- **Net Revenue: R\$2.4 billion in 3Q25 (-13% vs. 3Q24).** Impact from a 15% decrease in physical sales volumes, driven by the performance in the commercial vehicle market and by the appreciation of the Brazilian real, partially offset by a better product mix and the performance of the aftermarket, energy & decarbonization businesses.

- **Adjusted EBITDA: R\$165 million (-51% vs. 3Q24),** with a margin of 7% (vs. 12% in 3Q24), mainly affected by the traditional business performance e by the appreciation of the Brazilian Real.

**The margin of the traditional business,** which includes structural components and hydraulic products, reached **5% in 3Q25.** The double-digit decline in sales and production volumes, which affected operational efficiency, quality indicators, and the dilution of costs and expenses, had an approximately R\$210 million impact on EBITDA in the quarter. The margin of **MWM's operations stood at 11% in the period.**

- **Operating Cash Flow: generation of R\$383 million** (vs. R\$227 million in 3Q24). Record cash flow generation for the Company in a third quarter mainly due to working capital management initiatives, with a 6-day reduction in the cash conversion cycle compared to the previous quarter (2Q25).
- **Financial Result: net expense of R\$68 million (vs. an expense of R\$83 million in 3Q24),** due to the positive impact of exchange rate variation on balance sheet accounts in foreign currency and the result of hedge operations (which recorded a negative result in 2024).
- **Net Result: loss of R\$40 million,** due to operating performance, partially offset by better financial results, and the currency effect on tax base (a positive impact of R\$79 million year over year).

## MESSAGE FROM MANAGEMENT

Tupy operates in strategic sectors such as cargo transportation, infrastructure and agriculture. Although these segments have solid fundamentals, they have been affected by significant temporary market factors.

Geopolitical conflicts and trade barriers have generated inflationary pressures, with direct effects on interest rates and purchasing power. This environment has been undermining business and consumer confidence, affecting demand in the markets where we operate. Lower freight prices have led transportation companies to postpone fleet replacement and expansion. Automakers, in turn, have also adopted a conservative approach, focused on reducing inventories. Since the purchase of trucks, machinery and equipment represents an investment in capital goods, the decision to buy depends directly on the performance and predictability of sector and macroeconomic indicators. Therefore, the current environment of uncertainty has contributed to a decline in demand.

In Brazil, the combination of high interest rates, more restrictive credit policies, and the weak performance of the agribusiness sector has negatively affected sales of heavy and extra-heavy commercial vehicles.

As a result, physical sales volume in the Structural Components segment declined by 15% compared to the same period last year.

This impact was partially offset by revenue growth in the Energy & Decarbonization, and Distribution Business Units. Consolidated net revenue totaled R\$2.4 billion in the quarter. The favorable evolution of price and product mix partially offset the negative impacts from physical sales volumes and exchange rate, resulting in a decrease of 13% compared to the same period in 2024.

Adjusted EBITDA came to R\$165 million, down by 51% year over year, with a margin of 7% on net revenue, with the indicator mainly impacted by the decline in volumes and the appreciation of the Brazilian Real.

Among the measures adopted for working capital management, the reduction in production volume, which reached a level below sales, stands out as an adjustment to demand. This strategy, although necessary, affected fixed cost dilution. Combined, the impact on EBITDA related to lower sales and production volumes in the quarter totaled R\$210 million.

### **Traditional Business: focus on value creation and efficiency improvement**

We carried out market initiatives that resulted in competitiveness gains, and combined with a higher value-added product mix, contributed to the improved quality of contracts.

Our plants are located in strategic countries, allowing us to meet the growing demand for local content development, especially in Brazil and Mexico. In addition to expanding global service capacity, this geographic diversification represents an important risk-mitigation mechanism, especially in a scenario marked by increased trade protectionism and geopolitical instability.

The acquisitions carried out were strategic and included relevant operational synergies, such as the shutdown of less efficient production lines. This process, included in the business plan, began in 2024 and has been intensifying, reinforcing the Company's commitment to the efficient allocation of resources. The strategy involves the gradual reduction of installed capacity and the reallocation of

production among units, considering the characteristics of new product generations and proximity to key markets and customers.

This approach enables scale gains, greater operational flexibility, and alignment with specific demands of each region, strengthening our competitiveness in the global environment. As part of the integration plan for the plants acquired in Aveiro and Betim, the Company is conducting an industrial reorganization, which will result in a reduction of approximately 25% in installed capacity compared to the post-acquisition scenario.

This is a highly complex project, involving the handling of products among three lines, and encompassing approximately 100,000 work hours. The effects of these actions will begin to be felt in 2026, with gains of R\$100 million, resulting from the reduction of fixed costs. As of 2027, this impact is expected to increase to R\$180 million per year, reflecting total scale and efficiency gains.

In recent months, efforts have been directed toward plant flexibility, with the development of tooling and processes, as well as customer approvals. These initiatives did not impact on the results for the period.

In parallel with this movement resulting from the acquisitions, our strategy includes defining the ideal footprint in each region where we operate, aiming to maximize returns on current projects and allocate new products, following the growth and evolution of our customers, in a scenario where future demand for combustion engines has proven increasingly resilient, including the resumption of production of previously discontinued products.

This new configuration makes production even more flexible, adjusting manufacturing capacity to market cycles and allowing for its expansion as conditions return to normal, while also ensuring the absorption of potential demand peaks.

All industrial reorganization and capacity consolidation actions are aligned with the strategic premise that each plant must operate with a return above the Company's cost of capital, ensuring sustainable value creation for shareholders.

In this quarter, we also made progress in executing projects aimed at operational efficiency and structure reduction. The automation of casting finishing activities and other management initiatives will contribute to significant quality improvements, cost reductions, and increased competitiveness. These will be recurring gains that will contribute to margin improvement in a scenario of volume resumption and will impact EBITDA margin by at least 2 percentage points in 2026.

We also continued executing the inventory reduction project, which had an impact of R\$62 million in the third quarter. This plan will still generate additional benefits of approximately R\$200 million by December 2025, supported by production planning actions at the plants and within the supply chain.

### **MWM: growth and margin expansion**

We are building a larger, more diversified Company, with a presence in high-growth, high-value-added segments. Despite the 1% decrease in revenue, resulting from the reduction in heavy trucks production in Brazil and the consequent impact on the Manufacturing Contracts Business Unit, the EBITDA margin for MWM reached 11% in 3Q25, an increase of 4 percentage points compared to the same period last

year. This is the result of a series of initiatives focused on the restructuring of lines, processes, and structures, leading to reductions in costs and expenses.

Sales of generator sets continued on a strong path, with double-digit growth. Scale gains and ongoing improvements in operational efficiency contributed to the increase in EBITDA margin. We expanded our product portfolio, which will enable entry into new markets, such as larger machines used in datacenters.

In the aftermarket segment, sales increased 13% in the first nine months of the year, driven by the “Masterparts” and “Optional” lines, which grew more than 40% and now account for 20% of revenue. The expansion of the portfolio and the inclusion of new distribution channels contributed to 3Q25 recording the best historical sales performance for this Business Unit.

We also completed the reorganization of the Parts Distribution Center, increasing productivity by 38%. This is a countercyclical segment that benefits from declines in truck and machinery sales, and presents higher margins than the Company’s other businesses.

We announced a commercial and technological partnership with Yuchai, one of the world’s largest engine manufacturers. The agreement includes opportunities such as the development of biomethane and ethanol engines, aligned with the high demand for viable decarbonization solutions that benefit the renewable energy matrix available in Brazil. In addition to the distribution of aftermarket and the expansion of the product portfolio, particularly for larger applications such as workboats and generators used in datacenters.

