Braskem S.A.

Quarterly Information (ITR) at March 31, 2013 and Report on the Review of the Quarterly Information

Report on Review of Quarterly Information

To the Board of Directors and Shareholders
Braskem S.A.

Introduction

We have reviewed the accompanying parent company and consolidated interim accounting information of Braskem S.A., included in the Quarterly Information Form (ITR) for the quarter ended March 31, 2013, comprising the balance sheet as at that date and the statements of operations, comprehensive income, changes in equity and cash flows for the quarter then ended, and a summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation of the parent company interim accounting information in accordance with the accounting standard CPC 21 - Interim Financial Reporting, of the Brazilian Accounting Pronouncements Committee (CPC), and of the consolidated interim accounting information in accordance with CPC 21 and International Accounting Standard (IAS) 34 - Interim Financial Reporting issued by the International Accounting Standards Board (IASB), as well as the presentation of this information in accordance with the standards issued by the Brazilian Securities Commission (CVM), applicable to the preparation of the Quarterly Information (ITR). Our responsibility is to express a conclusion on this interim accounting information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and International Standards on Reviews of Interim Financial Information (NBC TR 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity and ISRE 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Brazilian and International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the parent company interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying parent company interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Conclusion on the consolidated interim information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim accounting information included in the quarterly information referred to above has not been prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Information, and presented in accordance with the standards issued by the CVM.

Other matters

Statements of value added

We have also reviewed the parent company and consolidated statements of value added for the quarter ended March 31, 2013. These statements are the responsibility of the Company's management, and are required to be presented in accordance with standards issued by the CVM applicable to the preparation of Quarterly Information (ITR) and are considered supplementary information under IFRS, which do not require the presentation of the statement of value added. These statements have been submitted to the same review procedures described above and, based on our review, nothing has come to our attention that causes us to believe that they have not been prepared, in all material respects, in a manner consistent with the parent company and consolidated interim accounting information taken as a whole.

1. Operations

Braskem S.A. (hereinafter "Parent Company") is a public corporation headquartered in Camaçari, Bahia, which jointly with its subsidiaries (hereinafter "Braskem" or "Company"), operates 36 industrial units, 29 in Brazil, 5 in the United States and 2 in Germany.

Braskem S.A. is controlled by Odebrecht S.A. ("Odebrecht"), which indirectly holds interests of 50.11% and 38.11% in its voting and total capital, respectively.

(a) Material operating events

(a.1) On August 17, 2012, the Company inaugurated, in Marechal Deodoro, Alagoas, a new plant with annual production capacity of 200 kton (unaudited) of polyvinyl chloride ("PVC"). With the plant's opening, Braskem's annual PVC production capacity increased to 710 kton (unaudited).

(a.2) On September 13, 2012, the Company inaugurated, in the Triunfo Petrochemical Complex in the state of Rio Grande do Sul, a new plant with annual production capacity of 103 kton (unaudited) of butadiene. The new plant is already operating at full production capacity.

(a.3) In the last quarter of 2012, the Management decided to divest the ownership interest held in Cetrel and Braskem Distribuidora. The Parent Company held 54.2% of the total and voting capital of Cetrel and 100% of the capital of Braskem Distribuidora, which were sold on December 28, 2012 for R$208,100 and R$444,000, respectively.

(b) Net working capital

On March 31, 2013, net working capital at the Parent Company and Consolidated were negative R$1,119,853 and R$337,479, respectively. The consolidated figures are used in the management of working capital, since the Company uses mechanisms to transfer funds between the companies efficiently without jeopardizing the fulfillment of the commitments of each of the entities forming the consolidated statements. For this reason, any analysis of the Parent Company's working capital will not reflect the actual liquidity position of the consolidated group. Although the consolidated net working capital is negative, the Company does not have any issue regarding liquidity, since this condition is only temporary, for the following reason. Braskem S.A. and the Idesa Group are temporarily financing the installation of the Ethylene XXI Project in Mexico of the subsidiary Braskem Idesa. The funds required are loaned by the shareholders proportionally to their interest in the capital of Braskem Idesa. As of March 31, 2013, a total of R$1,689 million had been loaned, of which R$1,265 million by Braskem and R$424 million by the Idesa Group. These loans will be repaid upon the release of funds under the Project Finance structure. The contracts related to such loans were executed in December 2012 and the first disbursement is expected to take place in the coming months. The amount owed to the Idesa Group is recorded in "other accounts payable" under current liabilities in the consolidated financial statements (Note 22).

