

Release 4Q20

Earnings Release 4Q20

Porto Alegre, March 17, 2021 - SLC AGRÍCOLA S.A. (B3: SLCE3; ADR's: SLCJY; Bloomberg: SLCE3BZ; Reuters: SLCE3.SA) announces today its results for the fourth quarter and fiscal year of 2020. The following financial and operating information is presented in accordance with International Financial Reporting Standards (IFRS). The information was prepared on a consolidated basis and is presented in thousands of Brazilian real, except where stated otherwise.

NOTE: 4Q19 and 4Q20 refer to the cumulative three-month periods from October to December of fiscal years 2019 and 2020. 2019 and 2020 refer to the cumulative 12month periods from January to December of fiscal years 2019 and 2020. HA refers to the horizontal percentage variation between two periods and VA refers to the percentage representativeness of the account over a given total.

Message from Management

The year 2020 will remain unforgettable, one in which the world was stunned by a pandemic (covid-19) that brought major impacts on our lives. However, it also led to many opportunities for reinvention and innovation. We are delivering yet another year with many challenges surmounted and entering 2021 even stronger. Our business and employees proved resilient and transformed 2020 into another successful year.

Strategy

Asset Light Growth

In November 2020, we disclosed to the market through a Material Fact notice the planned business combination with Terra Santo Agro S.A., which was approved by Brazil's antitrust agency CADE and is in the due diligence process. The business is aligned with and accelerates significantly the Asset Light growth strategy adopted by the Company, and will support important synergies given the geographic proximity of the production units of Terra Santa and SLC Agrícola in Mato Grosso state. Based on the current planting intentions for the 2020/21 crop year disclosed by Terra Santa, the potential exists to expand our planted area by approximately 130,000 hectares.

Efficiency and distancing from industry average

In line with our strategy to maximize operating efficiency, we registered, for the third straight year, a record yield for the soybean crop, of 3,900 kg /ha, which is 4.3% higher than in the prior crop year, 8.1% higher than the initial projection and 15.4% higher than the Brazilian average (Feb/21 estimate from CONAB).

Meanwhile, our average yield for cotton (first and second crops) was 1,749kg/ha, 3.0% lower than the initial projection and 5.5% higher than the yield registered in the 2018/19 crop year. Compared to the Brazilian average, our cotton yield was 2.9% lower. However, our cost per hectare was 3.7% lower (Feb/2021 estimate from CONAB).

The yield of second-crop corn was 3.0% higher than in the 2018/19 crop year and down 0.7% from the initial projection, at 7,333 kg/ha. In relation to the national average, the yield was 34.4% higher (Feb/2021 estimate from CONAB).

Financial Solidity for Shareholders

In 2020, Net Revenue surpassed for the first time the mark of R\$3 billion, growing 22.1% on 2019. The increase was mainly due to the higher prices of the soybean and corn invoiced, as well as the higher volume of cotton invoiced, compared to the levels in 2019.

Adjusted EBITDA set a new record, of R\$960.3 million, with adjusted EBITDA margin expanding 2.8 p.p. to 31%. Net Income also set a new record, of R\$510.9 million, with margin of 16.5%. The operation delivered, for another straight year, positive cash generation, of R\$415.1 million, with a low leverage ratio of 0.74x (Net Debt/Adjusted EBITDA).

A highlight was the significant increase in another important indicator, Return on Invested Capital, which ended the year at 13.6%, compared to 8.7% in 2019.

As you can see, we ended 2020 with excellent levels of profitability and robust free cash generation. Cash generation in the year enabled the distribution of R\$147.5 million in dividends and R\$32.3 million in interest on equity, as well as the maintenance of very low financial leverage, which assures us the capacity to grow with financial solidity.

Property Appraisal 2020

In September, a new independent appraisal of SLC Agrícola's property portfolio was concluded by the firm Deloitte Touche Tohmatsu, which indicated a total value of R\$3.962 billion, representing appreciation of 4.62% in relation to 2019. The average price per arable hectare of the Company's properties is currently R\$19,455.

Innovation Strategy & Creation of SLC Ventures

The revision of the 2020 Strategic Planning with the Board of Directors, Senior and Managers, which was conducted virtually, resulted in, among other things, the outlining and approval by the Board of a plan for <u>investments</u> in new businesses with a digital focus that adopt the latest technological trends in our industry. The initiative confers a new mandate to our Innovation Strategy with the aim of renewing the business with a long-term vision, and complements the various efforts already being adopted to <u>reinforce</u> the existing business (early-adopter of new technologies). The vehicle for these investments will be SLC Ventures.

ESG Stewardship

Since playing a leadership role in ESG is part of our strategy, we dedicated a section in the earnings release to explore the topic, as of 2Q20, seeking to give greater visibility to the goals and actions being taken in connection with Environment, Social and Governance aspects. In the second quarter, we covered Value Creation through the 6 capitals, our main goals and our governance structure. And in the third quarter, we presented information on 2 of the 3 main action fronts, namely Water & Biodiversity, Climate Change and Soil. In this edition, we explain our efforts in Stakeholder Relations.

An important milestone in our liability management was our first issue of green bonds, in the form of Agribusiness Receivables Certificates (CRA), with a second-party opinion and report, in the amount of R\$480 million. The notes are due in 2025 and all proceeds will be used in eligible projects approved and included in the Digital Agriculture, Low Carbon and Soil Conservation, and Green Fertilizer programs.

Covid-19

To weather this turbulent period, we structured various actions focusing on crisis management and followed strategies to minimize the impacts on our employees and our business.

One of these important actions was the rapid creation of a Crisis Committee, which was responsible for preparing and monitoring continuously the "Covid-19 Contingency Plan" and the "Guide to Combating Covid-19," which are two important instruments for identifying risks and vulnerabilities, as well as for creating measures to protect, control and contain any spread of covid-19 in our operations.

We also created a work protocol for identifying suspected cases of covid-19 among employees who present symptoms related to virus infection and for verifying other stakeholders who present predetermined characteristics to support rapid and effective actions. We did have cases of covid-19 among employees, but our operations were not affected and continued normally.

During the first half of 2020, a total of R\$1.6 million was donated to support measures to combat the pandemic, demonstrating the effective actions adopted by the Company in its local communities.

Outlook 2020/21 Crop Year

The 2020/21 crop year started with some delay due to below-average rainfall, especially in western Mato Grosso state. However, our planted area for the current cycle is 468,200 hectares, which represents a new record and expansion of 4.4% on 2019/20. The delay in the start of rains in the Midwest led to the postponement of soybean planting and consequently shortened the window for planting second-crop cotton and corn. As a result, a portion of the second crop initially planned for cotton was migrated to corn, which has a longer planting window, and to

cotton 1st crop. Despite the late rains, we expect to deliver the soybean yield specified in our budget. The first-crop cotton areas, which already have been planted and are in the plant development phase, are presenting high production potential. The planting of second-crop cotton ended in February, while the planting of second-crop corn is expected to be concluded at the end of the first half of March. To date, we also expect to deliver the projected yield given for both crops.

