ECORODOVIAS INFRAESTRUTURA E LOGÍSTICA S.A. hereby informs its shareholders and the market, the preliminary consolidated traffic monthly figures for February 2026 and for the accumulated period of 2026 in relation to the same periods in 2025. These are managerial results and are subject to change.

The performance in February 2026 reflects the seasonality of soybean exports and the **slower pace of the 2025/26 harvest** compared to the same period in 2025, which postponed part of the shipments and, consequently, reduced the volume of heavy vehicle traffic. As the harvest progresses, **a gradual recovery in volumes is expected over the coming months**. Additionally, at Ecovias Leste Paulista, the decrease is associated with the completion of works on an alternative highway route between São Paulo and Rio de Janeiro. However, it is noteworthy that Ecovias Leste Paulista recorded an average growth (CAGR) of 6% over the two-month accumulated period (Jan-Feb/2022 vs. Jan-Feb/2026).

Note: Equivalent paying vehicle is a basic unit of reference in toll collection statistics on the Brazilian market. Light vehicles, such as automobiles, correspond to an equivalent vehicle unit. Heavy vehicles such as trucks and buses are converted to equivalent vehicles by a multiplier applied to the number of axles per vehicle, as established in the terms of each concession agreement. The results are managerial and subject to review.

EcoRodovias reaffirms its commitment to its obligations as a publicly-held company listed on the Novo Mercado segment of the B3 stock exchange and will disclose all and any material information in accordance with applicable legislation.
