:

- Financial derivative instruments indexed to the TAB rate, this rate is comprised of an interbank rate and a liquidity premium charged to financial institutions and is determined using a short-rate model with mean reversion.
- American forward options.
- Financial assets whose contractual cash flows have not met the conditions of the SPPI test.
- Corporate bond whose data are not observable in the market.

As none of these products has a market, the Bank uses financial engineering valuation techniques that use unobservable variables.

These techniques use as transaction prices from the main financial instrument markets and assumptions that are widely accepted by the financial services industry. Using this information, unobservable variables are constructed such as: adjustment curves, spreads, volatilities and other variables necessary for the valuation. Lastly, all of the models are subject to internal contrasts by independent areas and have been reviewed by internal auditors and regulators.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

None of these products generate significant impacts on the Bank's results as a result of recalibration. The American forward is only offered for the US dollar-Chilean peso market and until now, given the important differential between these interest rates, the product behaves like a traditional forward. The TAB swap does not have significant impacts on the valuation as the modeled liquidity premiums have a quick mean reversion for the short part and low volatility for the long part, concentrating on the book's sensitivity in the longest part of the curve.

The following table presents a reconciliation of assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2024 and 2023.

Reconciliation level 3	As of December 31, 2024

Note 47 – Risk Management

The Bank and its subsidiaries, through their activity, are exposed to several types of risk mainly related to loans portfolio and financial instruments. Risk management policies are established in order to identify and analyze the risks faced by the Bank, establish adequate limits and controls, monitor risks and comply with limits. Risk management policies and risk management structures are periodically reviewed to reflect changes in the institution's activities. The Bank, through its rules and procedures, intends to develop an adequate control environment, in which all employees understand their functions and responsibilities.

The main activities and policies of the Bank in terms of risk management are described below.

(A) Risk Management Structure

(i) Board of Directors

In the Bank and its Subsidiaries, the Board of Directors plays a prominent role in corporate governance. It is responsible for establishing and monitoring the Bank's risk management structure, for which it has a corporate governance system aligned with international best practices and Chilean regulations, mainly from the CMF. One of its main functions is to ensure the existence of measures that allow senior management to be supervised, evaluated and guided so that their actions are in line with best practices and defined levels of risk appetite. To this end, a governance structure has been created made up of various committees and internal standards. These committees and standards establish behavioral guidelines for the Bank's employees and help them perform their functions related to risk control and management.

(ii) Audit Committee

The Audit Committee is responsible for monitoring the control environment and the effectiveness and efficiency of the company's internal control systems as well as the compliance with regulations and internal standards, including oversight of the internal audit unit. The Audit Committee is also responsible for proposing to the Directors' Committee a list of external auditors and risk rating agencies for the Bank and subsidiaries. In addition, the Audit Committee shall be responsible for supervising the different aspects that have to do with the maintenance, application and operation of the Bank's internal controls, and shall be responsible also for closely monitoring compliance with the standards and procedures that govern its practice. It must also have a clear understanding of the risks that the Bank's business may pose to the institution and their mitigation.

To establish a link with the Audit Committee, the Board of Directors will appoint at least two of its members to this Committee. These members must inform the Board of Directors of the situations and facts the Committee is dealing with, thus committing the responsibility of the Bank's directors, both in self-control policies that are established and practiced by the institution, as well as in the compliance with the legal and regulatory standards to which the Bank is subject.

Note 47 – Risk Management, continued

The Audit Committee must reinforce and support both the role of the Bank's Internal Audit (also called Internal Comptroller in the CMF regulations) and its independence from management, and act as a liaison and coordinator of the tasks between the internal audit and the external auditors, acting as a liaison between the latter and the Bank's Board of Directors.

(iii) Director's Committee

The purpose of the Director's Committee is to make the self-regulation of the Bank and other entities within the scope of its competence stronger, thus making the performance of the Board of Directors more efficient by incorporating greater oversight over the activities carried out by management.

It will also be responsible for adopting the necessary resolutions to protect shareholders, especially minority shareholders, examining executive compensation systems and approving related party transactions.

In its role as overseer of corporate activity, the Directors' Committee must inform the market in the event of violations or major corporate events, as well as transactions that the company carries out with parties related to the controlling shareholder or takeovers in any form.

(iv) Integral Risk Management Committee

The objective of this Committee is to propose, and support the Board of Directors in, the definition of the risk appetite and the general policy framework that allows an adequate alignment with the Bank's global strategy. Oversee the correct identification, measurement and control of all risks, allocate capital to identified risks and meet regulatory requirements.

(v) Financial Management and Market Higher Commission (ALCO)

After the Board of Directors and its specialized committees, the Financial Management and Market Higher Commission (hereinafter, also "ALCO") is the highest body involved in the management of the institution's financial policies.

The main objective of the Commission is to follow the financial guidelines established by the Board of Directors. In this regard, it must approve and supervise the financial strategies that guide the Bank in terms of the composition of its assets and liabilities, cash inflows and outflows, and transactions with financial instruments.

It must ponder the various alternatives available to make decisions that ensure the highest and most sustainable profitability with financial risk levels compatible with the business, current regulations and internal standards.

(vi) Anti-Money Laundering Committee Superior (AML)

The main purpose of this Committee is to plan and coordinate the activities of compliance with the policies and procedures for anti-money laundering and prevention of funding of terrorism, to pay attention to the work carried out by the Compliance Officer, in accordance with the applicable regulations in force, as well as to adopt agreements aimed at obtaining improvements to the prevention and control measures proposed by the Compliance Officer.

Note 47 – Risk Management, continued

(vii) Operational Risk Higher Commission

The purpose of this Commission is to identify, understand and evaluate the risks involved in the Bank's processes and businesses and to define operational risk management guidelines for the Bank and evaluate the results of the audit and compliance systems. It is also responsible for defining the operational risk management framework and the structure and policies for the identification, measurement, evaluation and monitoring of risk and business continuity. In addition, it reviews the follow-up and adequacy of regulatory commitments and emerging regulations.

Evaluate the status of critical processes that are directly related to the Bank's operational risk, according to the current regulations of the Financial Market Commission, in order to detect and correct the deficiencies that may be affecting the Bank and ensure proper implementation of regulatory changes.

The goal is to ensure that critical processes run under a control environment that allows the Bank to operate with stability and consistency, achieving the objectives consisting in confidentiality, integrity and availability of information resources.

(viii) Ethics and Compliance Higher Commission

The main purpose of this Commission is to define, promote and ensure high standards of professional and personal excellence in the behavior of all Banco Itaú Chile employees, its local subsidiaries, and the representation office in Peru (the "Representation Office"). This Commission must always be guided by corporate principles and values that reflect Banco Itaú Chile's vision, philosophy and good business practices.

The Commission must evaluate, and make decisions on, issues of conduct and ethics in business and operations. Monitor and examine compliance with policies and procedures related to the ethical conduct of the Bank's employees and suppliers.

Also, ensure the application of the Regulatory Compliance Model within the framework of the definitions established by this Commission; pay attention to the work performed by the Compliance Officer and the AML in these matters; and make agreements to obtain improvements to the control measures proposed by the Compliance Officer.

The Commission must promote, and may request, information from the international units, through the Compliance & AML Sub-Management, on the matters discussed herein, in order to align the ethical and regulatory standards across the Banco Itaú Chile Group entities.

Note 47 – Risk Management, continued

(ix) Capital Management Higher Commission

The Senior Capital Management Higher Commission was created to assist the Board of Directors and the Bank's management in the evaluation and management of market and liquidity risks, earnings, and capital adequacy, in accordance with the economic principles and standards established in local regulations, and in Basel I, II and III as applicable, in order to provide oversight and management of market and liquidity risks, accounting management and capital principles, to review the effectiveness of risk and capital policies and limits, and to review compliance with risk, liquidity and capital policies and procedures in the company.

(x) Credit Higher Commission

The purpose of this Commission is to resolve the transactions and matters submitted to its knowledge, under the defined limits and procedures, ensuring the application of and compliance with the current credit risk policies defined by Banco Itaú Chile (the "Bank").

(xi) Wholesale Credit Higher Commission

The objective of the Wholesale Credit Commission is to monitor the evolution of the Bank's wholesale portfolios in terms of their risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. Analyze the behavior of the wholesale portfolio, delinquency, cost of credit, industry or economic groups concentrations and watchlist. Evaluate debt collection management and strategy, collateral structure and market benchmarks.

Discuss and propose credit and credit appetite policies for the wholesale segment. Identify emerging portfolio risks and prioritize mitigation initiatives.

(xii) Retail Credit Higher Commission

The objective of the Higher Retail Credit Commission is to monitor the evolution of the Bank's retail portfolio in terms of its risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. In this regard, the Commission must consider in its analysis the competition, the movements of the most relevant players and the main risks that may affect portfolio management, as well as the projects that have an impact on this matter.

(xiii) Model Evaluation Technical Commission

The purpose of this Commission is to analyze and propose the credit risk, financial risk and operational risk management models according to the different levels determined by the Models Policy.

Note 47 – Risk Management, continued

(xiv) Internal Audit Corporate Management

The main function of Internal Audit is to assist the Board of Directors and Senior Management by independently evaluating the maintenance, implementation and proper operation of the Bank's internal control system, which also involves the oversight of compliance with standards and procedures.

(xv) Code of Conduct and Market Information Manual

Our clients' trust is critical to our success. Therefore, all employees and directors must strive to preserve this trust by strictly complying with the General Code of Conduct.

(B) Main Risks and Requirements Affecting the Bank and its Subsidiaries:

(i) Credit Risk

Credit risk is the risk that a client or a counterparty fails to meet its contractual obligations, resulting in a financial loss for the Bank. The Bank's main income-generating activity is lending to customers, so credit risk is one of the main risks to be managed. Credit risk arises primarily from loans and advances to customers and other banks (including related loan commitments such as loan or credit card facilities), investments in debt securities and derivatives that constitute an asset position. The Bank takes into account all the elements of exposure to credit risk, such as counterparty default risk, geographic risk and sectoral risk, for the purposes of its management.

Credit Risk Management

The Bank's credit commissions are responsible for managing the Bank's credit risk through:

- Ensure that the Bank has appropriate credit risk practices, including an effective internal control system, to systematically determine adequate provisions in accordance with the policies and procedures established by the Bank, IFRS and supervisory guidance relevant.
- Identify, assess and measure credit risk across the Bank, from an individual instrument to a portfolio level.
- Create credit policies to protect the Bank against identified risks, including the requirement to obtain guarantees from borrowers, perform a solid ongoing credit assessment of borrowers and continuously monitor exposures against internal risk limits.
- Limit concentrations of exposure by type of asset, counterparties, sector, credit rating, geographic location, etc.
- Establish a solid control framework in relation to the authorization structure for the approval and renewal of lines of credit.
- Develop and maintain the Bank's risk classification to categorize exposures according to the degree of default risk. The degrees of risk are subject to periodic review.
- Develop and maintain the Bank's processes to measure the Expected Credit Loss "ECL", including credit risk monitoring, the incorporation of prospective information and the method used to measure ECL.
- Ensure that the Bank has policies and procedures to properly maintain and validate the models used to assess and measure ECL.

Note 47 – Risk Management, continued

- Provide advice, guidance and expertise to business units to promote best practices across the Bank in credit risk management.

Credit Quality

The following table offers an analysis of the gross amount in arrears in books of loans and advances to customers by maturity:

	Balances as of December 31, 2024			
	Less than 30 days past due	Between 30 and 89 days due	More than 90 due	Total overdue
	MCh\$	MCh\$	MCh\$	MCh\$
Interbank loans	—	—	—	—
Loans and accounts receivable from customers				
Commercial loans	311,361	168,731	401,022	881,114
Mortgage loans	215,353	124,651	132,118	472,122
Consumer loans	138,861	108,417	92,836	340,114
Total	665,575	401,799	625,976	1,693,350

Total	573,977	345,202	632,979	1,552,158

Note 47 – Risk Management, continued

Maximum Exposure to Credit Risk

For financial assets recognized in the Consolidated Statements of Financial Position, exposure to credit risk is equal to their book value. For the financial guarantees granted, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the guarantee were called.

The following table shows the maximum exposure to the Bank's credit risk per financial asset as of December 31, 2024 and 2023, for different balance items, including derivatives, without deducting real guarantees or other credit enhancements received:

Maximum credit risk exposure	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Financial assets to be traded at fair value through profit or loss		
Financial derivative contracts	3,980,222	2,965,161
Financial debt instruments	713,984	321,656
Other	64,175	44,552
Financial assets not held for trading valued mandatorily at fair value through profit or loss	8,650	39,012
Financial assets designated at fair value through profit or loss	—	—
Financial assets at fair value through other comprehensive income	3,077,290	4,068,664
Derivative financial instruments held for hedge accounting	79,887	91,105
Financial assets measured at amortized cost	—	—
Investments under resale agreements	212,225	210,971
Financial debt instruments	1,176,360	2,708,960
Interbank loans	—	1,516
Loans and accounts receivable from customers - Commercial	16,716,618	16,713,220
Loans and accounts receivable from customers - Mortgage	7,933,264	7,535,530
Loans and accounts receivable from customers - Consumer	3,240,358	3,321,211
Off-Balance Sheet Assets		
Contingent loans	—	—
Guarantees and bonds	1,005,704	663,698
Letters of credit for merchandise circulation operations	146,163	124,994
Transactions related to contingent events	2,371,792	2,044,349
Available lines of credit	—	—
Other loan commitments	348,519	438,678
Lines of credit of free disposal of immediate cancellation	5,818,330	5,351,695
Debt purchase commitments in local currency abroad	7,337	4,920
Other contingent loans	—	—
Total	46,900,878	46,649,892

The following is a summary of the provisions for loan losses:

	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Loans and accounts receivable at amortized cost	(834,843)	(825,400)
Interbank loans	—	(223)
Provisions for contingent loan risks	(40,257)	(40,865)
Total provisions	(875,100)	(866,488)

Note 47 – Risk Management, continued

The following table shows the concentration of credit risk by sector for financial assets:

	As of December 31, 2024			As of December 31, 2023

Note 47 – Risk Management, continued

Guarantees and Other Credit Enhancements

In order to mitigate credit risk, guarantees have been established in favor of the Bank, credit enhancements and other actions that mitigate total exposure.

The main types of guarantees provided by customers are as follows:

For loans to companies	For loans to individuals
- Agricultural land	- Mortgage
- Machinery and/or equipment	- Parcels or urban land
- Ships and maritime aircraft	- Vehicles
- Buildings for specific purposes under construction	
- Mining infrastructure	
- Inventory	
- Agricultural assets	
- Industrial assets	
- Biological assets	
- Other guarantees	

The guarantees taken by the Bank to ensure the collection of the rights reflected in its loan portfolios are mortgage-type guarantees (urban and rural properties, agricultural land, ships and aircraft, mining claims and other assets) and pledges (inventory, agricultural assets, industrial assets, plantations and other pledged assets).

The procedures used for the valuation of the guarantees are carried out in accordance with the best market practices, which include the use of appraisals in real estate guarantees, market price in stock securities, value of shares in an investment fund, etc. All collateral received must be properly legalized and registered in the corresponding registry.

On the other hand, financial derivative operations are guaranteed by guarantee agreements, which are deposited or transferred by a third party in favor of the other, these can be in cash or in financial instruments, and reduce the counter party's credit risk.

Credit limits of debtors related to the property or bank management

According to the provisions of article 84 No. 2 of the GBL and chapter 12-4 of the RAN, the Bank must bear in mind that:

- The set of credits granted to a group of related persons may not exceed 5% of the effective equity of the bank, this limit increases to 25% if what exceeds 5% corresponds to credits secured by guarantees. In no case may the total of these credits granted by a bank exceed the amount of its effective equity.
- These loans shall not be granted under more favorable terms in connection with term, interest rates or guarantees than those granted to third parties in similar transactions.
- The relationship of a person with the Bank occurs when they have direct, indirect or through third party participation in the property of the Bank, participate in the management or it is presumed that there is relationship as long as sufficient background information is not presented to eliminate that presumption. It will be understood that the same group of people related to the Bank is made up of all those natural and legal persons that can exert significant and permanent influence on the decisions of the other, there is a presumption that the credits granted to one person will be used for the benefit of another or the founded presumption that people maintain a relationship and form a unit of economic interest.

Note 47 – Risk Management, continued

- Subsidiaries, business support companies and associates constitute companies related to a bank.
- Guarantees on movable or immovable property, or any other property legitimately susceptible of being received as collateral, constitute valid guarantees.

As of December 31, 2024 and 2023, the credit limit to debtors related to the ownership or management of the Bank according to article 84 No. 2 of the GBL and Chapter 12-4 of the RAN are the following:

	As of December 31, 2024		As of December 31, 2023	
	MCh\$	%	MCh\$	%
Global limit to groups of related people(1)	4,654,801		4,440,174	
Use of the global limit for loans granted to groups of people related to the bank	139,483	3.00	125,059	2.82

(1) Corresponds to effective equity

ii) Financial Risk

- **Market Risk**

Market Risk is the exposure to economic gains or losses caused by movements in prices and market variables. This risk stems from the activities of the Trading and Banking Books. In the first case, it comes from activities intended to obtain short-term gains and from the intensive use of fair value instruments. In the second case, with a more long-term vision, it stems from commercial activities with products valued at amortized cost.

The following section describes the main market risk factors to which the Bank and its subsidiaries are exposed:

- **Currency Risk**

Currency risk is the exposure to adverse movements in the exchange rates of currencies other than their base currency (CLP in the case of operations in Chile and COP in the case of operations in Colombia) for all those positions inside and outside of balance. The main sources of exchange risk are:

- Positions in foreign currency (MX) within the attributions of the Trading Book.
- Currency mismatches between the assets and liabilities of the Banking Book.
- Currency flow mismatches.

Note 47 – Risk Management, continued

- **Inflation and Other Indexes Adjustments Risk**

The risk of readjustment is the exposure due to changes in the units or indexes of readjustment (such as UF, UVR or others) defined in national or foreign currency, in which some of the instruments, contracts or other operations registered in the balance with such characteristics.

- **Interest Rate Risk**

Interest Rate Risk is the exposure to movements in market interest rates. Changes in market interest rates can affect both the price of instruments recorded at fair value and the financial margin and other gains from the Banking Book such as fees. Fluctuations in interest rates also affect the Bank's economic value.

Interest rate risk can be represented by sensitivities to parallel and/or non-parallel yield shifts with the effects reflected in the prices of instruments, the financial margin, equity and economic value.

The measurement of the structural interest rate risk is carried out through the representation by risk factor of the cash flows expressed in fair value, assigned on the dates of re-pricing and by currency. This methodology facilitates the detection of interest risk concentrations in the different terms.

All the balance sheet and off balance sheet items are unbundled in their flows and placed at the re-pricing/maturity. In the case of those accounts that do not have a contractual maturity, an internal model of analysis and estimation of their durations and sensitivities is used.

- **Volatility Risk**

In addition to the exposure related to the underlying asset, issuing options has other risks. These risks arise from the non-linear relationship between the gain generated by the option and the price and level of the underlying factors, as well as exposure to changes in the price volatility of the underlying asset.

- **Liquidity Risk**

Liquidity Risk is the exposure of the Bank's and its subsidiaries to events that affect their ability to meet, in a timely manner and at reasonable costs, cash payment obligations arising from maturities of time deposits that are not renewed, withdrawals from demand accounts, maturities or settlements of derivatives, liquidations of investments or any other payment obligation.

Note 47 – Risk Management, continued

Financial institutions are exposed to funding liquidity risk that is intrinsic to the role of intermediary that they play in the economy. In general, in financial markets demand for medium or long-term financing is usually much greater than the supply of funds for those terms while short-term financing is in considerable supply. In this sense, the role of intermediary played by financial institutions, which assume the risk of satisfying the demand for medium and long-term financing by brokering short-term available funds, is essential for the economy to function properly.

Appropriately managing funding liquidity risk not only allows contractual obligations to be met in a timely manner, but also enables:

- The liquidation of positions, when it so decides, to occur without significant losses.
- The commercial and treasury activities of the Bank and its subsidiaries to be financed at competitive rates.
- The Bank to avoid fines or regulatory penalties for not complying with regulations.

Regulatory measurement of adjusted liquidity mismatch

The mismatch in the net foreign currency position at the 7-, 15-, and 30-day terms as of December 31, 2024 and 2023 is as follows:

Net position	As of December 31, 2024		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	2.278.654	2.435.808	2.787.481
Expenses	(1.145.208)	(1.631.549)	(2.584.883)
Income (expenses), net	1.133.446	804.259	202.598

Net position	As of December 31, 2023		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	1.328.681	1.553.443	1.729.837
Expenses	(1.094.057)	(1.416.441)	(2.029.535)
Income (expenses), net	234.624	137.002	(299.698)

Note 47 – Risk Management, continued

The contractual maturities (Capital plus interest) as of December 31, 2024 and 2023, are as follows:

	As of December 31, 2024							
	On demand	Up to 1 months	Between 1 and 3 months	More than 3 months up to 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Financial liabilities	6,699,279	7,646,710	4,944,498	6,958,801	3,049,173	2,124,075	4,445,354	35,867,890
Financial liabilities to be traded at fair value through profit or loss	—	640,840	1,237,511	1,828,717	120,116	53,950	38,489	3,919,623
Financial liabilities designated at fair value through profit or loss	—	—	—	—	—	—	—	—
Financial derivative contracts and accounting hedges	—	12,030	32,350	47,184	15,161	1,777	1,178	109,680
Financial liabilities at amortized cost	6,699,279	6,978,292	3,662,406	5,066,138	2,858,766	2,048,704	3,261,734	30,575,319
Lease contracts liabilities	—	1,638	4,868	14,774	47,179	11,693	26,606	106,758
Financial instruments of regulatory capital issued	—	13,910	7,363	1,988	7,951	7,951	1,117,347	1,156,510

	As of December 31, 2023							
	On demand	Up to 1 months	Between 1 and 3 months	More than 3 months up to 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Financial liabilities	6,140,543	6,398,389	3,601,604	5,088,548	2,944,206	2,379,358	5,886,157	32,438,805
Financial liabilities to be traded at fair value through profit or loss	—	114,877	135,109	401,545	624,633	460,885	1,056,294	2,793,343
Financial liabilities designated at fair value through profit or loss	—	—	—	—	—	—	—	—
Financial derivative contracts and accounting hedges	—	2,847	10,565	44,816	5,635	21,407	50,241	135,511
Financial liabilities at amortized cost	6,140,543	6,265,756	3,443,282	4,623,560	2,265,308	1,880,438	3,698,015	28,316,902
Lease contracts liabilities	—	1,625	5,593	16,720	41,001	8,999	5,760	79,698
Financial instruments of regulatory capital issued	—	13,284	7,055	1,907	7,629	7,629	1,075,847	1,113,351

The volume of liquid assets as of December 31, 2024 and 2023, is as follows:

Liquid assets (consolidated balance)	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Level 1	3,557,638	3,725,970
Level 2	—	—
Other	5,595,996	4,865,249
Total	9,153,634	8,591,219

Note 47 – Risk Management, continued

The composition of the main sources of financing of liquid assets as of December 31, 2024 and 2023, is as follows:

Main sources of individual financing Consolidated	As of December 31, 2024	As of December 31, 2023
	%	%
Deposits and other obligations on demand	13.38	11.74
Transactions with Settlement in Progress	1.06	1.34
Repurchase Agreements and Securities Loans	0.43	0.11
Deposits and Other Term Collections	37.55	35.90
Term Savings Accounts	—	—
Obligations with Banks	4.61	14.09
Debt Instruments Issued	24.74	23.50
Other financial liabilities	18.23	13.32
Total	100.00	100.00

Main sources of consolidated financing Individual	As of December 31, 2024	As of December 31, 2023
	%	%
Deposits and other obligations on demand	12.27	10.97
Transactions with Settlement in Progress	1.15	1.40
Repurchase Agreements and Securities Loans	0.47	0.11
Deposits and Other Term Collections	38.28	36.28
Term Savings Accounts	—	—
Obligations with Banks	4.55	14.32

Other financial liabilities	16.65	12.32
Total	100.00	100.00

Note 47 – Risk Management, continued

The Liquidity Coverage Ratio (LCR) and Net Stable Financing Ratio (NSFR) as of December 31, 2024 and 2023, is as follows:

Liquidity Coverage Ratio	As of December 31,	As of December 31,
	2024	2023
	%	%
NSFR	107.64	110.23
LCR	221.82	191.00

Financial Risk Management

Continuous and interconnected process that originates in the first instance with the identification of the risks to which the Institution is exposed, in order to then quantify the potential impact as a result of said exposure and to limit it to the level desired by the Bank. The above implies an active monitoring of the risks, studying their temporal evolution. The risk management process can be subdivided into the following stages:

- **Financial Risks Identification**

The Financial Risk Management has a high-level technical team that constantly monitors the activities of the bank transfer and its subsidiaries in search of potential unquantified and controlled risks. In addition, the Bank Treasury as the first line of defense also plays a fundamental role in the detection of risks. Banco Itaú Chile provides a structure that facilitates this risk identification role by maintaining independence in its tasks and ensuring the active participation of management in the creation/ modification of products.

- **Quantification and Control of Exposure to Financial Risk**

Once all the risks have been identified, the Financial Risk Management is responsible for the quantification of the financial risk factors and the establishment of limits at different levels, according to the risk defined by the Board of Directors and the applicable regulations.

The Financial Risk Management proposes a framework of quantitative and qualitative limits and alerts that are reviewed and approved by the ALCO and the Board of Directors. Additionally, it periodically measures the risk incurred, develops valuation tools and models, performs periodic stress analyses, measures the degree of concentration with interbank counterparties, prepares the manual of policies and procedures, as well as monitoring authorized limits and alerts, which are reviewed at least annually.

Note 47 – Risk Management, continued

The metrics, by type of risk, used to quantify exposures are explained below:

- **Market Risk Metrics and Limits for the Trading and Banking Portfolio**

The Bank's measures regulatory exposures in line with the standardized methodologies established by the Central Bank (Chapter III B-2 Standard of measurement and control of market risk for Banks", of the Compendium of Financial Regulations), supplemented by the CMF in Chapter 12-21 of the RAN, which correspond to the methodologies standardized by the Basel Committee to quantify the market risk exposures of the Trading and Banking Books.

The regulatory measurements of the trading book allow estimating the potential loss that the Bank could face given the fluctuations according to the shocks defined by the regulator. The regulatory limit corresponds to the sum of these risks (also called Market Risk Exposure "MRE") and 10% of the Assets Weighted by Credit Risk, a sum that cannot exceed the Bank's Effective Equity in any case.

The Bank must permanently observe these limits and report them to the CMF, also reporting monthly on the consolidated risk position, including subsidiaries and branches abroad.

Below is the consumption of the regulatory market risk limit, specifically for the Trading Portfolio as of December 31, 2024 and 2023.

Limit Consumer	As of December 31, 2024	As of December 31, 2023
	%	%
Market risk exposure (MRE)	55.31	56.20

The measurement of regulatory risk for the Banking Portfolio is used to estimate the Bank's potential losses from standardized adverse movements in interest and exchange rates.

The standardized regulatory report for the Banking Portfolio is used to estimate the Bank's potential economic losses due to standardized adverse movements in interest rates defined by the CMF. Currently, the limit on the net interest margin (NII) in the Banking Portfolio must not exceed 25% of the annual operating result (LTM rolling period), while the consumption of the limit on the economic value of the Bank (EVE) must be less than 13% of the Bank's Tier 1 capital."

As of December 31, 2024 and 2023, the Bank has complied with all regulatory requirements and limits, as well as with all financial covenants, such as risk-weighted capital adequacy ratio, single borrower exposure, aggregate exposure, concentration risk, equity to asset ratio, provision coverage ratio, among others.

Note 47 – Risk Management, continued

Value at Risk (VaR)

Calculation of Historical Value at Risk (Non-parametric). This measurement provides the maximum potential economic loss at a certain confidence level and a given time horizon. Historical VaR, as opposed to Statistical or Parametric VaR, is based on the observed distribution of past returns, does not need to make assumptions of probability distributions (frequently normal distribution) and, therefore, does not need a mean (assumed 0), standard deviation and correlations across returns (parameters). The Bank's uses a 99% confidence level and a time horizon of 1 day.

- Calculation of Volatility-Adjusted Historical Value at Risk (Non-parametric). This measurement is based on the above and the profit and loss vector is adjusted according to whether it is facing a period of greater or less volatility.

The Board of Directors and senior management define the limits on the Value at Risk, which is monitored on a daily basis. In turn, the measurement is subjected to retrospective tests that allow verifying that the losses actually incurred do not exceed the VaR, more than once every 100 days. The result is monitored daily to test the validity of the assumptions, hypotheses and the adequacy of the parameters and risk factors used in the calculation of the VaR.

The Bank calculates the VaR for sub-portfolios and risk factors, which allows it to quickly detect sources of risk. Since the VaR does not take into account stress scenarios, it is complemented with stress tests taking into account prospective, historical and standardized scenarios. Although the VaR is one of the most frequently used models by the local financial industry, and considering that it is a model, as such it has limitations that must be considered:

- It does not take into account the expected loss in the event that the return on the portfolio is above the confidence level defined in the VaR. That is, in the case of the Bank it does not reflect what happens in the 1% of the queue. This is mitigated with the stress measures detailed below.
- It does not consider intraday results, but only reflects the potential loss given current positions.
- It does not take into account the potential changes in the dynamics of the movements of the market variables (that is, the possible changes in the variance and covariance matrix).

Sensitivity measures

The Bank uses stress tests as a sensitivity analysis tool to control financial risk. This measurement is performed separately for the trading and banking portfolios.

The sensitivity is estimated using the DV01 indicator, which corresponds to a measure of sensitivity of the portfolio results if the zero coupon interest rate of the risk factor increases by 1 basis point (0.01%) for different maturities and in annualized terms.

Note 47 – Risk Management, continued

In accordance with IFRS 7, it is presented an estimate of the likely, but reasonable, impact of fluctuations in interest rates, exchange rates and implied volatilities (market factors) that would affect the trading and banking portfolios.

The fluctuations in market factors correspond to highly probable scenarios chosen from a set of scenarios agreed on the basis of the opinion of specialists in economics and financial risk and traders. To estimate the sensitivity, the sensitivity (DV01) and the reasonably probable scenarios are multiplied by the market factor.

Interest rate scenarios - Chile (basis points - 0.01%)

The interest rate shock scenarios on income accounting average +523 basis points in the case of the CLP chamber. An average of +52 basis points for CLF chamber and government factors (CLF y CLP) and +435 for the rest of the yields.

In the case of interest rate shock associated with fair value accounting in other comprehensive income, this shock averages +528 basis points in the case of the CLP chamber factor, -117 basis points for CLF chamber and +359 for the rest of the yields.

Interest rate scenarios Colombia (basis points - 0.01%)

Interest rate shock scenarios on income accounting and fair value accounting in other comprehensive income average -46 basis points for all yields.

Chile exchange rate scenarios

As of December 31, 2024, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of -10.08% in the Chilean peso-US dollar parity, and +7.35% in the COP-US dollar parity.

As of December 31, 2023, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of -12.90% in the Chilean peso-US dollar parity, and -18.60% in the COP-US dollar parity.

Colombia exchange rate scenarios

As of December 31, 2024, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +4.49% in the COP-US dollar parity.

As of December 31, 2023, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +2.91% in the COP-US dollar parity.

Note 47 – Risk Management, continued

Impact on P&L derived from the sensitivity analysis

The following table presents the impact of the movements or reasonably probable scenarios explained above applied to the positions of the Trading Portfolio that affect the P&L (net income from financial operations, net foreign exchange gains/losses and interest margin, as applicable) as of December 31, 2024 and 2023.

Potential impact on P&L	As of December 31,	As of December 31,
	2024	2023
	MCh\$	MCh\$
CLP rate risk	(32,532)	(18,901)

Total impact	(79,489)	(28,467)

Note 47 – Risk Management, continued

The impact on the margin of reasonably possible movements or scenarios on positions in the Accrual accounting banking book at the end of December 31, 2024 and 2023 is presented below.

Potential Impact on Accrual Accounting	As of December 31, 2024	As of December 31, 2023
	MCh\$	MCh\$
Interest rate shock sensitivity impact	2,296	(1,221)

The impact on the Banking Book does not necessarily mean a gain/loss but it does mean smaller/larger net income from the generation of funds (net funding income, which is the net interest from the accrual portfolio) for the next 12 months.

Impact on net equity derived from the sensitivity analysis

As well as the effects on profit and loss of positions carried at fair value and at amortized cost, variations in market factors due to reasonably possible movements in interest rates and exchange rates also generate impacts on the equity accounts as a result of the possible variation in the market value of the investment portfolio at fair value/available-for-sale instruments and of the cash flow hedge and net foreign investment portfolios, which are presented in the following table:

Potential impact on FVTOCI	Potential impact on FVTOCI					
	As of December 31, 2024			As of December 31, 2023		
	DV01 (+1 bp)	Impact of interest change		DV01 (+1 bp)	Impact of interest change

Note 47 – Risk Management, continued

Hedge

The Bank uses a variety of hedging strategies and instruments to manage the risks generated in the trading book and bank. In the case where the hedging instrument is subject to an accounting treatment different from the exposure of the underlying object of coverage, the Bank may use the accounting hedge treatment to eliminate the accounting asymmetries that could generate undue volatility in the results and/or Bank assets.

The use of accounting hedges is subject to the limits defined by the Board of Directors, to the definitions of the Financial Management and Market Higher Commission (ALCO) and to the Hedging Policy.

The Treasury is responsible for designing and implementing the strategies, the Financial Risk Management is responsible for measuring and monitoring the effectiveness of the hedges, generating effectiveness indicators that are constantly monitored, and the Financial Control Management is responsible for qualifying adequate regulatory compliance. In the case of accounting hedges (For more details on accounting hedge strategies, review Note 12 “Derivative contracts for accounting hedges”).

Operational Risk

The Bank and its subsidiaries define operational risk as the possibility of occurrence of losses resulting from failures, deficiencies or inadequacies in internal processes, people, and systems or external events, including in this definition the legal risk and excluding strategic risks and reputation. Operational risk is recognized as a manageable risk, for which it has defined a function in charge of this task within its corporate structure.

The Bank adopts a model of three lines of defense as the primary way to implement its operational risk management structure, internal controls and compliance, ensuring compliance with corporate guidelines.

The defense lines are composed by; the business and support areas (first line of defense) responsible for managing the risks related to their processes; Operational Risk, Internal Control, and the area of AML and Compliance (second line of defense) area in charge of supporting the first line of defense in relation to the fulfillment of its direct responsibilities; and Internal Audit function (third line of defense) responsible for verifying, independently and periodically, the adequacy of the risk identification and management processes and procedures, in accordance with the guidelines established in the Internal Audit Policy and submitting the results of its recommendations for improvement to the Audit Committee.

The risk management program contemplates that all relevant risk issues must be reported to the higher levels and to the Operational Risk Higher Commission.

Our methodology consists in the evaluation of the risks and controls of a business from a broad perspective and includes a plan to monitor the effectiveness of such controls and the identification of eventual weaknesses. The main objectives of the Bank and its subsidiaries in terms of operational risk management are the following:

- Identification, evaluation, information, management, and monitoring of the operational risk in connection with activities, products, and processes carried out or commercialized by the Bank and its subsidiaries;

Note 47 – Risk Management, continued

- Build a strong culture of operational risk management and internal controls, with clearly defined and adequately segregated responsibilities between business and support functions;
- Generate effective internal reports in connection with issues related to operational risk management, with a clearly defined escalation protocol;
- Control the design and application of effective plans to deal with contingencies that ensure business continuity and losses control.

Regarding training and awareness, the risk culture continues to be reinforced through face-to-face training in the field of operational risk, internal control, prevention of external and internal fraud, and the implementation of the annual "more security" program for all collaborators and induction programs for new employees.

Finally, it is worth mentioning that Sarbanes-Oxley methodologies (SOX) continue to be applied for their main products and processes, the application of this methodology is annually certified by an external consultant.

Below are the net losses due to operational risk events as of December 31, 2024 and 2023:

	As of December 31, 2024		
	Gross loss in the year due to operational risk events	Recovery of Gross loss in the year due to operational risk events	Exposure to net loss
Internal fraud	1,052	827	225
External fraud	13,374	5,093	8,281
Labor practices and safety in the business	974	452	522
Customers, products and business practices	21	—	21
Damage to physical assets	329	9	320

Execution, delivery and process management	1,634	408	1,226
Total	14,113	4,871	9,242

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators

Objectives of capital management, policies and governance

Proper capital management plays a fundamental role in the Bank, requiring constant monitoring and analysis to ensure compliance with current regulations and the Bank's internal objectives in this area.

In this regard, the Bank has a Capital Management unit, responsible for ensuring that the nature and levels of risk assumed by the Bank are consistent with the business strategy and with the level of capital required to meet its strategic objectives. To comply with this, the Bank relies on different management tools that allow it to identify, analyze, evaluate and monitor the risks that may affect capital.

Itaú Chile, within its management framework, has a "Capital Management Policy" that contains the guidelines and directives provided by the Board of Directors to guide the management decision-making process. This policy also includes the monitoring and control of the Bank's capital level, with the aim of ensuring the solvency and profitability of the ongoing business, as well as ensuring adequate regulatory compliance in this area. The Capital Management Policy establishes the guiding principles and objectives that govern this area, and defines the responsibilities associated with the capital function and its respective governance.

The Bank's internal regulations also establish that capital management must adhere to specific objectives to comply with regulatory requirements and correctly manage financial resources. The general objectives that the functions associated with capital management must ensure are:

- Determine the level of capital required by the Bank at the individual, subsidiary, and consolidated levels, in accordance with the risk appetite profile established by the Board of Directors and the approved strategy and business plans.
- Define the optimal level of capital required by the Bank, ensuring adequate compliance with the rules and other regulations established on the matter by the competent authority.
- Identify possible macro-financial scenarios, both internal and external, that may affect the Bank's capital and evaluate their potential impacts through stress testing methodologies or other methodologies appropriate for that purpose.