In recent months, international cotton, soybean and corn prices have improved significantly, which, combined with the BRL/USD exchange rate remaining above R\$5.00, supported an advance in the hedge position of all crops to ensure a significant increase in the BRL prices hedged for the 2020/21 and 2021/22 crop years. Considering the prices hedged, fixed production costs and expected yields, we expect to maintain a high level of profitability in 2021.

We also made progress in procuring inputs for the 2021/22 crop year. To date, we already have acquired all of the phosphate and potash. as well as 15% approximately of the chemicals for the new crop year, with both negotiations resulting in a significant decline in U.S. dollar amounts compared to the 2020/21 crop year.

Considering the current scenario for dollar-denominated costs and prices, as well as the current FX rate, our expectation is for the good levels of profitability to be maintained for 2021/22.

Important Events

At the end of July, we held our first Annual Shareholders Meeting. And early December, we held our first Virtual Public Meeting, with over 230 people participating online.

Awards

We were very pleased to commemorate the following recognitions received during the year:

- ⇒ Best Agribusiness Company in the 2020 ranking of the magazine *Institutional Investor*
 - 1st place for Sustainability (ESG Metrics)
 - 1st place for Best CEO
 - 1st place for Best CFO
 - 1st and 3rd places for Best IR Professional
 - 1st place for Best IR Team
 - 1st place for Best IR Program
 - 1st place for Best Analyst Day

⇒ **Best Companies to Work For** (GPTW)

- Elected one of the country's 150 best companies in the ranking compiled by GPTW inn partnership with the magazine Época.
- 6th place among Agribusiness companies in the ranking compiled by GPTW, the Brazilian Agribusiness Association (Abag) and the magazine *Globo Rural*.
- 9th place in the category Large Companies in Rio Grande do Sul State.
- ⇒ Winner of the **Transparency Trophy 2020** 24th ANEFAC FIPECAFI Awards.
- ⇒ Best Agribusiness Company in the ranking of **Época Negócios 360°**.
- ⇒ Winner of the **Best in Agribusiness 2020** award (magazine *Revista Globo Rural* /Editora Globo), in the category Agricultural Production.
- ⇒ Winner of the Incredible Places to Work award in the FIA Employee Experience Survey (FEEx) of the business school Fundação Instituto de (FIA).
- Recognized one of the Best Companies in People Management in the **Valor Carreira** ranking of the newspaper *Valor Econômico* and the consulting firm Mercer.
- ⇒ Second place in Agriculture and Cattle Raising in the Estadão Empresas Mais Awards.

SLC AGRÍCOLA EARNINGS RELEASE 4Q20 – Page 9 of 42

- ⇒ SLC Group placed 29th in the annual ranking of the 500 Largest Companies in the South, 2020 edition, and 9th among the 100 largest companies in Rio Grande do Sul state.
- ⇒ Elected Agribusiness Highlight in the 48th edition of RS Exports Awards sponsored by the Brazilian Association of Marketing and Sales Leaders (ADVB/RS).
- ⇒ Best Company in the Agribusiness category Best Companies in Safety & Health Awards 2020, sponsored by the Brazilian Association of Occupational Safety and Protection Material Industries (ANIMASEG).

Closing Message

The successful execution of our strategy in 2020 reflects our solid pillar formed by People, Technology/Innovation and Processes. The goal of our strategy is to obtain the best business opportunities and to remain a reference in our business of producing food and fibers, while allocating the capital invested efficiently and creating value for our shareholders. All this combined with a strong ESG pillar to protect the environment and consequently future generations.

We want to thank especially our employees who, despite facing a challenging scenario marked by physical distancing, rapidly adapted to ensure the continuity of our operations with the same efficiency. Lastly, we thank our other stakeholders for yet another year of success.

The Management

Market Overview

Commodities

Figure 1 Price Variations, Select Commodities, Jan/2020 to Jan/2021

Cotton

Figure 2 Cotton Prices in International Markets vs. Brazil

The fourth quarter of 2020 was marked by a recovery in cotton prices in the international and Brazilian markets.

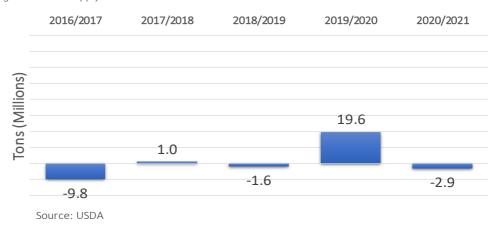

The scenario of downward revisions in production forecasts in the United States, where unfavorable weather reduced the country's cotton crop by approximately 20% in relation to initial estimates, was another key catalyst for the structural changes in cotton prices in New York over the year.

Figure 3 Estimate of Cotton Production in the United States for 2020/21 crop year

The reduction in U.S. production, combined with the expected stability in global fiber consumption, which points to the global supply-demand balance ending the current cycle with a deficit of approximately 2.9 million bales, according to USDA estimates, has been an important factor for sustaining fiber prices.

Figure 4 World Supply-Demand Balance

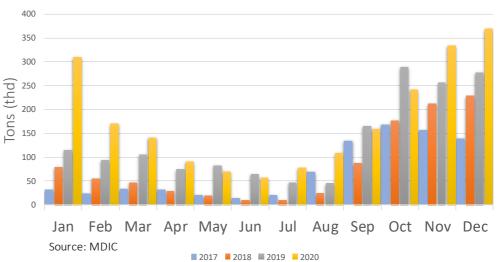

"Global supply-demand balance ending the current cycle with a deficit of approximately 2.9 million bales should be an important factor for sustaining fiber prices"

Combined with the fundamentals of the supply-demand scenario during the closing months of the year, the economic uncertainties caused by the pandemic that affected assets in general ceded space in the market narrative for optimism on advances in vaccinations and economic recovery, which consequently contributed to an increase in cotton prices of around 30% in the last quarter of the year.

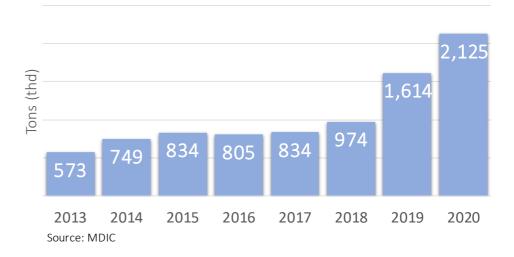

Regarding exports from Brazil, demand for the country's fiber maintained an upward trend over the year, especially in the last quarter, when record monthly shipments were responsible for sustaining and consolidating the country's position as the world's second largest cotton exporter.

