

WEG S.A.

A PUBLICLY LISTED COMPANY

CNPJ nº 84.429.695/0001-11

NOTICE TO THE MARKET

Investment in a new battery energy storage systems (BESS) factory in Brazil.

WEG S.A. (B3: WEGE3 / OTC: WEGZY) announces to its shareholders and the general market that it will build a new factory dedicated to the production of battery energy storage systems (BESS) in Itajaí / SC. The unit will be the most modern in the country in this segment and represents a strategic advancement for the company in solutions for the energy transition.

To make the project viable, WEG received R\$ 280 million in funding from the BNDES Mais Inovação program, approved under the public call for proposals focused on the transformation of strategic minerals for energy transition and decarbonization, carried out in partnership with Finep.

Construction of the new factory will begin soon, with conclusion scheduled for the second half of 2027. The unit's operation will result in the creation of approximately 90 new direct jobs. Furthermore, the new plant will expand WEG's production capacity in BESS systems to up to 2 GWh per year, equivalent to 400 systems of 5 MWh, and will feature a high level of automation, including automatic and semi-automatic assembly lines, as well as the use of autonomous mobile robots for internal movements.

The complex will also house a laboratory dedicated to product testing, development, and qualification, responsible for improving processes, ensuring quality control, and accelerating the creation of new solutions. The infrastructure will also include a power substation for simulating real-world operating conditions.

Battery energy storage systems are essential for the stability of electrical grids, especially with the advancement of renewable sources such as solar and wind power. They allow energy to be stored during periods of low demand and released when needed, contributing to system reliability and reducing the risk of outages.