A key element of capital management is the definition of the internal effective equity target, which is formally set out in the Bank's capital planning process. This process is both annual and dynamic. Based on this, the Bank can assess its current and future capital needs and establish action plans to return to the capital levels admissible for the Bank, in accordance with its defined risk appetite.

In relation to roles and responsibilities, the Board of Directors is the primary entity responsible for the prudent management of the risks faced by the organization and the associated capital. In this regard, the Board of Directors, in accordance with its functions, must define and approve both the objectives and the strategic plan of the Bank. It should promote medium and long-term capital management in line with the defined risk profile, while ensuring the protection of shareholders and other stakeholders who may be affected by decisions in this area.

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

To support the Board of Directors in the functions described above, the Higher Capital Management Commission has been established. This commission assists the Board of Directors and the Bank's management in the assessment, management, and adequacy of capital, in accordance with local regulations and international standards (such as Basel). It also reviews the effectiveness of risk and capital policies and limits, and ensures adherence to these policies and procedures within the Company.

Capital Management Processes

The following processes are developed to carry out capital management in the Bank:

- Regular measurement of key capital indicators.
- Review of limits in relation to regulatory minimums and risk appetite, with escalation in case of excesses.
- Allocation of capital to the Bank's businesses.
- Capital projections in a base scenario and stress scenarios.
- Determination of the internal capital target and the limits and alert levels for risk appetite.
- Management of the capital self-assessment process.

This, together with policies and governance, allows capital management objectives to be met.

Capital requirements

In January 2019, Law No. 21,130 was published in the Official Gazette, modernizing banking legislation with the aim of implementing the practices promoted internationally by the Basel III agreement and introducing modifications to the Chilean General Banking Law. In order to implement the standards, the Financial Market Commission initiated the regulatory process by incorporating amendments and new chapters into the Updated Compilation of Standards (referred to as 'RAN'), providing guidelines for the calculation of risk-weighted assets, capital deductions, and additional capital requirements.

Effective equity corresponds to the sum of core capital (CET1) after regulatory adjustments, plus instruments eligible as Additional Tier 1 (AT1) capital (perpetual bonds and preferred shares), in addition to Tier 2 capital instruments, which include subordinated bonds and additional provisions. Capital deductions are subject to an implementation schedule. The deduction is currently at 65%, and its implementation ends in December 2025.

According to Article 66 of the Chilean General Banking Law, the base capital requirement corresponds to 4.5% of CET1 on risk-weighted assets (or RWA), 6.0% of T1 on RWA, and 8.0% of effective equity on RWA. In addition, a leverage ratio greater than or equal to 3.0% must be maintained.

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

The Bank is also subject to an additional core capital requirement due to systemic importance, as indicated in Article 66 quarter of the Chilean General Banking Law. The requirement determined for the Bank is 1.0%, and it is subject to gradual implementation until December 2025. Currently, 75% of the total charge must be constituted. On the other hand, Article 66 'Quinquies' of the General Banking Law empowers the CMF to determine a Pillar 2 charge of up to 4.0% of the total RWA. The Bank is not currently subject to capital requirements for this item.

On the other hand, Article 66 bis of the Chilean General Banking Law determines the capital conservation buffer, which corresponds to an additional 2.5% of basic capital on risk-weighted assets, with a transitional implementation period that ended in December 2024. Finally, Article 66 ter of the Chilean General Banking Law empowers the Central Bank of Chile to impose a counter-cyclical capital requirement of up to 2.5% of risk-weighted assets. The current charge in the country is 0.5%.

With this, the Bank's current total capital requirement is 11.8% (10.4% by the end of 2023¹). As of the end of December 2024, the Bank's capital level was 15.8% at the consolidated level, comfortably complying with the minimum regulatory requirements.

(1) Considers 8% basis, 1.9% capital conservation buffer, 0.5% systemic importance charge and 0% countercyclical capital requirement.

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

- a) This corresponds to the value of the investment in subsidiaries that are not consolidated. It applies only in local consolidation when the bank has subsidiaries abroad, deducting their full value in assets and CET1.
- b) It corresponds to the value of the asset items that are deducted from regulatory capital, in accordance with paragraph a) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN). Item No. Note Total assets, risk-weighted assets and components of effective equity according to Basel III - Description of the item
- c) It corresponds to the credit equivalents of derivative instruments in accordance with paragraph b) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- d) It corresponds to contingent exposures as established in paragraph c) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- e) It corresponds to the assets related to the intermediation of financial instruments in one's own name on behalf of third parties, which are within the consolidation perimeter of the bank, as established in paragraph d) of Title No. 3 of Chapter 21-30 of the Updated Compilation of Standards (RAN).
- f) It corresponds to the assets weighted by credit risk, estimated according to Chapter 21-6 of the Updated Compilation of Standards (RAN). If the bank is not authorized to apply internal methodologies, it must report field 8.b with zero and add 8.a in the field 11.a. If it has the authorization, it must add 8.b in 11.a.
- g) It corresponds to assets weighted by market risk, estimated according to Chapter 21-7 of the Updated Compilation of Standards (RAN).
- h) It corresponds to assets weighted by transactional risk, estimated according to Chapter 21-8 of the Updated Compilation of Standards (RAN)
- i) It corresponds to the non-controlling interest, depending on the level of consolidation, for up to 20% of the owners' equity.
- j) Assets that correspond to goodwill
- k) It corresponds to the balances of investment assets in companies other than line-of-business support companies that do not participate in consolidation, in excess of 5% of the owners' equity.
- l) In the case of CET1 and T2, banks must estimate the equivalent value for each level of capital, as well as the value obtained by fully applying Chapter 21-1 of the Updated Compilation of Standards (RAN). The difference between the equivalent value and the value obtained by fully applying the above Chapter 21-1 must then be weighted by the discount factor in force on the reporting date, according to the interim standards of Chapter 21-1 of the Updated Compilation of Standards (RAN), and reported in this row. For AT1, discounts apply directly if they exist.
- m) Provisions and subordinated bonds charged to Additional Tier 1 (AT1) capital, as set out in Chapter 21-2 of the Updated Compilation of Standards (RAN)
- n) Provisions and subordinated bonds charged to the equivalent definition of Tier 2 (T2) capital, as set out in Chapter 21-1 of the Updated Compilation of Standards (RAN).
- o) In accordance with the interim standards, as of 1 December 2022, solvency requirements will also be applied at the local consolidated level, with the figures at this level being reported in this column. Banks without subsidiaries abroad do not have to fill in this data.
- p) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for the capital conservation buffer, as established in Chapter 21-12 of the Updated Compilation of Standards (RAN).
- q) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for the countercyclical buffer, as established in Chapter 21-12 of the Updated Compilation of Standards (RAN).
- r) It corresponds to the additional Common Equity Tier 1 (CET1) capital required for banks designated as systemic, as established in Chapter 21-11 of the Updated Compilation of Standards (RAN).
- s) It corresponds to the additional capital required for the assessment of the adequacy of the bank's effective equity (Pillar 2), as established in Chapter 21-13 of the Updated Compilation of Standards (RAN).

9	Voluntary provisions (additional) and subordinated bonds that are charged to additional tier 1 capital (AT1) in relation to RWAs ((T1_I19+T1_I20)/(T1_I11.b))	h	—	—	—	—

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

- a) In the case of leverage, the minimum level is 3%, without prejudice to the additional requirements for systemic banks that may be set under Chapter 21-30 of the Updated Compilation of Standards (RAN). In the case of core capital, the bank should consider a minimum limit of 4.5% of risk-weighted assets (RWA). In addition, if applicable, the bank must include the systemic charge in force according to the interim standards, as well as the Pillar 2 requirement defined for this capital level. For new banks that have not paid the paid-in capital of UF 400,000, they must add 2% to their minimum requirement in accordance with Article 51 of the Chilean General Banking Law. This percentage decreases to 1% if the paid capital is above UF 600,000 but less than UF 800,000. For Tier 1 capital, the bank must consider a minimum requirement of 6% and the Pillar 2 charge defined for this capital tier. Finally, at the level of effective equity, the bank must consider a minimum requirement of 8% of risk-weighted assets (RWA). Additional charges for Pillar 2, systemic bank and those indicated in Article 51 of the Chilean General Banking Law for new banks must be added to this.
- b) The capital buffer deficit must be estimated in accordance with Chapter 21-12 of the Updated Compilation of Standards (RAN). This figure defines the restriction on the distribution of dividends if it is positive, in accordance with the aforementioned Chapter. For effective equity, the figures for the capital conservation and countercyclical buffers in force on the reporting date according to interim standards must be added to the amount defined in note a), even if there is a requirement under Article 35 bis of the Chilean General Banking Law.
- c) If the bank has an effective equity requirement in force under Article 35 bis of the Chilean General Banking Law, it must report this amount in this cell in accordance with the interim standards.
- d) It corresponds to the solvency classification as established in Article 61 of the General Banking Law.
- e) Limit of 1.25% if the bank uses standard methodologies (field T1_8.a), or 0.625% if the bank uses internal methodologies (field T1_8.b) in the estimation of RWAs.
- f) Subordinated bonds charged to Tier 2 capital must not exceed 50% of Common Equity Tier 1 (CET1) capital, taking into account the discounts applied to these instruments under Chapter 21-1 of the Updated Compilation of Standards (RAN).
- g) Additional Tier 1 (AT1) capital cannot exceed one-third of Common Equity Tier 1 (CET1) capital.
- h) Additional provisions and subordinated bonds charged to AT1 may not exceed 0.5% of RWAs as of December 1, 2022, in accordance with the interim rules of Chapter 21-2 of the Updated Compilation of Standards (RAN).
- i) In accordance with the interim rules, as of December 1, 2022, solvency requirements are also applied at the local consolidated level. The figures at this level are reported in this column. Banks without subsidiaries abroad do not have to fill in this data.

INDEPENDENT AUDITOR'S REPORT

(A free translation from the original in Spanish)

Santiago, February 28, 2024

To the Shareholders and Directors of
Banco Itaú Chile

Opinion

We have audited the consolidated financial statements of Banco Itaú Chile and subsidiaries, which comprise the consolidated statements of financial position as of December 31, 2023 and 2022, and the related consolidated statements of income, other comprehensive income, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements. In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of Banco Itaú Chile and subsidiaries as of December 31, 2023 and 2022, and the results of its operations and its cash flows for the years then ended in accordance with accounting standards and instructions issued by the Financial Market Commission.

Basis for Opinion

We conducted our audits in accordance with Generally Accepted Auditing Standards in Chile. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Banco Itaú Chile and subsidiaries and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting standards and instructions issued by the Financial Market Commission., and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Banco Itaú Chile and subsidiaries' ability to continue as a going concern for a foreseeable future

PwC Chile, Av. Andrés Bello 2711 - piso 5, Las Condes – Santiago, Chile

Santiago, February 28, 2024

Banco Itaú Chile

2

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with Generally Accepted Auditing Standards in Chile will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with Generally Accepted Auditing Standards in Chile, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Banco Itaú Chile and subsidiaries internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Banco Itaú Chile and subsidiaries' ability to continue as a going concern for a reasonable period of time.

Santiago, February 28, 2024

Banco Itaú Chile

3

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and any internal control significant deficiency and material weakness that we identified during the audit.

**Note 1 - Background of the Institution****General Information – Background of Banco Itaú Chile and subsidiaries**

Banco Itaú Chile (ex Itaú CorpBanca)¹ (hereinafter “Itaú Chile” or “the Bank”) is a corporation incorporated under the laws of the Republic of Chile and regulated by the Commission for the Financial Market (hereinafter CMF for its acronym in Spanish). As of June 1, 2019, the CMF took over the functions of the Superintendency of Banks and Financial Institutions (“SBIF”) in accordance with Decree with Force of Law (DFL) 3 dated January 12, 2019, which set a new consolidated, systematized and agreed wording for the General Banking Law. The entity is the consequence of the merger of Banco Itaú Chile and CorpBanca, which took place on April 1, 2016, with the latter being the legal successor².

The Bank is controlled by Itaú Unibanco, which holds a 67.42%³ ownership. The remaining 32.58% is owned by minority shareholders⁴.

Banco Itaú Chile is headquartered in Chile and has operations in Colombia and Panama. In addition, Banco Itaú Chile has a branch in New York and a representative office in Lima⁵. The Bank has total consolidated assets for MCh\$41,970,270 (MUS\$47,874) and its consolidated equity for MCh\$3,736,537 (MUS\$4,262), Focused on large and medium size companies and people, Itaú CorpBanca offers universal banking services.

The legal address of Banco Itaú Chile is Av, Presidente Riesco 5537, Las Condes, Santiago, Chile, and its web site is www.ita.cl.

The Consolidated Financial Statements as of December 31, 2023, were approved by the Board of Directors on February 28, 2024.

¹ See Note 5 “Significant Events”

² The business combination was a “reverse acquisition” as established in IFRS 3, “Business Combinations”, in which Banco Itaú Chile is the successor for accounting purposes and CorpBanca is the legal successor.

³ As of July 8, 2023 ownership has increased as a result of a public offer (See note 5)

⁴ The percentage of minority interest has been rounded for presentation in this report. This percentage has been calculated on the basis of the total not rounded number of shares.

⁵ None of the markets in which Itaú CorpBanca and subsidiaries operate qualify as a hyperinflationary economy.

Note 2 - Summary of Significant Accounting Policies

a) Accounting Year

The Consolidated Financial Statements are referred as of December 31, 2023 and 2022 and cover the years ended on tho.

b) Basis of preparation of the Consolidated Financial Statements

These Consolidated Financial Statements have been prepared in accordance with the Banking Compendium of Accounting Standards (here in after "the compendium") issued by the CMF, and in force since January 1, 2022, Banks must use the accounting criteria set forth in the compendium and in everything that is not dealt with by it and does not contradict its instructions, they must adhere to International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), If there are discrepancies between IFRS and the accounting criteria set forth in the compendium, the latter will prevail.

The notes to these Consolidated Financial Statements contain additional information to that presented in the Consolidated Statements of Financial Position, the Consolidated Statements of Income, the Consolidated Statements of Other Comprehensive Income, the Consolidated Statements of Changes in Equity and the Consolidated Statements of Cash Flows. On them descriptive and disaggregated information is presented. They provide narrative descriptions or disaggregation of such Consolidated Financial Statements in a clear, relevant, reliable, and comparable manner. These Consolidated Financial Statements as of December 31, 2023 and 2022 have not been audited.

c) Consolidation criteria

The same accounting policies, presentation and calculation methods applied in these Consolidated Financial Statements were used in the preparation of the separate Financial Statements of Banco Itaú Chile and subsidiaries (hereinafter "Group" or the "Bank"), corresponding to the balances as of December 31, 2023 and 2022 and cover the years ended on those date and include the adjustments and reclassifications necessary to standardize the accounting policies and valuation criteria applied by the Bank, in accordance with the standards established by the compendium.

Intercompany balances and any unrealized income or loss arising from intercompany transactions are eliminated upon consolidation during the preparation of the Consolidated Financial Statements.

Assets, liabilities, income, and results of operations of subsidiaries, net of consolidation adjustments, represent 18%, 19%, 21% y 12% respectively, of total consolidated assets, liabilities, income, and operating results as of December 31, 2023 (15%, 17%, 23% and 11% as of December 31, 2022, net of consolidation adjustments, respectively).

(i) Controlled entities

The Bank, regardless of the nature of its involvement with an entity (the investee), shall determine whether it is a parent by assessing whether it controls the investee.

The Bank controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Note 2 - Summary of Significant Accounting Policies, continued

Thus, the Bank controls an investee if and only if has all the following:

- 1) Power over the investee, which is related to the existing rights that give the Bank the current ability to direct the relevant activities, these being those that significantly affect the investee's returns;
- 2) Exposure, or rights, to variable returns from its involvement with the investee;
- 3) Ability to use its power over the investee to affect the amount of the Bank's returns.

When the Bank has less than a majority of the voting rights over an investee, but such voting rights are sufficient to have the actual ability to direct the relevant activities, then it will be concluded that the Bank has control over the investee.

The Bank considers all relevant factors and circumstances when assessing if the voting rights are sufficient to obtain control, these include:

- The amount of voting rights held by the Bank in relation to the amount and dispersion of those held by other vote holders.
- Potential voting rights held by the Bank, other voting holders or other parties.
- Rights that arise from other contractual agreements.
- Any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time those decisions need to be made, including the patterns of voting behavior in previous shareholders meetings.

The Bank reassesses whether or not it has control over an investee when facts and circumstances indicate that there are changes in one or more of the control elements listed above.

The Financial Statements of the controlled companies are consolidated with those of the bank through the global integration method (line by line). In accordance with this method, all balances and transactions between consolidated companies are eliminated through the consolidation process. Therefore, the Consolidated Financial Statements refer to assets, liabilities, equity, income, expenses, and cash flows of the parent and its subsidiaries presented as if they were a single economic entity. The Bank prepares ther Consolidated Financial Statements using uniform accounting policies for transactions and other events that, being similar, have occurred in similar circumstances.

Note 2 - Summary of Significant Accounting Policies, continued

The following table details the entities controlled by Banco Itaú Chile, therefore, they are part of the consolidation perimeter:

	Market	Country	Functional Currency	Percentage of ownership					
				As of December 31, 2023			As of December 31, 2022

- (1) Company regulated by the Financial Market Commission (CMF) of Chile.
- (2) Companies regulated by the Colombian Financial Superintendency (CFS), which has a supervision agreement with the CMF.
- (3) Company regulated by the Superintendency of Banks of Panamá.
- (4) Company regulated by Office of the Comptroller of the Currency (OCC) and Federal Reserve (FED).
- (5) On February 1, 2022, Itaú Holding Colombia S.A. was created.
- (6) On February 22, 2022, the Bank acquired 59,554,210 shares of Itaú Colombia S.A.
- (7) On February 22, 2022, Itaú Holding Colombia S.A. acquired 33,752,474 shares of Itaú Colombia S.A.
- (8) On March 25, 2022, the Bank acquired 3,600 shares of Itaú Corredores de Seguro Colombia S.A.
- (9) On March 25, 2022, Itaú Holding Colombia S.A. acquired 1,200 shares of Itaú Corredores de Seguro Colombia S.A.
- (10) On July 7, 2023, Itaú Corredores de Seguros S.A. modifies its legal statute turning from a public company (S.A.) to a private limited company.
- (11) On May 18, 2023, through resolution No. 3465, the CMF authorized the early dissolution of the subsidiary Itaú Securities Services Colombia S.A. Its liquidation takes place on December 13, 2023.

(ii) Associated entities and/or business support

Associated entities are those over which the Bank has significant influence; although not control or joint control. If the Bank holds, directly or indirectly (e.g. through subsidiaries), 20% or more of the voting power of the investee, it is presumed that the Bank has significant influence, unless it can be clearly demonstrated that this is not the case, and subsequently increased or decreased to recognize either the Bank's proportional share in the net profit or loss of the associate and other movements recognized in its equity. The lower value arising from the acquisition of an associate is included in the book value of the investment net of any accumulated impairment loss.

Other factors considered to determine the significant influence on an entity are the representations in the Board of Directors and the existence of material transactions. The existence of these factors could determine the existence of significant influence on an entity, despite having a participation of less than 20% of the shares with the right to vote.

Note 2 - Summary of Significant Accounting Policies, continued

The following entities are considered “Associated entities”, in which the Bank has participation and are accounted for by applying the equity method, according to IAS 28 “Investments in Companies and Joint Ventures”.

Name of the Associates	Main Activity	Place of Operation	As of December 31, 2023	As of December 31, 2022
			% interest	% interest
Transbank S.A.	Credit and debit card services	Santiago, Chile	8.7188 %	8.7188 %
Combanc S.A	High-value payment clearing house	Santiago, Chile	9.8114 %	9.8114 %
Imerc OTC S.A	Administration of financial instrument clearing and settlement systems	Santiago, Chile	8.6602 %	8.6602 %

(iii) Investments in other companies

Investments in other companies, represented by shares or rights in other companies, are those in which the Bank has neither control nor significant influence. These equity instruments must be measured in compliance with IFRS 9, at their fair value; however, equity instruments that are neither held for trading and on which the equity method is not applied for investments in companies with significant influence (“associates” or “joint ventures”) according to IAS 28, may be recorded after their initial recognition and irrevocably at fair value, with variations recognized in Statements of Other Comprehensive Income instead of as “Non-trading financial assets mandatorily at fair value through profit or loss”. Dividends received from these investments are recorded in “Income (loss) from investments in companies” in the Consolidated Statement of Income. These instruments are not subject to the impairment model of IFRS 9.

(iv) Funds management, trust business and other related businesses

The Bank and its subsidiaries manage assets held in publicly offered investment funds and other investment vehicles on behalf of investors and receive market-rate compensation for providing this type of services. Managed funds belong to third parties and, therefore, are not included in the Consolidated Statement of Financial Position.

The Bank provides trust commissions and other fiduciary services that result in the participation or investment of assets by clients. Assets held in a fiduciary activity are not reported in the Consolidated Financial Statements, since they are not Bank assets and there is no control over them. Contingencies and commitments arising from this activity are disclosed in Note 29 “Contingencies and Commitments”, letter c) related to Responsibilities recorded in off-balance-sheet accounts.

In accordance with IFRS 10 “Consolidated Financial Statements” for consolidation purposes, the role of the Bank and its subsidiaries with respect to the managed funds must be evaluated to determine whether it is acting as Agent or Principal. According to this standard, an Agent is a party primarily engaged in acting on behalf and for the benefit of another party or parties (the Principal or Principals) and, therefore, it does not control the investee when it exercises decision-making authority. This evaluation must take into account the following aspects:

Note 2 - Summary of Significant Accounting Policies, continued

- Scope of its decision-making authority over the investee.
- Rights held by other parties.
- The remuneration to which it is entitled to in accordance with the remuneration agreements..
- Decision-maker's exposure to variability of returns from other interests that it holds in the investee.

The Bank does not control or consolidate any trusts or other entities related to this type of business.

The Bank manages the funds on behalf and for the benefit of investors, acting solely as an Agent. The assets managed by the Bank and its subsidiaries are owned by third parties. Under this category, and in accordance with the aforementioned standard, they do not control the assets when they exercise their decision-making authority. Therefore, as of December 31, 2023 and 2022 they act as Agents and, therefore, none of these investment vehicles is consolidated.

d) Non-controlling interest

Non-controlling interest represents the portion of net income and net assets which the Bank does not own, either directly or indirectly. It is presented as "Attributable to non-controlling interest" separately in the Consolidated Statement of Income, and separately from equity in the Consolidated Other Comprehensive Income.

Additionally, the non-controlling interests in the Consolidated Statements of Financial Position will be presented, within the equity under item "Non-controlling interest", separately from the equity attributable to owners of the Bank. Changes in the ownership interest of a parent in a subsidiary that do not result in a loss of control are equity transactions (i.e., transactions with owners in their capacity as owners).

The Bank attributes the result of the year and each component of other comprehensive income to the owners of the Bank and to the non-controlling interests. The Bank also attributes the total integral result to the owners of the Bank and to the non-controlling interests even if the results of the non-controlling interests give rise to a debit balance.

e) Business combinations, Goodwill and Intangible Assets

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the sum of the consideration transferred, measured at its fair value at the acquisition date, and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the share, under the equity method, of the identifiable net assets acquired. Acquisition costs incurred are expensed and included in administrative expenses.

When Banco Itaú Chile and its subsidiaries (the Group) acquires a business, evaluates the identifiable assets acquired and liabilities assumed to determine proper classification and designation based on contractual conditions, economic circumstances, and other relevant conditions as of the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree and identification of intangible assets.

**Note 2 - Summary of Significant Accounting Policies, continued**

Goodwill, defined as the difference between the consideration transferred and the amount recognized for the non-controlling interest in the net identifiable assets acquired and liabilities assumed, is measured initially at cost. If this consideration is less than the fair value of the net assets of the acquired subsidiary, the difference is recognized directly in profit or loss as of the acquisition date. While intangible assets are initially recorded at the value assigned to the identifiable asset in the business combination.

After initial recognition, both Goodwill and any identifiable or non-identifiable intangible assets are measured at cost less any accumulated impairment losses. Goodwill acquired in a business combination is assigned, from the date of acquisition, to each of the Group's cash generating units (CGU) that are expected to benefit from the combination, independently of whether other assets or liabilities of the acquiree are assigned to those units.

When goodwill is allocated to a CGU and an operation within that unit is sold, the goodwill associated with that operation is included in the carrying amount of the operation sold when determining the gain or loss on disposal. Goodwill that is derecognized under such circumstances is measured on the basis of the relative values of the operation disposed of and the retained portion of the CGU.

f) Common control transaction

A common control transaction is a transfer of assets or an exchange of equity interests among entities under the same parent's control. A common control transaction has no effect on the parent's consolidated financial statements. Net assets are derecognized by the transferor and recognized by the transferee at their carrying amount. Any difference between the value of the item transferred or received and the carrying amount of the net assets is recognized in equity in the separate financial statements of the transferring and receiving entities and eliminated on consolidation.

g) Functional and presentation currency

The Bank has defined as its functional and presentation currency the Chilean peso, which is the currency of the primary economic environment in which the Bank operates and the currency that influences its costs and revenue structure. Therefore, all balances and transactions denominated in currencies other than the Chilean peso are treated as "foreign currency".

The Bank translates accounting records of its subsidiaries in New York and in Colombia into Chilean pesos from US dollars and Colombian pesos, respectively, in accordance with instructions established by the CMF, which are consistent with IAS 21 "Effects of the variations in the exchange rates of the foreign currency". All amounts in the Consolidated Statements of Income, Consolidated Statements of Other Comprehensive Income and the Consolidated Statement of Financial Position are translated into Chilean pesos according to the exchange rate indicated in letter g) below. None of the markets in which Banco Itaú Chile and subsidiaries operate qualify as a hyperinflationary economy.

Note 2 - Summary of Significant Accounting Policies, continued

h) Foreign currency

Transactions in foreign currency are initially recorded by the Bank entities at the exchange rates of their respective functional currencies at the date these transactions first meet the conditions for their recognition.

Monetary assets and liabilities denominated in foreign currency are converted at the closing exchange rate of the functional currency in force at the closing date of the reporting period.

All differences arising from the settlement or conversion of monetary items are recognized in the results, except for those that correspond to the monetary items that are part of the hedge of a net investment, at which time the cumulative difference in equity is reclassified to profit and loss (settlement). Tax effects attributable to the exchange differences on such monetary items are also recorded in Iterim Consolidated Other Comprehensive Income.

Non-monetary items in foreign currency, which are measured in terms of historical cost, are converted using the exchange rate on the date of the transaction. Non-monetary items that are measured at their fair value in foreign currency are translated using the exchange rates on the date on which that fair value is measured. Gains or losses arising from the translation of non-monetary items measured at their fair value are recognized based on how the gains and losses arising from the change in fair value are recognized in Consolidated Statements of Other Comprehensive Income or in Consolidated Statements of Income, in accordance with IAS 21.

The Bank grants loans and receives deposits in amounts denominated in foreign currency, mainly in US dollars and Colombian pesos.

The balances of the Financial Statements of the consolidated entities whose functional currency is different from the Chilean peso are converted to the presentation currency, according to the following:

- Assets and liabilities, by using exchange rates as of the date of the Consolidated Financial Statements.
- Income and expenses and cash flows, by using the exchange rates as of the date of each transaction.

Exchange differences arising from translating balances in functional currencies of the consolidated entities other than Chilean pesos into Chilean pesos, are recorded as "Exchange differences" in Equity under the line item "Valuation accounts", until they meet the derecognition criteria for the Consolidated Statement of Financial Position, and is subsequently recorded in profit or loss.

The net amount of foreign exchange gains and losses includes the recognition of the effects of changes in the exchange rate over assets and liabilities denominated in foreign currencies and gains and losses arising from exchange rate changes affecting current and future transactions (highly probable transactions) entered into by the Bank.

Assets and liabilities in foreign currencies are shown at their equivalent amount in pesos, calculated using the exchange rate of \$891.33 per US\$1 (US dollar) as of December 31, 2023 (\$854.31 as of December 31, 2022) and the exchange rate of \$0.2205 per COP\$1 (Colombian peso) as of December 31, 2023 (\$0.1761 as of December 31, 2022).

Note 2 - Summary of Significant Accounting Policies, continued

The Iterim Financial Statements of the New York branch, as well as the Colombian subsidiaries, have been translated using these exchange rates for consolidation purposes, in accordance with IAS 21, related to the valuation of investments abroad in countries with stable economy.

i) Use of estimates and judgments

The preparation of the Consolidated Financial Statements requires Bank's management to make estimates, judgments and assumptions that affect the application of the accounting policies and the reported balances of assets and liabilities, disclosures of contingencies with respect to assets and liabilities as of the date of the Consolidated Financial Statements, as well as income and expenses during the year. Actual results may differ from these estimates.

Estimates and relevant assumptions are regularly reviewed by Management in order to properly measure some assets, liabilities, income, and expenses. Accounting estimates changes due to reviews are recognized in the year in which the estimate is reviewed and in any future year affected.

In certain cases, CMF rules and International Financial Reporting Standards require that assets and liabilities be recorded or disclosed at their fair values. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. When market prices in active markets are available, they have been used as a basis for valuation. When market prices in active markets are not available, the Bank has estimated those values as values based on the best available information, including the use of modeling and other valuation techniques.

The Bank has established allowances to cover possible credit losses in accordance with the compendium criteria. These criteria require that, in order to estimate allowances, they be evaluated regularly, taking into account factors such as changes in the nature and size of the loan portfolio, trends in the expected portfolio, credit quality and economic conditions that may affect the payment capacity of the debtors. Changes in allowances for loan losses are reflected as "Provision for loan losses" in the Consolidated Statement of Income.

Loans are charged-off when the Bank's management determines that the loan or a portion cannot be collected, in accordance with the compendium, as stated in chapter B-2 "Impaired loans and charge-offs". Charge offs are recorded as a reduction of the allowance for loan losses.

In particular, information on most significant areas of estimate due to uncertainties and critical judgments in the application of accounting policies that have the most important effect on the amounts recorded in the Consolidated Financial Statements are the following:

- Allowances for loan losses (Notes 13 and 41).
- Current taxes and deferred taxes (Note 18).
- Provision for contingencies (Note 24).
- Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments (Note 25).
- Special provisions for loan loss risk (Note 26).
- Contingencies and commitments (Note 29).

Note 2 - Summary of Significant Accounting Policies, continued

- Fair value of financial assets and liabilities (Note 44).
- Impairment losses on certain assets, including Goodwill (Notes 13, 15, 16, 17, 40 and 41).

During the year ended as of December 31, 2023, there have been no significant changes in estimates (see Notes 40 and 41).

j) Operating segments

The Bank provides financial information for each operating segment in conformity with IFRS 8 "Operating Segments" in order to disclose information that enables Consolidated Financial Statement users to evaluate the nature and financial effects of the business activities in which the Bank engages and the economic environments in which it operates and to allow them to:

- Better understand the Bank's performance.
- Better evaluate its future cash flow projections.
- Form better opinions regarding the Bank as a whole.

To comply with IFRS 8, Banco Itaú Chile identifies operating segments (Chile and Colombia) used by the Executive Committee to analyze and make decisions regarding operating, financing and investment matters, based on the following elements:

- (i) The nature of the products and services;
- (ii) The nature of the processes;
- (iii) The type or class of customer for their products and services;
- (iv) The methods used to distribute their products or provide their services; and
- (v) If applicable, the nature of the regulatory environment, for example, banking, insurance or public utilities.

The Executive Committee manages these segments using an in-house system of internal profitability reports and reviews its segments on the basis of the operating results and uses efficiency, profitability and other indicators to evaluate performance and allocate resources. The Bank has also included geographic disclosures on its operations in New York and Colombia. More information on each segment is presented in Note 6 Reporting Segments.

k) Operations with Repurchase and Resale Agreements

Transactions with resale agreements are entered into as a form of investment. Under these agreements, financial instruments are purchased, which are included as assets under "Rights under resale agreements and securities lending agreements", and are accounted for at amortized cost using the effective interest rate of the agreement.

There are also sales transactions with a repurchase agreement as a form of financing. In this regard, investments that are sold under a repurchase obligation and that serve as collateral for the loan, are part of the investment items "Financial assets held for trading at fair value through profit or loss", "Financial assets at fair value through other comprehensive income" or "Financial assets at amortized cost".

Note 2 - Summary of Significant Accounting Policies, continued

The obligation to repurchase the investment is classified in Liabilities under "Obligations under repurchase agreements and securities lending transactions" and recognized in financial liabilities at amortized cost, recognizing accrued interest and indexation at the closing date or "Financial assets at amortized cost". The obligation to repurchase the investment is classified as a liability under "Repurchase agreements and securities loans" and recorded in financial liabilities at amortized cost, recognizing accrued interest and inflation-indexation at the closing date.

The Bank applies IFRS 9 for determining the impairment of its financial assets carried at amortized cost, except for assets classified under the compendium as "Interbank Loans", "Loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. See Note 13 "Financial assets at amortized cost" and Note 41 "Credit loss expenses".

I) Classifications of Financial Instruments

i. Classifications of Financial Instruments

a) Classification of Financial Assets

The Bank classifies its Financial Assets under the following category as established by IFRS 9:

- Measured at amortized cost,
- Measured at fair value through other comprehensive income and
- Measured at fair value through profit or loss
- And those that by management's decision are irrevocably measured at fair value through other comprehensive income.

The classification of financial instruments into an amortized cost or fair value category depends on the business model with which the entity manages the assets and the contractual characteristics of the cash flows, commonly referred to as the "Solely Payments of Principal and Interest" approach (hereinafter "SPPI"). The business model valuation should reflect how the Bank manages groups of financial assets and is not dependent on the intent for an individual instrument. Therefore, in each Consolidated Financial Statement there are different business models for managing assets.

In determining the business model, the following are taken into account:

- How the performance of the business model (and the assets that are part of the business model) is evaluated and reported to the entity's key personnel.
- The risks and the way in which risks that affect the performance of the business model are managed.
- How business model managers are remunerated. The frequency, amount and timing of sales in prior years, the reasons for such sales and expectations regarding future sales.

**Note 2 - Summary of Significant Accounting Policies, continued**

With regard to the assessment of contractual cash flows, it determines whether the cash flows of the financial asset meet the SPPI criterion, i.e. whether the contractual terms of the financial asset give rise, on specific dates, to cash flows that are solely payments of principal and interest. Principal is the fair value of the financial asset at initial recognition, and interest is the consideration for the time value of money, the credit risk associated with the principal outstanding and may also include liquidity risk, administrative cost and profit margin.

For the classification, the Bank performs the SPPI test, which evaluates the contractual term to identify whether it meets the SPPI criteria, and whether the contract is a basic loan agreement. The Bank applies its judgment and considers relevant factors such as the currency in which the financial asset is denominated and the year for which the interest rate is set.

The Bank's business model represents how financial assets are managed to generate cash flows and does not depend on management's intent with respect to an individual instrument, but relates to a higher aggregate portfolio level, and is based on observable factors such as: risks affecting business model performance; how business managers are compensated; and how business model performance is evaluated and reported to management.

In addition, the Bank's business model is not evaluated on an instrument-by-instrument basis, but at a higher aggregate portfolio level, and is based on observable factors such as: the performance of financial assets, the risk affecting performance, and the frequency, value and timing of sales, among others.

In accordance with IFRS 9, the business models are:

- Business model held for collection: financial assets that are held under a business model whose objective is to collect principal and interest flows over the life of the instrument and on which there are no significant unjustified sales and fair value is not a key element in the management of these assets and the contractual conditions give rise to cash flows on specific dates, which are only payments of principal and interest on the principal amount outstanding. In this sense, sales other than those related to an increase in credit risk, to manage credit concentration risk, or unforeseen financing needs (liquidity stress scenarios) are considered unjustified, and are not incompatible with a business model whose objective is to hold financial assets to collect the contractual cash flows.
- Held to collect and sell: financial assets under this business model whose objective is achieved through the collection of principal and interest flows and the sale of such assets, with fair value being a key element in the management of these assets. This model involves a higher frequency and value of sales than the model.
- Another business model: includes financial assets with the objective of realizing cash flows through the sale of the assets. The Bank makes decisions based on the assets' fair values and manages the assets to realize those fair values.

Note 2 - Summary of Significant Accounting Policies, continued

Financial assets will only be reclassified when there is a change in the business model. In this case, all financial assets in that business model are reclassified. The change in the business model objective must be prior to the reclassification date.

b) Classification of financial liabilities

Financial liabilities are classified in the following categories:

- Financial liabilities at amortized cost;
- Financial liabilities held for trading (including derivatives): these are instruments that are recorded in this category when the Bank's objective is to generate profits through the realization of purchases and sales with these instruments;
- Financial liabilities designated at fair value through profit or loss on initial recognition (fair value option).

The Bank has the option to irrevocably designate, at the time of initial recognition, a financial liability as measured at fair value through profit or loss if the application of this criterion eliminates or significantly reduces inconsistencies in valuation or recognition, or if it is a group of financial liabilities, or a group of financial assets and liabilities, that is managed, and its performance evaluated, on a fair value basis in line with a risk management or investment strategy.

c) Embedded derivatives in hybrid financial instruments

Embedded derivatives in other financial instruments or in other host contracts are accounted for separately as financial derivatives contracts when the following criteria are met:

- Its risks and characteristics are not directly related with those of the host contract.
- A separated instrument with same characteristics of the embedded derivative meets the derivative instrument definition, and
- The host contract is not classified as "other financial assets (liabilities) at FVTPL" or as "trading instruments".

d) Reclassifications

Reclassification of financial assets is required if, and only if, the objective of the Bank's business model for managing those financial assets changes. Financial liabilities cannot be reclassified. There are no reclassifications in these Consolidated Financial Statements.

ii. Measurement of financial instruments

a) Initial measurement

On initial recognition, financial assets and liabilities are measured at the transaction price, i.e. the fair value of the consideration given or received (IFRS 13). In the case of financial instruments that are not measured at fair value through profit or loss, transaction costs of financial assets and financial liabilities recorded at fair value are recorded in profit or loss.