We also started operations at the Bioplant located in Ouro Verde do Oeste, near Toledo (PR), with a current production capacity of 1,440 m<sup>3</sup>/day of biomethane and 20 tons of fertilizer per day. The second half of the year has been dedicated to validating and adjusting the manufacturing process and the commercialization model. In parallel, the Company continues with the licensing and construction plan for the Bioplants in Divinópolis (MG) and Seara (SC), which will increase the total combined capacity to over 300 tons of fertilizer per day and 11,400 m<sup>3</sup> of biomethane. The completion of these projects will enable the Company’s scalability plan in the protein production chain, in partnership with the main cooperatives and integrators in Brazil. Considering the systems in which we already operate, we estimate a potential market for the use of organic inputs derived from 8 million pigs (vs. 265 thousand from the projects already announced).

The next few quarters will be marked by challenges, with macroeconomic uncertainties and cyclical factors that will continue to impact the key markets in which we operate. In this context, operational efficiency and disciplined capital allocation becomes even more important. We are reviewing structures and processes in key areas such as Quality, Maintenance, and Procurement to build a more efficient Company, prepared to meet the growing demand for complex solutions and high value-added services, focused on perennial and strategic sectors of the global economy.

## REVENUES

In 3Q25, 35% of revenue originated in North America. The South and Central Americas, in turn, accounted for 48%, and Europe for 14%. The remaining 3% came from Asia, Africa, and Oceania, and the acquired plants contributed to a higher exposure to the Brazilian and European markets.

Note: the division among applications considers our best assumption for cases in which the same product is in two applications.

## REVENUE BY BUSINESS UNIT

### Structural components and manufacturing contracts

The decline in revenue was primarily driven by lower sales volumes of commercial vehicle applications in the North American market. The uncertainty related to tariffs and their effects on economic variables such as inflation and interest rates, as well as on depressed sector indicators (freight prices and capacity utilization), continues to affect demand for commercial vehicles, as transportation companies have postponed fleet renewal and expansion.

In the European market, this scenario was partially mitigated by investments in infrastructure and defense. However, sales remained below those of the same period in 2024, mainly due to fleet renewal.

In Brazil, while the bus segment has performed well, supported by government programs, the heavy vehicle market has been negatively affected by restrictive financing conditions and by the performance of the agribusiness sector, impacted by commodity prices and the appreciation of the Brazilian real against the U.S. dollar. Indirect exports by our clients also had a negative impact on the period's results.

This scenario impacted customers' production levels, as they have adopted inventory reduction strategies, affecting sales in the Structural Components and Manufacturing Contracts business units.

The off-road segment, which is characterized by long production chains, has benefited from the non-residential construction sector, especially in the foreign market, resulting in higher demand for large-engine applications.

The quarterly result was also impacted by the currency appreciation (average BRL/USD rate of 5.45 in 3Q25 vs. 5.55 in 3Q24), partially offset by a more favorable product mix.

Currently, approximately 45% of revenue comes from higher value-added products, such as machined and/or assembled components.

## Energy and decarbonization

| $\Delta$ % Revenues                                                                   | % Revenues DM | % Revenues FM |
|---------------------------------------------------------------------------------------|---------------|---------------|
| 39%  | 16%           | 2%            |

The result is primarily driven by revenues from generator sets, which increased by 36%, due to a higher number of units sold and a product mix with a higher average price. The EBITDA margin of this product, in turn, is already above 10%.

This performance, combined with the growth in MWM engine sales and new businesses, contributed to an increase of 39% in the revenue of the Energy & Decarbonization Unit, compared to the same period of the previous year.

This business unit accounted for 8% of the Company's total revenue in the period.

### Aftermarket

| $\Delta$ % Revenues                                                                   | % Revenues DM | % Revenues FM |
|---------------------------------------------------------------------------------------|---------------|---------------|
| 6%  | 12%           | 2%            |

Revenue from the aftermarket grew by 6%, reflecting the launch of new product lines ("Masterparts", a multi-brand product line, and "Linha Opcional", a more competitive line for MWM-branded products). We highlight the record sales achieved in the quarter, driven by new products, the addition of new distribution channels, and improved operational efficiency.

The segment accounted for 6% of the Company's total revenue in the third quarter of 2025.

## COST OF GOODS SOLD AND OPERATING EXPENSES

Cost of goods sold (COGS) totaled R\$2.1 billion in 3Q25, down by 8% from the same period last year.

The decline in production volumes, which fell more sharply than sales, affected fixed cost dilution and impacted gross margin, which reached 13% in the period.

Costs in 3Q25 were also affected by:

- Raw material: reduced due to lower volumes in the period, offset by materials inflation and a higher share of value-added products;
- Labor: decline due to headcount reduction, mitigating the effect of inflation (annual salary adjustment);
- Maintenance and third-party services: reduced due to management initiatives, partially offsetting the inflation of services;
- Energy: reduced mainly due to the lower sales volume. Higher use of electric furnaces was observed in the period, offset by gains in other cost lines;
- Other operating costs: increased mainly due to costs with the handling of products and materials, engine engineering projects, leases, and health and safety, among other items. The comparison base was affected by non-recurring gains in 3Q24 (reversal of asset write-offs).

Operating expenses, including administrative and selling expenses, reached R\$230 million, down by 9% vs. 3Q24, mainly due to lower freight expenses (volumes and commercial negotiations).

## OTHER OPERATING INCOME/ (EXPENSES)

Other Net Operating Income/Expenses came in as an expense of R\$52 million in 3Q25, compared to an expense of R\$38 million in the previous year.

| Consolidated (R\$ thousand)                                                 |                 |                 |              |                  |                  |             |

| <b>Net financial result</b>          | <b>(67,540)</b> | <b>(82,821)</b> | <b>-18.5%</b> | <b>(204,811)</b> | <b>(311,301)</b> | <b>-34.2%</b> |

Financial expenses increased by 6% from last year. The effects of higher interest rates in Brazil that impacted the provision of interest in domestic currency were mitigated by a reduction in indebtedness, with R\$366 million in amortizations during the first half of the year.

Financial income reached R\$38 million in the period, boosted by higher interest rates which, together with the resource allocation strategy, mitigated the lower cash balance compared to the same period last year.

Income from net monetary and exchange rate variations totaled R\$11 million, composed of (i) positive variations in balance sheet accounts in foreign currency, of R\$3 million. Currency exposure management initiatives mitigated the impact of the appreciation of the Brazilian real against the U.S. dollar; and (ii) results from hedge operations, corresponding to R\$8 million in income for the period. Of which R\$8.5 million refers to mark-to-market gains on foreign exchange hedge instruments, and R\$0.5 million to cash-effect losses from settled operations.

## EARNINGS BEFORE TAX EFFECTS AND NET INCOME/LOSS

The Company's net result was a loss of R\$40 million, compared to a profit of R\$50 million in the same period last year, impacted by lower operating results, partially offset by financial income and currency effects on tax bases.

| Consolidated (R\$ thousand)                                 |                 |                |          |                 |                |               |

The tax bases of the assets and liabilities of the companies located in Mexico, where the functional currency is the U.S. dollar, are held in Mexican pesos at their historical values. Fluctuations in exchange rates affect the tax bases and, consequently, the currency effects are recorded as deferred income tax revenues and/or expenses. In 3Q25, the Company recorded revenue of R\$40 million, with no cash effect (vs. an expense of R\$39 million in 3Q24).

## EBITDA

The combination of the aforementioned factors resulted in CVM EBITDA of R\$114 million, with a margin of 5% (vs. 11% in 3Q24). Adjusted EBITDA for other operating expenses and income (constitution/reversal of provisions, write-off of fixed assets, sale of unserviceable assets, and restructuring expenses) reached R\$165 million, with a margin of 7% in 3Q25 (vs. 12% in 3Q24).