Figure 5 Cotton - Monthly Brazilian Cotton Exports from 2017 to 2020

Brazilian exports ended the year at 2.1 million tons, approximately 30% higher than in 2019.

Figure 6 Annual Cotton Exports - Brazil

Soybean

Soybean spot prices quoted on the Chicago Board of Trade (CBOT) and the prices paid for the grain based on the Paranaguá/CEPEA reference maintained their upward path during the fourth quarter of 2020.

Figure 7 Soybean Price in International Market vs. Brazil

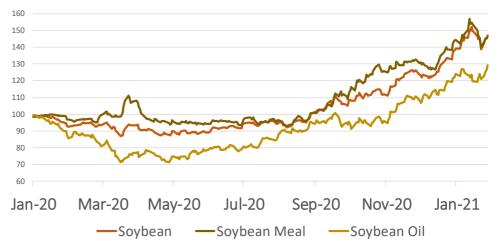

The high prices in Chicago during 2020, combined with the premiums paid and local currency depreciation, enabled soybean prices to reach levels above those in same period last year and, more recently, led to quotes of over 170.00 R\$/bag, according to CEPEA data for Paranaguá.

In a quarter marked by the resilience and subsequent increase in prices for the soybean complex in Chicago, the prices of soybeans and soy meal ended the period from January 2020 to January 2021 with a cumulative gain of over 45%, while soybean oil prices rose approximately 30%.

"Soybean prices (CBOT) registered a cumulative increase of 42.3% in 2020"

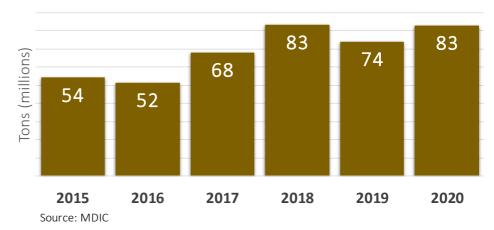

Figure 8 Soybean – Soybean Complex, January/2020 to January/2021

Source: Bloomberg - Jan-20 = 100

Brazilian soybean exports in 2020 maintained their upward trend over the last years, registering shipments of 82.9 million tons and consolidating Brazil as an important soybean supplier in the international market.

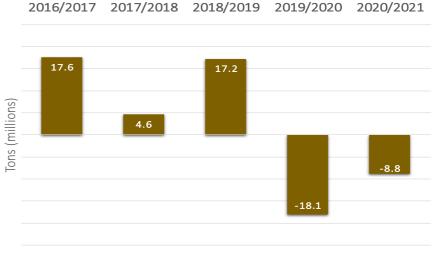

Figure 9 Soybean – Annual Soybean Exports – Brazil

"Over the year, the USDA has been revising upward its forecasts for soybean imports by China

At the global level, the global supply and demand balance for the current cycle (2020/2021) should register a deficit for the second straight year, with consumption expected to outstrip production by approximately 8.8 million tons, following the deficit of 18.1 million tons in 2019/2020.

Figure 10 Soybean World Supply-Demand Balance

"The global supply-demand balance for the current cycle (2020/21) should register a deficit for the second straight year, with consumption expected to outstrip production by approximately 8.8 million tons, following the deficit of 18.1 million tons in 2019/20."

Source: USDA

Corn

Corn spot prices quoted on the CBOT registered significant volatility over 2020, in which, after a downward cycle during April, prices followed a solid path of recovery and appreciation in both the international (Chicago) and domestic (B3) markets. The period of the sharpest increases in corn prices was the last quarter of the year.

Source: Bloomberg

In July, August and September, prices on the U.S. exchange showed signs of recovery after the country's corn planted area was affected by adverse weather conditions. Later, in the last quarter of the year, a scenario of strong demand, mainly due to U.S. corn exports to China, continued to support the grain's prices in Chicago.

-Corn - CBOT —Corn - B3

Similarly, in Brazil, where production regions in the South faced adverse weather conditions for the development of first-crop corn, for which production data should confirm the actual volumes produced, the market remained strong over the entire year due to demand from the animal protein industry and from export markets. Accordingly, local supply and demand dynamics, combined with the conditions marked by uncertainty in the United States, set the tone for prices in the domestic market.

Figure 12 Corn – Monthly Brazilian Corn Exports from 2017 to 2020

"In Brazil, the market remained strong over the year driven by the animal protein industry and export markets"

> In exports, shipments from Brazil between January and December surpassed 34 million tons, which was approximately 20% lower than in the last cycle, but higher than the average of the last 5 years. In the global scenario, the difference in supply and demand should result in a

shortfall of 11.8 million tons in the 2020/21 crop year. The persistence of the global shortfall should work to accelerate the growth in consumption and the drawdown in global stocks, which could become a significant factor sustaining future corn prices in the international market.

Figure 13 Corn –World Supply-Demand Balance

"In the global scenario, the supply-demand imbalance should result in a shortfall of 11.8 million tons in the 2020/21 crop year"

Source: USDA

Operational Performance – 2019/20 Crop Year

Planted Area

The following table presents the latest data on planted area for the 2019/20 crop year and a comparison with the previous crop year. For more details, see the Additional Information section of this document.

Table 1 Planted Area by Crop, 2018/19 vs. 2019/20

Crop Mix	Planted Area 2018/19	Planted Area 2019/20 ⁽¹⁾	Share 2019/20	Δ%
	ha	a	%	
Cotton	123,727	125,462	28.0	1.4
Cotton lint 1st crop	72,852	74,054	16.5	1.6
Cotton lint 2nd crop	50,875	51,408	11.5	1.0
Soybean (Commercial + Seed)	243,148	235,444	52.5	-3.2
Corn 2 nd crop	89,312	82,392	18.4	-7.7
Other Crops (2)	1,912	5,270	1.1	175.6
Total Area	458,099	448,568	100.0	-2.1

⁽¹⁾ Weather factors may affect the planted area forecast.
(2) Wheat, corn 1st crop, corn seed and brachiaria.

The planted area contracted 2.1% from the previous crop year, due to the delay in the start of rains in the state of Maranhão, which postponed the planting of soybean, thereby reducing the planting potential of second-crop corn.

Yields

Table 2 Actual Yields for 2019/20 Crop Year

Yields (kg/ha)	2018/19 Crop Year	2019/20 Crop Year	2019/20 Crop Year	Δ%	Δ%	Δ%
Ticius (kg/Tia)	Achieved (a)	Budget (b)	Achieved (c)	(c) x (a)	(b) x (a)	(c) x (b)
Cotton lint 1 st crop	1,688	1,842	1,779	5.4%	9.1%	-3.4%
Cotton lint 2 nd crop	1,613	1,749	1,705	5.7%	8.4%	-2.5%
Cotton seed	2,090	2,261	2,175	4.1%	8.2%	-3.8%
Soybean (Commercial + Seed)	3,739	3,607	3,900	4.3%	-3.5%	8.1%
Corn 2 nd crop	7,121	7,385	7,333	3.0%	3.7%	-0.7%

Commercial Soybean

For the third straight year, we set a new yield record, which is in line the Company's current strategy of focusing on maximizing operating efficiency. This record yield was 8.1% higher than our initial projection and 15.4% higher than the national average (Feb/2021 estimate from CONAB).