Note 2 - Summary of Significant Accounting Policies, continued

b) Subsequent measurement - Financial assets

After initial recognition, the Bank will measure a financial asset at:

i. Amortized cost

Financial assets that are held in a business model to collect contractual cash flows and contain contractual terms that give rise on specified dates to cash flows that are SPPI are measured at amortized cost.

The effective rate method is used in the calculation of the amortized cost of a financial asset or financial liability and in the allocation and recognition of interest income or interest expense in profit or loss for the relevant year. The effective interest rate (EIR) is the rate that exactly discounts estimated future cash payments or collection through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or the amortized cost of a financial liability.

The net impairment losses of the assets recorded in these items occurring in each year are determined in accordance with IFRS 9, except for assets classified under the compendium as "due from banks", "loans and receivables from customers and contingent loans" whose impairment determination follows the guidelines established in Chapters B1, B2 and B3 of the compendium. For purposes of recording the impairment loss, this is recorded under the caption "Provisions for credit risk due from banks and loans and accounts receivable from customers" and "Impairment for credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Consolidated Statements of Income. See note 41 "Credit loss expense".

ii. Fair value through other comprehensive income (FVTOCI)

Financial assets that are debt instruments held in a business model that is achieved through the collection of contractual cash flows and sale, and that contain contractual terms that result on specified dates in cash flows that are SPPI, are measured at FVTOCI. They are subsequently remeasured at fair value and changes in fair value (except for those related to impairment, interest income and foreign exchange gains and losses) are recognized in other comprehensive income, until the assets are sold. At the time of disposal, gains and losses accumulated in other comprehensive income are recognized in the statement of income.

On the other hand, the net impairment losses on financial assets at fair value through other comprehensive income occurring during the year are recorded under the item "Impairment due to credit risk of other financial assets at amortized cost and financial assets at fair value through other comprehensive income" in the Consolidated Statements of Income. (See Note 41).

Interest income on these instruments is recorded in the consolidated income and loss account for that year. Exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Consolidated Statements of Income.

Note 2 - Summary of Significant Accounting Policies, continued

iii. Fair value through profit or loss (FVTPL)

The caption "Financial assets held for trading at fair value through profit or loss" includes financial assets whose business model is intended to generate profits through the realization of purchases and sales or to generate results in the short term.

Financial assets recorded under "Financial assets not held for trading mandatorily measured at fair value through profit or loss" are assigned to a business model whose objective is achieved by obtaining contractual cash flows and/or selling financial assets but the contractual cash flows have not met the conditions of the SPPI test. Financial assets are classified under "Financial assets designated at fair value through profit or loss" only when such designation eliminates or significantly reduces the inconsistency in valuation or recognition that would arise from valuing or recognizing the assets on a different basis.

The assets recorded in these captions of the Consolidated Statements of Financial Position are valued after their acquisition at fair value and the changes in their value (gains or losses) are recorded, at their net amount, in the items "Financial income or loss from financial assets and liabilities held for trading" and "Financial income or loss from financial assets not held for trading mandatorily valued at fair value through profit or loss" of the Consolidated Statements of Income.

Changes arising from exchange differences are recorded in "Changes, indexation and accounting hedge of foreign currencies" in the Consolidated Statements of Income.

iv. Financial assets not held for trading mandatorily measured at fair value through profit or loss

Under this item, they are allocated to a business model the objective of which is achieved by obtaining contractual cash flows and/or by selling financial assets, but where the contractual cash flows have not met the SPPI test conditions. The assets recorded under this item of the Consolidated Statement of Financial Position are measured subsequently to their acquisition at fair value and their market value variations are recorded, at their net amount, under "Financial income (loss), net".

v. Equity instruments

For certain equity instruments, the Bank may make an irrevocable election to present subsequent changes in the fair value of the instrument in other comprehensive income, except for dividend income which is recognized in profit or loss.

Gains or losses on derecognition of these equity instruments are not transferred to income. These instruments are not subject to the impairment model of IFRS 9.

c) Subsequent measurement - Financial liabilities

After initial recognition, the Bank will measure a financial liability at amortized cost, except for derivatives that are measured at fair value through profit or loss.

Note 2 - Summary of Significant Accounting Policies, continued

iii. Derecognition of financial assets and liabilities

Financial assets are derecognized when, and only when:

- The contractual rights to the cash flows from the financial asset expire, or
- The Bank transfers substantially all the risks and rewards of ownership of the financial asset, and therefore the Bank derecognizes the financial asset and separately recognizes the rights and obligations created or retained in the transfer.

In some cases, the Bank enters into transactions whereby it retains the contractual rights to receive the cash flows from the financial asset, but assumes a contractual obligation to pay the cash flows in an arrangement that meets all the required conditions, that is, the Bank only transfers the cash flows collected. amounts of the original assets, the original assets are prohibited from being sold or pledged, and the Bank has an obligation to send the cash flows collected without significant delay.

When a financial asset is sold and the Bank simultaneously agrees to repurchase it (or an asset that is substantially the same) at a fixed price on a future date, the Bank continues to recognize the financial asset in its entirety in the Statements of Financial position because it retains substantially all the risks and rewards of ownership. The cash consideration received is recognized as a financial asset and a financial liability is recognized for the obligation to pay the repurchase price.

Financial liabilities are derecognized when, and only when, they are extinguished, canceled or mature.

a) Derecognition due to substantial modification of terms and conditions

The Bank derecognizes a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that it has essentially become a new asset, with the difference recognized as a gain or loss on derecognition, to the extent that an impairment loss has not yet been recorded.

A change in terms and conditions does not result in derecognition if it does not result in cash flows that are substantially different. Based on the change in cash flows discounted at the original Effective Interest Rate ("EIR"), the Bank records a gain or loss on modification, to the extent that an impairment loss has not yet been recorded. For financial liabilities, the Bank considers a substantial modification based on qualitative factors, and if it results in a difference between the adjusted discounted present value and the original carrying amount of the financial liability of ten percent or more. For financial assets, this assessment is based on qualitative factors.

Note 2 - Summary of Significant Accounting Policies, continued

iv. Renegotiated and modified loans

The Bank in certain situations makes concessions or modifications to the original terms of loans in response to the borrower's financial difficulties, in lieu of taking possession or enforcing collection of collateral, or in some cases to renegotiate loans. The Bank considers a loan modified when such concessions are made as a result of the borrower's present or expected financial difficulties and the Bank would not have accepted them had the borrower been in good financial standing. Indicators of financial difficulties include covenant defaults and/or significant additional history identified by the Credit Risk area. Modification may involve extending payment terms and agreeing to new loan terms. It is the Bank's policy to monitor refinanced loans to help ensure that future payments are probable.

If the modifications are substantial, the loan is written off, as explained in "III. Derecognition of financial assets and liabilities". If the terms have been renegotiated without resulting in the derecognition of the loan, any impairment is measured using the original EIR calculated prior to the modification of the terms. The Bank also reassesses whether there has been a significant increase in credit risk and whether the assets should be classified in another credit risk portfolio. (As set out in section t).

Derecognition decisions and classifications in the substandard and non-performing portfolios are determined on a case-by-case basis. If these procedures identify a loss related to a loan, it is disclosed and managed as a refinanced asset of the impaired non-performing portfolio until collected or paid.

v. Contingent Credits

The Bank provides standby loans (including letters of credit, foreign letters of credit and performance bonds) and loan commitments.

Contingent loans and unused loan commitments are commitments under which, during the term of the commitment, the Bank is obligated to provide a loan with a pre-specified term to the customer.

The face value of the contractual loan, when the agreed loan is on market terms, is not recorded in the Statement of Financial Position. The related provision for expected credit loss is disclosed in Note 24 "Provisions for contingencies", letter b).

vi. Offsetting

Financial assets and financial liabilities are offset in the Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle them on a net basis, or to realize the asset and settle the liability simultaneously.

Note 2 - Summary of Significant Accounting Policies, continued

vii. Derivatives and hedging activities

The Bank has decided to continue to apply the hedge accounting requirements of IAS 39 when adopting IFRS 9.

For presentation purposes, derivatives are presented according to their positive or negative fair value as assets or liabilities, respectively, and include trading and hedging instruments separately (see Notes 8 "Financial assets held for trading through profit or loss" and Note 12 "Financial derivative contracts for accounting hedges").

a) Hedging transactions

The Bank uses financial derivatives for the following purposes:

- i. to sell to customers who request these instruments in the management of their market and credit risks.
- ii. to use these derivatives in managing the risks of the Bank's own positions and assets and liabilities of the Bank's entities ("hedging derivatives"); and
- iii. to obtain gains from changes in the price of these derivatives ("trading derivatives").

All financial derivatives that are not held for hedging purposes are accounted for as trading derivatives.

A derivative qualifies for hedge accounting if all of the following conditions are met:

- i. The derivative hedges one of the following three types of risks to which the Bank is exposed:
 - a) Changes in the value of assets and liabilities due to fluctuations, among others, in the interest rate and/or exchange rate to which the position or balance to be hedged is subject ("fair value hedge");
 - b) Changes in the estimated cash flows derived from financial assets and liabilities, and highly probable forecast transactions ("cash flow hedge");
 - c) The net investment in a foreign operation ("hedge of a net investment in a foreign operation").
- ii. It is effective in offsetting the exposure inherent in the hedged item or position over the expected term of the hedge, which means that:
 - a) At the trade date the hedge is expected, under normal conditions, to be highly effective ("prospective effectiveness").
 - b) There is sufficient evidence that the hedge was effective during the life of the hedged item or position ("retrospective effectiveness").

There must be adequate documentation evidencing the specific designation of the financial derivative to hedge certain balances or transactions and how this effective hedge was expected to be achieved and measured, provided that it is consistent with the Bank's own risk management.

Note 2 - Summary of Significant Accounting Policies, continued

Changes in the value of financial instruments that qualify for hedge accounting are recorded as follows:

- a. For fair value hedges, gains or losses arising on both hedging instruments and hedged items (attributable to the type of risk being hedged) are included as "Financial income (loss) from Financial Asset and Liabilities for trading" in the Consolidated Statement of Income.
- b. For fair value hedges of interest rate risk in a portfolio of financial instruments, gains or losses arising on measurement of the hedging instruments within "Interest income and expense", and other gains or losses due to changes in the fair value of the underlying hedged item (attributable to the hedged risk) are recorded in the Consolidated Statement of Income (Loss) under "Net trading income (expense)".
- c. For cash flow hedges, the effective portion of the fair value of the hedging instrument is included as "Cash flow hedges" in the "Statement of Other Comprehensive Income".
- d. The valuation differences of the hedging instrument corresponding to the ineffective portion of cash flow hedging transactions are recorded directly in the Consolidated Statement of Income under "Net income (expense) from financial operations".

If a derivative designated as a hedging instrument ceases to meet the conditions described above due to maturity, ineffectiveness or any other reason, the hedge accounting treatment is discontinued. When the "fair value hedge" is discontinued, the fair value adjustments to the carrying amount of the hedged item arising from the hedged risk are amortized to profit or loss as of that date, as appropriate.

Sources of hedge ineffectiveness may arise from basis risk, including, but not limited to, discount rates used to calculate the fair value of derivatives, hedges using instruments with a fair value other than zero, and timing and notional differences between hedged items and hedging instruments.

When cash flow hedges are discontinued, any cumulative gain or loss on the hedging instrument recognized in "Statements Other Comprehensive Income" (from the year in which the hedge was effective) remains recorded in equity until the hedged transaction occurs, at which time it is recorded in the Consolidated Statement of Income, unless the transaction is no longer expected to occur, in which case any cumulative gain or loss is recorded immediately in the Consolidated Statement of Income.

Note 2 - Summary of Significant Accounting Policies, continued

m) Measurement and techniques used in determining fair value

In general terms, financial assets and liabilities are initially recognized at fair value, which, unless there is evidence to the contrary, is considered to be the transaction price. Financial instruments, other than those measured at fair value through profit or loss, are initially recognized at fair value plus transaction costs. Subsequently, and at the end of each reporting year, financial instruments are valued in accordance with the following criteria:

(i) Measurement of financial instruments

Financial assets are measured at fair value, gross of any transaction costs that may be incurred in the course of a sale, except for loans and receivables from customers.

In accordance with IFRS 13 "Fair value measurement", "fair value" is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In measuring fair value, an entity shall take into account the characteristics of the asset or liability if market participants would take those characteristics into account in pricing the asset or liability at the measurement date.

The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place: (a) in the main market for the asset or liability, or (b) in the absence of a main market, the most advantageous market for the asset or liability.

Even if there is no observable market that provides pricing information in relation to the sale of an asset or transfer of a liability at the measurement date, the fair value measurement shall assume that the transaction takes place, considered from the perspective of a potential market participant who intends to maximize the value associated with the asset or liability.

In using valuation techniques, the Bank shall maximize the use of relevant observable inputs and minimize the use of available unobservable inputs. If an asset or liability measured at fair value has a bid price and a ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used to measure fair value, regardless of where the input is classified within the fair value hierarchy (i.e. Level 1, 2 or 3). IFRS 13 establishes a fair value hierarchy that classifies inputs to valuation techniques used to measure fair value into three levels.

The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1 inputs) and the lowest priority to unobservable inputs (Level 3 inputs).

All derivatives are recorded in the Consolidated Statements of Financial Position at the fair value described above. This value is compared to the valuation on the trade date. If the fair value is subsequently measured positive, it is recorded as an asset. If the fair value is subsequently measured negative, it is recorded as a liability. The fair value on the trade date is, unless there is evidence to the contrary, considered to be the transaction price.

Note 2 - Summary of Significant Accounting Policies, continued

Changes in the fair value of derivatives since the trade date are recorded in "Financiamial income (loss)" in the Consolidated Statements of Income.

Specifically, the fair value of financial derivatives included in portfolios of financial assets or liabilities held for trading is considered to be their daily quoted price. If, for exceptional reasons, the quoted price cannot be determined on a given date, the fair value is determined using methods similar to those used to measure over-the-counter derivatives. The fair value of OTC derivatives is the sum of the future cash flows resulting from the instrument, discounted to present value at the valuation date ("present value" or "theoretical close") using valuation techniques commonly used in financial markets: "net present value" (NPV) and option valuation models, among other methods.

In addition, the fair value of derivatives includes the CVA and DVA adjustment, so that the fair value of each instrument includes the credit risk of its counterpart and the Bank's own risk. The credit valuation adjustment (CVA) is a valuation adjustment of OTC derivatives as a consequence of the risk associated with the credit exposure assumed by each counterpart. The CVA is calculated taking into account the potential exposure to each counterpart in each future year. The debit valuation adjustment (DVA) is a valuation adjustment similar to the CVA but, in this case, arises as a consequence of the Bank's own risk assumed by its counterparts in OTC derivatives.

(ii) Valuation techniques

Financial instruments at fair value, determined on the basis of quoted prices in active markets, include government debt securities, private sector debt securities, equity shares, short positions and fixed income securities issued.

In cases where price quotations are not observable in available markets, the Bank's management determines the best estimate of the price that would be set by the market using its own internal models. In most cases, these models use data based on observable market parameters as significant inputs; however, for some financial instrument valuations, significant inputs are not observable in the market. To determine a value for these instruments, various techniques are used to make these estimates, including extrapolation of observable market data.

The most reliable evidence of the fair value of a financial instrument at initial recognition is usually the transaction price; however, due to the unavailability of market information, the value of the instrument may be derived from other market transactions involving the same or similar instruments or may be measured using a valuation technique in which the inputs used include only observable market data, principally interest rates.

The main techniques used as of December 31, 2023 and 2022 by the Bank's internal models to determine the fair value of financial instruments are as follows:

Note 2 - Summary of Significant Accounting Policies, continued

- i. The present value method is used in the valuation of financial instruments that allow static hedges (mainly forwards and swaps). The estimated future cash flows are discounted using interest rate curves of the related currencies. Interest rate curves are generally observable market data.
- ii. In the valuation of financial instruments requiring dynamic hedging (mainly structured options and other structured instruments), the Black-Scholes model is typically used. Where appropriate, observable market data is used to derive factors such as bid spread, exchange rates, volatility, correlation indicators and market liquidity.
- iii. In the valuation of certain financial instruments exposed to interest rate risk, such as interest rate futures, caps and floors, the present value method (futures) and the Black-Scholes model (plain vanilla options) are used. The main inputs used in these models are observable market data, including interest rate curves, volatilities, correlations and related exchange rates.

The fair value of financial instruments calculated by the aforementioned internal models considers contractual terms and observable market data, including interest rates, credit risk, exchange rates, stock price, volatility and prepayments, among others. The Bank's management believes that its valuation models are not significantly subjective, as these methodologies can be adjusted and evaluated, as appropriate, through internal calculation of fair value and subsequent comparison with the related actively quoted price (See note 44).

n) Revenue and expense recognition

The following is a summary of the most significant criteria used by the Bank for the recognition of its revenues and expenses:

(i) Interest income, interest expense and similar items

Interest income, interest expense and similar items are recognized on an accrual basis using the effective interest rate method.

However, when an operation is evaluated either individually or collectively, and as a result of such evaluation the placements are recognized in the impaired portfolio (the compendium Cap. B2 numeral 1 letter b), being debtors subject to group evaluation, includes all loans in the "Default Portfolio"; on the other hand, in the individual portfolio (defined as placements classified in categories B3 and B4 plus the default portfolio) and which are in arrears for 90 days or more in any of their installments, the recognition of income on the accrual basis is suspended.

The suspension of revenue recognition on an accrual basis implies that, from the date on which it should be suspended in each case and until such loans are no longer impaired, the respective assets included in the Statement of Financial Position will not be increased by interest, adjustments or commissions and no revenue for these items will be recognized in the Consolidated Statement of Income, unless they are actually received. These standards only refer to the criteria for valuation and recognition of income for financial accounting information.

Note 2 - Summary of Significant Accounting Policies, continued

Interest income from "transactions with accrual suspended" is only re-recorded when such transactions become current (that is, payments were received that make them less than 90 days past due) and when they are no longer in the impaired portfolio.

(ii) Dividends received

Dividends received from investments in other companies are recognized on income when the right to receive them arises and are recorded in the item "Income from investments in companies".

(iii) Commissions, fees and similar items

Income and expenses from commissions and fees are recognized in the Consolidated Statement of Income using the criteria established in IFRS 15 "Revenue from contracts with customers", based on consideration of the terms of the contract with the customers, excluding amounts collected on behalf of third parties. Revenue is recognized when performance obligations are satisfied by transferring a promised good or service to a customer, which is evidenced by transferring control over an asset or the rendering of a service:

Commissions recorded by the Bank correspond mainly to:

- Line of credit and overdraft commissions: includes earned commissions during the year related to lines of credit granted and checking accounts overdrafts.
- Guarantee and letters of credit fees: includes earned commissions during the year related to bank guarantees granted over actual or contingent obligations to third parties.
- Credit card fees: includes earned and received commissions during the year related to credit and debit cards usage.
- Accounts management fees: includes earned fees related to maintenance of checking accounts, savings accounts, and other accounts.
- Collection and payment services fees: includes fee income related to collection services as well as payment services rendered by the Bank and its subsidiaries.
- Brokerage and securities management fees: includes fee income related to financial assets brokerage and securities management and custody.
- Insurance brokerage fees: includes insurance brokerage fees.
- Other fee and commissions: includes income arising from currency exchange, financial advisory services, cashier checks issuance, placement of financial products and online banking services.

Commission expenses include:

- Cards transactions fees: includes credit and debit card transaction fees related to income generated in those transactions.
- Securities transactions fees: includes fees related to custody of securities and securities brokerage.
- Other fees and commissions: includes mainly expenses generated from online services.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank grants a group of benefits to its cardholders for which, in accordance with IFRS 15, has established provisions enough to comply with its performance obligations when these benefits become enforceable.

(iv) Non-financial income and expenses

They are recorded in accordance with IFRS 15, identifying the performance obligations, allocating the transaction price to separate performance obligations, and recognizing income when these are satisfied.

(v) Loan arrangement fees

Fees that arise from loans arrangement, opening accounts, study and information fees, they are accrued and recognized on a systematic basis on the Consolidated Statement of Income throughout the life of the loan. In the case of arrangement fees, the portion corresponding to the related direct costs incurred in the formalization of such transactions are immediately recorded in the income statement.

o) Impairment

Assets are acquired or purchased based on the future economic benefits they produce. Consequently, impairment is recorded when the carrying amount of such assets is less than their recoverable amount. Assets are subject to impairment tests to adequately reflect the future economic benefits that the assets are capable of producing when used by the Bank.

The Bank assesses the expected future credit losses ("ECL") associated with its financial instrument assets carried at amortized cost and FVTOCI, subject to the limitations defined in paragraph 5 of Chapter A-2 of the Compendium of Accounting Standards. The Bank recognizes a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased, probability-weighted amount determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Bank follows the criteria described below to assess impairment, when applicable:

(i) Impairment of financial assets except "Interbank Loans", "Loans and receivables from customers and "Contingent loans".

The Bank applies IFRS 9 to determine the impairment of its financial assets at amortized cost and at fair value through other comprehensive income, except for "Interbank Loans", "Loans and accounts receivable from customers" and "Contingent loans", whose impairment is determined by applying the provisions of Chapter B1, B2 and B3 of the compendium, for the rest of the assets the following is applicable.

Note 2 - Summary of Significant Accounting Policies, continued

IFRS 9 introduces the concept of "expected losses" which is developed in the credit risk model applied by the Bank. The "expected loss" impairment model is applied to financial assets measured at amortized cost, debt instruments measured at fair value through other comprehensive income, financial guarantee contracts and other commitments. All financial instruments measured at fair value through profit or loss are excluded from the impairment model. The standard classifies financial instruments into three categories, which depend on the evolution of their credit risk from the time of initial recognition, and which determine the calculation of their credit risk hedges.

Stage 1: No significant increase in risk: "The allowance for losses on these financial instruments is calculated as the expected credit losses resulting from possible events of default within 12 months after the reporting date (12-month expected loss)."

Stage 2: With significant increase in risk: "When the credit risk of a financial asset has increased significantly since initial recognition, the allowance for losses on that financial instrument is calculated as the expected credit loss over the entire life of the transaction. In other words, it is the expected credit losses resulting from all possible events of default during the expected life of the financial instrument".

Stage 3: Impairment: "When there is objective evidence that the financial asset is impaired, it is transferred to this category in which the write-down for losses on that financial instrument is calculated, as in Stage 2, as the expected credit loss over the life of the asset."

In cases in which the recovery of any recorded amount is considered remote, the asset is removed from the consolidated balance sheet, without prejudice to any actions that may be taken to attempt to collect the amount until the rights to receive it have been extinguished definitively, whether by expiration, forgiveness or other causes.

The Bank takes into account reasonable and supportable information that is available without undue cost or effort and that may affect the credit risk of a financial instrument, including forward-looking information to determine a significant increase in credit risk since initial recognition. Forward-looking information includes past events, current conditions and expected or future economic conditions (macroeconomic data).

Credit risk assessment and forward-looking information (including macroeconomic factors), includes quantitative and qualitative information based on the Bank's historical experience, examples include:

- Financial or economic conditions that are expected to cause a significant change in the borrower's ability to meet its debt obligations.
- An actual or expected downgrade of the borrower's internal credit rating or a decrease in the borrower's performance score.
- An actual or expected significant change in the borrower's operating results.
- Significant increases in credit risk on other financial instruments of the same borrower.
- Significant changes in the value of the collateral backing the obligation or in the quality of third-party guarantees or credit enhancements.
- Reductions in financial support from a parent entity or other subsidiary.

Note 2 - Summary of Significant Accounting Policies, continued

- Expected changes in the loan documentation, including an expected breach of contract that may result in waivers or modifications of covenants, suspension of interest payments, increased interest rates, requirements for additional collateral or guarantees, or other changes in the contractual framework of the facility.

The Bank has considered that if contractual payments are more than 30 days past due, credit risk is considered to have increased significantly since the initial recognition of the credit, but this is not an absolute indicator. The Bank has not rebutted the IFRS 9 presumption of significant increase in risk ("SIR") or default.

Regarding the use of present, past and future information required by the application of the expected loss approach described in IFRS 9, this requires the incorporation of present, past and future information for both the detection of significant increase in risk and the measurement of expected losses, which should be performed on a probability-weighted basis. When estimating expected losses, the standard does not require the identification of all possible scenarios. However, the probability of a loss event occurring and the probability of it not occurring must be considered, even if the possibility of a loss occurring is very low.

To achieve this, the Bank evaluates the linear relationship between its estimated loss parameters (PI, PDI, and EAP) with the history and future forecasts of macroeconomic scenarios. Also, when there is no linear relationship between the different future economic scenarios and their associated expected losses, more than one future economic scenario should be used for the estimation.

Expected losses are then derived from the following parameters:

PI: estimate of the probability of default in each year.

EAP: estimate of the exposure in the event of default in each future period, taking into account changes in exposure after the reference date of the Financial Statements.

PDI: estimated loss given default, as the difference between the contractual cash flows and those expected to be received, including collateral. For these purposes, the estimate considers the probability of execution of the guarantee, the time until possession and subsequent realization is reached, the expected cash flows and the acquisition and sale costs.

CCF: Cash Conversion Factor, is the estimate made on off-balance sheet balances to determine the exposure subject to credit risk in the event of default.

The expected credit losses calculated are based on the internal models developed for all portfolios within the scope of IFRS 9, except for those cases that are subject to individualized estimation. Internal models have been developed that take into account as sources of information the data provided by external rating agencies or others observed in the market, such as changes in bond yields, credit default swap quotes or any other public information on them.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Non-financial assets

The carrying amounts of the Bank's non-financial assets are reviewed regularly or at least at each reporting date to determine whether there is any indication of impairment. If such indications exist, then the recoverable amount of the asset is estimated. The recoverable amount of an asset is the higher of fair value less costs to sell and value in use. That recoverable amount is determined for an individual asset, unless the asset does not generate cash flows that are substantially independent of the cash flows from other assets or group of assets.

When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and its value is reduced to its recoverable amount.

The recoverable amount is the higher of fair value less costs to sell and value in use. If we assess the value in use of an asset, the estimated cash flows are discounted to their present value by applying a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

The Bank shall assess at the end of each reporting year whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased. If any such indication exists, the entity shall estimate the recoverable amount of that asset. In assessing whether there is any indication that an impairment loss recognized in prior years for an asset other than goodwill may no longer exist or may have decreased, an entity shall consider, as a minimum, external sources of information (the asset's value has increased significantly during the year; significant changes with a favorable effect on the entity have taken place during the year, or will take place in the near future, in the technological, market, economic or legal environment in which the entity operates or in the market to which the asset is dedicated; market interest rates or other market rates of return on investments have decreased during the year, and those decreases are likely to affect the discount rate used in calculating the asset's value in use and increase the asset's recoverable amount materially) and internal sources of information such as significant changes with a favorable effect on the entity have taken place during the year, or are expected to take place in the near future, in the extent to which, or manner in which, the asset is used or is expected to be used. These changes include costs incurred during the year to improve or enhance the asset's performance or restructure the operation to which the asset belongs. In the case of goodwill and indefinite useful life intangible assets or not yet available for use, the recoverable amount is estimated annually, at year end.

When impairment exists the carrying amount of the asset shall be reduced to its recoverable amount if, and only if, the recoverable amount of an asset is less than its carrying amount. This reduction is an impairment loss.

The impairment loss is recognized immediately in income, unless the asset is carried at its revalued value in accordance with another standard. Any impairment loss on revalued assets will be treated as a decrease in the revaluation made in accordance with that other standard. When the amount estimated for an impairment loss is greater than the carrying amount of the asset to which it relates, the Bank shall recognize a liability if, and only if, that is required by another standard. After the recognition of an impairment loss, the depreciation (amortization) charge for the asset shall be adjusted in future years to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Note 2 - Summary of Significant Accounting Policies, continued

If an impairment loss is recognized, any related deferred tax assets or liabilities are determined in accordance with IAS 12 *"Income taxes"* by comparing the revised carrying amount of the asset with its tax base.

Impairment losses recognized in prior years are tested at each reporting date for any indication that the loss has decreased or disappeared. An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(iii) Goodwill

Goodwill is tested annually in order to determine if impairment losses exist and whenever there is an indication that the carrying value may be impaired. The impairment of goodwill is determined by evaluating the recoverable amount of each CGU (or group of CGU) to which the goodwill relates. An impairment loss is recognized when the recoverable amount of the CGU is less than its carrying amount.

For the purpose of impairment testing, goodwill acquired in a business combination shall, from the acquisition date, be allocated to each of the acquirer's cash-generating units, or groups of cash-generating units irrespective of whether other assets or liabilities of the acquiree are assigned to those units or groups of units. An impairment loss recognized for goodwill shall not be reversed in a subsequent years.

According to IAS 36 *"Impairment of assets"* the annual impairment test for a cash-generating unit to which goodwill has been allocated or for intangible assets with indefinite useful lives may be performed at any time during an annual year, as long the test is performed at the same time every year. Different cash-generating units may be tested for impairment at different times.

p) Fixed assets

Items of fixed assets are measured at acquisition cost, net of accumulated depreciation and impairment, if any.

In addition to the price paid to acquire each item, the cost also includes, where applicable, the capitalized cost. The capitalized cost includes expenses attributed directly to the asset acquisition and any other costs directly attributable to the process of placing the asset in conditions to be used.

When some part of an item of the fixed assets has a different useful life to that fixed asset, it is recognized as a separate component (significant components of fixed assets).

This item includes the amounts of property, land, furniture, vehicles, technological equipment, and other facilities own by the consolidated entities or acquired under financial leases. These assets are classified based on their use in:

Note 2 - Summary of Significant Accounting Policies, continued

(i) Fixed assets for own use

Fixed assets for own use includes, but is not limited to, tangible assets received by the consolidated entities in full or partial satisfaction of financial assets representing accounts receivable from third parties which are intended to be held for continuing own use and tangible assets acquired under finance leases. These assets are recorded at acquisition cost less the related accumulated depreciation and, if applicable, any impairment losses (when net carrying amount was higher than recoverable amount). For accounting purposes, acquisition cost of the received asset is considered to be its net amount.

Depreciation is calculated using the straight line method over the acquisition cost of assets less their residual value, assuming that the land on which buildings and other structures stand has an indefinite life and, therefore, is not subject to depreciation. Fixed assets in leased properties are depreciated over the shorter period of time between their useful lives or the term of the lease, unless it is certain that the Bank will acquire the property at the end of the lease.

The consolidated entities assess at each reporting date whether there is any indication that the carrying amount of any tangible asset exceeds its recoverable amount. If this is the case, the carrying amount of the asset is reduced to its recoverable amount and future depreciation charges are adjusted in accordance with the revised carrying amount and to the new remaining useful life.

In a similar manner, when indication exists that a material asset has recovered its value, the consolidated entities recognize the impairment loss reversal and the future depreciation charges are adjusted accordingly. In no case the impairment loss reversal of an asset can increase its value over the initial value as it no impairment losses were recognized in previous years.

Also, at least at the end of the year, the estimated useful lives of the items of property, plant and equipment for own use are reviewed in order to detect significant changes therein, which, if any, will be adjusted by means of the corresponding correction of the charge to the consolidated statement of income for future years, by recalculating the depreciation, by virtue of the new useful lives.

Upkeep and maintenance expenses relating to tangible assets held for own use are recorded as an expense in the year in which they are incurred.

(ii) Assets leased out under operating leases

The criteria used to record the acquisition cost of assets leased out under operating leases, to calculate their depreciation and their respective estimated useful lives, and to record the impairment losses thereof, are consistent with those described in relation to fixed assets held for own use.

Note 2 - Summary of Significant Accounting Policies, continued

q) Intangible assets

Intangible assets are identified as non-monetary assets (separately identifiable from other assets) without physical substance which arise as a result of legal or contractual rights, internally developed by the consolidated entities, as well as those generated in a business combination. These are assets for which the cost can be reliably measured and it is probable that future economic benefits attributable to the asset will flow to the Bank. The cost of intangible assets acquired or originated in a business combination correspond to its fair value at the acquisition date.

Intangible assets are recorded initially at acquisition or production cost and are subsequently measured at cost less any accumulated amortization and any accumulated impairment losses.

The Bank shall assess whether the useful life of an intangible asset is finite or indefinite and, if finite, the length of, or number of production or similar units constituting, that useful life. An intangible asset shall be assessed by the Bank as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Bank.

The accounting for an intangible asset is based on its useful life. An intangible asset with a finite useful life is amortized over its economic useful life and is reviewed to determine whether there was any indication that the intangible asset may have suffered any impairment, the period and method of amortization are reviewed at least at the end of each reporting year. An intangible asset with an indefinite useful life is not amortized. The Bank tests for impairment by comparing its recoverable amount with its carrying amount annually and whenever there is an indication that the intangible asset may be impaired.

(i) Software

The software acquired by the Bank is recognized at cost less the accumulated amortization and impairment, if any.

The expenses in software developed internally are recorded as assets when the Bank is capable of proving its intention and ability to complete development, when internal use will generate future economic benefits and/or decrease in costs, and when the cost of completing its development can be reliably measured. The capitalized costs of the software developed internally include all the direct costs attributable to the development of the software, and it is amortized over the course of its useful life. Software developed internally is recorded at cost less the accumulated amortization and losses from impairment.

The subsequent expenditures associated with the asset are capitalized only when future economic benefits from them will flow to the Bank. The rest of the expenditures are recognized in income.

Intangible assets are amortized on a straight-line basis over their estimated useful life; starting on the date it is ready for use.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Generated in a business combination

According to IFRS 3 “Business Combinations”, when an intangible asset is acquired or generated in a business combination its cost will be the fair value at the acquisition date. The fair value of an intangible asset represents expectations of market participants at the acquisition date over the probability that future economic benefits from the asset will flow to the entity. In other words, the entity expects that economic benefits flow to them, even though there is uncertainty about the date or the amount of them.

As set forth by IAS 38 “Intangibles Assets” and IFRS 3, the acquirer will recognize an intangible asset from the acquiree at the acquisition date separately from Goodwill independently if the asset was previously recognized by the acquiree before the business combination.

In connection with the aforementioned, the business combination between Itaú Chile and CorpBanca gave rise to intangible assets and Goodwill as indicated in Note 15 “Intangible Assets”.

(iii) Other identifiable intangible assets

Correspond to those intangible assets that can be identified, the Bank controls them, can be reliably measured and it is probable that future benefits will flow to the Bank.

r) Factoring transactions

The Bank performs operations with their clients, in which they receive invoices and other credit representative trading instruments with or without recourse to the transferor, anticipating a percentage of the total amount receivable of the borrower upon collection. These transactions are valued at the disbursed amounts by the Bank in exchange for invoices or other credit representative trading instruments.

The price differences between the disbursed amounts and the nominal amount of the documents are recorded in the Consolidated Statement of Income as interest income applying the effective interest rate method, over the term of the transaction. The responsibility of payment of the documents remains with the client (assignor).

s) Leases

On the date of commencement of a lease the Bank recognizes an asset for right of use and a liability for lease in accordance with the provisions of IFRS 16 “Leases”.

(i) Assets for right-of-use

At the beginning of a lease, the right-of-use asset is measured at cost. The cost includes (a) the amount of the initial measurement of the lease liability; (b) lease payments made before or from the start date, less lease incentives received; (c) the initial direct costs incurred by the lessee; and (d) a modification of the costs to be incurred by the lessee when dismantling and eliminating the underlying asset, restoring the place in which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Note 2 - Summary of Significant Accounting Policies, continued

After the initial recognition date, the Bank measures the assets by right of use applying the cost model, which is defined as the asset by right of use measured at cost (a) less accumulated depreciation and accumulated risk losses of value; and (b) adjusted for any new measurement of the lease liability.

The Bank applies the depreciation requirements established by IAS 16 "Property, plant and equipment" over the right-of-use in these type of transactions.

If the lease transfers ownership of the underlying asset to the Bank at the end of the lease term or if the cost of the right-of-use asset reflects that the Bank exercises a purchase option, the Bank depreciates the right-of-use asset from the date of beginning of it until the end of the useful life of the underlying asset. In another case, the Bank depreciates the asset by right of use from the start date until the end of the useful life of the asset whose right of use has or until the end of the lease term, whichever comes first.

The Bank applies IAS 36 "Impairment of assets" to determine if the right-of-use asset presents changes in value and accounts for identified value risk losses.

As of December 31, 2023 and 2022, the Bank has not identified impairment in the value of the right-of-use assets.

(ii) Lease liability

The Bank measures the lease liability at the present value of lease payments that have not been paid as of that date. Lease payments are discounted using the interest rate implicit in the lease, if that rate could be easily determined. Since that rate cannot be easily determined, the Bank uses the incremental rate for loans (cost of funding).

The lease payments included in the measurement of the lease liability determined the payments for the right of use the underlying asset during the term of the not cancelable lease at the measurement date which includes (a) fixed payments, less any lease incentive receivable (b) variable lease payments, which depends on an index or rate, recently measured using the index or rate on the start date; (c) it matters that the lessee expects to pay as residual value guarantees; (d) the exercise price of a purchase option if the lessee is reasonably sure to exercise that option; and (e) payments for penalties arising from the termination of the lease, if the term of the lease reflects that the lessee exercises an option to terminate the lease.

After the date of initial recognition, the Bank measures the lease liability in order to recognize (a) the interest on the lease liability; (b) lease payments made; and (c) the new measurements or modifications of the lease, and also for fixed lease payments that have essentially been reviewed.

The Bank makes new measures of the lease liability discounting the modified lease payments, if (a) there is a change in the expected amounts payable related to a residual value guarantee. A lessee will determine the lease payments to determine the change in the amounts expected to be paid under the residual value guarantee; (b) there will be a change in future lease payments determined from a change in an index or a rate used to determine those payments.