**The margin of the traditional business, which includes structural components and hydraulic products, reached 5% in 3Q25.** The double-digit decline in sales and production volumes, which affected operational efficiency, quality indicators, and the dilution of costs and expenses, had an impact of approximately R\$210 million on EBITDA. In turn, the unfavorable exchange rate scenario affected the result by R\$20 million in the period. These factors were partially offset by a better product mix and cost-reduction initiatives.

The margin of MMW's operations (Manufacturing Contracts, Aftermarket, and Energy & Decarbonization) stood at 11% in the period. The implementation of manufacturing and organizational optimization projects contributed to a significant increase in the EBITDA margin, which stood at 6% at the time of the acquisition.

## INVESTMENTS IN PP&E AND INTANGIBLE ASSETS

Investments in property, plant and equipment and intangible assets totaled R\$105 million in 3Q25, compared to R\$93 million in 3Q24, representing an increase of 13%.

| Consolidated (R\$ thousand)                           |                |               |              |                |                |              |

| <b>Balance sheet</b>                |           |           |           |           |           |
| Accounts receivable                 | 1,660,082 | 1,935,840 | 2,028,377 | 1,837,435 | 2,110,455 |
| Inventories                         | 1,979,252 | 2,041,125 | 2,134,475 | 2,197,704 | 2,069,851 |
| Accounts payable                    | 1,289,374 | 1,321,633 | 1,574,755 | 1,482,620 | 1,411,298 |
| Advances from customers             | 110,614   | 151,504   | 149,093   | 85,207    | 76,497    |
| Sales outstanding [days]            | 61        | 68        | 70        | 63        | 71        |
| Inventories [days]                  | 85        | 86        | 89        | 92        | 85        |
| Payables outstanding [days]         | 60        | 62        | 73        | 65        | 61        |
| <b>Cash conversion cycle [days]</b> | <b>86</b> | <b>92</b> | <b>86</b> | <b>90</b> | <b>95</b> |

The cash conversion cycle was reduced by 6 days compared to 2Q25.

The main lines presented the following variations:

- Reduction of R\$276 million in accounts receivable, equivalent to a 7-day impact on the average collection period. The result for the period was impacted by a higher concentration of receivables in the third quarter, lower sales volumes, and the appreciation of the Brazilian real against the U.S. dollar compared to the previous quarter (BRL/USD closing rate of 5.32 in September 2025 vs. 5.46 in June 2025), which affected foreign-currency-denominated accounts receivable, accounting for 61% of the total.

- Decrease of R\$62 million in inventories, reducing working capital by one day, driven by management initiatives — mainly related to work in progress — and currency appreciation.
- Reduction of 2 days in the payables outstanding period, resulting from lower inventories, reduced purchase volumes, and currency appreciation, which affected foreign-currency-denominated accounts payable, accounting for 40% of the total.

The calculation of payables outstanding (in days) considers the advance, by customers, of working capital from the engine manufacturing contracts.

## CASH FLOW

The Company reported operating cash generation of R\$383 million, an increase of 69% compared to the previous year, mainly driven by higher receivables, lower disbursements to suppliers, and several working capital management initiatives.

Investment activities consumed R\$110 million in 3Q25, compared to R\$105 million in the same period a year ago.

As for investing activities, we recorded a consumption of R\$58 million in 3Q25 due to debt amortization. The annual comparison was affected by a higher volume of financial amortizations carried out in 3Q24, in addition to the dividend payments and share buybacks in that period.

The combination of these factors and the currency variation on cash, with an impact of R\$3 million, resulted in an increase of R\$212 million in cash and cash equivalents in the period. Accordingly, we ended 3Q25 with a balance of R\$1,649 million.

## INDEBTEDNESS

The Company ended 3Q25 with a net debt of R\$2.3 billion. The decline in LTM Adjusted EBITDA (R\$874 million in 3Q25 vs. R\$1,048 million in 2Q25) contributed to an increase in leverage, which reached 2.58x.

Liabilities in foreign currency accounted for 58% of the total (2% in the short term and 98% in the long term), while 42% of debt is denominated in Brazilian reais (4% in the short term and 96% in the long term). As for cash and cash equivalents, 50% is denominated in foreign currency and 50% in Brazilian reais.

## 1. GENERAL INFORMATION

Tupy S.A. ("Parent Company") and its subsidiaries (jointly, "Company" or "Consolidated") develop engineering solutions applied in the sectors of structural components, manufacturing contracts, energy and decarbonization and distribution that contribute to people's quality of life, promoting access to health, basic sanitation, drinking water, food production and distribution, and global trade. The technological innovation involved in producing and creating highly complex parts is the company's specialty, in its 87-year history. The Company has plants in Brazil, in Joinville-SC, in Ouro Verde do Oeste-PR (Bioplanta), in Betim-MG, in São Paulo-SP and a distribution center in Jundiaí-SP. Abroad, its units are located in the cities of Saltillo and Ramos Arizpe, Mexico, as well as in the city of Aveiro, Portugal. In addition to the industrial plants, the Parent Company has a subsidiary in the Netherlands, which centralizes the Company's operations abroad, for issuing debt securities on the international market. Additionally, it has sales offices in Germany, USA, and Italy.

Tupy S.A. is a corporation (*sociedade anônima*), headquartered in Joinville-SC, registered on the São Paulo Stock Exchange ("B3": TUPY3) and listed on the *Novo Mercado* of B3 S.A.

The issue of these financial statements was authorized by the Board of Directors on November 06, 2025.

## 2. PRESENTATION AND PREPARATION OF THE QUARTERLY INFORMATION

The Company presents the interim financial statements in accordance with the Technical Pronouncement CPC 21 - "Interim Financial Reporting" and International Financial Reporting Standard IAS 34 - "Interim Financial Reporting" issued by the International Accounting Standards Board (IASB), and presented in accordance with the rules and regulations issued by the Brazilian Securities Commission (CVM), applicable to the preparation of interim information, and are identified as "Parent company" and "Consolidated", respectively.

Circular Letter CVM/SNC/SEP 003, of April 28, 2011, permits entities to present selected explanatory notes in cases of redundancy or duplication relative to the information already presented in the Company's annual financial statements. These interim condensed financial statements do not include all of the disclosures required in a complete set of financial statements and should be read together with the annual financial statements for the year ended December 31, 2024.

Accordingly, the Company discloses below a list of the explanatory notes that are not partially or completely presented in the interim condensed financial statements at September 30, 2025.

| <b><i>Not completely repeated</i></b>                                                                                                         | <b><i>Not partially repeated</i></b>                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Investment properties;<br>Salaries, social security charges and profit<br>Sharing;<br>Insurance;<br>Business combination; and<br>Commitments. | Trade receivables;<br>Income tax and social contribution<br>recoverable;<br>Other taxes recoverable;<br>Property, plant and equipment;<br>Intangible assets;<br>Loans and financing;<br>Provision for tax, civil, social security and labor<br>proceedings; and<br>Share capital. |

## 2.1 Basis of preparation, functional and presentation currency

The interim financial statements have been prepared based on the historical cost, except for certain financial instruments, which are measured at their fair values, as described in the accounting policies. The historical cost is generally based on the fair value of the consideration paid in exchange for assets.

The functional and presentation currency are with the same as those for the annual financial statements for the year ended December 31, 2024.

## 2.2 Use of critical accounting estimates and judgments

The preparation of Parent Company and Consolidated interim information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the amounts reported for assets, liabilities, revenue and expenses.

In the preparation of these interim financial statements, the decisions made by the Company regarding the application of accounting policies and the main sources of uncertainty in estimates and critical accounting judgments were the same as those for the annual financial statements for the year ended December 31, 2024, and are disclosed in notes 2.4 and 2.5 of those financial statements.

