# Q1 2022 Earnings Presentation

May 16, 2022

# Disclaimer

This presentation speaks at the date hereof, and Nu Holdings Ltd. (“The Company”) is under no obligation to update or keep current the information contained in this presentation. Any information expressed herein is subject to change without notice. Any market or third-party data included in this presentation has been obtained by the Company from third-party sources; the Company can provide no assurances of the accuracy and completeness of such information and takes no responsibility for such data.

This presentation contains forward-looking statements (the “forward-looking statements”). All statements other than statements of historical fact contained in this presentation may be forward-looking statements and include, but are not limited to, statements regarding the Company’s intent, belief or current expectations. These forward-looking statements are subject to risks and uncertainties, and may include, among others, financial forecasts and estimates based on assumptions or statements regarding plans, objectives and expectations. Although the Company believes that these estimates and forward-looking statements are based upon reasonable assumptions, they are subject to several risks and uncertainties and are made in light of information currently available, and actual results may differ materially from those expressed or implied in the forward-looking statements due to various factors, including those risks and uncertainties included under the captions “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our prospectus dated December 8, 2021 filed with the Securities and Exchange Commission pursuant to Rule 424(b) under the Securities Act of 1933, as amended, and in our Annual Report on Form 20-F for the year ended December 31, 2021, filed with the Securities and Exchange Commission on April 20th, 2021. The Company, its advisers and each of their respective directors, officers and employees disclaim any obligation to update the Company’s view of such risks and uncertainties or to publicly announce the result of any revision to the forward-looking statements made herein, except where it would be required to do so under applicable law. The forward-looking statements can be identified, in certain cases, through the use of words such as “believe,” “may,” “might,” “can,” “could,” “is designed to,” “will,” “aim,” “estimate,” “continue,” “anticipate,” “intend,” “expect,” “forecast”, “plan”, “predict”, “potential”, “aspiration,” “should,” “purpose,” “belief,” and similar, or variations of, or the negative of such words and expressions.

The financial information in this document includes forecasts, projections and other predictive statements that represent the Company’s assumptions and expectations in light of currently available information. These forecasts, projections and other predictive statements are based on the Company’s expectations and are subject to variables and uncertainties. The Company’s actual performance results may differ. Consequently, no guarantee is presented or implied as to the accuracy of specific forecasts, projections or predictive statements contained herein, and undue reliance should not be placed on the forward-looking statements in this presentation, which are inherently uncertain. In addition to IFRS financials, this presentation includes certain summarized, non-audited or non-IFRS financial information. These summarized, non-audited or non-IFRS financial measures are in addition to, and not a substitute for or superior to, measures of financial performance prepared in accordance with IFRS. References in this presentation to “R\$” refer to the Brazilian real, the official currency of Brazil.

# Q1 2022 Results

# Our Model Powers Our Earnings Generating Formula

Rapidly Growing Customer Base

Increasing Revenue Per Customer

Low Cost Operating Platform

Substantial Earnings Power

ACTIVE CUSTOMERS

ARPAC

COST TO SERVE

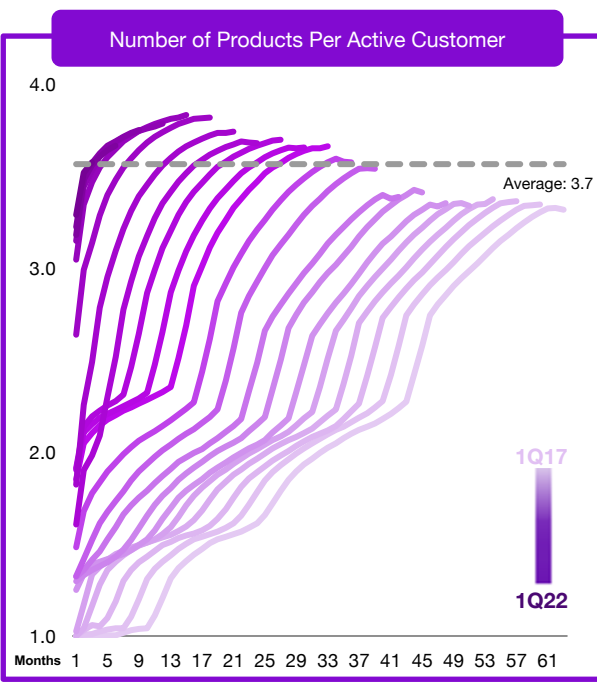

# Customer Acquisition and Activity Rate Continued their Strong Momentum

Note 1: "Activity rate" is defined as monthly active customers divided by the total number of customers as of a specific date. Source: Nu.