Note 2 - Summary of Significant Accounting Policies, continued

The Bank measures the lease liability again to modify the modified lease payments only when there is a change in cash flows. The Bank will determine the revised lease payments, for the remainder of the lease term, based on the revised contractual payments.

The Bank measured the lease liability at the present value of the lease payments discounted using the incremental interest rate for loans (cost of funding).

t) Provisions for credit risk on "Interbank Loans" and "Loans and accounts receivable from customers"

The Bank has established provisions for impairment losses due to credit risk on "Interbank Loans", "Loans and receivables from customers" and "Contingent loans", in accordance with the instructions defined in the compendium, issued by the Commission for the Financial Market (CMF), and the credit risk rating and evaluation models approved by the Bank's Corporate Governance, in order to make the necessary and sufficient provisions in a timely manner to cover the expected losses associated with the characteristics of the debtors and their receivables, which determine the payment behavior and subsequent recovery.

The processes and compliance with the policy are evaluated and supervised in accordance with internal control procedures, in order to ensure compliance and the maintenance of an adequate level of provisions to support expected losses.

Provisions determined and denominated "individual allowances", correspond to debtors that are individually, assessed due to size, complexity or level of exposure to the Bank, it is necessary to know and analyze in detail.

Provisions determined and denominated "group allowances", includes individuals or smaller companies, and are associated to a high number of transactions with homogeneous characteristics and that due to such conditions are evaluated collectively.

In order to establish allowances for loan losses, an assessment of the loans and contingent loans portfolios is performed as indicated below:

- Individual allowances for the normal portfolio.
- Individual allowances for the substandard portfolio.
- Individual allowances for the impaired portfolio.
- Group allowances for the normal portfolio.
- Group allowances for the impaired portfolio.

(i) Individual allowances

When a debtor is considered as individually significant, i.e. with significant levels of debt and for those ones that are not significant but cannot be classified in groups of financial assets with homogeneous credit risk characteristics, and due to its size and complexity or exposure it is required to be individually assessed.

The methodology used to classify and determine its allowances is performed in accordance with Chapter B-1 "Provisions for credit risk" from the compendium, assigning risk categories to each debtor according to the following portfolio:

Note 2 - Summary of Significant Accounting Policies, continued

a) Normal portfolio

Corresponds to debtors whose capacity payments allows them to comply with their obligations and commitments, and according to the economic-financial situation this condition will not change. The classifications assigned to this portfolio are the categories that goes from A1 to A6. Notwithstanding the above, the Bank must maintain a minimal allowance percentage of 0.5% over its loan portfolio and contingent loans that form part of the Normal portfolio.

b) Substandard portfolio

Includes the borrowers which have financial difficulties, or whose payment capacity worsened significantly, presenting reasonable doubt regarding the probability principal and interest under the contractually agreed terms, indicating that they are less likely to comply with their financial obligations in the short term. In addition, borrowers that recently held loans in default for over 30 days also are included in the substandard portfolio. The classifications assigned to this portfolio are categories B1 to B4.

c) Normal and Substandard portfolios

As part of the debtors' individual analysis, the Bank classifies its debtors into the aforementioned categories, assigning probabilities of default (PD) and loss given default (LGD), which yield the expected loss percentages as a result. These variables are regulated by the CMF- to be applied to each of the individual categories.

Below are presented the probabilities of default and loss given default, as established by the CMF:

Type of portfolio	Category of debtor	Probability of default (DP) (%)	Loss given default (PLD) (%)	Expected loss (EL) (% Provisión)
Normal portfolio	A1	0.04	90.00	0.03600
	A2	0.10	82.50	0.08250
	A3	0.25	87.50	0.21850
	A4	2.00	87.50	1.75000
	A5	4.75	90.00	4.27500
	A6	10.00	90.00	9.00000
Substandard portfolio	B1	15.00	92.50	13.87500
	B2	22.00	92.50	20.35000
	B3	33.00	97.50	32.17500
	B4	45.00	97.50	43.87500

In order to determine the amount of provisions, the Bank first determines the affected exposure, which comprises the book value of the customer's placements plus the contingent credits, less the amounts that are feasible to recover through the execution of the guarantees, financial or real, backing the operations, to which the respective loss percentages are applied. In the case of collateral, the Bank must demonstrate that the value assigned to this deduction reasonably reflects the value it would obtain on the disposal of the assets or equity instruments. In the case of substitution of the debtor's credit risk for the credit quality of the guarantor or surety, this methodology will only be applicable when the guarantor or surety is an entity rated in a category similar to investment grade by a local or international rating agency recognized by the regulator.

Guaranteed values may not be deducted from the exposure amount. The procedure apply only in the case of financial or real guarantees.

Note 2 - Summary of Significant Accounting Policies, continued

d) Impaired portfolio

Includes the loans to borrowers for which recovery is considered remote, given that they have suffered a loss event resulting in impairment. This portfolio includes borrowers with evident signs of possible bankruptcy, as well as those in which a forced debt renegotiation is required, and also includes any borrower with loans in default for equal to or greater than 90 days in the payment of interest or principal of any loan. The classifications assigned to this portfolio are categories C1 to C6. Applied to all credits, including 100% of the amount of contingent credits, held by those same debtors.

For purposes of establishing provisions on this portfolio, in the first instance an expected loss rate is determined, deducting from the amount of the exposure the amounts susceptible to recovery through the execution of financial and real guarantees that support the operations and also deducting the present value of the recoveries obtained through collection actions net of associated expenses.

Once the expected loss range has been determined, the respective allowance percentage is applied to the amount of the exposure comprising the placements plus the contingent credits of the same debtor.

Allowance percentages to be applied over the exposition are as follows:

Type of portfolio	Risk scale	Expected loss range	Provision
Impaired portfolio	C1	Up to 3%	2%
	C2	More than 3% and up to 20%	10%
	C3	More than 20% and up to 30%	25%
	C4	More than 30% and up to 50%	40%
	C5	More than 50% and up to 80%	65%
	C6	More than 80%	90%

Loans are maintained in this portfolio until a normalization of their payment capacity or behavior is observed, without prejudice to the write-off of each particular loan that meets the condition set forth in Title II of Chapter B-2 of the compendium.

In order to remove a debtor from this portfolio, once the circumstances that led to its classification in this portfolio under these rules have been overcome, at least the following copulative conditions must be met:

- None of the debtor obligations with the Bank are overdue for more than 30 days.
- No new re-financing of loans has been granted.
- At least one of the payments received includes principal payment (total or partial).
- If the debtor has a loan with partial payments due within six months, two payments have been made.
- If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

Note 2 - Summary of Significant Accounting Policies, continued

(ii) Group allowances

Collective assessment are used to deal with a large number of loan transactions with small amounts granted to individuals and small size companies. This type of assessment, as well as the criteria to apply for them, must be consistent with those used when loans were granted.

To establish allowances, collective assessment requires grouping loans with homogeneous characteristics in terms of type of debtor and loan conditions, in order to conform, by technically formulated methodologies and following prudential criteria, the payment behavior of the group and the recoveries for defaulted loans.

Based on the above, the groups are assigned with a probability of default (PD) and loss given default (LGD) considering the profile that best suits the loan. Net exposure is calculated, which includes the book value of the loan plus contingent loans.

a) Standard method for mortgage loans allowances

For the purposes of calculating credit risk provisions of the mortgage loan portfolio for mortgage, the Bank uses the standard provision method for mortgage loans established in the compendium. According to this method the provision factor to be applied, represented by the expected loss (EL) over the amount of the mortgage loans, depends on the overdue of each loan and the relation, at the end of each month, between the gross exposure and the corresponding collateral (LTV), according to the following table:

LTV tranche	Days past due at month-end					Portfolio in default
		0	1 - 29	30 - 59	60 - 89	
LTV ≤ 40%	PI (%)	1.0916	21.3407	46.0536	75.1614	100
	PDI (%)	0.0225	0.0441	0.0482	0.0482	0.0537
	PE (%)	0.0002	0.0094	0.0222	0.0362	0.0537
40% < LTV ≤ 80%	PI (%)	1.9158	27.4332	52.0824	78.9511	100
	PDI (%)	2.1955	2.8233	2.9192	2.9192	3.0413
	PE (%)	0.0421	0.7745	1.5204	2.3047	3.0413
80% < LTV ≤ 90%	PI (%)	2.5150	27.9300	52.5800	79.6952	100
	PDI (%)	21.5527	21.6600	21.9200	22.1331	22.2310
	PE (%)	0.5421	6.0496	11.5255	17.6390	22.2310
LTV > 90%	PI (%)	2.7400	28.4300	53.0800	80.3677	100
	PDI (%)	27.2000	29.0300	29.5900	30.1558	30.2436
	PE (%)	0.7453	8.2532	15.7064	24.2355	30.2436

Note 2 - Summary of Significant Accounting Policies, continued

In case the same debtor has more than one mortgage loan with the Bank and one of those loans is 90 days overdue or more all those loans are incorporated to the Impaired portfolio, calculating allowances for each one of those loans applying the corresponding percentage according to the LTV.

For mortgage loans related to housing programs and benefits from the Government, when guaranteed by the corresponding auction insurance, the allowance percentage could be weighted for a loss mitigating factor, which depends on the LTV percentage and the value of the property at inception. The loss mitigating factors are those shown in the table below:

LTV tranche	MP loss mitigation factor for credits with state auction insurance	
	V tranche: Price of the house upon executing sale agreement (UF)	
	V ≤ 1,000	1,000 < V ≤ 2000
LTV ≤ 40%	100%	100%
40% < LTV ≤ 80%	100%	100%
80% < LTV ≤ 90%	95%	96%
LTV > 90%	84%	89%

b) Provisions for Commercial Loans

The Bank uses the three standard models established in the compendium, in order to determine the provisions of the group commercial portfolio. The applicable percentages of provision and the parameters used to determine the provision, are set out on the compendium.

c) Commercial leasing operations

The allowance is determined based on the book value of the commercial lease operations (including the purchase option). The allowance percentage used in the calculation will depend on the delinquency of each operation, the type of leased asset and the relationship, at the end of each month, between the book value of each operation and the value of the leased asset (LTV), as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and type of asset (%)		
Days of delinquency of transaction at end of month	Type of asset	
	Real Estate	Non-real estate
0	0.79	1.61
1 - 29	7.94	12.02
30 - 59	28.76	40.88
60 - 89	58.76	69.38
Portfolio in default	100.00	100.00

Note 2 - Summary of Significant Accounting Policies, continued

Loss Given Default (LGD) applicable according to PVB tranche and type of asset (%)		
PVB= Current value of transaction/ Value of leased asset		
PVB tranche	Real Estate	Non-real estate
PVB <= 40%	0.05	18.20
40% < PVB <= 50%	0.05	57.00
50% < PVB <= 80%	5.10	68.40
80% < PVB <= 90%	23.20	75.10
PVB > 90%	36.20	78.90

The LTV relationship is determined considering the guarantee appraisal value, expressed in UF for real estate and in Chilean pesos for non-real estate, recorded at inception, considering any transitory event that may cause an increase on the value of the asset.

d) Student loans

The expected loss (%) is applied over the amount of the student loan and the exposure of the contingent credit when applicable. The factor used is determined based on the type of student loan and the collectable payment of principal or interest, at the end of each month. Only when payment is due, the factor will also depend on overdue.

Probability of Default (PD) applicable according to payment due date, delinquency and type of loan (%)			
Payment of principal or interest due at month-end	Days past due at closing of closing	Student Loan	
		CAE	CORFO or other
Yes	0	5.20	2.90
	1-29	37.20	15.00
	30-59	59.00	43.40
	60-89	72.80	71.90
	Portfolio in default	100.00	100.00
No	n/a	41.60	16.50

Loss Given Default applicable according to payment due date and type of loan (LGD) (%)		
Payment of principal or interest due at month-end	Student Loan	
	CAE	CORFO or other
Yes	70.90	70.90
No	50.30	45.80

For loans granted in accordance with Law 20,027, the Bank considers the Government as a qualified guarantor for 90% of the loan.

Note 2 - Summary of Significant Accounting Policies, continued

e) Generic commercial placements and factoring

Factoring operations and commercial loans, other than those indicated above, expected loss (%) is applied over the amount of the loan and on the exposure of the contingent credit. The factor used is determined based on whether the operation has guarantees and it's overdue. In addition for those operations with guarantees, the relationship between the debtor's obligations to the bank and the value of the guarantees (LTV) is used to determine the factor as indicated in the following tables:

Probability of Default (PD) applicable according to delinquency and PTVG tranche (%)				
Days past due at month-end	With guarantee		Without guarantee	
	PTVG <=100	%	PTVG >100	%
0		1.86		2.68
1-29		11.60		13.45
30-59		25.33		26.92
60-89		41.31		41.31
Portfolio in default		100.00		100.00

Loss Given Default (LGD) applicable according to PTVG tranche (%)			
	PTVG tranche	Commercial generic transactions or factoring without liability of the assigner	Factoring with liability of the assigner
With guarantee	PTVG <= 60%	5.00	3.20
	60% <PTVG <= 75%	20.30	12.80
	75% <PTVG <= 90%	32.20	20.30
	90% < PTVG	43.00	27.10
	Without guarantee	56.90	35.90

A guarantee or collateral can only be considered if, the guarantee was constituted in favor of the Bank with preference and if the guarantees is directly associates with the debtor's credits (not shared with other debtors). For the purposes of calculating the LTV, the invoices assigned in the factoring operations, nor the guarantees associated with mortgage loans can be considered.

The guarantees used in calculating the LTV relationship may be of a specific or general purpose, including those that are simultaneously specific and general. In the case of specific guarantees, the PTVG ratio must be calculated independently for each secured transaction, as the division between the amount of the placement and the contingent credit exposure and the value of the collateral securing it. For general and specific guarantees, LTV is determined as the division between the sum of the amounts of the loan and exposures of contingent credits and the general and specific guarantees considering any restriction.

Note 2 - Summary of Significant Accounting Policies, continued

• Provisions associated with financing guaranteed by FOGAPE Covid 19

On July 17, 2020, the CMF requested the determination of specific provisions for loans guaranteed by the FOGAPE Covid-19 guarantee, for which the expected losses should be determined by estimating the risk of each transaction, without considering the substitution of the credit quality of the guarantee, according to the individual or group analysis method, in accordance with the provisions of Chapter B-1 of the Compendium of Accounting Standards. This calculation must be made on an aggregate basis, grouping all those operations to which the same deductible percentage is applicable. Therefore, the total amount of expected losses resulting from the aggregate calculation of each group of operations must be contrasted with the respective total amount of deductible applicable to them and proceed as follows, when the expected losses of the operations of a group to which the same deductible percentage is applicable, determined according to the above procedure are less than or equal to the aggregate amount of the deductible, the provisions will be determined without considering the coverage of FOGAPE Covid-19, that is, without substituting the credit quality of the direct debtor for that of the guarantor, and when they are greater than the aggregate amount of the deductible, the provisions will be determined using the substitution method provided for in numeral 4. 1 letter a) of Chapter B-1 of the Compendium and will be recognized in accounts separate from commercial, consumer and mortgage provisions. As of December 31, 2023 and 2022 the Bank has recorded provisions of MCh\$4,528 and MCh\$8,721, respectively.

• Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting year in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium, using the methodology set forth in letter b) "Guarantees".

Impaired portfolio – Collectively assessed loan

The group in default loan portfolio comprises all loans and 100% of the amount of contingent loans of debtors who at the end of a month are 90 days or more past due in the payment of interest or principal on any loan. It will also include debtors who have been granted a loan to leave in force a transaction that was more than 60 days overdue, as well as debtors who have been subject to forced restructuring or partial forgiveness of a debt.

The following can be excluded from the group impaired portfolio:

- a) Mortgage loans overdue for less than 90 days, unless the debtor has another loan of the same type with large overdue; and, loans for financing higher education under Law 20,027,
- b) that do not yet meet the default conditions set forth in Circular 3,454 of December 10, 2008.

Note 2 - Summary of Significant Accounting Policies, continued

All debtor's loans should be classified in the Impaired portfolio until a normalization of its behavior and management capacity can be observed, regardless of charge-offs requirements indicated in the accounting policy detailed in letter w), charge-offs section title II, Chapter B-2 of the Compendium. In order to remove a debtor from the Impaired portfolio, once the circumstances that made it be classified in this category are overcome according to these standards, all the following requirements must be met:

- 1) None of the debtor obligations with the Bank are overdue for more than 30 days.
- 2) No new re-financing of loans has been granted.
- 3) At least one of the payments received includes principal payment (total or partial).
- 4) If the debtor has a loan with partial payments due within six months, two payments have been made.
- 5) If the debtor has to pay monthly installments for one or more loans, at least four consecutive installments have been paid.
- 6) The debtor shows no direct unpaid debts in the consolidated information provided by the CMF, unless those debts are not material.

(iii) Guarantees

Las Guarantees can be considered for allowances calculation purposes only if they are legally documented and comply with all conditions and requirements to be executable in Bank's favor.

In all cases, for purposes of the standards established by the CMF, the Bank should be able to demonstrate the mitigating effect of the guarantees over the inherent credit risk of the exposures. For allowances calculation purposes, guarantees will be treated according to the following, as applicable:

- a) Collateral and guarantees: Considers contractual agreements to guarantee a specific loan or loans in a way that the coverage over the exposure can be clearly defined and where the rights to collect have been unquestionably transferred over to the guarantor.
- b) Guarantees: In order to apply the deduction method or to determine recovery rates, valuation of property and other guarantees (mortgages or financial instruments guarantees) must reflect the net inflow that will be obtained from the sale of the assets, debts instruments or shares in the event that the borrower falls into default and a secondary source of payment is required. In applying the deduction method, the amount to be recovered by executing the guarantee, corresponds to the present value of the asset sold in its current market condition at disposal, minus all expenses required to keep the asset in its current conditions and to sell them, all in accordance with the Bank policies and terms established by Law for assets disposal.
- c) Security deposit: On this type of guarantees the adjustment of its fair value may be deducted from the exposition, solely when the guarantee can be established with the unique aim to guarantee compliance with the related loans.

Note 2 - Summary of Significant Accounting Policies, continued

- d) **Leased assets.** Estimated losses when establishing allowances based on the assessment method corresponding to each debtor, consider the amount that will be obtained if the leased asset are sold, taking into account any potential impairment for the assets in case of debtor's default and the related recovery and relocation expenses.
- e) **Factoring operations.** Establishing allowances for factoring operations will consider as counterparty the entity ceding rights over the endorsed in favor of the Bank, when the cession is recourse for the latter, and to the debtor when the cession has been made without recourse.

(iv) Additional provisions

The Bank can establish provisions in addition to those calculated by applying the loan portfolio assessment models, according to the set forth in number 9 of Chapter B-1 of the compendium. These provisions can be established with the purpose of addressing the risks arising from macroeconomic fluctuations by anticipating expansive economic cycle downturns which could materialize in the worsening of the economic environment in the future and, in that manner, operate as an anti-cycle mechanism to accumulate additional provisions during positive economic conditions and release or use provisions when negative economic conditions are present.

According to the above, additional provisions shall always correspond to general allowances for commercial, consumer or mortgage loans, or to identify segments of them and in no case can be used to compensate deficiencies in the Bank's models.

As of December 31, 2023, the Bank maintained additional provisions for its commercial, consumer and mortgage loan portfolio amounting to MCh\$169,870 (as of December 31, 2022, the Bank maintained additional provisions of MCh\$175,501).

u) Impaired credits and charge-offs

i) Impaired loans

This portfolio is comprised of the following assets:

- For individually assessed debtors, includes loans classified in the "Impaired portfolio" and those classified under categories B3 and B4 of the "Substandard portfolio", as described above.
- For those debtors collectively assessed, includes all loans classified in the "Impaired portfolio".

ii) Charge-offs

As a general rule, charge-offs should be applied when contractual rights to cash flows expire. In the case of placements, even if this does not occur, the respective asset balances will be written off in accordance with the provisions of the compendium, Chapter B-2, Title II "Impaired and written-off loans".

The write-offs in question refer to the derecognition in the Consolidated Statement of Financial Position of the asset corresponding to the respective operation, including, therefore, that part which might not be due if it were a loan payable in instalments or partial payments, or a leasing operation.

Note 2 - Summary of Significant Accounting Policies, continued

Charge-offs are always recognized against provisions for loan losses, according to Chapter B-1 of the compendium, regardless of the reason.

Charge-off of loans and accounts receivable must take place when the following circumstances exist, whichever happens first:

- 1) The Bank, based on all available information, concludes that no inflow related to the recorded loan will be received.
- 2) When a loan or account receivable with no legal documentation is 90 days overdue since recorded as an asset.
- 3) When the legal term for all legal shares to collect the loan have expired.

When a loan is overdue for a period of time that complies with the term listed below:

Type of loan	Term
Consumer loans with or without collateral	6 months
Consumer leasing	6 months
Other operations of non real estate leasing	12 months
Other transactions without collateral	24 months
Commercial loans with collateral	36 months
Real estate leasing (commercial and home purchase)	36 months
Mortgage loans for home	48 months

The term corresponds to the time passed since the date in which the loan became collectable partially or totally.

iii) Recovery of assets previously charged-off

Payments received from loans previously charged-off are recognized directly as income, as recoveries of loans previously charged-off in "Expense for credit losses" compensating the provision expense.

In the event that recoveries through goods or non-financial assets income will be recognized for the amount in which those assets are recorded, according to Chapter B-5 "Assets received in lieu of payment" of the compendium. Same criteria will be followed for repossessed leased assets granted under finance leases, after being charged-off when incorporated back as assets.

iv) Renegotiation of previously charged-off loans

Any renegotiation of a written-off loan will not give rise to income as long as the transaction continues to be impaired, and the actual payments received must be treated as recoveries of written-off loans.

The renegotiated loan is recorded as an actual asset when losses its characteristic of impaired, recording income as a recovery of a loan previously charged-off. Same criteria is applied when a loan is granted to pay for a loan previously charged-off.

Note 2 - Summary of Significant Accounting Policies, continued

v) Contingent loans

Contingent loans are understood as those transactions or commitments for which the Bank is taking a risk when obligating in third parties benefit as requested by its customer subject to the occurrence or nonoccurrence of a future event to pay a certain amount which will subsequently recovered from its customer.

The Bank maintains recorded in off-balance accounts the following amounts related to commitments or responsibilities in the normal course of business.

- 1) **Guarantees agreement:** Includes collaterals, guarantees and stand by letter of credit as indicated in Chapter 8-10 of the Updated Compilation of Rules (RAN). Additionally, includes payment guarantees for factoring operations as indicated in Chapter 838 of the RAN.
- 2) **Confirmed foreign letters of credit:** Corresponds to letters of credit confirmed by the Bank.
- 3) **Letters of credit issued:** Includes documentary letters of credit issued by the Bank not yet negotiated.
- 4) **Documented guarantees:** Corresponds to documented guarantees granted with promissory notes as indicated in Chapter 8-11 of the RAN.
- 5) **Available lines of credit:** Considers the not used amounts of lines of credit which allow clients to use loans without additional approval from the Bank (i.e. for the usage of credit cards or checking account overdrafts).
- 6) **Other loans commitments:** Includes amounts for loan commitments not disbursed which should be granted in a future agreed date or disbursed when agreed terms are met, such as credit lines linked to stage of completion of projects or student loans (Law 20,027).
- 7) **Other contingent loans:** Includes any other type of commitment of the Bank that could exist and could give rise to an effective loan when certain future events take place. In general, includes unusual transactions such as delivery of instruments as collateral to guarantee payment for loan transactions between third parties or derivative contracts transactions entered into on behalf of third parties that could imply a payment obligation not covered by a deposit.

Note 2 - Summary of Significant Accounting Policies, continued

The amount of these contingent loans are considered at the end of each reporting period to calculate allowances for loan losses required by Chapter B-1 "Provisions for loan losses" of the compendium, and the amounts must be calculated according to the exposition factor, according to the following table:

Type of contingent exposure	FCC (1)
1) Freely disposable lines of credit with immediate cancellation	10%
2) Contingent credits linked to the CAE	15%
3) Letters of credit for goods movement transactions	20%
4) Other freely disposable lines of credit	40%
5) Commitments to purchase foreign debt in local currency	50%
6) Transactions related to contingent events	50%
7) Guarantees and sureties	100%
8) Other credit commitments	100%
9) Other contingent credits	100%

(1) Credit conversion factor

However, when evaluating contingent loans for clients with non-compliant loans the amount to be considered to calculate provisions for loan losses shall be 100% of the contingent loan as indicated in Chapter B-1 as previously indicated.

v) Provisions for contingent loans

The Bank maintains in off-balance accounts amounts related to commitments or responsibilities due to its normal activities: Guarantees, letters of credit, documented guarantees, available lines of credit, other loans commitments, and other contingent loans.

The amount of contingent loans is considered at the end of each reporting period in order to calculate provisions for loans losses according to Chapter B-1 of the Compendium of Accounting Standards, using the methodology set forth in letter b) "Guarantees".

w) Income taxes and deferred taxes

The Bank has recognized an expense (income) arising from gains or losses for each period, according to the applicable taxation rules for each country or jurisdiction it operates.

The income tax expense for the year includes the sum of current tax, which results from applying the current rates to the taxable profit for the year (after deducting the tax credits allowed), and the change in deferred tax assets and liabilities recognized in the Consolidated Statement of Income. The Bank records, when appropriate, deferred tax assets and liabilities for the estimated future tax effects attributable to differences between the carrying amount of assets and liabilities and their tax basis. The measurement of deferred tax assets and liabilities is based on the tax rate, in accordance with the applicable tax laws, using the tax rate that applies to the period when the deferred asset and liability will be settled. The effects of deferred taxes on temporary differences between the balance sheet and the income statement are recognized in deferred taxes as of the date on which the law approves such changes. The effects of deferred taxes on temporary differences between the tax balance sheet and the financial balance sheet are recorded on an accrual basis, in accordance with IAS 12 "Income Taxes" and presented in accordance with the same IAS.

Note 2 - Summary of Significant Accounting Policies, continued

x) Provisions and contingent liabilities

A provision is a liability of uncertain timing or amount. Provisions are recorded in the Consolidated Statement of Financial Position when the Bank:

- Has a present obligation (legal or constructive) as a result of past events,
- It is probable that an outflow of resources will be required to settle these obligations, and
- The amount of these resources can be reliably measured.

A contingent liability is any possible obligation arising from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events that are not wholly within the control of the Bank.

Guarantees agreement, confirmed foreign letters of credit, letters of credit, letters of guarantee, unused lines of credit, other credit commitments, other contingent credits (see letter v) are classified as contingent in supplementary information.

Provisions (quantified using the best available information on the consequences of the event giving rise to them and are reviewed and adjusted at the end of each year) are used to satisfy specific obligations for which they were originally recognized. Partial or total reversals are recognized when such liabilities cease to exist or are reduced.

Provisions are classified according to the obligations covered, being for the purpose of these Consolidated Financial Statements, those detailed in note 24 "Provisions for contingencies", note 25 "Provisions for dividends, interest payments and repricing of regulatory capital financial instruments issued" and note 26 "Special provisions for credit risk".

y) Employee benefits

i) Employee benefits

Correspond to personnel benefits (other than termination benefits) that are expected to be settled within twelve months after year end over which the employees have rendered their services.

These are recognized when the employee has rendered the service and are measured at the undiscounted amount of benefits expected to be paid in exchange for that service:

- As a liability (accrued expense), after deducting any obligation already satisfied. If the amount already paid is higher than the gross amount of the benefits, the Bank will recognize this excess as an asset (amount paid in advance), when it represents a reduction of future payments or a recoverable amount in cash.
- As an expense when the entity consumes the economic benefit arising from the service provided by an employee in exchange for employee benefits, unless other IFRS requires or allows the recognition of those disbursements as part of the cost of an asset.

Note 2 - Summary of Significant Accounting Policies, continued

ii) Personnel vacations

The annual cost of personnel vacations and benefits are recognized on an accrual basis.

iii) Post-employment benefits

Correspond to employee benefits (other than termination benefits and short-term employee benefits) that are expected to be settled after the completion of employment. Post-employment benefits plans are agreements, formal and informal, in which the Bank is committed to provide benefits to one or more employees after completion of their employment. Plans providing these benefits are classified as either defined contribution plans or defined benefit plans, depending on the economic substance of the plan as derived from its principal terms and conditions.

Defined contribution plans, the obligation is recognized for the amounts to be contributed in the period.

Defined benefit plans, a liability is recognized based on the estimated benefit cost that employees have accrued for services rendered, less the present value of the defined benefit obligation and present value of present services. Present service cost and gain or loss upon settlement will be recognized in the income statement for the year. Gains and losses generated from the remeasurement of the liability will be recognized in other comprehensive income.

iv) Other long-term benefits

Other long-term employee benefits are employee benefits, other than short-term, post-employment and termination benefits, which are not due for payment within 12 months after the end of the period in which the employees render the service.

The regulations require the recognition of a liability for the present value of the defined benefit obligation less the fair value of the plan assets, if any. The results generated from its remediation will be recognized in the results of the period.

v) Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment, as a consequence of:

- A decision of the entity to terminate the employee's employment before the normal termination date; or
- The decision of an employee to accept an offer with benefits in order to terminate the employment before the normal termination date.

An entity recognizes a liability and expense for termination benefits at the earlier of the following dates:

- When the entity can no longer withdraw the offer of those benefits; and
- When the entity recognizes costs for a restructuring that is within the scope of IAS 37 "Provisions, contingent liabilities and contingent assets" and involves the payment of termination benefits.

Note 2 - Summary of Significant Accounting Policies, continued

vi) Cash-settled share-based payment transactions.

The Bank recognizes a liability for cash-settled share-based payment transactions at fair value at the inception of each contract. Until the liability is settled, the Bank will remeasure the fair value of the liability at the end of each reporting period and at the settlement date, and will recognize any fair value variation in profit or loss for the period.

z) Provision for mandatory dividends

A liability recognized due to the legal obligation to distribute 30% of the profit of the year in compliance with Public Company Law (30%) or in accordance with the provisions of the company bylaws. For the years ended December 31, 2023 and 2022, the Bank provisioned 30% of its net income. This provision is recorded as a decrease in "Retained earnings" under "Provision for dividends, interest payments and repricing of issued regulatory capital financial instruments" in the Consolidated Statement of Changes in Shareholders' Equity.

In the Bank's bylaws, title VII, it is established that the Bank should distribute annually as a dividend to its shareholders, as a proposal of the Board of Directors and based on the number of shares, at least thirty percent (30%) of the net income of the year. Furthermore, no dividends distribution will take place if there are equity losses (negative reserves) until these losses are recovered or if a dividend distribution will cause a non-compliance of the capital requirements established by the General Bank Law.

aa) Assets received or awarded in lieu of payment

Assets received or awarded in lieu of payment of loans and accounts receivable from clients are recognized at their fair value (as determined by an independent appraisal). A price is agreed upon by the parties through negotiation or, when the parties do not reach an agreement, at the amount at which the Bank is awarded those assets at a judicial auction. In both cases, an independent appraisal is performed.

These assets are subsequently adjusted to their net realizable value less cost to sale, and the difference between the carrying value of the asset and the estimated fair value less costs to sell is charged to income, under "Other operating expenses".

Assets received or foreclosed in payment are valued at the lower of initial value and net realizable value, i.e. fair value (independent appraisal) less costs to hold and dispose of, plus regulatory write-offs. Regulatory write-offs are required by the regulator if the asset is not sold within one year of receipt.

Such net realizable value of an assets is determined mainly in conformity with the current market conditions, and should correspond to its fair value less the necessary costs to maintain and dispose it.

Note 2 - Summary of Significant Accounting Policies, continued

In general, it is estimated that these assets will be disposed of within one year from the date of award. However, the regulator, by means of general rules, may establish that, in justified cases, the Bank may have an additional term of up to eighteen months for the disposal of the assets. In order to be eligible for the extension, the value of the asset must have been written off for accounting purposes, in compliance with Article 84 of the General Banking Law.

bb) Customer loyalty programs

The Bank maintains a loyalty program to provide incentives to its customers, allowing them to purchase goods or services with certain benefits which are granted through credit cards issued by the Bank when they purchase according to the conditions established for each loyalty program.

The Bank has an adequate level of provisions in order to comply with its current obligations and to properly reflect the associated expense when providing the benefits.

cc) Non-current assets held for sale

Non-current assets (or a group holding assets and liabilities for disposal) expected to be recovered mainly through the sale of these items rather than through the continued use, are classified as held for sale. Immediately prior to this classification, assets (or elements of a disposable group) are re-measured in accordance with the Bank's policies. The assets (or disposal group) are measured at the lower of carrying amount and fair value less cost to sell.

Impairment losses in initial classification of non-current assets held for sale and with subsequent gains and losses are recorded in income. Gains are not recorded over previously recorded losses.

dd) Earnings per share

Basic earnings per share are determined by dividing the net income attributable to the equity holders of the Bank for the reported period by the weighted average number of shares outstanding during the reported period.

Diluted earnings per share are determined in the same way as basic earnings, but the weighted average number of outstanding shares is adjusted to take into consideration the potential diluting effect of stock options, warrants, and convertible debt.

As of December 31, 2023 and 2022 the Bank did not have any instruments that generated dilution.

Note 2 - Summary of Significant Accounting Policies, continued

ee) Consolidated Statement of Cash Flows

The Bank presents cash flows from operating activities, investing activities, and financing activities in a manner that best represent the nature of its activities. The classification of cash flows into the aforementioned categories provides information that allows users to evaluate the impact of the transactions in the financial position of the Bank, as well as over the ending balance of cash and cash equivalents. This information can be also useful when evaluating the relation between those activities (IAS7) .

For the preparation of the Statement of Cash Flows, the Bank used the indirect method, in which from the consolidated income for the year before income tax, non-cash transactions are subsequently added/subtracted, as well as income and expenses associated with cash flows classified as investing or financing activities.

For the preparation of the Statement of Cash Flow, the following items are considered:

- **Cash flows:** Inflows and outflows of cash and cash equivalents, such as deposits with the Central Bank of Chile, deposits in domestic banks, and deposits in foreign banks.
- **Operating activities:** Principal revenue-producing activities performed by banks and other activities that cannot be classified as investing or financing activities. This section includes, among others, loans obtained from abroad, dividends received from investments, financial instruments at fair value through other comprehensive income and amortized cost, etc.
- **Investing activities:** Correspond to the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- **Financing activities:** Activities that result in changes in the size and composition of the equity and liabilities that are not part of operating activities nor investing activities.

For the purposes of the Statement of Cash Flows, cash and cash equivalents have been considered as cash and cash equivalents, the balances of "Cash and bank deposits" plus the net balance of operations in liquidation in progress, plus financial instruments for trading at fair value through profit or loss and financial instruments at fair value through other comprehensive income with high liquidity and with insignificant risk of change in value, whose maturity does not exceed three months from the date of acquisition and the rights under resale agreements and securities lending that are in that situation.

Includes also investments in fixed income mutual funds which are presented under trading investments in the Consolidated Statement of Financial Position. Cash and cash equivalents balances and their reconciliation to the Consolidated Statement of Cash Flows are detailed in Note 7 "Cash and Cash Equivalents".

The provision for loan losses included under the operating activities section differs from the amount presented in the Consolidated Statement of Income, because for cash flows purposes such amount excludes recoveries of transactions previously charged-off.

Note 2 - Summary of Significant Accounting Policies, continued

ff) Consolidated Statement of Changes in Equity

The Consolidated Statement of Changes in Equity presents all movements affecting net equity, including those originated by accounting changes or errors recognition. This statement shows a conciliation between opening and ending balances for the year for all items that form part of consolidated equity, grouping transactions based on their nature, according to the following:

- Adjustments for changes in accounting criteria and correction of errors: which include changes in consolidated net equity arising as a result of the retrospective restatement of balances in the Consolidated Financial Statements due to changes in accounting criteria or correction of errors.
- Net comprehensive income: Includes in an aggregated manner net income recorded in the Statement of Other Comprehensive Income, as previously indicated.
- Other changes in equity: Includes retained earnings distributions, equity increases, provision for mandatory dividends, dividends paid, among other increases or decreases in consolidated equity.

This information is presented in two statements: The Consolidated Statement of Other Comprehensive Income and the Consolidated Statement of Changes in Equity.

gg) Consolidated Statement of Other Comprehensive Income

In the Consolidated Statement of Other Comprehensive Income are presented income and expenses generated by the Bank as a consequence of its regular activities during the year, clearly identifying those recorded in profit and loss from those recorded in net equity.

Due to this, in this statement the following is shown:

- The consolidated income.
- Net amount of income and expenses recorded in equity as "Valuation accounts".
- Deferred income taxes originated by transactions described above, except for those amounts related to exchange differences from foreign net investments.

Total amount of consolidated income and expenses recorded, calculated as the sum of the items listed above, presenting in those attributable equity holders of the Bank from non-controlling interest.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted

New accounting pronouncements introduced by CMF

1. Standards and interpretations issued in the current year

Circular No. 2,317 - Updates instructions of Chapter 18-5 of the RAN, regarding information on debtors of financial institutions.

On July 29, 2022, in line with the process of improving the current register of debtors under the regulatory adjustment of Chapter 18-5 of the RAN, the CMF established a concrete framework that ensures the correct treatment and use of the data from the debtors list, under higher protection standards. This is achieved by requiring an Internal Policy on the Security and Management of Debtor Information ("PISMID" by its acronym in Spanish), so that the internal governance of the institutions receiving the list is particularly rigorous in terms of controls on the confidentiality of the information, ensuring compliance with the restrictions on use and access, and compatibility with international best practices.

In connection with the above, the following amendments are made to Chapter 18-5 of the RAN for Banks:

- Create Internal Policy on the Security and Management of Debtor Information ("PISMID" by its acronym in Spanish).
- Appointment of an individual in charge of granting access to the different information views.
- The register with access permits must be updated at least annually.
- The right of access must be included; the right of rectification or modification in case the owner proves that the personal data is erroneous, inaccurate or outdated; and the right of cancellation, if applicable (it may be demanded in person or by digital means).
- There must be systems that allow for the full registration and follow-up of claims; the preservation of files shall be governed by the provisions of RAN 1-10².
- The policy must have the protection mechanisms contemplated in RAN 20-10³.
- It must be approved by the Board of Directors (it must be updated, approved and audited, both internally and externally, at least once per calendar year).