## 2.3 Significant accounting policies

The accounting policies used in the preparation of these interim financial statements for the period ended September 30, 2025, are consistent with those used to prepare the annual financial statements for the year ended December 31, 2024, these policies are disclosed in note 2 in the annual financial statements.

|                                 | <b>334,146</b> | <b>709,970</b> | <b>1,648,624</b> | <b>2,376,203</b> |

Financial investments presented as cash and cash equivalents are immediately liquid securities and represent a very low risk of change in value, except for exchange rate variations. In country investments are remunerated by the change in the CDI - Interbank Deposit Certificate, with an average rate equivalent to 13.99% per year (average rate 10.78% per year for the year ended December 31, 2024).

Abroad, investments are predominantly in US dollars (US\$) and remunerated at the average rate of 3.60% per year (average rate 4.03% per year on December 31, 2024) called “time deposit” and “overnight”.

The consolidated change in cash and cash equivalents in the period is due to:

- Cash generation from operating activities of R\$ 557,423;
- Repayment of loans and financing of R\$ 538,549;
- Investments in investment activities of R\$ 280,298 (capex) e 40,177 (acquisition);
- Distribution to shareholders of R\$ 189,928;
- Share repurchase of R\$ 156,065; and
- Negative exchange rate variation on cash held in foreign currency of R\$ 107,793.

The Company operates with first-rate institutions, as detailed in note 30.1.

#### 4. ACCOUNTS RECEIVABLE

The trade accounts receivable, indicated by market and by aging, are shown below:

|                                    | Parent company |                | Consolidated     |                  |
|------------------------------------|----------------|----------------|------------------|------------------|
|                                    | Sep/25         | Dec/24         | Sep/25           | Dec/24           |
| Domestic market                    | 217,772        | 162,643        | 624,149          | 464,676          |
| Foreign market                     | 414,259        | 563,271        | 1,085,886        | 1,417,448        |
| Estimate for losses on receivables | (9,862)        | (10,804)       | (49,953)         | (44,689)         |
|                                    | <b>622,169</b> | <b>715,110</b> | <b>1,660,082</b> | <b>1,837,435</b> |

The balance of accounts receivable from the domestic market is denominated in Brazilian Reais; from the foreign market, it is predominantly in US Dollars and, to a lesser extent, in Euros.

The variation observed on September 30, 2025 compared to December 31, 2024 was due to the reduction in the quantity of sales in the period and the appreciation of the Real against the US Dollar, which went from R\$6.1923 on December 31, 2024 to R\$5.3186 on September 30, 2025.

The amount of accounts receivable from the Parent Company includes amounts referring to sales to related parties in the amount of R\$ 407,582 (R\$ 458,271 at December 31, 2024), that are eliminated in Consolidated. (note 9)

|                                    | Parent company |                | Consolidated     |                  |

| Overdue for more than 61 days      | 8,392          | 9,588          | 79,938           | 67,135           |
| <b>Total overdue</b>               | <b>17,784</b>  | <b>28,792</b>  | <b>173,499</b>   | <b>165,991</b>   |
| Estimate for losses on receivables | (9,862)        | (10,804)       | (49,953)         | (44,689)         |
| <b>Total</b>                       | <b>622,169</b> | <b>715,110</b> | <b>1,660,082</b> | <b>1,837,435</b> |

As of September 30, 2025, the estimated loss in accounts receivable from customers represented 2.9% of the outstanding balance (on December 31, 2024, was 2.4%). Regarding to overdue amounts, the Company maintains contact with clients in order to understand and help with any difficulties in the process that may have led to late payment, and in extreme cases may notify them, adopt collection measures provided for in the contract and even suspend further shipments.

## 5. INVENTORIES

|                                 | Parent company |                | Consolidated     |                  |
|---------------------------------|----------------|----------------|------------------|------------------|
|                                 | Sep/25         | Dec/24         | Sep/25           | Dec/24           |
| Finished products               | 236,753        | 243,212        | 670,988          | 752,135          |
| Work in progress                | 122,707        | 149,502        | 569,163          | 697,092          |
| Raw materials                   | 110,884        | 127,620        | 625,048          | 604,806          |
| Maintenance and other materials | 27,662         | 32,271         | 195,802          | 219,915          |
| Estimate for inventory losses   | (9,076)        | (7,099)        | (81,749)         | (76,244)         |
|                                 | <b>488,930</b> | <b>545,506</b> | <b>1,979,252</b> | <b>2,197,704</b> |

Inventories are carried at the average acquisition and/or production cost, considering the full manufacturing costs absorption method, adjusted to the net realizable value, when applicable.

The variation observed in the inventory balance mainly reflects actions to reduce working capital and the appreciation of the Real against the US Dollar, which went from R\$ 6.1923 on December 31, 2024 to R\$ 5.3186 on June 30, 2025.

## 6. RECOVERABLE INCOME TAX AND SOCIAL CONTRIBUTION

**a. ICMS recoverable**

These are credits arising from purchases of raw materials used in the manufacturing process of exported products and purchases of realizable property, plant and equipment, at their origin, in 48 installments, pursuant to applicable state legislation.

The accumulated credit in São Paulo was built up over the years by the subsidiary MWM Tupy do Brasil Ltda., essentially, due to ICMS payments on customs clearance of goods carried out within the state of São Paulo without equivalent consumption counterpart (debits) in view of the representativeness in the operation of export activities (exempt) and interstate sales (carried out at a lower rate than that practiced in said clearance). Said credit has been realized monthly through transfers to third parties.

**b. PIS, COFINS and IPI**

These are credits stemming from the acquisition of inputs used in the production process and are offset against taxes levied on the sale of goods, and to offset other federal taxes for the original portion proportional to export revenues. For credits originating in proportion to revenues from the domestic market, such credits are used by offsetting against a memorandum account.

The variation observed in relation to the balance on December 31, 2024, results from the use to offset federal taxes.

**c. Value added tax – VAT**

These are credits arising from the acquisition of inputs used in the production process of subsidiaries in Mexico and from exports, from companies acquired on October 1, 2021, with customs clearance taking place in Italy. These credits are regularly reimbursed by the respective tax authorities.

The reduction observed compared to the balance as of December 31, 2024, is primarily due to the reimbursement of amounts under review by the Italian tax authorities, and in Mexico, to VAT offsets payable against the recoverable balances.

## 8. DEFERRED INCOME TAX AND SOCIAL CONTRIBUTION, NET

The breakdown of deferred tax credits and debits stemming from income tax and social contribution, according to the balance sheet accounts, is presented below:

|                                                            | Parent company |                | Consolidated   |                |
|------------------------------------------------------------|----------------|----------------|----------------|----------------|
|                                                            | Sep/25         | Dec/24         | Sep/25         | Dec/24         |

The annual global remuneration, net of payroll charges, approved at the Ordinary General Meeting held in April 30, 2025, for the Board of Directors and Executive Board for the year ended December 31, 2025, is R\$ 58,496 (R\$ 49,650 for the year ended December 31, 2024). The annual global remuneration includes the amount of R\$ 9,041 (R\$ 8,600 for 2024) as allowance for discontinuance of position.

Statutory management remuneration takes place only at the Parent Company.

The amounts related to the variable remuneration of the Executive Board are recorded as provision, in accordance with the targets established for the year.

For share-based remuneration, information on the Stock Option or Stock Subscription Plans issued by Tupy S.A. ("Plan"), approved in April 2019 and November 2022, are disclosed in note 26 in the Financial Statements of December 31, 2024.

As corporate benefits, the Company's Officers are entitled to a car, refund of expenses, health insurance, life insurance, defined contribution pension plan and indemnity for contract termination. As of September 30, 2025, these benefits totaled R\$ 4,906 (R\$ 3,876 in the same period of the previous year).

The Company does not offer its administrators a post-employment benefit plan.