Soybean Seed

We have produced 373 thousand bags of soybean seed. Of the production, 120,000 bags were used for internal consumption (as seeds for the 2020/21 crop) and 128,000 for the vertically oriented model. In addition, 125,000 bags were sold under the brand SLC Sementes. The germination quality indicator stood at 94.8%.

Cotton 1st crop

Despite the crop's good development, some areas in the states of Bahia and Maranhão suffered water scarcity, with low humidity and high temperatures during the crop's formation. As a result, production potential was slightly reduced, leading to production 3.4% below the initial projection. However, final production reached 1,779kg kg per hectare, 5.4% higher than the yield in the previous crop.

Cotton 2nd crop

Second-crop cotton also was affected by water stress during the crop's planting and the cotton-ball development phase, manly in the region of Mato Grosso state. The final yield was 1,705 kg/ha of cotton lint, 2.5% lower than the projected volume and <u>5.7% higher than the yield registered in 2018/19 crop year</u>.

Cor 2nd crop

The yield of second-crop corn was <u>3.0% higher than in the 2018/19 crop year</u> and 0.7% lower than the projected rate, at 7,333 kg/ha. In relation to the <u>national average, the yield was 34.4% higher</u> (Feb/2021 estimate from CONAB).

Production Cost – 2019/20 Crop Year

Table 3 Actual Production Cost in R\$/hectare, 2019/20 Crop Year

Total (R\$/ha)	Budget 2019/20	Achieved 2019/20 ⁽¹⁾	Δ%
Cotton 1 st crop	8,397	9,362	11.5%
Cotton 2 nd crop	7,727	8,264	6.9%
Soybean	2,901	3,015	3.9%
Corn 2 nd crop	2,410	2,545	5.6%
Total average cost	4,368 ⁽²⁾	4,597	5.2%

⁽¹⁾ Figures may suffer changes by the end of cotton processing and the sale of grains.
(2) Weighted by areas in the 2019/20 crop year to avoid impacts from changes in the product mix.

The final cost per hectare was 5.2% above the estimate, mainly due to the higher USD/BRL exchange rate compared to the assumption adopted in the budget. The increase was fully offset by revenue, in accordance with the Company's hedge policy.

Operational Performance – 2020/21 Crop Year

The following table presents initial planting intentions for the 2020/21 crop year and a comparison with the previous crop year.

Planted Area

The latest data on planted area for the 2020/21 crop year is presented in the following table. Compared to the first estimate, disclosed in November 2020, planted area had a slight reduction to 468.2 thousand hectares, due to some one-time adjustments in planning still related to the delay in the start of rains in the Midwest.

For more details on the planted area, see the Additional Information section of this document.

Table 4 Planted Area by Crop, 2020/21 vs. 2019/20

Crop Mix	Planted Area 2019/20	Planted Area 2020/21 ⁽¹⁾	Share 2020/21	Δ%
	ha		%	
Cotton	125,462	109,660	23.4	-12.6
Cotton lint 1st crop	74,054	78,015	16.7	5.3
Cotton lint 2nd crop	51,408	31,645	6.8	-38.4
Soybean (Commercial + Seed)	235,444	229,497	49.0	-2.5
Corn 2 nd crop	82,392	110,670	23.6	34.3
Other ⁽²⁾	5,270	18,369	3.9	248.6
Total Area	448,568	468.196	100.0	4.4

⁽¹⁾ Weather factors may affect the planted area forecast.

Yields

Table 5 Projected Yields, 2020/21 Crop Year

Yields (kg/ha)	2019/20 Crop Year	2020/21 Crop Year	Δ%
	Budget	Budget	
Cotton lint 1st crop	1,842	1,863	1.1%
Cotton lint 2 nd crop	1,749	1,638	-6.3%
Cotton seed	2,261	2,221	-1.8%
Soybean (Commercial + Seed)	3,607	3,755	4.1%
Corn 2 nd crop	7,385	7,567	2.5%

Commercial Soybean

In the Midwest, as mentioned in the 3Q20 Earnings Release, there was a delay in the start of rains, which led to a revision of the agricultural plan for the region. After planting, there was a good distribution of rainfall, which supported good crop development. Note that, in the Northeast, weather conditions were highly favorable as from the start of the cycle.

61.8% of the crop had already been harvested as of (03/04/2021). To date, the areas are presenting good potential and the expectation is to achieve the estimated yield.

Soybean Seed

The planting of areas allocated to seed production was concluded on December. To the date, 10.4% of the area had been harvested (03/04/2021 date position). The areas are presenting good potential and the expectation is for gross production to exceed the budget.

We estimate a total production of 470,000 bags, from which 120,000 bags are intended for internal consumption, 150,000 bags for sales under the brand SLC Sementes and 200,000 for verticalized production.

⁽²⁾ Other crops: (Corn 1st crop 6,391.89 ha, Corn Seed 460.79 ha, Popcorn Corn 911.87 ha, Wheat 675.77 ha, Livestock 3,526.71, Brachiaria Seed 6,069.43 ha and Mung Beans 332.14 ha). Total: 18,368.60 ha.

Cotton 1st crop

Most of the planted area fell within the ideal planting window, i.e., up to end-December. The areas already are passing from the plant development phase to the flowering phase and present potential to reach the estimated yield.

Cotton 2nd crop

The delay in soybean planting due to the later than usual rains consequently delayed harvesting, which affected the ideal window for planting second-crop cotton. To optimize the potential of the planting window for second-crop cotton, we reduced the planted area and increased the area for second-crop corn, which has a longer planting window. Even with the reduction of the area, sowing was carried out at the end of the planting window, reducing the productive potential. We are estimating a productivity of 1,638 kg/ha, 6.3% lower than the previous harvest budget.

Production Cost - 2020/21 Crop

Table 6 Breakdown of Projected Production Cost by Crop (R\$/ha), 2020/21 Crop Year

%	Cotton	Soybean	Corn	Average 2020/21	Average 2019/20
		•		· · · · · · · · · · · · · · · · · · ·	•

Table 7 Production Cost in R\$/hectare, 2020/21 Crop Year

Total (R\$/ha)	Achieved 2019/20 ⁽¹⁾	Budget 2020/21	Δ%
Cotton 1st crop	9,362	9,899	5.7%
Cotton 2 nd crop	8,264	9,306	12.6%
Soybean	3,015	3,300	9.5%
Corn 2 nd crop	2,545	2,858	12.3%
Total average cost	4,735 ⁽²⁾	5,168 ⁽²⁾	9.1%

⁽¹⁾ Figures may suffer changes by the end of cotton processing and the sale of grains.

