

EARNINGS RELEASE

1Q 2026

Solid margins and return on invested capital with growth in the external market even in a lower revenue period in Brazil

Highlights

Net Operating Revenue (NOR) was **R\$ 9,468.3 million** in 1Q26, 6.1% lower than 1Q25 and 7.6% lower than 4Q25.

EBITDA⁽¹⁾ reached **R\$ 2,102.8 million**, 3.2% lower than 1Q25 and 8.3% lower than 4Q25, while **EBITDA margin** was **22.2%**, 60 bps higher than 1Q25 and 20 bps lower than the previous quarter.

Return on Invested Capital (ROIC) reached **33.1%** in 1Q26, down 10 bps from 1Q25 and up 60 bps from 4Q25.

Message from Management

This quarter, we continued to see key financial performance indicators at high levels, such as return on invested capital and operating margins. This is a result of our long-term business and geographical diversification strategy, a better product mix, and good working capital management. External market revenue contributed significantly, even amid geopolitical uncertainties and volatility in international trade. Nonetheless, we observed a decrease in consolidated revenue, driven by anticipated lower demand for solar generation projects in Brazil, along with the appreciation of the Brazilian real during the period, which impacted revenue from the external market.

In Brazil, the reduction in delivery levels for the centralized solar generation business, due to the absence of new projects, along with a less attractive economic environment for new short-term industrial investments, contributed to the decline in revenue. Despite this movement in the quarter, we maintain a positive view of business continuity, with a good level of order intake and backlog, especially for long-cycle businesses in the Power Generation, Transmission and Distribution (GTD) area.

In the external market, even with revenue performance in reais impacted by exchange rate fluctuations, industrial activity remained positive in the main markets where we operate, mainly in equipment for segments such as oil & gas, as well as ventilation and cooling systems. We continued to deliver good results in the Power Generation, Transmission and Distribution (GTD) area, with sustained volume in the transmission & distribution (T&D) business in North America, coupled with strong demand from the generation business.

We remain confident in our business model despite the current geopolitical uncertainty. We continue our strong industrial expansion, with relevant investments to increase production capacity, which, combined with the constant pursuit of operational efficiency, are fundamental to delivering solid operating margins and a return on invested capital above the industry average.

The following financial and operating data are presented on a consolidated basis, except when otherwise indicated, in thousands of Brazilian reais (R\$) according to accounting practices adopted in Brazil, including Brazilian Corporate Law in convergence with IFRS international norms. Except when otherwise indicated, growth rates and other comparisons are made to the same period of the previous year. Share data is adjusted for split or bonus events.

Net Operating Revenue

Net operating revenue decreased 6.1% compared to 1Q25, down 19.5% in the domestic market and up 4.5% in the external market. Adjusted for the consolidation effects from the acquired Reivax, Heresite, Tupinambá Energia and Sanelec, the revenue for the quarter would have decreased 6.3% over 1Q25.

The evolution of the revenue proportion between markets is shown in Figure 1

Figure 1 – Net Operating Revenue by Market (figures in R\$ million)

Net operating revenue from the external market, measured in the quarterly averaged US dollars (US\$), increased by 16.1% compared to 1Q25 and decreased by 4.8% compared to 4Q25. The distribution of net revenue by geographic market is shown in Table 2.

<i>Asia-Pacific</i>	121,357	10.8%	133,393	11.3%	112,331	11.6%	-9.0%	8.0%

Net operating revenue from the external market was negatively impacted by the average US dollar exchange rate that moved from R\$ 5.85 in 1Q25 to R\$ 5.26 in 1Q26, a 10.1% appreciation over the Brazilian real.

It is important to consider that we set our sales prices in different markets in local currency and according to their competitive conditions. Measured in local currencies, weighted by revenues in each market and adjusted for the consolidation effects of acquired businesses, net operating revenue from the external market increased by 11.2% compared to 1Q25.

Share in NOR

Domestic Market

- Industrial activity showed a reduction in demand for short-cycle goods, such as low-voltage electric motors and serial automation products, driven by a lower business volume in different sectors.
- The strong delivery volume of long-cycle goods contributed positively to the quarter, especially high-voltage motors, reflecting the order backlog built up in recent quarters.

External Market

- Good performance for short-cycle goods, such as low-voltage electric motors, despite the negative impact of the devaluation of the US dollar during the period. Demand was positive across several areas of operation, especially in oil & gas and ventilation and cooling systems for data centers.
- Consistent level of deliveries for long-cycle goods, such as high-voltage electric motors, in addition to an improvement in order intake, contributing to a healthy order backlog for the coming quarters.

Share in NOR

Domestic Market

- Revenue was impacted by the lack of deliveries in the centralized solar generation (GC) business. It is important to highlight that 1Q 2025 was the quarter with the highest revenue in the Company's solar generation business history.
- The T&D business contributed positively, driven by deliveries of large transformers and substations for projects related to transmission and distribution network auctions.
- Despite a challenging quarter for growth, investments in electrical infrastructure in Brazil remain strong. The Company has been building a robust order backlog for the coming years, particularly for transformers and synchronous condensers, which are fundamental to increasing the reliability of the electrical system.

External Market

- The performance of the T&D business continued to be positive, driven mainly by transformer deliveries related to improving the electrical grid infrastructure in the US, coupled with good demand in important markets such as Colombia.
- In the power generation business, positive momentum continues in most markets, with highlights for North America and Europe.

- In Brazil, even with positive demand in sectors such as washing machines, volatility in demand and inventory adjustments in some important segments, such as air conditioning motors, impacted growth in the quarter.

