Providing purpose-built commercial electric vehicles and automated delivery solutions for underserved public and private markets

ev Transportation Services Inc. ("evTS") is a specialty vehicle manufacturer that produces purpose-built, Pure Electric[®] lightweight commercial utility vehicles and automated delivery solutions, **powered by: InterPlai™**. Founded in 2015, the Boston-based company's flagship product, the FireFly[®]ESV, is aimed at the essential services transportation and urban mobility markets, which represent a combined annual domestic replacement market of approximately 185,000 vehicles, or roughly \$7 billion annually, spurred by government incentives to electrify public and private fleets. Applications for the Company's products include AI optimized last mile and "on-demand" urban delivery, prepared food and grocery delivery, parking management, parks, sidewalk and bike lane maintenance, security and perimeter patrol, utility meter reading, property and building management, airports, seaports, sanitation, school, university and corporate campuses.

Key Highlights

- **2025 FireFly@ESV:** Purpose-built, highly customizable commercial EV addressing \$7B/year replacement market
- **Production-Ready Design:** Delivery of new Model Year 2025 FireFly vehicles planned to commence in Q2 2025
- **Expanding Distribution Channels:** Expressions of Interest for delivery of 5,000+ FireFly vehicles over the next 3 years
- **Interplai Direct facilitated 16 Million deliveries** in 6 countries and over 40 cities in 2 years
- **Active Discussions with Retailers:** Active interest in Interplai integrations from retailers in the UK, EU and Asia
- **Proprietary AI Technology:** using a multi-input Large Language Model (LLM) and aggregated community data, the caiVRO™ system continuously refines vehicle route optimizations for Interplai Deliver customers over time

FIREFLY@ESV ESSENTIAL SERVICES VEHICLE + **interplai**

Vehicle Specifications

- **Chassis:** 3-wheeled, body on frame design
- **Top Speed:** 50 MPH (user determined)
- **Range:** 120+ miles per charge
- **Payload Capacity:** 1,150 lbs.
- **Power:** 100% Pure Electric[®]
- **Motor:** 65 HP (48 KW) AC induction (rated)
- **Traction Battery:** Safe 23.6 kW Lithium Iron Phosphate design
- **Transmission:** Computer-controlled Integrated Drive System™
 - Optimizes vehicle performance for maximum range & stability
- **Suspension:** Proprietary DuraSteer™ swingarm suspension system
 - Hugs the road with load distributing, anti-dive control & coil-over shocks
- **Charging Time:** Full charge in 6 hours (L2)

evTS Products and Services

- **FireFly[®]ESV**
 - Street legal and highway capable at speeds up to 50 MPH
 - Strong steel frame construction with ABS body panels
 - Low step-in height and safe, LinearGlyde™ sliding doors
 - Multiple seating/driver configurations
- **evTS Connect™**
 - Real-time remote diagnostics, monitoring & control
 - Vehicle and fleet management system
- **Interplai Direct**
 - By optimizing delivery routes, companies save money by minimizing the time and resources required
 - Advanced AI and machine learning improves delivery efficiency and on-time performance for our clients
- **Interplai Deliver**
 - Proprietary short delivery route robotic delivery system, utilizing the latest generative AI tools and machine learning models to navigate complex live environments

Strategic Initiatives

evTS has cultivated collaborative relationships with multiple industry leaders

- Entered into several vendor relationships to take advantage of market exclusivity, proprietary technologies, favorable pricing, economies of scale or some combination of the above
- We believe that these collaborators see us as an integral component of their solutions, while offering evTS additional sources of incremental revenue

Vocation Specific Modular Design

Minimal impact workhorse that is agile & maneuverable

Accessory beds for many specialized use cases, like an electric dump truck

On-demand hot & cold prepared food and grocery deliveries

Versatile purpose-built vehicle with a vocation specific modular design

First response solution for special events & stadiums, indoors or out

An ideal solution for urban last-mile deliveries of all kinds

Production Plan & Manufacturing Footprint

- Manufacturing of MY 2025 FireFly at the Company's facility in Fort Worth, TX USA
- Delivery of new 2025 FireFly vehicles planned to commence in Q2 2025
- Production of 5,000+ FireFly vehicles in the US and UK over the next 3 years
- Finalization of design and manufacture of initial Interplai Golf Food Service vehicles

Experienced Management Team

David Solomont Chairman and CEO

Founder & Chairman, Common Angels; Chairman & CEO, Utopia Inc; Chairman and CEO, OYO Toys

James Adams Director, Vehicle Technology Center

Experienced Engineering Manager with a broad background in mechanical design, CAD, IT and systems architecture. Member of original FireFly design team

Paul Barrett VP Marketing & Product

Experienced global executive & serial entrepreneur with 45 years of experience over a progressive career in the automotive & mobile electronics Industries; VP International Operations - LoJack Corp.

Greg Horne CTO & VP Engineering

Visionary creator of FireFly; CTO eFleets Corp.; CEO Advanced Microcontrols, Inc.; Design Engineer Bell Helicopter

Mark Crawford GM, Interplai Business Unit

Lead Engineer, Autonomous Vehicle Systems and Next Generation Vehicle Projects (NGV) - Ford Motor Company; Chief Engineer, Autonomous Driving Systems - Great Wall Motor Company

Peter Barsky VP Sales

Founder of The Electric Car Company in Long Beach, he was a pioneer in governmental EV sales as early as 2005. Was instrumental in the development of the original Firefly ESV for Santa Monica

FireFly Roll-Out Strategy

Domestic & International Expansion

- Purchase or rent via distributor network or direct sale
- Expand regional distributor network across North America
- Formed UK based subsidiary, for FireFly manufacturing and distribution with tier-one OEM
- Interplai - Pilot Golf Course food & beverage services and launch several large retail integrations

ev Transportation as a ServiceSM Rental Program

- Facilitates ease of EV adoption & complements evTS vehicle ownership programs
- Program includes all operating expenses including insurance, maintenance, charging infrastructure & electricity all for a flat monthly fee
- Transforms CapEx to OpEx, more affordable for many municipalities with low capital expenditure budgets or commercial customers opting for service-based relationship
