A publicly held company

## NOTICE TO THE MARKET

### Aneel approves tariff readjustment for EBO

ENERGISA S.A. (“Energisa” or “Company”), in compliance with the CVM Resolution 44/ 2021, issued August 23, 2021, which revoked CVM Instruction No. 358, issued January 3, 2002, hereby announces that at an ordinary public meeting of the board held on this date, the National Electricity Regulatory Agency (“Aneel”) approved the rate readjustment of Energisa Borborema - Distribuidora de Energia S/A (“EBO”), to be applied as of February 04, 2022, as shown below:

Voltage Level	Average Effect for EBO Consumer (%)
Low Voltage	9.85
High and Medium Voltage	9.35
<b>Total</b>	<b>9.72</b>

The annual rate readjustment process consists of passing through to consumers the unmanageable concession costs (Parcel A - energy purchases, sector charges and transmission charges) and adjusting the manageable costs (Parcel B) by the change in the IGPM price index minus the X Factor, which passes through to consumers the annual productivity gains made by the concession operator.

The variation in **Parcel A** costs was +3.01%, amounting to R\$ 204.3 million, primarily impacted by the increase of 41.08% in sector charges due to the 62% increase in the CDE Charge, used in the beginning of 2022. The average pass-through price of energy purchase contracts (“PMix”) was set at R\$ 204.26 / MWh.

The change in the **Parcel B** was 14.54%, amounting to R\$ 103.5 million, reflecting the inflation accumulated (IGPM) since the last readjustment of 15.63%, minus the X Factor, of 1.09%.

The table below details each component of the rate adjustment:

Average effect to be perceived: + 9.72%	Repasse Variação das Parcelas A e B: + 6.62%	Parcel B	+ 4.55 %
		Energy Purchase	- 0.66 %
		Sector Charges	+ 4.58 %
		Transmission Costs	- 1.86 %
		Unrecoverable Revenue	+ 0.00 %
	Change in Financial Accounts: + 2.92 %	Removal of financial items from the previous process	+ 0.09 %
		Financial Items from the current process	+ 3.01%