## d. Other related parties

The Parent Company takes part, as a sponsor, in Associação Atlética Tupy, a not-for-profit foundation that develops leisure and sports activities for the Company's employees. In the nine-months period ended September 30, 2025, the Company recognized as sponsorship expenses the amount of R\$ 1,286 (R\$ 1,327 as of September 30, 2024).

## 10. SECURITIES RECEIVABLE AND OTHER

|                 | Parent company |               | Consolidated   |                |
|-----------------|----------------|---------------|----------------|----------------|

Property, plant and equipment of the Company and Consolidated are pledged as collateral in tax proceedings in the amount of R\$757 (R\$2,765 as of December 31, 2024), valued at the original cost of the asset.

Current fixed assets include various investments in capacity maintenance, environmental protection, occupational safety, and projects to expand machining capacity at the Ramos Arizpe plant in Mexico, as well as the development of strategic projects. Over a period of nine-months, interest of loans and financing was capitalized on property, plant and equipment in the amount of R\$ 5,810 (R\$ 13,822 on September 30, 2024).

In December 2024, the Company recorded an impairment adjustment at the Saltillo plant, located in Mexico, in the amount of R\$ 219,612, as disclosed in note 13b, of the Financial Statements as of December 31, 2024.

In December 2024, the Company recorded an impairment adjustment at the Saltillo plant, located in Mexico, in the amount of R\$ 30,512, as disclosed in note 14b of the Financial Statements as of December 31, 2024.

### 14. SUPPLIERS

|                      | Parent company |                | Consolidated     |                  |
|----------------------|----------------|----------------|------------------|------------------|
|                      | Sep/25         | Dec/24         | Sep/25           | Dec/24           |
| Domestic suppliers   | 376,254        | 430,222        | 713,303          | 747,223          |
| Foreign suppliers    | 48,488         | 69,437         | 440,289          | 562,232          |
| <b>Subtotal</b>      | <b>424,742</b> | <b>499,659</b> | <b>1,153,592</b> | <b>1,309,455</b> |
| Forfeiting operation | 44,899         | 63,998         | 135,782          | 173,165          |
| <b>Total</b>         | <b>469,641</b> | <b>563,657</b> | <b>1,289,374</b> | <b>1,482,620</b> |

The reduction is a result of the substantial appreciation of the Real against the US Dollar, which went from R\$ 6.1923 on December 31, 2024 to R\$ 5.3186 on September 30, 2025.

The Company has agreements signed with financial institutions to structure, with its main suppliers, a transaction called "drawee risk". In this transaction, suppliers transfer the right to receive from securities to the financial institutions, which become the operation's creditors. Considering there are no financial interest, neither guarantee granted, the deadlines do not change significantly and that these are

operations for the supply of goods and services, the Company recognizes the respective financial liabilities arising from these transactions under the heading Suppliers. Further details about these transactions are included in note 2.5g to Financial Statements of December 31, 2024.

|         |             |          |                |           | <b>238,905</b> |

CDI = Interbank deposit certificate

Considering that the Company contracted swap transactions to hedge the exchange rate exposure arising from these financial liabilities, both the loan instruments and the derivative instruments are being measured at fair value through profit or loss. (note 29 b)

**d) Advance on export contracts – ACC**

In the first half of 2025, as stipulated in the agreement, the Parent Company settled the transaction for the principal amount of R\$ 374,255 (USD 65.0 million). The effect of the exchange rate variation was offset by the receipt of a swap in the amount of R\$ 13,315.

### e) Senior Unsecured Notes – USD 375,000

In February 2021, the Company concluded the issue of debt securities (“issue”) in the international market, through its subsidiary Tupy Netherlands Finance B.V. (formerly Tupy Overseas S.A.). The Senior Unsecured Notes are fully and jointly guaranteed by the Company.

| Tupy Netherlands Finance B.V. |                        |          |                |               |                |

(\*) in thousands

In February and August 2025, the Company made interest payments totaling R\$ 94,401 (in the same period of the previous year, it were R\$ 89,771). The exchange rate effect that occurred in the nine-month period was a reduction of R\$ 330,408 (increase of R\$ 229,364 in the same period of the previous year).

### f) Fair value of loans and financing

The Company calculates the fair value of its loans and financing (level 2 of the hierarchy) by discounting their future payment flows using curves, interest rates and currencies observable in the financial market. As of September 30, 2025, the fair value was R\$ 2,113,387 (R\$ 2,846,304 as of December 31, 2024).

### g) Restrictive clauses in contracts

The Company have restrictive covenants that are reviewed periodically, including the Net Debt to Adjusted EBITDA ratio. Failure to comply with this covenant may have negative impacts, as described below:

- i. A ratio above 3.50x may result in:
  - Debentures: early maturity of contracts, subject to deliberation at a debenture holders' meeting with the approval of two-thirds of outstanding debentures;
  - Senior unsecured notes: restrictions on new loans and financing exceeding US\$ 200 million or 15% of Total Consolidated Assets.
  - BNDES Exim: early maturity of contracts, if requested by the creditor.
- ii. A ratio above 2.75x (exclusively applicable to the Senior unsecured notes) may result in limitations regarding:
  - distribution of dividends above the legal minimum;
  - repurchase of the Company's shares;
  - making investments unrelated to the maintenance of production activities;
  - early settlement of debts maturing in more than one year.

In addition to financial covenants, non-financial covenants also apply, the main one being a change in control of the Company that results in a downgrade of the risk rating, which may lead to early maturity of the contracts.

As of September 30, 2025, the Company is in compliance with all restrictive clauses specific to each transaction.

## 16. DEBENTURES

On July 17, 2024, the Company concluded the 5<sup>th</sup> issue of simple debentures, not convertible into shares, in 3 (three) series.

| Parent company |                      |          |                |               |                  |
|----------------|----------------------|----------|----------------|---------------|------------------|
| Raising        | Instruments          | Maturity | Effective rate | Rates         | Nocional         |
| BRL            |                      |          |                |               |                  |
| 3Q24           | Debenture (series 1) | Jul/2029 | CDI + 0.87%    | semi-annually | 789,770          |
| 3Q24           | Debenture (series 2) | Jul/2031 | CDI + 1.00%    | semi-annually | 360,230          |
| 3Q24           | Debenture (series 3) | Jul/2033 | CDI + 1.18%    | semi-annually | 350,000          |
|                |                      |          |                |               | <b>1,500,000</b> |

CDI = Interbank deposit certificate

Long-term maturities, according to the terms of their accounting records, are shown in the table below:

| Parent company and Consolidated |                  |                  |
|---------------------------------|------------------|------------------|
| Maturity                        | Sep/25           | Dec/24           |
| <b>Current</b>                  | <b>47,613</b>    | <b>79,565</b>    |
| 2025                            | 47,613           | 79,565           |
| <b>Non-current</b>              | <b>1,493,678</b> | <b>1,492,692</b> |
| 2029                            | 784,648          | 783,850          |
| 2030                            | 178,914          | 178,726          |
| 2031                            | 180,115          | 180,115          |
| 2032                            | 116,655          | 116,655          |
| 2033                            | 116,673          | 116,673          |
| 2034                            | 116,673          | 116,673          |
|                                 | <b>1,541,291</b> | <b>1,572,257</b> |

The issuance costs in the amount of R\$7,797 are being amortized, linearly, over the course of this operation.

With the net funds raised through this Restricted Offering, the Company made an early redemption of the 4<sup>th</sup> issue in the amount of R\$ 1,000,000. The amount raised, higher than that of the 4<sup>th</sup> issue, was earmarked for the early settlement of other debts in July 2024.

In the period ending in September 2025, interest was paid in the amount of R\$ 195,386. In the Company's cash flow statement, the amount of R\$ 130,257 is classified as financing activity, since the amount of R\$ 1,000,000 equivalent to the 4<sup>th</sup> issue was taken for the acquisition of new businesses.