External Market

- Continued good demand in most operating regions, with highlights to Mexico and the US, although revenue was impacted by currency fluctuations.

Share in NOR

Domestic Market

- Stable demand for products in this business area, spread across different segments, with particular emphasis on relevant sectors such as oil & gas and mining.

External Market

- Revenue growth, when compared to the same period last year, was mostly due to strong performance in Mexican and US operations, with a positive contribution from the recently acquired Heresite businesses.

Cost of Goods Sold

The Cost of Goods Sold (COGS) and gross margin for the quarter are shown in Table 3.

Table 3 – Costs

	1Q26	4Q25	HA%	1Q25	HA%
Net Operating Revenues	9,468,313	10,246,790	-7.6%	10,078,571	-6.1%
Cost of Goods Sold	(6,472,497)	(6,765,306)	-4.3%	(6,762,551)	-4.3%
Gross Margin	31.6%	34.0%	-240 bps	32.9%	-130 bps

The cost of goods sold was negatively impacted by higher costs for some raw materials, especially copper, by higher US import tariffs, and by short-term exchange rate volatility. In addition to these effects, the revenue decrease led to lower cost dilution, particularly labor expenses, which affected the gross margin this quarter. Despite this less favorable dynamic during the period, efforts to improve operational efficiency and achieve productivity gains continue to be a decisive factor in maintaining the Company's competitiveness.

Figure 2 – COGS Composition

Sales, General, and Administrative Expenses

Consolidated Sales, General and Administrative (SG&A) expenses totaled R\$ 1,189.0 million in 1Q26, a decrease of 1.5 % vs. 1Q25 and an 5.1% vs. 4Q25. When analyzed relative to net operating revenue, they represented 12.6%, up 60 basis points from 1Q25 and 40 basis points from 4Q25.

EBITDA and EBITDA Margin

The composition of the EBITDA calculation, according to Instruction CVM 156/2022, and the EBITDA margin are shown in Table 4. The EBITDA margin improved compared to the same period of the previous year, mainly due to the current product mix and adjustments to the other operating expenses line, particularly the reversal of the provision for profit sharing from the previous fiscal year.

EBITDA Margin	22.2%	22.4%	-20 bps	21.6%	60 bps

Net Income

Net Income in 1Q26 was R\$ 1,457.2 million, a decrease of 5.7% compared to 1Q25 and a decrease of 8.2% compared to 4Q25. The net margin reached 15.4%, 10 basis points up from 1Q25 and 10 basis points down from 4Q25.

Cash Flow

Cash generation from operating activities was R\$ 1,262.4 million up to March 2026, driven by continued strong operational margins above the historical average and improvements in operational working capital performance indicators during the period.

In investment activities, which include changes in fixed and intangible assets, companies' acquisitions, and financial investments, we spent R\$ 644.7 million. The level of CAPEX⁽³⁾ for modernization and expansion of production capacity continued through investments in factories in Brazil, Mexico and the United States.

In financing activities, the Company raised R\$ 758.7 million and made amortizations of R\$ 1,114.4 million, resulting in a net amortization of R\$ 355.7 million. The result was a consumption of R\$ 357.1 million in financing activities in the period.

Figure 3 – Cash flow reconciliation (figures in R\$ million)

Note that the chart in Figure 3 shows the cash and cash equivalents positions classified as current assets. Furthermore, the Company has R\$ 1,061.5 million in financial investments with no immediate liquidity, including derivative financial instruments (R\$ 1,022.8 million in December 2025).

Return on Invested Capital

The ROIC for 1Q26, accumulated over the last 12 months, reached 33.1%, a decrease of 10 basis points from 1Q25 and an increase of 60 basis points from 4Q25. ROIC remained healthy, with growth in Net Operating Income After Tax (NOPAT) over the last 12 months, despite an increase in capital employed, driven by higher investments in fixed and intangible assets.

Investments (CAPEX)

In 1Q26, we invested R\$ 622.2 million in the modernization and expansion of production capacity, machinery and equipment and software licenses, 50.6% of which went to production units in Brazil and 49.4% to industrial plants and other facilities abroad.

In Brazil, highlights include investments to modernize and expand T&D capacity, as well as to increase the production capacity of industrial motors in Jaraguá do Sul. Outside Brazil, there was increased investment in transformer factories in Mexico, Colombia, and the United States, as well as investments in expanding production capacity in China.

Figure 4 – CAPEX Evolution (figures in R\$ million)

Research, Development, and Innovation

Expenditures on research, development and innovation activities totaled R\$ 366.6 million, representing 3.9% of accumulated net operating revenue in 2026.

Debt and Cash Position

Cash, cash equivalents, invested in first-tier banks and denominated in Brazilian currency, and financial investments and derivatives are presented in Table 5. Likewise, the Company demonstrates the total gross financial debt, with details between short and long-term, in Brazilian reais and other currencies, resulting in the Company's net cash at the end of the quarter.

The total duration of our indebtedness was 11.4 months in March 2026 (13.0 months in December 2025).

Dividends and Interest on Stockholders' Equity

At a meeting held on March 17, the Board of Directors decided to declare interest on equity in the total amount of R\$ 420.1 million before withholding income tax, with payment expected on March 10, 2027.

In December 2025, the payment of interest on equity and dividends for the 2025 fiscal year was anticipated, along with the approval of dividends calculated on the balance of Profit Reserves, to be paid in three annual installments in August 2026, 2027 and 2028. The Company continues its practice of declaring interest on equity quarterly and interim and supplementary dividends, adjusted for these events, seeking to maintain the pay-out level within historical averages.
