Message from Management

Ser Educacional announces its 2024 results, signaling a new phase in its operational and strategic path. This evolution is the result of the completion of a comprehensive optimization process started at the end of 2022, which gave rise to significant synergies, especially throughout this fiscal year. Among the most relevant results, we highlight (i) the 393.2% increase in adjusted net income, which rose from R\$ 20.1 million to R\$ 99.1 million, comparing 2024 x 2023; (ii) an increase of 2.2 percentage points in adjusted EBITDA margin, which reached 22.1% at the end of the year; (iii) net operating cash generation grew 50.7%; (iv) net debt/adjusted EBITDA ratio was reduced from 2.17x to 1.64x; and (v) 10.1% growth in the undergraduate student base in Hybrid Learning.

These achievements position the company for a new cycle of growth, and to this end the company is implementing a series of strategic initiatives aimed at expanding its academic activities, while seeking to increase its operating and financial margins. These actions aim not only to boost cash generation, but also to contribute to reducing financial leverage. The main highlights are shown below:

Expansion of Medical Schools: The expansion of medical schools was driven by the favorable decision obtained by the Company in the judgment of the Declaratory Action of Constitutionality (ADC 81), held in June 2024. This decision established clear rules for the accreditation process of new medical schools, affecting 13 administrative processes that were in progress with MEC. Since STF decision, it has gained 480 new annual seats in medicine in 12 administrative processes. Of these, 360 seats were obtained through the favorable conclusion of four administrative processes, resulting in authorization from MEC. The other 120 seats arose from two court decisions, which correspond to injunctions that had their entrance exams completed in 2025.1 and are still pending a final decision.

As a result of these actions, the Company significantly expanded its offer of seats on medical schools, rising from 521 annual seats in the first quarter of 2023 to 1,001 annual seats currently. This represents an increase of 92.1% when comparing the two periods. In addition, the Company is awaiting the results of its 21

proposals that advanced to the second phase of Mais Médicos 3 program, which may create a round of expansion of medical school seats.

Creation of Ser Solidário (SS) Program: Successfully launched in August 2024, this enrollment installment program for undergraduate Hybrid Learning aims to facilitate access to education for its students. SS was used again for the 2025.1 entrance exam, this time fully implemented for all eligible undergraduate Hybrid Learning students.

Improvement of operational performance and opening of new units: With four consecutive semesters of positive intake, our student base grew at a compound annual growth rate (CAGR) of 5.4% between 2024 and 2022. This growth, combined with the renewal of the base in the first years of the course, strengthens operational resilience and ensures the sustainability of our student base in the coming years. Furthermore, in 2025.1 the Company started operations in 3 new units: Bragança (PA) under the UNINORTE brand, Manaus (AM), under UNAMA brand and Florianópolis (SC), under UNIFAEL brand, in line with its strategy of opening new compact units, in privileged locations and focusing on offering courses with higher demand in the market, such as the health and law fields of knowledge.

Focus on reducing financial debt and increasing cash generation: with the improvement in financial and operational performance, the opening of new medical schools and SS implementation, the Company can accelerate its plan to reduce financial debt and increase financial profitability for shareholders, while resuming the payment of dividends to shareholders as early as 2025.

The company is firmly committed to generating value for all its stakeholders and is strongly positioned for this new cycle of growth. Recently, it successfully completed its operational optimization plan and repositioned its portfolio of courses, focusing on the areas of health and law. In addition, it has significantly expanded the number of annual seats in medicine, all through a unique value proposition that offers students high-demand courses, privileged locations, quality infrastructure and competitive prices.

Management sincerely thanks students, teachers, employees, shareholders and service providers for their trust and partnership throughout this journey. It reiterates its commitment to contributing to the construction of a more educated, entrepreneurial and socially responsible Brazil.

Undergraduate Hybrid Learning (on-campus) student intake – 2H24

Intake recorded 16.7% growth when comparing 2H24 versus 2H23, mainly due to the strategy of focusing efforts on offering health courses, aiming to better capitalize on its competitive hedges related to the structure of laboratories, clinics, and recognition of its regional brands.

