Notice to the Market**Start of operations of Goodnight 1**

SERENA ENERGIA S.A. ("Company" – Novo Mercado: SRNA3), hereby informs the market that it has started operations of Goodnight 1 wind power plant in Texas, the company's first operating plant in Ercot, the largest energy market in US.

Goodnight 1 has 265.5 MW of installed capacity, its 59 Vestas turbines are fully assembled and should reach full commercial operation by year end, when it will produce renewable energy that can power more than 60,000 homes in the state of Texas.

The project had a CAPEX of approximately US\$300 million and expansions can be launched through the next years as demand for renewable energy continues to rise in the US.

In addition to Serena's equity and long-term financing raised with a syndicate of banks, Goldman Sachs will invest in Goodnight 1 in the form of Tax Equity, and the Tax Equity funding is planned to occur right after the project reaches its full commercial operation.

Goodnight 1 is the last of three large wind projects built by the company since 2022 and, combined, Assuruá 4, Assuruá 5 and Goodnight 1 added 720 MW of new wind capacity to the company's operating portfolio.

We appreciate the support from our investors through this journey and are confident that this venture will contribute not only to the growth of Serena but also to our journey towards energy prosperity for all.