The costs per hectare estimated for the 2020/21 crop year registered an average increase in Brazilian real of 9.1% compared to the actual costs in 2019/20 crop year, basically due to the depreciation of the Brazilian real against the U.S. dollar in the period, since approximately 60% of costs are denominated in the currency.

⁽²⁾ Weighted by areas in the 2020/21 crop year to avoid impacts from changes in the product mix.

Financial Performance

Income Statement Analysis

Adjusted EBITDA

Adjusted EBITDA in the quarter came to R\$397.9 million, up 101.8% from 4Q19, with Adjusted EBITDA Margin of 35.3%. EBITDA growth was driven by the significant improvement in prices for the soybean and corn invoiced compared to 4Q19, and by the higher cotton shipments (see the section Gross Income by Crop).

In 2020, Adjusted EBITDA was R\$960.3 million, representing a new record for the company. Considering only EBITDA from Agricultural Operations (given that the result for 2019 includes a land sale operation), Adjusted EBITDA grew by 34.2%. This performance was in large part due to the higher prices for the soybean and corn invoiced.

Note that, because of the adoption of IFRS16, lease costs were excluded from the EBITDA calculation. A total of R\$129.6 million was paid for leases in 2020, compared to R\$78.9 million in 2019.

⁽³⁾ Excludes the effects from Biological Assets, since they are noncash. (2) Excludes Write-offs of Property, Plant and Equipment and Other Property, Plant and Equipment Transactions which are noncash; (3) Note 32 of the Quarterly Financial Information; (4) Note 31 of the Quarterly Financial Information (5) Amortization of right-of-use assets - leases.

Net Revenue

Table 9 Net Revenue

(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH
Net Revenue	2,535,905	3,097,547	22.1%	819,109	1,125,770	37.4%
Cotton lint	1,212,573	1,697,671	40.0%	593,350	887,768	49.6%
Cotton seed	77,154	156,269	102.5%	24,489	74,498	204.2%
Soybean	1,036,218	1,291,803	24.7%	119,286	192,949	61.8%
Corn	253,376	383,504	51.4%	67,308	141,985	110.9%
Others	72,874	99,907	37.1%	35,128	54,872	56.2%
FX income	(116,290)	(531,607)	357.1%	(20,452)	(226,302)	n.m.

Table 10 Volume Invoiced (tons)

(Tons)	2019	2020	AH	4Q19	4Q20	AH
Volume Invoiced	2,004,703	2,107,961	5.2%	430,377	495,967	15.2%
Cotton lint	185,374	215,965	16.5%	90,930	108,466	19.3%
Cotton seed	234,986	281,613	19.8%	75,020	119,074	58.7%
Soybean	898,368	899,278	0.1%	98,121	85,053	-13.3%
Corn	634,644	662,840	4.4%	152,650	165,615	8.5%
Others	51,331	48,265	-6.0%	13,656	17,759	30.0%

Net Revenue grew 37.4% in 4Q20 compared to 4Q19, basically due to the lower prices invoiced for all crops, combined with the higher volume of cotton and corn invoiced. In 2020, Net Revenue surpassed for the first time the mark of R\$3 billion, growing 22.1% on 2019. The increase was supported mainly by the higher prices invoiced for soybean and corn as well as the higher volume of cotton invoiced compared to 2019.

Table 11 Variation in Fair Value of Biological Assets

, ,						
(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH
Variation in Fair Value of Biol. Assets	504,751	775,534	53.6%	86,308	85,329	-1.1%
Cotton lint	224,433	298,465	33.0%	-	-	-
Cotton seed	15,411	28,208	83.0%	-	-	-
Soybean	229,668	315,535	37.4%	83,856	82,419	-1.7%
Corn	17,933	62,353	247.7%	-	-	-
Others	17,306	70,973	310.1%	2,452	2,910	18.7%

The calculation of Variation in Fair Value of Biological Assets ("VFVBA") reflects the estimated gross margin (sale price at farm less unit costs incurred) of crops presenting significant biological transformation in the calculation period.

This quarter, we started the recording of VFVBA for soybean crop in 2020/21 crop year. At the start of 2020/21 crop year, there was a delay in soybean planting, mainly in the Mato Grosso state region, due to the lack of rainfall in normal periods for soybean planting. In view of this delay in planting, upon the calculation of fair value of biological assets, harvest area decreased (33,000 hectares in 4Q20 versus 68,000 hectares in 4Q19), which affected the recording of VFVBA, despite the expectation of higher margins when compared to the 2019/20 crop year. In the year, VFVBA was 53.6% higher than in 2019, explained by the expectation of higher margins in the 2019/20 crop year compared to the 2018/19 crop year.

Cost of Goods Sold

Table 12 Cost of Goods Sold

rable 12 cost of coods sold						
(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH
Cost of Goods Sold	(1,733,206)	(2,051,786)	18.4%	(581,307)	(686,949)	18.2%
Cotton lint	(762,874)	(945,782)	24.0%	(424,403)	(495,694)	16.8%
Cotton seed	(61,257)	(98,128)	60.2%	(18,400)	(46,276)	151.5%
Soybean	(644,331)	(697,641)	8.3%	(64,931)	(58,837)	-9.4%
Corn	(198,182)	(230,112)	16.1%	(45,321)	(53,492)	18.0%
Others	(66,562)	(80,123)	20.4%	(28, 252)	(32,650)	15.6%

Cost of goods sold in the quarter increased 18.2% compared to 4Q19, due to the higher volume of cotton and corn invoiced in the period. Combined with this factor, there was also an increase in unit cost for soybean and corn, in line with the higher cost per hectare of 2019/20 crop year compared to 2018/19 crop year, which was partially offset by better yields. In the case of cotton, despite the higher volume invoiced, the unit cost was lower, due to the mix of farms that invoiced the product in the period. In 2020, cost of goods sold increased 18.4% in relation to 2019,

reflecting the higher volumes invoiced and the higher unit costs, mainly due to the Brazilian real depreciation. This increase was partially offset by the higher yields in the 2019/20 crop year compared to the 2018/19 crop year.

Table 13 Realization of Fair Value of Biological Assets

(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH
Realiz. of the Fair Value of Biological Assets	(524,266)	(750,996)	43.2%	(125,029)	(185,662)	48.5%
Cotton lint	(254,413)	(281,368)	10.6%	(93,016)	(142,228)	52.9%
Cotton seed	(15,898)	(21,114)	32.8%	(4,832)	(8,584)	77.6%
Soybean	(217,389)	(317,382)	46.0%	(20,991)	(16,145)	-23.1%
Corn	(19,593)	(63,591)	224.6%	(5,762)	(18,007)	212.5%
Others	(16,973)	(67,541)	297.9%	(428)	(698)	63.1%

The Realization of Fair Value of Biological Assets (RFVBA) is the corresponding entry to Variation in Fair Value (calculated upon harvest) and is recognized as the products are invoiced.