Undergraduate Digital Learning student intake - 2H24

Enrollment grew 9.2%, comparing 2H24 x 2H23, due to the increased offer of health courses, success in executing the operational optimization plan and better integration of UNIFAEL's original operations.

Intake of Hybrid and Digital Graduate Students - 2H24

Student intake in these types of education fell significantly because of the reorganization of the portfolio offered because of the implementation of the operational optimization plan.

The portfolio of courses tends to be reshaped into a unique offer of value for students, through its strong and market-recognized brands, distinguished structure of laboratories and clinics and with courses mostly aimed at the health field of knowledge, for the next selection processes.

Dropout Rate¹

(1) Dropout rate = dropout of the period / (enrolled students at the end of the previous semester - graduates + intake + acquisitions)

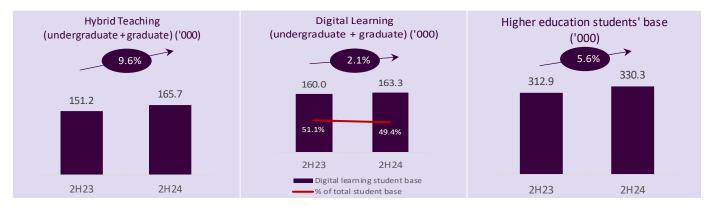

Hybrid undergraduate dropout rate was 12.5% in 2H24, in line with 2H23, when it reached 12.4%. It is worth noting that in this 2024.2 cycle, the company has maintained its strategy of increasing operating cash generation by reducing discounts in financial negotiations for overdue monthly tuition fees.

In the digital undergraduate learning offer, the dropout rate was 19.5% in 2H24, versus 27.8% in 2H23, representing 8.3 p.p. drop compared to the same period last year, due to the improving financial profile of the student base and the increased share of health courses in the course mix, with higher average ticket.

| % Dec24 Base / Dec23 Base | 10.1% | 10.5% | -41.7% | -33.6% | -38.6% | 16.9% | 5.6% |

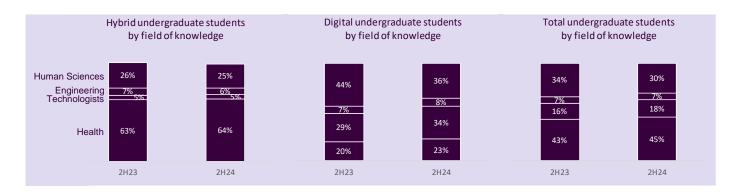

The 9.6% increase in the Hybrid Learning student base was due to the focus on offering a leaner portfolio of courses dedicated to health knowledge areas, aiming to maximize the Company's competitive edges in terms of its distinctive structure of laboratories and clinics, as well as the privileged location of its units and brand positioning in the cities where it operates.

As a result, the increase in the health student base stands out again, now accounting for 64% of the Hybrid Learning undergraduate student base and 45% of the total undergraduate base.

In Digital Learning, health courses increased their share by 3 p.p., rising from 20% to 23% of the Digital Learning undergraduate student base, reflecting the results of the company's strategy of increasing its investment in laboratories and the integration of training systems at the partner learning centers between the original regional brands and UNIFAEL.

The organic growth of the Hybrid Learning student base meant that the student base for this type of education increased from 48.3% to 50.2% of the total undergraduate student base, when comparing the two periods, which will be reflected in an increase in the overall average ticket, as will be observed later.

| Operational Data | 4Q24 | 4Q23 | % Chg. 4Q24 x 4Q23 |
|----------------------|-------|-------|------------------------------|

| Operational campuses | 59 | 58 | 1.7% |
| Operational Centers | 814 | 863 | -5.7% |

At the end of 4Q24, following the implementation of the operational optimization plan that has taken place over the last two years, activities at underperforming units and hubs were closed down, which included the reduction of rented properties and the reformulation of units, which are now operating in leaner, more up-to-date spaces, in line with

modern academic practices, which provide a distinctive and truly hybrid educational experience for the Company's students, in a more compact operating model focused on offering health courses.

The 11.2% increase in the student base for medical courses is due to the implementation of 240 seats out of the 480 new annual seats added to the portfolio to date, and the maturing of the existing seats taking the entrance exam in the same period. For 2025.1, the Company has already offered all new seats.