Debentures are unsecured and do not have real or fiduciary guarantee, nor any segregation of the Issuer's assets in particular, not offering any privilege over the Issuer's assets to guarantee Debenture holders in case court or out-of-court foreclosure of the Issuer's obligations arising from Debentures and the Issue Deed is needed, and will not grant any special or general privilege to Debenture Holders, that is, without any preference, Debenture Holders competing on equal terms with other unsecured creditors in the event of the Issuer's bankruptcy.

The Debentures have covenants, described in note 15g.

## 17. ADVANCE FROM CLIENTS

|                 | Parent company |               | Consolidated   |                |
|-----------------|----------------|---------------|----------------|----------------|
|                 | Sep/25         | Dec/24        | Sep/25         | Dec/24         |
| Tooling         | 46,516         | 39,741        | 222,432        | 231,447        |
| Working capital | -              | -             | 110,614        | 85,207         |
|                 | <b>46,516</b>  | <b>39,741</b> | <b>333,046</b> | <b>316,654</b> |

These refer to fund advances for the construction of customer tooling that will be used in the production process and advance on working capital for the engine manufacturing contract of MWM Tupy do Brasil Ltda.

## 18. PROVISIONS FOR TAX, CIVIL, SOCIAL SECURITY AND LABOR CONTINGENCIES

The Company is a party to ongoing proceedings arising in the normal course of its business and for which provisions for probable losses were recorded based on estimates made by its legal counsel.

The changes in the provisions for tax, civil, social security and labor proceedings in the period ended September 30, 2025, and the related judicial deposits were as follows:

| Parent company                |               |                |                |                 |                   |                |
|-------------------------------|---------------|----------------|----------------|-----------------|-------------------|----------------|
|                               | Civil         | Tax            | Labor          | Social security | Judicial deposits | Total          |
| <b>At December 31, 2023</b>   | <b>67,653</b> | <b>139,972</b> | <b>51,404</b>  | <b>9,103</b>    | <b>(5,177)</b>    | <b>262,955</b> |
| Business combination addition | 4,225         | (949)          | 9,562          | (104)           | -                 | 12,734         |

|                               |               |                |                |                 |                   | <b>395,051</b> |

The aforementioned provisions are adjusted mainly based on the Special System for Settlement and Custody (SELIC) rate, the impact of which on profit or loss for the period is described in note 24.

Generally, the Company's provisions for legal proceedings are long term provisions. Considering the period necessary to conclude judicial proceedings in the Brazilian judicial system, making accurate

estimates about the specific year in which a certain proceeding will be concluded is difficult. For this reason, the Company does not disclose the settlement flows of these liabilities.

### Contingencies involving possible losses

The contingent liabilities whose prospects of loss are considered possible, according to the assessment made by Management together with the Company's external legal advisors, are described in the following table:

|                             | Parent company   |                  | Consolidated     |                  |
|-----------------------------|------------------|------------------|------------------|------------------|
|                             | Sep/25           | Dec/24           | Sep/25           | Dec/24           |
| IRPJ and CSLL processes     | 99,639           | 96,907           | 100,011          | 97,279           |
| PIS, COFINS and IPI credits | 182,944          | 177,095          | 182,944          | 177,095          |
| ICMS credits                | 575,546          | 536,559          | 575,546          | 536,559          |
| Expired tax debts           | 182,272          | 178,012          | 182,272          | 178,012          |
| Reintegra credits           | 49,908           | 45,581           | 49,908           | 45,581           |
| Social security             | 147,381          | 141,431          | 147,381          | 141,431          |
| Labor lawsuits              | 147,935          | 84,556           | 247,967          | 180,705          |
| Civil and other             | 2,964            | 2,101            | 19,696           | 18,015           |
|                             | <b>1,388,589</b> | <b>1,262,242</b> | <b>1,505,725</b> | <b>1,374,677</b> |

The contingencies are substantially the same as those disclosed in the financial statements as of December 31, 2024, in note 24, including the respective administrative and/or procedural circumstances, and are updated mainly by the variation in the SELIC rate.

## 19. BUSINESS COMBINATIONS OBLIGATIONS

The acquisition of MWM Tupy do Brasil Ltda., on December 1, 2022, generated accounts payable and receivable from the previous parent company, Navistar International Corporation, whose balances on September 30, 2025 and December 31, 2024 are shown below:

|                              | Parent company and Consolidated |               |
|------------------------------|---------------------------------|---------------|
|                              | Sep/25                          | Dec/24        |
| Recoverable taxes (note 7)   | 3,338                           | 40,946        |
| Deferred income tax (note 8) | 73,011                          | 80,450        |

- Recoverable taxes: are PIS and COFINS (taxes on revenue) credits resulting from the exclusion of ICMS in the calculation basis and as they are realized by MWM, they will be paid by Tupy S.A. to the previous parent company, net of tax effects.
- Deferred income tax: are income tax credits on tax losses which, as they are realized by MWM, will be paid by Tupy S.A. to the previous parent company.
- Reimbursement of CSLL debt: corresponds to the potential contingency of Social Contribution on Net Income, due to non-taxation of MWM's export revenues in the period from January 1, 2018 to November 30, 2022. Part of the contingency, in the amount of R\$ 46,932, was converted into effective debt of MWM, being the sole responsibility of the seller Navistar International Corporation, which will reimburse Tupy S.A. for the total amount disbursed by MWM, in accordance with the conditions set forth in the contractual instrument signed between the parties. For the period ended September 30, 2025 the seller reimbursed R\$ 4,870 of said debt.

## 20. CAPITAL, EQUITY VALUATION ADJUSTMENT, RESERVES AND ALLOCATION OF NET INCOME

### a) Capital

(\*) The number of shares is based on the communications sent by the shareholder in accordance with Resolution 44 issued by the Brazilian Securities and Exchange Commission ("CVM").

On July 14, 2025, at an Extraordinary General Meeting, the Company's shareholders approved the cancellation of 11,727,085 shares held in treasury. The transaction was carried out by offsetting against profit reserves, without reducing the Share Capital.

### b) Repurchase of shares

In the nine-month period, 5,516,406 shares were repurchased, equivalent to R\$ 156,065.

On September 30, 2025, the market value of treasury shares was R\$ 18,244,474.20.

### c) Equity valuation adjustment

The amount is the exchange rate variation generated in the conversion of the subsidiaries balance sheets that operate in a functional currency different from the currency in which these financial statements are presented, especially the US dollar, whose variation in the period was from R\$ 6.1923 on December 31, 2024 to R\$ 5.3186 on September 30, 2025.

### d) Distribution of JSCP and dividends

On January 15, 2025, interest on equity was paid in the amount of R\$ 190,000, as approved by the Company's Board of Directors, supported by the profit reserves existing on December 31, 2024 and which were considered in the mandatory minimum dividend for 2024.

## 21. REVENUES

We present below the reconciliation of gross revenue for tax purposes and the revenues presented in the income (loss) for the year:

|                                           | Parent company   |                  | Consolidated     |                  |
|-------------------------------------------|------------------|------------------|------------------|------------------|
|                                           | 9M25             | 9M24             | 9M25             | 9M24             |

### a) Functional currency effect on tax basis

The tax bases of the assets and liabilities of companies located in Mexico, where the functional currency is the U.S. dollar, are maintained in Mexican Pesos at their historical values. Fluctuations in exchange rates modify the tax bases, and consequently, exchange effects are recognized as deferred income tax revenues and/or expenses.

### b) Breakdown of tax effect recorded in the income (loss) for the period

## 26. RESULTS PER SHARE

### a) Basic

Basic earnings per share are calculated by dividing income attributable to Company's shareholders by the weighted average number of outstanding common shares during the period.

|                                                        | 3Q25             | 3Q24           | 9M25             | 9M24           |

## b) Diluted

Diluted earnings per share are calculated by adjusting the weighted average number of outstanding common shares, presuming the conversion of all the potential common shares with dilutive effects. The Company offers a plan with options to purchase potential common shares with dilutive effects. The calculation made to determine the number of shares that could have been issued at fair value was based on the monetary value of the subscription rights linked to the outstanding stock options.