# Compounding Effect of More Engagement and Products

**Note 1:** "Primary banking relationship" refers to our relationship with those of our customers who had at least 50% of their post-tax monthly income move in or out of their NuAccount in any given month. We calculate the percent of customers with a primary banking relationship as active customers with a primary banking relationship as a percentage of total active customers that have been with us for more than months. **Note 2:** "Number of products per active customers" refers to the number of active products an active customer has **Note 3:** "Monthly ARPAC" is defined as the average monthly revenue (total revenue divided by the number of months in the period) divided by the average number of individual active customers during the period (average number of individual active customers is defined as the average of the number of monthly active customers at the beginning of the period measured, and the number of monthly active customers at the end of the period). **Note 4:** The averages are calculated for the entire user base for each metric respectively **Source:** Nu.

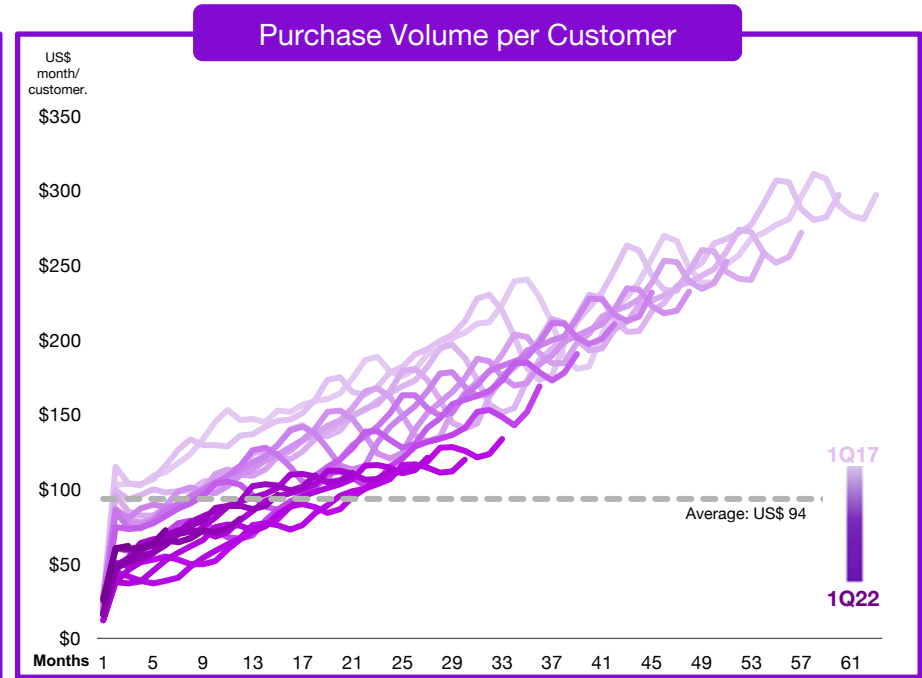

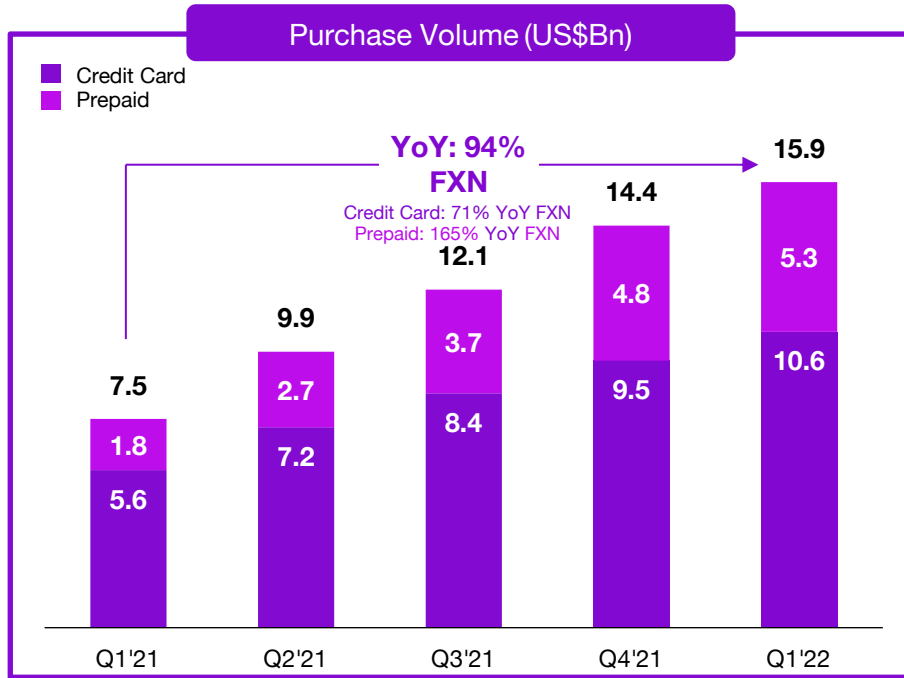

# Compounding Effect of Customer Additions and ARPAC Expansion Driving Revenue Growth

**Note 1:** Amounts are presented in US dollars and growth rates on an FX Neutral basis. For additional detail on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations **Note 2:** "Monthly average revenue per active customer" or "Monthly ARPAC" is defined as the average monthly revenue (total revenue divided by the number of months in the period) divided by the average number of individual active customers during the period (average number of individual active customers is defined as the average of the number of monthly active customers at the beginning of the period measured, and the number of monthly active customers at the end of the period). **Note 3:** In Q1' 22 Nu recognized a gain of US\$14M for the Creditas warrants' fair value. Additional details are shown in Notes 16 of Nu Holdings Financial Statements. **Source:** Nu.

# Strong Purchase Volume Growth Despite Seasonality

**Note 1:** The average represents the average monthly purchase volume per customer defined as the total purchase volume of the period divided by the number of months in the period, divided by the average number of individual customers during the period (average number of individual customers is defined as the average of the number of monthly customers at the beginning of the period measured, and the number of monthly customers at the end of the period). **Source:** Nu.

# Robust Growth in Credit Portfolio

**Note 1:** All amounts are presented gross of provisions **Note 2:** Amounts are presented in US dollars and growth rates on an FX Neutral basis. For additional detail on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations. **Source:** Nu.

# Strong Growth in Deposits Franchise

# Growth Bringing Meaningful Scale Benefits On Cost to Serve

**Note 1:** Amounts are presented in US dollars and growth rates on an FX Neutral basis. For additional detail on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations. **Note 2:** "Cost to serve" is defined as the monthly average of the sum of transactional expenses and customer support and operations expenses (sum of these expenses in the period divided by the number of months in the period) divided by the average number of individual active customers during the period (average number of individual active customers is defined as the average of the number of monthly active customers at the beginning of the period measured, and the number of monthly active customers at the end of the period). **Source:** Nu.

# Continuous Gross Profit Expansion, Despite Front-Loading Loan Loss Provisions

**Note 1:** Amounts are presented in US dollars and growth rates on an FX Neutral basis. For additional detail on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations. **Source:** Nu.

# Sequential Improvement in Adj. Net Income

Note 1: For additional detail on calculations please refer to the appendix Non-IFRS Financial measures and reconciliations Source: Nu.

