

NOTICE TO THE MARKET

Investments for the acquisition of new land in Manaus

São José/SC, April 27th, 2026

INTELBRAS S.A. INDÚSTRIA DE TELECOMUNICAÇÃO ELETRÔNICA BRASILEIRA (B3: INTB3) ("Company" or "Intelbras"), informs its shareholders and the market in general of the acquisition of a new plot of land in the city of Manaus, state of Amazonas, Brazil.

The Company invested R\$ 19.4 million in the acquisition as part of its long-term strategy to support the production capacity increase. With a total area of approximately 670,000 m², it is primarily aimed at meeting demand for Security solutions.

The evaluation of alternatives in Manaus had been actively conducted by the Company, and included both the acquisition of land for construction and the eventual acquisition of an existing industrial plant. The acquisition, now completed, meets the technical and strategic criteria defined by management and expands the range of options for future expansions.

In addition to increasing capacity, the investment strengthens the Company's industrial flexibility, creating conditions for operational and production allocation adjustments that may prove necessary in future scenarios, ensuring operational efficiency.

For site preparation, construction works, and the acquisition of manufacturing and administrative infrastructure, total investments of approximately BRL 200 million are estimated over the next 18 months. The funding structure is expected to combine internal and external resources, in line with Intelbras' long-term financial and operational planning, and capital allocation discipline.

Intelbras has been present in Manaus since 2009. The local operation currently employs approximately 1,200 people, reinforcing the strategic relevance of the region to the Company.
