

Operational Preview 2Q20

Belo Horizonte, July 07, 2020 – MRV Engenharia e Participações S.A. (B3: MRVE3), the largest homebuilder in Latin America, informs its preliminary and non-audited operational results of Launches, Pre-Sales, Land bank, Production, Real Estate Financing, Cash Generation and Cancellations for the second guarter of 2020.

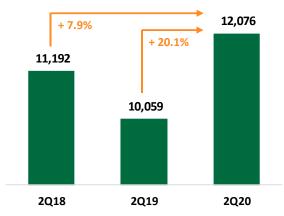

HIGHLIGHTS

- Cash Generation of R\$ 210 million in the 2Q20;
- ➤ **Highest volume of net pre-sales in the Company's history**, totaling R\$ 1.81 billion and 11,479 units sold, an increase of 37.4% compared to 2Q19 and 8.4% to 1Q20;
- The highest volume of transfers in the Company's history, totaling 12,076 units in 2Q20, an increase of 20.1% compared to 2Q19 and 78.8% to 1Q20;
- ➤ Significant increase in Sales Speed (SoS Sales over Supply), reaching 19.7%, the highest mark since 4T17, equivalent to an increase of 5.2 p.p compared to in 2Q19 and 3.1 p.p in 1Q20.

Client Financing - Units (%MRV)

2nd Quarter2020

LAUNCHES (%MRV)

To take advantage of the high levels of inventory presented by the Company since the beginning of the year, in this quarter the Company adopted a strategy for reducing the volume of launches, giving preference to launches in locations with lower levels of inventory.

Another factor that impacted launches were the preventive measures of social distancing adopted throughout the COVID-19 pandemic, city halls, and notary public offices, which are essential in the launch process of our projects were forced to adopt the home office mode and/or scheduled services.

Thus, the volume of launches in the quarter reached a total of 5,349 units, 20.4% below 1QT20, and 51.7% below when compared to the 2Q19.

The Company believes its inventory has already returned to a healthy level and hopes the situation of the city halls and notary public authorities will normalize in the next few months. Based on the excellent pre-sales figures reported in the past quarters, the Company intends to significantly intensify the volume of launches in the second half of 2020.

It is fitting to observe, the increased average price registered throughout 2Q20 is due to an increased volume of launches in capital cities, as well as an increment in the percentage of projects aimed at the SBPE funding, above the Minha Casa Minha Vida Program (MCMV) threshold.

NET PRE-SALES (%MRV)

MRV set, again, a record of its highest volume of net pre-sales in the Company's history in the 2Q20, totaling R\$ 1.81 billion sold, equivalent to 11,479 units (%MRV). That included a 37.4% increase compared to 2Q19 and 8.4% to 1Q20. This record of sales confirms the success of product diversification and funding strategy adopted by the Company, as well as the resilience of the low-income segment.

As a result of the current positive momentum, the Company's sales speed (SoS – Sales over Supply) have been rapidly increasing, and is already at similar levels as seen in 4Q17, representing an increase of 5.2 p.p compared to 2Q19 and 3.1 p.p to 1Q20.

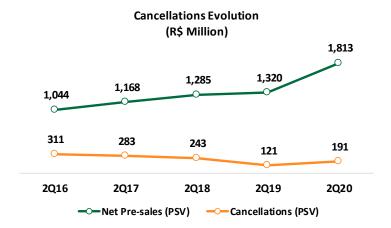

^{**} Includes the residential and LUGGO projects

2nd Quarter2020

During the entire quarter, the customer demand has maintained at high levels, and therefore a more aggressive commercial strategy has proven to achieve effective results. We reinforce that this strategy does not include the increased concession of unsecured credit to customers.

Once again, the robust technological structure of the Company mitigated a possible adverse sales effects caused by the COVID-19 pandemic. Thanks to our digital sales platform that has been confirmed as the most state-of-the-art in the sector.

 $[\]hbox{*Includes the residential, allot ment segments and LUGGO projects}$

CASH GENERATION

Due to withdrawing the mandatory participation of the Union in the payment of a portion of the subsidies from the Minha Casa Minha Vida program, that now applies only to FGTS until the end of 2020, the transfers of the sales contracts to the mortgage lending bank (Caixa Econômica Fereral) in 2Q20 were normalized.

As a result, it was possible to transfer a record volume of units in the quarter that, coupled with record net sales, made it possible for the Company to report a robust cash generation of R\$ 210 million in 2Q20.

The forecast for the second semester is positive cash generation, considering the maintenance of the dynamics of strong number of pre-sales and the high volume of transfers.

LAND BANK

The Company holds a robust land bank, including qualified land plots, fully capable of sustaining its operations and has been paying attention to current acquisition opportunities of new land plots, especially for Luggo and SBPE funded projects.

PRODUCTION

Due to the COVID-19 pandemic, the Company has chosen to postpone the effective starting of most of the scheduled worksites from the 2Q20 to the 3Q20. Besides that, there have been legislation decisions in some Brazilian municipalities and states causing a portion of the Company worksites to temporarily paralyze its activities throughout the quarter, as part of the preventive measures for combating the pandemic.

These factors have negatively impacted the production in this quarter, that totaled 7,976 units, aligned to 1Q20, and an equivalent drop of 24.9% compared to 2Q19.

By the end of the quarter, most construction sites were already operating normally, and the Company only accounted for 2% of paralyzed sites due to the pandemic. With that, the expectation is for production to shortly be normalized, and activities to return to 100% operation of the construction sites.

It is worthwhile to highlight the resilience of the low-income segment has been confirmed by the high reported sales volume reported during the entire semester, giving the Company confidence for intensifying the production of its worksites in the next few months, which will result in a significant increase in built units.

REAL ESTATE CREDIT

Due to the normalization of sales transfers from Minha Casa Minha Vida program, the Company totaled 12,076 units transferred in the quarter, a 78.8% increase compared to 1Q20 and 20.1% compared to 2Q19.

This is the highest volume of transfers in one quarter in the history of the Company. Caixa Econômica Federal has demonstrated excellent efficiency in transfers since June and the expectation is for the volume of transfers to remain at high levels for the next quarters.

LUGGO

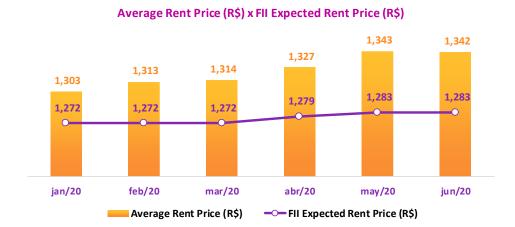

The month of June has been the best month for rentals since the beginning of the Luggo operation, in 2019. This success is attributed to the digital commercial platform, where the customer can select the unit, perform credit analysis, sign the contract, and even make credit card payment transactions.

The projects sold to the LUGG11 FII (REIT) continue performing stably, as expected. Luggo Lindoia was rolled out on April 18, and based on this forecast, it will reach 100% occupancy by August.

2nd Quarter2020

It was expected, when the Luggo Projects were sold to the LUGG11 FII (REIT), an average rental price of R\$ 1,283.10. The average current rental is R\$ 1,341.87, equivalent to 4.6% over its initial forecast.

The success of the Luggo operation has confirmed the potential of this business model, a pioneer in the Brazilian real estate market.

AHS

AHS operation continues to show the expected resilience and reported a vacancy under 2% on the stabilized developments, with a growing evolution on the Leasing Up projects.
