

## NOTICE TO THE MARKET

### **BRAVA WINS THE OTC DISTINGUISHED ACHIEVEMENT AWARD FOR COMPANIES**

**BRAVA ENERGIA S.A.** ("Brava" or "Company") (B3: BRAV3), communicates its investors and the market in general that received the industry's top O&G award and reaches a level of worldwide excellence.

For the first time, an independent Brazilian company wins the **OTC Distinguished Achievement Award for Companies**. The achievement stems from the development of the Full Field Definitive System for the Atlanta Field, a project that positioned BRAVA as the only one to implement a deepwater production system from its initial phase.

The award crowns a cycle of consistent deliveries and demonstrates Brava's capability in executing large-scale complex projects. Winning the OTC's top prize reaffirms our business strategy and sends a positive message to the entire Brazilian industry.

The delivery of Atlanta's Definitive System translates into greater operational predictability, cost control, and efficiency in capital allocation – key pillars for consistent cash flow generation and sustainable value creation for shareholders.

Awarded annually by the Offshore Technology Conference (OTC) in Houston (USA), the prize is considered the "Oscar" of the global oil and gas industry. It recognizes exceptional achievements in technological innovation, leadership, and environmental contributions in offshore development.
