Review types

- **Inclusion:** Inclusion of information that did not exist in the previous version.
- **Removal:** Removal of information that existed in the previous version.
- **Change:** Change or amendment of information that already existed in the previous version.
- **New:** It indicates that the guideline was created, corresponding to the first version of the document.

2 OBJECTIVE

The Environment Policy aims to provide Alupar’s working guidelines for environmental issues associated with its activities, as well as guiding the actions of liaison with suppliers, customers, public bodies, shareholders and communities.

3 SCOPE

This policy applies to Alupar Investimento S.A. departments and employees and its subsidiaries at all hierarchical levels.

In the case of addition of new concessionaires or establishment of new companies, these guidelines will be valid for them.

4 INVOLVED AREAS

All the departments of the company.

5 VALIDITY

This document, as other normative documents of the company, will be valid for 12 months from its publication date.

If the validity expires without the due validations of the areas, it will be considered as updated and will be republished with the new date and with the name of the manager responsible for the process.

6 CONCEPTS / DEFINITIONS

CONCEPTS	DEFINITION
Sustainable Development Goals - SDO	A set of 17 Goals and 169 universal, integrated and indivisible targets, established by the United Nations General Assembly in 2015, when global leaders made a commitment in a common action, through a wide and universal agenda, to be implemented by 2030, with the challenge to create a path towards the collective sustainable development, global development and advantageous cooperation for all.
United Nations - UN	International organization formed by countries that voluntarily gathered to work for world peace and development.

Sustainability

It is the ability to fulfill the needs of the current generation, under economic, social and environmental aspects, ensuring the capacity to meet the needs of future generations. It is the development that does not exhaust the resources for the future.