This circular will be effective as of July 1, 2023. Management is in the process of implementing the standard and believes this standard will have no impact on the presentation of the Consolidated Financial Statements.

General Standard No. 484 - Commissions on credit operations, Law No. 18.010 and adjustment of current contracts.

On August 5, 2022, the CMF has deemed it appropriate to establish the criteria and conditions to be met by the fees charged to the debtor of a credit operation in respect of money credit operations under Law 18.010.

It will be effective as of August 01, 2023. The Bank's management is in the process of implementing the aforementioned Circular and anticipates that its adoption will not have a significant impact on the Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Circular No. 2,318 - Incorporates new files R13 and R14 to the Risk System of the Banks Information System Manual involving the measurement and supervision of risks related to the Banking Book Market Risk ("RMLB" for its acronym in Spanish) and the Credit Concentration Risk ("RCC" for its acronym in Spanish)

On August 12, 2022, the CMF, in order to obtain the information required for the application of Chapter 21-13 of the RAN for Banks, created files R13 "Banking Book Market Risk" and R14 "Credit Concentration Risk". As a result of the aforementioned amendments, effective July 13, 2023, the file C40 "Cash flows associated with interest rate and indexation risks in the banking book" of the Banks Information System Manual will no longer be reported. The latest information will be the one submitted as of September 30 of that year.

It will be effective as of July 13, 2023. The Bank's Management will evaluate the impact that this standard will have on the presentation of Consolidated Financial Statements.

Circular No. 2,331 "Information on loans guaranteed by the FOGAPE Chile Apoya program"

On February 7, 2023, the CMF determined to incorporate into its information systems the information necessary to evaluate the operation of the FOGAPE Chile Apoya program developed under Law No. 21.514.

Modifications were made to file C50 and new files were created, D61 and E25, which deal with the daily interest rates of guaranteed operations and the detail of financing requests under the FOGAPE Chile Apoya program, respectively.

The Bank has implemented the aforementioned Circular and has concluded that its adoption has no significant impact on the Consolidated Financial Statements.

Circular No. 2,336 "Repeals Chapter 12-21 of the Updated Compilation of Standards for Banks, amends Chapters 21-13 and 1-13 of the same Compilation, the Frequently Asked Questions document associated with file R13 and delays the end of the requirement for file C40"

On June 20, 2023, in order to avoid duplication with respect to the regulations governing the measurement of market risks in the banking book, in particular, interest rate and fluctuation risks, the CMF repealed chapter 12-21 of the Updated Compilation of Standards for Banks (RAN), and also determined to continue reporting file C40 "Cash flows associated with interest rate and fluctuation risks in the banking book" until December 2023.

The Bank has implemented the aforementioned Circular and has concluded that its adoption has no significant impact on the Consolidated Financial Statements.

Circular No. 2,337 - Information on loans covered by the Special Guarantee Fund

On July 07, 2023, the CMF decided to update the information requirements for supervised institutions that grant financing under the Special Guarantee Fund (FOGAES, for its Spanish acronym).

The institutions shall prepare the following regular information files:

- File C70 on accounting information on operations associated with FOGAES programs.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

- New file D62 on daily interest rates of operations guaranteed by the FOGAES.
- New file E26 on the details of financing requests under FOGAES programs.

The Bank has implemented the aforementioned Circular and has concluded that its adoption has no significant impact on the Consolidated Financial Statements.

2. Standards and Interpretation issued but not yet effective

General Regulation No. 500 - Issues instructions and regulatory file for compliance with the provisions of article 28 of Law No. 14.908 on family abandonment and payment of alimony

On December 12, 2023, the CMF issued new regulations which establish instructions and a regulatory file to comply with the provisions of article 28 of Law No. 14,908 on family abandonment and payment of child support. This standard applies to Banks, banking support companies, supervised savings and credit cooperatives, insurance companies and managing agents of endorsable mortgage mutual funds, as well as other providers of financial products and services supervised by the CMF.

The obligation to consult the National Registry of Child Support Debtors (RNDPA, for its Spanish acronym) is established when carrying out money credit operations of 50 UF or more. In case of current registration in the RNDPA, 50% of the credit or a lower amount sufficient to cover the entire child support debt must be withheld. The entity must pay this sum to the custodial parent as soon as the withholding is made.

Entities must send detailed information on all money credit operations carried out with legal persons for amounts equal to or greater than 50 UF. The report will be made within the first 7 business days of the month following the reported period. The instructions issued by the CMF and the T01 regulatory file, which is incorporated into the Bank Information System Manual, are used to send the information through the module provided on the CMF's website.

The regulations come into force as of June 1, 2024, and the first report of the T01 file must be made within 10 business days of that month.

The Bank's Management is in the process of implementing the aforementioned Circular and anticipates that its adoption will not have significant impacts on the Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

New accounting pronouncements introduced by IASB

1. Standards and Interpretations that have been issued in the current year

Amendments to IAS 1 Presentation of Financial Statements and IFRS Practice Statement 2 - Making Materiality Judgments

On February 12, 2021, the IASB published this amendment, which is intended to help preparers in deciding which accounting policies to disclose in their financial statements. The amendments include:

- An entity is now required to disclose its material accounting policy information instead of its significant accounting policies;
- Several paragraphs are added to explain how an entity can identify material accounting policy information and to give examples of when accounting policy information is likely to be material;
- The amendments clarify that accounting policy information may be material because of its nature, even if the related amounts are immaterial; the amendments clarify that accounting policy information is material if users of an entity's financial statements would need it to understand other material information in the financial statements; and
- The amendments clarify that if an entity discloses immaterial accounting policy information, such information shall not obscure material accounting policy information.

In addition, IFRS Practice Statement 2 has been amended by adding guidance and examples to explain and demonstrate the application of the 'four-step materiality process' to accounting policy information in order to support the amendments to IAS 1.

The amendments are applied prospectively. The amendments to IAS 1 are effective for annual periods beginning on or after 1 January 2023. Earlier application is permitted. Once the entity applies the amendments to IAS 1, it is also permitted to apply the amendments to IFRS Practice Statement 2.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

Amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors

On February 12, 2021, the IASB published amendments to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates. That distinction is important because changes in accounting estimates apply prospectively only to future transactions and other future events, but changes in accounting policies generally also apply retrospectively to past transactions and other past events.

The amendments to IAS 8 will be effective for annual reporting periods beginning on or after January 1, 2023, with early application permitted.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendment to IAS 12 - Deferred tax related to assets and liabilities arising from a single transaction

On May 7, 2021, an amendment was issued on the treatment of deferred taxes on transactions such as leases and decommissioning obligations. In these situations, entities must recognize deferred assets and liabilities in the event that there are deductible and taxable temporary differences for the same amount. The amendments are effective for years beginning on January 1, 2023, with early application permitted.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

Amendments to IAS 12, Income Taxes

As of May 23, 2023, the IASB has published the "International tax reform: Pillar two model rules - Amendments to IAS 12" as a response to the worries about possible implications on the imminent implementation of the pillar two model rules of the OECD about income tax accounting.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

2. Standards and Interpretation issued but not yet effective

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (amendments to IFRS 10 and IAS 28)

The amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Companies and Joint Ventures (2011) address a recognized inconsistency between the requirements of IFRS 10 and those of IAS 28 (2011) in the treatment of the sale or contribution of assets between an investor and its associate or joint venture. The amendments, issued in September 2014, state that when the transaction involves a business (whether it is in a subsidiary or not) the entire generated gain or loss is recognized. A partial gain or loss is recognized when the transaction involves assets that do not constitute a business, even when the assets are in a subsidiary.

The effective date for these amendments is yet to be determined because the IASB is awaiting the results of its research project on the equity method accounting. These amendments must be applied retrospectively and early adoption is permitted, which must be disclosed.

The Bank's management will await the new effective date to evaluate the potential effects of these amendments.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendments to IFRS 16 - Lease liability on a sale and leaseback

On September 22, 2022, the IASB issued this amendment which clarifies how a selling lessee subsequently measures sale and leaseback transactions that meet the requirements of IFRS 15 to be accounted for as a sale.

The new requirements do not prevent a seller-lessee from recognizing in profit or loss any gain or loss related to the partial or total termination of a lease.

The effective date for the amendments is January 01, 2024.

The Bank's Management considers that the adoption of this amendment will have no significant impacts on the Consolidated Financial Statements.

Amendment to IAS 1 Presentation of Financial Statements - Non-current Liabilities with Covenants

On October 31, 2022, Amendments to IAS 1 was issued, which aims to improve the information companies provide about long-term debt with covenants. Such amendment specifies that covenants to be complied with after the reporting date do not affect the classification of debt as current or non-current at the reporting date. Instead, the amendments require a company to disclose information about these covenants in the notes to the financial statements.

The IASB expects the amendments to improve the information a company provides about long-term debt with covenants by enabling investors to understand the risk that such debt could become repayable early.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's management is assessing the potential impact of the adoption of this amendment on its Consolidated Financial Statements.

Modifications to the IAS 7 - Cash flow statement and IFRS 7 - Financial instruments: Disclosure

As of May 25, 2023, the IASB has published "Disclosure of supplier finance agreements - Modifications to the IAS 7 and the IFRS 7" in order to improve the transparency of supplier finance agreements and their effects on liabilities, cash flows, and liquidity risk exposure of a company. Among the changes, the company is asked to disclose:

- The terms and conditions;
- the amount of liabilities that are part of the agreements, breaking down the amounts that the providers have already received as payment from the financial providers, and indicating where these liabilities are placed in the general balance;
- maturity date range of the payment; and
- information about the liquidity risk.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted

The Management of the Bank is assessing the potential impact of the adoption of these modifications in their Consolidated Financial Statements.

IFRS S1 - General Requirements for Disclosure of Sustainability-related Financial Information Exposure

As of June 26, 2023, the IASB has issued the "IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information Exposure" which demands an entity to reveal qualitative information that is useful for the users, regarding risks and opportunities related to sustainability.

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's Management has concluded that the issuance of this standard does not have significant impacts because, until the date of issuance of these Consolidated Financial Statements, the local regulator, the Financial Market Commission (CMF) has not issued a statement regarding the incorporation of IFRS S1 in any report. Disclosures related to sustainability are addressed in our Annual Integrated Report, where we account for environmental, social and governance issues, as well as climate risk management in line with the provisions of General Standard No. 461 issued by the regulator in November 2021 and which comes into effect for Banks in March 2025.

IFRS S2 - Climate-related Disclosures

As of June 26, 2023, the IASB has issued the "IFRS S2 Climate-related Disclosures" which demands an entity to reveal information that is useful to the users, regarding risks and opportunities related to climate, with the objective of allowing them to understand the processes, controls and procedures of governance employed by the entity to monitor, manage and supervise the risks and opportunities related to the climate.

Are effective for annual reporting periods beginning on or after January 1, 2024, with early adoption permitted.

The Bank's Management has concluded that the issuance of this standard does not have significant impacts because, until the date of issuance of these Consolidated Financial Statements, the local regulator, the Financial Market Commission (CMF) has not issued a statement regarding the incorporation of IFRS S2 in any report. Disclosures related to sustainability are addressed in our Annual Integrated Report, where we account for environmental, social and governance issues, as well as climate risk management in line with the provisions of General Standard No. 461 issued by the regulator in November 2021 and which comes into effect for Banks in March 2025.

Note 3 - New Accounting Pronouncements Issued and Adopted, or Issued but not yet Adopted, continued

Amendment to IAS 21 - Effects of Changes in Foreign Currency Exchange Rates

On August 15, 2023, the IASB has issued "Amendments to IAS 21 Effects of Changes in Foreign Currency Exchange Rates" which will require companies to provide more useful information in their financial statements when a currency cannot be exchanged for another currency.

The main modifications are as follows:

- Specify when a currency is exchangeable for another currency and when it is not.
- Specify how an entity establishes the exchange rate to be applied when a currency is not exchangeable.
- Require additional disclosures when a currency is not exchangeable.

The effective date is effective for annual reporting periods beginning on or after January 1, 2025, early adoption is permitted.

The Management of the Bank is evaluating the potential impact of the adoption of these amendments on its Consolidated Financial Statements.

Note 4 - Accounting Changes

There are no new standards to be adopted in the Consolidated Financial Statements.

Note 5 - Significant Events

During the year ended as of December 31, 2023, the following significant events have influenced the operations of the Bank and its subsidiaries or these Consolidated Financial Statements:

BANCO ITAÚ CHILE

Notice of Ordinary Shareholders' Meeting 2023

Through essential event dated February 22, 2023, the Board of Directors agreed to call an Ordinary Shareholders' Meeting for April 20, 2023, which will be held remotely.

Itaú Unibanco Entention to launch a voluntry tender offer for Itaú CorpBanca's shares

Through essential event dated March 2, 2023, the CMF was informed that Itaú CorpBanca learned of the intention of its controlling shareholder, Itaú Unibanco Holding S.A. ("Itaú Unibanco") -owner of approximately 65.62% of the issued, subscribed and fully paid shares of the Bank- to conduct, directly or indirectly through its related companies, a takeover bid to acquire up to all of the shares of the Bank not owned by Itaú Unibanco (the "Takeover Bid"), representing approximately 34.38% of the issued, subscribed and paid shares of the Bank as of this date, including those represented by American Depositary Shares ("ADSs"), each representing 1,500 shares; the number of shares subject to the Takeover Bid could be affected as a result of the reverse stock split agreed at the Bank's Extraordinary Shareholders' Meeting held on January 19, 2023 and currently under analysis by the Financial Market Commission ("CMF").

In fact, by virtue of a relevant event (fato relevante) dated March 2 of this year, disclosed by Itaú Unibanco exclusively for information purposes and without constituting a takeover bid, Itaú Unibanco informed that, at a meeting of its board of directors held on the same date, it approved the hiring of advisors to begin work related to the takeover bid.

As reported by Itaú Unibanco: (a) The takeover bid has not yet commenced and is expected to be completed during the first half of 2023; (b) The acquisition of the Bank's shares subject to the takeover bid will be subject to the fulfillment of customary conditions for this type of transaction, including the authorization of the Central Bank of Brazil (BACEN) and the CMF; and (c) The acquisition price to be offered in the takeover bid will be Ch\$2 (two Chilean pesos, legal currency in Chile) per share, which represents, as of this date, a premium of approximately 10% over the weighted average price of the Bank's shares traded at the Santiago Stock Exchange during the last 60 trading days. The aforementioned price will be adjusted to reflect any distribution agreement and/or the payment of dividends by Itaú CorpBanca. In addition, the price per share may be adjusted to reflect the reverse stock split referred to above.

Note 5 - Significant Events, continued

Approval by the CMF of the Amendment of Bylaws and Election of the Board of Directors at the Next Ordinary Shareholders' Meeting

On March 28, 2023, the Financial Market Commission approved through Resolution No. 2.215, dated March 28, 2023, the amendment of the bylaws agreed at the Bank's Extraordinary Shareholders' Meeting held on January 19, 2023, whereby, among other matters, the following was agreed: (i) decrease the number of regular directors from eleven to seven and the number of alternate directors from two to one, and (ii) decrease the number of shares into which the Bank's capital is divided from 973,517,871,202 to 216,347,305, without modifying the amount of the Bank's subscribed and paid-in capital (the "reverse stock split").

Considering the aforementioned approval of the reduction in the number of Bank's directors, and as informed through Essential Event dated February 22, 2022 on the occasion of the call to the Bank's Ordinary Shareholders' Meeting (the "Meeting") for April 20, 2023, at 10:00 a.m., it is hereby informed that the Meeting will address the matters related to the knowledge of the Ordinary Shareholders' Meeting, including the matter corresponding to the election of the Bank's Board of Directors.

Proposed Dividend Distribution

On March 28, the Financial Market Commission was informed by means of and "Material event notice" that at the Ordinary Board of Directors' Meeting held on March 28, the Board of Directors of Itaú CorpBanca (the "Bank") confirmed its agreement to propose to the Ordinary Shareholders' Meeting, to be held on April 20, 2023, the distribution of 30% of the profits for 2022, which corresponds to Ch\$130,123,237,338, as a dividend to the shareholders, among the total 973,517,871,202 validly issued shares of the Bank and that, therefore, if approved as indicated, a dividend of \$0.1336629158920 per share would be distributed.

In addition, this essential event indicates that it will be proposed to the Shareholders' Meeting that the remaining 70% of the profits be retained. Approved dividends will be available to shareholders from April 25, 2023. Therefore, shareholders who are registered in the Shareholders' Register at midnight on April 19, 2023, i.e., those who are registered in the Shareholders' Register 5 business days prior to the payment date, will be entitled to receive dividends.

Change of the Bank's Business Name

On April 10, 2023, the Bank published "Material event notice" where by Resolution No. 2.215, issued on March 28, 2023 by the Financial Market Commission that approved the amendment of the bylaws of Itaú CorpBanca, agreed at the extraordinary shareholders' meeting held on January 19, 2023, whereby, among other matters, it was agreed to change the business name of the Bank to "Banco Itaú Chile", and in turn modify and/or expand its fantasy names to "Itaú", "Itaú Chile" and "Banco Itaú". The certificate evidencing this resolution was registered with the Trade Registry of Santiago on April 3, 2023 and published in the Official Gazette on April 6, 2023. Accordingly, the process of modifying the Bank's bylaws with respect to its change of business name has been completed, taking effect as of the date of the aforementioned resolution, i.e., March 28, 2023.

Note 5 - Significant Events, continued

Agreements of the Ordinary Shareholders' Meeting 2023

At the Bank's Ordinary Shareholders' Meeting held on April 20, 2023, among others, the following resolutions were adopted:

1. The Board of Directors was completely renewed and the following seven (7) Regular Directors and one (1) Alternate Director were elected, in accordance with Banco Itaú Chile's bylaws:

Board Members:

- Diego Fresco Gutiérrez
- Matias Granata
- Milton Maluhy Filho
- Pedro Paulo Giubbina Lorenzini
- Pedro Samhan Escándar
- Ricardo Villela Marino
- Luis Octavio Bofill Genzsich

Alternate Board Member:

- Rogerio Carvalho Braga

It is hereby noted that the directors Mr. Pedro Samhan Escándar and Mr. Luis Octavio Bofill Genzsich were appointed as independent directors, as provided in of Article 50 bis of Law No. 18.046.

2. To distribute a dividend equivalent to 30% of the distributable net income for the fiscal year 2022, which represents an aggregate amount of Ch\$130,123,237,338, payable to the holders of the 973,517,871,202 validly issued shares of the Bank, who are entitled to receive dividends of Ch\$0.1336629158920 per share. In addition, it was approved t that the remaining 70% of the profits to be retained.

Dividends were made available to shareholders from April 25, 2023. Therefore, shareholders they were registered in the Shareholders' Register at midnight on April 19, 2023, i.e., those who are registered in the Shareholders' Register 5 business days prior to the payment date, will be entitled to receive dividends.

Compensation per share applicable to the Reverse Stock Split

On May 25, 2023 as announced by the Bank through a notice published on May 5 in the electronic newspaper www.latercera.com --by which it was informed in detail about the exchange process of the new Bank's shares among its shareholders with respect to the Reverse Stock Split, which will begin next May 26--, it is communicated that the amount that will be paid in cash by the Bank to the shareholders who at midnight on May 25, 2023 are holders of a total amount of shares higher than 4,500 and other than an multiple of 4,500, as compensation for each of those old shares that, because they represent a fraction of the new shares, do not qualify for the exchange, amounts to \$1.862 per share, value that corresponds to the closing price of the market transactions of the shares on the Bolsa de Comercio de Santiago on the day prior to the date of the exchange of shares (that is, as of today).

Note 5 - Significant Events, continued

Completion of the Reverse Stock Split

On May 26, 2023, it was informed by means of an essential event that on that date the new shares of the Bank were exchanged among its shareholders as a result of the Reverse Stock Split. This resulted in a total of 216,340,749 new shares being assigned and distributed among the shareholders due to the application of the exchange ratio approved at the Bank's Extraordinary Shareholders' Meeting held on January 19, 2023. It was also reported that on the same date, Chile's stock exchanges included in their records the date of the exchange of the new shares, from which date they could be traded in the local stock market. As a result, it was reported that (i) as of that date, the amendments to the Bank's bylaws agreed at the Shareholders' Meeting regarding the decrease in the number of shares into which the Bank's capital is divided had become fully effective, (ii) as of that date the Bank's capital (amounting to Ch\$2,692,826,231,184) had been divided into 216,340,749 outstanding shares, fully subscribed and paid, and (iii) as of that date the shares of Banco Itaú Chile (ITAUCL) were traded as new shares, and (iv) from the back-up package of 10,000 shares that was not considered in the numerical calculation of the Exchange Ratio, 3,444 shares were allocated, leaving a remainder of 6,556 back-up shares after completing the exchange. In accordance with the resolution adopted at the Bank's Extraordinary Shareholders' Meeting held on January 19, 2023, the aforementioned 6,556 remaining shares will be formally cancelled at an Extraordinary Shareholders' Meeting to be called by the Board of Directors immediately after the next Ordinary Shareholders' Meeting to be held during the first four months of 2024.

Itaú Unibanco proposed voluntary tender offer

By means of an essential event dated May 29, 2023, the CMF was informed that Banco Itaú Chile learned that Itaú Unibanco made an announcement to the Brazilian market (the "Announcement to the Market") informing that in line with its relevant event (fato relevante) of March 2, 2023, on May 26, 2023, Itaú Unibanco received the final regulatory clearance necessary to increase its ownership interest in Banco Itaú Chile and, therefore, would move forward with its proposed voluntary offer to acquire, by its own or its related parties, up to all of the issued shares of Banco Itaú Chile (the "Shares"), including those in the form of ADSs. As announced by Itaú Unibanco in its Announcement to the Market, the tender offer would commence on June 6, 2023, simultaneously (i) in Chile, with respect to all shareholders of Banco Itaú Chile and (ii) in the United States of America ("U.S."), with respect to all holders of ADSs and U.S. shareholders. Under applicable Chilean law, Itaú Unibanco intends to publicly announce the tender offer in two newspapers with national circulation on June 5, 2023, one day prior to the commencement of the tender offer, from which date it will be open for applications. According to the Announcement to the Market, the price per Share for purposes of the tender offer would be Ch\$8,500 (eight thousand five hundred Chilean pesos), which, in relation to the amount mentioned in the relevant event (fato relevante) of Itaú Unibanco on March 2, 2023, essentially reflects the adjustment due to (i) the payment of dividends performed by Itaú Chile on April 25, 2023, as approved at the ordinary shareholders' meeting on April 20, 2023 and reported to the market on that date and (ii) the reverse stock split (share exchange), which became effective on May 26, 2023, with a ratio of 4,500:1, and as a result, each lot of 4,500 shares was grouped into 1 share. For information purposes, Itaú Unibanco pointed out in its Announcement to the Market that the price of its tender offer was higher than the price that would have been required for a mandatory tender offer in Chile. Finally, Itaú Unibanco has stressed that its Announcement to the Market was exclusively for information purposes to obtain the necessary authorizations to continue with the planned tender offer and for the purpose of informing updates regarding the price and number of shares. Therefore, the Announcement to the Market did not constitute an offer for the acquisition of any shares. The measurement of regulatory risk for the Banking Portfolio is used to estimate the Bank's potential losses from standardized adverse movements in interest and exchange rates. The standardized regulatory report for the Banking portfolio

Note 5 - Significant Events, continued

is used to estimate the Bank's potential economic losses from standardized adverse movements in interest rates defined by the CMF. Currently, the limit on the net interest income (Δ NII) in the Banking Portfolio must not exceed 25% of the annual operating income (rolling LTM period), while the consumption of the limit on the Bank's economic value of equity (Δ EVE) must be less than 13% of the Bank's Tier 1 capital.

Result of Takeover Bid Itaú Unibanco Holding S.A.

On July 8, 2023, Banco Itaú Chile informed by means of an essential fact that, ITB Holding Brasil Participações Ltda. (the "Bidder") published in the newspapers "El Líbero" and "El Mostrador" the notice of result (the "Notice of Result") of the Takeover Bid of Shares that such entity carried out in Chile (the "Chilean Offer") for all the shares issued by Banco Itaú Chile that, as of June 6, 2023 -the effective date of the Chilean Offer-, were not the property of the Itaú Unibanco Group to which the Bidder belongs, that is, for up to 74,379,229 shares issued by the Company, at a price of 8,500 Chilean pesos per share, the terms and conditions of which are set forth in the notice of commencement of the Chilean Offer dated June 5, 2023, published in the newspapers "El Líbero" and "El Mostrador", and in the prospectus of the Chilean Offer which, on the same date, was made available to interested parties and was also amended.

The Notice of Result also discloses the results of the Takeover Bid of Shares that the Bidder, simultaneously with the Chilean Offer, conducted in the United States, for (i) any and all of the outstanding shares of Banco Itaú Chile held by U.S. Holders (as defined in Regulation 14d-1(d) under the U.S. Securities Exchange Act of 1934, as amended) in the United States; and (ii) each and every American Depositary Shares (each an "ADS" and collectively the "ADSs"), each representing one-third of one share of the Company, which are traded on the New York Stock Exchange and held by ADS holders, wherever located (the "American Offering", and together with the Chilean Offering, the "Offers").

Thus, and as indicated in the aforementioned Notice of Result, especially paragraphs 6, 7 and 8 thereof, as a result of the Offers, Grupo Itaú Unibanco became the holder of a total of 144,269,397 shares of Banco Itaú Chile (including those shares represented by ADSs acquired by the Bidder under the American Offer), equivalent to 66.69% of the subscribed and paid-in capital of Banco Itaú Chile.

Fine Commission for the Financial Market (CMF, for its Spanish acronym)

Through an essential event dated October 30, 2023, the Bank reported that it had become aware of Exempt Resolution No. 7.400 issued by the CMF, dated October 5, 2023, through which it was resolved to apply a fine to the Bank in the amount of 1.800 Unidades de Fomento, as a consequence of certain errors in information to the Registry of Debtors referred to in article 14 of the General Banking Law and Chapter 18-5 of the RAN.

Termination of the American Depositary Shares Program, cancellation of ADS registration with the Securities and Exchange Commission, cancellation of registration on the New York Stock Exchange and termination of the ADS Deposit Agreement

Through an essential event dated October 30, 2023, the Bank reported that, on that same date, it had informed the New York Stock Exchange of the decision to begin the process to terminate its American Depositary Shares program registered in the United States of America ("ADS"), obtain the cancellation of the registration of the ADSs with the Securities and Exchange Commission of the United States of America, cancel the registration of the ADSs on the New York Stock Exchange and terminate the Deposit Agreement under which the ADSs were issued.

Note 5 - Significant Events, continued

The previous decision was made by the Bank's board of directors, in an ordinary session held on October 25, 2023, mainly in consideration of the fact that, on the one hand, approximately 0.97% of the Bank's total shares made up the ADS program and the stock market liquidity of this program represented approximately 2.1% of the total liquidity of the Bank's shares and, on the other hand, the desire to reduce its operational costs.

For these purposes, the Bank would proceed to promptly make the corresponding filings before the Securities and Exchange Commission of the United States of America and the New York Stock Exchange, as well as those that are required at the local level and with the depository of the ADS program.

Finally, it was stated in the aforementioned essential fact that the Bank's ordinary shares were registered in the Securities Registry of the CMF and were traded and quoted (and will continue to be traded and quoted) on the Santiago Stock Exchange and on the Electronic Stock Exchange of Chile. In this way, it was made clear that the Bank was subject to compliance with all periodic and ongoing reporting duties contemplated for banks and corporations in the legislation and regulations of the CMF that are applicable to it.

Termination of ADS Program

On November 9, 2023, the Bank reported that The Bank of New York Mellon, as depository bank of the Bank's ADSs (the "Depository") issued on November 8, 2023 a notice to the holders of the Bank's ADSs giving termination of the ADS program (the "ADS Program"), in accordance with the provisions of the *Amended and Restated Deposit Agreement*, entered into on June 11, 2018 (the "Deposit Agreement") between the Bank, the Depository, and ADS holders. Likewise, it reported that the ADS Program and the Deposit Agreement would be terminated on February 5, 2024.

Cancellation of registration of the Bank's ADSs with the New York Stock Exchange and request for cancellation of registration of ADSs before the Securities and Exchange Commission

Through a material event dated November 20, 2023, the Bank reported that, on that same date, the cancellation of the registration with the New York Stock Exchange of the ADSs issued by the Bank had become effective. In consideration of the above, the Bank reported that, for the purposes of continuing with the process of terminating the Bank's ADS program reported through the essential event dated October 30, 2023, the Bank would submit on that same date a request for cancellation of the registration of the ADSs and ordinary shares before the Securities and Exchange Commission of the United States of America and termination of its reporting obligations before that entity (Form 15F).

In accordance with the applicable regulatory deadlines, it was reported that the Bank expected that the cancellation of the registration of the ADSs with the Securities and Exchange Commission of the United States of America would materialize after 90 days from November 20, 2023.

Finally, it was stated in the aforementioned essential event that the Bank's ordinary shares would continue to be registered in the CMF Securities Registry, and that they would continue to trade and be listed on the Santiago Stock Exchange and the Electronic Stock Exchange of Chile.

Note 6 - Reporting Segments

Segment reporting is determined by the Bank on the basis of its operating segments (Chile, which includes the New York branch, and Colombia, which includes Panama), which are differentiated mainly by the risks and returns that affect them.

The reportable segments and the criteria used to inform the Bank's chief operating decision maker are in accordance with IFRS 8 "Operating segments".

a) Segments

Accordingly, the descriptions of each operating segment are as follows:

(i) Chile

The Bank's commercial activities in Chile are mainly located in the domestic market, the operations have been strategically aligned in five commercial areas directly related to the needs of its customers and the Bank's strategy, being these:

1) Wholesale Banking (a) Corporate and Investment Banking, (b) Institucional, (c) Multinational, (d) Real Estate and Construction Banking and (e) Large Companies Banking; 2) Retail Banking (a) Private Bank, (b) Personal Bank, (c) Itaú Branche and (d) Condell; 3) Treasury; 4) Corporate; and 5) Other Financial Services.

The Bank manages these business areas using a reporting system for internal profitability. The operating results are regularly reviewed by the entity's highest decision-making authority for operating decisions as one single Cash Generating Unit, to decide on the resource allocation for the segment and evaluate its performance.

(ii) Colombia

Colombia has been identified as a separate operating segment based on its business activities. Its operating results are reviewed regularly by the entity's highest decision-making authority for operating decisions as one single cash generating unit, to decide about resource allocation for the segment and evaluate its performance, and separate financial information is available for it.

The commercial activities of this segment are carried out by Itaú Colombia S.A. and its subsidiaries.

The Bank did not enter into transactions with a particular customer or third party in excess of 10% of its total income during the years ended as of December 31, 2023 and 2022 .

b) Geographic Information

Banco Itaú Chile reports revenue by segment from external customers that is:

- Attributed to the entity's country of domicile and
- Attributed, in aggregate, to all foreign countries where the entity obtains revenue.

Note 6 - Reporting Segments, continued

When income from ordinary activities from external clients attributed to a particular foreign country is significant, they will be disclosed separately. According to the previous, the group operates in two main geographical areas: Chile and Colombia. Chile segment includes the operations carried out by Itaú Chile New York Branch and Colombia segment includes the operations carried out by Itaú (Panamá) S.A. and Itaú Corredores de Seguros Colombia S.A.

Interest income and expense and repricing income and expense information for the years ended as of December 31, 2023 and 2022, for these geographic areas is shown below:

Consolidated consolidated income (loss) for the year		355,521	(638)	354,883	426,193	7,592	433,785

(1) Includes employee benefit obligations, administrative expenses, impairment and other operating expenses.

Note 7 - Cash and Cash Equivalents

a) Cash and Cash Equivalents detail

The detail of balances included under cash and cash equivalents is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Cash and bank deposits		
Cash	227,309	275,172
Deposits in the Central Bank of Chile (i)	556,876	1,284,810
Deposits in foreign Central Banks	1,343,980	1,034,229
Deposits in local banks	16,051	20,744
Deposits in foreign banks	313,577	428,288
Subtotals cash and deposits in banks	2,457,793	3,043,243
Cash items in process of collection, net (ii)	(14,160)	38,037
Highly liquid financial instruments (iii)	1,749,725	2,090,058
Total cash and cash equivalents	4,193,358	5,171,338

- i) The level of funds in cash and at the Central Bank of Chile responds to reserve requirement regulations that the Bank must maintain on average in monthly periods.
- ii) See letter b. "Cash in the process of collection, net".
- iii) Highly liquid financial instruments: Refers to financial instruments that meet the criteria to be considered "cash equivalent" as defined by IAS 7, that is, to qualify as "cash equivalent" investments in debt financial instruments must be short-term with an original maturity of 90 days or less from the date of acquisition, be highly liquid, be easily convertible into known amounts of cash from the date of the initial investment, and that the financial instruments are exposed to an insignificant risk of changes in value.

b) Cash in the process of collection, net

These correspond to transactions in which only the settlement that will increase or decrease the funds in the Central Bank of Chile or in banks abroad, normally within 12 or 24 business hours following the close of each year, remains to be settled:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Assets		
Documents held by other banks (documents to be cleared)	27,257	35,733
Funds receivable	390,102	459,261
Subtotal - assets	417,359	494,994
Liabilities		
Funds payable	431,519	456,957
Subtotal - liabilities	431,519	456,957
Cash in the process of collection, net	(14,160)	38,037

Note 8 - Financial Assets Held for Trading at Fair Value Through Profit or Loss

- a) As of December 31, 2023 and 2022, the detail of financial assets held for trading at fair value through profit or loss is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Derivatives held for trading	2,965,161	3,617,792
Debt financial instruments	321,656	370,554
Other financial instruments held for trading	44,552	47,598
Total	3,331,369	4,035,944

- b) Portfolio detail

As of December 31, 2023 and 2022, the portfolio of financial derivative instruments held for trading purposes is as follows:

	As of December 31, 2023							Fair value	
	Notional amount							Total	Assets

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b) Hedge accounting

b.1) Fair value hedges

The Bank uses interest rate derivatives to manage its structural risk by minimizing accounting asymmetries in the Consolidated Statement of Financial Position. Through different hedging strategies, it redenominates an element originally at a fixed rate to a floating rate, thus decreasing the financial duration and consequently risk, aligning the balance sheet structure with expected movements in the yield curve.

	As of December 31, 2023									
	Notional amount									Average Price

(1) Only includes cash flows forecast portion of the hedge instruments used to cover interest rate risk.

b.2) Cash flow hedges

Cash flow hedges are used by the Bank mainly to:

- Reduce the volatility of cash flows on inflation-adjusted Statement of Financial Position items through the use of inflation forward contracts and combinations of pesos and index-units swap contracts.
- Fixing the rate of a portion of the short-term liability pool in pesos, reducing the risk of a significant portion of the Bank's funding cost, while maintaining the liquidity risk in the liability pool.
- Setting the funding source rate at a floating rate, reducing the risk of an increase in the cost of funds.

Bonds with banks		
Interbank loans	(2,194)	40,710
Highly probable transaction		
Disbursement USD	(852)	—
Total	9,282	61,894

The effective portion generated by those cash flow derivatives was recognized in the Consolidated Statements of Changes in Equity as of December 31, 2023 and 2022.

The ineffective portion generated by cash flow derivatives is due to the fact that both the hedged item and the item being hedged are not a mirror image of each other, which means that the variations in value attributable to rate and restatement components are not fully offset, but remain within the range of effectiveness defined by the standard.

The following table presents the results generated by the hedging instruments used in the cash flow hedge. The effective portion is recognized in other comprehensive income while the ineffective portion is recognized in the statement of profit or loss. The profit or loss recognized for the years ended December 31, 2023 and 2022 is presented below:

	As of December 31,			
	2023		2022

Note 12 - Derivative Financial Instruments Held For Hedge Accounting, continued

b.3) Hedge of net investments in foreign operations

Banco Itaú Chile, parent company with Chilean peso functional currency, has investments in foreign businesses corresponding to a branch in New York and businesses in Colombia. As a result of the accounting treatment that these investments must receive, fluctuations in the value of the investments caused by the variability of the exchange rate between the Chilean peso in relation to the U.S. dollar and the Colombian peso generate changes in the value of the parent company's equity. The objective of the hedges is to safeguard the value of the equity by managing the exchange rate risk of the investments.

Hedges of a net investment in a foreign business, including the hedging of a monetary item that is accounted for as part of a net investment, will be recorded in a manner similar to cash flow hedges, where:

- The ineffective portion will be recognized in income,
- The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge will be recognized in equity; the effects are presented below:

As of December 31, 2023

Other	5,221	—	—	5,221
Balances as of December 31, 2022	(145,583)	—	(146,443)	(292,026)

Note 15 - Intangible Assets, continued

d) Impairment

Banco Itaú Chile assesses, at the end of each reporting period, whether there is any indication of impairment of any asset (including goodwill). If such an indication exists, or when an impairment test is required, the Bank estimates the recoverable amount of the asset and recognizes it in the Consolidated Statements of Income (see Note 40 letter a)).

As of December 31, 2023 and 2022, there are no indications or concrete evidence of impairment in intangible assets without definite useful life (see details in Note 40 b)). As of the date of these financial statements, there have been no events requiring the recognition of impairment.

e) Restrictions

Banco Itaú Chile and subsidiaries have no restrictions on intangible assets as of December 31, 2023 and 2022. Additionally, no intangible assets have been pledged as collateral for the performance of obligations.

