

Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP)

Companhia de Saneamento Basico do Estado de Sao Paulo's (SABESP) ratings reflect a strengthened credit profile after the third tariff review cycle, which supports forecast cash flow from operations (CFO) increases through the regulatory cycle of 2021-2024. EBITDA margins are expected above 45% for 2022 to 2024 along with positive FCF. The company expected sustained net leverage below 2.0x and the successful reduction of FX debt exposure in 2020 was also incorporated.

The ratings consider the solid fundamentals of the water/wastewater industry under resilient demand, and SABESP's robust liquidity position, manageable debt maturity schedule and condition as a state-owned company. The Negative Outlook for the Long-Term (LT) Foreign Currency (FC) Issuer Default Rating (IDR) follows Brazil's (BB-/Negative) Sovereign Outlook.

Key Rating Drivers

Tariff Review Increases Predictability: The approval for an overall tariff increase of 7.1% in May 2021 and required regulatory revenue of BRL17.5 billion from May 2021 to April 2022, with a gradual increase to BRL18.7 billion from May 2024 to April 2025, should support the growth of SABESP's revenue during this regulatory cycle.

The company's required revenue is 21.0% above 2020 and is now protected by a range of a +/-2.5% band within the next four years. SABESP is to receive or return funds in the following year, through a tariff adjustment, if effective revenue falls outside this range. This provides further predictability for its results, irrespective of volume billed, with potential frustrations in revenue accounted for during a 12-month period, compared with regulatory numbers, being compensated in the following period.

Higher EBITDA Margins: SABESP's regulatory required revenue supports stronger EBITDA and EBITDA margins in 2022-2024 at above 45%. The base case scenario assumes no material effect on EBITDA and cash flow generation from potentially higher water losses or delinquency, along with significantly lower volumes billed, due to increased tariffs.

EBITDA in 2021 should be stable at BRL6.2 billion, with EBITDA margin declining to 40%, given projected cost pressures and low total volume growth of 0.5%. EBITDA margin should increase to 46%-48% in the following three years supported by revenue growth, resulting in annual EBITDA of BRL8.3 billion-BRL9.0 billion for the period.

Positive FCF in 2022: We forecast CFO of BRL3.4 billion in 2021, resulting in negative FCF of BRL662 million, pressured by capex of BRL3.7 billion and BRL272 million of dividends. FCF should be positive BRL239 million annually, on average, for 2022-2024, and favored by stronger annual CFO of BRL5.4 billion, on average. Capex during this period totals BRL11.3 billion and dividends BRL2.6 million. The base case scenario assumes manageable working capital requirements despite potential delinquency pressure with higher tariffs to the residential client segment as approved in the new tariff structure.

Conservative Leverage and Lower FX Exposure: SABESP's net leverage should remain conservative and below 2.5x over the next three years, including 2.3x in 2021, which is low for the industry and for its ratings, and supported by stronger EBITDA through the cycle. Net debt/EBITDA was 2.1x at YE 2020. The company has successfully reduced FC debt exposure to 21% from 48% in 2019, due to a strategy for new debt issuances in local currency (LC) to mitigate FX volatility effects. This mitigates concerns related to financial covenants and during periods of high FX debt maturity.

Ratings

Rating Type	Rating	Outlook	Last Rating Action
Long-Term Foreign Currency IDR	BB	Negative	Affirmed April 26, 2021
Long-Term Local Currency IDR	BB+	Stable	Upgrade April 26, 2021
National Long-Term Rating	AAA (bra)	Stable	Upgrade April 26, 2021

Mauro Storino
+55 21 4503-2625
mauro.storino@fitchratings.com

Reduced Business Risk: The credit profile benefits from resilient demand and from low business risk, with a near-monopolistic position as a provider of an essential service within its operational area and its economies of scale as the largest basicsanitation company in the Americas by number of customers.

The assessment reflects SABESP’s still-developing regulatory environment, the intrinsic hydrological risk of its business and the political risk associated with its position as a state-owned company subject to potential changes in management and strategy after each State of Sao Paulo (BB-/Negative) election. SABESP’s activity in the State of Sao Paulo, which has the country’s largest GDP and population, is viewed as positive.

Standalone Credit Profile: Per Fitch’s *Government-Related Entities Rating Criteria*, we assess SABESP on a standalone basis. This approach is supported by our perception of reduced incentive for SABESP’s major shareholder to provide support if needed, given minimal financial implications for the State of Sao Paulo if SABESP defaults, and limited evidence of a record or expectations for the state to provide support.

The issuer’s activities are independent from its major shareholder, both financially and operationally. A default should have only moderate socio-political implications for the state, despite the strong assessment of its status, ownership and control by the state.

New Regulatory Environment: The base case scenario incorporates no major effects on SABESP’s operations and cash flow from the recent regulatory changes by the Law 14.026. Discussions about regulatory guidelines for national water/wastewater should facilitate greater participation by private companies and enhance the industry’s investment capacity. Private participants account for around 6% of the industry’s market share and growth should occur mainly at the expense of highly inefficient state-owned companies or local municipality operators, which is not the case for SABESP.

Financial Summary

(BRL 000 as of Dec. 31)	2019	2020	2021F	2022F
Net Revenue	13,679,788	14,080,925	15,345,735	17,993,919
Operating EBITDA	6,081,214	6,264,903	6,202,660	8,683,454
Operating EBITDA Margin (%)	44.5	44.5	40.4	48.3
CFO	3,606,631	4,355,028	3,363,571	4,913,139
Total Adjusted Net Debt/Operating EBITDA (x)	1.8	2.1	2.3	1.6

F - Forecast. CFO - Cash flow from operations.

