NOTICE TO THE MARKET

Hidroviás do Brasil S.A. (B3: HBSA3) (“Company”), maintaining its commitment to transparency with the market in general, hereby informs that, during the month of June 2022, it loaded and transported iron ore in the region of Corumbá, with better cycles of navigation when compared to the same period of last year, in line with the draft scenario expected for this year, with the use of assets that operate at greater draft (above 7.5 feet).

Based on the best information and public projections available to date, Hidroviás do Brasil believes that it will load and transport iron ore in this region during the month of July 2022. It is importante to mention that the draft level in the Ladário region remains within the normality zone of this period, although below the historical averages.

The Company will keep the market informed about navigation conditions during this atypical and low-predictability period and the Investor Relations area is at your disposal to help with any doubts you may have.