Note 16 - Fixed Assets

a) The breakdown of this item as of December 31, 2023 and 2022 is as follows:

Item	Useful life years No.	Remaining depreciation years No.	Net assets as of January 1, 2023 MCh\$	Gross balance MCh\$	Accumulated depreciation MCh\$	Net assets as of December 31, 2023 MCh\$
Buildings	26	14	8,514	15,268	(5,988)	9,280
Land	—	—	2,319	2,994	—	2,994
Equipment	6	2	19,312	95,941	(78,317)	17,624
Other fixed asset	3	1	9,912	33,084	(24,936)	8,148
Total			40,057	147,287	(109,241)	38,046

Item	Useful life years No.	Remaining amortization years No.	Net assets as of January 01, 2022 MCh\$	Gross balance MCh\$	Accumulated depreciation MCh\$	Net assets as of December 31, 2022 MCh\$
Buildings	26	14	11,772	13,440	(4,926)	8,514
Land	—	—	3,548	2,319	—	2,319
Equipment	6	3	23,798	82,885	(63,573)	19,312
Other fixed asset	14	8	11,939	35,435	(25,523)	9,912
Total			51,057	134,079	(94,022)	40,057

The useful life presented in the tables above corresponds to the total useful life and residual life of the fixed assets of the Bank and subsidiaries. The total useful life was calculated based on the expected use considering the quality of the original construction, the environment where the assets are located, the quality and level of maintenance carried out and the appraisal performed by external specialists independent from the Bank.

b) The changes in the gross balance of fixed assets as of December 31, 2023 and 2022 are as follows:

	Buildings MCh\$	Land MCh\$	Equipment MCh\$	Other MCh\$	Total MCh\$
Balances as of January 1, 2023	13,440	2,319	82,885	35,435	134,079
Additions	6	—	4,940	2,141	7,087
Sales and/or disposals for the year	(3)	—	(1,166)	(6,183)	(7,352)
Impairment	—	—	(32)	(278)	(310)
Exchange differences	1,825	675	9,314	1,969	13,783
Balances as of December 31, 2023	15,268	2,994	95,941	33,084	147,287

Note 16 - Fixed Assets, continued

	Buildings	Land	Equipment	Other	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2022	18,466	3,548	85,835	36,039	143,888

	Buildings	Land	Equipment	Other	Total
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2022	(6,694)	—	(62,037)	(24,100)	(92,831)
Depreciation for the year	(415)	—	(7,864)	(4,494)	(12,773)
Sales and/or disposals for the year	146	—	1,034	1,838	3,018
Exchange differences	717	—	5,294	1,243	7,254
Reclassification to assets held for sale	1,320	—	—	—	1,320
Impairment	—	—	—	(10)	(10)
Balances as of December 31, 2022	(4,926)	—	(63,573)	(25,523)	(94,022)

- d) Banco Itaú Chile evaluates at the end of each reporting year whether there is any indication of impairment of any asset. If this indication exists, or when an impairment test is required, the Bank estimates the recoverable amount of the asset and recognizes it in the Consolidated Statement of Income. (see Note 40 letter a)).
- e) The Bank and its subsidiaries have no restrictions on fixed assets as of December 31, 2023 and 2022. In addition, fixed assets have not been pledged as collateral for the performance of obligations. On the other hand, there are no amounts owed on fixed assets by the Bank as of the aforementioned dates.

Note 17 - Right to use Asset and Obligations for Lease Contracts

a) Right to use asset for lease contracts

- (i) The Bank mainly has lease contracts for its branches and corporate building. The composition of the item as of December 31, 2023 and 2022 is as follows:

	Useful life years No.	Average remaining depreciation years No.	Net assets as of January 1, 2023 MCh\$	Gross balances MCh\$	Accumulated depreciation MCh\$	Net assets as of December 31, 2023 MCh\$
Buildings	8	4	89,539	175,809	(98,345)	77,464
Improvements in leased premises	10	5	20,139	57,179	(35,429)	21,750
Others leased assets	—	—	—	—	—	—
Total			109,678	232,988	(133,774)	99,214

	Useful life years No.	Average remaining depreciation years No.	Net assets as of January 1, 2022 MCh\$	Gross balances MCh\$	Accumulated depreciation MCh\$	Net assets as of December 31, 2022 MCh\$
Buildings	8	5	110,743	164,052	(74,513)	89,539
Improvements in leased premises	9	5	20,876	48,480	(28,341)	20,139
Others leased assets	3	—	38	—	—	—
Total			131,657	212,532	(102,854)	109,678

Note 17 - Right to use Asset and Obligations for Lease Contracts, continued

- (ii) Movement in the gross balance of assets for right to use lease for December 31, 2023 and 2022 are as follows:

	Buildings	Improvements in leased premises	Others leased assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2023	164,052	48,480	—	212,532
Additions (1)	2,327	8,773	—	11,100
Sales and/or disposals for the year	(4,777)	(2,697)	—	(7,474)
Remeasurements of liabilities due to restatement	3,171	—	—	3,171
Remeasurements of liabilities due to modifications (2)	3,240	—	—	3,240
Exchange differences	7,796	2,623	—	10,419
Balances as of December 31, 2023	175,809	57,179	—	232,988

	Buildings	Improvements in leased premises	Others leased assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2022	175,358	57,253	152	232,763
Additions (1)	9,113	6,161	—	15,274
Sales and/or disposals for the year	(15,372)	(13,207)	(123)	(28,702)
Remeasurements of liabilities due to restatement	9,171	—	(4)	9,167
Remeasurements of liabilities due to modifications (2)	(8,908)	—	—	(8,908)
Exchange differences	(5,310)	(1,727)	(25)	(7,062)
Balances as of December 31, 2022	164,052	48,480	—	212,532

(1) Include contract renewals.

(2) Include remeasurement of liabilities due to contract amendments.

- (iii) The changes in accumulated depreciation of assets for right to use leased assets for December 31, 2023 and 2022 are as follows:

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2023	(74,513)	(28,341)	—	(102,854)
Depreciation	(23,190)	(6,535)	—	(29,725)
Sales and/or disposals for the year	3,758	1,925	—	5,683
Exchange differences	(4,400)	(2,478)	—	(6,878)
Reclassifications	—	—	—	—
Balances as of December 31, 2023	(98,345)	(35,429)	—	(133,774)

	Buildings	Improvements in leased premises	Other fixed assets	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2022	(64,615)	(36,377)	(114)	(101,106)
Depreciation	(22,518)	(6,147)	(33)	(28,698)
Sales and/or disposals for the year	9,790	12,665	125	22,580
Exchange differences	2,695	1,518	22	4,235
Reclassifications	135	—	—	135
Balances as of December 31, 2022	(74,513)	(28,341)	—	(102,854)

Note 17 - Right to use Asset and Obligations for Lease Contracts, continued

b) Lease contracts liabilities

(i) Lease contracts liabilities as of December 31, 2023 and 2022 are as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Lease contract liabilities	83,807	94,575
Total	83,807	94,575

The Bank and its subsidiaries have contracts with certain renewal options and for which there is reasonable certainty that such option will be exercised. In such cases, the lease period used to measure the liabilities and assets corresponds to an estimate of future renewals.

(ii) The changes in lease contract liabilities and cash flows as of December 31, 2023 and 2022 are as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Balances as of January 1st	94,575	115,544
Additions due to new contracts (1)	2,327	9,113
Disposals due to early termination	(1,174)	(5,527)
Interest expense	5,038	3,657
Remeasurements of the liabilities due to modifications (2)	3,240	(8,908)
Inflation rate adjustments	3,171	9,171
Exchange rate adjustment	(6)	(22)
Exchange differences	4,599	(3,776)
Capital and interest payments	(27,963)	(24,677)
Balances as of end year	83,807	94,575

(1) Include contract renewals.

(2) Include remeasurement of liabilities due to contract amendments.

Note 18 – Taxes

a) Current taxes

The Bank and its subsidiaries, at the end of each reporting period, have established a provision for first category income tax, which was determined based on current tax legislation. The net provision for recoverable taxes has been reflected in assets for MCh\$115,949 as of December 31, 2023 (MCh\$88,276 as of December 31, 2022), as detailed below:

a.1) Current tax assets and liabilities by geographical area

	As of December 31, 2023			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax assets	47,335	—	70,953	118,288
Current tax liabilities	(1,145)	—	(1,194)	(2,339)
Total net	46,190	—	69,759	115,949

	As of December 31, 2022			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Current tax assets	50,690	—	37,663	88,353
Current tax liabilities	—	—	(77)	(77)
Total net	50,690	—	37,586	88,276

(1) Correspond to the Itaú Chile New York Branch.

a.2) Current tax components by geographical area

	As of December 31, 2023			
	Chile	U.S.A. (1)	Colombia	Total
	MCh\$	MCh\$	MCh\$	MCh\$
Income tax, income tax effect	(53,581)	—	(3,661)	(57,242)

4% event capital credit	721	—	—	721
Other taxes to be recovered (paid) (2)	8,317	—	14,829	23,146
Total	50,690	—	37,586	88,276

(1) Correspond to the Itaú Chile New York Branch.

(2) Correspond mainly to monthly provisional payments paid in previous years, provisional payments for reimbursed retained earnings, among others.

Note 18 - Taxes, continued

b) Income tax results

The tax expense for the years ended as of December 31, 2023 and 2022 consists of the following items:

	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Income tax expense:		
Current tax expenses	(57,242)	(13,819)
Deferred taxes:		
Deferred taxes expenses	27,012	34,989
Subtotal	(30,230)	21,170
Other	446	10,336
Net expense for income taxes	(29,784)	31,506

c) Reconciliation of effective tax rate

The reconciliation between the current statutory nominal income tax rates and the effective rates applied to the determination of the tax expense as of December 31, 2023 and 2022 is as follows

Nominal rates by geographic area	2023	2022
	Rate	Rate
Chile	27.0%	27.0%
Colombia	40.0%	38.0%
United States	21.0%	21.0%

Note 18 - Taxes, continued

The main tax effects, according to the nominal tax rates of the countries reported on a consolidated basis, are as follows:

	For the years ended as of December 31,			
	2023		2022	
	Tax Rate	Amount	Tax Rate	Amount
	%	MCh\$	%	MCh\$
Amount calculated by using the statutory rates	27.00	103,860	27.00	108,615
Equity price level restatement for tax purposes (1)	(16.04)	(61,714)	(38.75)	(155,880)
Exchange differences due to investments in Colombia and U.S.A (2)	3.62	13,927	3.15	12,685
Capital investments tax exemptions (3)	(6.44)	(24,781)	0.37	1,493
Effect of rates Colombia subsidiary (4)	(2.92)	(11,227)	(0.80)	(3,228)
Effect of rates New York branch (4)	(0.60)	(2,305)	(0.19)	(780)
Taxes in U.S.A	2.45	9,419	2.21	8,880
Other Adjustments	0.67	2,605	(0.82)	(3,291)
Totals	7.74	29,784	(7.83)	(31,506)

- (1) During the year ended as of December 31, 2023, the CPI factor used to adjust the Tax-basis Equity was equal to 4.8% (13.3% in 2022; 6.7% in 2021).
- (2) For tax purposes, the investment in Colombia and the United States is valued in U.S. dollars. The devaluation (appreciation) of the Chilean peso against the U.S. dollar generates income (expense) for tax purposes without a corresponding effect on profit or loss. The amount presented here represents the income tax expense (benefit) for the effect of the exchange rate on the investment in Colombia and the United States. As part of its exchange rate risk management policy, the Bank has managed this exposure through instruments available in the market to protect it economically from the tax effect generated by the fluctuation in the exchange rate. The effect of these instruments (which offsets the tax effect presented here) is recognized in the Net foreign exchange gain (loss) line of the Consolidated Statement of Income for the year.
- (3) Capital gains generated on sales of fixed-income instruments qualifying for the tax exemption under Article 104 of the Income Tax Law are not subject to income tax.
- (4) This line reflects the tax rate differences of companies located in other jurisdictions (ITAU Colombia and New York Branch), which are part of the Bank's consolidated income. In the case of Colombia, Panama is included as a subsidiary.

Note 18 - Taxes, continued

d) Effect of taxes recorded in equity

d.1) Tax effect of other comprehensive income that may be reclassified to income in subsequent years:

	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Effect of investments at FVTOCI	(1,853)	(1,077)
Effect of change in hedge accounting net investment	(2,398)	3,749
Effect of change in cash flow hedging	1,979	15,882
Total charge to other comprehensive income	(2,272)	18,554

d.2) Other comprehensive income that will not be reclassified to income in subsequent periods:

	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Income taxes related to changes in fair value of equity instruments designated at fair value through other comprehensive income	(5)	—
Income taxes related to defined benefits obligations	2,279	(1,073)
Total charge to other comprehensive income	2,274	(1,073)

Note 18 - Taxes, continued

e) Deferred tax effects

e.1) Total deferred taxes

	As of December 31, 2023			As of December 31, 2022		
	Assets	Liabilities	Net	Assets	Liabilities	Net
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Deferred taxes with effect in income

Total deferred tax assets	301,705	269,107
Deferred tax liabilities		
Through other comprehensive income	—	—
Through income	—	—
Total deferred tax liabilities	—	—

Note 18 - Taxes, continued

g) Effects of Joint Circular No. 3.478 of the FMC and No. 47 of the Chilean Internal Revenue Service.

As of December 31, 2023 and 2022, the information presented includes neither the operations of entities that are consolidated in the financial statements nor lease and factoring operations, but only those of the contributing Bank. Total assets at financial value and assets at tax value are reported, regardless of the fact that the transactions are not related to each other or do not correspond to what should be included in the non-performing portfolio columns.

The detail of such transactions for the year 2023 is as follows:

Loans and receivables due due from customers as of December 31, 2023	Assets at Financial Statement value MCh\$	Assets at tax value		
		Total MCh\$	Secured non-performing portfolio MCh\$	Unsecured non-performing portfolio MCh\$
Commercial loans	12,120,420	12,148,998	60,752	145,688
Mortgage loans	6,739,676	6,739,676	7,465	17,911
Consumer loans	2,464,736	2,464,736	871	35,129
Total	21,324,832	21,353,410	69,088	198,728

Provisions for non-performing portfolio	As of January 1, 2023	Write-off against provisions	Provisions established	Provisions released	As of December 31, 2023
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Commercial loans	126,471	21,305	110,915	70,394	145,687
Mortgage loans	14,783	5,063	13,082	4,891	17,911
Consumer loans	26,243	1,730	35,420	24,804	35,129
Total	167,497	28,098	159,417	100,089	198,727

Direct write-offs and recoveries	MCh\$	D. Application of Art. 31 No. 4 first and third paragraphs	MCh\$
Direct write-offs Art. 31 No. 4, second paragraph	262,897	Write-offs as per first paragraph	—
Forgiveness resulting in the release of provisions	—	Forgiveness as per third paragraph	—
Recovery or renegotiation of written-off loans	(45,096)		

Note 18 - Taxes, continued

The detail of such transactions for the year 2022 is as follows:

Loans and receivables due from customers as of December 31, 2022	Assets at Financial Statement value	Assets at tax value		
		Total	Secured non-	Unsecured non-
			performing portfolio	performing portfolio
	MCh\$	MCh\$	MCh\$	MCh\$
Commercial loans	13,142,789	13,171,367	75,912	126,472
Mortgage loans	6,393,144	6,393,144	4,845	14,783
Consumen loans	2,343,040	2,343,040	854	26,243
Total	21,878,973	21,907,551	81,611	167,498

Provisions for non-performing portfolio	As of January 1, 2022	Write-off against provisions	Provisions established	Provisions released	As of December 31, 2022
	MCh\$	MCh\$	MCh\$	MCh\$	MCh\$
Commercial loans	116,319	53,459	104,209	40,598	126,471

Forgiveness resulting in the release of provisions	—	Forgiveness as per third paragraph	—
Recovery or renegotiation of written-off loans	65,283		

Note 19 - Other Assets

a) As of December 31, 2023 and 2022, the composition of the item is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Other assets		
Assets to be leased out as lessor (1)	32,552	16,012
Cash collateral provided for derivative financial transactions (2)	352,856	456,749
Receivables from brokerage of financial instruments	30,596	18,467
Accounts receivable from third parties	68,945	43,000
Investment properties	3,473	2,536
VAT credit receivable	5,614	6,472
Prepaid expenses	29,499	30,189
Assets for revenue from contracts with customers	10,161	11,042
Valuation adjustments for macro hedges	1,823	—
Other cash collateral provided	2,577	2,920
Pending transactions	28,474	15,716
Other assets	24,071	26,580
Total	590,641	629,683

(1) Correspond to assets available to be delivered under the financial lease modality.

(2) Correspond to guarantees associated with certain derivative contracts. These guarantees operate when the valuation of the derivatives exceeds the thresholds defined in the respective contracts and may be in favor of or against the Bank.

Note 20 - Non-current Assets and Disposal Group and Liabilities Included in Disposal Group for Sale

- a) The composition of non-current assets and disposal group for sale and liabilities in disposal group held for sale is as follows:

	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Assets received in payment or foreclosed at judicial auction		
Assets received in lieu of payment	14,914	16,822
Assets foreclosed in judicial auction	8,903	2,440
Provisions for Assets received in lieu of payment or foreclosed at judicial auction	(6,058)	(11,380)
Non-current assets held for sale		
Investments in companies	—	—
Intangible assets	—	—
Fixed assets	484	745
Assets for recovery of assets assigned in financial leasing transactions	7,553	7,082
Other assets	—	—
Disposable groups for sale	—	—
Subtotal	25,796	15,709
Liabilities included in disposable groups for sale	—	—
Subtotal	—	—
Total	25,796	15,709

- b) The changes in provisions for assets received in lieu of payment as of December 31, 2023 and 2022, are as follows:

	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Balances as of January 1st	(11,380)	(14,404)
Creation of provisions	(2,467)	(24,006)
Application of provisions	9,322	20,184
Release of provisions	1,557	4,819
Exchange differences	(3,090)	2,027
Total	(6,058)	(11,380)

Note 21 - Financial Liabilities Held for Trading at Fair Value Through Profit or Loss

a) As of December 31, 2023 and 2022, the detail of financial liabilities held for trading at fair value through profit or loss is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Derivatives held for trading	2,793,343	3,426,141
Other financial instruments held for trading	—	—
Total	2,793,343	3,426,141

b) Portfolios detail

As of December 31, 2023 and 2022, the detail of the portfolio of derivative financial instruments is as follows:

	As of December 31, 2023							Fair value	
	Notional amount							Total	Liabilities

Totales	5,015,403	4,728,323

- (1) Corresponds to funds obtained through the use of the Conditional Credit Facility to Increase Loans (FCIC) granted by the Chilean Central Bank in response to tensions generated by the spread of the COVID-19 virus. The loans obtained through FCIC are guaranteed by high credit quality loans and / or bonds issued by the Chilean Central Bank and have automatic and successively monthly renewal maturities, with a maximum term of 4 years from March 30, 2020, until March 30, 2024. The FCIC accrues at the Monetary Policy Rate (MPR) in effect on the date of each transaction.

Note 22 - Financial Liabilities at Amortized Cost, continued

c) Debt instruments issued

As of December 31, 2023 and 2022, the composition of the item is as follows:

	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Debt instruments issued		
Letters of credit	13,879	18,940
Current bonds	6,956,813	6,528,867
Mortgage bonds	—	—
Subtotal	6,970,692	6,547,807
Other financial obligations		
Obligations with the public sector	—	—
Other obligations in the country	57,757	53,174
Foreign obligations	427,807	302,559
Subtotal	485,564	355,733
Total	7,456,256	6,903,540

c.1) Debts classified as short-term are those that constitute demand obligations or that will mature in a period equal to or less than one year. All other debts are classified as long-term. The detail is as follows:

	As of December 31, 2023		
	Short-term	Long-term	Total
	MCh\$	MCh\$	MCh\$
Letters of credit	4,690	9,189	13,879
Current bonds	835,756	6,121,057	6,956,813
Mortgage bonds	—	—	—
Debt instruments issued	840,446	6,130,246	6,970,692
Other financial obligations	485,564	—	485,564

	As of December 31, 2022		
	Short-term	Long-term	Total
	MCh\$	MCh\$	MCh\$
Letters of credit	6,146	12,794	18,940
Current bonds	323,821	6,205,046	6,528,867
Mortgage bonds	—	—	—
Debt instruments issued	329,967	6,217,840	6,547,807
Other financial obligations	355,733	—	355,733

Note 22 - Financial Liabilities at Amortized Cost, continued

Further details, including maturities, are presented below for each type of debt instrument issued, for the balances as of December 31, 2023 and 2022.

c.1.1) Current bonds

The detail of current bonds by type of currency is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Bonds in UF	6,275,243	5,853,292
Bonds in \$	190,440	252,573
Bonds in COP	491,130	423,002
Total	6,956,813	6,528,867

The following is a detail of current bond placements:

Placements made during the years ended as of December 31, 2023:

Series	Currency	Amount placed	Term	Rate of issue	Date of placement	Date of maturity
BITADP0222	UF	1,500,000	11 years and 17 months	2.51% p.a	01-03-2023	08-09-2034

Release of provisions	(1,208)	—	(683)	—	(127)	(43)	(2,061)
Other movements	(10,950)	—	(793)	(869)	(590)	363	(12,839)
Balances as of December 31, 2022	109,211	4,846	1,475	18,390	3,290	1,335	138,547

Note 24 – Provisions for Contingencies, continued

c) Provisions for employee benefit obligations

	Reference	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Provision of short-term employee benefits	(1)	47,705	58,262
Provision of benefits to post-employment employees		—	—
Provision of long-term employee benefits	(d.1)	14,082	9,727
Provision of benefits to employees for termination of employment contract	(d.4)	4,432	11,255
Provision for payments to employees based on shares or equity instruments	(2)	6,945	3,598
Provision for obligations for defined contribution post-employment plans		—	—
Provision for obligations for post-employment defined benefit plans	(d.2)	30,245	20,153
Provision for other staff obligations	(d.3)	6,179	6,216
Total		109,588	109,211

(1) Includes the provision for the payment of performance bonuses, year-end bonuses and other compensation of a similar nature to employees.

(2) During 2021 and 2022, the Bank entered into an agreement consisting in the granting of an extraordinary long-term variable remuneration which will be paid in April 2024 and 2025, respectively. The remuneration is determined based on a defined nominal amount which will be adjusted by the variation of the share price in the value of the shares; this will be settled in cash when the agreement milestones are met.

d) The detail of the main aspects of long-term employee benefits is presented below:

d.1) Compensation for years of service (long-term)

Description: Annual payment in the month in which the employee completes years of service in Colombia (every 5 years, from 5 to 50 years of service).

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”) was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

Note 24 – Provisions for Contingencies, continued

The summary of the economic assumptions used as of December 31, 2023 and 2022 is as follows:

	As of December 31, 2023	As of December 31, 2022
	%	%
Assumptions		
Discount rate	7.75	9.75
Expected rate of salary increase	12.00	14.30

Movements in the present value of the obligation for this type of benefit and the amounts recognized in the Consolidated Income Statement are determined using the projected unit credit method and consist of the following:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Balances as of January 1st	6,183	9,061
Net cost of benefits	2,109	(543)
Payments	(1,075)	(861)
Exchange differences	1,801	(1,474)
Balances as of end year	9,018	6,183

The detail of the net benefit cost is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Current benefit cost	2,057	426
Reduction - past service costs	(668)	(1,466)
Interest expense on the obligation	720	497
Total	2,109	(543)

d.2) Pension plan

Description: Old Age or Survivors Pension in accordance with the Social Security Law in Colombia and benefits acquired with the Entity.

Financing: The “Projected unit credit” method is the method used to determine the present value of the benefit obligation and the cost associated with it. Under this method, the obligation for benefits is the present value of the current benefits for past services, but calculating the plan benefit based on the projected salary on the date on which the participant is assumed to receive the benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

Note 24 – Provisions for Contingencies, continued

The detail of the net benefit cost is as follows:

	As of December 31, 2023	As of December 31, 2022
	%	%
Assumptions		
Discount rate	7.75	9.75
Expected rate of pay increase	9.50	11.80
Inflation rate	9.50	11.80

The detail of the movements of the balances of the Pension Plan is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Balances as of January 1st	20,153	26,889
Interest expense on the obligation	2,397	1,611
Payment	(3,658)	(2,650)
Actuarial losses (gains)	6,490	(1,325)
Exchange differences	4,863	(4,372)
Balances as of end year	30,245	20,153

d.3) Retroactive severance plan

Description: Retroactive severance plan prior to Law 50 of 1990 in Colombia.

Financing: The method called “Projected Unit Credit” (“Projected Unit Credit”), in English, was used to determine the present value of the defined benefit obligation and the corresponding cost for services. For all active Plan participants, the “projected earned benefit” is based on the Plan formula and years of service as of the calculation date, but using average salary, social security benefits, etc., projected to the date of calculation. Age at which the employee is assumed to stop providing services. For inactive members instead, it is the total benefit. The plan does not have policies (therefore without reimbursements) or associated assets, being a structured financing according to the financial conditions of the entity.

The summary of the economic assumptions is as follows:

	As of December 31, 2023	As of December 31, 2022
	%	%
Assumptions		
Discount rate	7.25	8.75
Expected rate of pay increase	12.00	14.30
Inflation rate	9.50	11.80

Note 24 – Provisions for Contingencies, continued

The movements for this benefit during the years ended as of December 31, 2023 and 2022 are detailed below:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Balances as of January 1st	276	297
Current service cost	150	140
Interest expense on debentures	22	12
Actuarial losses (gains)	(136)	(21)
Payment of benefits	(119)	(104)
Exchange differences	135	(48)
Balances as of end year	328	276

d.4) Retirement Bonus Plan

Description: Payment of a fixed amount at the time of retirement for retirement.

Financing: The method called “Projected unit credit” is the method used to determine the present value of the obligation for benefits and the cost associated with it. Under this method, the obligation for benefits is the present value of the current benefits for past services, but calculating the plan benefit based on the projected salary on the date on which the participant is supposed to receive the benefit.

The summary of the economic assumptions is as follows:

	As of December 31, 2023	As of December 31, 2022
	%	%
Assumptions		
Discount rate	7.75	9.75
Expected rate of pay increase	11.50	13.80
Inflation rate	9.50	11.80

The amounts recognized for this benefit were as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Balances at January 1st	446	670
Current service cost	(24)	(128)
Interest expense on debentures	50	39
Actuarial losses (gains)	110	(12)
Payment of benefits	(15)	(14)
Exchange differences	159	(109)
Balances as of end year	726	446

Note 24 – Provisions for Contingencies, continued

The effect recorded in the Consolidated Statement of Other Comprehensive Income as of December 31, 2023 and 2022, is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Pension plan	6,490	(1,325)
Retroactive severance plan	(136)	(21)
Retirement Bonus Plan	110	(12)
Total recognition of defined benefit obligations	6,464	(1,358)

Future payments

Future actuarial calculations may differ from the calculations presented, due to the following factors:

- The experience of the plans differs from those anticipated by the selected economic and demographic assumptions.
- Changes in economic and demographic assumptions.
- Expected increases or decreases as a natural part of the functioning of the methodology for these calculations (for example, the end of the amortization period or additional costs based on the financing situation of the plan).
- Changes in the characteristics of the plan or applicable law, and with respect to it, there are no significant events affecting the results presented since the last valuation.

Below is the detail of future payments for 2023 and 2022:

2023	Severance indemnity (long term)	Plan of pensions	Retroactive Severance plan	Plan bonus for retirement
	MCh\$	MCh\$	MCh\$	MCh\$
Year 2023	875	3,072	221	124
Year 2024	882	3,100	25	39
Year 2025	1,092	3,060	1	38
Year 2026	1,502	3,008	26	40
Year 2027	1,505	2,948	1	27
Year 2028 - 2032	5,800	13,661	97	264

2022	Severance indemnity (long term)	Plan of pensions	Retroactive Severance plan	Plan bonus for retirement
	MCh\$	MCh\$	MCh\$	MCh\$
Year 2022	953	2,222	168	88
Year 2023	1,105	2,297	38	24
Year 2024	1,105	2,284	19	30
Year 2025	877	2,262	1	25
Year 2026	786	2,232	18	30
Year 2028 - 2032	4,612	10,555	80	170

Note 25 – Provisions for Dividends, Interest Payments and Valuation of Issued Bonds with no Fixed Maturity Date

a) The breakdown of the item as of December 31, 2023 and 2022 is as follows:

	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Provision for payment of common stock dividends	106,466	130,123
Provision for payment of dividends on preferred shares	—	—
Provision for payment of interest on bonds with no fixed term to maturity	—	—
Provision for bond repricing with no fixed term to maturity	—	—
Total	106,466	130,123

b) The changes in this caption as of December 31, 2023 and 2022 are presented below:

	Provision for dividends	Provision for payment of interest on bonds with no fixed term to maturity	Provision for bond repricing with no fixed term to maturity
	MCh\$	MCh\$	MCh\$
Balances as of January 1, 2023	130,123	—	—

Other minority shareholders	2,450,809	1.12 %	24,171,554,873	2.48 %
Total	216,340,749	100.00 %	973,517,871,202	100.00 %

- (1) Includes 25,360,509 shares owned by ITB Holding Brasil Participações Ltda. under custody as of December 31, 2023 (103,736,846,776 shares owned by ITB Holding Brasil Participações Ltda. under custody as of December 31, 2022).
(2) The percentages included in this column have been rounded for ease of presentation. These Percentages have been calculated on the basis of the unrounded figures presented in the "No. Shares" column.

b) Dividends

At the Ordinary Meeting of the Shareholders of Banco Itaú Chile held on April 20, 2023, the shareholders agreed to distribute profits for MCh\$130,123 representing 30% of the profits for 2022.

	Income attributable to equity holders of Banks	Allocated to reserves and earnings Retained	Allocated to dividends	Percentage distributed	Shares	dividends Per share
	MCh\$	MCh\$	MCh\$	%	No.	CLP
Year 2022, (Shareholders Meeting April 2023)	433,744	303,621	130,123	30 %	973,517,871,202	0.13366
Year 2021, (Shareholders Meeting March 2022)	279,765	196,423	83,342	30 %	973,517,871,202	0.08561

Note 28 – Equity, continued

Below is the composition of the basic and diluted profit, attributable to the owners of the Bank, as of December 31, 2023 and 2022.

Basic earnings and diluted earnings	For the years ended as of December 31,			
	2023		2022	
	No. of shares Millions	Amount MCh\$	No. of shares (1) Millions	Amount MCh\$
Basic earnings per share				
Net income for the year	—	354,887	—	433,744
Weighted average number of outstanding shares	216	—	216	—
Assumed convertible debt conversion	—	—	—	—
Adjusted number of shares	216	—	216	—
Basic earnings per share (Chilean pesos)	—	1,640	—	2,005
Diluted earnings per share				
Net income for the year	—	354,887	—	433,744
Weighted average number of outstanding shares	216	—	216	—
Dilutive effects:				
Assumed convertible debt conversion	—	—	—	—
Conversion of common shares	—	—	—	—
Options rights	—	—	—	—
Adjusted number of shares	216	—	216	—
Diluted earnings per share (Chilean pesos)	—	1,640	—	2,005

(1) In accordance with IAS 33, for the year 2022 the number of shares was adjusted retroactively in order to reflect the reverse stock split.

As of December 31, 2023 and 2022, there were no dilutive effects.

c) Valuation accounts

Financial instruments to FVTOCI Includes accumulated net changes in the fair value of investments at fair value with effect on other comprehensive income.

Equity instruments designated to FVTOCI Includes the accumulated net changes in the fair value of investments at fair value with effect on other comprehensive income. These results come mainly from minority investments, which are not recyclable.

Cash flows hedge: It includes the effects of hedges on the Bank's exposure to variations in cash flows that are attributed to a particular risk related to a recognized asset and/or liability, which may affect the results for the year.

Investment in foreign operations hedge: Corresponds to adjustments for hedges of net investment in foreign business.

Conversion reserves: It includes the effects of converting the Financial Statements of the New York Branch and Colombian subsidiaries, whose functional currencies are the US dollar and Colombian peso, respectively, to the presentation currency of Banco Itaú Chile (Chilean peso).

Defined benefits obligations reserves: This includes the effects of applying IAS 19 "Employee Benefits".

Minority investments: Includes the accumulated net changes in the fair value of minority investments.

Note 29 – Contingencies and Commitments

a) Lawsuits and Legal Proceedings

Lawsuits in Chile against the Bank with provision

As of the date of issuance of these Consolidated Financial Statements, legal actions have been filed against the Bank and its subsidiaries involving its transactions in the ordinary course of business. They are mainly lawsuits pending against the Bank related to loans and other matters, most of which, according to the Bank's Legal Services Divisions involved in the suits, present no risk of significant loss.

The amount of the claims amounts to approximately MCh\$105,258 as of December 31, 2023 (MCh\$43,913 as of December 31, 2022). However, Management's opinion based on reports from the Legal Division as of December 31, 2023, attended the procedural state of said trials, it is not possible at this time to conclude whether these could result in significant losses not contemplated by the Bank in these Consolidated Financial Statements. Notwithstanding the above, as of December 31, 2023, provisions amounted to MCh\$2,016 (MCh\$1,337 as of December 31, 2022) are maintained.

Itaú Colombia S.A.

Itaú Colombia S.A. and its subsidiaries are involved in civil, administrative and labor proceedings. The outstanding civil and administrative proceedings, they are related to banking transactions, and the remaining ones derive from the ownership of leased assets.

Such claims amounts to MCh\$37,339 as of December 31, 2023 (MCh\$27,820, as of December, 31 2022). According to the evaluation of the expected results in each lawsuits the Bank has recorded a provision of MCh\$1,581 as of December 31, 2023 (MCh\$1,602 as of December 31, 2022).

Note 29 – Contingencies and Commitments, continued

b) Contingent loans

The following table shows the contractual amounts of the operations that oblige the Bank and/or its subsidiaries to grant loans:

	Contingent loans	
	As of December 31, 2023	As of December 31, 2022

Banco Itaú Chile

As a result of the financial tensions generated by the pandemic Covid-19, the Central Bank of Chile has made available to the banks the Conditional Credit Facility to Increase Loans (FCIC) and the Liquidity Credit Line (LCL). This special financial line FCIC is guaranteed by high quality credit and/or bonds issued by the Central Bank of Chile (BCCh). They do not have a secondary market and, therefore, their value is estimated using an extension of the Hull-White model, used widely by the financial services industry. On January 31, 2022, the Bank has renewed the maturity of the LCL line for two additional years, thus converting this facility into FCIC.

On November 2, 2022, the BCCH informed the Chilean banking industry that in order to facilitate the orderly maturity process of the FCIC, the Central Bank's Board has established a program for the standardization of eligible collateral, consisting of the replacement of the current stock of pledged loan portfolio with eligible instruments for the rest of the BCCh's regular liquidity operations, which include the Intraday Liquidity Facility (FLI), the Permanent Liquidity Facility (FPL) and REPOS.

This standardization program began on January 26, 2023, reducing the collateralization of the pledged loan portfolio at a rate of 1/18 per month.

As of December 31, 2023, the Bank has pledged loans for the use of FCIC provided by the BCCH, the outstanding principal of the pledged loans amounts to a total of MCh\$924,267 (MCh\$2,401,690 as of December 31, 2022), while the credit quality of the pledged loans varies between A1 and A4.

Through agreement No. 2,580, the Central Bank made liquidity deposits (PDL) available to guarantee the Conditional Credit Facility for Increased Loans (FCIC, for its acronym in Spanish). Banco Itaú on November 30, 2023 began operating with them.

Additionally, the Bank has pledged as collateral, financial instruments classified in the portfolio at fair value through other comprehensive income for an amount of MCh\$2,412,089 (MCh\$1,372,525 as of December 31, 2022).

Itaú Corredores de Seguros Limitada

In order to comply with Article 58, letter d) of the Chilean Decree with Force of Law ("DFL") 251 of 1930, which states that, "Insurance brokers, in order to conduct business, must comply with the requirement of contracting insurance policies as determined by the Financial Market Commission, in order to correctly and fully comply with the obligations arising from its activities and especially regarding damages that may be incurred by insured parties taking policies through the brokerage house," the subsidiary has renewed the following insurance policies:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Consorcio Nacional de Seguros S.A	15-04-2023	14-04-2024	60.000 and 500	Itaú Corredores de Seguros Ltda.

Note 29 – Contingencies and Commitments, continued

Itaú Corredores de Bolsa Limitada

In order to comply with articles 30 and 31 of Chilean Law 18,045, this subsidiary kept a bank guarantee certificate with the Chilean Electronic Stock Exchange and Santiago Stock Exchange, to ensure the correct and complete fulfillment of its obligations as stockbroker. The beneficiaries are the current or future creditors that the subsidiary has or will have derived from its transactions:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Mapfre Compañía de Seguros S.A	04-22-2022	04-22-2024	16,000	Bolsa Electrónica de Chile
Mapfre Compañía de Seguros S.A	04-22-2022	04-22-2024	4,000	Bolsa de Comercio de Santiago

In addition, the Company has contracted a comprehensive insurance policy to provide for possible situations of operational fidelity. The detail of the comprehensive insurance policy is as follows:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Orion Seguros Generales S.A.	12-19-2023	12-19-2024	5,000 and 10,000	Bolsa Electrónica de Chile

The Company recorded a lien on the shares of the Santiago Stock Exchange in favor of the Santiago Stock Exchange to guarantee compliance with the obligations with respect to the transactions carried out with other brokers. The amount is MCh\$6,737 as of December 31, 2023 (MCh\$326 as of December 31, 2022).

The Brokerage Firm is registered in the Registry of Portfolio Administrators since November 22, 2017, for which it has constituted a guarantee through Mapfre Compañía de Seguros S.A. in the amount of UF 10,000 with maturity on June 18, 2024 as representative of the beneficiaries of the guarantee in Articles 98 and 99 of Law No. 20,172, in order to guarantee the faithful and full compliance with our Portfolio Management obligations. There are guarantees constituted of US\$100,000 equivalent to MCh\$88, to guarantee operations with foreign traders, Pershing.

