NIRE 33300298673

**NOTICE TO THE MARKET**

**Raízen S.A. (B3: RAIZ4)** announces to its shareholders and to the market that the company has entered into an agreement for its first long-term sale of renewable natural gas (“Biomethane”) with Yara Brasil Fertilizantes S.A. (“Yara”), one of the largest consumers of natural gas in Brazil. This contract has a term of 5 years with a volume of 20,000 cbm/day. The supply of Biomethane will be carried out through Raízen’s bioenergy parks using vinasse and filter cake which are considered residues from the ethanol production process, to be used by Yara to produce hydrogen and green ammonia in its industrial parks.

This pioneering transaction in the free gas market reinforces Raízen's commitment to provide its customers with products and solutions that reduce greenhouse gas emissions by increasing the efficiency and circularity nature of its processes, without necessity to increase planted area and supporting decarbonization of the global energy matrix.
