Sustainability Strategy

PILLARS	<div> <div>People</div> <div>Processes</div> <div>Products and services</div> <div>New business models</div> </div>			
	Developing people and creating value in a network We promote development of employees, customers, consumers and local communities	Increasing our positive social and environmental impact, end-to-end We continually enhance operations in an effort to achieve social and environmental balance across the value chain	Innovating in sustainable solutions To be a reference in the supply of competitive and sustainable solutions that bring together design, technology, quality and innovation	Generating new business for sustainability We seek new business models that generate value for stakeholders in relation to social, environmental and economic challenges
	THEMES <ul style="list-style-type: none"> • Work conditions and development of employees • Engagement of customers and consumers • Relationships with communities and local development 	<ul style="list-style-type: none"> • Eco-efficiency • Climate change • Sustainable forest management • Responsible supply chain 	<ul style="list-style-type: none"> • Sustainable inputs and solutions 	We do not cover material themes to our business in this pillar, but rather investigative areas that are being analyzed by shareholders. Our work is treated as strategic and confidential, which is why we do not report on it in a specific chapter of this document.
