 - Quantity of shares held in treasury on the date hereof: 4,081,303 common shares (based on the shareholding position as of September 28, 2021);

- The members of the Board of Directors understand that the Company's current financial situation is compatible with the implementation of the Share Buyback Program under the approved conditions and consider that the buyback of shares will not harm the obligations assumed before the Company's creditors nor the payment of mandatory dividend to its shareholders. This conclusion results from the evaluation of the potential financial amounts to be deployed in the Share Buy Back Program when compared with (i) the level of obligations assumed before its creditors, as the Company has payment capacity to comply with its financial obligations; and (ii) the amount available in cash, cash equivalents and financial investments. The Company's management also understands that there are no foreseeable facts capable of causing significant changes in the amount of resources available for the repurchase of shares over the remaining period of the current fiscal year.
