(1) In March 2026, ~26% of the gas produced in Recôncavo was reinjected.

Atlanta – Production was impacted by a targeted intervention carried out on one of the pumps operating within the asset.

Potiguar – The Company has been gradually resuming operations at the facilities that were shut down in October 2025 as a result of an audit conducted by the ANP. Brava expects to return to normalized production levels upon completion of the release process for such facilities.