As of December 31, 2023, the Brokerage Firm holds fixed income securities to guarantee transactions in the Securities Clearing and Settlement Clearing House for MCh\$6,830 (MCh\$4,773 as of December 31, 2022).

Itaú Administradora General de Fondos S.A.

During the year 2023, the Company has contracted Guarantee Bonds in order to guarantee the faithful fulfillment of the obligations of the Administrator for the administration of third party funds and the indemnification of the damages resulting from non-compliance in accordance with the provisions of Articles 12 and 13 of the Sole Law: of Funds No. 20,712.

Below are the guarantee and beneficiary forms that Itaú Administradora General de Fondos S.A. maintains in effect to date, which were required to comply with the obligations of portfolio management contracts, their committees, funds, payment of labor and social obligations with the contractor's workers:

Entity	Starting date	Term date	Amount (UF)	Beneficiary
Banco Bice	12-30-2021	07-10-2024	500	Corporación de Fomento de la Producción CORFO
Banco Bice	12-30-2021	07-10-2024	15,000	Corporación de Fomento de la Producción CORFO
Banco Bice	12-29-2023	07-10-2024	15,000	Corporación de Fomento de la Producción CORFO

Note 30 – Interest Income and Expense

This item includes accrued interest for all financial assets and liabilities, interest income and expenses whose implicit or explicit return is obtained by applying the effective interest rate method regardless of whether they are measured at fair value, as well as product rectifications as a result of accounting hedges, the foregoing is part of the income and expenses for interest that are shown in the Consolidated Statement of Income.

- a) The details of interest incomes, including the result for accounting hedge, for the years ended as of December 31, 2023 and 2022, is as follows

Regulatory equity financial instruments issued	(44,422)	(46,298)
Result of accounting hedges of interest rate risk (1)	(30,303)	82,828
Total	(1,840,475)	(1,105,943)

(1) Market adjustments are presented in this line for hedging derivatives used in liability hedges except in the case of foreign currency hedges and cash flow hedges (cross-currency), their total market adjustment is included in the resulting exchange rate.

For purposes of the Consolidated Statement of Cash Flows, the net amount of interest for years ended as of December 31, 2023 is MCh\$1,079,389 (MCh\$916,412 as of December 31, 2022).

Note 31 – Readjustment Income and Expenses

This item includes the readjustments accrued in the period for all financial assets and liabilities, income and expenses for readjustments whose implicit or explicit return is obtained by applying the effective interest rate method regardless of whether they are measured at fair value, as well as product rectifications as a result of accounting hedges, the foregoing is part of the income and expenses for readjustments that are shown in the Consolidated Financial Statements.

- a) The composition of readjustment income, including the result from accounting hedges, for the years ended as of December 31, 2023 and 2022, is as follows:

Readjustments income	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Financial assets at amortized cost		
Repurchase agreement rights and securities loans	—	—
Debt financial instruments	18,609	47,958
Interbank loans	—	—
Commercial loans	198,460	568,109
Mortgage loans	299,999	732,360
Consumer loans	62	273
Other financial instruments	5,156	10,842
Subtotal	522,286	1,359,542
Financial assets at fair value through other comprehensive income		
Debt financial instruments	9,783	25,459
Other financial instruments	—	—
Subtotal	9,783	25,459
Result of accounting hedges for the risk due to indexation to the UF (1)	(102,163)	(279,333)
Total	429,906	1,105,668

(1) Market adjustments are presented in this line for hedging derivatives used in asset hedges except in the case of foreign currency hedges and cash flow hedges (cross-currency), their total market adjustment is included in the resulting exchange rate.

Readjustment subject to suspension of recognition of income, as indicated in Note 2, is recorded in memorandum accounts until they are effectively received.

The following is a detail of the suspended indexation as of December 31, 2023 and 2022:

Incomes from readjustments	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Interbank loans	—	—
Commercial loans	4,522	7,596
Mortgage loans	2,073	10,203
Consumer loans	—	—
Total	6,595	17,799

Note 31 – Readjustment Income and Expenses, continued

- b) The detail of the readjustment expenses, including the result from accounting hedges, for the years ended as of December 31, 2023 and 2022, is as follows:

Readjustment expenses	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Financial Liabilities at Amortized Cost		
Deposits and other demand deposits	(1,345)	(3,041)
Deposits and other term deposits	(45,699)	(104,436)
Repurchase agreement obligations and securities loans	—	—
Obligations with banks	(130)	(3,977)
Debt instruments issued	(290,144)	(654,052)
Other financial obligations	(5,969)	(17,866)
Obligations from lease contracts	(47,493)	(117,351)
Result of accounting hedges of interest rate risk (1)	—	—
Total	(390,780)	(900,723)

(1) Market adjustments are presented in this line for hedging derivatives used in liability hedges except in the case of foreign currency hedges and cash flow hedges (cross-currency), their total market adjustment is included in the resulting exchange rate.

For purposes of the Consolidated Statement of Cash Flows, the net amount of interest for the years ended December 31, 2023 is MCh\$39,126 (MCh\$204,945 as of December 31, 2022).

Note 32 – Commission Income and Expense

a) Commission income

It includes the amount of all commissions accrued and received in the year, generated by business segments, except those that are an integral part of the effective interest rate of financial instruments for income from ordinary activities.

Commission income	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Commissions from prepayment of loans	7,864	4,520
Commissions from loans with letters of credit	168	212
Commissions from line of credit and checking account overdraft	4,416	3,814
Commissions from letters of credit and credit guarantees	26,820	24,134
Commissions from card services	84,666	85,082
Commissions from account management	13,977	13,157
Commissions from collections, payments and recoveries	43,807	37,667
Commissions from intermediation and securities management (Stockbrokers and/or securities agency)	4,216	3,490
Compensation from mutual funds management, investment funds or others	15,383	13,776
Insurance related to the granting of loans to individuals	39,387	43,149
Commissions from factoring services	558	463
Commissions from finance leasing operation services	32	38
Commissions from Securitizations	35	44
Commissions from financial advice	10,391	10,346
Commissions from foreign currency exchange	3,609	3,775
Commissions from student loan management	4,996	5,509
Other earned commissions (1)	73,505	13,964
Total commission income	333,830	263,140

(1) They include \$60,725 million corresponding to the recognition in result for the granting of the right of exclusive access to Cardif to the bank's distribution channels, whose implementation was completed during the month of April 2023, complying with the performance obligation.

Note 32 – Commission Income and Expense, continued

b) Commission expenses

This category includes commission expenses for the year related to the normal operations of the Bank and its subsidiaries:

Commission expense	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Commissions from card operation	(46,924)	(47,194)
Commissions from licensing the use of card brands	(2,109)	(2,169)
Other commissions from services linked to the credit and payment system with provision funds as a means of payment	—	(2,068)
Expenses from obligations of loyalty programs and merits for card clients	(24,228)	(22,188)
Commissions from securities transactions	(5,558)	(5,458)
Commissions from correspondent bank domestically and abroad	(3,181)	(3,796)
Commissions from electronic fund transfer services	(1,037)	(1,030)
Commission expenses related to loans	(1,048)	(664)
Other commissions from received services	(5,197)	(5,574)
Total commission expenses	(89,282)	(90,141)

Commissions earned on transactions with letters of credit are presented in the Consolidated Statement of Income under “Interest income and expense” and “Interest and readjustment income and expenses”.

Note 32 – Commission Income and Expense, continued

The result of financial assets or liabilities includes the amount of adjustments for changes in financial instruments, except for those attributable to interest accrued by application of the effective interest rate method of asset value adjustments, as well as the results obtained in their purchase and sale.

Financial results from exchanges, readjustment and hedging of foreign currency, including incomes from foreign currency trading, the differences derived from the conversion of monetary items in foreign currency to the functional currency and those generated by non-monetary assets in foreign currency at the time of their disposal.

c) Income and expenses from commissions generated by segment and income recognition schedule

Taxes, real estate tax and other legal charges	(44,123)	(40,167)
Real estate taxes	(376)	(341)
Municipal licenses	(1,459)	(1,535)
Other taxes other than income	(31,342)	(28,419)
Control contributions to the regulator	(10,946)	(9,872)
Other legal fees	—	—
Total	(300,764)	(298,112)

Note 39 – Depreciation and Amortization

Values corresponding to fees by concept of depreciation and amortization for the years ended as of December 31, 2023 and 2022, is as follows:

	For the years ended as of	
	December 31,	
	2023	2022
	MCh\$	MCh\$
Depreciation and amortization		
Amortization of intangible assets	(65,029)	(54,716)
Depreciation for fixed assets	(11,698)	(12,773)
Depreciation and amortizations for assets with rights to use in leases	(29,725)	(28,698)
Depreciation of other assets for investment properties	—	—
Amortization of other assets per revenue asset from ordinary activities from customer contracts	—	—
Total Depreciation and amortization	(106,452)	(96,187)

Note 40 – Impairment of non-Financial Assets

For the years ended December 31, 2023 and 2022, the detail is as follows:

	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Impairment of investments in associates	—	—
Impairment of intangible assets	(507)	—
Impairment of fixed assets	(101)	(10)
Impairment of right-of-use assets	—	—
Impairment of other assets for investment properties	—	—
Impairment of other assets for income from ordinary activities from contracts with customers	—	—
Gain on an acquisition through a business combination on highly advantageous terms	—	—
Totales	(608)	(10)

Banco Itaú Chile and its subsidiaries assess at the end of each reporting period whether there is any indication of impairment of any asset.

Cash-generating units	As of December 31,	
	2022	2022
	MCh\$	MCh\$
Chile	2,895,740	2,659,179
Colombia	840,797	660,930

Goodwill impairment test as of December 31, 2023

i. Allocation of Goodwill

The allocation of goodwill to each of the CGU identified generated in the reverse acquisition mentioned in Note 2, Summary of Significant Accounting Policies, and the movements experienced by it, are as follows:

Goodwill	Chile CGU	
	2023	2022
	MCh\$	MCh\$
Balances as of January 1,	492,512	492,512
Conversion difference	—	—
Impairment	—	—
Balances as of December 31,	492,512	492,512

ii. Methodology used by the Bank

Consistent with what was performed in previous years, the recoverable amounts of Chile CGU have been determined using the dividend discount model methodology. This methodology considers the cash flow that would be generated by dividends paid to shareholders over a perpetual projection horizon, discounted at the cost of capital at the valuation date. In this way, the economic value of equity can be estimated, using dividendflow projections derived from financial budgets and other assumptions approved by Management.

Note 40 – Impairment of non-Financial Assets, continued

During the performance of the goodwill impairment test, Management considered different sources of information, including the following:

- The existing historical information, which was reconciled considering those events judged to be one-time and non-recurring.
- Budgets approved by the Administration
- Information from external sources, such as reports from analysts, supervisors, Central Banks and press releases.
- The competitive strategy defined for the bank.
- The projected financing structure and its impact on the Bank's capital requirements and internal policy.

iii. Key assumptions used in calculating the recoverable amount

The key assumptions used in the recoverable amount calculation, defined as those to which the calculation is most sensitive, are presented below:

Key assumptions	As of December 31,	
	2023	2022
	%	%
Perpetuity rates	5.20	5.20
Projected inflation rates (1)	3.00	3.00
Discount rate	12.23	11.14
Loans growth	6.20 - 8.60	5.10 - 8.20
Solvency index limit	15.84 - 17.59	14.73 - 15.40

(1) Corresponds to the projected long-term inflation rate

• Projection and perpetuity period

For 2023, flow projections were performed for a 5-year period through 2028. After this period, a present value of cash flows is calculated for the year 2028, projected to perpetuity using Gross Domestic Product growth rates aligned with those expected for the markets in which the CGU described above operate.

For 2022, flow projections were performed for a 5-year period through 2027. After this period, a present value of cash flows is calculated for the year 2027, projected to perpetuity using Gross Domestic Product growth rates aligned with those expected for the markets in which the CGU described above operate.

• Placements and deposits

Placements were projected for the periods prior to perpetuity considering an increase in the order of 7.5% per annum for Chile. The deposit portfolio was projected in relation to the reciprocity established as a goal, both concepts aligned with market growth expectations and target market share.

Note 40 – Impairment of non-Financial Assets, continued

- **Net income**

Projected net income was estimated based on the sensitization of GDP growth and the effects of inflation with respect to the banking industry, obtaining the projected growth rate based on the product mix (consumer, mortgage and commercial loans) and on the target market share established by Management. Projected financing costs are determined primarily by the average balances of demand deposits, term deposits and other liabilities.

- **Discount rate**

The Cost of Equity (Ke) in local currency was considered as the discount rate, which was used to discount the cash flows of each CGU. This calculation considered a premium for country risk, where the CGU maintain their operations.

- **Perpetuity rate**

A perpetuity growth rate was considered in accordance with the rates observed in the market where each CGU operates. Consequently, they were determined considering local inflation and nominal GDP growth projections.

- **Payment of dividends**

Dividend payments were performed by maximizing the shareholder cash flows, taking as a restriction that the solvency rate (ratio of effective equity to risk-weighted assets) should not be below the limits required by the regulatory entities. Thus, a dividend of 30% in 2024, 40% in 2025 and 50% between 2026 and 2028, and 55% in perpetuity.

iv. Result of the assessment

As a result of the impairment assessment process previously described, Management concludes that the recoverable amounts and carrying amounts of the CGU as of December 31, 2023 and 2022 are as follows:

Key assumptions	As of December 31,	
	2023	2022
	%	%
Recoverable amount / Carrying amount	111.78	122.85

The recoverable amount for each CGU corresponds to the value in use, since it is the higher of fair value less costs to sell and value in use.

As of December 31, 2023, Management has identified no impairment charge to be recognized in these Consolidated Financial Statements.

Note 40 – Impairment of non-Financial Assets, continued

v. Reconciliation of pre- tax tax and after- rates

The Bank has used the cost of equity (Ke) rate as the discount rate in its calculation of the recoverable amount, which is an observable after-tax rate. The following table shows the effect of considering the pre-tax cash flows and discount rate.

	As of December 31,	
	2023	2022
	%	%
Discount rate	13.57	12.37
Recoverable amount / Carrying value	137.11	139.68

Note 41 – Credit Loss Expenses

a) Summary of credit loss expense for the years ended as of December 31, 2023 and 2022, is as follows:

Summary of credit loss in the year	For the years ended as of December 31,	
	2023	2022
	MCh\$	MCh\$
Expense of provisions constituted for loan credit risk	(430,911)	(322,060)

- (1) As informed by a Material Event dated July 14, 2022, on June 3, 2022, Itaú CorpBanca, Itaú Unibanco Holding S.A., CorpGroup Interhold SpA, Inversiones Gasa Limitada and other entities related to CG Banking entered into a "Termination Letter", in order to terminate, among others, the Transaction Agreement entered into by and between the same parties on January 29, 2014, as amended on June 2, 2015 and on January 20, 2017 (the "Transaction Agreement" or the "TA"), The Termination Letter took effect on July 14, 2022.

Note 43 – Related Party Disclosures, continued

The Termination Letter contained, among other things, the following agreements:

- The termination, effective December 31, 2022, of the technical and professional advisory agreements entered into with Inversiones CorpGroup Interhold Ltda, (formerly CorpGroup Interhold S.A.) on July 6, 2001 (as amended on January 27, 2014 and on October 30, 2015), with Inversiones CorpGroup Interhold Ltda, (formerly CorpGroup Interhold S.A.) on April 10, 2008 (as amended on January 27, 2014) and with CorpGroup Holding Inversiones Limitada on March 27, 2012 (as amended on January 27, 2014 and on October 30, 2015).

Note 44 – Fair Value of Financial Assets and Liabilities

This disclosure was prepared based on the application of the local regulatory guidelines stated in Chapter 7-12 “Fair value of financial instruments” of the CMF and IFRS 13 “Fair value measurement”. These standards have been applied to both financial assets and non-financial assets measured at fair value (recurrent and non-recurring).

The following section details the main guidelines and definitions used by the Group:

Fair value. The price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The transaction is carried out in the principal or most advantageous market and is not forced, that is, it does not consider factors specific to the Group that may influence a real transaction.

Market participants. Buyers and sellers in the principal (or most advantageous) market for the asset or liability that have all of the following characteristics:

- a) They are independent of each other, i.e. they are not related parties as defined in IAS 24 “Related Party Disclosures”, although the price in a related party transaction may be used as an input to a fair value measurement if the entity has evidence that the transaction was entered into at market terms.
- b) They are knowledgeable, having a reasonable understanding about the asset or liability and the transaction using all available information, including information that might be obtained through due diligence efforts that are usual and customary.
- c) They are able to enter into a transaction for the asset or liability.
- d) They are willing to enter into a transaction for the asset or liability i.e. they are motivated, but not forced or otherwise compelled, to do so.

Fair value measurement. When measuring fair value, the Group takes into account the same characteristics of the asset or liability that market participants would consider in pricing that asset or liability on the measurement date.

Aspects of the transaction. A fair value measurement assumes that the asset or liability is exchanged in an orderly transaction between market participants to sell the asset or transfer the liability at the measurement date under current market conditions. The measurement assumes that the transaction to sell the asset or transfer the liability takes place: (a) on the principal market for the asset or liability; or (b) in the absence of a principal market, on the most advantageous market for the asset.

Market participants. The fair value measurement measures the fair value of the asset or liability using the assumptions that the market participants would use in pricing the asset or liability, assuming that the participants act in their best economic interest.

Prices. Fair value is the price that will be received for the sale of an asset or paid for the transfer of a liability in an orderly transaction on the main (or most advantageous) market as of the measurement date under current market conditions (i.e. Starting price) regardless of whether that price is directly observable or estimated using another valuation technique.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Highest and best use of non-financial assets. The fair value measurement of these assets takes into account the market participant's ability to generate economic benefits through the highest and best use of the asset or through the sale of the asset to another market participant that would maximize the value of the asset.

Bank's own liabilities and equity instruments. The fair value measurement assumes that these items are transferred to a market participant on the date of measurement. The transfer of these items assumes that:

- a) A liability would remain outstanding and the market participant transferee would be required to fulfill the obligation. The liability would not be settled with the counterparty or otherwise extinguished on the measurement date.
- b) An entity's own equity instrument would remain outstanding and the market participant transferee would take on the rights and responsibilities associated with the instrument. The instrument would not be canceled or otherwise extinguished on the measurement date.

Default risk. The fair value of a liability reflects the effect of the default risk. This risk includes, but is not limited to, the entity's own credit risk. This risk is assumed to be the same before and after the liability is transferred.

Initial recognition. When an asset is acquired or a liability assumed in an exchange transaction involving that asset or liability, the transaction price is the price paid to acquire the asset or received to assume the liability (the entry price). In contrast, the fair value of the asset or liability is the price received to sell the asset or paid to transfer the liability (the exit price). Entities do not necessarily sell assets at the prices paid to acquire them. Likewise, they do not necessarily transfer liabilities at the price received to assume them.

Valuation techniques. The Bank will use techniques that are appropriate for the circumstances and for which sufficient data is available to measure the fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. In this sense, the following approaches stand out, being the first two the most used by the group:

- a) **Market approach** Uses prices and other relevant information generated by market transactions involving identical or comparable assets, liabilities, or a group of assets and liabilities.
- b) **Income approach.** Converts future amounts for example cash flows or income and expenses to a single current (discounted) amount, reflecting current market expectations about those future amounts. The fair value measurement is determined based on the value indicated by the current market expectations about those future amounts.
- c) **Cost approach** Reflects the amount that would be required currently to replace the service capacity of an asset (current replacement cost).

Present value techniques. Technique to adjust the discount rate and expected cash flows (expected present value). The present value technique used to measure the fair value will depend on the specific facts and circumstances of the asset or liability being measured and the availability of sufficient data.

Components of the present value measurement. Present value is the tool used to link future amounts (e.g. cash flows or values) to a present amount using a discount rate. A fair value measurement of an asset or a liability using a present value technique captures all the following elements from the perspective of market participants at the measurement date:

- a) An estimate of future cash flows for the asset or liability being measured.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

- b) Expectations about possible variations in the amount and timing of the cash flows representing the uncertainty inherent in the cash flows.
- c) The temporary value of money, represented by the rate on risk-free monetary assets that have expiration dates or duration that coincides with the period covered by the cash flows and do not raise uncertainty in the temporary distribution or risk of default for the holder (that is, risk-free interest rate).
- d) The price to bear the uncertainty inherent in the cash flows (i.e., a risk premium).
- e) Other factors that market participants would take into account in these circumstances.
- f) For a liability, the default risk related to that liability, including the entity's own credit risk (i.e. the debtor's).

Fair value hierarchy. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets and liabilities (Level 1 inputs) and lowest priority to unobservable inputs (Level 3 inputs). Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Determination of fair value

The following is a summary of the fair values of the main financial assets and liabilities as of December 31, 2023 and 2022, including those that are not presented at fair value in the Consolidated Statement of Financial Position.

	As of December 31, 2023		
	Carrying	Estimated fair value	
	amount value	Recurrent (a)	Non recurrent (b)
	MCh\$	MCh\$	MCh\$
ASSETS			
Cash and deposits in banks	2,457,793	—	2,457,793

(a) Correspond to assets and liabilities that are measured and recognized at fair value in the financial statements.

(b) Correspond to assets and liabilities that are measured and recognized on a basis other than fair value in the financial statements. The fair values presented here are for disclosure purposes only and have no impact on the balances in the financial statements.

(1) As of December 31, 2022, the fair value estimated on a non-recurring basis in this item was disclosed an amount of MCh\$1,162,425 and should have been disclosed an amount of MCh\$1,074,771.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

In addition, the fair value estimates presented above do not attempt to estimate the value of the Group's profits generated by its business, nor future business activities, and, therefore, do not represent the value of the Group as a going concern.

The following section describes the methods used to estimate fair value:

a) Measurement of the fair value of assets and liabilities for disclosure purposes (Non-recurring)

Cash, short-term assets and short-term liabilities

The fair value of these items approximates their book value given their short-term nature. These items include:

- Cash and deposits in Banks
- Cash in the process of collection
- Financial instruments at fair value through profit or loss
- Demand deposits and other demand obligations
- Other financial obligations

Loans

The fair value of loans is determined using a discounted cash flow analysis. In the case of mortgage loans and consumer loans, the cash flows were discounted by using the effective average placement rate of the last month of the reporting period for each type of product. The fair value of commercial loans is determined using a discounted cash flow analysis, using a risk-free interest rate adjusted for expected losses from debtors based on their credit quality. The credit risk adjustment is based on variables observable in the market and the Group's policies for qualitative and quantitative credit risk methodologies.

This methodology was applied to:

- Interbank loans
- Loans and accounts receivable from customers

Financial instruments at amortized cost

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Medium and long-term liabilities

The fair value of medium and long-term liabilities is determined using a discounted cash flow analysis, using an interest rate curve that reflects current market conditions at which the entity's debt instruments are traded. Medium and long-term liabilities include:

- Term deposits and other term loans
- Interbank borrowings
- Debt instruments issued

b) Value Measurement of financial assets and liabilities for recording purposes (recurring)

Financial instruments

The estimated fair value of these financial instruments is determined using quotes and transactions observed in the main market for identical instruments, or in their absence, for similar instruments. Fair value estimates of debt instruments or securities representative of debt take into account additional variables and inputs to the extent that they apply, including estimates of prepayment rates and the credit risk of issuers. These financial instruments are classified as follows:

- Financial instruments held for trading at fair value through profit or loss
- Financial instruments at fair value with changes in other comprehensive income

Financial derivative contracts

The estimated fair value of derivative instruments is calculated using prices quoted in the market for financial instruments with similar characteristics. The methodology recognizes the credit risk of each counterparty. The adjustment is known internationally as counterparty risk adjustment, which is composed of CVA (Credit Value Adjustment) and DVA (Debit Value Adjustment), the sum of both risk adjustments the effective counterparty risk that must be recognized. This adjustment is periodically recorded in the Financial Statements.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

As of December 30, 2023, the portfolio of derivative contracts both in Chile and Colombia have an accumulate net effect of MCh\$(4,229) (MCh\$(4,782) as of December 31, 2022)

c) Fair value hierarchy

IFRS 13 establishes a fair value hierarchy that classifies assets and liabilities based on the characteristics of the data that the technique requires for its valuation:

- Level 1

Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Entity can access at the measurement date. The inputs needed to value the instruments in this category are available daily and used directly.

In the case of Currency, Shares and Mutual funds, prices are observed directly in over-the-counter markets and the Stock Exchange. These prices correspond to the values at which the exact same assets are traded. As a result, the portfolio valuation does not require assumptions or models of any type.

For instruments issued by the Chilean Central Bank and the Chilean Treasury, benchmark prices are used. Benchmark prices are defined using similar durations, type of currency and are traded the equivalent of every day. The valuation of these instruments is identical to the valuation of the Santiago Stock Exchange, which is a standard international methodology. This methodology uses the internal rate of return to discount the instrument's cash flows.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

Level 2

The specific instrument does not have daily quotes. However, similar instruments can be observed (e.g. same issuer, different maturity; or different issuer, same maturity and risk rating). In general, they are diverse combinations of pseudo-arbitration. Although the inputs are not directly observable, observable inputs are available with the needed periodicity.

In this category, instruments are valued by discounting contractual cash flows based on a zero-coupon curve determined through the price of instruments with similar characteristics and a similar issuer risk. The income approach is used, which converts future amounts to present amounts.

For derivative instruments within this category, quotes from other-the-counter transactions reported by the most important brokers in the Chilean market and the Bloomberg platform are used. The inputs observed include forward prices, interest rates and volatilities. Based on these inputs, market curves are modeled. They are a numerical representation of the opportunity costs of the instrument's cash flows or the price volatility of an asset. Finally, cash flows are discounted.

The Black and Scholes model is used for options based on prices of brokers in the OTC market. For money market instruments, prices of transactions on the Santiago Stock Exchange are observed and used to model market curves.

For corporate or bank bonds, given the lack of market depth, the Bank uses transactions (if any) in the Chilean market, on foreign markets, zero-coupon curves of risk-free instruments, adjustment curves, spread modeling, correlation with similar financial instruments, etc. and gives market curves as the final result. These market curves are provided by a pricing supplier and are widely accepted by the market and its regulators.

- Level 3

This is used when prices, data or necessary inputs are not directly or indirectly observable for similar instruments for the asset or liability as of the valuation date. These fair value valuation models are subjective in nature. Therefore, they base their estimate of prices on a series of assumptions that are widely accepted by the market.

Due to the lack of liquidity in the basis of the active banking rate (TAB) over the chamber rate (camera), the price is not observable and, therefore, models must be used to estimate the future cash flows of the contract. This spread is calculated on a historical basis using the IRS with the greatest market depth, which is the chamber swap.

In addition, the Bank offers American forwards to meet its customers' needs. They do not have a secondary market and, therefore, their value is estimated using an extension of the Hull-White model, used widely by the financial services industry.

With respect to financial assets, a negotiation is not required, mandatorily valued at fair value with changes in results, the valuation is made based on the determination of a rate that allows obtaining the fair value based on market references:

Note 44 – Fair Value of Financial Assets and Liabilities, continued

- Determining an average rate from “Comparable Instruments” according to the rating of the issuer and term of the instrument.
- Decomposing the rate into a risk-free base observable in the market and a spread that represents the credit risk of the issuer.

The periodic valuation of the instrument is carried out based on the value of the risk-free rate of each day plus the determined credit spread.

The table below summarizes the impacts on the portfolio of a recalibration of the models based on a stress scenario, recalibrating parameters with the shock incorporated.

Impact calibration	As of December 31, 2023

e) Disclosures Regarding Level 3 Assets and Liabilities

Level 3 assets and liabilities are valued using techniques that require inputs that are not observable on the market, for which the income approach is used to convert future amounts to present amounts.

This category includes:

- Financial derivative instruments indexed to the TAB rate, this rate is comprised of an interbank rate and a liquidity premium charged to financial institutions and is determined using a short-rate model with mean reversion.
- American forward options.
- Financial assets whose contractual cash flows have not met the conditions of the SPPI test.
- Corporate bond whose data are not observable in the market.

As none of these products has a market, the Bank uses financial engineering valuation techniques that use unobservable variables.

These techniques use as transaction prices from the main financial instrument markets and assumptions that are widely accepted by the financial services industry. Using this information, unobservable variables are constructed such as: adjustment curves, spreads, volatilities and other variables necessary for the valuation. Lastly, all of the models are subject to internal contrasts by independent areas and have been reviewed by internal auditors and regulators.

Note 44 – Fair Value of Financial Assets and Liabilities, continued

None of these products generate significant impacts on the Bank's results as a result of recalibration. The American forward is only offered for the US dollar-Chilean peso market and until now, given the important differential between these interest rates, the product behaves like a traditional forward. The TAB swap does not have significant impacts on the valuation as the modeled liquidity premiums have a quick mean reversion for the short part and low volatility for the long part, concentrating on the book's sensitivity in the longest part of the curve.

The following table presents a reconciliation of assets and liabilities that are measured at fair value on a recurring basis as of December 31, 2023 and 2022.

Reconciliation level 3	As of December 31, 2023

Note 47 – Risk Management

The Bank and its subsidiaries, through their activity, are exposed to several types of risk mainly related to loans portfolio and financial instruments. Risk management policies are established in order to identify and analyze the risks faced by the Bank, establish adequate limits and controls, monitor risks and comply with limits. Risk management policies and risk management structures are periodically reviewed to reflect changes in the institution's activities. The Bank, through its rules and procedures, intends to develop an adequate control environment, in which all employees understand their functions and responsibilities.

The main activities and policies of the Bank in terms of risk management are described below.

(A) Risk Management Structure

(i) Board of Directors

In the Bank and its Subsidiaries, the Board of Directors plays a prominent role in corporate governance. It is responsible for establishing and monitoring the Bank's risk management structure, for which it has a corporate governance system aligned with international best practices and Chilean regulations, mainly from the CMF. One of its main functions is to ensure the existence of measures that allow senior management to be supervised, evaluated and guided so that their actions are in line with best practices and defined levels of risk appetite. To this end, a governance structure has been created made up of various committees and internal standards. These committees and standards establish behavioral guidelines for the Bank's employees and help them perform their functions related to risk control and management.

(ii) Audit Committee

The Audit Committee is responsible for monitoring the control environment and the effectiveness and efficiency of the company's internal control systems as well as the compliance with regulations and internal standards, including oversight of the internal audit unit. The Audit Committee is also responsible for proposing to the Directors' Committee a list of external auditors and risk rating agencies for the Bank and subsidiaries. In addition, the Audit Committee shall be responsible for supervising the different aspects that have to do with the maintenance, application and operation of the Bank's internal controls, and shall be responsible also for closely monitoring compliance with the standards and procedures that govern its practice. It must also have a clear understanding of the risks that the Bank's business may pose to the institution and their mitigation.

To establish a link with the Audit Committee, the Board of Directors will appoint at least two of its members to this Committee. These members must inform the Board of Directors of the situations and facts the Committee is dealing with, thus committing the responsibility of the Bank's directors, both in self-control policies that are established and practiced by the institution, as well as in the compliance with the legal and regulatory standards to which the Bank is subject.

The Audit Committee must reinforce and support both the role of the Bank's Internal Audit (also called Internal Comptroller in the CMF regulations) and its independence from management, and act as a liaison and coordinator of the tasks between the internal audit and the external auditors, acting as a liaison between the latter and the Bank's Board of Directors.

Note 47 – Risk Management, continued

(iii) Director's Committee

The purpose of the Director's Committee is to make the self-regulation of the Bank and other entities within the scope of its competence stronger, thus making the performance of the Board of Directors more efficient by incorporating greater oversight over the activities carried out by management.

It will also be responsible for adopting the necessary resolutions to protect shareholders, especially minority shareholders, examining executive compensation systems and approving related party transactions.

In its role as overseer of corporate activity, the Directors' Committee must inform the market in the event of violations or major corporate events, as well as transactions that the company carries out with parties related to the controlling shareholder or takeovers in any form.

(iv) Integral Risk Management Committee

The objective of this Committee is to propose, and support the Board of Directors in, the definition of the risk appetite and the general policy framework that allows an adequate alignment with the Bank's global strategy. Oversee the correct identification, measurement and control of all risks, allocate capital to identified risks and meet regulatory requirements.

(v) Financial Management and Market Higher Commission (ALCO)

After the Board of Directors and its specialized committees, the Financial Management and Market Higher Commission (hereinafter, also "ALCO") is the highest body involved in the management of the institution's financial policies.

The main objective of the Commission is to follow the financial guidelines established by the Board of Directors. In this regard, it must approve and supervise the financial strategies that guide the Bank in terms of the composition of its assets and liabilities, cash inflows and outflows, and transactions with financial instruments.

It must ponder the various alternatives available to make decisions that ensure the highest and most sustainable profitability with financial risk levels compatible with the business, current regulations and internal standards.

(vi) Anti-Money Laundering Committee Superior (AML)

The main purpose of this Committee is to plan and coordinate the activities of compliance with the policies and procedures for anti-money laundering and prevention of funding of terrorism, to pay attention to the work carried out by the Compliance Officer, in accordance with the applicable regulations in force, as well as to adopt agreements aimed at obtaining improvements to the prevention and control measures proposed by the Compliance Officer.

Note 47 – Risk Management, continued

(vii) Operational Risk Higher Commission

The purpose of this Commission is to identify, understand and evaluate the risks involved in the Bank's processes and businesses and to define operational risk management guidelines for the Bank and evaluate the results of the audit and compliance systems. It is also responsible for defining the operational risk management framework and the structure and policies for the identification, measurement, evaluation and monitoring of risk and business continuity. In addition, it reviews the follow-up and adequacy of regulatory commitments and emerging regulations.

Evaluate the status of critical processes that are directly related to the Bank's operational risk, according to the current regulations of the Financial Market Commission, in order to detect and correct the deficiencies that may be affecting the Bank and ensure proper implementation of regulatory changes.

The goal is to ensure that critical processes run under a control environment that allows the Bank to operate with stability and consistency, achieving the objectives consisting in confidentiality, integrity and availability of information resources.

(viii) Ethics and Compliance Higher Commission

The main purpose of this Commission is to define, promote and ensure high standards of professional and personal excellence in the behavior of all Banco Itaú Chile employees, its local subsidiaries, and the representation office in Peru (the "Representation Office"). This Commission must always be guided by corporate principles and values that reflect Banco Itaú Chile's vision, philosophy and good business practices.

The Commission must evaluate, and make decisions on, issues of conduct and ethics in business and operations. Monitor and examine compliance with policies and procedures related to the ethical conduct of the Bank's employees and suppliers.

Also, ensure the application of the Regulatory Compliance Model within the framework of the definitions established by this Commission; pay attention to the work performed by the Compliance Officer and the AML in these matters; and make agreements to obtain improvements to the control measures proposed by the Compliance Officer.

The Commission must promote, and may request, information from the international units, through the Compliance & AML Sub-Management, on the matters discussed herein, in order to align the ethical and regulatory standards across the Banco Itaú Chile Group entities.

(ix) Capital Management Higher Commission

The Senior Capital Management Higher Commission was created to assist the Board of Directors and the Bank's management in the evaluation and management of market and liquidity risks, earnings, and capital adequacy, in accordance with the economic principles and standards established in local regulations, and in Basel I, II and III as applicable, in order to provide oversight and management of market and liquidity risks, accounting management and capital principles, to review the effectiveness of risk and capital policies and limits, and to review compliance with risk, liquidity and capital policies and procedures in the company.

Note 47 – Risk Management, continued

(x) Credit Higher Commission

The purpose of this Commission is to resolve the transactions and matters submitted to its knowledge, under the defined limits and procedures, ensuring the application of and compliance with the current credit risk policies defined by Banco Itaú Chile (the “Bank”).

(xi) Wholesale Credit Higher Commission

The objective of the Wholesale Credit Commission is to monitor the evolution of the Bank's wholesale portfolios in terms of their risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. Analyze the behavior of the wholesale portfolio, delinquency, cost of credit, industry or economic groups concentrations and watchlist. Evaluate debt collection management and strategy, collateral structure and market benchmarks.

Discuss and propose credit and credit appetite policies for the wholesale segment. Identify emerging portfolio risks and prioritize mitigation initiatives.

(xii) Retail Credit Higher Commission

The objective of the Higher Retail Credit Commission is to monitor the evolution of the Bank's retail portfolio in terms of its risk-return ratio, the adjustment to the risk appetite defined by the Bank and the status of progress of the short and long term strategies or instructions defined by this Commission. In this regard, the Commission must consider in its analysis the competition, the movements of the most relevant players and the main risks that may affect portfolio management, as well as the projects that have an impact on this matter.

(xiii) Model Evaluation Technical Commission

The purpose of this Commission is to analyze and propose the credit risk, financial risk and operational risk management models according to the different levels determined by the Models Policy.

(xiv) Internal Audit Corporate Management

The main function of Internal Audit is to assist the Board of Directors and Senior Management by independently evaluating the maintenance, implementation and proper operation of the Bank's internal control system, which also involves the oversight of compliance with standards and procedures.

(xv) Code of Conduct and Market Information Manual

Our clients' trust is critical to our success. Therefore, all employees and directors must strive to preserve this trust by strictly complying with the General Code of Conduct.

Note 47 – Risk Management, continued

(B) Main Risks and Requirements Affecting the Bank and its Subsidiaries:

(i) Credit Risk

Credit risk is the risk that a client or a counterparty fails to meet its contractual obligations, resulting in a financial loss for the Bank. The Bank's main income-generating activity is lending to customers, so credit risk is one of the main risks to be managed. Credit risk arises primarily from loans and advances to customers and other banks (including related loan commitments such as loan or credit card facilities), investments in debt securities and derivatives that constitute an asset position. . The Bank takes into account all the elements of exposure to credit risk, such as counterparty default risk, geographic risk and sectoral risk, for the purposes of its management.

