

### ANNEX 4.2.8.3

#### DTH COLLECTION

The DTH collection will consist of assets, liabilities, and obligations that make up Oi's paid DTH TV business, and may also include the assets, liabilities, and obligations of Oi's paid IPTV TV business, at the discretion of the collection acquirer. The customers of SPE TVCo will be those related to Oi's DTH operations, and, at the discretion of the acquirer, will also encompass IPTV services for the current IPTV customer base of Oi.

The main assets and obligations that will comprise the DTH collection are:

- 1) Oi's paid DTH TV customer base, whose base and national distribution is presented in **Section A** of this Annex 4.2.8.3., which may be updated until the actual transfer date of the DTH collection and/or assets and also, at the discretion of the collection acquirer, the IPTV customer base as it relates exclusively to the IPTV service, presented in Section B of this Annex 4.2.8.3.
- 2) Terminal equipment for DTH installed in customer homes or in stock, responsible for the transmission/reception of signals via satellite, Headend and network equipment necessary for the central treatment and distribution of satellite signals, and other assets exclusive and necessary for the operation of the network and provision of services. Also includes, at the discretion of the acquirer, IPTV terminal equipment installed in customer homes or in stock, and exclusive equipment necessary for the provision of paid TV service via IPTV.
- 3) Systems and platforms used exclusively for the operation of pay TV via DTH, as listed in **Section C** of this Annex, which may be updated up to the date of the effective transfer of the DTH collection and/or assets. It also includes, at the acquirer's discretion, systems and platforms used exclusively for the operation of pay TV via IPTV, as listed in Section D of this Annex, which may be updated until the date of the effective transfer of the DTH collection and/or assets. The systems and platforms used by the operation of DTH collection and also by other businesses of Oi will be segregated or contributed if possible or their use will be made through transition service agreements between Oi and DTH collection.
- 4) In a consolidated manner, the assets included in the DTH collection have the general composition and book value described in **Section E** of this Annex, which may also include, at the discretion of the acquirer, the items and respective book values detailed in Section F of this Annex. Such sections may

be updated until the actual transfer date of the DTH collection and/or assets.

- 5) Assignment of Oi's contractual position in the context of contracts with suppliers that are necessary for the operation of the DTH collection and exclusive to the paid TV operation, such as content supplier contracts and the satellite rental contract with SES, among others. The list of main contracts is presented in **Section H** of this Annex 4.2.8.3, which may be updated until the actual transfer date of the DTH collection and/or assets.
- 6) Service Agreement for Transition Support with Oi (TSA), under which Oi will provide general services to facilitate the operation's transition, and whose scope and conditions will be negotiated with the future holder of the DTH collection. Also included is the assignment of Oi's contractual position regarding the transmission of local signals, with the possibility of signing new transmission contracts with Oi.
- 7) Right to use Oi's real estate where the Headend and the network equipment for the DTH operation are located, and, at the buyer's discretion, the IPTV operation as well. The list of key properties is presented in **Section H** of this Annex, which may be updated until the actual transfer date of the DTH collection and/or assets.
- 8) Right of ownership of the property whose description is presented in **Section I** of this Annex 4.2.8.3, free and clear of any liens, constrictions, guarantees, or debts proper of any nature, in addition to other properties related to the pay TV business via DTH that may be included up to the date of the effective transfer of the DTH assets and/or assets.

Additional shared service agreements with Oi and other group companies may eventually be segregated and included in the list of assets, liabilities, and rights of the DTH collection.