Additionally, Braskem has three revolving credit lines in the amounts of: (i) US$350 million that may be used without restrictions for a period of four years as from November 2012; and (ii) US$250 million that may be used without restrictions for a period of five years as from August 2011; and (iii) R$450 million for a period of three years as from December 2012. These credit facilities enable Braskem to reduce the amount of cash it holds. Up to March 31, 2013, Braskem had not drawn credit from these lines.

(c) Effect of foreign exchange variation

The Company has balances and transactions in U.S. dollar, as well as financial investments, trade accounts receivable, trade payables, borrowings and sales. The balances of assets and liabilities are translated based on the exchange rate at the end of each period, while transactions are based on the effective exchange rate on the date each operation occurs. These rates are informed by the Central Bank of Brazil.

The following table shows the U.S. dollar average and end-of-period exchange rates for the periods in this report:

U.S. dollar, end of period	
March 2013	R$ 2.0138
December 2012	R$ 2.0435
Appreciation of the Brazilian real in relation to the U.S. dollar	1.45%
Average U.S. dollar rate	
Three-month period ended March 31, 2013	R$ 1.9957
Three-month period ended March 31, 2012	R$ 1.7701
Appreciation of the U.S. dollar in relation to the Brazilian real	12.02%

2. Summary of significant accounting policies

2.1. Basis of preparation

This Quarterly Information should be read together with the financial statements of Braskem S.A. as of December 31, 2012 and for the year then ended, which were prepared and presented in accordance with accounting practices adopted in Brazil, including the pronouncements issued by the Brazilian Accounting Pronouncements Committee (CPC), and in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB).

The preparation of the quarterly information requires the use of certain critical accounting estimates. It also requires the Management of the Company to exercise its judgment in the process of applying its accounting policies. There were no changes in the assumptions and judgments made by the Company's management in the use of estimates for the preparation of the Quarterly Information in relation to those used in the December 31, 2012 financial statements.

The statement of operations and segment information (Note 31) for the first quarter of 2012 were restated to reflect the divestments of Cetrel S.A. ("Cetrel") and of Distribuidora de Água Camaçari S.A. ("Braskem Distribuidora"), as well as the decision to divest IQ Soluções & Química S.A. ("Quantiq") and IQAG Armazéns Gerais Ltda. ("IQAG") (Note 3). The balance sheet and the statement of changes in equity of December 31, 2012 have been revised in order to reflect the retrospective effects of the adoption of new standards CPC 33 (R1) (IAS 19), as described in Note 21.

(a) Consolidated quarterly information

The consolidated Quarterly Information was prepared and is being presented in accordance with the pronouncements CPC 21 (R1) and IAS 34 - Interim Financial Reporting, which establish the minimum content for interim financial statements.

(b) Parent company quarterly information

The parent company Quarterly Information was prepared and is being presented in accordance with pronouncement CPC 21.

2.2. Accounting policies

There were no changes in the accounting practices used in the preparation of the Quarterly Information in relation to those presented in the December 31, 2012 financial statements, except for the method for recognizing the cost components of defined benefit plans (Note 2.2.1). The accounting practice adopted complies with IAS 19 and CPC 33 (R1).

2.2.1 Defined benefit plans

The defined benefit plans are financed by contributions to pension funds and the use of actuarial assumptions is necessary to measure the liability and the expenses of the plans, as well as the existence of actuarial gains and losses.

The liability recognized in respect of these plans is the present value of the defined benefit obligation at the balance sheet date, less the fair value of plan assets, adjusted by actuarial gains or losses and past-service costs.

The cost components of defined-benefit plans are recognized as follows:

(i) actuarial gains and losses from the actuarial remeasurement are recognized under "other comprehensive income".

(ii) immediate recognition of the costs of past services in the profit or loss as they are incurred; and

(iii) the net amount of interest on the assets and liabilities of the plan are recorded in the financial results of the period.

Until 2013, it was possible not to recognize item (i) above if the amount was lower than 10% (a) of the amount of the current defined benefit obligation; and (b) of the fair value of any plan assets. As of 2013, the amount must be recognized at the moment it is determined. The effects of this change in accounting standard are described in Note 21.

2.3. Consolidated quarterly information

The consolidated quarterly information includes the quarterly information of the Parent Company and companies in which it, directly or indirectly, maintains a controlling equity interest or controls the activities, as presented below:

3. Held-for-sale assets and discontinued operations

Quantiq and IQAG

These investments are in the process of sale and the Management of the Company estimates that the negotiations will be concluded in 2013.