Credit Risk Management

The Bank's credit commissions are responsible for managing the Bank's credit risk through:

- Ensure that the Bank has appropriate credit risk practices, including an effective internal control system, to systematically determine adequate provisions in accordance with the policies and procedures established by the Bank, IFRS and supervisory guidance relevant.
- Identify, assess and measure credit risk across the Bank, from an individual instrument to a portfolio level.
- Create credit policies to protect the Bank against identified risks, including the requirement to obtain guarantees from borrowers, perform a solid ongoing credit assessment of borrowers and continuously monitor exposures against internal risk limits.
- Limit concentrations of exposure by type of asset, counterparties, sector, credit rating, geographic location, etc.
- Establish a solid control framework in relation to the authorization structure for the approval and renewal of lines of credit.
- Develop and maintain the Bank's risk classification to categorize exposures according to the degree of default risk. The degrees of risk are subject to periodic review.
- Develop and maintain the Bank's processes to measure the Expected Credit Loss "ECL", including credit risk monitoring, the incorporation of prospective information and the method used to measure ECL.
- Ensure that the Bank has policies and procedures to properly maintain and validate the models used to assess and measure ECL.
- Provide advice, guidance and expertise to business units to promote best practices across the Bank in credit risk management.

Note 47 – Risk Management, continued

Maximum Exposure to Credit Risk

For financial assets recognized in the Consolidated Statements of Financial Position, exposure to credit risk is equal to their book value. For the financial guarantees granted, the maximum exposure to credit risk is the maximum amount that the Bank would have to pay if the guarantee were called.

The following table shows the Bank's maximum exposure to credit risk per financial asset as of December 31, 2023 and 2022, for different balance sheet items, including derivatives, without deducting collateral or other credit enhancements received:

Maximum credit risk exposure	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Financial assets to be traded at fair value through profit or loss		
Financial derivative contracts	2,965,161	3,617,792
Financial debt instruments	321,656	370,554
Other	44,552	47,598
Financial assets not held for trading valued mandatorily at fair value through profit or loss	39,012	53,206
Financial assets designated at fair value through profit or loss	—	—
Financial assets at fair value through other comprehensive income	4,068,664	3,575,931
Derivative financial instruments held for hedge accounting	91,105	138,548
Financial assets measured at amortized cost		
Investments under resale agreements	210,971	162,774
Financial debt instruments	2,708,960	1,181,484
Interbank loans	1,516	45,636
Loans and accounts receivable from customers - Commercial	16,713,220	16,465,960
Loans and accounts receivable from customers - Mortgage	7,535,530	7,040,103
Loans and accounts receivable from customers - Consumer	3,321,211	3,121,162
Off-Balance Sheet Assets		
Contingent loans		
Guarantees and bonds	663,698	603,177
Letters of credit for merchandise circulation operations	124,994	153,764
Transactions related to contingent events	2,044,349	1,954,387
Available lines of credit	—	—
Other loan commitments	438,680	601,476
Lines of credit of free disposal of immediate cancellation	5,351,695	4,757,552
Debt purchase commitments in local currency abroad	4,920	8,950
Other contingent loans	—	—
Total	46,649,894	43,900,054

The following is a summary of the provisions for loan losses:

	As of December 31, 2023 MCh\$	As of December 31, 2022 MCh\$
Loans and accounts receivable at amortized cost	(825,400)	(723,437)
Interbank loans	(223)	(805)
Provisions for contingent loan risks	(40,865)	(42,677)
Total provisions	(866,488)	(766,919)

Note 47 – Risk Management, continued

Note 47 – Risk Management, continued

Guarantees and Other Credit Enhancements

In order to mitigate credit risk, guarantees have been established in favor of the Bank, credit enhancements and other actions that mitigate total exposure.

The main types of guarantees provided by customers are as follows:

For loans to companies	For loans to individuals
- Agricultural land	- Mortgage
- Machinery and/or equipment	- Parcels or urban land
- Ships and maritime aircraft	- Vehicles
- Buildings for specific purposes under construction	
- Mining infrastructure	
- Inventory	
- Agricultural assets	
- Industrial assets	
- Biological assets	
- Other guarantees	

The guarantees taken by the Bank to ensure the collection of the rights reflected in its loan portfolios are mortgage-type guarantees (urban and rural properties, agricultural land, ships and aircraft, mining claims and other assets) and pledges (inventory, agricultural assets, industrial assets, plantations and other pledged assets).

The procedures used for the valuation of the guarantees are carried out in accordance with the best market practices, which include the use of appraisals in real estate guarantees, market price in stock securities, value of shares in an investment fund, etc. All collateral received must be properly legalized and registered in the corresponding registry.

On the other hand, financial derivative operations are guaranteed by guarantee agreements, which are deposited or transferred by a third party in favor of the other, these can be in cash or in financial instruments, and reduce the counter party's credit risk.

Credit limits of debtors related to the property or bank management

According to the provisions of article 84 No. 2 of the GBL and chapter 12-4 of the RAN, the Bank must bear in mind that:

- The set of credits granted to a group of related persons may not exceed 5% of the effective equity of the bank, this limit increases to 25% if what exceeds 5% corresponds to credits secured by guarantees. In no case may the total of these credits granted by a bank exceed the amount of its effective equity.
- These loans shall not be granted under more favorable terms in connection with term, interest rates or guarantees than those granted to third parties in similar transactions.

Note 47 – Risk Management, continued

- The relationship of a person with the Bank occurs when they have direct, indirect or through third party participation in the property of the Bank, participate in the management or it is presumed that there is relationship as long as sufficient background information is not presented to eliminate that presumption.

It will be understood that the same group of people related to the Bank is made up of all those natural and legal persons that can exert significant and permanent influence on the decisions of the other, there is a presumption that the credits granted to one person will be used for the benefit of another or the founded presumption that people maintain a relationship and form a unit of economic interest.

- Subsidiaries, business support companies and associates constitute companies related to a bank.
- Guarantees on movable or immovable property, or any other property legitimately susceptible of being received as collateral, constitute valid guarantees.

As of December 31, 2023 and 2022, the credit limit to debtors related to the ownership or management of the Bank according to article 84 No. 2 of the GBL and Chapter 12-4 of the RAN are the following:

	As of December 31, 2023		As of December 31, 2022	
	MCh\$	%	MCh\$	%
Global limit to groups of related people(1)	4,440,174		4,124,830	
Use of the global limit for loans granted to groups of people related to the bank	125,059	2.82	89,467	2.17

(1) Corresponds to effective equity

ii) Financial Risk

• Market Risk

Market Risk is the exposure to economic gains or losses caused by movements in prices and market variables. This risk stems from the activities of the Trading and Banking Books. In the first case, it comes from activities intended to obtain short-term gains and from the intensive use of fair value instruments. In the second case, with a more long-term vision, it stems from commercial activities with products valued at amortized cost.

The following section describes the main market risk factors to which the Bank and its subsidiaries are exposed:

• Currency Risk

Currency risk is the exposure to adverse movements in the exchange rates of currencies other than their base currency (CLP in the case of operations in Chile and COP in the case of operations in Colombia) for all those positions inside and outside of balance. The main sources of exchange risk are:

- Positions in foreign currency (MX) within the attributions of the Trading Book.
- Currency mismatches between the assets and liabilities of the Banking Book.
- Currency flow mismatches.

Note 47 – Risk Management, continued

- **Inflation and Other Indexes Adjustments Risk**

The risk of readjustment is the exposure due to changes in the units or indexes of readjustment (such as UF, UVR or others) defined in national or foreign currency, in which some of the instruments, contracts or other operations registered in the balance with such characteristics.

- **Interest Rate Risk**

Interest Rate Risk is the exposure to movements in market interest rates. Changes in market interest rates can affect both the price of instruments recorded at fair value and the financial margin and other gains from the Banking Book such as fees. Fluctuations in interest rates also affect the Bank's economic value.

Interest rate risk can be represented by sensitivities to parallel and/or non-parallel yield shifts with the effects reflected in the prices of instruments, the financial margin, equity and economic value.

The measurement of the structural interest rate risk is carried out through the representation by risk factor of the cash flows expressed in fair value, assigned on the dates of re-pricing and by currency. This methodology facilitates the detection of interest risk concentrations in the different terms.

All the balance sheet and off balance sheet items are unbundled in their flows and placed at the re-pricing/maturity. In the case of those accounts that do not have a contractual maturity, an internal model of analysis and estimation of their durations and sensitivities is used.

- **Volatility Risk**

In addition to the exposure related to the underlying asset, issuing options has other risks. These risks arise from the non-linear relationship between the gain generated by the option and the price and level of the underlying factors, as well as exposure to changes in the price volatility of the underlying asset.

- **Liquidity Risk**

Liquidity Risk is the exposure of the Bank's and its subsidiaries to events that affect their ability to meet, in a timely manner and at reasonable costs, cash payment obligations arising from maturities of time deposits that are not renewed, withdrawals from demand accounts, maturities or settlements of derivatives, liquidations of investments or any other payment obligation.

Financial institutions are exposed to funding liquidity risk that is intrinsic to the role of intermediary that they play in the economy. In general, in financial markets demand for medium or long-term financing is usually much greater than the supply of funds for those terms while short-term financing is in considerable supply. In this sense, the role of intermediary played by financial institutions, which assume the risk of satisfying the demand for medium and long-term financing by brokering short-term available funds, is essential for the economy to function properly.

Appropriately managing funding liquidity risk not only allows contractual obligations to be met in a timely manner, but also enables:

- The liquidation of positions, when it so decides, to occur without significant losses.

Note 47 – Risk Management, continued

- The commercial and treasury activities of the Bank and its subsidiaries to be financed at competitive rates.
- The Bank to avoid fines or regulatory penalties for not complying with regulations.

Regulatory measurement of adjusted liquidity mismatch

The mismatch of consolidated terms at 7, 15, and 30 days, for December 31, 2023 and 2022 is as follows:

Net position	As of December 31, 2023		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	1,328,681	1,553,443	1,729,837
Expenses	(1,094,057)	(1,416,441)	(2,029,535)
Income (expenses), net	234,624	137,002	(299,698)

Net position	As of December 31, 2022		
	7 days	15 days	30 days
	MCh\$	MCh\$	MCh\$
Foreign currency			
Income	1,838,307	1,942,514	2,249,355
Expenses	(1,582,077)	(2,007,724)	(2,675,476)
Income (expenses), net	256,230	(65,210)	(426,121)

Note 47 – Risk Management, continued

The contractual maturities (Capital plus interest) as of December 31, 2023 and 2022, are as follows:

	As of December 31, 2023							Total
	On demand	Up to 1 months	Between 1 and 3 months	More than 3 months up to 1 year	Between 1 and 3 years	Between 3 and 5 years	More than 5 years

Debt Instruments Issued	24.60	23.25
Other financial liabilities	12.60	15.54
Total	100.00	100.00

The liquidity coverage ratio as of December 31, 2023 and 2022, is as follows:

Liquidity Coverage Ratio	As of December 31, 2023	As of December 31, 2022
	%	%
NSFR	110,23	114,50
LCR	191,00	219,48

Note 47 – Risk Management, continued

Financial Risk Management

Continuous and interconnected process that originates in the first instance with the identification of the risks to which the Institution is exposed, in order to then quantify the potential impact as a result of said exposure and to limit it to the level desired by the Bank. The above implies an active monitoring of the risks, studying their temporal evolution. The risk management process can be subdivided into the following stages:

- **Financial Risks Identification**

The Financial Risk Management has a high-level technical team that constantly monitors the activities of the bank transfer and its subsidiaries in search of potential unquantified and controlled risks. In addition, the Bank Treasury as the first line of defense also plays a fundamental role in the detection of risks. Banco Itaú Chile provides a structure that facilitates this risk identification role by maintaining independence in its tasks and ensuring the active participation of management in the creation/ modification of products.

- **Quantification and Control of Exposure to Financial Risk**

Once all the risks have been identified, the Financial Risk Management is responsible for the quantification of the financial risk factors and the establishment of limits at different levels, according to the risk defined by the Board of Directors and the applicable regulations.

The Financial Risk Management proposes a framework of quantitative and qualitative limits and alerts that are reviewed and approved by the ALCO and the Board of Directors. Additionally, it periodically measures the risk incurred, develops valuation tools and models, performs periodic stress analyses, measures the degree of concentration with interbank counterparties, prepares the manual of policies and procedures, as well as monitoring authorized limits and alerts, which are reviewed at least annually.

The metrics, by type of risk, used to quantify exposures are explained below:

- **Market Risk Metrics and Limits for the Trading and Banking Portfolio**

The Bank's measures regulatory exposures in line with the standardized methodologies established by the Central Bank (Chapter III B-2 Standard of measurement and control of market risk for Banks", of the Compendium of Financial Regulations), supplemented by the CMF in Chapter 12-21 of the RAN, which correspond to the methodologies standardized by the Basel Committee to quantify the market risk exposures of the Trading and Banking Books.

The regulatory measurements of the trading book allow estimating the potential loss that the Bank could face given the fluctuations according to the shocks defined by the regulator. The regulatory limit corresponds to the sum of these risks (also called Market Risk Exposure "MRE") and 10% of the Assets Weighted by Credit Risk, a sum that cannot exceed the Bank's Effective Equity in any case.

Note 47 – Risk Management, continued

The Bank must permanently observe these limits and report them to the CMF, also reporting monthly on the consolidated risk position, including subsidiaries and branches abroad.

Below is the consumption of the regulatory market risk limit, specifically for the Trading Portfolio as of December 31, 2023 and 2022.

Limit Consumer	As of December 31,	As of December 31,
	2023	2022
	%	%
Market risk exposure (MRE)	56.20	58.66

The measurement of regulatory risk for the Banking Portfolio is used to estimate the Bank's potential losses from standardized adverse movements in interest and exchange rates.

The standardized regulatory report for the Banking Portfolio is used to estimate the Bank's potential economic losses due to standardized adverse movements in interest rates defined by the CMF. Currently, the short-term exposure limits (STE) to interest rate and indexation risk in the Banking Portfolio must not exceed 35% of the annual operating income (LTM rolling period) and the consumption of long-term limits (LTE) must be less than 20% of the Bank's regulatory capital.

The following table details the regulatory limit consumption by market risk of the Banking Book, considered as the percentage limit to be calculated based on the regulations indicated above as of December 31, 2023, while the measurement based on Chapter 12-21 of the RAN (1) is maintained for December 31, 2022.

Limit Consumer	As of December 31,	As of December 31,
	2023	2022
	%	%
Short-term exposure to interest rate risk	15.62	32.62
Long-term exposure to interest rate risk	19.37	6.45

As of December 31, 2023 and 2022, the Bank has complied with all regulatory requirements and limits, as well as with all financial covenants, such as risk-weighted capital adequacy ratio, single borrower exposure, aggregate exposure, concentration risk, equity to asset ratio, provision coverage ratio, among others.

Note 47 – Risk Management, continued

Value at Risk (VaR)

Calculation of Historical Value at Risk (Non-parametric). This measurement provides the maximum potential economic loss at a certain confidence level and a given time horizon. Historical VaR, as opposed to Statistical or Parametric VaR, is based on the observed distribution of past returns, does not need to make assumptions of probability distributions (frequently normal distribution) and, therefore, does not need a mean (assumed 0), standard deviation and correlations across returns (parameters). The Bank's uses a 99% confidence level and a time horizon of 1 day.

- Calculation of Volatility-Adjusted Historical Value at Risk (Non-parametric). This measurement is based on the above and the profit and loss vector is adjusted according to whether it is facing a period of greater or less volatility.

The Board of Directors and senior management define the limits on the Value at Risk, which is monitored on a daily basis. In turn, the measurement is subjected to retrospective tests that allow verifying that the losses actually incurred do not exceed the VaR, more than once every 100 days. The result is monitored daily to test the validity of the assumptions, hypotheses and the adequacy of the parameters and risk factors used in the calculation of the VaR.

The Bank calculates the VaR for sub-portfolios and risk factors, which allows it to quickly detect sources of risk. Since the VaR does not take into account stress scenarios, it is complemented with stress tests taking into account prospective, historical and standardized scenarios. Although the VaR is one of the most frequently used models by the local financial industry, and considering that it is a model, as such it has limitations that must be considered:

- It does not take into account the expected loss in the event that the return on the portfolio is above the confidence level defined in the VaR. That is, in the case of the Bank it does not reflect what happens in the 1% of the queue. This is mitigated with the stress measures detailed below.
- It does not consider intraday results, but only reflects the potential loss given current positions.
- It does not take into account the potential changes in the dynamics of the movements of the market variables (that is, the possible changes in the variance and covariance matrix).

Sensitivity measures

The Bank uses stress tests as a sensitivity analysis tool to control financial risk. This measurement is performed separately for the trading and banking portfolios.

The sensitivity is estimated using the DV01 indicator, which corresponds to a measure of sensitivity of the portfolio results if the zero coupon interest rate of the risk factor increases by 1 basis point (0.01%) for different maturities and in annualized terms.

In accordance with IFRS 7, it is presented an estimate of the likely, but reasonable, impact of fluctuations in interest rates, exchange rates and implied volatilities (market factors) that would affect the trading and banking portfolios.

Note 47 – Risk Management, continued

The fluctuations in market factors correspond to highly probable scenarios chosen from a set of scenarios agreed on the basis of the opinion of specialists in economics and financial risk and traders. To estimate the sensitivity, the sensitivity (DV01) and the reasonably probable scenarios are multiplied by the market factor.

Interest rate scenarios - Chile (basis points - 0.01%)

The interest rate shock scenarios on income accounting average +569 basis points in the case of the CLP chamber. An average of +412 basis points for CLF chamber and government factors (CLF y CLP) and +438 for US dollar and other currency factors -438.

In the case of interest rate shock associated with fair value accounting in other comprehensive income, this shock averages +582 basis points in the case of the CLP chamber factor, -311 basis points for CLF chamber and +402 for the rest of the yields.

Interest rate scenarios Colombia (basis points - 0.01%)

Interest rate shock scenarios on income accounting and fair value accounting in other comprehensive income average +43 basis points for all yields.

Chile exchange rate scenarios

As of December 31, 2023, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of -12.90% in the Chilean peso-US dollar parity, and -18.60% in the COP-US dollar parity.

As of December 31, 2022, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +24.75% in the Chilean peso-US dollar parity, and -7.23% in the COP-US dollar parity.

Colombia exchange rate scenarios

As of December 31, 2023, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +2.91% in the COP-US dollar parity.

As of December 31, 2022, for the exchange rate impact scenarios, both in profit or loss, fair value accounting in other comprehensive income and equity, the worst result shock would imply a change of +5.64% in the COP-US dollar parity.

Note 47 – Risk Management, continued

Impact on P&L derived from the sensitivity analysis

The following table presents the impact of the movements or reasonably probable scenarios explained above applied to the positions of the Trading Portfolio that affect the P&L (net income from financial operations, net foreign exchange gains/losses and interest margin, as applicable) as of December 31, 2023 and 2022.

Potential impact on P&L	As of December 31,	As of December 31,
	2023	2022
	MCh\$	MCh\$
CLP rate risk	(18,901)	(12,333)
Derivatives	(18,901)	(12,333)
Debt instruments	—	—
CLF rate risk	(4,940)	(3,648)
Derivatives	(4,940)	(3,648)
Debt instruments	—	—
COP rate risk	3,623	12,267
Derivatives	3,623	12,267
Debt instruments	—	—
UVR rate risk	—	8
Derivatives	—	8
Debt instruments	—	—
USD rate risk	(10,835)	(4,203)
Risk rate other currencies	(825)	(35)
Total rate risk	(31,878)	(7,944)
Exchange rate risk	3,415	(1,626)
Risk options	(4)	3
Total impact	(28,467)	(9,567)

Note 47 – Risk Management, continued

The impact on the margin of reasonably possible movements or scenarios on positions in the Accrual accounting banking book at the end of December 31, 2023 and 2022 is presented below.

Potential Impact on Accrual Accounting	As of December 31, 2023	As of December 31, 2022
	MCh\$	MCh\$
Interest rate shock sensitivity impact	(1,221)	10,488

The impact on the Banking Book does not necessarily mean a gain/loss but it does mean smaller/larger net income from the generation of funds (net funding income, which is the net interest from the accrual portfolio) for the next 12 months.

Impact on net equity derived from the sensitivity analysis

As well as the effects on profit and loss of positions carried at fair value and at amortized cost, variations in market factors due to reasonably possible movements in interest rates and exchange rates also generate impacts on the equity accounts as a result of the possible variation in the market value of the investment portfolio at fair value/available-for-sale instruments and of the cash flow hedge and net foreign investment portfolios, which are presented in the following table:

Potential impact on FVTOCI	Potential impact on FVTOCI					
	As of December 31, 2023			As of December 31, 2022		
	DV01 (+1 bp)	Impact of interest change intereses		DV01 (+1 bp)	Impact of interest change intereses	
	USD	MUSD	MCh\$	USD	MUSD	MCh\$
CLP	(237,261)	(165.57)	(146,659)	(82,235)	(12.43)	(10,635)
CLF	(85,277)	(113.20)	(100,274)	38,676	(9.30)	(7,958)
COP	(139,792)	(6.69)	(5,916)	(25,265)	(4.15)	(4,186)
UVR	—	—	—	(25,947)	(2.53)	(2,553)
USD	(32,043)	(9.76)	(8,348)	(68,562)	(5.94)	(5,032)
Other	—	—	—	—	—	—
Total impact of interest rates	(494,373)	(295.22)	(261,197)	(163,333)	(34.35)	(30,364)

Exchange rate	Impact due to changes in prices			
	As of December 31, 2023		As of December 31, 2022	
	US\$	MCh\$	US\$	MCh\$
USD	(19.20)	(17,012)	(31.19)	(26,689)
COP	(109.68)	(97,158)	(36.71)	(31,419)
Total exchange rate risk	(128.88)	(114,170)	(67.90)	(58,108)
Total impact	(424.10)	(375,367)	(102.25)	(88,472)

Note 47 – Risk Management, continued

Hedge

The Bank uses a variety of hedging strategies and instruments to manage the risks generated in the trading book and bank. In the case where the hedging instrument is subject to an accounting treatment different from the exposure of the underlying object of coverage, the Bank may use the accounting hedge treatment to eliminate the accounting asymmetries that could generate undue volatility in the results and/or Bank assets.

The use of accounting hedges is subject to the limits defined by the Board of Directors, to the definitions of the Financial Management and Market Higher Commission (ALCO) and to the Hedging Policy.

The Treasury is responsible for designing and implementing the strategies, the Financial Risk Management is responsible for measuring and monitoring the effectiveness of the hedges, generating effectiveness indicators that are constantly monitored, and the Financial Control Management is responsible for qualifying adequate regulatory compliance. In the case of accounting hedges (For more details on accounting hedge strategies, review Note 12 “Derivative contracts for accounting hedges”).

Operational Risk

The Bank and its subsidiaries define operational risk as the possibility of occurrence of losses resulting from failures, deficiencies or inadequacies in internal processes, people, and systems or external events, including in this definition the legal risk and excluding strategic risks and reputation. Operational risk is recognized as a manageable risk, for which it has defined a function in charge of this task within its corporate structure.

The Bank adopts a model of three lines of defense as the primary way to implement its operational risk management structure, internal controls and compliance, ensuring compliance with corporate guidelines.

The defense lines are composed by; the business and support areas (first line of defense) responsible for managing the risks related to their processes; Operational Risk, Internal Control, and the area of AML and Compliance (second line of defense) area in charge of supporting the first line of defense in relation to the fulfillment of its direct responsibilities; and Internal Audit function (third line of defense) responsible for verifying, independently and periodically, the adequacy of the risk identification and management processes and procedures, in accordance with the guidelines established in the Internal Audit Policy and submitting the results of its recommendations for improvement to the Audit Committee.

The risk management program contemplates that all relevant risk issues must be reported to the higher levels and to the Operational Risk Higher Commission.

Our methodology consists in the evaluation of the risks and controls of a business from a broad perspective and includes a plan to monitor the effectiveness of such controls and the identification of eventual weaknesses. The main objectives of the Bank and its subsidiaries in terms of operational risk management are the following:

- Identification, evaluation, information, management, and monitoring of the operational risk in connection with activities, products, and processes carried out or commercialized by the Bank and its subsidiaries;

Note 47 – Risk Management, continued

- Build a strong culture of operational risk management and internal controls, with clearly defined and adequately segregated responsibilities between business and support functions;
- Generate effective internal reports in connection with issues related to operational risk management, with a clearly defined escalation protocol;
- Control the design and application of effective plans to deal with contingencies that ensure business continuity and losses control.

Regarding training and awareness, the risk culture continues to be reinforced through face-to-face training in the field of operational risk, internal control, prevention of external and internal fraud, and the implementation of the annual "more security" program for all collaborators and induction programs for new employees.

Finally, it is worth mentioning that Sarbanes-Oxley methodologies (SOX) continue to be applied for their main products and processes, the application of this methodology is annually certified by an external consultant.

Below are the net losses for the year due to operational risk events as of December 31, 2023 and 2022:

	As of December 31, 2023		
	Gross loss in the year due to operational risk events	Recovery of Gross loss in the year due to operational risk events	Exposure to net loss
Internal fraud	147	—	147
External fraud	9,492	3,406	6,086
Labor practices and safety in the business	1,301	570	731
Customers, products and business practices	7	—	7
Damage to physical assets	304	—	304
Business interruption and system failures	1,228	487	741
Execution, delivery and process management	1,634	408	1,226
Total	14,113	4,871	9,242

	As of December 31, 2022		
	Gross loss in the year due to operational risk events	Recovery of Gross loss in the year due to operational risk events	Exposure to net loss
Internal fraud	3,402	—	3,402
External fraud	10,108	2,763	7,345
Labor practices and safety in the business	772	64	708
Customers, products and business practices	15	—	15
Damage to physical assets	95	—	95
Business interruption and system failures	296	1	295
Execution, delivery and process management	4,409	289	4,120
Total	19,097	3,117	15,980

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators

The primary objectives of the Bank's capital management are to ensure compliance with regulatory requirements, maintain a strong credit rating and healthy capital ratios. During the years ended as of December 31, 2023 and 2022, the Bank has fully complied with the capital requirements.

In January 2019, Law No. 21,130 was issued, which modernizes the banking legislation with the objective of implementing the practices promoted at international level by the Basel III agreement, introducing amendments to the General Banking Law (hereinafter "GBL"). In order to implement the standards, the Financial Market Commission initiated the regulatory process for their implementation by incorporating amendments and new chapters to the Updated Compilation of Standards (hereinafter "RAN").

The application of the regulatory adjustments and exclusions from the capital base will be gradual, in accordance with the transitional provisions of Chapter 21-1, starting with a 15% discount on December 1, 2022, rising to 30% as of December 1, 2024, to 65% as of December 1, 2024, and reaching 100% as of December 1, 2025.

Assets are weighted according to risk categories as established in Chapter 21-6 "Determination of assets weighted by credit risk", Chapter 21-7 "Determination of assets weighted by market risk" and Chapter 21-8 "Standardized methodology for the computation of assets weighted by operational risk".

All derivative instruments traded outside of stock exchanges are considered in the determination of risk assets with a conversion factor on the notional values, thus obtaining the amount of exposure to credit risk (or "credit equivalent"). Off-balance sheet contingent credits are also considered as "credit equivalent" for their weighting, in accordance with the provisions of Chapter 21-6 of the RAN.

Regarding its implementation, the new regulation for solvency measurement purposes and regulatory minimum requirements will be effective as of December 1, 2021 and will be implemented gradually until it is fully established as of December 1, 2025.

In December 2022, the additional capital requirement to which Banco Itaú was subject under the transitory provisions of RAN 12-14 "Application of Article 35 BIS of the General Banking Law (GBL)" was repealed, due to its merger. Within this regulation, the regulatory body had determined that the bank should consider an additional capital of 2.0%.

Finally, on March 30, 2022, the Financial Market Commission informed the Bank of the result obtained in its annual review, in order to qualify the quality of a systemic bank at the local level. The Board of the CMF, with the prior favorable agreement of the Central Bank of Chile, determined to maintain Banco Itaú Chile's rating as systemically important, determining in this regard a basic capital requirement on risk-weighted assets of 1%, in addition to the general minimum requirement of the article 66 of the GBL. As indicated in Chapter 21-1 of the RAN and the fifth transitory article of Law No. 21,130, the assigned position must be constituted by 25% no later than December 1, 2022.

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

In accordance with the provisions of the General Banking Law (hereinafter the GBL), the Bank must maintain a minimum capital-to-risk weighted assets ratio of 8%, in accordance with the provisions of Article 66 of the GBL. It is also subject to a systemic charge of 0.25% of its risk-weighted assets, in accordance with Article 66 quater of the GBL. In addition to these requirements, it is required to maintain additional basic capital equivalent to 1.25% of their risk-weighted assets, in accordance with Article 66 bis of the GBL, net of required provisions. In addition, it is required to maintain a minimum Basic Capital to Total Consolidated Assets ratio of 3%, net of required provisions. Consequently, the total capital requirement for the Bank is set at 9.50%.

In order to comply with these requirements, the Bank has applied the provisions of Chapter 21-1 " Equity for Legal and Regulatory Purposes" of the Updated Compilation of Standards (RAN).

Note 48 - Information on regulatory capital and capital adequacy indicators, continued

a) Total assets, risk-weighted assets and components of effective equity are detailed below:

Item No	Note	Note Total assets, risk-weighted assets and components of effective equity according to Basel III - Item Description	Global consolidated	Local consolidated	Global consolidated	Local consolidated
			As of December 31, 2023	As of December 31, 2022	As of December 31, 2023	As of December 31, 2022

- a) Corresponds to the value of the investment in subsidiaries that are not consolidated, Applies only in local consolidation when the bank has subsidiaries abroad, and their value is fully deducted from assets and CET1.
- b) Corresponds to the value of the asset items that are deducted from regulatory capital, in accordance with the provisions of paragraph a) of Title No. 3 of Chapter 21-30 of the RAN, Item No Note Total assets, risk-weighted assets and components of effective equity according to Basel III-term Description.
- c) Corresponds to the credit equivalents of derivative instruments in accordance with paragraph (b) of title No. 3 of Chapter 21-30 of the RAN.
- d) Corresponds to the contingent exposures as established in paragraph c) of title No. 3 of Chapter 21-30 of the RAN.
- e) Corresponds to the assets from the intermediation of financial instruments in its own name on behalf of third parties, which are within the bank's consolidation perimeter, as established in paragraph (c) of Title No. 3 of Chapter 21-30 of the RAN.
- f) Corresponds to the assets weighted by credit risk, estimated according to RAN Chapter 21-6, If the bank is not authorized to apply internal methodologies, it must report field 8,b with zero and add 8,a in field 11,a, If it has the authorization, it must add 8.b in 11.a.
- g) Corresponds to the assets weighted by market risk, estimated according to Chapter 21-7 of the RAN.
- h) Corresponds to the assets weighted by market risk, estimated according to Chapter 21-8 of the RAN.
- i) Corresponds to the non-controlling interest, according to the level of consolidation, up to 20% of the owners' equity.
- j) Assets corresponding to goodwill.

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

- k) Corresponds to the balances of the assets of investments in companies other than business support companies that do not participate in the consolidation, in excess of 5% of the owners' equity.
- l) In the case of CET1 and T2, banks must estimate the equivalent value for each level of capital, as well as that obtained by fully applying Chapter 21-1 of the RAN. Then, the difference between the equivalent value and the fully applied value must be weighted by the discount factor in effect at the reporting date according to the transitional provisions of Chapter 21-1 of the RAN, and reported in this row. In the case of AT1, discounts are applied directly if any.
- m) Provisions and subordinated debentures imputed to additional tier 1 capital (AT1), as established in Chapter 21-2 of the RAN.
- n) Provisions and subordinated debentures imputed to the equivalent definition of Tier 2 capital (T2), as established in Chapter 21-1 of the RAN.
- o) In accordance with the transitory provisions, as of December 1, 2022, the solvency requirements will also be made at the local consolidated level, reporting the figures at this level in this column. Bank without subsidiaries abroad should not fill in these data.
- p) Corresponds to the additional core capital (CET1) for the constitution of the conservation buffer, as established in Chapter 21-12 of the RAN.
- q) Corresponds to the additional core capital (CET1) for the constitution of countercyclical buffer, as established in Chapter 21-12 of the RAN.
- r) Corresponds to the additional basic capital (CET1) for banks qualified as systemic, as established in Chapter 21-11 of the RAN.
- s) Corresponds to the additional capital for the evaluation of the adequacy of the effective equity (Pillar 2) of the bank, as established in Chapter 21-13 of the RAN.

Note 48 - Information on Regulatory Capital and Capital Adequacy Indicators, continued

b) Below are the solvency indicators and regulatory compliance indicators according to Basel III (in % with two decimals).

Item No	Item Description	Note	Global	Local	Global	Local
			consolidated	consolidated (i)	consolidated	consolidated (i)
			As of December 31, 2023	As of December 31, 2023	As of December 31, 2022	As of December 31, 2022
			%	%	%	%
1	Leverage Indicator (T1_I18/T1_I7)		7.51	7.24	7.08	6.83
1.a	Leverage indicator that the bank must meet, considering the minimum requirements	a	3.00	3.00	3.00	3.00
2	Basic capital indicator (T1_I18/T1_I11.b)		11.05	10.87	10.46	10.38
2.a	Indicator of basic capital that the bank must meet, considering the minimum requirements	a	5.00	5.00	4.75	4.75
2.b	Capital buffer shortfall	b	—	—	—	—
3	Tier 1 capital indicator (T1_I25/T1_I11.b)		11.05	10.87	10.96	10.88
3.a	Indicator of capital level 1 that the bank must meet, considering the minimum requirements	a	6.00	6.00	6.00	6.00
4	Effective equity indicator (T1_I31/T1_I11.b)		15.62	16.31	15.31	15.90
4.a	Effective equity indicator that the bank must meet, considering the minimum requirements	a	8.50	8.50	8.25	8.25
4.b	Indicator of effective equity that the bank must comply with, considering the charge for articles 35 bis, if applicable	c	8.50	8.50	8.25	8.25
4.c	Effective equity indicator that the bank must meet, considering the minimum requirements, conservation buffer and countercyclical buffer	b	10.38	10.38	9.50	9.50
5	Solvency rating	d	A	A	A	A
	Regulatory compliance indicators for solvency					
6	Voluntary provisions (additional) imputed in tier 2 capital (T2) in relation to APRC (T1_I26/(T1_I8.a or 8.b))	e	0.73	0.85	0.79	0.83
7	Subordinated bonds imputed in capital level 2 (T2) in relation to basic capital	f	35.98	43.74	35.38	41.64
8	Tier 1 additional capital (AT1) in relation to basic capital (T1_I24/T1_I18)	g	—	—	4.78	4.81
9	Voluntary provisions (additional) and subordinated bonds that are charged to additional tier 1 capital (AT1) in relation to RWAs ((T1_I19+T1_I20)/(T1_I11.b))	h	—	—	0.50	0.50

- a) In the case of leverage, the minimum level is 3% without prejudice to the additional requirements for systemic banks that could be set according to the provisions of Chapter 21-30 of the RAN. In the case of basic capital, the bank must consider a limit of 4,5% of risk-weighted assets (RWA). In addition, and if applicable, the bank must add the current systemic charge according to the transitory provisions and the Pillar 2 requirement that was defined at this level of capital. In the case of new banks that have not paid 400,000 UF in paid capital, they must add 2% to their minimum requirement in accordance with article 51 of the GBL. This value decreases to 1% if the capital paid is above 600,000 UF but less than 800,000 UF. In the case of Tier 1 capital, the bank must consider a value of 6% as a minimum requirement and the Pillar 2 charge that has been defined at this level of capital. Finally, at the effective equity level, the bank must consider 8% of the RWA as a minimum requirement. Additional charges must be added to said value for Pillar 2, systemic bank and those indicated in article 51 of the GBL for new banks.
- b) The capital buffer deficit must be estimated in accordance with the provisions of Chapter 21-12 of the RAN. This value defines the restriction on the distribution of dividends if it were positive, according to the provisions of the Chapter mentioned above. In the case of effective equity, the value of the current conservation and countercyclical buffer must be added according to transitory provisions at the date of the report, the value defined in note a), even when there is a requirement by article 35 bis of the GBL.
- c) If the bank had a current effective equity requirement by article 35 bis of the GBL, it must report its value in this cell in accordance with the transitory provisions.
- d) (Corresponds to the solvency classification as established in Article 61 of the General Banking Law.
- e) Limit of 1,25%, if the bank uses standard methodologies (field T1_8.a), or 0,625% if the bank uses internal methodologies (field T1_8.b), in the estimate of the APRC.
- f) Subordinated bonds imputed to Tier 2 capital must not exceed 50% of Common Equity Tier 1 (CET1), taking into account the discounts applied to these instruments according to Chapter 21-1, instruments according to Chapter 21-1 of the RAN.
- g) Additional tier 1 capital (AT1) cannot exceed 1/3 of ordinary tier 1 capital (CET1).
- h) The additional provisions and subordinated bonds imputed to AT1 cannot exceed 1,0% of the RWAs as of December 1, 2021. This value will decrease by 0,5% annually in accordance with the transitory provisions of Chapter 21-2 of the RAN.
- i) In accordance with the transitory provisions, as of December 1, 2022, the solvency requirements will also be made at the local consolidated level, reporting the figures at this level in this column. Bank without subsidiaries abroad should not fill in these data.

Note 49 - Subsequent Events

Announces cancellation of ADS registration with the SEC

On February 19, 2024, the Commission for the Financial Market was informed by means of an essential fact that on February 18, 2024, the cancellation of the registration of the American Depositary Shares ("ADS") issued by the Bank before the Securities and Exchange Commission of the United States of America and the termination of the Bank's reporting obligations before said entity became effective.

In consideration of the foregoing, the process of termination of the Bank's ADS program, informed by means of an essential fact dated October 30, 2023 and carried out since that same date, has been fully completed, complying with the applicable regulatory deadlines.

Finally, it was noted that the common shares of Banco Itaú Chile will continue to be registered in the Securities Registry of the CMF and will continue to be traded and quoted on the Santiago Stock Exchange and the Chilean Electronic Stock Exchange.

Placing debt securities in the local market