RFVBA was 48.5% higher than in 4Q19, led by cotton, given the higher volume invoiced in the period. In 2020, RFVBA was 43.2% higher than in 2019, due to the higher margin estimated upon the recording of fair value of biological assets.

Gross Income by Crop

To contribute to a better understanding of margins by crop, in this section the gain (loss) from currency hedge is allocated among cotton, soybean and corn.

Cotton Lint and Cotton Seed

Table 14 Gross Income - Cotton Lint

Cotton Lint		2019	2020	АН	4Q19	4Q20	AH
Volume Invoiced	Ton	185,374	215,965	16.5%	90,930	108,466	19.3%
Net Revenue	R\$/thd	1,212,573	1,697,671	40.0%	593,350	887,768	49.6%
Result of currency hedge	R\$/thd	(61,699)	(398,374)	545.7%	(16,468)	(187,714)	n.m.
Net inc. adj. for the result of cur. hed.	R\$/thd	1,150,874	1,299,297	12.9%	576,882	700,054	21.4%
Unit Price	R\$/ton	6,208	6,016	-3.1%	6,344	6,454	1.7%
Total Cost	R\$/thd	(762,874)	(945,782)	24.0%	(424,403)	(495,694)	16.8%
Unit Cost	R\$/ton	(4,115)	(4,379)	6.4%	(4,667)	(4,570)	-2.1%
Unitary Gross Income	R\$/ton	2,093	1,637	-21.8%	1,677	1,884	12.3%

Of the volume of cotton invoiced in 4Q20, 100% refers to the 2019/20 crop year. The 12.3% increase in Unit Gross Income in the quarter was due to the combination of higher prices and lower unit costs. In 2020, Unit Gross Income from cotton fell 21.8% from 2019, due to the 3.1% reduction in unit price combined with the 6.4% increase in unit cost. The latter factor reflects the increase in average cost and decrease in average yield per hectare of cotton invoiced during the year (37% - 2018/19 *crop*, 63% -2019/20 *crop*) compared to 2019 (41% -2017/18 *crop*, 59% - 2018/19 *crop*).

Table 15 Gross Income - Cotton Seed

Cotton Seed		2019	2020	AH	4Q19	4Q20	AH
Volume Invoiced	Ton	234,986	281,613	19.8%	75,020	119,074	58.7%
Net Revenue	R\$/thd	77,154	156,269	102.5%	24,489	74,498	204.2%
Unit Price	R\$/ton	328	555	69.2%	326	626	92.0%
Total Cost	R\$/thd	(61,257)	(98,128)	60.2%	(18,400)	(46, 276)	151.5%
Unit Cost	R\$/ton	(261)	(348)	33.3%	(245)	(389)	58.8%
Unitary Gross Income	R\$/ton	67	207	209,0%	81	237	192.6%

In the quarter, cotton seed Unit Gross Income increased significantly. Despite the higher unit cost, this performance is mainly due to the higher unit price, which rose by 92.0% in the quarter (4Q20 vs. 4Q19), reflecting domestic demand for animal food supplements and biodiesel production. Cotton seed Unit Gross Income increased significantly in comparison with 2019. Despite the higher unit cost, this performance is mainly due to the increase in unit price, of 69.2%, reflecting domestic demand for animal food supplements and biodiesel production.

Soybean

Table 16 Gross Income - Soybean

Soybean		2019	2020	AH	4Q19	4Q20	AH
Volume Invoiced	Ton	898,368	899,278	0.1%	98,121	85,053	-13.3%
Net Revenue	R\$/thd	1,036,218	1,291,803	24.7%	119,286	192,949	61.8%
Result of currency hedge	R\$/thd	(46,758)	(106,204)	127.1%	(1,490)	(29,600)	n.m
Net inc. adj. for the result of cur. hedging	R\$/thd	989,460	1,185,599	19.8%	117,796	163,349	38.7%
Unit Price	R\$/ton	1,101	1,318	19.7%	1,201	1,921	60.0%
Cost Total	R\$/thd	(644,331)	(697,641)	8.3%	(64,931)	(58,837)	-9.4%
Unit Cost	R\$/ton	(717)	(776)	8.2%	(662)	(692)	4.5%
Unitary Gross Income	R\$/ton	384	542	41.1%	539	1,229	128.0%

Soybean Unit Gross Income in 4Q20 compared to 4Q19 registered strong growth of 128%, due to better prices for the soybean invoiced and the higher yield achieved in 2019/20 compared to 2018/19. In 2020, soybean Unit Gross Income increased 41.1% from 2019, due to the better average invoiced prices.

Corn

Unit Cost	R\$/ton	(312)	(347)	11.2%	(297)	(323)	8.8%
Unitary Gross Income	R\$/ton	75	197	162.7%	128	503	293.0%

In 4Q20, unit gross income increased 293% in relation to 4Q19, mainly due to the higher average sales price, with this factor partially offset by the higher unit cost, reflecting the higher costs per hectare in the 2019/20 crop year compared to the 2018/19 crop year. In 2020, 93% of the corn invoiced was produced in the 2019/20 crop year. The 162.7% increase in Unit Gross Income reflects the better invoiced prices, with this factor partially offset by the increase in unit cost.

Gross Income

Table 18 – Gross Income

Table 10 Gross medine						
(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH
Gross Profit	783,184	1,070,299	36.7%	199,081	338,488	70.0%
Cotton lint	388,000	353,515	-8.9%	152,479	204,360	34.0%
Cotton seed	15,897	58,141	265.7%	6,089	28,222	363.5%
Soybean	345,129	487,958	41.4%	52,865	104,512	97.7%
Corn	47,361	130,227	175.0%	19,493	83,369	327.7%
Others	6,312	15,920	152.2%	6,876	18,358	167.0%
Biological Assets	(19,515)	24,538	n.m	(38,721)	-100,333	159.1%

To support the analysis of consolidated Gross Income, we excluded the effects from Biological Assets (Variation and Realization of Fair Value) to show the actual margins of products invoiced in the period.

In the quarter compared to 4Q19, biological assets increased by 159.1%, mainly due to the growth in Gross Income in all products. In 2020 compared to 2019, Gross Income grew 30.3%, reflecting the increase in unit gross income for the soybean and corn crops, which was partially offset by the lower income from cotton.

Selling Expenses

Selling Expenses increased 13.6% in the quarter. The main variation contributing to the increase was Export Expenses, given the higher volume of cotton invoiced combined with the Brazilian real depreciation against the U.S. dollar in the period, since the amounts are denominated in foreign currency.