The operating profits or losses of Quantiq and IQAG were presented in the segment information as operating segment "Chemical distribution" (Note 31). The operating profits or losses of this segment in the first quarter of 2012 were R$6,262.

The profits and losses of Quantiq and IQAG in 2012 are presented under "profit or loss from discontinued operations" in the consolidated statement of operations, and further detailed in item(c) of this Note. The assets and liabilities of these companies on December 31, 2012 are presented under "held-for-sale assets" and "held-for-sale liabilities", respectively. These amounts should be assessed at the lowest between the book value as of December 31, 2012 and fair value, until the sale or eventual withdrawal from the transaction.

Profit or loss from discontinued operations is recognized after eliminating the revenues and expenses arising from any commercial and financial operations carried out among the companies.

The statements of cash flow and of value added include the results from discontinued operations.

20. Advances from customers – consolidated current liabilities

The main change in this item is related to advances made by clients abroad for the purchase of products in 2013.

The information related to advances from customers was presented in the 2012 annual financial statements of the Company, in Note 26.

21. Defined-benefit plans

The amounts recognized for defined benefit pension plans are as follows:

		Consolidated	
		Mar/2013	Dec/2012
Petros Copesul		160,645	147,175
Novamont Braskem America	(i)	9,732	10,381

		195,887	**183,777**

(i) With the adoption of CPC 33 (R1) and IAS 19, the actuarial losses previously unrecognized in these two plans, in the amount of R$18,204 (R$11,816 net of income tax) were recognized under "other comprehensive income (loss)" on December 31, 2012. For comparison purposes, the information for December 31, 2011 has not been revised, since the amounts are immaterial.

22. Other accounts payable – consolidated

The main variation was the addition to amounts payable to the non-controlling shareholder of Braskem Idesa of R$163,760, due in 2013, arising from loans for the Ethylene XXI Project, which will be reimbursed upon disbursement of funds from the associated Project Finance structure.

The information related to other accounts payable was presented in the 2012 annual financial statements of the Company, in Note 27.

23. Contingencies

The Company has contingent liabilities related to lawsuits and administrative proceedings arising from the normal course of its business. These contingencies are of a labor and social security, tax, civil and corporate nature and involve risks of losses that are classified by the Company's management as possible. A provision for the lawsuits for which the risk of loss is classified as probable is recognized and is presented in Note 19 of this Quarterly Information.

During the quarter, various lawsuits and proceedings whose chance of loss was deemed as possible were concluded with no impact on the profit or loss for the period, including those whose final ruling was against the Company. In these cases, the lawsuits and proceedings had judicial deposits. The balance of contingencies at March 31, 2013 is as follows:

	Consolidated	
	Mar/2013	Dec/2012
Tax claims	2,875,017	2,967,799
Other lawsuits	336,292	411,324
Total	**3,211,309**	**3,379,123**

The description of the main contingent liabilities of the Company was presented in the 2012 annual financial statements, in Note 28.

Fair value hierarchy

Level 1 – fair value obtained through prices quoted (without adjustments) in active markets for identical assets or liabilities, such as the stock exchange.

Level 2 – fair value obtained from discounted cash flow models, when the instrument is a forward purchase or sale or a swap contract, or valuation models of option contracts, such as the Black-Scholes model, when the derivative has the characteristics of an option.

24.2. Derivative financial instruments

The objective of swap transactions is to reduce cash flow volatility by causing the fluctuation in interest on debt to match the return on cash in Brazilian real.

(b.1) Estimated maximum loss

The amount at risk of the derivatives held by Braskem on March 31, 2013, which is defined as the highest loss that could result in one month and in 95% of the cases under normal market conditions, was estimated by the Company at US$14,259 for the NCE swaps, R$2,450 for currency swaps, and US$114,259 for fixed rate / CDI swaps.

24.3. Credit quality of financial assets

(a) Trade accounts receivable

Only a few of the Company's customers have risk ratings assigned by credit rating agencies. For this reason, the Company developed its own credit rating system for all accounts receivable from domestic customers and for part of the accounts receivable from foreign customers. The Company does not apply this rating to all of its foreign customers because most accounts receivable from them are covered by an insurance policy or letters of credit issued by banks. On March 31, 2013, the credit ratings were as follows:

			Percentage
1	Minimum risk		16.69%
2	Low risk		26.33%
3	Moderate risk		27.84%
4	High risk		27.53%
5	Very high risk	(i)	1.61%

(i) Most customers in this group are inactive and the respective accounts are in the process of collection actions in the courts. Customers in this group that are still active buy from Braskem and pay in advance.