Dedicated assets and liabilities are allocated directly to segments. For those in common use, criteria are used according to their applicability or origin. As they are not directly related to the transaction, the Company does not allocate to the reported segments the assets of cash and cash equivalents, recoverable and deferred taxes and contributions, judicial deposits and other investments in other companies. On the liability side, for the same reason, financing and loans, financing of taxes and social charges, dividends, provisions, deferred taxes and other long-term liabilities are not allocated.

#### d) Material clients responsible for more than 10% of the Company's total revenues

The Company has a diversified portfolio of domestic and foreign clients. In the structural components, manufacturing, energy & decarbonization segment, there are clients who individually represent more than 10% of consolidated revenues, as shown below:

| Consolidated                                                              |                  |              |                  |              |                  |              |                  |              |

## 29. DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGE OF NET FOREIGN INVESTMENT

### Derivative financial instruments

In order to minimize the impacts of exchange-rate change on future cash flows, the Company contracted financial instruments, as follow:

- Structured operations in the “zero-cost collar”;
- Non deliverable forwards;
- Swaps, and
- Purchase Options of “Put”.

These instruments' fair value is measured using widely used market information providers, based on Black-Scholes pricing model, broadly used by market participants to measure similar instruments. The contracting of the amounts of these instruments follows the Company's guidelines and internal rules.

In the external scenario, there is a debate on trade policy and the extent of the easing of US monetary policy, which, together with geopolitical developments, could bring more volatility to the markets. In this scenario, the dynamics of emerging currencies continue to be influenced by the different magnitudes of monetary tightening between countries, in addition to changes in the perception of risk-return endogenous and exogenous to these countries. In the comparison between September 30, 2025, and December 31, 2024, the Brazilian Real appreciated by 14.11% against the USD and 2.44% against the Euro, and the Mexican Peso appreciated by 11.80% against the USD.

The net positions outstanding at September 30, 2025, and December 31, 2024 are shown below:

|                                              | Parent company |                 | Consolidated  |                 |

## 30. FINANCIAL RISK MANAGEMENT

The Company has a financial management policy and internal rules monitored by the Risks and Internal Controls area, which determine practices for identifying, monitoring and controlling exposure to financial risks.

### 30.1 Credit risk

The credit risk arises from cash and cash equivalents, derivative financial instruments, interest earning bank deposits, and exposure to client credit, including outstanding accounts receivable.

Credit risk management of trade accounts receivable is carried out through a joint assessment of payment capacity, indebtedness ratio, market behavior and history with the Company, which

establishes individual credit limits. Additionally, the Company performs a quantitative and qualitative analysis of the receivable's portfolio, to determine the provision for losses on receivables. As of September 30, 2025, the Company had expected losses on trade accounts receivable of R\$ 49,953 (R\$ 44,689 on December 31, 2024), which represented 2.9% of the balance of outstanding accounts receivable consolidated on that date (2.4% on December 31, 2024).

The credit risk also includes retention of values by customers who demand quality problems refunds. For those events, the Company follows internal policy which it applies estimates to measure potential losses while discussing the origin of the debts with the respective customers.

Due to the nature of its assets and historical indicators, the Company does not hold collateral to cover its credit risks associated with its financial assets.

### Credit quality of financial assets

The credit quality of financial assets is evaluated by reference to external credit ratings (if any) or to historical information about counterparty default indexes:

|                                                        | Parent company   |                  | Consolidated     |                  |

(\*) The Company considers, for the classification of risk, the lowest rating between the rating agencies.

Trade accounts receivable presents the following risk classifications:

- Low risk, clients in the structural components, manufacturing, energy & decarbonization segment, except clients that have already presented historical losses.
- Moderate risk, clients in the dis segment, except clients that have already experienced historical losses.
- High risk, clients that have provisioned balances and historical losses.

The other financial assets held by the Company are considered of high quality and do not show signs of loss.

## 30.2 Liquidity risk

Liquidity risk is the risk of the Company encountering difficulties in performing the obligations associated with its financial liabilities that are settled with cash payments or with another financial asset. The Company's approach to managing this risk is to maintain a minimum cash position.

The Company is a counterparty in some financing agreements, which require the maintenance of financial indexes, or compliance with other specific clauses. The main operations, the Senior Unsecured Notes issued in 2021 and the debentures issued in July 2024, require the Company to meet the Net Debt/EBITDA financial ratio. If not complied with, it may impose restrictions, which are detailed in note 15g.

In order to guarantee sufficient liquidity to fulfill its obligations without causing losses or harming the Company's operations, the minimum cash is equivalent to the projection of two-months of payment to suppliers, wages and charges, tax obligations, deducting receipts with a 50% discount for the same period, plus the balance of short-term loans and financing and mark-to-market of derivative instruments. In addition, the Company manages its investment portfolio following criteria of maximum concentration limits in financial institutions, as well as their global and local ratings.

We present below the contractual maturities of financial liabilities:

| Consolidated                       |                  | Contractual cash flow |                |                |                  |                  |                  |
|------------------------------------|------------------|-----------------------|----------------|----------------|------------------|------------------|------------------|
| Financial Liabilities              | Carrying amount  | 6 months or less      | 6 to 12 months | 1 to 2 years   | 2 to 5 years     | Over 5 years     | Total flow       |
| Borrowings                         | 2,398,256        | 71,978                | 75,117         | 124,496        | 574,777          | 2,059,426        | 2,905,794        |
| Trade payables and notes and other | 1,468,572        | 1,468,572             | -              | -              | -                | -                | 1,468,572        |
| Debentures                         | 1,541,291        | 118,539               | 113,774        | 229,341        | 1,530,099        | 762,145          | 2,753,898        |
| Dividends payable                  | 335              | 335                   | -              | -              | -                | -                | 335              |
| Financial derivative instruments   | 203              | 203                   | -              | -              | -                | -                | 203              |
|                                    | <b>5,408,657</b> | <b>1,659,627</b>      | <b>188,891</b> | <b>353,837</b> | <b>2,104,876</b> | <b>2,821,571</b> | <b>7,128,802</b> |

No cash flow expected, included in the analysis of the maturation of the Company, may occur significantly sooner or in amounts significantly different. In addition, the Company has sufficient cash generation to face the flow of future payments.

### 30.3 Market risk

The economic policies of the world's major economies and the Brazilian Federal Government may have significant effects on Brazilian companies, including the Company. Considering the nature of its business and operations, the level of exports and distribution of sales by market, the Company's sales, revenue, and, consequently, profitability may be impacted both by changes in U.S. import tariffs, even indirectly, and by continued high interest rates, which impact a reduction in the consumption of capital goods.

The main market risk factors to which it is exposed are related to: Exchange Rate, Interest Rate, and Inflation in the main inputs, Credit Risk and Liquidity Risk. The Company operates by managing its exposure to these factors, keeping them within acceptable parameters in order to optimize returns.

#### Interest rate risk

The interest rate risk arises from interest earning bank deposits and loans and financing maintained by the Company. Financial instruments with floating rates expose the Company to the risk of fluctuations in cash flow and the fixed-rate instruments expose it to fair value risk, and the Company may use derivative financial instruments, as follows:

| Consolidated                     |           |                    |                    |
|----------------------------------|-----------|--------------------|--------------------|
|                                  | Note      | Sep/25             | Dec/24             |
| <b>Floating-rate instruments</b> |           | <b>(1,068,404)</b> | <b>(888,988)</b>   |
| Financial assets                 | 3         | 833,492            | 1,172,691          |
| Financial liabilities            | 15 and 16 | (1,901,896)        | (2,061,679)        |
| <b>Fixed-rate instruments</b>    |           | <b>(1,222,519)</b> | <b>(1,505,121)</b> |
| Financial assets                 | 3         | 815,132            | 1,203,512          |
| Financial liabilities            | 15        | (2,037,651)        | (2,708,633)        |

### Sensitivity analysis of changes in variable interest rates

The Company has interest earning bank deposits exposed to both CDI change and debt instruments exposed CDI change and, to a small extent, the TJLP.

