COMPANHIA DE GÁS DO ESPÍRITO SANTO - ES GÁS
CNPJ/MF nº 34.307.295/0001-65

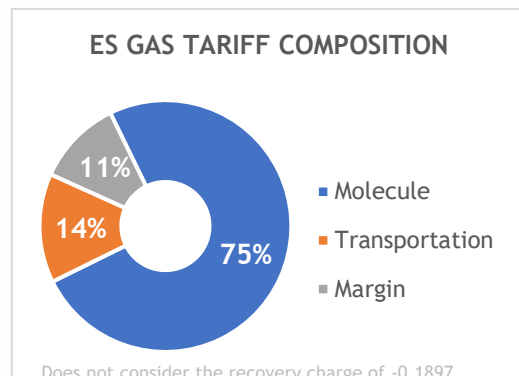

NOTICE TO THE MARKET

The Regulatory Agency for Public Services (ARSP) approves the gas tariff adjustment of ES Gás.

Energisa S.A. ("Energisa" or "Company"), in compliance with CVM Resolution No. 44/2021, dated August 23, 2021, which revoked CVM Instruction No. 358, dated January 3, 2002, hereby informs its shareholders and the market in general that the Espírito Santo Public Services Regulatory Agency ("ARSP") published Decision ARSP/DG No. 002, dated January 21, 2025, and Technical Opinion ARSP/DP/GET No. 001/2025, regarding Process 2025-B9RNV, with the tariffs of ES Gás, to be applied starting February 1, 2025.

The average effect to be perceived by the consumer will be **-7.49%**. The new tariffs result from the average gas price (Molecule and Transport) totaling R\$ 2.4187/m³, the average margin, determined in August 2024, of R\$ 0.30004/m³, and the recovery charge of -R\$ 0.1897/m³. As a result, the selling price, excluding taxes, will be R\$ 2.5290/m³

The quarterly tariff adjustment process consists of updating the average gas price, which includes the price of the molecule paid to the supplier, the transport price paid to the transporter, and the recovery charge from the graphic account, which compensates for differences over time between the actual price paid to the supplier and transporter and the price of gas approved in the tariffs. Annually, in August, the distribution margin is also adjusted by the variation of the IGP-M, which is the portion responsible for covering operational costs and compensating for the gas distribution service.

Cataguases, January 31st, 2025.