In 2020, selling expenses increased 13.7% from 2019, mainly due to Export Expenses, given the higher volume of cotton invoiced combined with the Brazilian real depreciation against the U.S. dollar in the period, since the amounts are denominated in foreign currency.

Administrative Expenses

In 4Q20, Administrative Expenses (excluding amounts related to the Profit Sharing Program) increased 34.4% in relation to the prior-year quarter.

The main variations were:

- (i) Increase of 32.2% in Personnel Expenses, mainly due to adjustments to the Information Technology team to support the automation of processes;
- (ii) Expenses with Contributions and Donations supported by tax incentives, which increased 162.2% compared to 2019;
- (iii) Increase of 97.8% in Outsourcing expenses, due to the expenses with open innovation initiatives.

Administrative Expenses (excluding amounts related to the Profit Sharing Program) increased 10.8% in 2020 in relation to the same period last year.

The main variations are explained below:

- (i) Increase of 22% in Personnel Expenses, mainly due to adjustments to the Information Technology team to support the automation of processes;
- (ii) Increase in Expenses with Contributions and Donations, due to the support of health institutions for investments in initiatives to combat covid-19 in the first half and in the last guarter of the year (donations with tax incentives);
- (iii) Increase in Expenses with Communications, due to costs related to the migration to a home-office model in view of the pandemic.

Net Financial Income (Expense)

Since the Company's debt in USD swapped to BRL (in line with the Risk Management Policy), the exchange variation on dollar-denominated debt does not affect Financial Income (Loss) when we analyze aggregate figures, since any gains and losses on such debt from exchange variation are offset by gains/losses in equal proportion to the respective swap.

Table 21 Adjusted Net Financial Income (Expense)

(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH

Other financial revenues (expenses)	(1,325)	(5,783)	336.5%	(1,793)	(1,082)	-39.7%
Total	(144,050)	(91,751)	-36.3%	(45,323)	(4,883)	-89.2%
% Net Revenue	5.7%	3.0%	-2.7p.p.	5.5%	0.4%	-5.1.p.p

Adjusted Net Financial Income (Loss) decreased in 4Q20 compared to the same period last year. The main impact refers to the interest line, mainly due to the reduction in adjusted net debt during the year (compared to 2019) and the decline in the CDI rate in the period.

The increase in Adjustment to Present Value of Leases, during the quarter and the year, was due to the lengthening of the terms of certain agreements and to the increase in the price of the soybean bag in BRL (adjustment index adopted in agreements).

In 2020, there also was an increase in the line Other Financial Income (Expenses) related to the recording of negative goodwill on the expenses with PIS/COFINS on financial income.

Net Income (Loss)

Table 22 Net Income

T GO TO LE TITO TITO						
(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH

Net Income Farming Operation	292,893	510,948	74.4%	66,518	194,173	191.9%
Net Margin Farming Operation	11.5%	16.5%	5.0p.p	8.1%	17.2%	9.1p.p.
Net Profit Sale of Land	22,148	-	-100.0%	22,148	-	-100.0%

Considering only income from Agricultural Operations (given the contribution in 2019 from land sales), Net Income in the quarter compared to 4Q19 increased by R\$127.6 million, or 191.9%, mainly due to the significant improvement in Gross Income from crops. Net margin was 17.2%, expanding 9.1 p.p. compared to 4Q19.

In 2020, net income reached R\$510.9 million, growing 74.4% from 2019 (considering only the result from agricultural operations). The increase was mainly due to the higher Gross Income from the soybean and corn crops, which was partially offset by the lower Income from cotton.

Net margin from farming operation ended the year at 16.5%, representing expansion of 5.0 p.p. on the prior year.

Statement of Cash Flow Analysis

Free Cash Flow was positive in 4Q20, mainly due to the lower Working Capital Needs (Changes in Assets and Liabilities), explained by the higher volumes of crops invoiced, especially cotton.

The quarter was also influenced by the receipt of inputs for the next crop year, which increased the balance of the line Suppliers. Note that in 4Q20 there also was the receipt of the final portion of the amount related to the sale of a property in 2019, with a positive impact of R\$42.6 million in the quarter.

In 2020, Free Cash Generation was R\$415 million, more than double the generation in 2019, mainly due to the strong growth in operating cash generation, led by the increase in gross income from soybean and corn crops.

Table 23 Summarized Cash Flow

(R\$ thd)	2019	2020	AH	4Q19	4Q20	AH

Total	276,531	234,246	-15.3%	35,632	45,144	26.7%

Investments increased 26.7% in 4Q20 compared to 4Q19. The main investments in the quarter were in Machinery & Equipment and Soil Correction. In the line Machinery, the main acquisition7s refer to planters and tractors for the Planeste Farm and to tractors for the Planorte Farm. Soil correction was carried out at all farms, with the highlights the Pioneira, Paiaguás and Parnaíba farms.

In the year, CAPEX was 15.3% lower than in 2019, basically reflecting the postponement of certain expenditures to 2021.

⁽²⁾ Due to the adoption of IFRS 16, the payment of leases is now accounted in the Statement of Cash Flows under Financing Activities. However, it should be considered as operating cash disbursement.

Debt

Adjusted Net Debt ended 2020 at R\$708 million, <u>decreasing R\$265.3 million</u> compared to 2019. This reduction is explained by the strong free cash generation in the year, of **R\$415.1 million**.

Of this free cash, R\$147.5 million was used to pay dividends (for fiscal year 2019) and R\$32.3 million to pay interest on equity (for fiscal year 2020).

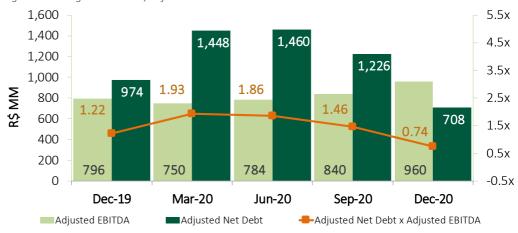

Note that, in November, the Company successfully placed its third CRA issue, in the amount of R\$480 million, with interest of IPCA + 3.6726% p.a. (with a swap operation to convert IPCA + 3.6726% p.a. to CDI + 1.85% p.a.) and amortizations in the fourth and fifth year, which lengthened the debt profile at an attractive cost.

Figure 14 Change in Net Debt/Adjusted EBITDA Ratio

Hedge position

Currency and agricultural commodity hedge

The Company's sales revenues are generated mainly by the trading of agricultural commodities such as cotton, soybean and corn, which are quoted in U.S. dollar on international exchanges, such as the Chicago Board of Trade (CBOT) and the Intercontinental Exchange Futures US (ICE). Therefore, we are actively exposed to variations in foreign exchange rates and in the prices of these commodities. To protect from currency variation we use derivative instruments, with the portfolio of these instruments basically comprising non-deliverable forwards (NDFs). In line with the Company's Risk Management Policy, whose purpose is to obtain a pre-established Adjusted EBITDA margin with a combination of factors such as Price, Foreign Exchange and Cost, most of the instruments for protecting against commodity price variation are accomplished through advanced sales directly with our clients (forward contracts). We also use futures and options contracts negotiated on the exchange and swap and option transactions contracted with financial institutions. The mark-to-market adjustments of future, swap and option transactions are recorded under financial income (expense).