	53,153	168,876
Total	**3,252,614**	**3,494,257**

(i) Financial assets with no internal or external ratings and approved by the Management of the Company.
(ii) Investment funds with no assessment of internal or external risk, whose portfolio is composed of assets from major financial institutions and that comply with Braskem's financial policy.
(iii) Risk-free financial assets

Braskem's financial policy determines "A-" as the minimum rating for financial investments.

24.4. Sensitivity analysis

Financial instruments, including derivatives, may be subject to changes in their fair value as a result of the variation in commodity prices, foreign exchange rates, interest rates, shares and share indexes, price indexes and other variables. The sensitivity of the derivative and non-derivative financial instruments to these variables are presented below:

(a) Selection of risks

On March 31, 2013, the main risks that can affect the value of the Company's financial instruments are:

- Brazilian real/U.S. dollar exchange rate;
- LIBOR floating interest rate;
- CDI interest rate; and
- TJLP interest rate.

For the purposes of the risk sensitivity analysis, the Company presents the exposures to currencies as if they were independent, that is, without reflecting in the exposure to a foreign exchange rate the risks of the variation in other foreign exchange rates that could be directly influenced by it.

(b) Selection of scenarios

In accordance with CVM Instruction No. 475/08, the Company included three scenarios in the sensitivity analysis, with one that is probable and two that represent adverse effects to the Company. In the preparation of the adverse scenarios, only the impact of the variables on the financial instruments, including derivatives, and on the items covered by hedge transactions, was considered. The overall impacts on the Company's operations, such as those arising from the revaluation of inventories and revenue and future costs, were not considered. Since the Company manages its exposure to foreign exchange rate risk on a net basis, adverse effects from depreciation in the Brazilian real in relation to the U.S. dollar can be offset by opposing effects on Braskem's operating results.

(b.1) Probable scenario

The *Market Readout* published by the Central Bank of Brazil on March 29, 2013 was used to create the probable scenario for the U.S. dollar/Brazilian real exchange rate and the CDI interest rate, using the reference date of December 31, 2013. The *Market Readout* presents a consensus of market expectations based on a survey of the forecasts made by various financial and non-financial institutions.

The *Market Readout* does not publish forecasts for the interest rates LIBOR and TJLP. Therefore, the Company considered the expectations for the CDI interest rate for determining the probable scenario for those rates, given their correspondence. The probable scenario for the TJLP is an increase of 0.5% from the current rate of 5%, in line with the size of the government's most recent decisions to increase or decrease the rate, and accompanying the forecast for the cumulative increase in the CDI rate by end-2013 of 1.25%.

(b.2) Possible and extreme adverse scenarios

For the Brazilian real/U.S. dollar exchange rate, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the exchange rate on March 31, 2013.

For the CDI interest rate, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the interest rate on March 31, 2013.

For the LIBOR interest rate, a positive change of 25% was considered for the possible adverse scenario and of 50% for the extreme scenario based on the LIBOR rate on March 31, 2013.

For the TJLP interest rate, an increase of 1% was considered for the possible adverse scenario and of 1.5% for the extreme scenario based on its rate on March 31, 2013, in accordance with the upward or downward adjustments made by the government in the rate, in this order of scale.

The sensitivity values in the table (c) below are the changes in the value of the financial instruments in each scenario, except for tables (d), (e) and (f), which show the changes in future cash flows.

(c) Sensitivity to the Brazilian real/U.S. dollar exchange rate

The sensitivity of each financial instrument, including derivatives and items covered by them, to the variation in the Brazilian real/US dollar exchange rate is presented in the table below:

Instrument	Probable	Possible adverse (25%)	Extreme adverse (50%)
Bonds and MTN	52,501	(1,915,318)	(3,830,635)

(d) Sensitivity of future cash flows to the LIBOR floating interest rate

The sensitivity of future interest income and expenses of each financial instrument, including derivatives and items covered by them, is presented in the table below. The figures represent the impact on financial income (expenses), taking into consideration the average term of the respective instrument.

Instrument	Probable	Possible adverse (25%)	Extreme adverse (50%)
Working capital / structured operations	(566)	(1,664)	(3,328)
Export prepayments	(314)	(924)	(1,849)

(e) Sensitivity of future cash flows to the CDI interest rate

The sensitivity of each financial instrument, including derivatives and items covered by them, to the variation in CDI interest rate is presented in the table below:

Instrument	Probable	Possible adverse (25%)	Extreme adverse (50%)
Export credit notes	(4,807)	(6,977)	(13,994)