Student Financing

The PROUNI and FIES student base increased compared to December 2023, in correlation with the growth in enrollment compared to the same periods. The PRAVALER student base grew due to the reduction in the offer of EDUCRED, a self-financing program that reduced its activities since 2023, when its portfolio was sold to PRAVALER.

| Digital Learning (Undergraduate + graduate) | 187.92 | 180.48 | 4.1% |
| Total Net Average Ticket | 510.19 | 496.77 | 2.7% |

The average ticket for undergraduate Hybrid Learning in 4Q24 was in line with 4Q23, with a slight decrease of 0.9%. This decrease is mainly due to an improvement in timely tuition payments from students, who now make more payments on the 5th of each month. This change causes an impact of approximately 10% on tuition, this trend was partially offset by the 11.2% increase in the number of students in medical schools, as well as the growth in the mix of health courses, which have a higher average ticket.

In Digital Learning, the average ticket increased 4.1% due to a lower volume of discounts in the commercial campaigns for 2024.2, as well as a change in the mix of courses with a higher emphasis on health courses.

The total net average ticket was up 2.7% compared to 4Q23 due to the higher share of the Hybrid Learning student base over the total student base, rising from 48.3% to 50.2%. As the average ticket of the Hybrid Learning student base is nearly 4.4x higher than Digital Learning, it allowed an increase in the overall average ticket.

- a) The 12.7% increase in gross revenue is due to (i) the higher volume of students enrolled in hybrid and digital undergraduate, as a result of the improvement in intake rate; (ii) growth in the student base of the Medical schools; and (iii) the passing on of inflation;
- b) The 8.7% increase in net revenue was due to the same reasons described above, offset by the 20.4% growth in the account of discounts and scholarships, mainly due to higher discounts offered to students from older vintages, and due to the improvement in the timeliness and regularity of student payments;

| Depreciation and Amortization | (48,182) | (45,776) | 5.3% | (201,696) | (205,362) | -1.8% |

- a) Personnel costs and charges grew 11.8% compared to 4Q23, including non-recurring costs of R\$ 0.3 million in the quarter. Excluding this effect, the growth in personnel costs and charges was 11.9%, mainly due to the annual collective bargaining, the increase in workload, due to the growth in the student base of hybrid education and their respective social charges;
- b) Rental costs reached R\$ 5.7 million in 4Q24, compared to R\$ 5.1 million in 4Q23, up 11.4%, due to the increase in the number of rental contracts that do not fall under IFRS 16 (machinery, equipment and short-term leases);
- c) The utilities line was up 14.1%, due to the increase in the Hybrid Learning student base, especially in health courses which have more teaching hours due to practical classes and the growth of newer units, when comparing 4Q24 to 4Q23 results, as well as the increase in tariffs in several states;

d) The line of third-party services and others showed a drop of 2.3% when comparing 4Q24 x 4Q23, mainly due to the lower costs with laboratory supplies and transfer to learning centers.

The table below shows managerial operating costs, which are adjusted for non-recurring effects.

- a) The growth in cash-gross profit reflects the combined effect of the increase in revenue because of the organic development of Hybrid Learning, which in this quarter had a similar increase in the costs of services provided, especially personnel costs, which led to a 0.3 percentage point increase in the gross margin;
- b) Depreciation and amortization showed 5.3% increase, due to the increase in CAPEX in the comparison between the two periods and the remeasurement of leases to reflect the calculation of the rental flow considering the adjustment in the incremental interest rate that occurred in the comparison between the two periods.

The table below shows the gross cash profit adjusted for the main effects of non-recurring costs.