The hedge position for commodities (in relation to the estimated total volume invoiced) and currency (in relation to the total estimated revenue in U.S. Dollar) is shown below, broken down by commercial hedge and financial hedge and updated as of March 8:

Environment, Social & Corporate Governance (ESG)

STAKEHOLDER RELATIONS

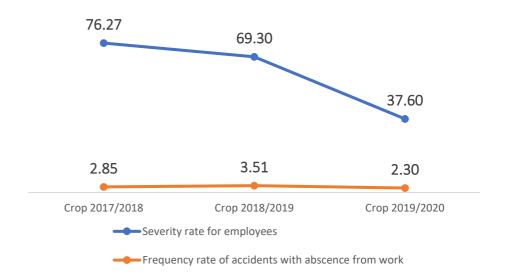

We build long-term, ethical and transparent relationships with all stakeholders connected to our business model. We identify and work to improve our operations to meet the expectations and demands of suppliers, employees and communities in the municipalities where we have operations. To strengthen relations, we also disclose our corporate values and our strategy for materializing our purpose: Our Big Dream. Open dialogue and respect for diversity are key pillars that sustain our way of acting.

Safety and quality of life

Our first priority is the safety and health of our employees and of the people in our operations. The Integrated Management System (SGI), which already has been certified under the new standard ISO 45001, establishes the procedures and protocols for avoiding the risks of accidents, executing continuous improvement plans and ensuring health and quality of life. The effective adoption by our units of the SGI is evaluated monthly at all farms (even those not certified yet), through the Safety, Quality & Productivity (SQP) Program. Under the SQP, local committees composed of the farm's manager, area coordinators and other select professionals monitor a series of indicators to identify opportunities for improvement and to establish action plans. In 2019/20 crop year, we registered the Company's best performance ever, with significant reduction in accidents with lost-time injuries involving both employees (from 38 to 25 compared to the prior crop year) and third parties (from 10 to 3). Considering only employees, the injury frequency rate declined by 31% from the previous crop year. Meanwhile, the severity rate fell by 46%.

Figure 15 Safety Indicators

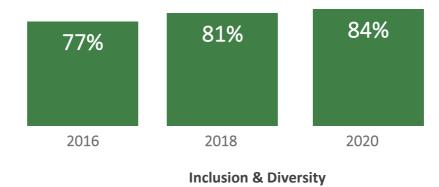

Human Capital

Employee engagement in performing activities efficiently and precisely is essential for our Company's success and for achieving the goals we establish every year. As such, we create and maintain a workplace that attracts and develops people who are connected to Our Big Dream, while valuing diversity, inclusion and individual growth.

At the end of 2020, we had 2,723 employees with at-will employment contracts and working full time, as well as 74 apprentices and 44 interns. The team is distributed across our 16 farms and the Company's headquarters located in Porto Alegre, Rio Grande do Sul.

On the farms, over the course of the year, we also employ temporary workers to support planting and harvesting operations for our soybean, corn and cotton crops. These professionals have short-term employment contracts executed in accordance with all requirements and legal parameters established by the Consolidation of Labor Laws (CLT), Federal Law 5,889/73 and Decree 73,626/79, which govern this type of employment relationship. Given that the number of temporary workers varies during the year, this Report always monitors the average number of these professional in each period. In 2020, the average was 1,025 people, stable in relation to the 1,021 people in 2019.

Figure 16 Changes in Pensa Survey – Employee Satisfaction

Ensuring an inclusive workplace that values diversity is part of Our Big Dream. To support these efforts, two initiatives in particular are carried out at all our units. One is the Semear Program, which focuses on the professional development and growth of persons with disabilities (PwDs).

Our company aspires to go beyond mere compliance with legal requirements (Federal Law 8,213/91), and we want our professionals with disabilities to have the autonomy and quality to perform their functions.

With this purpose, the Semear Program features lectures, behavioral training and technical education, such as the course on Brazilian Sign Language (BSL) for all employees. Another action is the Youth & Adult Education (EJA) program, which is made available on our farms to employees who have not completed elementary or high school. In 2020, even with the covid-19 pandemic, some units maintained their on-site classes. At other farms located in municipalities that were more affected, classes were suspended by the local education departments.

Figure 17 Investment in Education – Employees Enrolled in EJA

Partnership with Communities

Our Company contributes to the growth and development of communities in the municipalities where we are located. The purpose of this local partnership is to carry out actions that improve quality of life, education and the local situation.

Our initiatives were expanded in 2020 with the creation of the SLC Institute, which was conceived by the SLC Group (our company's shareholder), which is responsible for managing the resources we allocate to Social Private Investment (ISP). One of the main advantages of this configuration is the capacity to join forces with other companies in the SLC Group, such as SLC Maquinas.

Created as a non-profit organization, SLC Institute focuses on developing people and communities by supporting education as an important vector of social transformation and opportunity creation.

In 2020, its initiatives focused on cooperation in combating the coronavirus pandemic, with donations amounting to R\$1.6 million (learn more at https://www.slc.com.br/instituto-slc).

Of this amount, R\$1 million came from the own funds of SLC Agrícola. Combined with the funds involving tax incentives allocated to social projects in 2020, the Company's total social investment last year was R\$2.9 million. One of these was the Entrepreneur Project, which works to reduce dropout rates through educational initiatives that foster knowledge, self-esteem and better communication between students and teachers. Over the last year, due to the pandemic, on-site workshops were postponed, and we conducted five sessions 100% online, with the participation of 99 teachers.

Return Indicators

The Company believes that the calculation of Return on Equity, Return on Net Assets and Return on Invested Capital should consider, in addition to operating income in the period, the net annual appreciation (based on the independent report of Deloitte Touche Tohmatsu Consultores Ltda., prepared every year) in the value of its land.

Table 27 Return on Equity

(R\$ million)	2014	2015	2016	2017	2018	2019	2020
Net Profit ⁽¹⁾	70	121	16	289	405	293	511
Net Land Appreciation ⁽²⁾	428	140	199	19	110	142	216
Subtotal	498	261	215	308	515	435	727
Shareholder's Equity ⁽³⁾	3,771	3,911	4,346	4,438	4,641	4,973	5,361
Return	13.2%	6.7%	4.9%	6.9%	11.1%	8.7%	13.6%

⁽¹⁾ Even in periods that encompass net income from the land sales, in this analysis only the profit of the "agricultural operation" is considered, since the gains from appreciation of land are being considered in a specific item.
