

MZ

EDGAR & iXBRL

Qualified solutions for SEC obligations!

MZ has worked directly with major publicly held companies and with some of the largest law firms in the world, allowing it to develop an exceptional technological infrastructure for EDGARization.

Some of MZ's exclusive distinguished advantages in the SEC filing area are:

-  **Trilingual customer service** (English, Spanish, and Portuguese)
-  **24/7 support,** efficiency, quality, and total security in filings
-  **iXBRL with data mapping based on taxonomy concepts**

Examples of the most common filings:

- 6-K (Filings of notices, notifications, material facts, and others)
- Form 20-F ("20-F annual report")
- 10-K Form 10-K is a detailed annual report that must be submitted to the U.S. Securities and Exchange Commission (SEC). The process provides a comprehensive summary of a company's performance in the year. It is more detailed than the annual report sent to shareholders (annual report)
- 10-Q (quarterly report)
- 8-K (current report)
- SC 13G (statement of acquisition of beneficial ownership by individuals)
- S-8 (securities to be offered to employees under employee benefit plans)
- S-1 (initial registration for new securities to be offered, prospectus)

What is iXBRL?

iXBRL is used by millions of companies worldwide to prepare financial statements in a format that provides structured data required by regulators and analysts, allowing preparers to retain full control on the layout and presentation of their reports. iXBRL uses the HTML standard that is adopted to power the world's web pages and incorporates extra "tags" that give meaning to figures and statements in a format that can be understood by computers.

Features in the iXBRL process:

- Conversion of documents to iXBRL according to SEC rules for real-time filings;
- Preparation for publication of iXBRL files on the customer's website (as required by SEC);
- Classification and mapping of data based on taxonomy concepts;
- Validation of iXBRL documents with calculations and extensions when necessary;
- Presentation of an iXBRL document filing in HTML format (reading)
