**NOTICE TO MARKET**

**PROGRESS IN SUSTAINABILITY AND NEGOTIATION OF POTENTIAL  
PARTNERSHIPS FOR RENEWABLE ENERGY PROJECTS**

Companhia de Saneamento Básico do Estado de São Paulo – Sabesp (“Company” or “Sabesp”) informs its shareholders and the market in general that it has been structuring renewable energy generation projects aiming at making its operations more sustainable and efficient, in order to strengthen its responsible social and environmental performance.

To this end, the Company has been negotiating term sheets with developers in the renewable energy sector for the creation of consortia aimed at the exploration of self-production projects of electric energy from renewable sources, with the clean energy generated to be used mainly in Sabesp’s own operations. These documents, if and when signed, will be submitted for approval by the Administrative Council for Economic Defense – CADE and will also be subject to other suspensive conditions that may be established, including the signing of the corresponding definitive and binding documents.

By doing so, the Company expects to reduce its electricity costs and, at the same time, reinforce its commitment to sustainable and innovative practices.