Rating Derivation Relative to Peers

SABESP’s mature operations and its position as the largest water/wastewater utility in Brazil benefit its business profile in terms of economies of scale and capital structure compared with Aegea Saneamento e Participacoes S.A. (BB/Negative), which has moderate leverage, reflecting its growth strategy.

SABESP’s strengthened CFO generation capacity after the third tariff revision supports the one-notch difference in the LTLC IDR, despite exposure to political risk, given its status as a state-owned company. Aegea’s credit profile benefits from diversified concessions within Brazil, while SABESP operates exclusively in the State of Sao Paulo, which concentrates operational and regulatory risks. Both SABESP and Aegea have similar and strong EBITDA margins.

Compared with power-transmission companies Transmissora Alianca de Energia Eletrica S.A. (BB/Negative) and Alupar Investimento S.A. (BB/Negative), SABESP presents higher regulatory risk, lower operational cash flow predictability and less asset diversification. This explains the difference in the LTFC IDR and LTLC IDR, despite SABESP’s expected lower leverage metrics

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Positive Rating

Action/Upgrade

- Positive rating actions on the LT FC IDR and LT LC IDR depend on positive actions on the sovereign rating.
- An upgrade on the National Long-Term Ratings does not apply as the rating is at the top of the National Scale.

Factors that Could, Individually or Collectively, Lead to Negative Rating

Action/Upgrade

- Negative rating actions on the sovereign rating may lead to negative action on the LT FC IDR and LT LC IDR.
- EBITDA margins below 40%.
- Net leverage sustained above 3.0x.
- Increased political and/or regulatory risk.
- Lower financial flexibility.

Liquidity and Debt Structure

Strong Liquidity Profile: SABESP's robust cash position, sound CFO and proven financial market access is crucial for the company to manage expected negative FCF in 2021 and to refinance debt maturities.

Cash and equivalents of BRL3.8 billion at YE 2020 covered short-term debt of BRL3.0 billion by 1.3x. Total debt of BRL17.2 billion at YE 2020 presented a lengthened maturity profile and consisted mainly of multilateral agency loans of BRL6.1 billion and BRL6.6 billion in debenture issuances. The amount of total debt linked to FX rates without any hedge protection was BRL3.5 billion, or 21%, which represents moderate FX volatility exposure risk.

Only BRL2.8 billion of total debt at YE 2020 was secured by future flows of receivables linked with Banco Nacional de Desenvolvimento Economico e Social (BNDES; BB-/Negative) and Caixa Economica Federal (BB-/Negative) loans. This debt does not pressure unsecured rated issuances.

ESG Considerations

Unless otherwise disclosed in this section, the highest level of Environmental, Social and Corporate Governance (ESG) Credit Relevance is a Score of '3'. This means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

Key Assumptions

Fitch's Key Assumptions Within Our Rating Case for the Issuer Include

- Marginal total volume billed growth of 0.5% in 2021.
- Total annual tariff increases of 7.1% on May 2021.
- Effective net revenue in line with 97.5% of regulatory required revenue from May 2022 onward.
- Net revenue in 2022–2023 include an increase of BRL1.4 billion (pro rata) related to the difference of effective net revenue and regulatory required net revenue from May 2021 to April 2022.
- Average annual capex of BRL3.8 billion in 2021–2023.
- Dividends of BRL272 million in 2021 and a pay-out ratio of 30% of net profits thereafter.

How to Interpret the Forecast Presented

The forecast presented is based on Fitch Ratings’ internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings’ rating assumptions for the issuer’s financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings’ forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings’ own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings’ own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer’s forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings’ own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

Credit-Relevant ESG Derivation

Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has 12 ESG potential rating drivers

- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to energy productivity risk but this has very low impact on the rating.
- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to water management risk but this has very low impact on the rating.
- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to waste & impact management risk but this has very low impact on the rating.
- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to extreme weather events but this has very low impact on the rating.
- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to access/affordability risk but this has very low impact on the rating.
- ▶ Companhia de Saneamento Basico do Estado de Sao Paulo (SABESP) has exposure to customer accountability risk but this has very low impact on the rating.

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	3	Regulatory-driven access and affordability targets of utility services	Asset Base and Operations; Regulatory Risk; Profitability
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Quality and safety of products and services; data security	Regulatory Risk; Profitability
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction	Profitability; Financial Structure; Financial Flexibility
Employee Wellbeing	2	Worker safety and accident prevention	Financial Flexibility
Exposure to Social Impacts	3	Social resistance to major projects that leads to delays and cost increases	Profitability; Financial Structure

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Strategy development and implementation	Management and Corporate Governance
Governance Structure	3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
Group Structure	3	Complexity, transparency and related-party transactions	Management and Corporate Governance
Financial Transparency	3	Quality and timing of financial disclosure	Management and Corporate Governance

CREDIT-RELEVANT ESG SCALE	
How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Inrelevant to the entity rating but relevant to the sector.
1	Inrelevant to the entity rating and irrelevant to the sector.

FX Screener

SABESP's FX debt exposure is manageable. The company had BRL3.5 billion, as of YE 2020, or 21% of total debt, exposed to FX volatility, while all revenues are generated in LC. A devaluation of 25% in the Brazilian real would result in only a 0.2x increase in the company's FFO adjusted net leverage.

Fitch FX Screener

Covenant Summary

The company is subject to a gross leverage covenant of 3.65x, which may limit its ability to issue debt for refinancing under distressed operating environments. The concern is mitigated, though, by a strong financial profile, which allows adequate headroom before covenants are breached. Fitch believes the company will remain compliant with its net debt/EBITDA of 3.5x covenant.

Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
