S&P Global
Ratings

MOODY'S

FitchRatings

On July 15, 2019, S&P Global Ratings upgraded Usiminas to 'B+' from 'B' on global sale and to 'brAA' from 'brA+' on national scale.

"The company issued a \$750 million bond due 2026, proceeds from which Usiminas will use to amortize a significant part of its debt, in accordance with current creditors. Moreover, the cash sweep will be removed. All of these factors will improve the company's financial flexibility and liquidity, resulting in a very smooth debt amortization profile and lower interest burden for the next several years.

In addition, the recent surge in iron ore prices and mildly better conditions for the steel industry, including a slight increase in domestic demand, a still healthy premium over imported steel, which allows for price adjustments, as well as better sales mix, will bolster the company's FOCF. This will occur despite Usiminas' new investment cycle, including the modernization of a blast furnace at the Ipatinga plant and dry stacking process at the company's mining operations, which aims to increase its operating efficiency for the next years."

On July 1, 2019, Moody's upgrades Usiminas' ratings to Ba3/A2.br; stable outlook

"The ratings continue to reflect Usiminas' solid position in the Brazilian flat-steel market, and the measures taken to adjust operations to the feeble demand in the domestic market over the past few years, including the temporary halt of two blast furnaces in its Cubatão mill and interruption of activities of the primary areas of the Cubatão plant (including sinter and coke plants, blast furnaces and steelworks), concluded in January 2016. The downsizing process at the Cubatão steel mill has significantly reduced Usiminas' cost structure and production capacity, providing flexibility to the company amid the deterioration of the steel market in Brazil."

On July 1, 2019, Fitch Upgrades Usiminas and Rates New Issuance 'BB-'; Outlook Stable

"The upgrade reflects continued improvements in Usiminas' credit risk profile, supported by the deleveraging of its balance sheet, ample liquidity, and manageable cash outflows over the next three years. Usiminas is expected to refinance its debt, which is currently structured primarily on a secured basis and is exposed to a cash sweep mechanism as part of its 2016 debt restructuring agreement. Usiminas' ability to raise new unsecured debt at attractive costs aiming to refinance most of the debt agreement would improve liquidity, financial flexibility and further improve its credit risk profile in the short term."

Declarations relative to business perspectives of the Company, operating and financial results and projections, and references to the growth of the Company, constitute mere forecasts and were based on Management's expectations in relation to future performance. These expectations are highly dependent on market behavior, on Brazil's economic situation, on the industry and on international markets, and are therefore subject to change.