- a) Personnel expenses and charges showed 7.7% increase, due to the collective bargaining agreement, an increase in the provisioning for bonus and for the Share-Based Plan and the insourcing of some outsourced activities. There was also a non-recurring expense of R\$ 2.9 million related to compensation fines related to the adjustment of the administrative structure. Excluding non-recurring effects between the two periods, the increase was 7.6%;
- b) Expenses for services provided grew 15.1% compared to 4Q23, mainly due to a non-recurring expense related to the provision of legal services, in the amount of R\$ 4.1 million. Excluding non-recurring effects between the two periods, which can be seen in the managerial table below, the growth in these expenses was 3.8%, relatively below inflation when comparing the same periods;
- Advertising expenses increased 5.3% compared to 4Q23, due to the growth of the Company's operations and inflation.
 As a percentage of net revenue, these expenses went from 6.5% to 6.3%;

- d) Provision for Expected Credit Losses (PDA) and Actual Losses dropped 7.0% when comparing the two quarters. This drop is mostly explained by the increase in on-time payments of monthly tuition fees over the year, which in turn impacted on the need for provisioning in the IFRS 9 cycle;
- e) PDA FG-FIES: In the context of the new FIES, between 13.0% and 27.5% of the amount paid to the institutions is withheld, with the aim of investing these funds in the FIES Guarantor Fund (FG-FIES). This fund will be used to cover any losses in the program, on an individual basis for each educational institution. The amounts invested in the fund are restricted may not be redeemed or used for other purposes without authorization by the Brazilian Fund for Educational Development *Fundo Nacional de Desenvolvimento da Educação* FNDE. Due to the lack of statements compatible with the progress of the student base enrolled in FIES, the Company decided to increase the provision for the program's actuarial adjustment from 37% to 50%. This change led to a non-recurring effect, resulting in an impact of R\$ 17.1 million, without affecting cash generation in the year. The company is taking steps with Caixa Econômica Federal, the fund manager, to reconcile the amounts in the statements provided with internal information. In addition, it is seeking to obtain information on the collection of payments from defaulting students;

- The Others line in 4Q24 reached R\$ 17.8 million, down 25.0% compared to 4Q23, due to the reduction in maintenance expenses;
- Other Net Operating Income (Expenses) increased from R\$10.5 million to R\$43.6 million. This increase is attributed to non-recurring effects, which include: (i) provision for impairment of goodwill on the acquisitions of ABES, UNI7 and CDMV in the amount of R\$20.6 million; (ii) write-off of the right of use net of lease obligations related to the delivery of properties and the recalculation of rents related to the adaptation to IFRS 16 standards, in the amount of R\$12.3 million; (iii) write-off of property, plant and equipment due to the return of properties, totaling R\$3.6 million; and (iv) recording of a provision for tax contingencies in the amount of R\$7.0 million, the cash effect of which is expected for 2025.

The table below presents managerial view of general and administrative expenses, adjusted for non-recurring effects.

^{1.} EDLIDA is not an accounting measure.

2. Revenue from interest on agreements and others comprises our net financial result arising from revenue from interest and fines on tuition corresponding to financial charges on renegotiated and overdue tuition fees.

3. Non-recurring costs and expenses are mainly related to expenses related to mergers and acquisitions of companies, severance expenses arising from the workforce optimization process, which would not affect normal cash flow.

4. Minimum rent refers to rental agreements recorded under financial leasing in accordance with IFRS 16. The expenses from such leasing or not recorded under EBITDA but are part of adjusted EBITDA adjusted EBITDA is adjusted EBITDA.

^{5.} Adjusted EBITDA corresponds to EBITDA plus (a) financial revenue from fines and interest on tuition fees, (b) non-recurring costs and expenses, and (c) minimum rent paid.

stands out, which improved the occupancy of the leased real estate park, reorganized the course portfolio and generated operational synergies over the last two years. In addition, the solid operational performance during the 2024 cycle, combined with the growth in the medical student base resulting from the expansion of the courses in operation, were crucial factors for this positive result.

Ser Solidário Indicators

Ser Solidário (SS) program was introduced in 3Q24, replacing the commercial discount program offered for new student enrollments. From now on, the amounts that used to be offered as a discount on the actual tuition fee will now be paid in equal installments throughout the course. The program was implemented throughout 2024.2, contributing to the consolidated results, as shown in the table below:

- a) Financial Income showed 71.5% growth, mainly due to the increase in interest on agreements and others and exchange rate variation line on the foreign currency loan (with swap) contracted with Banco Itaú. and the non-recurring effect of R\$ 6.7 million related to the mark-to-market adjustment of financial derivatives that began to be recorded by the Company as of 4Q23, in compliance with CPC 46, representing a non-cash accounting effect;
- b) Interest on Agreements and Others was R\$ 8.3 million in 4Q24, representing a 26.2% growth compared to 4Q23, when it reached R\$ 6.6 million, due to the higher student due to the increase in interest charged to students when comparing the two periods due to the greater rigidity of the policy for negotiating overdue tuition payments;
- c) Return from Financial Investments reached R\$ 6.4 million in 4Q24, down 23.0% compared to 4Q23, when this line ended the quarter at R\$ 8.3 million, due to lower average balance of invested funds when comparing 4Q24 X 4Q23, considering that the resources from the 6th debenture issue were raised at the end of December, which only increased the final balance when comparing the periods and, therefore, had no impact on the accumulated result for the quarter;
- d) The sum of Foreign Exchange Gains and Exchange Rate Variation on Loans (SWAP), referring to the contracting of the credit facility in modality 4131 with Banco Itaú, showed a 34.9% drop in the combined financial expense, from R\$ 6.3 million in 4Q23 to R\$4.1 million in 4Q24;
- e) Financial Expenses reached R\$ 68.6 million in 4Q24, compared to R\$ 68.8 million in 4Q23, representing a 0.3% decrease when comparing the two periods, mainly due to the higher interest on leases and the mark-to-market adjustment;
- f) Interest Expenses grew 16,1%, from R\$ 19.8 million in 4Q23 to R\$ 23.0 million in 4Q24, as a result of the increase in the average interest rate in Brazil, partially offset by the reduction in net debt;
- g) Lease Interest was R\$ 19.8 million in 4Q24, compared to R\$ 15.4 million in 4Q23, up 28.5%, due to a non-recurring effect in 4Q23, which reduced lease interest expense by R\$ 4.5 million because of the adjustment in the incremental rate assumptions versus the cost of capital. Excluding this effect, this line was 0.8% lower, reflecting the return of properties during the year, partially offset by adjustments in contracts;

h) Discounts Granted reached R\$ 10.3 million in 4Q24, versus R\$ 11.1 million in 4Q23, corresponding to 7.4% decrease when comparing the two periods, due to the lower volume of agreements to recover old monthly tuition fees, mainly between 361 and 720 days when comparing both periods.

The table below presents managerial net income, adjusted for non-recurring effects.

In 4Q24, the Company recorded an adjusted net income of R\$ 36.3 million, versus R\$ 18 million in 4Q23, up 101.3%, mainly due to the recovery of the Hybrid Learning revenue base, combined with the beginning of synergies generated by the execution of the operational optimization plan started from the end of 2022.

For 4Q24, IR/CSLL recorded R\$11.8 million, an increase compared to the R\$1.9 million recorded in 4Q23, mainly due to the aggregate profit of part of the Company's companies, and temporary seasonal additions, including the impact of the adjustment of the mark-to-market of financial derivatives, movements in rights of use and lease obligations and, mainly, the provision for impairment of goodwill on the acquisition of investments that are not supported by the calculation of operating profit (incentivized profit).

^{*}Reclassification of the PCLD FIES installment to PCLD FG-FIES.

Net Receivable Days ex-FIES dropped from 95 to 91 days, mainly due to the improvement in the timeliness and regularity of payments of monthly tuition fees by students from vintages generated after the pandemic and the increase in PDA. The increase in FIES NRD was mainly due to the reclassification of the PDA balance from FIES to FG-FIES.

The company's cash on hand totaled R\$ 371.5 million, a 26.2% increase compared to December 2023, due to the growth in net operating cash generation resulting from organic operating growth and the 5th and 6th issues of debentures of R\$ 300.0 million which, as mentioned in the Financial Results section, these proceeds were internalized at the end of December. These effects were partially offset by approximately R\$104.9 million in debt amortization made over the course of 2024, and the R\$1.1 million increase in CAPEX, when comparing the two periods.

As of December 31, 2024, the Company had a net debt of R\$ 718.5 million compared to a net debt of R\$ 792.5 million as of December 31, 2023, mainly due to the improvement in operating cash generation. As a result, net debt fell 9.3% compared to 4Q23, representing a net debt / adjusted EBITDA ratio of 1.64x.