Interest rate fluctuations may impact the Company's future results. The impacts that would be generated by fluctuations in interest rates to which the Company is exposed are as follows.

| Interest rate risk        |                              |             |             |             |             |             | Consolidated |
|---------------------------|------------------------------|-------------|-------------|-------------|-------------|-------------|--------------|
| Floating rate instruments | Risk                         | Disclosed   | Scenarios   |             |             |             |              |
|                           |                              |             | Probable    | +25%        | +50%        | -25%        | -50%         |
| In Brazilian reais        |                              |             |             |             |             |             |              |
| Investments               | Interest rate (CDI - % p.a.) | 14.90       | 14.90       | 18.63       | 22.35       | 11.18       | 7.45         |
| Financial assets          |                              | 833,492     | 833,492     | 833,492     | 833,492     | 833,492     | 833,492      |
| Potential impact          |                              | -           | -           | 27,021      | 54,043      | (27,927)    | (57,790)     |
| Borrowings                | Interest rate (CDI - % p.a.) | 14.90       | 14.90       | 18.63       | 22.35       | 11.18       | 7.45         |
| Financial liabilities     |                              | (1,901,896) | (1,901,896) | (1,901,896) | (1,901,896) | (1,901,896) | (1,901,896)  |
| Potential impact          |                              | -           | -           | 61,659      | 123,316     | (63,724)    | (131,867)    |

CDI = Interbank deposit certificate

### Currency risk

The Parent Company and its Brazilian subsidiaries have their functional currency in the Real and are subject to currency risk on sales, purchases and borrowings denominated in a currency other than the Real. The Mexican subsidiaries are subject to currency risk on costs and expenses denominated in a currency other than their functional currency, the U.S. dollar. The Parent Company's foreign currency transactions are predominantly denominated in U.S. dollars and the Mexican subsidiary's transactions, which are subject to currency risk, are predominantly denominated in Mexican Pesos.

Additionally, given the relevance of the Company's operations in Mexico, the change of the Mexican Peso also has an impact on the calculation of income tax, given that the net exchange-rate change arising from monetary assets and liabilities in dollars directly impacts the calculation basis of this tax. (note 25)

The Company manages its exposure to exchange rates by combining debt, interest earning bank deposits, accounts receivable, revenue from exports in foreign currency, operations with derivatives and hedge of net foreign investment. The Company's exposure, considering the subsidiaries that use the Real (R\$) as their functional currency, is shown below:

**Parent company**

| Net exposure impacting profit        | Note | Sep/25          | Dec/24          |

### Price risk

It arises from the possibility of fluctuations in the market prices of inputs used in the production process, mainly scrap, pig iron, metallic alloys, coke and electric power. These price fluctuations may cause changes in the Company's costs. The Company monitors them to reflect, in its sales prices, any fluctuations.

### 30.4 Operating risk

It arises from all the Company's operations and may generate direct or indirect losses associated with a variety of causes related to processes, personnel, technology, infrastructure and external factors.

The Company's objective is to manage operating risk and avoid losses and damages to reputation and to seek cost efficiency.

The main responsibility for the development and implementation of controls for operational risks is exercised by a centralized area of Internal Controls under the management of Top Management.

### 30.5 Capital management

The Company's objectives in managing its capital are to safeguard the business continuity capacity to offer return to shareholders and benefits to the other stakeholders besides maintaining an optimal capital structure to reduce this cost.

To maintain or adjust the Company's capital structure, Management may - or propose to, in cases that must be approved by shareholders - review dividend payment policy, return capital to shareholders, issue new shares or sell assets to reduce, for example, indebtedness level.

The Company's Management monitors the ratio between own and third-party capital used to finance its operations. To mitigate liquidity risks and optimize the average cost of capital, the Company monitors compliance with financial ratios in financing and loan agreements.

The ratio of own capital versus third-party capital, at the end of each period, is presented below:

| Consolidated                                        |      |                  |                  |
|-----------------------------------------------------|------|------------------|------------------|
|                                                     | Note | Sep/25           | Dec/24           |
| <b>Own capital</b>                                  |      | <b>3,090,865</b> | <b>3,499,347</b> |
| Equity                                              | 20a  | 3,090,865        | 3,499,347        |
| <b>Third party capital</b>                          |      | <b>5,128,196</b> | <b>5,635,313</b> |
| Total current and non-current liabilities           |      | 6,776,820        | 8,011,516        |
| Cash and cash equivalents                           | 3    | (1,648,624)      | (2,376,203)      |
| <b>Own capital versus third-party capital ratio</b> |      | <b>0.60</b>      | <b>0.62</b>      |

### 30.6 Fair value

It is assumed that cash and cash equivalents, trade accounts receivable and accounts payable balances at book value, less impairment in case accounts receivable approximate their fair values.

The valuation techniques used by the Company are classified as level 2 of the fair value hierarchy. The fair value of financial instruments that are not negotiated on active markets (level 2) is determined based on evaluation techniques that maximize the use of data adopted by the market where they are available with the least possible use of specific estimates of the Company.

## Quarterly Information Review Report - ITR

*(A free translation of the original report in Portuguese)*

To the Shareholders and Board of Directors

**Tupy S.A.**

Joinville - SC

### Introduction

We have reviewed the individual and consolidated interim financial statements, of Tupy S.A. (“Company”) included in the Quarterly Information Form – ITR, for the quarter ended September 30, 2025, which comprise the balance sheet as of September 30, 2025 and the related statements of income and comprehensive income, for the three and nine months periods then ended and the changes in shareholders’ equity and cash flows for the nine months period then ended, including the notes to the financial statements.

Management is responsible for the preparation of the individual and consolidated interim financial statements in accordance with the technical pronouncement CPC 21(R1) and IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of this information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM) applicable to the Quarterly Information - ITR. Our responsibility is to express a conclusion on these interim financial statements based on our review.

### Scope of the review

We conducted our review in accordance with Brazilian and international standards for reviewing interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). An interim review consists mainly in making enquiries and having discussions with persons responsible for financial and accounting matters, and applying analytical and other review procedures. An interim review is substantially less in scope than an audit conducted in accordance with auditing standards and, consequently, does not provide assurance that we would become aware of any or all significant matters that might be identified in an audit. Accordingly, we do not express such an audit opinion.

**Conclusion about the interim financial statements**

Based on our review, we are not aware of any fact that leads us to believe that the individual and consolidated interim financial statements included in the Quarterly Information Form – ITR referred to above have not been prepared, in all material respects, in accordance with CPC 21(R1) and IAS 34 issued by the IASB applicable to the Quarterly Information and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

**Other matters - Statements of value added**

The interim financial information above mentioned includes the Statements of value added (DVA), individual and consolidated, for the nine-months period ended in September 30, 2025, prepared under the responsibility of the Company's Management and presented as supplementary information regarding IAS 34 were submitted to review procedures performed jointly with the review of the interim quarterly information of the Company, in order to form our conclusion whether these statements reconciled with the interim accounting information and records, as applicable, and if their form and content are in accordance with the criteria defined in Technical Pronouncement CPC 09 - Statements of Value Added. Based on our review, nothing has come to our attention that causes us to believe that it has not been prepared, in all material respects, in accordance with the criteria defined in this Pronouncement and consistent with the individual and consolidated interim financial information as a whole.

Joinville, November 06, 2025.