# Strong Capital and Liquidity Position to Navigate the Cycle

**Note 1:** It considers the capital requirements for Nu Financeira S.A. ("NuFIN"), our main financial institution, as of Q1 22, according to CMN Resolution No. 4.955/21, as well as our commitment to maintain a 14% of minimum total capital ratio. For the purposes of this analysis, we did not consider the Central Bank of Brazil Circular No. 3.681/13, in effect as of March 31, 2022, and applicable to Nu Pagamentos S.A. ("NuPAG"), our main payment institution. The related capital requirements amounted to US\$65M as of Q1 22. **Note 2:** 'LDR' means Loan-Deposit-Ratio which is calculated as the total balance for Interest-Earning Portfolio divided by the total amount of deposits at the end of the same period. **Source:** Nu.

# Delinquency Seasonality in Brazil

Seasonal Factors Derived from Brazil's Central Bank (2014 – 2019)

**Note 1:** Seasonality is calculated with Market data as the 2014-2019 difference average for the respective quarter, for illustration: 0.8% for Q4-Q1 represents the 2014-2019 average difference of the 15-90 days NPLs. **Note 2:** Brazil Only. **Source** Nu - based on Brazil's Central Bank data.

# Losses Continue To Be Below Historical Average

Note 1: The information presented is for Credit Card and Brazil only. Source: Nu.

# Non-IFRS Financial Measures and Reconciliations

Adjusted Net Income (Loss) is defined as profit (loss) attributable to shareholders of the parent company for the period, adjusted for expenses and allocated tax effects on share-based compensation in such period.

Adjusted Net Income (Loss) is presented because our management believes that this non-IFRS financial measure can provide useful information to investors, securities analysts and the public in their review of our operating and financial performance, although it is not calculated in accordance with IFRS or any other generally accepted accounting principles and should not be considered as a measure of performance in isolation. We also use Adjusted Net Income (Loss) as a key profitability measure to assess the performance of our business. We believe Adjusted Net Income (Loss) is useful to evaluate our operating and financial performance for the following reasons:

- Adjusted Net Income (Loss) is widely used by investors and securities analysts to measure a company's operating performance without regard to items that can vary substantially from company to company and from period to period, depending on their accounting and tax methods, the book value and the market value of their assets and liabilities, and the method by which their assets were acquired;
- Non-cash equity grants made to executives, employees or consultants at a certain price and point in time, and their income tax effects, do not necessarily reflect how our business is performing at any particular time and the related expenses (and their subject impacts in the market value of our assets and liabilities) are not key measures of our core operating performance;

Adjusted Net Income (Loss) is not a substitute for Net Income, which is the IFRS measure of earnings. Additionally, our calculation of Adjusted Net Income (Loss) may be different from the calculation used by other companies, including our competitors in the technology and financial services industries, because other companies may not calculate these measures in the same manner as we do, and therefore, our measure may not be comparable to those of other companies.

