gross margin for the new sales ex-financial costs

In 4Q23, MRV Real Estate Development reported a 4.4 percentage point improvement in reported Gross Margin compared to the same period of the previous year. The large volume of sales was achieved with price increases above accumulated inflation, which explains the recurrent **improvement in the Gross Margin of New Sales, to levels equivalent to the best years of MRV's operation**, confirming the success of the Company's turnaround.

Considering the operation in December 2023, we are already selling with a Gross Margin on New Sales, excluding capitalized interest, of 36.5%, which puts us back at the top of profitability in the sector.

#### Cash Generation MRV Real Estate Development [R\$ Million]

MRV Real Estate Development reported a Cash Generation of R\$ 131 million in 4Q23, due to the gradual improvement in Gross Margin, coupled with the portfolio assignment strategy.

This milestone represents an evolution of R\$ 262 million compared to the previous quarter and R\$ 417 million compared to 4Q22. With the significant volume of sales reported during the year, **MRV recorded an increase of R\$ 1.05 billion in Unearned Revenues between 4Q22 and 4Q23, totaling R\$ 2.53 billion**. This substantial increase is composed of sales with a high Gross Margin on New Sales, a result of the price increase.

# Housing Programs

In addition to the strengthening of the Minha Casa, Minha Vida Federal Program, various State and Municipal Housing Programs have gained relevance. This is extremely positive for MRV, which is **the only company with the countrywide footprint required to benefit from all these programs, which will be an important driver to continue reducing the pro-soluto granted to customers**.

# MRV Day 2023 Projections and Actual Results

#### Cash Generation R\$ 0 - 200 MM Actual: -201 MM

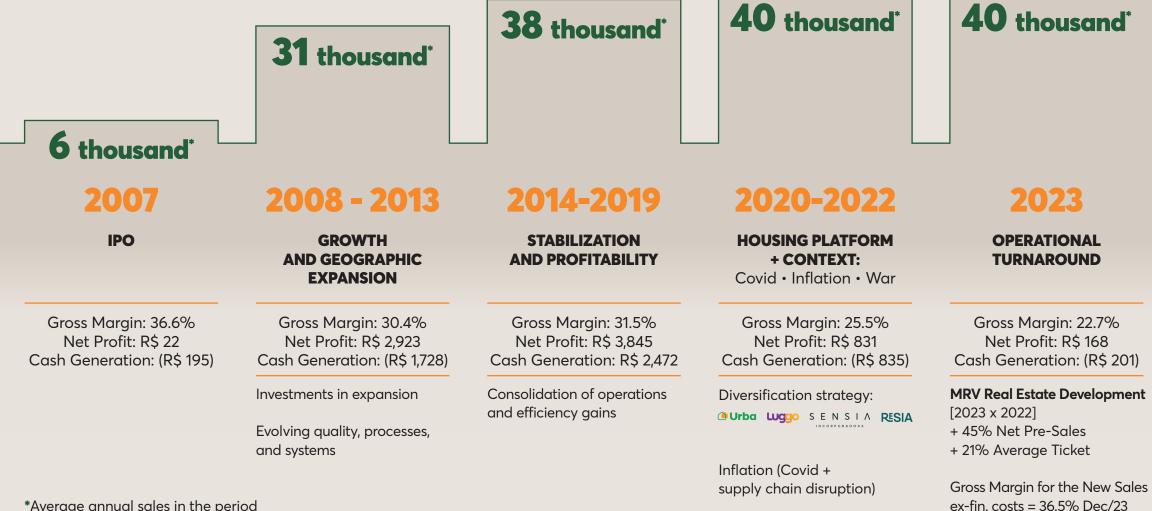

Despite generating cash flow in 4Q23, the projected cash generation for the year was not achieved for three reasons:

- The Average Percentage of Completion (POC) for sales throughout the year was below the estimated, with a greater than planned concentration in launch sales.
- Beginning of construction phase only after a high pre-sales percentage is reached. The aim is to mitigate the initial cash burn of projects but it implies a delay in cash generation.
- R\$ 100 million in disbursements for land above the Company's expectations, given the current size of the operation, as a result from land purchases made prior to 2020.

#### **Gross Margin**

The budgetary revision of a project, mainly due to changes in its scope, required an adjustment that affected Urba's reported gross margin.

This specific review had an impact only in 4Q23. For the upcoming quarters, a return to gross margin levels higher than 3Q23 is expected.

## Disclaimer

This presentation contains forward-looking statements relating to the prospects of the business, estimates for operating and financial results, and those related to growth prospects of MRV. These are mere projections and, as such, are based exclusively on the Management's expectations about the future of the business. These expectations are highly dependent upon required approvals and licenses for projects, market conditions, performance of the Brazilian economy, the sector and international markets and, therefore, are subject to changes without prior notice.

This performance report includes accounting data and non-accounting data such as operating and financial results and outlooks based on the expectations of the Board of Directors. The non-accounting data such as values and units of Launches, Pre-Sales, amounts related to the housing, Inventory at Market Value, Land bank, Unearned Results, cash disbursement and Guidance were not subject to review by the Company's independent auditors. The EBITDA, in this report, represents the net income before income tax and social contribution, net financial result, financial costs recorded under cost of goods sold, depreciation, amortization and minority interest. MRV believes that the reversion of the adjustment to present value of receivables from units sold and not yet delivered that is recorded as gross operating revenue is part of our operating activities and therefore, we do not exclude these revenues from EBITDA's calculation. EBITDA is not a Brazilian GAAP and IFRS measure and should not be considered in isolation and should not be considered an alternative to net income, as an indicator of our operating performance or cash flows or as a measure of our liquidity. Because the calculation of EBITDA does not take into consideration income tax and social contribution, net financial result, financial charges recorded under cost of goods sold, depreciation, amortization and minority interest, EBITDA is an indicator of MRV general economic performance which is not affected by changes in interest rates, income tax and social contribution rates and rates of depreciation and amortization. Because EBITDA does not consider certain costs related to our business which could materially affect our profits, such as financial result, taxes, depreciation, amortization and capital expenditures, among others, EBITDA is subject to limitations that impair its use as a measure of our profitability.
