## NOTICE TO THE MARKET Aneel ratifies ESS's rate adjustment

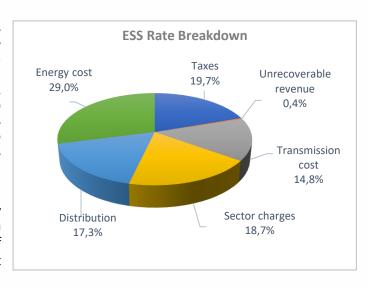

Pursuant to CVM Directive 44/2021 issued August 23, 2021, which revoked CVM Directive 358 issued January 03, 2002, ENERGISA S.A. ("Energisa" or "Company") hereby announces that at an ordinary public meeting of the board held on this date, the National Electricity Regulatory Agency ("Aneel") approved the rate adjustment of Energisa Sul-Sudeste - Distribuidora de Energia S/A ("ESS"). The rate adjustment will be applied from July 12, 2023.

The average effect to be felt by consumers will be an increase of 10.65%, with +11.58% for low-voltage consumers and +8.58% for medium-high-voltage consumers. B1 Residential consumers will enjoy a increase of +11.13%. The table below shows the adjustment rates approved:

|                     | Average Effect for |
|---------------------|--------------------|
| Voltage Level       | ETO's consumers    |
| Low voltage         | +11.58%            |
| Medium-High voltage | +8.58%             |
| B1 Residential      | +11.13%            |
| Total               | +10.65%            |

The annual rate adjustment process consists of passing through to consumers the uncontrollable concession costs (Parcel A energy purchases, sector charges and transmission charges) and the restatement of manageable costs (Parcel B - distribution) by the variance of the IPCA price index less the X Factor, which passes through to consumers the annual productivity gains made by the concession operator.

The change in **A Portion** costs was + 10.04%, amounting to R\$ 1,827.2 million, primarily impacted by the increase of Transmission cost. The average pass-through price of energy purchase contracts ("PMix") was set at R\$ 235.01/MWh.

The change in the **B Portion** was 2.3%, amounting to R\$ 503.2 million, reflecting the inflation accumulated (IPCA) since the last adjustment of 3.55%, less the X Factor, of -0.72%.