# Non-IFRS Adj. Net Income Reconciliation

	As reported For the three months ended March 31		
	2022	2021	2020
<b>Adjusted Net Income (Loss) (in US\$ millions):</b>			
Profit (loss) attributable to shareholders of the parent company	(45.1)	(49.5)	(30.3)
Share-based compensation	77.7	48.9	8.5
Allocated tax effects on share-based compensation	(22.5)	(11.3)	(1.9)
<b>Adjusted Net Income (Loss) for the period</b>	<b>10.1</b>	<b>(11.9)</b>	<b>(23.7)</b>

# Non-IFRS Financial Measures and Reconciliations

FX Neutral measures are prepared and presented to eliminate the effect of foreign exchange, or “FX,” volatility between the comparison periods, allowing management and investors to evaluate our financial performance despite variations in foreign currency exchange rates, which may not be indicative of our core operating results and business outlook.

FX Neutral measures are presented because our management believes that these non-IFRS financial measures can provide useful information to investors, securities analysts and the public in their review of our operating and financial performance, although they are not calculated in accordance with IFRS or any other generally accepted accounting principles and should not be considered as a measure of performance in isolation.

The FX Neutral measures were calculated to present what such measures in preceding periods would have been had exchange rates remained stable from these preceding periods until the date of the Company's most recent financial information.

The FX Neutral measures for the three months ended March 31, 2021 were calculated by multiplying the as reported amounts of Adjusted Net Income (Loss) and the key business metrics for such period by the average Brazilian reais /U.S. dollars exchange rate for the three months ended March 31, 2021 (R\$5.570 to US\$1.00) and using such results to re-translate the corresponding amounts back to U.S. dollars by dividing them by the average Brazilian reais/U.S. dollars exchange rate for the three months ended March 31, 2022 (R\$5.068 to US\$1.00), so as to present what certain of our statement of profit and loss amounts and key business metrics would have been had exchange rates remained stable from this past period until the three months ended March 31, 2022.

The average Brazilian reais/U.S. dollars exchange rates were calculated as the average of the month-end rates for each month in the three months ended March 31, 2022 and 2021 as reported by Bloomberg.

FX Neutral measures for deposits and interest-earning portfolio were calculated by multiplying the as reported amounts as of March 31, 2021, by the spot Brazilian reais/U.S. dollars exchange rates as of this date (R\$5.634 to US\$1.00), and using such results to re-translate the corresponding amounts back to U.S. dollars by dividing them by using the spot rate as of March 31, 2022 (R\$4.742 to US\$1.00) so as to present what these amounts would have been had exchange rates been the same as those on March 31, 2021. The Brazilian reais/U.S. dollars exchange rates were calculated using rates as of such dates as reported by Bloomberg.

# Non-IFRS Financial Measures and Reconciliations

FX Rates - On a monthly basis, Nu translates its subsidiaries figures from their individual functional currency into Nu Holdings functional currency, the U.S. Dollars ("US\$"), following the requirements of IAS 21 "The Effects of Changes in Foreign Exchange Rates". The functional currency of the Brazilian operating entities is the Brazilian Real ("R\$"), of the Mexican entities is the Mexican Peso ("MXN"), and of the Colombian ("COP") entity is the Colombian Peso.

As of January 31, 2022, income statement figures were divided by the average FX Rate of the month (R\$ 5.5295, MXN 20.5014 and COP 3,998.1929 to US\$ 1.00) and balance sheet figures were divided by the last price FX rate of the month (R\$ 5.3102, MXN 20.5336 and COP 3,947.0100 to US\$ 1.00).

As of February 28, 2022, income statement figures were divided by the average FX Rate of the month (R\$ 5.1929, MXN 20.4532 and COP 3,937.9400 to US\$ 1.00) and balance sheet figures were divided by the last price FX Rate of the month (R\$ 5.1522, MXN 20.4692 and COP 3,937.9400 to US\$ 1.00).

As of March 31, 2022, income statement figures were divided by the average FX Rate of the month (R\$ 4.9620, MXN 20.5400 and COP 3,798.9841 to US\$ 1.00) and balance sheet figures were divided by the last price FX Rate of the month (R\$ 4.7417, MXN 19.8699 and COP 3,771.0500 to US\$ 1.00). Equity figures are translated using the FX Rate on the date of each transaction.
